Undergraduate Degrees

Advisement

The Department of History has one full-time staff adviser available to provide academic advisement, assist in the navigation of department and university requirements, review progress and future plans. Students interested in a major or minor in the department should contact the adviser to schedule a meeting. Faculty advisers are also available to offer guidance on pursuing the field of history both within and beyond USC.

Honors Program for History (BA)

The department offers a one-semester honors program, in which qualified students are required to take HIST 492 Honors Thesis in which each completes a thesis project on a topic of his or her choosing under faculty direction. Contact the department director of Undergraduate Studies for further information. To graduate with honors, department majors must have a minimum GPA of 3.5 in their major course work and a B+ or higher in HIST 201.

Honors Program for History and Social Science Education (BA)

The department offers a one-semester honors program, in which qualified students are required to take HIST 492 Honors Thesis in which each completes a thesis project on a topic of his or her choosing under faculty direction. Contact the department honors director for further information. To graduate with honors, department majors must have a minimum GPA of 3.5 in their major course work.

Honors Program for Law, History, and Culture (BA)

The department offers a one-semester honors program, in which qualified students are required to take HIST 493 in which each completes a thesis project on a topic of his or her choosing under faculty direction. Contact the director of Undergraduate Studies for further information. To graduate with honors, department majors must have a minimum GPA of 3.5 in their major course work.

Honor Society

The department sponsors its own local chapter of Phi Alpha Theta, the national history honor society. Phi Alpha Theta provides opportunities for students to take their interest in history beyond the classroom and to cultivate their intellectual pursuits in a community setting.

Membership is open to history majors and other interested students with a 3.33 GPA in history courses and a 3.0 overall GPA. For more information contact the honors director.

Teaching Credential Requirements

Credential requirements in California and elsewhere are complex and changeable. Students interested in preparing for public school teaching should contact the Credentials Office, Rossier School of Education, and the undergraduate adviser, Department of History, for up-to-date information.

Interdisciplinary Minor in Early Modern Studies

This minor brings together the resources of the departments of English, History and Art History to study the literatures and cultures of Europe and the Americas from the late medieval period to 1800. For a complete listing of requirements, see Department of English.

Interdisciplinary Middle East Studies Minor

See the Department of Middle East Studies.

Interdisciplinary Race, Ethnicity and Politics Minor

See Department of Political Science.

Interdisciplinary Russian Area Studies Minor

See Department of Slavic Languages and Literatures.

Interdisciplinary Law and Society Minor

See Department of Political Science.

Graduate Degrees

The graduate program in History offers a rigorous course of study that balances depth in particular fields with a broad, transnational and interdisciplinary perspective. We train our students in historical methods, research, critical analysis of written and visual sources, historical writing, and historical pedagogy through intensive reading courses, seminars and tutorials. This training culminates in the PhD dissertation, a significant scholarly and historiographical contribution to the study of a field.

Admission Requirements

Prerequisites

An applicant should have an undergraduate degree or an MA degree in history or a related discipline. Promising students trained in other fields will also be considered.

Criteria

All applicants must take the general test of the Graduate Record Examinations. The subject test in history is not required. In addition, applicants must submit at least three letters of recommendation from college-level instructors and a sample of written work from a college-level history, social science or humanities course. This material should be uploaded through the Graduate Admission application portal.

Procedure

For complete information on the doctoral program, prospective applicants should address inquiries to Graduate Admission, Department of History, SOS 153, University of Southern California, Los Angeles, CA 90089-0034. Information on the programs is also available online at dornsife.usc.edu/hist/doctoral-program/.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and The Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Advisement

Students should seek advice on their program of studies from the Director of Graduate Studies, a professor in their major field of study and other members of their qualifying exam committee.

Bachelor's Degree

History (BA)

The Bachelor of Arts in History requires students to take 10 courses (40 units).

Lower-Division Requirements

All majors are required to complete HIST 201, Approaches to History. It is recommended that students complete HIST 201 early in their course of study.

Three additional lower-division geographic survey courses are required and must include at least one 100-level course and one 200-level course. Majors must complete a lower-division course in each of the following geographic distributions: Asia and Eurasia, Europe, and North and Latin America. The Department of History will accept scores of 4 or 5 on either Advanced Placement European History or Advanced Placement American History as a substitute for one geographic survey course requirement at the 100-level.

Upper-Division Requirements

Six upper-division courses are required, of which at least two must be a 400-level seminar. A minimum of three courses, one of which must be a 400-level seminar, must pertain to a thematic, temporal or geographic concentration, which must be approved by a faculty adviser. No more than 4 units of HIST 490 Directed Research may be counted as satisfying the upper-division seminar requirement.

Temporal Breadth Requirements:

For temporal breadth, at least one of the 10 required courses must be taken from approved course work in each of the three following time periods: before 1300, 1300-1800 and 1800-present. Students may refer to the department Website, STARS Report, and/or faculty or staff adviser to assist with determining the courses that meet these requirements.

History and Social Science Education (BA)

This degree is designed for students who are interested in a career in secondary school teaching. The courses chosen reflect the content of subjects taught in high schools and middle schools in California and therefore should be useful for those contemplating the profession of teaching history and social studies. It does not, however, provide a waiver of the CSET examination.

Required Courses

- ECON 203g Principles of Microeconomics Units: 4
- ECON 205g Principles of Macroeconomics Units: 4
- HIST 201 Approaches to History Units: 4
- HIST 488 Teaching History in the Secondary Schools Units: 4

Additional Requirements

Surveys of U.S. and World History

Choose three from the following:

- HIST 100gm The American Experience Units: 4
- HIST 240gp The History of California Units: 4
- HIST 349 Colonial North America 1600–1760 Units: 4
- HIST 360 19th Century U.S. History Units: 4
- HIST 361 20th Century U.S. History Units: 4
- HIST 440 Early Modern World History Units: 4
- HIST 441 Modern World History Units: 4

Pre-modern World History

Choose one of the following:

- HIST 101gp State and Society in the Ancient World Units: 4
- HIST 102gm The Worlds of Medieval Europe Units: 4
- HIST 103g The Emergence of Modern Europe Units: 4
- HIST 180gw The Middle East Units: 4
- HIST 275g The Worlds of the Silk Road Units: 4
- HIST 335 History of Japan to 1550 Units: 4
- HIST 338 China to 960 A.D. Units: 4
- HIST 339 China, 960–1800 A.D. Units: 4
- HIST 369 History of the Indigenous Peoples in the Americas Units: 4
- HIST 382 The Middle East, 500–1500 Units: 4

Modern World History

Choose one of the following:

- HIST 104gp Modern Europe Units: 4
- HIST 333 Korea: The Modern Transformation Units: 4
- HIST 336 History of Japan, 1550–1945 Units: 4
- HIST 340 History of China since 1800 Units: 4
- HIST 370 Spanish America, 1492–1821 Units: 4
- HIST 372 Modern Latin America Units: 4
- HIST 383 The Modern Middle East Units: 4

Political Science

Choose one of the following:

- POSC 100g Theory and Practice of American Democracy Units: 4
- POSC 300 Principles, Institutions, and Great Issues of American Democracy Units: 4
- POSC 340 Constitutional Law Units: 4

Required Capstone Seminar

(see under "required courses")

A capstone seminar, HIST 488 Teaching History in the Secondary Schools, will be taught by a member of the history department and will focus on the ways in which historical research is brought into middle and high school curriculum. Seminar participants will examine textbooks and other materials designed for history instruction; engage in independent research; write curriculum and/or classroom units or lesson plans; and visit classrooms to assist with history instruction in the schools.

Honors Thesis

In addition to the 10 courses required for the major, students pursuing departmental honors must complete one additional course, HIST 492 Honors Thesis. This course will be taught by a history department faculty for select students choosing to research and write an honors thesis.

- HIST 492 Honors Thesis Units: 4

Law, History, and Culture (BA)

Law, History and Culture is designed for students drawn to interdisciplinary, humanistic study of law and culture, as well as those who intend to pursue a law degree. It offers students an interdisciplinary education in legal institutions, languages and processes that are central to social, cultural and political developments in the past and present, and play a critical role in shaping our most basic concepts and categories of thought and identity. Students will gain theoretical and analytical perspectives on ethical, political and social issues relevant to law as they explore specific legal issues from a humanistic perspective. Students take courses in four core areas, which represent distinct disciplinary approaches to studying law's position at the nexus of society. The major helps students develop skills for critical reading, writing and analysis that are both crucial to a liberal education and a gateway to further study of law.

Requirements

This major requires a minimum of 36 units (or 40 units with honors). Majors must complete courses from all four areas of core competence. One course from Core Competence 1: Legal Reasoning, three courses from Core Competence 2: Historical Approaches, two courses from Core Competence 3: Texts and Interpretations and three courses from Core Competence 4: Society and Policy.

Core competence 1: Legal reasoning

- LAW 300 Concepts in American Law Units: 4

Core competence 2: Historical approaches

Take three courses from among the following:

- CLAS 305 Roman Law Units: 4
- CLAS 307 Law and Society in Classical Greece Units: 4
- CLAS 333 Cult and City in Ancient Greece Units: 4
- CLAS 340 Ethics and Politics in Ancient Rome Units: 4
- CLAS 348g Athens in the Age of Democracy and Empire Units: 4
- CLAS 370 Leaders and Communities: Classical Models Units: 4
- CLAS 470 Democracies Ancient and Modern Units: 4

- HIST 210gw How to Be An American: Global Histories of U.S. Citizenship Units: 4
- HIST 211gp Race in America Units: 4
- HIST 220gp Murder on Trial in America Units: 4
- HIST 265gw Racism, Sexism, and the Law Units: 4
- HIST 312 The Age of the French Revolution and Napoleon Units: 4
- HIST 320p Law, Slavery, and Race Units: 4
- HIST 323 The Holocaust in 20th Century Europe Units: 4
- HIST 351 The American Revolution Units: 4
- HIST 355 The African-American Experience Units: 4
- HIST 377 Law and Society in Premodern China and Japan Units: 4
- HIST 385 Anglo-American Law before the 18th Century Units: 4
- HIST 386 American Legal History Units: 4
- HIST 413 The Age of Revolutions Units: 4
- HIST 444 Mass Violence and Comparative Genocide in Modern World History Units: 4
- HIST 453 The Age of Emancipation Units: 4
- HIST 455 Advanced Topics in African-American History Units: 4
- HIST 456 Race, Slavery, and the Making of the Atlantic World Units: 4
- HIST 459 Race and the Carceral State Units: 4
- HIST 460 War, Race, and the Constitution Units: 4
- HIST 463 The Constitutional History of the United States Units: 4
- HIST 470 The Spanish Inquisition in the Early Modern Hispanic World Units: 4, 2 years
- LAW 101w Law and the U.S. Constitution in Global History Units: 4
- REL 361 Law and Religion Units: 4

Core competence 3: Literary, Philosophical and Theoretical Perspectives

Take two courses from among the following:

- COLT 385 Literature and Justice Units: 4
- COLT 472 Los Angeles Crime Fiction Units: 4
- COLT 475 Politics and the Novel Units: 4
- COLT 476 Narrative and the Law Units: 4
- ENGL 355g Anglo-American Law and Literature Units: 4
- ENGL 372 Literature and Related Arts Units: 4
- ENGL 374m Literature, Nationality and Otherness Units: 4
- ENGL 381 Narrative Forms in Literature and Film Units: 4
- JS 342 Reading in Two Directions: Connecting Law and Literature in Jewish Tradition Units: 4
- PHIL 430 Philosophy of Law Units: 4
- PHIL 431 Law, Society, and Politics Units: 4
- REL 360 Ethical Issues in the New Medical Revolution Units: 4
- REL 414 History of Islamic Law Units: 4
- SWMS 349 Women and the Law Units: 4
- SWMS 355 Transgender Studies Units: 4
- SWMS 358 U.S. Gay and Lesbian History Units: 4

Core competence 4: Social Movements and Social Policy

Take three courses from among the following:

- AMST 101gmw Race and Class in Los Angeles Units: 4
- AMST 320 Social Construction of Race and Citizenship Units: 4
- AMST 342m Law and Identities Units: 4
- AMST 344m Islamic Law and American Society Units: 4
- AMST 345 Law and American Indian Studies Units: 4
- AMST 353m Race and Racism in the Americas Units: 4
- AMST 357m Latino Social Movements Units: 4
- AMST 389m Carceral Geographies Units: 4
- ANTH 345 Politics, Social Organization, and Law Units: 4
- LAW 310w Global Justice for Mass Atrocities and Genocide Units: 4
- LAW 320p Law, Slavery, and Race Units: 4
- POSC 130g Law, Politics and Public Policy Units: 4
- POSC 248gw Human Rights Units: 4
- POSC 340 Constitutional Law Units: 4
- POSC 345 International Law Units: 4
- POSC 370 European Political Thought I Units: 4
- POSC 371 European Political Thought II Units: 4
- POSC 374 The American Founders: Visions, Values and Legacy Units: 4
- POSC 375 American Political Thought Units: 4
- POSC 377 Asian Political Thought Units: 4
- POSC 380 Political Theories and Social Reform Units: 2, 4
- POSC 426 The United States Supreme Court Units: 4
- POSC 441m Cultural Diversity and the Law Units: 4
- POSC 443 Law in Film Units: 4
- POSC 444 Civil and Political Rights and Liberties Units: 4

Honors

Students wishing to pursue Departmental Honors must complete one additional course, HIST 493, generally offered in the spring semester. In order to enroll for Honors, students must have taken at least one upper-division course, normally during one of the previous *two* semesters, which included a substantial original research component. The nature of the original research will depend on the field in which the student is working.

- HIST 493 Law, History and Culture Honors Thesis Seminar Units: 4

Additional notes:

No more than two of the nine required courses (8 units) may be taken at the 100 or 200 level, except with special permission of the LHC major adviser. No more than one lower-division (100 or 200 level) course may be taken in each area of core competence.

Students may petition to substitute a course not on the approved list for an approved course. In order to do so, they must complete the Course Waiver procedure. Normally no more than two courses total may be substituted for those on the approved list.

Students requesting LHC credit for courses taken out of residence (transfer, study abroad, summer school, etc.) must complete the Course Waiver procedure. Normally no more than two courses total may be substituted for those on the approved list.

Students may request permission to shift one of the required courses from one area of core competence to another area in order to accommodate their interests. (E.g., take three courses in Area 3 and two in Area 4.) In order to do so, students will have to complete the Area of Competence Substitution procedure. Normally no more than two courses can be shifted from one area to another.

Minor

History and Culture of Business Minor

The minor in the history and culture of business is available to all students in all schools and departments. It is designed to cultivate an understanding of business as it is embedded in changing cultural, social and political environments in the United States and around the globe. Completion of the minor requires twenty units; four units at the lower division and sixteen units at the upper division. At least eight units must be from Department of History course offerings. Interested students should meet with the undergraduate adviser for the Department of History.

Lower-Division Requirements

Choose one course (4 units)*

- ECON 203g Principles of Microeconomics Units: 4
- ECON 205g Principles of Macroeconomics Units: 4
- HIST 215g Business and Labor in America Units: 4
- HIST 266gp Business and East Asian Culture, 1800-Present Units: 4

Note:

*ECON 351 *or* ECON 352 *may be substituted for the lower-division requirement.*

Upper-Division Requirements

Choose four courses (16 units), at least one from each of the groups below.

Corporate Culture

- ECON 330 The Political Economy of Institutions Units: 4
- ECON 348g Current Problems of the American Economy Units: 4
- ENST 387 Economics for Natural Resources and the Environment Units: 4
- FBE 431 Financial Policies and Corporate Governance Units: 4
- HIST 343 Work, Leisure, and Violence in Industrializing America Units: 4
- HIST 348 The Dynamics of American Capitalism Units: 4
- HIST 442 The Ethics of Financial and Political Accountability Units: 4
- IR 324 Multinational Enterprises and World Politics Units: 4
- IR 329 The Global Finance and Monetary Regime Units: 4
- IR 369 Post-War European Relations Units: 4
- MOR 385gm Business, Government and Society Units: 4
- MOR 421 Social and Ethical Issues in Business Units: 4
- MOR 466 Business and Environmental Sustainability Units: 4

Consumer Culture

- COMM 363 Media Consumption Units: 4
- COMM 433 Home Entertainment: From Networks to Streaming Units: 4
- HIST 380 American Popular Culture Units: 4
- MKT 450 Consumer Behavior and Marketing Units: 4
- MOR 472 Power, Politics and Influence Units: 4
- PSYC 456 Conservation Psychology Units: 4
- REL-375 Conflict and Change and the Ethics of Business Units: 4

Global and Regional Culture

- BUCO 333mw Communication in the Working World - Managing Diversity Units: 4
- BUCO 460 International Business Communication Units: 4
- ECON 340 Economics of Less Developed Countries Units: 4
- ECON 342 Economic Development of the Middle East Units: 4
- ECON 343 Economic Development of East Asia Units: 4
- ECON 344 Economic Development of Sub-Saharan Africa Units: 4
- ECON 346 Economics of Transition and Development: China Units: 4
- ECON 350 The World Economy Units: 4
- HIST 424 Family, Work, and Leisure in Russian History Units: 4
- IR 325 North-South Relations in the Global Economy Units: 4
- IR 331 The Global Economy 2040 Units: 4
- IR 333 China in International Affairs Units: 4
- IR 360 International Relations of the Pacific Rim Units: 4
- IR 363 Middle East Political Economy Units: 4
- IR 364 The Political Economy of Latin American Development Units: 4
- IR 367 Africa in International Affairs Units: 4
- IR 426 Trade Politics in the Western Hemisphere Units: 4
- IR 439 Political Economy of Russia and Eurasia Units: 4
- MOR 468 Cross-Cultural Negotiations: Communication and Strategy Units: 4

History Minor

The minor in history is available to students in all schools and departments. The study of history deepens our understanding of peoples and societies and expands our knowledge of important issues in the world today. History minors will strengthen their skills in critical thinking, assessing evidence, and formulating clear and persuasive arguments both oral and written. History is essentially a laboratory of human experience, and students from a wide range of disciplines can discover new perspectives on their own intellectual interests through the study of the past.

Requirements: The minor in history requires 20 units, a total of five courses, from Department of History offerings. One course may be at the lower-division level, among which HIST 201 is the preferred course. Four courses must be at the upper-division level and at least one of those must be at the 400-level. All students who wish to embark on the completion of a minor in history must meet with the department undergraduate adviser for approval.

Resistance to Genocide Interdisciplinary Minor

To resist genocide effectively, we need to understand its history — the factors that have brought it about and those that have enabled people to prevent, resist or recuperate from mass violence. This interdisciplinary minor draws upon USC faculty in 11 academic units researching the causes, results and representations of attempted genocide as well as resistance to genocidal mass violence. Courses include attention to different definitions of genocide, its occurrence around the world and its representation in literature and the arts.

Course Requirements

The minor requires five courses (20 units); at least four must be at the upper-division level. As with all minors, students must choose at least four courses (16 units) outside their major department and four courses (16 units) that are not being used to satisfy any other subject requirement.

Lower-Division Requirement

Choose one course (4 units) from the following list:

List A

- JS 211gw The Holocaust Units: 4
- POSC 248gw Human Rights Units: 4
- POSC 260 Global Ethnic Politics Units: 4

Upper-Division Requirements

Choose four courses (16 units) from the lists below, at least one from each list:

List B — Representations of Genocide

- COLT 485 The Shoah (Holocaust) in Literature and the Arts Units: 4
- ENGL 444m Native American Literature Units: 4
- FREN 373g Remembering Loss, Writing Memory Units: 4
- ITAL 352 The Holocaust in Italian Fiction and Film Units: 4
- JS 362 Terror and Resistance in Literature and the Media Units: 4
- MUSC 430m Music and the Holocaust Units: 4

List C — The Reality of Genocide

- ANTH 357g Cultures of Genocide, Cultures of Care Units: 4
- HIST 323 The Holocaust in 20th Century Europe Units: 4
- HIST 428 Life and Death in Nazi Germany Units: 4
- IR 313 Religions and Political Violence Units: 4
- JS 315g Anti-Semitism, Racism and Other Hatreds Units: 4
- MDA 330 The Armenian Heritage: History, Arts, and Culture Units: 4
- POSC 366 Terrorism and Genocide Units: 4
- PSYC 453 Intergroup Relations Units: 4 *

List D — Capstone Courses: Resisting Genocide

- HIST 444 Mass Violence and Comparative Genocide in Modern World History Units: 4
- HIST 446 Resistance to Genocide Units: 4
- IR 437 Comparative Genocide Units: 4

Note:

**Prerequisite:* PSYC 355

Master's Degree

History (MA)

The department does not accept applicants for a Master of Arts degree in history. The MA degree is intended only as a transitional degree in the process of completing requirements for the PhD in history.

Foreign Language/Research Tool Requirement

Students are required to demonstrate competence in one foreign language, with the exception that none is required of majors in United States history.

Course Requirements

All students must enroll in HIST 500 Introduction to Graduate Historical Studies, and it is recommended that it be completed in the first year of residence.

Thesis Plan

Students must take a minimum of six graduate courses, including HIST 500 plus HIST 594a, HIST 594b Master's Thesis. No more than two 400-level courses may count toward this total. A thesis must be written and defended.

Comprehensive Examination Plan

This plan requires the approval of the student's master's committee chair to substitute a comprehensive examination for the thesis. If approved, the student completes eight graduate level courses, including 500, with no more than two 400-level courses counting toward this total, plus written exams in three fields, one of which may be in another department. Examinations are normally offered in October and April. An oral examination may be given at the discretion of the master's committee. Examinations are graded on an honors, pass or fail basis. Any student who receives a grade of fail in two examinations is considered as not having qualified for the degree. A student who receives one fail must retake an examination in that field at the next scheduled examination period. An examination cannot be retaken more than once.

Doctoral Degree

History (PhD)

Application deadline: December 1

The history profession nationwide combines a traditional emphasis on geo-temporal fields (e.g., United States in the 19th century; medieval Europe) with a new emphasis on trans-nationalism, comparative history and interdisciplinary investigation. The USC program is at the forefront of these trends. Following the traditional emphasis, each graduate student must declare a major field in a geo-temporal area at the time of application to the program. Major fields of study include: China, Japan, Korea, Latin America, Middle East, American/United States, medieval Europe, early modern Europe and modern Europe. The purpose of the major field is to prepare students broadly for teaching and research.

By the beginning of the second year in the program, each graduate student must declare a minor field and an area of specialization. The minor field is intended to broaden skills beyond the geo-temporal boundaries of the major field; the area of specialization is intended to deepen the student's scholarly training in the chosen area of the dissertation. The minor field may be chosen from the list of major fields (i.e., a student entering the program with American/United States as a major field might select "modern Europe" as a minor field), or it may be conceived comparatively, thematically or cross-disciplinarily. Possible minor fields include: Latin America; premodern Japan; the colonial Americas; gender and sexuality; visual culture; and anthropology. Possible fields for the area of specialization include: 19th or 20th century U.S. intellectual history; visual culture of the 20th century; modern European cities; and the American West. These lists are not exhaustive and are meant to suggest only possible courses of study.

For the major field, each student must take a minimum of four courses; for the minor field two courses; for the area of specialization three courses. Either the minor field or the area of specialization must be outside the major field of study, transnational or outside the discipline of history. Each student must consult with his or her adviser in putting together these fields of study.

Foreign Language Requirements

Students are expected to satisfy language requirements before the end of their second year in the program, and this requirement must be met before a student is eligible to take the Qualifying Examination. Students may demonstrate competence in two foreign languages or proficiency in one.

- Competence in a language denotes the ability to read and translate passages into English.
- Proficiency in a language denotes advanced reading ability and conversational ability for spoken languages. For non-spoken languages, proficiency denotes advanced reading and translation abilities.

Students must contact the Director of Graduate Studies to set up and schedule their language exams. Competence in languages is assessed in a two-hour translation examination (with dictionary) or by a student passing a reading course in the language offered at USC. A student aiming for proficiency must first take the translation exam, and upon passing, must schedule an oral examination with a faculty member designated by the Director of Graduate Studies in consultation with the adviser.

The choice of languages shall be worked out with the adviser and must be approved by the adviser and the Director of Graduate Studies. An adviser may also require a student to meet more than the department's minimum requirement, e.g., by requiring a second language at the level of proficiency or a third at the level of competence.

Course Requirements

All entering students (including those with MA degrees) are required to take HIST 500 in their first semester of study. All students are required to take two 600-level research seminars in the History Department. At least one of these seminars must be in the major area of study. Students must complete a minimum of 60 units of course work. No more than 8 units of the 60 may be in HIST 794a, HIST 794b, HIST 794c, HIST 794d, HIST 794z (dissertation writing). Students must complete at least 30 units of graduate course work within the History Department.

Screening Procedures

The performance of every doctoral student is formally evaluated by the full faculty of the History Department, normally at the end of the spring semester and before a student has completed 24 units toward the degree. Unsatisfactory progress toward the degree requires either remedy of the deficiencies or termination of the student's graduate program. After successfully passing the screening procedures, each student establishes a qualifying exam committee which then supervises preparation for the qualifying examination.

Qualifying Exam Committee and Qualifying Examinations

Each student must set up a qualifying exam committee by the end of the third semester in residence. It includes at least five members, at least three of them from the History Department, and at least one of them from outside the History Department (this person must be a tenure-track faculty member from a PhD granting program). The qualifying exam committee will oversee the student's written and oral qualifying examination, which should be taken by the end of his or her fifth semester in residence and no later than the end of the sixth semester. The examination covers the major field, minor field and area of specialization. Students prepare for these exams by developing, in collaboration with their qualifying exam committee, reading lists for study in their major field, minor field and area of specialization.

The qualifying examination consists of two parts: (1) Three four-hour written responses, based, respectively, on the major field, the minor field and the area of specialization; (2) a two-hour oral session, which may include some discussion of the written exam. Students with one fail or more than two low-pass grades on the written responses will not be permitted to sit for the oral segment of the examination. The qualifying exam committee determines

whether a student may retake any parts of the examination graded low-pass or fail.

A student must wait at least six, but not more than nine, months to retake any part, or all, of the qualifying examination. No part of the examination can be retaken more than once.

Dissertation

After students have successfully completed their qualifying examinations, they will select a dissertation committee consisting of at least three members, including at least two from the History Department. These individuals will be in charge of guiding the dissertation to completion. Within six months of passing the qualifying examination, students must submit a formal dissertation prospectus to all members of the dissertation committee and pass a one-hour prospectus defense convened by that committee. Some students (e.g., those whose major field is East Asia) can, with the approval of their dissertation committee, petition the Graduate Studies Committee for an extension of this six-month deadline. After passing the dissertation prospectus defense, a student is admitted to candidacy for the PhD degree. The student will thereafter concentrate on the dissertation. After a student becomes a doctoral candidate, he or she must register for HIST 794a, HIST 794b, HIST 794c, HIST 794d, HIST 794z Doctoral Dissertation each semester thereafter until the dissertation is completed.

Interdisciplinary Studies

Director: Richard Fliegel, PhD

Interdisciplinary Major

The interdisciplinary major allows students to create an individual, original major. It is a flexible option available when a combination of existing majors and academic minors does not adequately fulfill a student's educational goals. With close advisement, students can build their own programs of study.

The interdisciplinary major is an intensive research program for students with a focused interest in a topic that requires study from more than one disciplinary perspective. Interdisciplinary majors are usually self-motivated students with good writing skills and an intellectual passion for a particular area of inquiry. Course work is selected to lead to a thesis project integrating the areas of research comprising the interdisciplinary major.

Admission

Admission to the interdisciplinary major is by application. Applications, which may be obtained from the program office, are considered by a special admissions committee. Interested students must have a GPA of 3.0 (A = 4.0) or above; those with less than a 3.3 are the exception.

Program Requirements

Students in the program must meet all graduation requirements of USC Dornsife College. When admitted, students establish an academic "contract," which outlines each student's course of study through graduation. The contract includes a minimum of nine (4-unit) upper-division courses, distributed in at least two fields. The primary focus of the major should be in the USC Dornsife College of Letters, Arts and Sciences. These areas of concentration must then be combined in a senior thesis, written under the supervision of the student's Guidance Committee.

Restrictions

Course prerequisites cannot be waived; admission to courses restricted to majors is subject to availability and direct negotiations; admission to departments and/or schools that have their own admission requirements must be processed separately.

Bachelor's Degree

Contemporary Latino and Latin American Studies (BA)

The Bachelor of Arts in Contemporary Latino and Latin American Studies (CLLA) is an interdisciplinary major bridging the fields of Latin American Studies (focusing on the history and cultures of Central and South America) and Latino Studies (focusing on the experience of Chicano/a and Latino/a communities in the United States). By combining these two areas of scholarly inquiry in a single undergraduate degree, students acquire interdisciplinary perspectives on the indigenous and transnational histories, cultures, and social issues of the Américas.

The Bachelor of Arts in Contemporary Latino and Latin American Studies provides an opportunity for undergraduates to gain a general understanding of this area of scholarship and research and focus their study to reflect their personal aspirations. The major requires nine courses (36 units), two at the lower-division (100 and 200) level and seven at the upper-division (300 and 400) level. This curriculum prepares students for careers in business, diplomacy, or social change that reflect and respect the cultural diversity of the western hemisphere.

Lower-division Requirements (8 units)

Language Requirement (4 units)

Choose one of the following four courses or earn a sufficient score on the Spanish placement exam:

- SPAN 245 Spanish Through Social Issues in Costa Rica Units: 4
- SPAN 250x Spanish for Business Communication Units: 4
- SPAN 261 Advanced Spanish: Society and the Media Units: 4
- SPAN 270 Spanish for Heritage Speakers Units: 4

  Students who satisfy this requirement by placement exam score should take an additional course from the list below to satisfy the unit requirement.

Introduction to Latin American Culture (4 units)

Choose one course from the following list:

- AHIS 127g Arts of the Ancient Americas Units: 4
- AHIS 128gp Arts of Latin America Units: 4
- AMST 135gmw Peoples and Cultures of the Americas Units: 4
- AMST 140gw Borderlands in a Global Context Units: 4
- ANTH 140g Mesoamerican Cosmovision and Culture Units: 4
- COLT 250g Cultures of Latin America Units: 4
- HIST 273g Colonial Latin America Units: 4
- MUJZ 218a Afro-Latin Percussion Instruments Units: 2
- MUJZ 218b Afro-Latin Percussion Instruments Units: 2

Upper-division Requirements (28 units)

Contemporary Latin Americans (8 units)

Choose two of the following:

- AMST 340m Latina/o LA Units: 4
- HIST 372 Modern Latin America Units: 4
- IR 364 The Political Economy of Latin American Development Units: 4
- POSC 428 Latino Politics Units: 4

Major Interest (16 units)

Choose four additional courses not yet taken from one of the three following lists:

The Cultural Heritage of Latin America

- AHIS 319 Mesoamerican Art and Culture Units: 4
- AMST 448m Chicano and Latino Literature Units: 4

- ANTH 425 Peoples and Cultures of Latin America Units: 4
- COLT 375 Latin American Cultural and Literary Theory Units: 4
- HIST 369 History of the Indigenous Peoples in the Americas Units: 4
- HIST 370 Spanish America, 1492–1821 Units: 4
- HIST 374 History of Mexico Units: 4
- HIST 451 The Mexican Revolution Units: 4
- HIST 470 The Spanish Inquisition in the Early Modern Hispanic World Units: 4, 2 years
- REL 333 Religion in the Borderlands Units: 4
- REL 334g Religion and Colonial Encounter Units: 4
- SPAN 301 Introduction to Literature and Film Units: 4
- SPAN 304 The Art of Fiction Units: 4
- SPAN 306 Performance from Street to Stage Units: 4
- SPAN 308 The Art of Poetry Units: 4
- SPAN 372 Modern and Contemporary Latin American Fiction Units: 4
- SPAN 380g Literature of Mexico Units: 4
- SPAN 385 The Culture of Food in Hispanic Los Angeles Units: 4
- SPAN 462 Literary Cartographies of Latin America and Spain, 1810–1898 Units: 4
- SPAN 481 Literature and Popular Culture Units: 4
- SPAN 482 Literature and the City Units: 4
- SPAN 483 Gender and Sexuality Units: 4
- SPAN 484 Studies in Visual and Material Culture Units: 4

Social Realities in the United States and Latin America

- AMST 340m Latina/o LA Units: 4
- AMST 353m Race and Racism in the Americas Units: 4
- AMST 357m Latino Social Movements Units: 4
- AMST 373m History of the Mexican American Units: 4
- ANTH 425 Peoples and Cultures of Latin America Units: 4
- HIST 354 Mexican Migration to the United States Units: 4, 2 years
- HIST 372 Modern Latin America Units: 4
- IR 364 The Political Economy of Latin American Development Units: 4
- IR 365 Politics and Democracy in Latin America Units: 4
- IR 366 Mexico and its Relations with the United States Units: 4
- IR 425 The New Triangle: China, the U.S. and Latin America Units: 4
- IR 426 Trade Politics in the Western Hemisphere Units: 4
- IR 465 Contemporary Issues in United States-Latin America Relations Units: 4
- IR 466 Contemporary Issues in Latin American Politics Units: 4
- POSC 350 Politics of Latin America Units: 4
- POSC 428 Latino Politics Units: 4
- POSC 430 Political Economy of Mexico Units: 4
- POSC 431 Political Economy of Central America Units: 4
- SOCI 356m Mexican Immigrants in Sociological Perspective Units: 4
- SPAN 320 Politics, Thought, Society Units: 4

Latino and Latin American Arts and Media

- AHIS 318 Arts of the Ancient Andes Units: 4
- AHIS 328 Colonial Latin American Art Units: 4
- AHIS 428 Studies in Colonial Latin American Art Units: 4
- AMST 446 Cultural Circuits in the Americas Units: 4
- COLT 470 Literature and Media in Latin America Units: 4
- CTCS 414 Latina/o Screen Cultures Units: 4
- JOUR 465m Latino News Media in the United States Units: 4
- SPAN 302 Screen Cultures: From Film to the Internet Units: 4
- SPAN 321 Sounds, Images, Objects Units: 4
- SPAN 466 Argentina, Society and the Arts Units: 4
- THTR 481 From The Border to Broadway Units: 4

Capstone Experience (4 units)

Students engage in travel or original research by choosing one of the following courses, which include Maymester and Problems Without Passport courses, overseas programs, or courses created for this purpose. Choose one of the following:

- ANTH 400 Maya Resilience: Constructing Past and Present Identities Units: 4
- ANTH 450 Field Research in Maya Archaeology Units: 4
- IR 337 The Impact of Remittances on Development in Mexico Units: 4

Minor

Critical Approaches to Leadership Minor

This minor is offered by faculty from several disciplines whose perspectives are brought to bear on issues and questions that should inform the judgements of capable, ethical leaders. Students are introduced to theoretical and historical models of leadership, engage in case studies of modern leaders, select critical electives that explore ethical and social considerations of leadership, examine professional applications of leadership principles, and integrate what they have learned in a capstone course. The emphasis of the minor is on leadership as expertise in community-building and takes advantage of USC's programs in community service, including the Joint Educational Project, the Jesse M. Unruh Institute of Politics and other internships available through the Division of Student Affairs.

Five upper-division courses, totaling 20 units, are required.

Core Courses

Choose two:

- CLAS 370 Leaders and Communities: Classical Models Units: 4
- CLAS 375 Alexander the Great Units: 4
- MDA 325 Case Studies in Modern Leadership Units: 2 or 4

Critical Electives

Group A — choose one

- PHIL 337 Political Philosophy Units: 4
- PHIL 437 Social and Political Philosophy Units: 4
- PSYC 355 Social Psychology Units: 4
- REL 341 Technology, Culture, and Ethics Units: 4
- REL 360 Ethical Issues in the New Medical Revolution Units: 4
- REL-375 Conflict and Change and the Ethics of Business Units: 4

Group B — choose one

- IR 303 Leadership and Diplomacy Units: 4
- MOR 470 Global Leadership Units: 4
- POSC 365 World Political Leadership Units: 4
- POSC 423 Presidents and the Presidency Units: 4

Capstone Course

- AMST 365 Leadership in the Community — Internship Units: 4 or
- MDA 365 The Art and Adventure of Leadership Units: 4 or
- MDA 475 The Future of California Units: 4

Core Courses

Choose two:

- CLAS 370 Leaders and Communities: Classical Models Units: 4
- CLAS 375 Alexander the Great Units: 4
- MDA 325 Case Studies in Modern Leadership Units: 2 or 4

International Health, Development, and Social Justice Interdisciplinary Minor

This minor is intended for students who wish to understand the challenges associated with health care as an ethical issue in the international context. In doing so, it focuses on the convergence of three large fields of inquiry, raising questions about their intersection. Social justice is concerned with equity, with questions of fairness as they inform (or should inform) access to resources necessary for the survival and well-being of people around the globe.

To provide the necessary content, this minor presents an introduction to political economy, to cross-cultural approaches to health and wellness, and to theories of economic development as they relate to health care.

This minor is intended to prepare students for careers and leadership roles in the arenas of international health, medical ethics, overpopulation, economic development, human welfare and principles of social justice.

As with all minors, students should include four courses outside their major, four courses at the upper-division level, and four courses that are not being used to satisfy any other subject requirement. In addition, to satisfy this minor, students must choose courses from at least two different departments.
REQUIRED COURSE WORK: 24 units

Lower Division Requirement: Choose one Course (4 Units)

Students should have some experience with engaging ethical questions or considering the context in which these issues arise, which can be accomplished by completing one of the following:

- ANTH 101g Body, Mind and Healing: Introduction to Medical Anthropology Units: 4
- ANTH 105g Culture, Medicine and Politics Units: 4
- ANTH 125g Social Issues in Human Sexuality and Reproduction Units: 4
- ANTH 205g Introduction to Global Studies and Cross-cultural Research Units: 4
- BISC 102Lgx Humans and Their Environment Units: 4
- BISC 103Lgx General Biology for the Environment and Life Units: 4
- BISC 150Lgx The Nature of Human Health and Disease Units: 4
- ECON 205g Principles of Macroeconomics Units: 4
- GEOL 108Lg Crises of a Planet Units: 4
- IR 101gxw International Relations Units: 4
- IR 213 The Global Economy Units: 4 *
- PHIL 166gw Current Moral and Social Issues Units: 4
- PHIL 172gmw Social Ethics for Earthlings and Others Units: 4
- SOCI 225gw Sociology of Health and the Body Units: 4
- SOCI 242g Sociology, Demography and Health Units: 4 **

Note:

**Prerequisite:* IR 210
***Prerequisite*: BISC 120 or BISC 220

Introduction to Political Economy: Choose One Course (4 Units)

The courses in this and the following categories provide an understanding of the forces that shape global development.

- ECON 238xg Political Economy and Social Issues Units: 4
- ECON 340 Economics of Less Developed Countries Units: 4 *
- ECON 350 The World Economy Units: 4 *
- POSC 435 Politics and the Economy Units: 4

Note:

**Prerequisite:* ECON 203 *or* ECON 205

Theories of Development: Choose One Course (4 Units)

- IR 325 North-South Relations in the Global Economy Units: 4
- IR 344 The Global South in World Politics Units: 4
- IR 454 The International Political Economy of Development Units: 4
- POSC 255g Cultures, Civilizations and Ethnicities in World Politics Units: 4
- POSC 450 Political Development Units: 4
- POSC 456 Women in International Development Units: 4
- SOCI 314Lg Analyzing Social Statistics Units: 4
- SOCI 362 Global and Transnational Sociology Units: 4
- SOCI 470 Social Change in Low-Income Countries Units: 4

Cross-Cultural Perspectives on Health and Wellness: Choose One Course (4 Units)

These courses explore cultural attitudes and differences about health and wellness that affect decisions about health care.

- ANTH 301g The Global Performance of Healing Units: 4
- ANTH 305 Childhood, Birth and Reproduction Units: 4
- ANTH 405 Evolutionary Medicine Units: 4
- IR 339 Public Health and International Relations Units: 4
- PSYC 367g Stress, Health, and the Mind-Body Connection Units: 4 *
- PSYC 462m Culture and Mental Health Units: 4 **
- REL 460 Senior Seminar: Medical Ethics Units: 4
- SOCI 475 Medical Sociology Units: 4
- SWMS 336 Health, Gender and Ethnicity Units: 4

Note:

**Prerequisite:* PSYC 100
***Recommended preparation:* PSYC 100

Perspectives on Social Justice: Choose One Course (4 Units)

These courses familiarize students with the application of legal and ethical questions to social phenomena and the allocation of resources.

- ANTH 300 Evolution, Ecology, and Culture Units: 4
- IR 316 Gender and Global Issues Units: 4
- IR 401 The United Nations and World Order Units: 4
- PHIL 431 Law, Society, and Politics Units: 4
- PHIL 437 Social and Political Philosophy Units: 4
- REL 366 Religion and Social Change Units: 4
- SOCI 360m Social Inequality: Class, Status and Power Units: 4

Capstone Requirement: Choose One Course (4 Units)

These capstone courses examine efforts to introduce issues of social justice to the distribution of health care and other resources essential for human survival and well-being.

- MDA 320 Global Ethics: Poverty, Health and the Human Condition Units: 4
- SOCI 408 Volunteers, Non-Governmental Organizations, and Everyday Politics Units: 4
- SOCI 450 Non-Governmental Organizations/Non-profits Field Practicum Units: 4

User Experience Minor

This interdisciplinary minor explores the experience of people interacting with digital sites and other products and environments. It involves training in psychology, sociology, economics, design, marketing and other units offering course work in relevant areas. How do individual factors, culture and economics influence people's decisions? Why do people form the impressions that they do, and how can products and environments be designed to engage them more readily and responsively?

As with all minors, students must choose at least four upper-division 4-unit courses and four courses dedicated exclusively to this minor (which may or may not be the same four courses). Students must also include four courses outside their major. To earn credit for this minor, psychology majors must choose four courses outside of psychology, art and design majors must choose four courses outside of the Roski School, and Business Administration majors must choose four courses outside of the Marshall School. Among the total, students must include courses from at least three departments.

For advisement, contact the Dornsife Advising Office.

Requirements

Please note that prerequisites will *not* be waived for upper-division courses; students should be sure to complete the introductory classes they will need.

Lower Division Courses - Group A

Choose 4 units from the following:

- ACAD 280 Designing Digital Experiences Units: 4
- ART 141xg Creating and Understanding Visuals Units: 4
- CRIT 150gp Histories of Art, Design and Visual Culture Units: 4
- DES 123xg The Design Challenge: Exploring the Design Process Units: 4
- DES 203 Digital Tools for Design Units: 2 *
  and
- DES 303 Web Design Units: 2 *
- ECON 203g Principles of Microeconomics Units: 4
- LING 275Lg Language and Mind Units: 4
- PSYC 100Lg Introduction to Psychology Units: 4
- PSYC 201Lg The Science of Happiness Units: 4

Note:

**Both DES 203 and DES 303 (2 units each) must be completed, if students choose that option. DES 303 requires DES 203 as a prerequisite.*

Upper Division Courses - Group B

Choose one of the following:

- BUAD 307 Marketing Fundamentals Units: 4
- COMM 302 Persuasion Units: 4
- MKT 450 Consumer Behavior and Marketing Units: 4
- PSYC 355 Social Psychology Units: 4 *

Note:

**Requires PSYC 100Lg.*

Upper Division Courses - Group C

Choose one of the following:

- COMM 309 Communication and Technology Units: 4
- COMM 339 Communication Technology and Culture Units: 4
- DES 302 Design III Units: 4 *
- ECON 303 Intermediate Microeconomic Theory Units: 4
- MKT 425 Marketing in a Digital World Units: 4
- MKT 445 New Product Development and Branding Units: 4 **
- PSYC 422 Human Judgment and Decision Making Units: 4 ***

Note:

**Requires DES 202.*
***Requires BUAD 307.*
****Requires PSYC 314L.*

Upper-division Courses - Group D

Choose one of the following:

- BISC 408 Systems Neuroscience: From Synapses to Perception Units: 4 *
- ECON 415 Behavioral Economics Units: 4 **
- PSYC 301L Cognitive Processes Units: 4 ***
- PSYC 304L Sensation and Perception Units: 4 ***
- PSYC 440 Foundations of Cognitive Neuroscience Units: 4 ***
- PSYC 454 Social Cognition Units: 4 ***

Note:

**Requires BISC 421.*
***Requires ECON 303.*
****Requires PSYC 100Lg.*

Capstone Courses - Group E

Choose one of the following:

- ART 361 Post-Internet Art and Aesthetics Units: 4
- COMM 473 Advanced Issues in Communication and Technology Units: 4 *
- CSCI 534 Affective Computing Units: 4
- DES 402 Advanced Design Projects Units: 4 **
- MDA 423 User Experience Units: 4
- PSYC 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8 (4 units required)

Note:

**Requires COMM 301Lg.*
***Requires DES 302.*

Minimum Units Required: 20

International Relations

The Department of Political Science and International Relations offers: a BA in International Relations; a BA in International Relations (Global Business); a BA in International Relations and the Global Economy; and a BA in Intelligence and Cyber Operations. The department also offers minors in international relations, global communication, and international policy and management.

The international relations major encourages undergraduate double majors, especially with economics, environmental studies, geography, history, journalism, political science and sociology. Programs are flexible, allowing students to gain a broad background in international studies and, at the same time, to specialize in a particular area.

Center for International and Public Affairs, CPA 330
(213) 740-6278; 740-2136
FAX: (213) 821-4424
Email: poir@usc.edu
Chair: Ange-Marie Hancock-Alfaro, PhD
Faculty: see Political Science and International Relations

Advisement

Advisement is required for all majors and minors. Students are encouraged to meet with International Relations advisers at least once a semester to review the direction of their individual programs. Students are also encouraged to seek the advisement of faculty members whose specializations are appropriate to their programs of study.

Academic Specialization

Students majoring in international relations who wish to develop their own specialization or emphasize a particular regional area may establish with a faculty adviser, or with International Relations advisers, an academic program that will accomplish the students' objectives.

International Relations Honors Program

The department offers a two-semester honors program for outstanding undergraduate students in the junior and senior years. The organization of the course during the first semester follows the seminar model, emphasizing independent research, discussion, and oral and written reports. In the second semester, the student is required to write a thesis under the direction of a substantive faculty adviser. Students are admitted to the program after careful screening on the basis of their academic record and an interview with a prospective adviser.

Graduate Degrees

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and The Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

All graduate students are required to maintain regular contact with the graduate coordinator to assure compliance with departmental regulations.

Bachelor's Degree

Intelligence and Cyber Operations (BA)

The Bachelor of Arts in Intelligence and Cyber Operations brings scholarship in international relations together with technical expertise in information technology to prepare USC students for a rapidly emerging field of scholarly activity and professional practice. This interdisciplinary major requires 51-54 units in total: 12 at the lower-division level and 39-42 at the upper-division level.

Lower Division Required Courses (12 units)

- IR 210gw International Relations: Introductory Analysis Units: 4
- ITP 125L From Hackers to CEOs: Introduction to Information Security Units: 2
- ITP 115 Programming in Python Units: 2

  or
- ITP 165 Introduction to C++ Programming Units: 2
- IR 213 The Global Economy Units: 4

  or
- ECON 203g Principles of Microeconomics Units: 4

Upper Division Required Courses (14 units)

- IR 304 National Intelligence and the Shaping of Policy Units: 4
- IR 320 Technology and International Relations Units: 4
- ITP 325 Ethical Hacking and Systems Defense Units: 3
- ITP 375 Digital Forensics Units: 3

Security and Violence (4 units)

Choose one:

- IR 313 Religions and Political Violence Units: 4
- IR 315 Ethnicity and Nationalism in World Politics Units: 4
- IR 318 Violent Conflict Units: 4
- IR 319 Human Security and Humanitarian Intervention Units: 4
- IR 342 The Politics and Strategy of Weapons of Mass Destruction Units: 4
- IR 381 Introduction to International Security Units: 4
- IR 386 Terrorism and Counterterrorism Units: 4
- IR 387 Strategic Studies Units: 4

International Finance (4 units)

Choose one:

- ECON 452 International Finance Units: 4 (Prerequisite: ECON 305)
- ECON 457 Financial Markets Units: 4 (Prerequisite: ECON 303)
- IR 328 The Evolving Global Economic Architecture-Capital Mobility Units: 4
- IR 329 The Global Finance and Monetary Regime Units: 4
- IR 431 Commercial and Financial Globalization-Trends, Challenges Units: 4

Cyber Law, Policy and Management (3-4 units)

Choose one:

- DSCI 429 Security and Privacy Units: 4
- ITP 370 Information Security Management Units: 3
- ITP 479 Cyber Law and Privacy Units: 3

Technical Elective (6-8 units)

Choose two:

- ITP 303 Full-Stack Web Development Units: 4
- ITP 357 Enterprise Network Design Units: 3
- ITP 365 Managing Data in C++ Units: 4
- ITP 425 Web Application Security Units: 4
- ITP 446 Cyber Breach Investigations Units: 3
- ITP 457 Network Security Units: 4
- ITP 475 Advanced Digital Forensics Units: 4

Regional Electives (8 units)

Choose two courses, each from a different category:

The Middle East

- HIST 384 Popular Culture in the Middle East Units: 4
- IR 362 The International Relations of the Contemporary Middle East Units: 4
- IR 463 Islam and Arab Nationalism Units: 4
- MDES 340 The United States and the Middle East Units: 4
- REL 402 Cultural Heritage, Religion, and Politics in the Middle East Units: 4

Russia, Eastern Europe and Eurasia

- IR 345 Russian and Post-Soviet Foreign Policy Units: 4
- IR 346 Communism and Post-Communism: Eastern Europe and the Balkans Units: 4
- IR 438 Nationalism and Ethnic Conflict after Communism Units: 4
- IR 439 Political Economy of Russia and Eurasia Units: 4

East Asia

- HIST 366 The People's Republic of China Units: 4
- IR 333 China in International Affairs Units: 4
- IR 340 The Political Economy of China Units: 4
- IR 360 International Relations of the Pacific Rim Units: 4
- IR 384 Asian Security Issues Units: 4

Total Units for Major: 51-54

International Relations (BA)

The International Relations major requires a minimum of 48 units. All majors should complete IR 210gw International Relations: Introductory Analysis, IR 211g International Relations: Approaches to Research, IR 212 Historical Approaches to International Relations and IR 213 The Global Economy in their first 32 total units. The 200-level courses must be completed by the time they have completed 48 total units. The 200-level courses must be completed before attempting 400-level courses.

Four semesters of a single foreign language are required. All majors are encouraged to obtain as much foreign language training as possible either through a major or a minor in a foreign language or through a study program abroad.

Beyond IR 210, IR 211, IR 212 and IR 213, international relations majors are required to take eight additional upper-division courses. Majors must choose one course from each of the four fields: Culture, Gender and a Global Society; Foreign Policy Analysis; International Political Economy; International Politics and Security Studies. In addition, students must complete one course from Regional Studies (Europe; Russia, Eastern Europe and Eurasia; Latin America; the Middle East and Africa; or Pacific Rim). Finally, students must complete one 400-level course of their choice. Students are encouraged to explore different professional career options within international relations by enrolling in IR 391 Directed International Relations Field Study, a 2-unit course that can be repeated for major credit. Students may receive both general education credit and major credit for the same course.

Culture, Gender and Global Society

This field explores identities and interests shaping the politics of intellectual global society.

- IR 303 Leadership and Diplomacy Units: 4
- IR 305w Managing New Global Problems Units: 4
- IR 306 International Organizations Units: 4
- IR 309 Global Governance Units: 4
- IR 310 Peace and Conflict Studies Units: 4
- IR 311 Research Design and Methods Units: 4
- IR 315 Ethnicity and Nationalism in World Politics Units: 4
- IR 316 Gender and Global Issues Units: 4
- IR 339 Public Health and International Relations Units: 4
- IR 344 The Global South in World Politics Units: 4
- IR 371 Global Civil Society: Non-State Actors in World Politics Units: 4
- IR 382w Order and Disorder in Global Affairs Units: 4
- IR 403 Transnational Diplomacy and Global Security Units: 4
- IR 404 International Relations Policy Task Force Units: 4
- IR 406 Ethics and World Politics Units: 4
- IR 422 Ecological Security and Global Politics Units: 4
- IR 424w Citizenship and Migration in International Politics Units: 4

- IR 437 Comparative Genocide Units: 4
- IR 438 Nationalism and Ethnic Conflict after Communism Units: 4
- IR 444w Theories of Global Society Units: 4
- IR 449 International Courts and the Globalization of Law Units: 4
- IR 463 Islam and Arab Nationalism Units: 4

Foreign Policy Analysis

This area examines the external relations of states, particularly the domestic and international factors that influence the formulation and implementation of national foreign policies. Factors within states (leadership, small group dynamics and domestic lobbying groups) and factors between states are stressed.

- IR 303 Leadership and Diplomacy Units: 4

International Politics and Security Studies

War and peace are at the heart of relations among nations. These courses investigate defense analysis, arms control, peace-building and strategic studies. The domestic, technological and international factors influencing defense and arms control policies and negotiations are considered. The World Wars, Korea, Vietnam and the numerous crises of the Cold War are the backdrop in these courses.

Regional Studies

The regional studies field focuses on geographic regions, such as the Pacific Rim, Latin America, Europe, the Middle East and Africa. These courses test general theories of international relations within the framework of a specific region. The economic, political, ethnic and social history of a region are examined to help explain current developments and interstate and domestic policies and issues within a region.

International Relations (Global Business) (BA)

The BA in International Relations with an emphasis in Global Business will give students the opportunity to pursue a degree in international relations and acquire specific skills in one of three concentrations in international business: international finance, global marketing or global management. Students who have earned a GPA of 3.0 or above and a "B" average in IR 210 International Relations: Introductory Analysis and a second 300-level or above IR course are eligible to apply during their sophomore year.

The degree cannot also be combined as an additional major in any business administration degree. The degree is administered by the School of International Relations.

In addition to the IR requirements, students need to complete the following prerequisite courses:

before they can begin this program.

- ECON 203g Principles of Microeconomics Units: 4 or
- ECON 351x Microeconomics for Business Units: 4

- ECON 205g Principles of Macroeconomics Units: 4 or
- ECON 352x Macroeconomics for Business Units: 4

- MATH 118gx Fundamental Principles of Calculus Units: 4 or
- MATH 125g Calculus I Units: 4

The international relations course work consists of 28 units:

- IR 210gw International Relations: Introductory Analysis Units: 4
- a regional course
- a 400-level course
- an international political economy course
- and three upper-division electives

International Political Economy Course

- IR 324 Multinational Enterprises and World Politics Units: 4
- IR 325 North-South Relations in the Global Economy Units: 4
- IR 326 U.S. Foreign Economic Policy Units: 4
- IR 330 Politics of the World Economy Units: 4
- IR 328 The Evolving Global Economic Architecture-Capital Mobility Units: 4
- IR 329 The Global Finance and Monetary Regime Units: 4
- IR 331 The Global Economy 2040 Units: 4

Course work at the USC Marshall School of Business consists of

- ACCT 410x Foundations of Accounting Units: 4
- BUAD 310g Applied Business Statistics Units: 4

or

- ECON 317 Introduction to Statistics for Economists Units: 4

and

16 units in the respective areas of concentration

International Finance:

- BUAD 215x Foundations of Business Finance Units: 4

and 3 of the following options:

- FBE 402 Government and Business Units: 4
- FBE 403 Introduction to the Legal Environment of Business Units: 4
- FBE 421 Financial Analysis and Valuation Units: 4
- FBE 423 Introduction to Venture Capital and Private Equity Units: 4
- FBE 429 International Business Law Units: 4
- FBE 431 Financial Policies and Corporate Governance Units: 4
- FBE 432 Corporate Financial Strategy Units: 4
- FBE 436 Financial Management of Multinational Corporations Units: 4
- FBE 437 Entrepreneurial Finance: Financial Management for Developing Firms Units: 4
- FBE 440 Trading and Exchanges Units: 4
- FBE 441 Investments Units: 4
- FBE 443 Introduction to Forecasting and Risk Analysis Units: 4
- FBE 458 Law of Forming, Financing and Managing Businesses Units: 4
- FBE 459 Financial Derivatives Units: 4
- FBE 460 Mergers, Acquisitions and Restructuring Units: 4
- FBE 462 International Trade, Finance and Commercial Policy Units: 4

Global Marketing:

- BUAD 307 Marketing Fundamentals Units: 4

and 3 of the following options

- MKT 402 Introduction to Marketing Analytics Units: 4
- MKT 405 Advertising and Promotion Management Units: 4
- MKT 410 Professional Selling Units: 4
- MKT 425 Marketing in a Digital World Units: 4
- MKT 440 Marketing Analysis and Strategy Units: 4
- MKT 445 New Product Development and Branding Units: 4
- MKT 450 Consumer Behavior and Marketing Units: 4
- MKT 465 Global Marketing Management Units: 4

Global Management:

- BUAD 304 Organizational Behavior and Leadership Units: 4

and 3 of the following options

- MOR 421 Social and Ethical Issues in Business Units: 4
- MOR 431 Interpersonal Competence and Development Units: 4
- MOR 451 Mastering Decision Making Units: 4
- MOR 461 Design of Effective Organizations Units: 4
- MOR 462 Management Consulting Units: 4
- MOR 463 Organization Change and Development Units: 4
- MOR 466 Business and Environmental Sustainability Units: 4
- MOR 467 Strategic Management of Innovation Units: 4
- MOR 469 Negotiation and Persuasion Units: 4
- MOR 470 Global Leadership Units: 4
- MOR 471 Managing and Developing People Units: 4
- MOR 472 Power, Politics and Influence Units: 4
- MOR 473 Designing and Leading Teams Units: 4
- MOR 492 Global Strategy Units: 4

International Relations and the Global Economy (BA)

The BA in International Relations and the Global Economy (IRGE) offers students rigorous interdisciplinary training at the intersection of international relations and economics. The major prepares students for careers ranging from foreign policy and international development to international finance and political risk analysis. It is also ideally suited for students who plan to seek advanced degrees in the social sciences.

The degree cannot also be combined as an additional major with any economics degree. The degree is administered by the School of International Relations.

Lower-Division Courses

- ECON 203g Principles of Microeconomics Units: 4
- ECON 205g Principles of Macroeconomics Units: 4
- IR 210gw International Relations: Introductory Analysis Units: 4

- MATH 118gx Fundamental Principles of Calculus Units: 4 * or
- MATH 125g Calculus I Units: 4 *

Core Skills and Issues

- ECON 303 Intermediate Microeconomic Theory Units: 4
- ECON 305 Intermediate Macroeconomic Theory Units: 4
- ECON 317 Introduction to Statistics for Economists Units: 4
- IR 330 Politics of the World Economy Units: 4

Choose two courses (8 units):

- ECON 318 Introduction to Econometrics Units: 4
- IR 324 Multinational Enterprises and World Politics Units: 4
- IR 325 North-South Relations in the Global Economy Units: 4
- IR 326 U.S. Foreign Economic Policy Units: 4
- IR 327 International Negotiation Units: 4
- IR 328 The Evolving Global Economic Architecture-Capital Mobility Units: 4
- IR 329 The Global Finance and Monetary Regime Units: 4
- IR 331 The Global Economy 2040 Units: 4

Regional Study

Choose one course (4 units):

- ECON 340 Economics of Less Developed Countries Units: 4
- ECON 342 Economic Development of the Middle East Units: 4
- ECON 343 Economic Development of East Asia Units: 4
- ECON 344 Economic Development of Sub-Saharan Africa Units: 4

- IR 430 The Politics of International Trade Units: 4
- IR 454 The International Political Economy of Development Units: 4
- IR 455 The Political Economy of Autocracy Units: 4

Total: 12 courses, 48 units

**Prerequisite required*

Minor

Global Communication Minor

The rise of global firms and international changes that followed the end of the cold war raise new opportunities and challenges. This minor provides students from fields such as business, journalism, engineering and political science an understanding of the dynamic nature of global relations, communications and technology. The global communication minor consists of six 4-unit courses, three from International Relations and three from Communication.

Required International Relations Course

- IR 305w Managing New Global Problems Units: 4

International Relations Regional Courses (Select One)

- IR 303 Leadership and Diplomacy Units: 4
- IR 325 North-South Relations in the Global Economy Units: 4 (departmental approval)
- IR 326 U.S. Foreign Economic Policy Units: 4
- IR 327 International Negotiation Units: 4
- IR 330 Politics of the World Economy Units: 4
- IR 333 China in International Affairs Units: 4
- IR 345 Russian and Post-Soviet Foreign Policy Units: 4
- IR 360 International Relations of the Pacific Rim Units: 4
- IR 361 South and Southeast Asia in International Affairs Units: 4
- IR 362 The International Relations of the Contemporary Middle East Units: 4
- IR 363 Middle East Political Economy Units: 4
- IR 365 Politics and Democracy in Latin America Units: 4
- IR 367 Africa in International Affairs Units: 4
- IR 368 French Foreign Policy: 1945 to the Present Units: 4 (offered in Paris only)
- IR 369 Post-War European Relations Units: 4
- IR 383 Conflict Mediation & Negotiation Units: 4
- IR 384 Asian Security Issues Units: 4
- IR 385 European Foreign Policy and Security Issues Units: 4
- IR 403 Transnational Diplomacy and Global Security Units: 4
- IR 439 Political Economy of Russia and Eurasia Units: 4
- IR 442 Japanese Foreign Policy Units: 4
- IR 468 European Integration Units: 4

IR Elective

Select one 300- or 400-level IR course

Required Communication Course

- COMM 487 Communication and Global Organizations Units: 4

Communication Electives (Select Two)

- COMM 324mw Intercultural Communication Units: 4
- COMM 339 Communication Technology and Culture Units: 4
- COMM 345 Social and Economic Implications of Communication Technologies Units: 4
- COMM 371 Media Censorship and the Law Units: 4
- COMM 385 Organizational Communication Units: 4
- COMM 414 Communication and Social Change in China Units: 4
- COMM 430 Global Entertainment Units: 4 (Prerequisite: COMM 300)
- COMM 431 Global Strategy for the Communications Industry Units: 4

Total units: 24

International Policy and Management Minor

The minor in international policy and management brings together courses from the School of International Relations, dealing with the new global challenges, specific regions of the world and international organizations and policies, and the USC Price School of Public Policy dealing with core management skills and public policy processes. Students will gain an understanding of the changes and challenges transforming the world and a taste of the policy and management skills to deal with them. To increase their understanding of the context and application of these concepts, students must complete a semester-long internship either in Washington, D.C. or Los Angeles with an organization that has an international focus.

Students take three courses in international relations, including the gateway course, IR 305w Managing New Global Problems, three courses in public policy and management, and an approved internship through the School of International Relations (IR 491x).

Required Courses from International Relations:

- IR 305w Managing New Global Problems Units: 4

One regional course selected from:

- IR 333 China in International Affairs Units: 4
- IR 345 Russian and Post-Soviet Foreign Policy Units: 4
- IR 358 The Asia Pacific in World Affairs Units: 4
- IR 360 International Relations of the Pacific Rim Units: 4
- IR 361 South and Southeast Asia in International Affairs Units: 4
- IR 362 The International Relations of the Contemporary Middle East Units: 4
- IR 363 Middle East Political Economy Units: 4
- IR 365 Politics and Democracy in Latin America Units: 4
- IR 367 Africa in International Affairs Units: 4
- IR 369 Post-War European Relations Units: 4
- IR 383 Conflict Mediation & Negotiation Units: 4
- IR 385 European Foreign Policy and Security Issues Units: 4
- IR 439 Political Economy of Russia and Eurasia Units: 4
- IR 442 Japanese Foreign Policy Units: 4
- IR 468 European Integration Units: 4

One course from either the regional course list or the following:

- IR 306 International Organizations Units: 4
- IR 307 Contemporary International Politics Units: 4
- IR 310 Peace and Conflict Studies Units: 4
- IR 315 Ethnicity and Nationalism in World Politics Units: 4
- IR 316 Gender and Global Issues Units: 4
- IR 318 Violent Conflict Units: 4
- IR 323 Politics of Global Environment Units: 4
- IR 324 Multinational Enterprises and World Politics Units: 4
- IR 325 North-South Relations in the Global Economy Units: 4
- IR 326 U.S. Foreign Economic Policy Units: 4
- IR 327 International Negotiation Units: 4
- IR 330 Politics of the World Economy Units: 4
- IR 341 Foreign Policy Analysis Units: 4
- IR 343 U.S. Foreign Policy since World War II Units: 4
- IR 344 The Global South in World Politics Units: 4
- IR 381 Introduction to International Security Units: 4
- IR 382w Order and Disorder in Global Affairs Units: 4
- IR 427 Seminar on Economics and Security Units: 4
- IR 441 Comparative Analysis of Foreign Policy Units: 4
- IR 444w Theories of Global Society Units: 4

From Public Policy:

The public policy component requires the completion of the following three options:

- PPD 225 Public Policy and Management Units: 4

Two additional courses from the following:

- PPD 357 Government and Business Units: 4
- PPD 371 The Nonprofit Sector and the Public Interest Units: 4
- PPD 373 Public Policy and Planning Analysis Units: 4

- PPD 476 Politics and Administration Units: 4
- PPD 482 Comparative Public Administration Units: 4

Or from Public Management:

- PPD 402 Management of Public and Nonprofit Organizations Units: 4

Two additional courses from the following:

- PPD 313 Finance of the Public Sector Units: 4
- PPD 407 Financial Management of Public and Nonprofit Organizations Units: 4
- PPD 411a Sacramento Semester Units: 4
- PPD 476 Politics and Administration Units: 4

Additional Requirements

Internship

Each student is required to complete an approved internship with an international focus. Students take a 2-unit internship through the School of International Relations (IR 491).

International Relations Minor

The minor in international relations allows students to develop a specialty in the field without a full major. Requirements are: IR 210gw International Relations: Introductory Analysis and four upper-division courses including at least one regional course and one 400-level course. Students planning to minor in international relations should see the School of International Relations advisers in Von KleinSmid Center 301.

Master's Degree

International Relations (MA)

Requirements

Students who have the degree objective of joint MA programs (Master of Arts, International Relations/Juris Doctor; Master of Arts, International Relations/Master of Planning; and Master of Arts, International Relations/Master of Public Administration) must apply for an MA in International Relations. Students pursuing these joint programs must refer to the specific course requirements outlined for each program.

Advisement

Students should consult with the school's faculty adviser each semester before registering for courses for the next semester. Students also are encouraged to seek advice from other faculty who work in areas related to their interests. Students may, if they wish and if a faculty member agrees, select a different faculty adviser from among the school's faculty. Consult with and inform the Office of Student Affairs regarding changes in faculty advisers.

Joint Educational Project

JEP House
801 W. 34th St.
(213) 740-1837
FAX: (213) 740-1825
Email: jephouse@usc.edu
dornsife.usc.edu/jep
Executive Director: Susan Harris

The Joint Educational Project (JEP) is one of the oldest and largest service-learning programs in the United States. Established in 1972, JEP places university students in supervised community service assignments as a part of their academic course work. JEP partners with more than 50 local organizations — including neighborhood schools, non-profit organizations, hospitals and health clinics and government agencies — to design service-learning projects that complement students' course work and address a community-identified need. Students serve in many capacities through JEP, including as a tutor, mentor, teaching assistant, translator, research assistant or guide. JEP also houses volunteer programs for pre-law and pre-med students — the Pre-Law Project and Trojan Health Volunteers — that give USC students practical experience in a legal or medical context. All JEP students learn how to develop and apply knowledge, work in diverse social settings, become engaged in civic affairs, explore possible career paths and make professional contacts. "JEP" following a section number indicates that the professor will offer JEP as a course option; a complete list of courses is available on JEP's website.

JEP also houses the USC Readers^{PLUS} work-study program. "Readers" assist K-5 children in USC's "Family of Schools" in the areas of math and reading, allowing the USC students the opportunity to serve in the community while gaining work experience in an urban school environment. JEP also hosts several Science, Technology, Engineering and Math (STEM) programs for elementary school children. These include the Young Scientists Program, the Medical STEM program and WonderKids—all of which employ USC students to provide STEM educational outreach for children attending partner schools.

Jewish Studies

Jewish Studies is offered by the Louchheim School for Judaic Studies, administrated by Hebrew Union College-Jewish Institute of Religion in coordination with USC Dornsife's School of Religion. Students registering for classes in the program do so through the regular USC registration process and receive USC course credit and degrees. Hebrew courses may be used to fulfill graduation requirements in a foreign language. Courses that meet humanities general education requirements may be used as electives or may be used for major or minor credit with the approval of an adviser.

Louchheim School for Judaic Studies

Bachelor of Arts in Jewish Studies

Program requirements are listed in this catalogue under Religion.

Bachelor of Arts in Middle East Studies

See the Department of Middle East Studies for a complete listing of requirements.

Minor in Middle East Studies

See the Department of Middle East Studies.

Jewish Studies Minor

See Religion for a listing of requirements.

Jewish Studies Graduate Certificate

See Religion for program requirements.

Minor

Jewish American Studies Minor (Jewish Studies)

The minor in Jewish American Studies offers the opportunity to study the experiences and cultures of the American Jewish community in relation to those of other American peoples. For the minor, 20 units of American Studies and Judaic Studies are required.

Core Requirements

- AMST 202m Interethnic Diversity in the West Units: 4
- JS 300 American Jewish History Units: 4

Three courses from the following:

- AMST 301gp America, the Frontier, and the New West Units: 4
- AMST 350 Junior Seminar in American Studies and Ethnicity: Theories and Methods Units: 4
- JS 330 Jewish Power, Powerlessness, and Politics in the Modern Era Units: 4
- JS 381 The Jew in American Society Units: 4
- JS 382 Judaism as an American Religion Units: 4
- JS 383 Jews in American Popular Culture Units: 4
- JS 415 The American Jewish Experience in Film Units: 4

Judaic Studies Minor

The minor in Judaic Studies provides the opportunity for in-depth study of Jewish history, literature, politics, culture, religion, sociology and gender studies using approaches developed through multidisciplinary approaches. Courses offered cover a broad time span — the ancient Near East to contemporary America — and they challenge and stimulate students to examine and learn about Jewish culture as a topic of scientific interest.

For the minor, 20 units in Judaic Studies and Religion are required. The following courses are required: REL 301 and JS 180. Three additional courses may be chosen from among JS 321, JS 340, JS 361, JS 375, JS 382, JS 383, JS 415 and REL 312. Successful completion of five 4-unit courses or the equivalent in Jewish American Studies is required to qualify for the minor.

Latin American and Iberian Cultures

The Department of Latin American and Iberian Cultures offers two majors (Spanish; and Latin American and Iberian Cultures, Media and Politics) and three minors (Spanish, Luso-Brazilian Studies and Latin American Studies). Our programs emphasize the languages and cultures of Latin America and the Iberian Peninsula.

With an intellectual and pedagogical commitment to cultural differences and interdisciplinarity, the undergraduate program actively explores various social, theoretical, political or historical aspects of Latin American and Iberian cultures, including literature, folklore, cinema, art, music, food and architecture. Students are critically challenged and encouraged to consider and reconsider a number of important issues including: the growing importance of popular culture in the Iberian Peninsula and Latin America; the role of race, ethnicity, class, gender, and sexuality within Iberian and Latin American societies.

The department encourages students with a wide range of interests to combine a Spanish major with a double major or minor in another discipline either within the USC Dornsife College of Letters, Arts and Sciences or other schools at USC. Students will work closely with a group of engaged scholars who are committed to bringing their cutting-edge research to the classroom and to preparing students as global citizens. Faculty undergraduate advisers are available to help provide information and assistance to students wishing to explore these various options.

The department also offers basic language instruction in both Spanish and Portuguese through which students can satisfy their foreign language requirement.

Undergraduate Degrees

General Information

Spanish Language Proficiency Examination

Students with previous exposure to Spanish are required to take a placement test, administered by the Dornsife Language Center. Students with no record of previous exposure to Spanish are not required to take the placement examination and should contact the department for assistance.

Courses in Spanish

All courses at the 200, 300 and 400 levels are conducted in Spanish unless otherwise noted in the course descriptions that follow. Courses are kept small to allow for maximum interaction between students and professors.

Advisement

A college undergraduate adviser is assigned to provide academic advisement prior to registration and throughout the academic year.

Honors Program

The BA in Spanish with Honors is available to students who have a GPA of at least 3.5 in courses counted for major credit and an overall GPA of 3.0 (by the time of graduation). Desire to complete the major with honors typically should be approved by a department faculty member no later than the second semester of the junior year. To complete the honors program the student must write an honors thesis in Spanish in conjunction with a 400-level course. The thesis, in the range of 25–30 pages (6,250–7,500 words), must be endorsed by a departmental honors committee by April 1 of the senior year.

Spanish Undergraduate Students Association (SUSA)

Students majoring or minoring in Spanish are eligible to join SUSA, the Spanish Undergraduate Students Association. Each year SUSA sponsors a variety of activities which enrich the cultural, intellectual and academic experience of the undergraduate student.

Graduate Degrees

The MA and PhD, Comparative Studies in Literature and Culture (Spanish and Latin American Studies) are offered through the Comparative Studies in Literature and Culture program.

Certificate in Foreign Language Teaching

The Certificate in Foreign Language Teaching provides certification in the theory and practice of second or foreign language teaching for student language teachers concurrently enrolled in graduate degree programs in foreign languages or related graduate programs at USC; for graduates of such programs who are teaching languages; for external candidates concurrently enrolled in similar programs in accredited colleges or universities; or for graduates of such programs who are teaching languages. The certificate is meant to supplement graduate study in the literature or linguistics of foreign languages. It is also meant to supplement classroom teaching. Therefore all candidates for this certificate are required to have taught a second or foreign language for at least one academic year at USC or elsewhere. At USC, this requirement and the course work requirements can be fulfilled concurrently, but external candidates are required to show proof of such teaching experience as a condition of admission.

In addition to teaching, certificate candidates must complete a minimum of four courses (minimum of 12 units) in four areas of study — linguistics, language acquisition, language teaching methodology, and the teaching of literacy or the literature or culture of a second or foreign language.

Requirements for Completion

The program consists of a practicum and a minimum of four courses: one each in linguistics, language acquisition, language teaching methods, and the teaching of literacy, literature or culture.

Linguistics: (minimum of 3 units) LING 411x Linguistics and Education or, with permission of instructor, an appropriate course in the linguistics of a particular language

Language Acquisition: (minimum of 3 units) LING 527 Second Language Acquisition or an appropriate alternative course

Language Teaching Methods: (minimum of 3 units) MDA 593 Practicum in Teaching the Liberal Arts or EALC 562 Teaching of the East Asian Languages or SPAN 511 Techniques and Procedures of Teaching Spanish as a Second Language or an appropriate alternative course

Literacy/Literature/Culture: (minimum of 3 units) An appropriate course in teaching of the literature or culture of a particular language

Bachelor's Degree

Latin American and Iberian Cultures, Media and Politics

The major in Latin American and Iberian Cultures, Media and Politics underscores the global reach and import of the nations in the Americas, Europe and Africa in which Spanish and Portuguese are spoken. By focusing on the study of language, literature and cinema as well other disciplines in the humanities and social sciences, students learn to think critically about the cultural, political, and historical questions involved in the study of Latin American and Iberian societies.

Lower Division Courses

Majors and minors may request a waiver of SPAN 260 if they meet one of the following prerequisites: a) a score of 5 on the Spanish language or literature advanced placement (AP) exam; b) a score of 6 or 7 on the Spanish International Baccalaureate Higher-Level exam (IBHL); c) a score of 800 in the Spanish SAT subject exam; or d) they can demonstrate advanced proficiency in spoken and written Spanish. Departmental approval is required in every case. Majors and minors to whom a waiver of SPAN 260 has been granted take five upper division courses (see below).

- SPAN 260 Advanced Spanish: Arts and Sciences Units: 4
- SPAN 290gp Introduction to Latin American and Iberian Studies Units: 4

Upper Division Spanish and Portuguese Courses

Choose four of the following courses, including at least one 400-level course. Majors and minors to whom a waiver of SPAN 260 has been granted (see above) must take five upper division courses.

- PORT 300 Introduction to Social and Literary Studies Units: 4
- PORT 302 Introduction to Brazilian Literature Units: 4
- PORT 342 Brazilian Cinema Units: 4
- PORT 390 Special Problems Units: 1, 2, 3, 4 *
- SPAN 301 Introduction to Literature and Film Units: 4
- SPAN 302 Screen Cultures: From Film to the Internet Units: 4
- SPAN 304 The Art of Fiction Units: 4
- SPAN 306 Performance from Street to Stage Units: 4
- SPAN 308 The Art of Poetry Units: 4
- SPAN 311 Advanced Spanish Through Contemporary Issues: Oral Emphasis Units: 4
- SPAN 320 Politics, Thought, Society Units: 4
- SPAN 321 Sounds, Images, Objects Units: 4
- SPAN 341 Advanced Conversation and Culture Units: 4
- SPAN 350 Cultural Cross-Currents of the Iberian Middle Ages Units: 4
- SPAN 352 The Transatlantic Golden Age: New Worlds Real and Imagined Units: 4
- SPAN 372 Modern and Contemporary Latin American Fiction Units: 4
- SPAN 373 Modern and Postmodern Spanish Fiction Units: 4
- SPAN 375 Latin American Cultural and Literary Theory Units: 4
- SPAN 380g Literature of Mexico Units: 4
- SPAN 381 Narco-World Units: 4
- SPAN 382 The Aesthetics of Violence in Latin America Units: 4
- SPAN 385 The Culture of Food in Hispanic Los Angeles Units: 4
- SPAN 390 Special Problems Units: 1, 2, 3, 4 *
- SPAN 391 Introduction to Contemporary Spanish Literature (USC Madrid Center) Units: 4
- SPAN 405 History of the Spanish and Portuguese Languages Units: 4
- SPAN 413m Social and Geographic Varieties of Spanish Units: 4
- SPAN 455 Picaresque Itineraries: Empire and Its Discontents Units: 4
- SPAN 460 Don Quijote: Text and Film Units: 4
- SPAN 462 Literary Cartographies of Latin America and Spain, 1810–1898 Units: 4
- SPAN 464 Introduction to Contemporary Spanish Theatre Units: 4
- SPAN 465 Cultural Perspectives of the Iberian Peninsula Units: 4
- SPAN 466 Argentina, Society and the Arts Units: 4
- SPAN 469 Immigration in Spain Units: 4
- SPAN 470 Literature and Media in Latin America Units: 4
- SPAN 471 Postdictatorship Spanish and Latin American Cinema Units: 4
- SPAN 472 The Sixties in Latin America Units: 4
- SPAN 481 Literature and Popular Culture Units: 4
- SPAN 482 Literature and the City Units: 4
- SPAN 483 Gender and Sexuality Units: 4
- SPAN 484 Studies in Visual and Material Culture Units: 4
- SPAN 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8 *

- SPAN 495 Seminar for Majors and Minors Units: 4
- SPAN 499 Special Topics Units: 2, 3, 4 *

Note:

*Four units required.

Elective Courses

Choose three of the following courses, including at least two 300- or 400-level courses. Other courses, including courses in other departments, may be chosen in consultation with faculty adviser.

- AHIS 127g Arts of the Ancient Americas Units: 4
- AHIS 128gp Arts of Latin America Units: 4
- AHIS 318 Arts of the Ancient Andes Units: 4
- AHIS 319 Mesoamerican Art and Culture Units: 4
- AHIS 328 Colonial Latin American Art Units: 4
- AHIS 428 Studies in Colonial Latin American Art Units: 4
- AHIS 496 Paintings in the Prado Museum Units: 4
- AMST 135gmw Peoples and Cultures of the Americas Units: 4
- AMST 305 Art and Performance in the Americas Units: 4
- ANTH 140g Mesoamerican Cosmovision and Culture Units: 4
- ANTH 310 Archaeology of the Americas Units: 4
- ANTH 314g The Nature of Maya Civilization Units: 4
- ANTH 400 Maya Resilience: Constructing Past and Present Identities Units: 4
- ANTH 425 Peoples and Cultures of Latin America Units: 4
- ANTH 450 Field Research in Maya Archaeology Units: 4
- COLT 250g Cultures of Latin America Units: 4
- HIST 273g Colonial Latin America Units: 4
- HIST 353m Race and Racism in the Americas Units: 4
- HIST 369 History of the Indigenous Peoples in the Americas Units: 4
- HIST 370 Spanish America, 1492–1821 Units: 4
- HIST 371 Culture in Diaspora: The Jews of Spain Units: 4
- HIST 372 Modern Latin America Units: 4
- HIST 374 History of Mexico Units: 4
- HIST 451 The Mexican Revolution Units: 4
- HIST 473 Colonial Latin America Seminar Units: 4
- IR 364 The Political Economy of Latin American Development Units: 4
- IR 365 Politics and Democracy in Latin America Units: 4
- IR 366 Mexico and its Relations with the United States Units: 4
- IR 425 The New Triangle: China, the U.S. and Latin America Units: 4
- IR 465 Contemporary Issues in United States-Latin America Relations Units: 4
- IR 466 Contemporary Issues in Latin American Politics Units: 4
- PORT 250g Visions of Brazil Units: 4
- POSC 350 Politics of Latin America Units: 4
- POSC 430 Political Economy of Mexico Units: 4
- POSC 431 Political Economy of Central America Units: 4
- REL 334g Religion and Colonial Encounter Units: 4

Spanish (BA)

Required Course - Lower Division (4 Units)*

- SPAN 260 Advanced Spanish: Arts and Sciences Units: 4

Required Courses - Upper Division

Four of the following courses (16 Units):

- SPAN 301 Introduction to Literature and Film Units: 4
- SPAN 310 Structure of Spanish Units: 4
- One other SPAN literature, culture, film course Units: 4
- One 400-level SPAN course Units: 4

Electives (16 units):

Four other upper-division SPAN courses.

Note:

** Majors and minors may request a waiver of SPAN 260 if they meet one or more of the following prerequisites: a) a score of 5 on the Spanish language or literature advanced placement (AP) exam; b) a score of 6 or 7 on the Spanish International Baccalaureate Higher-Level exam (IBHL); c) a score of 800 in the Spanish SAT subject exam; or d) demonstrate advanced proficiency in spoken and written Spanish. Departmental approval is required in every case.*

Minor

Latin American Studies Minor

The Latin American Studies minor recognizes the lasting importance of U.S.-Latin American relations. The overriding goal is to encourage students to learn more about Latin America by combining conceptual, area and language studies during their time at USC. The purpose of this 20-unit minor is to deepen students' knowledge of Latin America by offering courses from multiple disciplines within a context of close faculty guidance. The gateway requirement of one 4-unit course provides the student with options in both humanities and the social sciences, and the designated electives are similarly meant to allow students to blend these specialties.

For fulfillment of the requirements for the minor a student must choose four classes outside of his or her major department dedicated exclusively to the minor (which may be the same four classes). After the gateway course, these elective courses must be spread across at least two disciplines and/or departments.

Required Courses

One of the following 4-unit gateway introductory courses:

- COLT 250g Cultures of Latin America Units: 4
- HIST 273g Colonial Latin America Units: 4
- HIST 372 Modern Latin America Units: 4
- IR 364 The Political Economy of Latin American Development Units: 4
- IR 365 Politics and Democracy in Latin America Units: 4
- POSC 350 Politics of Latin America Units: 4

Note:

If the student has chosen a lower-division (100- or 200-level) course among the introductory choices, all area electives must be at the upper-division (300- or 400-) level.

Elective Requirements

Four courses (16 units) from the following list:

- AHIS 127g Arts of the Ancient Americas Units: 4
- AHIS 128gp Arts of Latin America Units: 4
- AHIS 318 Arts of the Ancient Andes Units: 4
- AHIS 319 Mesoamerican Art and Culture Units: 4
- AMST 448m Chicano and Latino Literature Units: 4
- ANTH 425 Peoples and Cultures of Latin America Units: 4
- COLT 250g Cultures of Latin America Units: 4
- ECON 340 Economics of Less Developed Countries Units: 4
- HIST 370 Spanish America, 1492–1821 Units: 4
- HIST 371 Culture in Diaspora: The Jews of Spain Units: 4
- HIST 372 Modern Latin America Units: 4
- HIST 374 History of Mexico Units: 4
- HIST 451 The Mexican Revolution Units: 4
- HIST 456 Race, Slavery, and the Making of the Atlantic World Units: 4
- HIST 470 The Spanish Inquisition in the Early Modern Hispanic World Units: 4, 2 years
- HIST 473 Colonial Latin America Seminar Units: 4
- IR 364 The Political Economy of Latin American Development Units: 4
- IR 365 Politics and Democracy in Latin America Units: 4
- IR 408 Global Democratization Units: 4
- IR 426 Trade Politics in the Western Hemisphere Units: 4
- IR 454 The International Political Economy of Development Units: 4
- IR 465 Contemporary Issues in United States-Latin America Relations Units: 4
- IR 466 Contemporary Issues in Latin American Politics Units: 4

- PORT 250g Visions of Brazil Units: 4
- POSC 350 Politics of Latin America Units: 4
- POSC 430 Political Economy of Mexico Units: 4
- POSC 431 Political Economy of Central America Units: 4
- SPAN 320 Politics, Thought, Society Units: 4
- SPAN 321 Sounds, Images, Objects Units: 4
- SPAN 372 Modern and Contemporary Latin American Fiction Units: 4
- SPAN 462 Literary Cartographies of Latin America and Spain, 1810–1898 Units: 4
- SPAN 495 Seminar for Majors and Minors Units: 4

Luso-Brazilian Studies Minor

The Luso-Brazilian Studies minor offers students the opportunity to further the study of the Portuguese language and take significant steps toward its mastery both as a richly layered expressive tool in the contexts of literary and cultural analysis and in the interpretation and articulation of critical thinking, as well as a highly effective instrument tailored to the practical needs of business interactions in a world that is increasingly more diverse and globalized.

Building on a solid basis of four semesters of Portuguese language (or equivalent), which serves as a prerequisite for the Luso-Brazilian Studies minor, students will have the opportunity to choose from a rich selection of core courses spanning cultural, literary and social aspects of the Portuguese-speaking world, as well as Portuguese applied to the context of professions. In addition to the core offerings, students will be able to choose from a wide array of electives in order to fulfill the required number of units for the Luso-Brazilian Studies minor, as well as have the opportunity to fulfill some of the requirements in one of the exciting Study Abroad options in Brazil.

The Luso-Brazilian Studies minor will require 20 units beyond the basic language requirements.

Required Courses (8-units): select two of the following three courses

- PORT 300 Introduction to Social and Literary Studies Units: 4
- PORT 302 Introduction to Brazilian Literature Units: 4
- PORT 316 Portuguese for Business and the Professions Units: 4

Elective Courses (12-units): select three from the following list

A total of 12-units of courses should be selected with the guidance of the director of the Luso-Brazilian Studies program. The following courses are among the elective options:

- PORT 342 Brazilian Cinema Units: 4
- SPAN 372 Modern and Contemporary Latin American Fiction Units: 4
- SPAN 405 History of the Spanish and Portuguese Languages Units: 4
- SPAN 482 Literature and the City Units: 4

Note:

Study Abroad courses and courses offered by other departments at USC may also count as elective options, as long as a Portuguese-speaking country and/or the Lusophone world is among the objects of study. (The following list of courses is subject to change, according to course availability.)

- AMST 353m Race and Racism in the Americas Units: 4
- ANTH 425 Peoples and Cultures of Latin America Units: 4
- HIST 372 Modern Latin America Units: 4
- HIST 456 Race, Slavery, and the Making of the Atlantic World Units: 4
- IR 364 The Political Economy of Latin American Development Units: 4
- IR 365 Politics and Democracy in Latin America Units: 4
- IR 425 The New Triangle: China, the U.S. and Latin America Units: 4
- IR 465 Contemporary Issues in United States-Latin America Relations Units: 4
- IR 466 Contemporary Issues in Latin American Politics Units: 4
- POSC 350 Politics of Latin America Units: 4
- SOCI 470 Social Change in Low-Income Countries Units: 4

Spanish Minor

Required Courses

Lower-Division (4 Units)

- SPAN 260 Advanced Spanish: Arts and Sciences Units: 4

Upper-Division (20 Units)

- Any five courses at the 300 or 400 level.
- Only one section of SPAN 316x may be taken for minor credit.

Note:

Minors may request a waiver of SPAN 260 if they meet one or more of the following prerequisites: a) a score of 5 on the Spanish language or literature advanced placement (AP) exam, b) a score of 6 or 7 on the Spanish International Baccalaureate Higher-Level exam (IBHL), c) a score of 800 in the Spanish SAT subject exam or d) demonstration of advanced proficiency in spoken and written Spanish. Departmental approval is required in every case.

Learner Centered Curricula

Richard Fliegel, PhD
Grace Ford Salvatori Hall, Suite 320
(213) 740-2961
Email: fliegel@usc.edu

Collaborative Learning Projects (CLP) and Individual Programs of Study (IPOS)

A research university provides many opportunities for undergraduates to learn in settings that suit a wide variety of learning styles, talents and professional aspirations. Beyond the classroom lie opportunities for individual and collaborative research projects, creative literary work, the plastic and performing arts, service learning and internships, distance and distributive learning, overseas study and a range of other activities. To track an idea from its genesis in research to its application as the solution of a contemporary problem, students must be able to take advantage of all these learning modalities.

For that reason, the USC Dornsife College of Letters, Arts and Sciences offers two curricular structures that enable non-traditional learning experiences to be credited across institutions. In both of these options, students work with a faculty committee to create individual learning opportunities suited to their personal academic interests and professional aspirations. The first allows self-motivated, independent learners to combine resources in a particularly rich learning experience, while the second promotes collaborative learning across several aligned modalities.

Collaborative Learning Projects

The USC Dornsife College of Letters, Arts and Sciences offers a curricular construct (MDA 460) designed to promote collaborative learning. Two or more students may propose a research project or other collaborative program, with specified learning objectives; a faculty committee will review each proposal to decide if it comprises a well-conceived educational experience and determine the unit values to be awarded, either collectively or to each student who participates. Collaborative Learning Projects award only credit or no credit grades.

Individual Programs of Study

Individual Programs of Study (IPOS) allow individual students who have exhausted their options for departmental Directed

Research to design a "curriculum" of 2 to 18 units, including directed research, service learning and internships, creative artistic production and any other educational experiences that might be relevant to the proposed academic program.

An Individual Program of Study (MDA 450) might be created for an entire semester's work, including directed research, an internship and a distance learning course. Or, a more modest proposal might include 4 units of original artwork plus service learning.

Individual Programs of Study encourage students to design educational experiences that inspire them, prompting a profound engagement with a learning environment ideally suited to their individual talents. Individual Programs of Study may include a wider array of educational contexts, experiences and opportunities for nontraditional learning than are generally available for credit at most institutions of higher education. Individual Programs of Study are letter graded.

Review Process

Students who are interested in proposing either an Individual Program of Study or a Collaborative Learning Project must complete an application that includes:

1. A full description of the project, including information about all courses, internships and other academic activities that will be involved;
2. A statement explaining why these activities could not be accomplished within the context of existing course work and directed research;
3. A proposal for assessing the work that is to be completed for the project beyond that associated with graded courses;
4. The endorsement of a faculty member who will serve as sponsor for the project. This faculty member will typically lead directed research associated with the project and award the final grade for the entire project;
5. A sign-off from the student's major department is also required; and
6. The student's STARS report and transfer credit statement, if transfer courses are relevant.

These materials will be reviewed by three faculty members comprising an Independent Study Committee, which will consider the student's academic record and decide whether to allow the project, how many units to award and other relevant conditions.

Members of the Independent Study Committee are appointed for an academic year by the College Dean of Undergraduate Education in the USC Dornsife College of Letters, Arts and Sciences. This committee consults with the Registrar's Office on articulating credits. If a member of the committee wishes to serve as the sponsor for a project, the dean will appoint an alternate to serve on the committee and consider that student's proposal.

Credits count as elective units, unless individual departments choose to apply some or all of the units toward major or minor requirements. A student may count no more than 18 units toward the degree through a combination of Individual Programs of Study and Collaborative Learning Projects. Upon completion of the project, the student's transcript reads "Individual Program of Study" or "Collaborative Learning Project," with the units awarded and the titles of any courses included in the program. See Multidisciplinary Activities and MDA 450 and MDA 460 course descriptions.

Linguistics

The Linguistics Department emphasizes the study of language both as an abstract system and in its psychological and social contexts. In addition to introductory linguistics and courses in linguistic analysis, students take courses in psycholinguistics (language acquisition, processing and language disorders) and/or sociolinguistics (language and society). The undergraduate major in linguistics focuses on how the human mind structures, processes and acquires language as well as how similar communication goals are met by diverse means in the languages of the world. The major in Computational Linguistics introduces students to the emerging interdisciplinary field of Computational Linguistics, which provides the theoretical basis of many new technologies, such as speech recognition and dialog systems. Students are encouraged to pursue combined majors in Linguistics and Philosophy, Linguistics and Cognitive Science, Linguistics and East Asian Languages and Cultures, and Computational Linguistics. A linguistics minor is also available and can be combined with other majors. Please contact the department adviser for more information. The Linguistics Department also offers graduate PhD programs. A wide range of courses allows students to study syntax, morphology, phonology, semantics, phonetics, psycholinguistics, sociolinguistics, speech therapy and computational linguistics.

Graduate Degrees

The graduate program in linguistics trains individuals to engage in the scientific study of human language. Course work emphasizes the structural aspects of language. Students work closely with faculty members on problems in linguistic theory, the description of particular languages, and variation across different users and contexts, focusing on their implications for understanding cognitive structures relating to language.

Admission Requirements

Applicants for admission to the graduate program are expected to have a bachelor's degree in linguistics or other appropriate field. Other requirements for admission include: a detailed statement of purpose with specific information about interests and goals, and at least three letters of recommendation from academic sources.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and The Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Bachelor's Degree

Computational Linguistics (BS)

Major Requirements for the Bachelor of Science in Computational Linguistics

The degree requires six to seven lower-division courses (22-26 units) and six upper-division courses (24 units): a total of 46-50 units.

Lower-Division Courses (22-26 units)

Two in Linguistics (8 units)

- LING 210g Introduction to Linguistics Units: 4
- LING 285Lg Human Language and Technology Units: 4

Four to five courses in Computer Science (14-18 units)

- CSCI 103L Introduction to Programming Units: 4
- CSCI 104L Data Structures and Object Oriented Design Units: 4
- CSCI 109 Introduction to Computer Science Units: 2
- CSCI 170 Discrete Methods in Computer Science Units: 4
- CSCI 201L Principles of Software Development Units: 4

Upper-Division Courses (24 units)

Five courses in Linguistics (20 units)

- LING 385Lg Human Language as Computation Units: 4 *

Choose one among the following (4 units)

Phonetics and Phonology

- LING 301 Introduction to Phonetics and Phonology Units: 4
- LING 415 Phonetics Units: 4
- LING 450 New Horizons in Forensic Speaker Identification Units: 4

Choose one among the following (4 units)

Psycholinguistics

- LING 405 Child Language Acquisition Units: 4
- LING 406 Psycholinguistics Units: 4

Choose one among the following (4 units)

Syntax and Semantics

- LING 302 Introduction to Syntax Units: 4
- LING 303 Introduction to Semantics and Pragmatics Units: 4 *

Choose one among the following (4 units)

Advanced Computational Linguistics

- LING 486 Natural Language Processing Units: 4
- LING 487 Speech Synthesis and Recognition Units: 4

One course in Computer Science (4 units)

Choose one among the following (4 units)

Computer Science

- CSCI 310 Software Engineering Units: 4
- CSCI 360 Introduction to Artificial Intelligence Units: 4

Linguistics (BA)

Required Courses, Lower Division

- LING 210g Introduction to Linguistics Units: 4

Required Courses, Upper Division

Select two courses (8 units).

- LING 301 Introduction to Phonetics and Phonology Units: 4
- LING 302 Introduction to Syntax Units: 4
- LING 303 Introduction to Semantics and Pragmatics Units: 4

Elective Courses, Upper Division

- Four upper-division LING courses. At least two courses (8 units) must be at the 400 level Units: 16
- One additional upper-division course in linguistics or a related field Units: 4

Capstone Experience

The major requires a capstone experience, which can be fulfilled in one of the following ways:

(A) A research paper completed as Honors Thesis LING 497, or as Directed Research LING 490 or as a Linguistic 400-level course research paper.

(B) A poster presented at the USC UG symposium or at a conference.

(C) A summer internship related to the degree.

Linguistics Major with Honors

The linguistics major with honors requires the student to complete the requirements for the major with a GPA of 3.5 or above and to complete in addition LING 497 Honors Thesis with a grade of B or better. Intent to complete the linguistics major with honors should be registered with the undergraduate adviser no later than the second semester of the junior year.

Linguistics and Cognitive Science (BA)

Combined major program between the Department of Linguistics and the Department of Cognitive Science.

Lower-Division Courses (12 units)

- LING 210g Introduction to Linguistics Units: 4
- PSYC 100Lg Introduction to Psychology Units: 4
- PSYC 274Lg Statistics Units: 4

Upper-Division Courses (32 units)

Two among the following (8 units)

- LING 301 Introduction to Phonetics and Phonology Units: 4
- LING 302 Introduction to Syntax Units: 4
- LING 303 Introduction to Semantics and Pragmatics Units: 4

One among the following (4 units)

- PSYC 301L Cognitive Processes Units: 4

Three among the following (12 units)

- LING 401 Advanced Phonology Units: 4
  or
- LING 402 Advanced Syntax Units: 4
  or
- LING 403 Advanced Semantics Units: 4
- LING 322g Language Contact and Language Acquisition Units: 4
- LING 325g Language and Number Units: 4
- LING 405 Child Language Acquisition Units: 4
- LING 406 Psycholinguistics Units: 4
- LING 407 Atypical Language Units: 4

One among the following (4 units)

- PSYC 336L Developmental Psychology Units: 4
- PSYC 433 Children's Learning and Cognitive Development Units: 4

Additional Requirement

An additional upper division course from the above list or from a related field (4 units)

Combined Major

Linguistics and East Asian Languages and Cultures (BA)

For the lower division

- LING 210g Introduction to Linguistics Units: 4 is required

For the upper division, the following courses are required:

- LING 301 Introduction to Phonetics and Phonology Units: 4
  and
- LING 302 Introduction to Syntax Units: 4

- EALC 470 Introduction to East Asian Linguistics Units: 4

Two courses from

- LING 380 Languages of the World Units: 4
- LING 401 Advanced Phonology Units: 4
- LING 402 Advanced Syntax Units: 4
- LING 403 Advanced Semantics Units: 4
- LING 405 Child Language Acquisition Units: 4
- LING 406 Psycholinguistics Units: 4
- LING 407 Atypical Language Units: 4
- LING 410 Second Language Acquisition Units: 4
- LING 415 Phonetics Units: 4
- LING 466 Word and Phrase Origins Units: 4 and
- LING 485 Field Methodology Units: 4

Two courses selected from

- EALC 304 Advanced Modern Chinese I Units: 4
- EALC 306 Advanced Modern Chinese II Units: 4
- EALC 315 Advanced Korean I Units: 4
- EALC 317 Advanced Korean II Units: 4
- EALC 320 Advanced Japanese I Units: 4
- EALC 322 Advanced Japanese II Units: 4
- EALC 400 Classical Chinese I Units: 4
- EALC 402 Classical Chinese II Units: 4
- EALC 406 Advanced Modern Chinese IV Units: 4
- EALC 407 News and Web Chinese Units: 4
- EALC 412a Business Chinese Units: 4
- EALC 412b Business Chinese Units: 4
- EALC 413 Business Japanese Units: 4
- EALC 415 Advanced Korean III Units: 4
- EALC 417 Advanced Korean IV Units: 4
- EALC 422 Advanced Japanese III Units: 4
- EALC 424 Advanced Japanese IV Units: 4 and
- EALC 426 Classical Japanese Units: 4

One EALC literature, civilization or thought course from

- EALC 332 Modern Korean Literature in Translation Units: 4
- EALC 335m Korean American Literature Units: 4
- EALC 340gp Japanese Civilization Units: 4
- EALC 342gp Japanese Literature and Culture Units: 4
- EALC 345 Korean Civilization Units: 4
- EALC 350gp Chinese Civilization Units: 4
- EALC 352g Chinese Literature and Culture Units: 4
- EALC 354g Modern Chinese Literature in Translation Units: 4
- EALC 355 Studies in Chinese Thought Units: 4
- EALC 365 Studies in Japanese Thought Units: 4
- EALC 380 Cultural Topics in East Asian Literature Units: 4
- EALC 386 Readings in Modern Korean Literature Units: 4
- EALC 452 Chinese Fiction Units: 4
- EALC 455 Japanese Fiction Units: 4 and
- EALC 460 Love, Self and Gender in Japanese Literature Units: 4

Two additional EALC courses

Two additional EALC courses from category IV or V. (After consultation with a department adviser, students may petition to use EALC courses not listed toward this requirement.)

Linguistics and Philosophy (BA)

For the lower division,

- LING 210g Introduction to Linguistics Units: 4 is required

For the upper division the following courses are required:

- LING 301 Introduction to Phonetics and Phonology Units: 4 and
- LING 302 Introduction to Syntax Units: 4

- PHIL 350 Symbolic Logic Units: 4 and
- PHIL 465 Philosophy of Language Units: 4

Two courses selected from

- LING 380 Languages of the World Units: 4
- LING 401 Advanced Phonology Units: 4
- LING 402 Advanced Syntax Units: 4
- LING 403 Advanced Semantics Units: 4
- LING 405 Child Language Acquisition Units: 4
- LING 406 Psycholinguistics Units: 4
- LING 407 Atypical Language Units: 4
- LING 410 Second Language Acquisition Units: 4
- LING 415 Phonetics Units: 4
- LING 466 Word and Phrase Origins Units: 4 and
- LING 485 Field Methodology Units: 4

And three courses selected from

- PHIL 450 The Limits of Logic Units: 4
- PHIL 460 Metaphysics Units: 4
- PHIL 462 Philosophy of Mind Units: 4 and
- PHIL 470 Theory of Knowledge Units: 4

Combined Major in Linguistics and Philosophy with Honors

The combined major in linguistics and philosophy with honors requires the student to complete the requirements for the major with a GPA of 3.5 or above and to complete in addition LING 497 Honors Thesis or PHIL 494 Senior Thesis with a grade of B or better. Intent to complete the major with honors should be registered with the undergraduate adviser no later than the second semester of the junior year.

Minor

Linguistics Minor

Lower division:

(4 units)

- LING 210g Introduction to Linguistics Units: 4

Upper division:

(16 units)

- LING 301 Introduction to Phonetics and Phonology Units: 4
- LING 302 Introduction to Syntax Units: 4

One course from the following:

Sociolinguistics

- LING 375 Sociolinguistics Units: 4

Psycholinguistics

- LING 405 Child Language Acquisition Units: 4
- LING 406 Psycholinguistics Units: 4
- LING 410 Second Language Acquisition Units: 4

One additional upper-division linguistics course

Units: 20

Master's Degree

Linguistics (MA)

The Linguistics department does not accept applicants for a Master of Arts degree. Students who complete the necessary coursework and write and successfully defend a screening research paper will automatically be awarded an MA in Linguistics as part of the PhD program.

Students pursuing the PhD program in linguistics are required to complete 32 units of course work toward the MA degree. The choice of courses is subject to approval by the Graduate Studies Committee. In addition, students must satisfy one foreign language or research tool requirement. (See Foreign Language/Research Tool Requirement.)

MA Research Paper

In addition to course work, students are also required to write one research paper. The completed paper must be submitted to the Graduate Studies Committee no later than the student's fourth semester of graduate study by the deadline established for that academic year. Following submission of the research paper, each student will conduct an oral defense of his or her work.

Required Courses for MA in Linguistics

Of the 32 units, students are required to take the following courses:

- LING 505a Seminar in Linguistics Units: 1
- LING 530 Generative Syntax Units: 3
- LING 531a Phonology Units: 3
- LING 610 Seminar in Linguistic Theory Units: 3

In addition to the above courses, students must take courses related to their screening, and pass their first screening in order to receive the MA.

Doctoral Degree

Linguistics (PhD)

Students pursuing the PhD in Linguistics are required to complete a minimum of 60 units of course work beyond the baccalaureate. In addition to the 32 units completed toward the MA, students are required to take three 600-level seminars in linguistics and a minimum of 4 units of 794ab Doctoral Dissertation. No more than 8 units of 794 may be applied toward the PhD degree. A maximum of 30 transfer units, approved by the university and the department may be applied to the PhD degree.

Graduate Record Examinations (GRE) scores are not required for applications for admission to the graduate program in linguistics.

After successfully completing the screening procedure, students will establish a qualifying exam committee to determine a PhD course program in preparation for the dissertation. This course program must be approved by the Graduate Studies Committee.

Advisement

The student in his or her first semester will have the option of either selecting a faculty adviser or postponing such a selection until, but no later than, the last day of classes of the first year in the program. The Graduate Studies Committee (GSC) will serve as a provisional adviser until the student makes a selection.

The student has the option of changing advisers at any time without the need to seek the original adviser's approval. The student should inform the GSC and the previous adviser of the change.

At the beginning of the second year of graduate study, the faculty adviser will assist the student in planning a program of study appropriate to the student's interests leading to the screening procedure.

Required Core Courses in Linguistics

Students pursuing the PhD program in linguistics are required to complete 32 units of course work toward the MA degree. See Waiver and Substitution of Course Requirements for possible exceptions.

Required Courses

- LING 530 Generative Syntax Units: 3
- LING 531a Phonology Units: 3
- LING 534 Semantics Units: 3
- LING 576 Psycholinguistics Units: 3
- LING 580 General Phonetics Units: 3

Additional Requirements

Screening Procedure

Before a doctoral qualifying exam committee can be established for applicants to the PhD program, a student must pass a screening procedure. This procedure consists of a review of the student's graduate work at USC by Linguistics Department faculty. The review will be based on the following criteria: course work completed, including grades and papers; faculty recommendations; and evaluation of both the student's MA research paper and a PhD screening paper. The MA research and PhD screening papers must be in two different sub areas of linguistics, for example: syntax and psycholinguistics, or phonology and semantics, or sociolinguistics and typology.

The MA research paper must be completed and defended prior to the end of the fourth semester of graduate study, and the PhD screening paper must be completed and defended prior to the end of the sixth semester. The set of courses leading to the MA research paper and the PhD screening paper are determined through recommendation of the screening committee and approval of the Graduate Studies Committee.

Qualifying Exam Committee

Following the successful completion of the screening procedure, the student will establish a five-member qualifying exam committee. The qualifying exam committee is composed of at least five members; a minimum of three, including at least one tenured member, must be from the Linguistics Department and one must be a faculty member from outside the Linguistics Department. The Associate Vice Provost for Graduate Programs is ex officio a member of all qualifying exam committees. (Refer to the Graduate School Policies and Requirements for instructions on forming a qualifying exam committee.)

The Request to Take the Qualifying Examination Form is the means by which the qualifying exam committee is formally established. This form should be filed with the qualifying exam committee and the Graduate School the semester prior to taking the qualifying examination but no later than 30 days before the date of the student's written examination. In order to take the written examination, the student must submit a dissertation prospectus to each member of the qualifying exam committee.

Qualifying Examination

The examination qualifying a student for candidacy for the PhD degree is comprehensive in nature, partly written and partly oral. Prior to taking the qualifying examination, the student must have met all of the departmental requirements for doing so and have the recommendation of the qualifying exam committee. The committee will determine and administer the written examination.

The written examination consists of a limited number of questions in the fields related to the student's research. Students will receive the written examination two weeks after submitting the qualifying prospectus and will have 30 days to complete the questions. An oral examination will be scheduled by the qualifying exam committee two weeks after the written examination has been submitted.

The successful completion of the qualifying procedure is represented by the approval by the qualifying exam committee of (1) the prospectus, (2) the written examination, and (3) oral defense.

Dissertation

The final stage of the program is the submission and defense of a dissertation that makes an original and substantial contribution to its field of study. Refer to the Graduate School section of the catalogue for the policies and procedures governing the submission of a dissertation.

Linguistics (Specialization in East Asian Linguistics) (PhD)

Students interested in East Asian linguistics take the Doctor of Philosophy in Linguistics with a specialization in East Asian linguistics. In addition to all requirements for the PhD in linguistics, students are required to write research papers on topics relating to East Asian languages for four courses or 15 units during their PhD studies. One of the two screening papers, the prospectus associated with the qualifying examination and the doctoral dissertation must also deal with at least one East Asian language. Students must additionally take LING 794a Doctoral Dissertation, LING 794b Doctoral Dissertation.

Students pursuing the PhD in Linguistics are required to complete a minimum of 60 units of course work beyond the baccalaureate. In addition to the 32 units completed toward the MA, students are required to take three 600-level seminars in linguistics and a minimum of 4 units of 794ab Doctoral Dissertation. No more than 8 units of 794 may be applied toward the PhD degree. A maximum of 30 transfer units, approved by the university and the department may be applied to the PhD degree.

Graduate Record Examinations (GRE) scores are not required for applications for admission to the graduate program in linguistics.

After successfully completing the screening procedure, students will establish a qualifying exam committee to determine a PhD course program in preparation for the dissertation. This course program must be approved by the Graduate Studies Committee.

Advisement

The student in his or her first semester will have the option of either selecting a faculty adviser or postponing such a selection until, but no later than, the last day of classes of the first year in the program. The Graduate Studies Committee (GSC) will serve as a provisional adviser until the student makes a selection.

The student has the option of changing advisers at any time without the need to seek the original adviser's approval. The student should inform the GSC and the previous adviser of the change.

At the beginning of the second year of graduate study, the faculty adviser will assist the student in planning a program of study appropriate to the student's interests leading to the screening procedure.

Required Core Courses in Linguistics

Students pursuing the PhD program in linguistics are required to complete 32 units of course work toward the MA degree. See Substitution of Course Requirements under Requirements for Graduation for possible exceptions.

- LING 530 Generative Syntax Units: 3
- LING 531a Phonology Units: 3
- LING 534 Semantics Units: 3
- LING 576 Psycholinguistics Units: 3
- LING 580 General Phonetics Units: 3

Progressive Degree Programs in Mathematics

See Mathematics for progressive degree requirements.

Minor

Mathematical Finance Minor

Kaprielian Hall 104
(213) 740-2400

This interdisciplinary minor was created for students in business, economics and mathematics, whose majors already require some of the introductory course work. Students in other programs are welcome but should expect the minor to require more units than it dos for students in those programs.

As with all minors, students must include at least four upper-division courses and four courses dedicated exclusively to this minor (which may be the same four courses). Finally, students must select four courses outside their major department. Economics majors must choose four courses outside of economics; math majors must choose four courses outside of math; business majors must choose four courses outside of the Marshall School of Business. These may be the same courses used to meet the first two conditions.

Requirements

- BUAD 351 Economic Analysis for Business Decisions Units: 4 *
- BUAD 352 Macroeconomic Analysis for Business Decisions Units: 4 *
  or
- ECON 203g Principles of Microeconomics Units: 4

- ECON 205g Principles of Macroeconomics Units: 4
  or
- ECON 351x Microeconomics for Business Units: 4 *
- ECON 352x Macroeconomics for Business Units: 4 *

Complete the following courses (8 units):

- ECON 303 Intermediate Microeconomic Theory Units: 4 *
- ECON 305 Intermediate Macroeconomic Theory Units: 4 *

Choose two courses, one from each of the following groups (8 units):

- MATH 118gx Fundamental Principles of Calculus Units: 4 * or
- MATH 125g Calculus I Units: 4 *
- MATH 308 Statistical Inference and Data Analysis II Units: 4 *
  or
- MATH 407 Probability Theory Units: 4 * or
- ECON 317 Introduction to Statistics for Economists Units: 4 *
  or
- BUAD 310g Applied Business Statistics Units: 4

Choose two courses from the following list (8 units):

- MATH 126g Calculus II Units: 4 * or
- MATH 127 Enhanced Calculus II Units: 4 * or
- MATH 129 Calculus II for Engineers and Scientists Units: 4 *
- MATH 225 Linear Algebra and Linear Differential Equations Units: 4 * or
- MATH 245 Mathematics of Physics and Engineering I Units: 4 *
- MATH 226g Calculus III Units: 4 * or
- MATH 227 Enhanced Calculus III Units: 4 * or
- MATH 229 Calculus III for Engineers and Scientists Units: 4 *
- MATH 408 Mathematical Statistics Units: 4 * or
- MATH 467 Theory and Computational Methods for Optimization Units: 4 *

Choose one course from the following list (4 units):

- BUAD 306 Business Finance Units: 4 *
- BUAD 310g Applied Business Statistics Units: 4
- ECON 350 The World Economy Units: 4 *
- ECON 357 Money, Credit, and Banking Units: 4 *
- FBE 441 Investments Units: 4 *

Choose one course from the following list (4 units):

- ECON 452 International Finance Units: 4 *
- ECON 457 Financial Markets Units: 4 *
- FBE 421 Financial Analysis and Valuation Units: 4 *
- FBE 443 Introduction to Forecasting and Risk Analysis Units: 4 *
- FBE 459 Financial Derivatives Units: 4 *
- FBE 462 International Trade, Finance and Commercial Policy Units: 4 *

Choose one course from the following:

- CSCI 102L Fundamentals of Computation Units: 2
- CSCI 103L Introduction to Programming Units: 4
- ITP 109 Introduction to Java Programming Units: 2
- ITP 115 Programming in Python Units: 2
- ITP 165 Introduction to C++ Programming Units: 2
- ITP 168 Introduction to MATLAB Units: 2

Note:

**Prerequisite required*

Total requirements, for students with no prior course work: 42–44 units

Students majoring in business administration, economics or mathematics can meet many of these requirements with course work that also satisfies their majors. In addition to those classes, students in those majors must complete the following requirements:

- Business majors satisfy 24 units with course work that is also required for the major and need to complete only 18 units in MATH, ECON and ITP or CSCI
- Economics majors satisfy 20–24 units with course work required for the major (including one major elective), needing only 18–22 units in BUAD, FBE, ITP or CSCI and MATH
- Mathematics majors satisfy 16 units with course work required for the major, needing only 26 units in BUAD, ECON, FBE and ITP or CSCI

Master's Degree

Mathematical Finance (MS)

The objective of this master of science program is to produce graduates with a rigorous foundation in the economic theory and mathematical modeling of financial markets. The program creates an integrated curriculum spanning four disciplines: economics, mathematics, econometrics/statistics and computational/numerical analysis. The program is designed for recent graduates in the fields of applied mathematics, physics and engineering — or for graduates in economics, business and finance with strong mathematical backgrounds — who wish to pursue high-tech finance careers in financial institutions, industry or government.

Admission Requirements

Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All applicants must take the GRE General Test. Complete transcripts of undergraduate and any graduate level courses are required, as well as a statement of purpose and three recommendation letters. A substantial undergraduate background in mathematics is required, which should include one semester of real analysis or advanced calculus, one semester of linear algebra and one semester of advanced probability/statistics. Candidates with weaker backgrounds may be required to take mathematics classes prior to admission to the program. An undergraduate knowledge of microeconomics and of macroeconomics, and partial differential equations is helpful, although it is not required for admission. Some experience in Matlab and C/C++ programming is also useful.

Foreign Language Requirement

There is no foreign language requirement.

Course Requirements

Thirty units of course work are required, six core courses and four to five elective courses. Students are required to satisfy a summative experience for degree completion. This will be in the form of registration in 1 unit of MATH 590 Directed Research with a summative report at the end of the term. Topics of research will be determined by the program director. The program consists of:

Required Core Courses (6 Courses, 18 Units)

Mathematics and Mathematical Finance:

- MATH 530a Stochastic Calculus and Mathematical Finance Units: 3
- MATH 530b Stochastic Calculus and Mathematical Finance Units: 3
- MATH 512 Financial Informatics and Simulation (Computer Labs and Practitioner Seminar) Units: 3
- MATH 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 (1 Units Required)

Financial Economics and Econometrics:

- ECON 613 Economic and Financial Time Series I Units: 4
- ECON 659 Economics of Financial Markets I Units: 4

Elective Courses (4 Courses, 12 Units)

Computational and Empirical Finance (must take at least 2 courses)*:

- FBE 535 Applied Finance in Fixed Income Securities Units: 1.5, 3
- FBE 554 Trading and Exchanges Units: 3
- FBE 555 Investment Analysis and Portfolio Management Units: 3
- FBE 559 Management of Financial Risk Units: 3
- FBE 589 Mortgages and Mortgage-Backed Securities and Markets Units: 3

Note:

(FBE 555 highly recommended)

Statistics*:

- MATH 541a Introduction to Mathematical Statistics Units: 3
- MATH 541b Introduction to Mathematical Statistics Units: 3
- MATH 543 Nonparametric Statistics Units: 3
- MATH 547 Mathematical Foundations of Statistical Learning Theory Units: 3

Numerical/Optimization/Other Methods*:

- MATH 501 Numerical Analysis and Computation Units: 3
- MATH 502a Numerical Analysis Units: 3
- MATH 502b Numerical Analysis Units: 3
- MATH 504a Numerical Solution of Ordinary and Partial Differential Equations Units: 3
- MATH 504b Numerical Solution of Ordinary and Partial Differential Equations Units: 3
- MATH 505a Applied Probability Units: 3
- MATH 505b Applied Probability Units: 3
- MATH 508 Filtering Theory Units: 3
- MATH 509 Stochastic Differential Equations Units: 3
- MATH 585 Mathematical Theory of Optimal Control Units: 3

Computational and Financial Economics:

- ECON 614 Economic and Financial Time Series II Units: 4
- ECON 652 Economics of Financial Markets II Units: 4
- PM 511aL Data Analysis Units: 4
- PM 511bL Data Analysis Units: 4

Note:

Prerequisites for any of the above courses can be waived based on students' knowledge of the subject area. Approval from the program director is required.

**The elective courses in statistics/numerical/optimization/other methods and computational and empirical finance have to be approved for each student by the program directors. Other electives, not on this list, may sometimes be approved after consultation with program directors.*

Mathematics

The USC Department of Mathematics welcomes students interested in the mathematical sciences. Our undergraduate degree programs are constructed to provide basic knowledge of modern mathematical techniques most relevant to each specific degree together with sufficient flexibility to enable each student to study additional topics of particular interest. We seek to provide our students with an appreciation of the structure and beauty of the mathematics they learn as well as the power of its applications.

Students completing the undergraduate programs in Mathematics should be well prepared for many careers in industry and education, as well as for graduate study in mathematics. The Applied and Computational programs focus on the areas most useful in the application of mathematics to real-world problems. All programs offered, and the applied degrees in particular, train graduates for technologically oriented careers.

The primary aspects of USC's graduate programs in Mathematics are high-level courses, independent study and thesis preparation by PhD students. Our programs also mentor students in their presentation skills and post-degree careers. Students choose either the Mathematics or the Applied Mathematics program, which share the requirement of a written thesis containing original research for a PhD, and have course and examination requirements tailored to the program chosen.

Each incoming PhD student is assigned a temporary adviser. At some point in their studies, PhD students choose their own thesis adviser whose research interests align with those of the student. There is considerable contact with faculty in graduate classes, reading courses, research efforts and at lively afternoon teas. The department has a strong tradition of senior PhD students aiding and advising students early in their graduate career.

In addition to its PhD programs, the Mathematics Department offers Master's degrees in Applied Mathematics, Mathematics, Mathematical Finance and Statistics.

Faculty

University Professor and Seeley G. Mudd Professor of Computer Science and Mathematics: Shanghua Teng, PhD *(Computer Science)*
Dean's Professor of Mathematics: Eric M. Friedlander, PhD
Gabilan Distinguished Professorship in Science and Engineering and Professor of Mathematics:
Professors: Kenneth Alexander, PhD; Richard Arratia, PhD; Aravind Asok, PhD; Jay Bartroff, PhD; Francis Bonahon, PhD*; Susan Friedlander, PhD; Jason Fulman, PhD; Larry Goldstein, PhD; Robert Guralnick, PhD*; Nicolai T.A. Haidn, PhD; Juhi Jang, PhD; Edmond A. Jonckheere, PhD *(Electrical and Computer Engineering)*; Sheldon Kamienny, PhD; Igor Kukavica, PhD; Aaron Lauda, PhD; Sergey Lototsky, PhD; Jinchi Lv, PhD *(Data Sciences and Operations)*; Jin Ma, PhD; Fedor Malikov, PhD; Remigijus Mikulevicius, PhD; Susan M. Montgomery, PhD*; Paul K. Newton, PhD *(Aerospace and Mechanical Engineering)*; Gary Rosen, PhD; Robert J. Sacker, PhD; Fengzhu Sun, PhD *(Biological Sciences)*; Chunming Wang, PhD; Jianfeng Zhang, PhD; Mohammed Ziane, PhD
Associate Professors: Sami Assaf, PhD; Greta Panova, PhD
Assistant Professors: Yu Deng, PhD; Sheel Ganatra, PhD; Stanislav Minsker, PhD; Cris Negron, PhD; Kyler Siegel, PhD; Harold Williams, PhD
Professor (Teaching): Cymra Haskell, PhD
Associate Professors (Teaching): David Crombecque, PhD; Neelesh Tiruvilumala, PhD
Assistant Professors (Teaching): Nathaniel Emerson, PhD; Guillermo Reyes Souto, PhD; Paul Tokorcheck, PhD; Jared Warner, PhD
Assistant Professors (RTPC): Nivedita Bhaskhar, PhD; Tommaso Cremaschi, PhD; Anne Dranowski, PhD; Steven Heilman, PhD; Joseph Helfer, PhD; Trevor Leslie, PhD; Mohamed Ndaoud, Phd; Trinh Nguyen, PhD; Wojciech Ozanski, PhD; Mark Rychnovsky, PhD; Qingtang Su, PhD; Masoud Zargar, PhD; Zhaoyu Zhang, PhD
Lecturers: Guillaume Dreyer, PhD; Michael Hall, PhD; Ricardo Mancera, PhD; Felicia Tabing, PhD
Emeritus: Peter Baxendale, PhD; Charles Lanski, PhD; Wlodek Proskurowski, PhD; Alan Schumitzky, PhD; Michael S. Waterman, PhD *(Biological Scienes)*
**Recipient of university-wide or college teaching award.*

Undergraduate Degrees

Advanced Placement Examinations in Mathematics

The university grants 4 units of credit in mathematics for scores of 4 or 5.

Grade Point Average Requirements

For each undergraduate degree an overall GPA of 2.0 in all upper-division courses taken for the degree is required. In addition, any upper-division course specifically listed as required must be passed with a grade of C (2.0) or better (e.g., MATH 410, MATH 425a, MATH 425b and MATH 471 for the BS degree).

Minor in Mathematical Finance

This interdisciplinary minor was created for students in business, economics and mathematics, whose majors already require some of the introductory course work. Students in other programs are welcome but should expect the minor to require

more units than it does for students in these programs. For more information, see Mathematical Finance.

Honors Program in Mathematics

Admission to the Program

The honors program is available for mathematics majors. A student must apply to the department for admission. A minimum grade point average of 3.5 is required in the first two years of university work as well as in the lower-division mathematics courses MATH 125, MATH 126 or MATH 127, MATH 225 and MATH 226 or MATH 227.

Requirements

The students must complete all requirements for the degree program in which they are enrolled. MATH 410, MATH 425a, MATH 425b and MATH 471 are required. The remaining courses at the 400 level or higher must be acceptable for the BS degree.

In addition, students in the honors program must register for at least 4 units of MATH 490x Directed Research. The student must have an overall GPA of at least 3.5 in all courses at the 400 level or higher.

Language

Those students intending to go on to graduate school should satisfy the language requirement in French, German or Russian.

Progressive Degree Programs in Mathematics

Outstanding undergraduate students may apply for a master's degree in any area for which their major is relevant. If accepted into the master's degree program, the student may work simultaneously toward their bachelor's degree and the master's degree. To apply for a master's degree, a student must have completed at least 64 units, but fewer than 96 units, toward their major. The application requires two letters of recommendation from USC faculty, at least one of whom must be in the department of the student's major. For more information on progressive degree programs, see the Progressive Degree section in Undergraduate Degree Programs .

Graduate Degrees

Admission Requirements

All applicants must take the Graduate Record Examinations General Test.

Master of Arts and Doctor of Philosophy in Mathematics and in Applied Mathematics

A substantial undergraduate background in mathematics which includes one year of real analysis (MATH 425a/MATH 425b), one semester of abstract algebra (MATH 410) and one semester of upper-division linear algebra (MATH 471) is required.

Master of Science in Applied Mathematics, in Statistics and in Computational Molecular Biology

A substantial undergraduate background in mathematics that includes one semester of real analysis or advanced calculus and one semester of linear algebra is required.

Regular admission pending completion during the first year of graduate studies of prerequisite undergraduate mathematics may be considered for applicants who otherwise qualify for the program.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and The Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Science in Mathematical Finance

See Mathematical Finance.

Bachelor's Degree

Applied and Computational Mathematics (BA)

Pre-major Requirements:

- MATH 125g Calculus I Units: 4
- MATH 126g Calculus II Units: 4 or
- MATH 127 Enhanced Calculus II Units: 4 or
- MATH 129 Calculus II for Engineers and Scientists Units: 4
- MATH 225 Linear Algebra and Linear Differential Equations Units: 4 or
- MATH 245 Mathematics of Physics and Engineering I Units: 4
- MATH 226g Calculus III Units: 4 or
- MATH 227 Enhanced Calculus III Units: 4 or
- MATH 229 Calculus III for Engineers and Scientists Units: 4

In Mathematics:

- MATH 407 Probability Theory Units: 4
- MATH 458 Numerical Methods Units: 4

At Least Four More Courses From the Following:

- MATH 370 Applied Algebra Units: 4
- MATH 408 Mathematical Statistics Units: 4
- MATH 410 Fundamental Concepts of Modern Algebra Units: 4
- MATH 425a Fundamental Concepts of Analysis Units: 4
- MATH 430 Theory of Numbers Units: 4
- MATH 432 Applied Combinatorics Units: 4
- MATH 435 Vector Analysis and Introduction to Differential Geometry Units: 4
- MATH 445 Mathematics of Physics and Engineering II Units: 4
- MATH 447 Mathematics of Machine Learning Units: 4
- MATH 466 Dynamic Modeling Units: 4
- MATH 467 Theory and Computational Methods for Optimization Units: 4
- MATH 471 Topics in Linear Algebra Units: 4
- MATH 475 Introduction to Theory of Complex Variables Units: 4

In Computing:

At least one programming course such as:

- CSCI 102L Fundamentals of Computation Units: 2
- CSCI 103L Introduction to Programming Units: 4
- ITP 109 Introduction to Java Programming Units: 2
- ITP 115 Programming in Python Units: 2
- ITP 165 Introduction to C++ Programming Units: 2
- ITP 168 Introduction to MATLAB Units: 2

  or other programming course approved by the program advisers.

Three Electives with Significant Quantitative Content:

At least three additional courses with significant quantitative content, in mathematics, natural sciences, computer science, engineering, economics or other fields approved by the department. At least two of these must be outside the mathematics department; one of which must be an upper-division course. Courses to be chosen from following lists:

List A - upper division

- AME 301 Dynamics Units: 3
- AME 404 Computational Solutions to Engineering Problems Units: 3
- ASTE 331a Spacecraft Systems Engineering Units: 3
- ASTE 331b Spacecraft Systems Engineering Units: 3
- ASTR 400 The Solar System Units: 4, 2 years
- ASTR 422 Galaxies and Large-Scale Structures in the Universe Units: 4, 2 years
- ASTR 424 Cosmology Units: 4
- BISC 305g Statistics for Biological Sciences Units: 4
- BISC 478 Computational Genome Analysis Units: 4
- BUAD 310g Applied Business Statistics Units: 4

- BUAD 312g Statistics and Data Science for Business Units: 4
- CHE 330 Chemical Engineering Thermodynamics Units: 4
- CHEM 430 Physical Chemistry: Thermodynamics and Kinetics Units: 4
- CHEM 431 Physical Chemistry: Quantum Mechanics Units: 4
- CHEM 432 Physical Chemistry for the Life Sciences Units: 4
- CSCI 360 Introduction to Artificial Intelligence Units: 4
- CSCI 467 Introduction to Machine Learning Units: 4
- DSO 424 Business Forecasting Units: 4
- DSO 428 Essentials and Digital Frontiers of Big Data Units: 4
- ECON 303 Intermediate Microeconomic Theory Units: 4
- ECON 305 Intermediate Macroeconomic Theory Units: 4
- ECON 317 Introduction to Statistics for Economists Units: 4
- ECON 318 Introduction to Econometrics Units: 4
- ECON 401 Mathematical Methods in Economics Units: 4
- ECON 419 Advanced Econometrics Units: 4
- ECON 457 Financial Markets Units: 4
- EE 330 Electromagnetics I Units: 3
- FBE 441 Investments Units: 4 *
- FBE 459 Financial Derivatives Units: 4 *
- GEOL 425L Data Analysis in the Earth and Environmental Sciences Units: 4
- GEOL 440L Geophysics and Geoengineering Units: 4
- GEOL 450L Geosystems Units: 4
- ISE 330 Introduction to Operations Research: Deterministic Models Units: 3
- ISE 331 Introduction to Operations Research: Stochastic Models Units: 3
- PHYS 304 Mechanics Units: 4
- PHYS 316 Thermodynamics and Statistical Mechanics Units: 4
- PSYC 421L Data Analysis for Psychological Research Units: 4
- QBIO 401 Introduction to Computational Analysis of Biological Data Units: 4

Note:

*FBE 441 and FBE 459 have prerequisites that must be satisfied in order to enroll, or a waiver must be granted by the FBE departmental administration.

List B - lower division

- AME 201 Statics Units: 3
- AME 204 Strength of Materials Units: 3
- ASTE 101L Introduction to Astronautics Units: 4
- ASTE 280 Foundations of Astronautical Engineering Units: 3
- BME 210 Biomedical Computer Simulation Methods Units: 4
- CE 215 Statics and Dynamics Units: 4
- CE 225 Mechanics of Deformable Bodies Units: 4
- CHE 120 Introduction to Chemical Engineering Units: 4
- CHE 205 Numerical Methods in Chemical Engineering Units: 3
- CSCI 170 Discrete Methods in Computer Science Units: 4
- CSCI 270 Introduction to Algorithms and Theory of Computing Units: 4
- EE 202L Linear Circuits Units: 4
- ISE 220 Probability Concepts in Engineering Units: 3
- ISE 225 Engineering Statistics I Units: 3
- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4
- PHYS 153L Fundamentals of Physics III: Optics and Modern Physics Units: 4

Applied and Computational Mathematics (BS)

Pre-major Requirements:

- MATH 125g Calculus I Units: 4
- MATH 126g Calculus II Units: 4 or
- MATH 127 Enhanced Calculus II Units: 4 or
- MATH 129 Calculus II for Engineers and Scientists Units: 4
- MATH 225 Linear Algebra and Linear Differential Equations Units: 4 or
- MATH 245 Mathematics of Physics and Engineering I Units: 4
- MATH 226g Calculus III Units: 4 or
- MATH 227 Enhanced Calculus III Units: 4 or
- MATH 229 Calculus III for Engineers and Scientists Units: 4

In Mathematics:

- MATH 407 Probability Theory Units: 4
- MATH 408 Mathematical Statistics Units: 4
- MATH 425a Fundamental Concepts of Analysis Units: 4
- MATH 458 Numerical Methods Units: 4

At least three courses from

- MATH 370 Applied Algebra Units: 4
- MATH 410 Fundamental Concepts of Modern Algebra Units: 4
- MATH 425b Fundamental Concepts of Analysis Units: 4
- MATH 430 Theory of Numbers Units: 4
- MATH 432 Applied Combinatorics Units: 4
- MATH 435 Vector Analysis and Introduction to Differential Geometry Units: 4
- MATH 445 Mathematics of Physics and Engineering II Units: 4
- MATH 447 Mathematics of Machine Learning Units: 4
- MATH 465 Nonlinear Dynamics in Science and Engineering Units: 4
- MATH 466 Dynamic Modeling Units: 4
- MATH 467 Theory and Computational Methods for Optimization Units: 4
- MATH 471 Topics in Linear Algebra Units: 4
- MATH 475 Introduction to Theory of Complex Variables Units: 4

Students contemplating a graduate degree in mathematics are advised to take

- MATH 410 Fundamental Concepts of Modern Algebra Units: 4
- MATH 425b Fundamental Concepts of Analysis Units: 4
- MATH 471 Topics in Linear Algebra Units: 4

In Computing:

At least one programming course such as

- CSCI 102L Fundamentals of Computation Units: 2
- CSCI 103L Introduction to Programming Units: 4
- ITP 109 Introduction to Java Programming Units: 2
- ITP 115 Programming in Python Units: 2
- ITP 165 Introduction to C++ Programming Units: 2
- ITP 168 Introduction to MATLAB Units: 2

  or other programming course approved by the program advisers.

Four electives with significant quantitative content:

At least four additional courses with significant quantitative content in mathematics, natural sciences, computer science, engineering, economics or other fields approved by the department. At least three of the four must be outside the mathematics department; and at least one must be upper-division. Courses to be chosen from the following lists:

List A - upper division

- AME 404 Computational Solutions to Engineering Problems Units: 3
- ASTE 331a Spacecraft Systems Engineering Units: 3
- ASTE 331b Spacecraft Systems Engineering Units: 3
- ASTR 400 The Solar System Units: 4, 2 years
- ASTR 422 Galaxies and Large-Scale Structures in the Universe Units: 4, 2 years
- ASTR 424 Cosmology Units: 4
- BISC 305g Statistics for Biological Sciences Units: 4
- BISC 478 Computational Genome Analysis Units: 4
- BUAD 310g Applied Business Statistics Units: 4

- BUAD 312g Statistics and Data Science for Business Units: 4
- CHE 330 Chemical Engineering Thermodynamics Units: 4
- CHEM 430 Physical Chemistry: Thermodynamics and Kinetics Units: 4
- CHEM 431 Physical Chemistry: Quantum Mechanics Units: 4
- CHEM 432 Physical Chemistry for the Life Sciences Units: 4
- CSCI 360 Introduction to Artificial Intelligence Units: 4
- CSCI 467 Introduction to Machine Learning Units: 4
- DSO 424 Business Forecasting Units: 4
- DSO 428 Essentials and Digital Frontiers of Big Data Units: 4
- ECON 303 Intermediate Microeconomic Theory Units: 4
- ECON 305 Intermediate Macroeconomic Theory Units: 4
- ECON 317 Introduction to Statistics for Economists Units: 4
- ECON 318 Introduction to Econometrics Units: 4
- ECON 419 Advanced Econometrics Units: 4
- ECON 457 Financial Markets Units: 4
- EE 330 Electromagnetics I Units: 3
- FBE 441 Investments Units: 4 *
- FBE 459 Financial Derivatives Units: 4 *
- GEOL 425L Data Analysis in the Earth and Environmental Sciences Units: 4
- GEOL 440L Geophysics and Geoengineering Units: 4
- GEOL 450L Geosystems Units: 4
- ISE 330 Introduction to Operations Research: Deterministic Models Units: 3
- ISE 331 Introduction to Operations Research: Stochastic Models Units: 3
- PHYS 304 Mechanics Units: 4
- PHYS 316 Thermodynamics and Statistical Mechanics Units: 4
- PSYC 421L Data Analysis for Psychological Research Units: 4
- QBIO 401 Introduction to Computational Analysis of Biological Data Units: 4

Note:

*FBE 441 and FBE 459 have prerequisites that must be satisfied in order to enroll, or a waiver must be granted by the FBE departmental administration.

List B - lower division

- AME 201 Statics Units: 3
- AME 204 Strength of Materials Units: 3
- ASTE 101L Introduction to Astronautics Units: 4
- ASTE 280 Foundations of Astronautical Engineering Units: 3
- BME 210 Biomedical Computer Simulation Methods Units: 4
- CE 215 Statics and Dynamics Units: 4
- CE 225 Mechanics of Deformable Bodies Units: 4
- CHE 120 Introduction to Chemical Engineering Units: 4
- CHE 205 Numerical Methods in Chemical Engineering Units: 3
- CSCI 170 Discrete Methods in Computer Science Units: 4
- CSCI 270 Introduction to Algorithms and Theory of Computing Units: 4
- EE 202L Linear Circuits Units: 4
- ISE 220 Probability Concepts in Engineering Units: 3
- ISE 225 Engineering Statistics I Units: 3
- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4
- PHYS 153L Fundamentals of Physics III: Optics and Modern Physics Units: 4

Mathematics (BA)

Six math courses at the 400 level or above including:

- MATH 410 Fundamental Concepts of Modern Algebra Units: 4
- MATH 425a Fundamental Concepts of Analysis Units: 4
- MATH 434 Geometry and Transformations Units: 4 or
- MATH 435 Vector Analysis and Introduction to Differential Geometry Units: 4

Note:

Directed Research may be used to count as a 400-level or above course (must take 4 units to count as one course)

- MATH 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8

Mathematics (BS)

Pre-major Requirements:

- MATH 125g Calculus I Units: 4

- MATH 126g Calculus II Units: 4 or
- MATH 127 Enhanced Calculus II Units: 4 or
- MATH 129 Calculus II for Engineers and Scientists Units: 4
- MATH 225 Linear Algebra and Linear Differential Equations Units: 4

- MATH 226g Calculus III Units: 4 or
- MATH 227 Enhanced Calculus III Units: 4 or
- MATH 229 Calculus III for Engineers and Scientists Units: 4 are required

Eight math courses at the 400 level or above

Note: Course must be taken for 4-units. MATH 450 may not be counted toward this requirement.

Required Courses

- MATH 410 Fundamental Concepts of Modern Algebra Units: 4
- MATH 425a Fundamental Concepts of Analysis Units: 4
- MATH 425b Fundamental Concepts of Analysis Units: 4
- MATH 471 Topics in Linear Algebra Units: 4

Required Physics Course

- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4

Additional required courses

Four additional 4-unit courses in natural sciences, human biology or computer science, but excluding courses in mathematics, are required. At least one of these must be an upper-division course, and each of the four courses must be acceptable for the Bachelor of Science degree in the department in which it is offered.

Combined Major

Mathematics/Economics (BS)

Students are required to take seven courses in economics, seven courses in mathematics and two courses in information technology.

Pre-major Requirement:

- MATH 125g Calculus I Units: 4

In Economics:

- ECON 203g Principles of Microeconomics Units: 4
- ECON 205g Principles of Macroeconomics Units: 4
- ECON 303 Intermediate Microeconomic Theory Units: 4
- ECON 305 Intermediate Macroeconomic Theory Units: 4
- ECON 318 Introduction to Econometrics Units: 4
- and at least two other ECON courses at the 400-level or above

In Mathematics:

- MATH 126g Calculus II Units: 4 or
- MATH 127 Enhanced Calculus II Units: 4

- MATH 225 Linear Algebra and Linear Differential Equations Units: 4 or
- MATH 245 Mathematics of Physics and Engineering I Units: 4

- MATH 226g Calculus III Units: 4 or
- MATH 227 Enhanced Calculus III Units: 4

and either sequence one:

- MATH 407 Probability Theory Units: 4
- MATH 408 Mathematical Statistics Units: 4

or sequence two:

- MATH 307 Statistical Inference and Data Analysis I Units: 4
- MATH 308 Statistical Inference and Data Analysis II Units: 4

- at least two other MATH courses at the 400-level or above (for both sequences)

In Information Technology:

Two courses required.

At least one course chosen from

- ITP 109 Introduction to Java Programming Units: 2
- ITP 115 Programming in Python Units: 2
- ITP 165 Introduction to C++ Programming Units: 2

And

- ITP 249 Introduction to Data Analytics Units: 4

Note:

Electives must be approved by the program advisers.

Minor

Mathematical Data Analytics Minor

The "big data deluge" continues to change the fabric of research and discovery in both science and industry. The minor in Mathematical Data Analytics offered by the department of Mathematics trains students on the foundational underpinnings of this area, including practical implementation for handling of real data. Students completing this minor will absorb a true understanding of the conditions under which the current methods that are applied to data give valid results, and so will be able to more easily adapt their analyses to the proper methods, and avoid common errors being currently made in the area by which investigators falsely conclude the significance of their findings. This minor is complementary to the department's Statistics Minor, but requires more mathematical background in order to reach a greater depth.

As with all minors, students must include at least four upper-division courses and four courses dedicated exclusively to this minor (which may be the same four courses). Students who complete courses required for this minor for the satisfaction of degree requirements in their major program, such as students in MATH, may satisfy the minor requirement of four classes outside their major department by choosing courses from a list of electives maintained by MATH.

Requirements (24-25 units)

- ITP 115 Programming in Python Units: 2
- MATH 225 Linear Algebra and Linear Differential Equations Units: 4
- MATH 226g Calculus III Units: 4 or
- MATH 229 Calculus III for Engineers and Scientists Units: 4
- MATH 407 Probability Theory Units: 4
- MATH 408 Mathematical Statistics Units: 4
- MATH 447 Mathematics of Machine Learning Units: 4 or
- MATH 547 Mathematical Foundations of Statistical Learning Theory Units: 3
- MATH 650 Seminar in Statistical Consulting Units: 3

Mathematics Minor

Requirements

- MATH 125g Calculus I Units: 4

- MATH 126g Calculus II Units: 4 or
- MATH 127 Enhanced Calculus II Units: 4

- MATH 225 Linear Algebra and Linear Differential Equations Units: 4 or
- MATH 245 Mathematics of Physics and Engineering I Units: 4

- MATH 226g Calculus III Units: 4 or
- MATH 227 Enhanced Calculus III Units: 4

- and four math courses at the 400 level or above

One of which must be from

- MATH 410 Fundamental Concepts of Modern Algebra Units: 4
- MATH 425a Fundamental Concepts of Analysis Units: 4
- MATH 435 Vector Analysis and Introduction to Differential Geometry Units: 4

- MATH 440 Topology Units: 4 or
- MATH 471 Topics in Linear Algebra Units: 4

Note:

These four courses at the 400 level or above must total at least 16 units.

Statistics Minor

Kaprielian Hall 104
(213) 740-2400

This interdisciplinary minor should appeal to students from any discipline who are interested in acquiring a basic understanding of the mathematics underlying modern statistical analysis and inference techniques, in learning how to handle and analyze large data sets, and in gaining insight into the applications of modern statistics. Students who complete this minor should be able to critically interpret statistically based conclusions, should be viable candidates for entry level positions requiring some knowledge of modern statistics and data analysis, and should be prepared to enter a graduate-level program in applied statistics. The only prerequisite for this minor is one semester of elementary calculus.

As with all minors, students must include at least four upper-division courses and four courses dedicated exclusively to this minor (which may be the same four courses). Finally, students must select four courses outside their major department. These may be the same four courses used to meet the first two conditions. Note that Math BA and BS economics/mathematics students may complete this minor by taking MATH 407 and MATH 408 and at least 16 additional upper-division units approved by the Department of Mathematics, which are not in their major department and not being used to satisfy a requirement for their major. Note also that if calculus must be taken to satisfy the prerequisite for MATH 307, 20 units would be required to complete the minor.

Required Courses

- MATH 307 Statistical Inference and Data Analysis I Units: 4 (prerequisite: MATH 118 or MATH 125) and
- MATH 308 Statistical Inference and Data Analysis II Units: 4 or
- MATH 407 Probability Theory Units: 4 and
- MATH 408 Mathematical Statistics Units: 4

Electives

Select 8 units from the following:

- BISC 478 Computational Genome Analysis Units: 4
- BME 210 Biomedical Computer Simulation Methods Units: 4
- BME 423 Statistical Methods in Biomedical Engineering Units: 4
- BUAD 311 Operations Management Units: 4 *
- DSO 424 Business Forecasting Units: 4 *
- DSO 427 Designing Spreadsheet-Based Business Models Units: 4
- ECON 318 Introduction to Econometrics Units: 4

- ECON 419 Advanced Econometrics Units: 4
- HP 350L Health Behavior Research Methods Units: 4
- ISE 426 Statistical Quality Control Units: 3
- MATH 447 Mathematics of Machine Learning Units: 4
- MATH 650 Seminar in Statistical Consulting Units: 3
- PM 522a Introduction to the Theory of Statistics Units: 3
- PM 522b Introduction to the Theory of Statistics Units: 3
- PPD 504 Essential Statistics for Public Management Units: 2
- PSYC 421L Data Analysis for Psychological Research Units: 4

Note:

***Prerequisite required.**

Any upper-division or graduate level class not appearing in the above list that involves the theory or application of statistics may be approved by the Department of Mathematics as an elective.

Total Units: 16

Master's Degree

Applied Mathematics (MA)

Master of Arts in Mathematics and Master of Arts in Applied Mathematics

The objective of the Master of Arts program is to prepare students for research, teaching and other professional careers in mathematics and applied mathematics, respectively. In addition to the algebra requirement and differential geometry/topology option for the Master of Arts in Mathematics, the two programs differ in emphasis: the Master of Arts in Mathematics emphasizes the core courses in pure mathematics, and the Master of Arts in Applied Mathematics emphasizes courses in mathematics and affiliated fields that are fundamental in applied mathematics.

Relationship to PhD Programs in Mathematics and in Applied Mathematics

The two year MA program is an expansion of the first year of graduate studies in the PhD program in mathematics (respectively, the PhD program in applied mathematics). The program provides a rigorous foundation in mathematics (applied mathematics) while affording students additional time for preparatory training. The comprehensive examinations for the MA program can serve as the preliminary qualifying examination for either PhD program, and the written PhD qualifying examinations serve as comprehensive examinations for the corresponding Master of Arts degree.

Requirements for the Master of Arts in Mathematics

At least 24 units are required, including:

Required Courses

- MATH 510a Algebra Units: 3
- MATH 510b Algebra Units: 3
- MATH 520 Complex Analysis Units: 3
- MATH 525a Real Analysis Units: 3

And one option from A, B, C or D:

(A)

- MATH 535a Differential Geometry Units: 3
- MATH 540 Topology Units: 3

(B)

- MATH 555a Partial Differential Equations Units: 3
- MATH 565a Ordinary Differential Equations Units: 3

(C)

- MATH 507a Theory of Probability Units: 3
- MATH 541b Introduction to Mathematical Statistics Units: 3

(D)

- MATH 502a Numerical Analysis Units: 3
- MATH 502b Numerical Analysis Units: 3

Additional Requirements

The degree is completed with either departmental examinations (two written examinations selected from the two required components and the optional component) or a thesis demonstrating research ability in pure mathematics (the thesis option requires four additional thesis units selected from MATH 594a, MATH 594b, MATH 594z).

Requirements for the Master of Arts in Applied Mathematics

At least 24 units are required, including

- MATH 525a Real Analysis Units: 3

And at least three from these courses:

- MATH 502a Numerical Analysis Units: 3
- MATH 502b Numerical Analysis Units: 3

- MATH 505a Applied Probability Units: 3 or
- MATH 507a Theory of Probability Units: 3

- MATH 505b Applied Probability Units: 3 or
- MATH 506 Stochastic Processes, or
- MATH 507b Theory of Probability Units: 3

- MATH 541a Introduction to Mathematical Statistics Units: 3
- MATH 541b Introduction to Mathematical Statistics Units: 3
- MATH 555a Partial Differential Equations Units: 3
- MATH 565a Ordinary Differential Equations Units: 3

Additional Requirements

Other elective courses, including those from other departments, have to be approved by the program adviser.

The degree is completed with either departmental comprehensive examinations (two examinations, one covering the required component MATH 525a, and the second covering one of the elective MATH courses) or a thesis demonstrating research ability in applied mathematics (the thesis option requires four additional thesis units selected from MATH 594a, MATH 594b, MATH 594z).

Applied Mathematics (MS)

This program is intended for individuals who are seeking or currently hold positions which involve mathematical applications, or for mid-career people wishing to improve their skills in applied areas. Specific options in the program include: biomedicine, discrete mathematics, economics, finance and business economics, fluid dynamics, numerical analysis and computation, and systems and control. In addition, students may design their own option to suit specific needs.

On admission to the program, each student is assigned an option adviser. The adviser serves on the student's master's committee and assists the student in determining the courses of study in the selected option. Courses of instruction are drawn from the Department of Mathematics and other participating departments which include: aerospace engineering, biomedical engineering, civil engineering, computer science, economics, electrical engineering, business administration, mechanical engineering, physiology and biophysics, and preventive medicine.

Required Courses

- MATH 501 Numerical Analysis and Computation Units: 3
- MATH 505a Applied Probability Units: 3
- MATH 505b Applied Probability Units: 3
- MATH 570a Methods of Applied Mathematics Units: 3
- MATH 601 Optimization Theory and Techniques Units: 3
- plus at least 15 units of elected option courses

Additional Requirements

In addition, registration in MATH 594a, MATH 594b and a master's thesis is required for all students. This thesis is the end product of a practicum in the selected option. The practicum is supervised by the student's master's committee.

For this program students are not required to take the screening examination or to satisfy a foreign language requirement.

Mathematics (MA)

Master of Arts in Mathematics and Master of Arts in Applied Mathematics

The objective of the Master of Arts program is to prepare students for research, teaching and other professional careers in mathematics and applied mathematics, respectively. In addition to the algebra requirement and differential geometry/topology option for the Master of Arts in Mathematics, the two programs differ in emphasis: the Master of Arts in Mathematics emphasizes the core courses in pure mathematics, and the Master of Arts in Applied Mathematics emphasizes courses in mathematics and affiliated fields that are fundamental in applied mathematics.

Relationship to PhD Programs in Mathematics and in Applied Mathematics

The two year MA program is an expansion of the first year of graduate studies in the PhD program in mathematics (respectively, the PhD program in applied mathematics). The program provides a rigorous foundation in mathematics (applied mathematics) while affording students additional time for preparatory training. The comprehensive examinations for the MA program can serve as the preliminary qualifying examination for either PhD program, and the written PhD qualifying examinations serve as comprehensive examinations for the corresponding Master of Arts degree.

Requirements for the Master of Arts in Mathematics

At least 24 units are required, including:

Required Courses

- MATH 510a Algebra Units: 3
- MATH 510b Algebra Units: 3
- MATH 520 Complex Analysis Units: 3
- MATH 525a Real Analysis Units: 3

And one option from A, B, C or D:

(A)

- MATH 535a Differential Geometry Units: 3
- MATH 540 Topology Units: 3

(B)

- MATH 555a Partial Differential Equations Units: 3
- MATH 565a Ordinary Differential Equations Units: 3

(C)

- MATH 507a Theory of Probability Units: 3
- MATH 541b Introduction to Mathematical Statistics Units: 3

(D)

- MATH 502a Numerical Analysis Units: 3
- MATH 502b Numerical Analysis Units: 3

Additional Requirements

The degree is completed with either departmental examinations (two written examinations selected from the two required components and the optional component) or a thesis demonstrating research ability in pure mathematics (the thesis option requires four additional thesis units selected from MATH 594a, MATH 594b, MATH 594z).

Requirements for the Master of Arts in Applied Mathematics

At least 24 units are required, including

- MATH 525a Real Analysis Units: 3

And at least three from these courses:

- MATH 502a Numerical Analysis Units: 3
- MATH 502b Numerical Analysis Units: 3

- MATH 505a Applied Probability Units: 3 or
- MATH 507a Theory of Probability Units: 3

- MATH 505b Applied Probability Units: 3 or
- MATH 506 Stochastic Processes, or
- MATH 507b Theory of Probability Units: 3
- MATH 541a Introduction to Mathematical Statistics Units: 3
- MATH 541b Introduction to Mathematical Statistics Units: 3
- MATH 555a Partial Differential Equations Units: 3
- MATH 565a Ordinary Differential Equations Units: 3

Additional Requirements

Other elective courses, including those from other departments, have to be approved by the program adviser.

The degree is completed with either departmental comprehensive examinations (two examinations, one covering the required component MATH 525a, and the second covering one of the elective MATH courses) or a thesis demonstrating research ability in applied mathematics (the thesis option requires four additional thesis units selected from MATH 594a, MATH 594b, MATH 594z).

Statistics (MS)

The object of this program is to provide academic instruction in statistical theory with a solid mathematical foundation while emphasizing applications to real world problems. Some probability theory is included to provide a rigorous foundation. The program is intended for individuals who are seeking or currently hold positions that involve statistical methodology and practice. A student may orient his or her course of study toward a particular field of application through appropriate selections from the program listings plus elective courses from other disciplines.

Course Requirements

Thirty units of course work are required, including:

Required Courses

- MATH 541a Introduction to Mathematical Statistics Units: 3
- MATH 541b Introduction to Mathematical Statistics Units: 3
- MATH 550 Statistical Consulting and Data Analysis Units: 3

And one from each of options A, B, C:

(A)

- MATH 505a Applied Probability Units: 3
- MATH 507a Theory of Probability Units: 3

(B)

- MATH 542 Analysis of Variance and Design Units: 3
- MATH 545 Introduction to Time Series Units: 3

(C)

- MATH 501 Numerical Analysis and Computation Units: 3
- MATH 502a Numerical Analysis Units: 3
- PM 511aL Data Analysis Units: 4

Plus at least 12 units of courses from the following categories, or additional courses approved by the adviser:

Biological Science

- Course selected in consultation with an adviser Units: 4

Computer Science

- CSCI 544 Applied Natural Language Processing Units: 4
- CSCI 561 Foundations of Artificial Intelligence Units: 4
- CSCI 567 Machine Learning Units: 4
- CSCI 570 Analysis of Algorithms Units: 4
- CSCI 585 Database Systems Units: 4
- CSCI 670x Advanced Analysis of Algorithms Units: 4
- CSCI 677 Advanced Computer Vision Units: 4
- CSCI 686 Advanced Big Data Analytics Units: 4

Data Sciences and Operations

- DSO 528 Data Warehousing, Business Intelligence, and Data Mining Units: 1.5, 3
- DSO 530 Applied Modern Statistical Learning Methods Units: 3
- DSO 536 Monte Carlo Simulation and Decision Models Units: 1.5
- DSO 545 Statistical Computing and Data Visualization Units: 1.5, 3

Economics

- ECON 513 Practice of Econometrics Units: 4
- ECON 610 Quantitative Analysis in Macroeconomics Units: 4
- ECON 612 Econometric Theory Units: 4
- ECON 613 Economic and Financial Time Series I Units: 4
- ECON 614 Economic and Financial Time Series II Units: 4
- ECON 615 Applied Econometrics Units: 4

Electrical and Computer Engineering

- EE 510 Linear Algebra for Engineering Units: 4
- EE 512 Stochastic Processes Units: 3
- EE 550 Data Networks: Design and Analysis Units: 4
- EE 553 Computational Solution of Optimization Problems Units: 3
- EE 559 Machine Learning I: Supervised Methods Units: 4
- EE 562 Random Processes in Engineering Units: 4
- EE 563 Estimation Theory Units: 3
- EE 588 Optimization for the Information and Data Sciences Units: 4
- EE 592 Computational Methods for Inverse Problems Units: 4
- EE 649 Stochastic Network Optimization Units: 3
- EE 660 Machine Learning II: Mathematical Foundations and Methods Units: 4

Finance and Business Economics

- FBE 535 Applied Finance in Fixed Income Securities Units: 1.5, 3 *
- FBE 555 Investment Analysis and Portfolio Management Units: 3 *
- FBE 559 Management of Financial Risk Units: 3 *

Prerequisite Note:

*GSBA 548 is a prerequisite that may not be waived.

Industrial and Systems Engineering

- ISE 520 Optimization Theory and Algorithms: Numerical Optimization Units: 3
- ISE 525 Design of Experiments Units: 3
- ISE 530 Optimization Methods for Analytics Units: 3
- ISE 538 Performance Analysis Using Markov Models Units: 3
- ISE 539 Stochastic Elements of Simulation Units: 3
- ISE 626 Advanced Topics in Applied Stochastic Models

Data Science Program

- DSCI 510 Principles of Programming for Data Science Units: 4
- DSCI 552 Machine Learning for Data Science Units: 4
- DSCI 560 Data Science Professional Practicum Units: 4

Mathematics

- MATH 502b Numerical Analysis Units: 3
- MATH 508 Filtering Theory Units: 3
- MATH 509 Stochastic Differential Equations Units: 3
- MATH 512 Financial Informatics and Simulation (Computer Labs and Practitioner Seminar) Units: 3
- MATH 530a Stochastic Calculus and Mathematical Finance Units: 3
- MATH 530b Stochastic Calculus and Mathematical Finance Units: 3
- MATH 545 Introduction to Time Series Units: 3
- MATH 547 Mathematical Foundations of Statistical Learning Theory Units: 3
- MATH 578a Computational Molecular Biology Units: 3
- MATH 578b Computational Molecular Biology Units: 3
- MATH 605 Topics in Probability Units: 3
- MATH 606 Topics in Stochastic Processes Units: 3

Preventive Medicine

- PM 510L Principles of Biostatistics Units: 4
- PM 511aL Data Analysis Units: 4
- PM 511bL Data Analysis Units: 4
- PM 511cL Data Analysis Units: 4
- PM 513 Experimental Designs Units: 3
- PM 522a Introduction to the Theory of Statistics Units: 3
- PM 522b Introduction to the Theory of Statistics Units: 3
- PM 534 Statistical Genetics Units: 3
- PM 544L Multivariate Analysis Units: 3
- PM 570 Statistical Methods in Human Genetics Units: 4
- PM 571 Applied Logistic Regression Units: 3
- PM 603 Structural Equation Modeling Units: 4, 2 years

Psychology

- PSYC 501L Classic and Modern Statistical Methods I Units: 4
- PSYC 502 Classic and Modern Statistical Methods II Units: 4
- PSYC 503L Regression and the General Linear Model Units: 4
- PSYC 520 Fundamentals of Psychological Measurement Units: 4
- PSYC 575L Multilevel Modeling Units: 4
- PSYC 577 Analysis of Covariance Structures Units: 4
- PSYC 578 Workshop in Quantitative Methods Units: 4

Public Planning and Development

- PPD 557 Modeling and Operations Research Units: 4
- PPD 558 Multivariate Statistical Analysis Units: 4

Social Work

- SOWK 761L Multiple Regression for Social Work Research Units: 3

Sociology

- SOCI 521 Quantitative Methods and Statistics Units: 4

Note:

The following courses may not be used as electives for the degree: DSO 401, DSO 402, DSO 510, EE 503, FBE 529, FBE 540, FBE 543, MATH 505a and MATH 505b or MATH 507a and MATH 507b (other than the course used to satisfy Requirement A), MATH 525a and MATH 525b, MATH 532, MATH 574, PPD 502x, PPD 525 and PPD 570

Additional Requirements

Students may opt for a master's thesis (and registration in MATH 594a, MATH 594b) or a written examination covering material from MATH 505a or MATH 507a, and MATH 541a, MATH 541b. The examination will normally be given at the beginning of the fall and spring semester. Students must pass MATH 505a or MATH 507a, and MATH 541a, MATH 541b with a grade of B or higher. If a student receives a grade of B- or lower in any of these courses, the requirement can be waived upon passing the screening exam for the course at the master's level or higher.

Doctoral Degree

Applied Mathematics (PhD)

Application deadline: December 1

The program requires a maximum effort by the student for a minimum of four years of full-time work.

Screening Procedure

The screening examination consists of four examinations covering the subject content of: MATH 502a Numerical Analysis or MATH 555a Partial Differential Equations; MATH 505a Applied Probability (or, at the student's discretion, MATH 507a Theory of Probability); MATH 525a Real Analysis; and MATH 541a Introduction to Mathematical Statistics.

The department offers the examinations twice a year, at the end of summer and at the beginning of the spring semester. All four parts of the screening examination must be attempted by the end of the third semester (not counting summer sessions) in the program. The students may take each of the exams as many times as they wish, but three of the exams must be successfully completed by the end of the fourth semester (not counting summer sessions) and all four must be successfully completed by the end of the sixth semester in the program. The qualifying examination should follow two or three semesters after the successful completion of the screening procedure.

Qualifying Exam Committee

No later than at the end of the first semester after passing the screening procedure the student must form a qualifying

exam committee consisting of an adviser and four other faculty members, including at least one from another department.

Qualifying Examination

The written portion of the qualifying examination consists of a PhD dissertation proposal. This document (10 pages minimum) should include: introduction, statement of the problem, literature survey, methodology, summary of preliminary results, proposed research, references, appendix (including one or two fundamental references). This should be submitted to the department at least 1 week before the qualifying examination.

The oral portion of the qualifying examination consists of a presentation of the PhD dissertation proposal. The student must demonstrate research potential.

Course Requirements

The student must complete, with no grade lower than B, a minimum of 60 units of courses carrying graduate credit and approved by the qualifying exam committee.

These must include

- MATH 794a Doctoral Dissertation Units: 2
- MATH 794b Doctoral Dissertation Units: 2

And six courses from the following:

- MATH 502b Numerical Analysis Units: 3
- MATH 504a Numerical Solution of Ordinary and Partial Differential Equations Units: 3
- MATH 504b Numerical Solution of Ordinary and Partial Differential Equations Units: 3
- MATH 505b Applied Probability Units: 3
- MATH 507b Theory of Probability Units: 3
- MATH 509 Stochastic Differential Equations Units: 3
- MATH 520 Complex Analysis Units: 3
- MATH 525b Real Analysis Units: 3
- MATH 530b Stochastic Calculus and Mathematical Finance Units: 3
- MATH 532 Combinatorial Analysis Units: 3
- MATH 541b Introduction to Mathematical Statistics Units: 3
- MATH 542 Analysis of Variance and Design Units: 3
- MATH 545 Introduction to Time Series Units: 3
- MATH 555a Partial Differential Equations Units: 3
- MATH 565a Ordinary Differential Equations Units: 3
- MATH 574 Applied Matrix Analysis Units: 3
- MATH 576 Applied Complex Analysis and Integral Transforms Units: 3
- MATH 580 Introduction to Functional Analysis Units: 3
- MATH 585 Mathematical Theory of Optimal Control Units: 3

Additional Requirements

Transfer of Credit

No transfer of credit will be considered until the screening examination is passed. A maximum of 30 units of graduate work at another institution may be applied toward the course requirements for the PhD. A grade of B (A = 4.0) or lower will not be accepted and, at most, two grades of B will be accepted. A PhD candidate may petition the department for transfer of additional credit, after he or she passes the qualifying examination.

Foreign Language Requirement

The student must demonstrate a reading comprehension of mathematics in one language (other than English) in which there is a significant body of research mathematics (such as Chinese, French, German, Japanese and Russian) by passing a written examination, administered by the Mathematics Department, in translation of mathematical content.

Dissertation

Following passage of the screening examination and approval of a dissertation topic by the qualifying exam committee, the student begins research toward the dissertation under the supervision of the dissertation committee. The primary requirement of the PhD is an acceptable dissertation based on a substantial amount of original research conducted by the student.

Research Areas

Opportunities for research are available from the faculty in several areas of applied mathematics with an emphasis on: computational biology, control theory, financial mathematics, mathematical neurosciences, numerical analysis, optimization, scientific computing, statistical genetics, statistics and stochastic differential equations.

Mathematics (PhD)

Application deadline: December 1

The program requires the maximum endeavor by the student for normally a minimum of four years of full-time work.

The student must choose between two concentrations: Pure Mathematics or Pure and Applied Mathematics.

Screening Procedure

Appointment of a qualifying exam committee and retention in the doctoral program are contingent on passing the preliminary qualifying examination by the end of the second semester. If a student fails the examination, the department, at its discretion, may permit the student to take it again during the third semester of graduate studies.

The preliminary qualifying exam is a written examination administered by the department. The student must choose between two options: analysis or algebra. Each option approximately covers the content of two one-semester graduate courses, with the precise list of possible topics made available to the student by the department.

Course Requirements

The student must complete with no grade lower than B a minimum of 60 units of courses carrying graduate credit and approved by the qualifying exam committee.

Pure Mathematics Concentration

Required Courses

- MATH 510a Algebra Units: 3
- MATH 525a Real Analysis Units: 3
- MATH 535a Differential Geometry Units: 3
- MATH 794a Doctoral Dissertation Units: 2
- MATH 794b Doctoral Dissertation Units: 2

Five courses selected from the following:

- MATH 507a Theory of Probability Units: 3
- MATH 510b Algebra Units: 3
- MATH 520 Complex Analysis Units: 3
- MATH 525b Real Analysis Units: 3
- MATH 532 Combinatorial Analysis Units: 3
- MATH 540 Topology Units: 3
- MATH 555a Partial Differential Equations Units: 3
- MATH 565a Ordinary Differential Equations Units: 3

Pure and Applied Mathematics Concentration

Required Courses

- MATH 502a Numerical Analysis Units: 3
- MATH 510a Algebra Units: 3
- MATH 525a Real Analysis Units: 3
- MATH 794a Doctoral Dissertation Units: 2
- MATH 794b Doctoral Dissertation Units: 2

Five courses selected from the following:

- MATH 502b Numerical Analysis Units: 3
- MATH 507a Theory of Probability Units: 3
- MATH 520 Complex Analysis Units: 3
- MATH 525b Real Analysis Units: 3
- MATH 532 Combinatorial Analysis Units: 3
- MATH 541a Introduction to Mathematical Statistics Units: 3
- MATH 555a Partial Differential Equations Units: 3
- MATH 565a Ordinary Differential Equations Units: 3

Additional Requirements

Transfer of Credit

No transfer of credit will be considered until the screening examination is passed. Normally a maximum of 30 units of graduate work at another institution may be applied toward the course requirements for the PhD A grade of B- or lower will not be accepted, and, at most, two grades of B will be accepted. A PhD candidate may petition the department for transfer of additional credit after passing the qualifying examination.

Foreign Language Requirement

The student must demonstrate a reading comprehension of mathematics in one language (other than English) in which there is a significant body of research mathematics (such as Chinese, French, German, Japanese and Russian) by passing a written examination, administered by the department, in translation of mathematical content.

Qualifying Examination

The written portion of the qualifying examination is comprehensive, consisting of two, two-hour examinations administered by the department. These examinations cover two out of the following five options, excluding the option already selected for the preliminary examination: algebra, analysis, geometry/topology, probability/statistics, differential equations. Each option approximately covers the content of two, one-semester graduate courses, with the precise list of possible topics made available to the students by the department. The selection of options must be approved by the qualifying exam committee.

The oral portion of the qualifying examination covers one topic selected from department research areas in mathematics and approved by the qualifying exam committee. The student must demonstrate research potential in this field. A dissertation proposal (10 pages minimum) must be submitted to the department at least 1 week before the oral qualifying examination.

Dissertation

Following passage of the qualifying examination and approval of a dissertation topic by the qualifying exam committee, the student begins research toward the dissertation under the supervision of the dissertation committee. The primary requirement for the PhD is an acceptable dissertation which is based on a substantial amount of original research conducted by the student.

Research Areas

Opportunities for research are offered in the areas of algebraic geometry, arithmetic geometry, combinatorics, complex geometry, control theory, differential equations, differential geometry, dynamical systems, functional analysis, geometric analysis, group theory, K-theory, nonlinear analysis, number theory, numerical analysis, optimization, probability, representation theory, ring theory and topology.

Middle East Studies

The Department of Middle East Studies (MDES) is committed to the teaching and study of the languages, cultures, peoples and societies throughout the Middle East with an emphasis on the impact of the pressing problems of globalization and the environment. MDES is home to an interdisciplinary major and minor in Middle East Studies, an Iranian Studies Minor, and an Arabic Minor.

**Recipient of university-wide or college teaching award.*

Bachelor's Degree

Middle East Studies (BA)

This major is an interdisciplinary degree with an emphasis on the pressing problems of globalization and the environment of the peoples, cultures, and societies of the Middle East. Its courses offer students interested in exploring the richness and complexity of the Middle East, broadly defined as extending from Morocco through Iran, a framework for developing both expertise and wide-ranging critical perspectives on the region's past, present and future. The variety of courses allows students to build on their firm grounding in at least one of the region's languages and pursue their research interests in their capstone projects.

Learning Objectives for the Middle East Studies Major:

1. Offer foundational knowledge of the geography, cultures and history of the Middle East and North Africa.
2. Offer rigorous training in a range of social science and humanities approaches from history, economics, political science, geography, and international relations to literary and cultural criticism.
3. Develop critical thinking skills that enable the student to place recent and current regional events in context.
4. Enhance students' ability to question non-scholarly accounts of the region's past and present.
5. Deliver firm grounding in at least one of the region's languages: fourth semester proficiency in Arabic, Hebrew or Persian.
6. Train students to conduct informed research on the Middle East.

Nine total courses are required for the major. No more than two courses may be counted toward this major and another major. Students participating in USC Overseas Studies programs should contact the department to discuss course selection for the major. Students must meet with a faculty mentor from the department upon declaring a major in Middle East Studies.

I. Language

All MDES majors must demonstrate fourth semester competency in a Middle Eastern language. This can be achieved through placement, transfer credits from other institutions (subject to approval by the MDES Curriculum Committee), from study abroad, or through successfully completing the level IV Arabic (ARAB 252), Hebrew (HEBR 315) or Persian (IRAN 250) courses at USC. Students who place out of the requirement to take ARAB 252, HEBR 315, or IRAN 250 must take an additional elective course.

- ARAB 252 Arabic IV Units: 4
- HEBR 315 Modern Hebrew Language (Hebrew IV) Units: 4
- IRAN 250 Persian IV Units: 4

II. Required Course - Lower Division

All students must take one of the following two courses.

- HIST 180gw The Middle East Units: 4
- MDES 201w The Middle East: Global and Environmental Perspectives Units: 4

III. Required Courses - Upper Division

All students must take the following two courses.

- MDES 301g The Global Middle East Units: 4
- MDES 475 Seminar in Middle East Studies Units: 4

IV. Concentration I

Students must take at least two courses from this list, one of which must be an MDES course.

- ARAB 300 Introduction to Translation Units: 4
- ARAB 322 Advanced Arabic I Units: 4
- ARAB 333 Colloquial Arabic: Regional Dialects Units: 4
- ARAB 334 Media Arabic Units: 4
- ARAB 352 Advanced Arabic II Units: 4
- CLAS 349gp Ancient Empires Units: 4
- CLAS 371 From Alexander to Cleopatra: The Mediterranean in an Age of Expansion Units: 4
- CLAS 378 Ptolemaic Egypt Units: 4
- COLT 437 Arabic Autobiography: Writing and Interpreting the Self Units: 4
- COLT 447 Traveling Genres: Politics/Poetics of Modern Arabic Prose Units: 4
- HIST 382 The Middle East, 500–1500 Units: 4
- HIST 383 The Modern Middle East Units: 4
- HIST 384 Popular Culture in the Middle East Units: 4
- HIST 480 Seminar in Middle East History Units: 4
- IRAN 320 Advanced Persian I Units: 4
- IRAN 325 Business Persian Units: 4
- IRAN 350 Advanced Persian II Units: 4
- JS 389 Culture and Society in Israel: Inventing the Dream Units: 4
- MDES 312 Medieval Iran: Society and Culture Units: 4
- MDES 313 Modern Iran Units: 4
- MDES 316p The Great Muslim Empires of the Near East and India Units: 4
- MDES 324 Classical Persian Literature in Translation Units: 4
- MDES 325g Politics of Film and Literature in Modern Iran Units: 4
- MDES 335 Nation and State in Modern Turkey Units: 4
- MDES 343g Modern Arab Culture and Literature Units: 4
- REL 394 Archaeology of Egypt and the Near East Units: 4
- REL 402 Cultural Heritage, Religion, and Politics in the Middle East Units: 4

V. Concentration II

Students must take at least two courses from this list, one of which must be an MDES course.

- ECON 342 Economic Development of the Middle East Units: 4
- IR 362 The International Relations of the Contemporary Middle East Units: 4
- IR 363 Middle East Political Economy Units: 4
- IR 464 US-Middle East Foreign Policy Issues Units: 4
- MDES 314p Political Thought in the Middle East Units: 4
- MDES 340 The United States and the Middle East Units: 4
- MDES 342g Arab Intellectuals in Question Units: 4
- MDES 345p Power and Authority in the Middle East Units: 4
- MDES 375 Politics and Society in the Contemporary Middle East Units: 4
- MDES 401 Environment and Politics in the Middle East Units: 4
- MDES 403 Technology, Development and Power in the Middle East Units: 4
- MDES 441w Cities of the Middle East Units: 4
- POSC 351 Middle East Politics Units: 4

VI. Elective Courses

Students must also take one upper-division course, chosen from the list below. Students who place out of the requirement to take ARAB 252, HEBR 315 or IRAN 250 must take two elective courses.

- ARAB 300 Introduction to Translation Units: 4
- ARAB 322 Advanced Arabic I Units: 4
- ARAB 333 Colloquial Arabic: Regional Dialects Units: 4
- ARAB 334 Media Arabic Units: 4
- ARAB 352 Advanced Arabic II Units: 4
- CLAS 349gp Ancient Empires Units: 4
- CLAS 371 From Alexander to Cleopatra: The Mediterranean in an Age of Expansion Units: 4
- CLAS 378 Ptolemaic Egypt Units: 4
- COLT 437 Arabic Autobiography: Writing and Interpreting the Self Units: 4
- COLT 447 Traveling Genres: Politics/Poetics of Modern Arabic Prose Units: 4
- ECON 342 Economic Development of the Middle East Units: 4
- FREN 448m France and Islam Units: 4
- HIST 382 The Middle East, 500–1500 Units: 4
- HIST 383 The Modern Middle East Units: 4
- HIST 384 Popular Culture in the Middle East Units: 4
- HIST 480 Seminar in Middle East History Units: 4
- IR 362 The International Relations of the Contemporary Middle East Units: 4
- IR 363 Middle East Political Economy Units: 4
- IR 464 US-Middle East Foreign Policy Issues Units: 4
- IRAN 320 Advanced Persian I Units: 4
- IRAN 325 Business Persian Units: 4
- IRAN 350 Advanced Persian II Units: 4
- JS 314gp Holy War And History: Jews, Christians, Muslims Units: 4
- JS 389 Culture and Society in Israel: Inventing the Dream Units: 4
- MDES 312 Medieval Iran: Society and Culture Units: 4
- MDES 313 Modern Iran Units: 4
- MDES 314p Political Thought in the Middle East Units: 4
- MDES 316p The Great Muslim Empires of the Near East and India Units: 4
- MDES 324 Classical Persian Literature in Translation Units: 4
- MDES 325g Politics of Film and Literature in Modern Iran Units: 4
- MDES 335 Nation and State in Modern Turkey Units: 4
- MDES 340 The United States and the Middle East Units: 4
- MDES 342g Arab Intellectuals in Question Units: 4
- MDES 343g Modern Arab Culture and Literature Units: 4
- MDES 345p Power and Authority in the Middle East Units: 4
- MDES 375 Politics and Society in the Contemporary Middle East Units: 4
- MDES 401 Environment and Politics in the Middle East Units: 4
- MDES 403 Technology, Development and Power in the Middle East Units: 4
- MDES 441w Cities of the Middle East Units: 4
- MDES 475 Seminar in Middle East Studies Units: 4
- POSC 351 Middle East Politics Units: 4
- REL 315 Thought and Life of Islam Units: 4
- REL 316 Women and the Islamic Tradition Units: 4
- REL 394 Archaeology of Egypt and the Near East Units: 4
- REL 402 Cultural Heritage, Religion, and Politics in the Middle East Units: 4
- REL 414 History of Islamic Law Units: 4

Note:

Concentration I and II courses may not be double counted as elective courses. MDES 490x and MDES 492 may only be taken by departmental approval.

Honors Program

Candidates for the BA in Middle East Studies may receive a designation on their transcripts of departmental honors. Admission to the honors program is required.

Prerequisites: 3.33 overall GPA; 3.5 GPA or better in courses in the major; a minimum grade of B+ in HIST 180 or MDES 201; completion of at least one upper-level MDES course (400 level) requiring a seminar paper, at the time of admission; and submission of an application form to the MDES undergraduate

faculty adviser. Prior approval of the thesis adviser and/or department chair is required for any modification of these requirements.

Required for departmental honors: The student must maintain the GPA requirements stated above and successfully complete MDES 475 or the MDES 492 Honors Thesis. In semesters when MDES 475 and MDES 492 are not offered, students may, with department approval, substitute MDES 490 (independent study) as constituting an honors seminar equivalent.

Minor

Arabic Minor

The Arabic minor provides students with advanced competency in speaking, reading, writing and understanding the Arabic language. Advanced ability in Arabic can open many doors. Course work for this minor prepares students for various careers and graduate-level study.

Five courses (20 units) are required for the minor. All students must take ARAB 252, ARAB 322 and ARAB 352. For those students who do not already have ARAB 252 equivalent proficiency, ARAB 122, ARAB 152 and ARAB 222 or their equivalent (which do not count toward the minor) must be completed before enrolling in ARAB 252. For those with prior study of Arabic, a placement exam is offered by the USC Language Center to determine language level. If student proficiency surpasses the third-semester college level, the USC Language Center should be consulted about a higher-level proficiency exam. The remaining two courses (8 units) must be selected from the list of elective courses below.

Students are encouraged to study abroad. Prior approval by the department is required of all courses that are to be counted toward the minor. Equivalent courses from other universities will be assessed by the MDES Curriculum Committee.

Required Courses

- ARAB 252 Arabic IV Units: 4
- ARAB 322 Advanced Arabic I Units: 4
- ARAB 352 Advanced Arabic II Units: 4

Upper-Division Arabic Elective Courses

Two courses (8 units) from the following list must also be selected (or substitutes that are pre-approved by the MDES Curriculum Committee). The prerequisite for ARAB 300 is either ARAB 252 or ARAB 334.

- ARAB 300 Introduction to Translation Units: 4
- ARAB 333 Colloquial Arabic: Regional Dialects Units: 4
- ARAB 334 Media Arabic Units: 4

Iranian Studies Minor

The Iranian Studies minor provides students with the foundation for an advanced understanding of Iran, its history, peoples and cultures, from antiquity to the present. Neighboring countries that participated in Persian culture are included, as well as non-Persian Iranian peoples. Students finishing this minor will also have at least an intermediate ability in Persian, the official language of Iran, widely used in neighboring countries as well.

Five courses (20 units) are required for the minor. All students must take HIST 180gw or MDES 201w and IRAN 250. For those students who do not already have IRAN 250-equivalent proficiency, IRAN 120, IRAN 150 and IRAN 220 or their equivalent (which do not count toward the minor) must be completed before enrolling in IRAN 250. For those with prior study of Persian, a placement exam is offered by the USC Language Center to determine language level. If student proficiency surpasses the third-semester college level, the USC Language Center should be consulted about a higher level proficiency exam.

At least one course (4 units) of the three additional courses (12 units) must be selected from the upper-division Iranian Studies Initiative courses. The other two (8 units) may be chosen from the upper-division Iranian Studies Initiative courses or the upper-division Middle East Studies courses listed below.

A special accommodation is in place for majors in the School of International Relations who minor in Iranian Studies. Courses that are cross-listed between MDES and IR can satisfy the four unique courses (at least 16 units) that must be completed outside of their major department for this interdisciplinary minor. Students will still be required, however, to complete at least four courses (16 units) that are unique to the minor (not required to meet major course requirements).

Required Lower-Division Course

Select one course:

- HIST 180gw The Middle East Units: 4
  or
- MDES 201w The Middle East: Global and Environmental Perspectives Units: 4

Required Language Course

- IRAN 250 Persian IV Units: 4

Upper-Division Iranian Studies Initiative Courses

- IRAN 320 Advanced Persian I Units: 4
- IRAN 325 Business Persian Units: 4
- IRAN 350 Advanced Persian II Units: 4
- MDES 312 Medieval Iran: Society and Culture Units: 4
- MDES 313 Modern Iran Units: 4
- MDES 314p Political Thought in the Middle East Units: 4
- MDES 316p The Great Muslim Empires of the Near East and India Units: 4
- MDES 324 Classical Persian Literature in Translation Units: 4
- MDES 325g Politics of Film and Literature in Modern Iran Units: 4

Upper-Division Middle East Studies Courses

- CLAS 349gp Ancient Empires Units: 4
- HIST 382 The Middle East, 500–1500 Units: 4
- HIST 383 The Modern Middle East Units: 4
- HIST 384 Popular Culture in the Middle East Units: 4
- IR 362 The International Relations of the Contemporary Middle East Units: 4
- MDES 301g The Global Middle East Units: 4
- MDES 340 The United States and the Middle East Units: 4
- MDES 345p Power and Authority in the Middle East Units: 4
- MDES 401 Environment and Politics in the Middle East Units: 4
- MDES 403 Technology, Development and Power in the Middle East Units: 4
- MDES 441w Cities of the Middle East Units: 4
- POSC 351 Middle East Politics Units: 4

Middle East Studies Minor

This interdisciplinary minor offers students interested in exploring the richness and complexity of the Middle East, broadly defined as extending from Morocco through Iran, a framework for developing a basic but solid understanding of the region. Students may select courses that provide a broad introduction across disciplines, or they may choose courses that address a particular historical period or theme.

Twenty units (five courses) are required. All students must take MDES 201w or HIST 180 and MDES 301g. To complete the minor a student must also take three upper-division courses from the list below. Students who are also studying a language may substitute ARAB 252, HEBR 315 or IRAN 250 for one of the three upper-division courses. However there is no language requirement for the minor.

A special accommodation is in place for majors in the School of International Relations who minor in Middle East Studies. Courses that are cross-listed between MDES and IR can satisfy the four unique courses (at least 16 units) that must be completed outside of their major department for this interdisciplinary minor. Students will still be required, however, to complete at least four courses

(16 units) that are unique to the minor (not required to meet major course requirements).

Required Course - Lower Division

All students must take one of the following two courses.

- HIST 180gw The Middle East Units: 4
- MDES 201w The Middle East: Global and Environmental Perspectives Units: 4

Required Course - Upper Division

- MDES 301g The Global Middle East Units: 4

Elective Courses

Three courses from the list below, only two of which may be language courses.

- ARAB 252 Arabic IV Units: 4
- ARAB 300 Introduction to Translation Units: 4
- ARAB 322 Advanced Arabic I Units: 4
- ARAB 333 Colloquial Arabic: Regional Dialects Units: 4
- ARAB 334 Media Arabic Units: 4
- ARAB 352 Advanced Arabic II Units: 4
- CLAS 349gp Ancient Empires Units: 4
- CLAS 371 From Alexander to Cleopatra: The Mediterranean in an Age of Expansion Units: 4
- CLAS 378 Ptolemaic Egypt Units: 4
- COLT 437 Arabic Autobiography: Writing and Interpreting the Self Units: 4
- COLT 447 Traveling Genres: Politics/Poetics of Modern Arabic Prose Units: 4
- ECON 342 Economic Development of the Middle East Units: 4
- HEBR 315 Modern Hebrew Language (Hebrew IV) Units: 4
- HIST 382 The Middle East, 500–1500 Units: 4
- HIST 383 The Modern Middle East Units: 4
- HIST 384 Popular Culture in the Middle East Units: 4
- HIST 480 Seminar in Middle East History Units: 4
- IR 362 The International Relations of the Contemporary Middle East Units: 4
- IR 363 Middle East Political Economy Units: 4
- IR 464 US-Middle East Foreign Policy Issues Units: 4
- IRAN 250 Persian IV Units: 4
- IRAN 320 Advanced Persian I Units: 4
- IRAN 325 Business Persian Units: 4
- IRAN 350 Advanced Persian II Units: 4
- JS 389 Culture and Society in Israel: Inventing the Dream Units: 4
- MDES 312 Medieval Iran: Society and Culture Units: 4
- MDES 313 Modern Iran Units: 4
- MDES 314p Political Thought in the Middle East Units: 4
- MDES 316p The Great Muslim Empires of the Near East and India Units: 4
- MDES 324 Classical Persian Literature in Translation Units: 4
- MDES 325g Politics of Film and Literature in Modern Iran Units: 4
- MDES 335 Nation and State in Modern Turkey Units: 4
- MDES 340 The United States and the Middle East Units: 4
- MDES 342g Arab Intellectuals in Question Units: 4
- MDES 343g Modern Arab Culture and Literature Units: 4
- MDES 345p Power and Authority in the Middle East Units: 4
- MDES 375 Politics and Society in the Contemporary Middle East Units: 4
- MDES 401 Environment and Politics in the Middle East Units: 4
- MDES 403 Technology, Development and Power in the Middle East Units: 4
- MDES 441w Cities of the Middle East Units: 4
- MDES 475 Seminar in Middle East Studies Units: 4
- POSC 351 Middle East Politics Units: 4
- REL 394 Archaeology of Egypt and the Near East Units: 4
- REL 402 Cultural Heritage, Religion, and Politics in the Middle East Units: 4

Multidisciplinary Activities

Undergraduate Programs, USC Dornsife College
(213) 740-2961
Email: fliegel@usc.edu
Contact: Richard Fliegel, PhD

Multidisciplinary Activities (MDA) courses are developed and taught by faculty from more than one program, department and/or school. These courses exist because of the college's interest in supporting interdisciplinary teaching and research. A student's transcript indicates enrollment in a multidisciplinary activities course.

Students who enroll in MDA courses share a common interest in the subject matter, but are not necessarily majors in those disciplines. These courses can be used as electives for certain degree requirements and, when indicated by the "g" suffix, for general education credit. They include:

The Dornsife Toolkit (MDA 300)

These two-unit classes focus on intellectual skills that help prepare students for success on the job market, in graduate and professional schools. They include classes on activism and advocacy, grant-writing, start-ups, pitching projects, visualizing data, everyday eloquence, personal economics and managing the work/life balance. Scheduled once a week on a CREDIT/NO CREDIT basis, Dornsife Toolkit classes are usually limited to 25 students each.

Internship for the Liberal Arts (MDA 250)

This class in service learning enables students to earn college credit while participating in an eligible internship experience. Course work is required, as well as a concurrent internship that meets the guidelines for the program. Students can earn up to 4 units in 1- or 2-unit sections.

Case Studies in Modern Leadership (MDA 325)

This class, part of the interdisciplinary minor in Critical Approaches to Leadership, has recently been co-taught by former Prime Minister of the United Kingdom, the Right Honorable Gordon Brown.

Collaborative Learning Projects (CLP) and Individual Programs of Study (IPOS)

See Learner Centered Curricula.

Neuroscience (Undergraduate)

Hedco Neurosciences Building 120
(213) 740-6091
FAX: (213) 740-2534
Email: msalido@usc.edu
Program Director: David McKemy, PhD
Participating Faculty: *See Biological Sciences, Computer Science, Biomedical Engineering, Philosophy, Psychology, Engineering, Gerontology, Medicine and Pharmacy in this catalogue.*

Undergraduate Program

Students in the neuroscience majors are trained to develop an appreciation for the breadth of knowledge that spans the array of neuroscience disciplines, including molecular, cellular, systems, behavioral, cognitive and computational neuroscience. Students will also acquire knowledge in the humanities, social sciences, mathematics, and physical sciences, and learn to appreciate the relevance of these disciplines to the life sciences.

The curriculum is structured to develop the ability to communicate scientific ideas, orally and in writing, as well as scientific and experimental skills. These skills include the application of scientific methods, including forming hypotheses, designing experiments to test hypotheses, and collecting, analyzing, interpreting and reporting data.

At the completion of their studies, students are prepared with a sufficient depth of knowledge and abilities to prepare them for entry-level employment in a wide variety of fields, or for graduate study in neuroscience or health-related professions.

Honors Program in Neuroscience

An honors program is available to outstanding students who are pursuing a BA or BS degree in Neuroscience. This program offers students exceptional opportunities to participate in undergraduate research, culminating in the experience of writing an honors thesis summarizing their completed research. Honors students must register for 4 units of Directed Research (NEUR 490x). Honors students are also required to take two semesters of the Honors Seminar (BISC 493x as one of their upper-division electives, 1 unit/semester), in which small groups of students discuss recent findings in neuroscience literature and their own research. After completing the honors seminar, honors students also take one semester of Honors Thesis (BISC 494x, 2 units), in which students write their senior thesis. Students earning honors in neuroscience must have a minimum overall GPA of 3.5 at graduation. This program leads to the designation on the transcript of Bachelor of Arts/Science in Neuroscience with Honors.

Minor in Neuroscience

The neuroscience minor is designed to acquaint students with a broad range of the problems and opportunities available in the study of the brain and the mind. The core courses will provide knowledge of the biological aspects of brain function, including perception, cognition and statistics. Research in appropriate laboratories is encouraged and include, but are not limited to, Biological Sciences, Psychology and Gerontology. Directed research may be used to satisfy the upper-division elective course requirement.

Bachelor's Degree

Computational Neuroscience (BS)

Coordinator: Jason Zevin, PhD
Undergraduate Adviser: Lucy A. Rinard, lucyleon@usc.edu
The computational neuroscience major is designed for those students with an interest in applying mathematical and computational methodologies toward understanding the structure and functioning of the nervous system. The major will provide progressive training in interdisciplinary and inter-faculty aspects of neuroscience, and serve as a foundation for students interested in pursuing post-graduate education in graduate or professional schools or career opportunities in technically advanced occupations. Research is integral to this major and students are encouraged to engage in research with neuroscience faculty as early as possible in their undergraduate years.

Grade Requirements:

A grade of C- or higher is required to count toward major requirements.

Program Requirements:

The major requires twelve core courses (45 units) and six or seven electives (minimum 22 units) for a minimum total of 67 units.

The degree requires a minimum of 128 units.

Core Requirements

General Science Requirements:
- BISC 220Lg General Biology: Cell Biology and Physiology Units: 4 or
- BISC 221Lg Advanced General Biology: Cell Biology and Physiology Units: 4
- CHEM 103Lgx General Chemistry for the Environment and Life Units: 4 or
- CHEM 105aLg General Chemistry Units: 4
- MATH 125g Calculus I Units: 4
- MATH 126g Calculus II Units: 4
- PHYS 135ag Physics for the Life Sciences Units: 4 or
- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
- PHYS 135bL Physics for the Life Sciences Units: 4 or
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4

Statistics Requirement, Choose One:
- BISC 305g Statistics for Biological Sciences Units: 4
- PSYC 274Lg Statistics Units: 4
- MATH 208x Elementary Probability and Statistics Units: 4
- MATH 307 Statistical Inference and Data Analysis I Units: 4

Neuroscience Requirements:
- BISC 421 Neurobiology Units: 4
- NEUR 199 Neuroscience Colloquium Units: 1
- PSYC 100Lg Introduction to Psychology Units: 4

Choose Two:
- BISC 407 Cellular and Molecular Neuroscience Units: 4
- NEUR 408 Systems Neuroscience: From Synapses to Perception Units: 4
- PSYC 440 Foundations of Cognitive Neuroscience Units: 4

Computational Area

Students are to take a total of three courses. The courses are listed in the table according to the programming language of the courses. It is not obligatory that all courses be from the same programming language, but the student should be aware that knowledge of a different language will likely be assumed in the advanced courses. Only one introductory programming course will be counted toward the major.

Basic Computational Skills

Choose one course (2-4 units).
- BISC 444 Practical Analysis of Biological Data in R Units: 2
- CSCI 103L Introduction to Programming Units: 4
- CSCI 455x Introduction to Programming Systems Design Units: 4
- ITP 109 Introduction to Java Programming Units: 2
- ITP 115 Programming in Python Units: 2
- ITP 168 Introduction to MATLAB Units: 2
- ITP 249 Introduction to Data Analytics Units: 4

Computational Courses

Choose two courses (8 units).
- BME 210 Biomedical Computer Simulation Methods Units: 4
- BME 402 Control and Communication in the Nervous System Units: 4

- BME 425 Basics of Biomedical Imaging Units: 3
- BISC 461 Seminar in Molecular and Computational Biology Units: 2
  *BISC 461 must be taken with BISC 444
- BISC 478 Computational Genome Analysis Units: 4
- BISC 481 Structural Bioinformatics: From Atoms to Cells Units: 4
- CSCI 360 Introduction to Artificial Intelligence Units: 4
- CSCI 445L Introduction to Robotics Units: 4
- CSCI 467 Introduction to Machine Learning Units: 4
- PSYC 450 Neural Network Models of Social and Cognitive Processes Units: 4
- MATH 308 Statistical Inference and Data Analysis II Units: 4

Biological Area

Choose 1-2 courses (4 units).

- BISC 424 Brain Architecture Units: 4
- BISC 461 Seminar in Molecular and Computational Biology Units: 2
- BISC 462 Seminar in Neurobiology Units: 2
- BISC 481 Structural Bioinformatics: From Atoms to Cells Units: 4
- BISC 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8
- HBIO 435 Neurobiology of Feeding Behavior and Obesity Units: 4
- HP 409 Environmental Impacts on the Brain Units: 4
- RXRS 403 Neuropharmacology in Health and Disease Units: 4

Behavioral Area

Choose one (4 units).

- PSYC 301L Cognitive Processes Units: 4
- PSYC 304L Sensation and Perception Units: 4
- PSYC 326 Behavioral Neuroscience Units: 4
- PSYC 424 Neuropsychology Units: 4
- PSYC 425 Functional Imaging of the Human Brain Units: 4
- PSYC 420 Animal Behavior Units: 4
- PSYC 438 Behavioral Genetics Units: 4
- ECON 405 Neuroeconomics Units: 4
- LING 385Lg Human Language as Computation Units: 4

Other Electives

Take one additional course from the Computational, Biological, or Behavioral area, or complete four units of Neuroscience research (NEUR 490).

- NEUR 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8

Graduate Courses

A graduate class from the following list may be substituted for an undergraduate computational course with the permission of the co-directors and instructor and with a minimum GPA of 3.3.

- BME 502 Advanced Studies of the Nervous System Units: 4
- BME 575L Computational Neuroengineering Units: 3
- CSCI 561 Foundations of Artificial Intelligence Units: 4
- CSCI 564 Brain Theory and Artificial Intelligence Units: 3
- CSCI 574 Computer Vision Units: 3
- CSCI 662 Advanced Natural Language Processing Units: 4
- EE 559 Machine Learning I: Supervised Methods Units: 4
- NSCI 524 Advanced Overview of Neurosciences Units: 4
- NSCI 531 Molecular and Cellular Neurobiology Units: 4
- NSCI 532 Systems and Behavioral Neurobiology Units: 3
- PSYC 506 Learning and Cognition Units: 4
- PSYC 540 Cognitive Neuroscience Units: 4
- PSYC 544 Psychophysiology Units: 4
- PSYC 545 Neuropsychology Units: 4
- PSYC 547 Functional Neuroanatomy Units: 4
- PSYC 551 Decision Neuroscience Units: 4
- PSYC 555 Introduction to Functional Magnetic Resonance Imaging Units: 4

Neuroscience (BA)

Coordinator: Jason Zevin, PhD
Undergraduate Advisers: Pablo Lopez, pablol@usc.edu; Toni Richardson, tonirich@usc.edu.

Grade Requirements:

A grade of C- or higher is required to count toward major requirements.

Program Requirements:

The major requires eight core courses and a colloquium (33 units) and four or five elective courses (minimum 16 units) for a minimum total of 49 units.

The degree requires a minimum of 128 units.

Core Requirements

Introductory Requirements:

- MATH 125g Calculus I Units: 4
- PSYC 100Lg Introduction to Psychology Units: 4

General Biology Requirement, Choose One:

- BISC 220Lg General Biology: Cell Biology and Physiology Units: 4
- BISC 221Lg Advanced General Biology: Cell Biology and Physiology Units: 4

General Chemistry Requirement, Choose One:

- CHEM 103Lgx General Chemistry for the Environment and Life Units: 4
- CHEM 105aLg General Chemistry Units: 4

Statistics Requirement, Choose One:

- BISC 305g Statistics for Biological Sciences Units: 4
- HP 340Lg Health Behavior Statistical Methods Units: 4
- MATH 208x Elementary Probability and Statistics Units: 4
- MATH 307 Statistical Inference and Data Analysis I Units: 4
- PSYC 274Lg Statistics Units: 4

Neuroscience Requirements:

- BISC 421 Neurobiology Units: 4
- NEUR 199 Neuroscience Colloquium Units: 1

Choose Two:

- BISC 407 Cellular and Molecular Neuroscience Units: 4
- BISC 408 Systems Neuroscience: From Synapses to Perception Units: 4
- PSYC 440 Foundations of Cognitive Neuroscience Units: 4

Electives

Four or five upper-division elective courses (minimum 16 units) from the list below are required. At least one course in the upper-division electives must carry a lab ("L") designation or be NEUR 490x. No more than 4 units of NEUR 490x may be used to fulfill the upper-division elective requirement.

Elective Courses

- BISC 307L General Physiology Units: 4
- BISC 312x Molecular Biochemistry Units: 4
- BISC 313L Evolution and Population Genetics Units: 4
- BISC 320Lg Molecular Biology Units: 4
- BISC 325 Genetics Units: 4
- BISC 330L Biochemistry Units: 4
- BISC 403 Advanced Molecular Biology Units: 4
- BISC 411 Advanced Cell Biology Units: 4
- BISC 406L Biotechnology Units: 4
- BISC 410 Applications of Molecular Biology to Medicine Units: 4
- BISC 422L Neurobiology Laboratory Units: 2
- BISC 423 Epilepsy to Ecstasy: Biological Basis of Neurological Disorders Units: 4
- BISC 424 Brain Architecture Units: 4
- BISC 426 Principles of Neural Development Units: 4
- BISC 461 Seminar in Molecular and Computational Biology Units: 2
- BISC 462 Seminar in Neurobiology Units: 2
- BISC 480L Developmental Biology Units: 4
- BISC 481 Structural Bioinformatics: From Atoms to Cells Units: 4

- BME 210 Biomedical Computer Simulation Methods Units: 4
- BME 402 Control and Communication in the Nervous System Units: 4
- CHEM 350g Molecular Principles of Biochemistry Units: 4
- CSCI 360 Introduction to Artificial Intelligence Units: 4
- CSCI 445L Introduction to Robotics Units: 4
- ECON 405 Neuroeconomics Units: 4
- GERO 414 Neurobiology of Aging Units: 4
- GERO 415 Neuroaffective Disorders of Aging Units: 4
- HBIO 306 Biology of the Non-Human Primates Units: 4
- HBIO 435 Neurobiology of Feeding Behavior and Obesity Units: 4
- HP 409 Environmental Impacts on the Brain Units: 4
- MATH 265 Mathematical and Computational Methods for Neuroscience Units: 4
- NEUR 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8
- PSYC 301L Cognitive Processes Units: 4
- PSYC 304L Sensation and Perception Units: 4
- PSYC 305 Learning and Memory Units: 4
- PSYC 320 Principles of Psychobiology Units: 4
- PSYC 326 Behavioral Neuroscience Units: 4
- PSYC 339Lg Origins of the Mind Units: 4
- PSYC 404L Psychophysiology of Emotion Units: 4
- PSYC 420 Animal Behavior Units: 4
- PSYC 424 Neuropsychology Units: 4
- PSYC 425 Functional Imaging of the Human Brain Units: 4
- PSYC 426 Motivated Behaviors and Addiction Units: 4
- PSYC 438 Behavioral Genetics Units: 4
- PSYC 450 Neural Network Models of Social and Cognitive Processes Units: 4
- RXRS 403 Neuropharmacology in Health and Disease Units: 4

Graduate Courses

A graduate class from the following list may be substituted for an upper-division elective with the permission of the co-directors and instructor and with a minimum GPA of 3.3.

- BME 575L Computational Neuroengineering Units: 3
- CSCI 564 Brain Theory and Artificial Intelligence Units: 3
- NSCI 524 Advanced Overview of Neurosciences Units: 4
- NSCI 531 Molecular and Cellular Neurobiology Units: 4
- NSCI 532 Systems and Behavioral Neurobiology Units: 3
- PSYC 506 Learning and Cognition Units: 4
- PSYC 540 Cognitive Neuroscience Units: 4
- PSYC 544 Psychophysiology Units: 4
- PSYC 545 Neuropsychology Units: 4
- PSYC 547 Functional Neuroanatomy Units: 4
- PSYC 551 Decision Neuroscience Units: 4
- PSYC 555 Introduction to Functional Magnetic Resonance Imaging Units: 4

Neuroscience (BS)

Coordinator: Jason Zevin, PhD
Undergraduate Advisers: Pablo Lopez, pablol@usc.edu; Toni Richardson, tonirich@usc.edu.

Grade Requirements:

A grade of C- or higher is required to count toward major requirements.

Program Requirements:

The major requires 15 core courses (minimum 55 units) and five or six elective courses (minimum 20 units) for a minimum total of 75 units.

The degree requires a minimum of 128 units.

Core Requirements

General Science Requirements:

- BISC 220Lg General Biology: Cell Biology and Physiology Units: 4 or
- BISC 221Lg Advanced General Biology: Cell Biology and Physiology Units: 4
- CHEM 105aLg General Chemistry Units: 4 or
- CHEM 115aLg Advanced General Chemistry Units: 4
- CHEM 105bL General Chemistry Units: 4 or
- CHEM 115bL Advanced General Chemistry Units: 4
- CHEM 322aL Organic Chemistry Units: 4
- CHEM 322bL Organic Chemistry Units: 4
- MATH 125g Calculus I Units: 4
- PHYS 135ag Physics for the Life Sciences Units: 4 or
- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
- PHYS 135bL Physics for the Life Sciences Units: 4 or
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4
- PSYC 100Lg Introduction to Psychology Units: 4

Programming Requirement, Choose One:

- CSCI 103L Introduction to Programming Units: 4
- CSCI 455x Introduction to Programming Systems Design Units: 4
- ITP 109 Introduction to Java Programming Units: 2
- ITP 115 Programming in Python Units: 2
- ITP 165 Introduction to C++ Programming Units: 2
- ITP 168 Introduction to MATLAB Units: 2

Statistics Requirement, Choose One:

- BISC 305g Statistics for Biological Sciences Units: 4
- HP 340Lg Health Behavior Statistical Methods Units: 4
- MATH 208x Elementary Probability and Statistics Units: 4
- MATH 307 Statistical Inference and Data Analysis I Units: 4
- PSYC 274Lg Statistics Units: 4

Neuroscience Requirements:

- BISC 421 Neurobiology Units: 4
- NEUR 199 Neuroscience Colloquium Units: 1

Choose Two:*

- BISC 407 Cellular and Molecular Neuroscience Units: 4
- BISC 408 Systems Neuroscience: From Synapses to Perception Units: 4
- PSYC 440 Foundations of Cognitive Neuroscience Units: 4

Electives

Five or six upper-division elective courses (minimum of 20 units) from the following list are required. At least one course in the upper-division electives must carry a lab ("L") designation or be 490. No more than 4 units of NEUR 490x may be used to fulfill the upper-division elective requirement.

Elective Courses

- BISC 307L General Physiology Units: 4
- BISC 312x Molecular Biochemistry Units: 4
- BISC 313L Evolution and Population Genetics Units: 4
- BISC 320Lg Molecular Biology Units: 4
- BISC 325 Genetics Units: 4
- BISC 330L Biochemistry Units: 4
- BISC 403 Advanced Molecular Biology Units: 4
- BISC 406L Biotechnology Units: 4
- BISC 410 Applications of Molecular Biology to Medicine Units: 4
- BISC 411 Advanced Cell Biology Units: 4
- BISC 422L Neurobiology Laboratory Units: 2
- BISC 423 Epilepsy to Ecstasy: Biological Basis of Neurological Disorders Units: 4
- BISC 424 Brain Architecture Units: 4
- BISC 426 Principles of Neural Development Units: 4
- BISC 461 Seminar in Molecular and Computational Biology Units: 2
- BISC 462 Seminar in Neurobiology Units: 2
- BISC 480L Developmental Biology Units: 4
- BISC 481 Structural Bioinformatics: From Atoms to Cells Units: 4
- BME 210 Biomedical Computer Simulation Methods Units: 4
- BME 402 Control and Communication in the Nervous System Units: 4
- CHEM 350g Molecular Principles of Biochemistry Units: 4
- CSCI 360 Introduction to Artificial Intelligence Units: 4
- CSCI 445L Introduction to Robotics Units: 4

- ECON 405 Neuroeconomics Units: 4
- GERO 414 Neurobiology of Aging Units: 4
- GERO 415 Neuroaffective Disorders of Aging Units: 4
- HBIO 306 Biology of the Non-Human Primates Units: 4
- HBIO 435 Neurobiology of Feeding Behavior and Obesity Units: 4
- HP 409 Environmental Impacts on the Brain Units: 4
- MATH 265 Mathematical and Computational Methods for Neuroscience Units: 4
- NEUR 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8
- PSYC 301L Cognitive Processes Units: 4
- PSYC 304L Sensation and Perception Units: 4
- PSYC 305 Learning and Memory Units: 4
- PSYC 320 Principles of Psychobiology Units: 4
- PSYC 326 Behavioral Neuroscience Units: 4
- PSYC 339Lg Origins of the Mind Units: 4
- PSYC 404L Psychophysiology of Emotion Units: 4
- PSYC 420 Animal Behavior Units: 4
- PSYC 424 Neuropsychology Units: 4
- PSYC 425 Functional Imaging of the Human Brain Units: 4
- PSYC 426 Motivated Behaviors and Addiction Units: 4
- PSYC 438 Behavioral Genetics Units: 4
- PSYC 450 Neural Network Models of Social and Cognitive Processes Units: 4
- RXRS 403 Neuropharmacology in Health and Disease Units: 4

Note:

*Students may take the third of the three courses BISC 407, BISC 408 and PSYC 440 as an elective.

Graduate Courses

A graduate class from the following list may be substituted for an upper-division elective with the permission of the co-directors and instructor and with a minimum GPA of 3.3.

- BME 575L Computational Neuroengineering Units: 3
- CSCI 564 Brain Theory and Artificial Intelligence Units: 3
- NSCI 524 Advanced Overview of Neurosciences Units: 4
- NSCI 531 Molecular and Cellular Neurobiology Units: 4
- NSCI 532 Systems and Behavioral Neurobiology Units: 3
- PSYC 506 Learning and Cognition Units: 4
- PSYC 540 Cognitive Neuroscience Units: 4
- PSYC 544 Psychophysiology Units: 4
- PSYC 545 Neuropsychology Units: 4
- PSYC 547 Functional Neuroanatomy Units: 4
- PSYC 551 Decision Neuroscience Units: 4
- PSYC 555 Introduction to Functional Magnetic Resonance Imaging Units: 4

Minor

Neuroscience Minor

Coordinator: Jason Zevin, PhD
Undergraduate Advisers: Elizabeth Linkous, linkous@usc.edu; Lucy A. Leon, lucyleon@usc.edu

Grade Requirements

A grade of C- or higher is required to count toward minor requirements.

Core Requirements (20 Units)

- PSYC 274Lg Statistics Units: 4 *
- BISC 421 Neurobiology Units: 4 **
- NEUR 408 Systems Neuroscience: From Synapses to Perception Units: 4 **
- PSYC 440 Foundations of Cognitive Neuroscience Units: 4 ***
- Electives A 300- or 400-level course from the elective list for majors Units: 4

Note:

**An equivalent course may be substituted with permission*
***Prerequisite: BISC 220 or BISC 221*
****Prerequisite: PSYC 100*
Recommended but not required: CHEM 103Lx (or CHEM 105La) plus MATH 125
Students who have not already taken the prerequisites (BISC 220/ BISC 221 and PSYC 100) will need to take a total of 28 units to satisfy the requirements of a minor in neuroscience. Thus, the range of units will vary from 20 to 28 depending on a student's background.

Ocean Sciences

Zumberge Hall of Science 117
(213) 740-6106
FAX: (213) 740-8801
Email: waite@usc.edu
oceansciences.usc.edu
Director: Douglas E. Hammond, PhD
Participating Faculty: See *Biological Sciences*, *Earth Sciences* and *Engineering* in this catalogue.

Applications for the Ocean Sciences program should be routed through the affiliated departments and a separate letter sent to the Ocean Sciences director, Douglas E. Hammond, USC Earth Sciences, Los Angeles, CA 90089-0740.

Degree Programs

The Graduate Program in Ocean Sciences (GPOS) provides interdisciplinary education and training to prepare professional ocean scientists for careers in academia, industry, and state and federal government. Students develop the ability to identify and solve significant problems in ocean sciences by using their training in several disciplines. They develop the ability to formulate and test hypotheses and integrate information and concepts about how the earth-ocean system is structured and how it functions. Training also is provided to develop skills in oral and written communication of technical and scientific information. Both MS and PhD degree programs are offered; both require preparation of a thesis (MS) or dissertation (PhD).

Admission Requirements

All rules and regulations described in The Graduate School section of this catalogue and Graduate Admission apply to students in the GPOS.

Official acceptance by the GPOS Admissions Committee is based on the recommendation of faculty from an affiliated department. Acceptance depends upon the applicant's letters of recommendation, research experience, intended area of research, personal interview (whenever possible), and the availability of a faculty member willing to advise and sponsor the applicant.

A BS or BA degree in an appropriate field of natural science, engineering or mathematics is required for admission.

It is expected that applicants to the GPOS will have attained a scholarship average of at least "B" (3.0 GPA on a 4.0 scale) preferably in the natural sciences or mathematics. Applicants to the GPOS are NOT required to submit GRE scores.

Applicants should contact the GPOS office by email or phone for an admission package. The GPOS admits students for both the fall and spring semesters; however, applicants for assistantships are encouraged to apply for the fall semester.

Graduate Degrees

Degree Requirements

Advanced degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and The Graduate School section of this catalogue for general regulations.

All courses applied toward the degrees must be courses accepted by the Graduate School.

Interdisciplinary Programs

The Graduate Program in Ocean Sciences is designed to be interdisciplinary, reflecting the nature of the field that combines principles of physical, chemical, geological and biological oceanography to solve relevant problems in the ocean environment.

Master's Degree

Ocean Sciences (MS)

The program does not accept applicants for a Master of Science degree in ocean sciences. The MS degree is intended only as a transitional degree in the process of completing requirements for the PhD in ocean sciences.

Research Tool Requirements

None required.

Course Requirements

The MS degree in Ocean Sciences requires at least 24 units of course work, including two core courses (OS 512 and 582). Four thesis units (OS 594) are also required. At least 16 units of course work must be at the 500-level or higher; no more than six units can be directed research (OS 590); a maximum of four units with superior grades in approved course work may be transferred from an accredited graduate school. Students are required to maintain an overall GPA of 3.0 in all graduate work.

Thesis

Students should arrange for the appointment of a thesis adviser and committee after the first semester, or at the latest, after the first year of graduate work. The thesis committee should consist of the adviser plus two other faculty members, all of whom are generally selected from GPOS faculty. Once the committee is arranged, the student may make formal application to the Graduate School for the MS degree.

Doctoral Degree

Ocean Sciences (PhD)

Research Tool Requirements

To be determined by qualifying exam committee.

Course Requirements

The PhD degree in Ocean Sciences requires at least 27 units of formal course work (including seminars) of the 60 total units needed. Two core courses are required (OS 512, OS 582). No more than 15 units of 400-level course work may be applied. A maximum of 30 units may be transferred from an accredited graduate school.

Students are required to maintain an overall GPA of 3.0 in all graduate work.

Students may request permission to take the PhD qualifying examination on completion of 24 units of course work, including two core courses in Ocean Sciences.

Screening Procedure

Students in the PhD program must pass the screening procedure before their 25th unit of graduate credit. Screening consists of a review of the student's progress and is usually done by the GPOS Review Committee following a written recommendation by the student's adviser(s). Screening occurs at the end of each semester.

Qualifying Exam Committee

The doctoral qualifying exam committee is formed after the student has passed the screening procedure. The committee is appointed by the department with the advice of the student's research adviser. The five-member committee consists of the adviser, a minimum of three other members from the GPOS faculty, and one additional tenure-track faculty member. The committee must include faculty members from more than one academic department. A tenure-track faculty member must serve as research adviser or co-adviser. The committee consults with the student, recommends an appropriate program of study and administers written and oral qualifying examinations.

Qualifying Examination

The student may request permission to take the PhD qualifying examination upon completion of 24 units of course work, including two core courses in ocean sciences. The qualifying examination consists of a written and an oral part, both parts prepared, conducted and evaluated by the student's examination committee. The written examination will consist of a number of questions given on two consecutive days. Questions will be comprehensive in scope with respect to the student's chosen area of specialization and will be designed to test the student's conceptual, analytical and integrative ability and preparation.

The written part of the qualifying examination must be taken before the oral examination. The oral examination will be in the area of the student's intended research and will be based on a research project selected and developed by the student into a written proposition. The oral examination will be conducted and evaluated by the student's examination committee. The oral examination must be taken within one month of the written examination.

Defense of the Dissertation

After the student has passed the qualifying examination, the qualifying exam committee recommends to the Graduate School that the student be admitted to candidacy for the PhD degree. Following admission to candidacy the student must register for OS 794 Dissertation every semester, except summers, until the degree is awarded.

Once the qualifying examination is passed, the student is required, as soon as possible, to appoint a dissertation committee, using an appointment of committee form which can be found on the Graduate School Website (usc.edu/schools/GraduateSchool). All or some of the qualifying exam committee may be nominated. Until a dissertation committee is appointed, the qualifying exam committee will have responsibility for the student's program of study. The student must undertake an original investigation of a problem in ocean sciences. The topic must be approved by the student's dissertation committee and will usually be based on the written proposition presented in the qualifying examination.

A dissertation based on the student's research must be approved by the student's dissertation committee. The student must then defend the dissertation. The process for submission of the dissertation to the Graduate School can be found on the Graduate School Website under "Current Students — Thesis and Dissertations." This process should be started approximately one month before the defense, and the student must allow adequate time after the defense for final copy preparation.

The dissertation must conform to the general regulations described in Regulations for Format and Presentation of Theses and Dissertations, also available from the Graduate School Website, Additional regulations and information on the organization and preparation of the dissertation are provided in *Directions for Preparation of Dissertations and Research Reports as Required by the Graduate Program in Ocean Sciences/University of Southern California, available in the GPOS office.*

Philosophy

The School of Philosophy offers courses in most areas of philosophy, including philosophy of mind, philosophy of language, epistemology, metaphysics, logic, philosophy of science, political philosophy, ethics, aesthetics, the history of philosophy, phenomenology, and existentialism. The major in philosophy is designed to acquaint students with the fundamental problems of Western thought and introduce them to the concepts and techniques necessary for independent philosophical thinking; it is equally intended to provide a broadening perspective for the various areas of specialization in the natural and social sciences and in literature and the arts. The school also offers a minor in philosophy and a minor in philosophy of law, politics and economics. It also offers bachelor's degrees in philosophy; philosophy and physics; philosophy, politics and economics; and philosophy, politics and law. In addition to these undergraduate programs, the School of Philosophy also offers a Master of Arts in Philosophy, a Master of Arts in Philosophy and Law, a joint degree with the USC Gould School of Law, and a Doctor of Philosophy in Philosophy.

Emeritus: S. Marshall Cohen, MA*; Frank Lewis, PhD; Gary Watson, PhD; George Wilson, PhD
**Recipient of university-wide or college teaching award.*

Undergraduate Degrees

Double Major

Double majors are encouraged but a student must work in close consultation with the undergraduate adviser.

Bachelor of Arts with a Combined Major in Linguistics and Philosophy

See Linguistics.

Philosophy Honors Program

Students who are considering the possibility of continuing their education at a graduate level in philosophy or similar disciplines, or students who wish to undertake a more intensive course of studies in philosophy, which includes original independent research, are strongly encouraged to take their major with honors.

Departmental honors for any of our majors requires completion of the requirements for the Bachelor of Arts, with the following additional requirements:

1. Students must take an honors capstone seminar. If it is not possible for the student to take an honors capstone seminar, the student may instead take PHIL 494: Senior Thesis, after completing the prerequisites for this course.
2. Students must have a GPA of 3.5 or higher in their philosophy courses.

Students who intend to complete the major with honors are encouraged to enroll in the program early in their junior year, and, in any case, no later than the first term of their senior year. Students must consult continuously with their faculty adviser on a mutually agreed basis.

Minor in Critical Approaches to Leadership

See Interdisciplinary Studies.

Graduate Degrees

The objective of the graduate program in philosophy is to equip suitably prepared and talented students to function effectively as teachers, thinkers and writers on philosophical topics in the Western tradition. The program provides for a wide range of studies within philosophy, but emphasizes the history of philosophy, both classical and modern, along with the traditional core disciplines: ethics, epistemology, metaphysics and logic.

Because philosophy is as much a special manner of intellectual activity as it is a special subject matter, the graduate student is expected not only to master major works in the historical and contemporary literature of philosophical thought, but also to develop the ability to engage in the ongoing process of philosophical research and dialogue.

Admission Requirements

An applicant for admission normally has an undergraduate major in philosophy, but programs may be arranged for promising students who do not. At least three letters of recommendation from the student's undergraduate teachers should be sent to the chair of graduate admissions of the School of Philosophy. All applicants are required to take the verbal and quantitative General Tests of the Graduate Record Examinations.

Degree Requirements

These degrees are awarded under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and The Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Progressive Degree Program in Philosophy and Law

The progressive degree program permits exceptional undergraduate students with a major in philosophy to receive both an undergraduate degree and the Master of Arts in Philosophy and Law within five years. A minimum GPA of 3.5, two letters of recommendation and outstanding performance in philosophy courses are required for admission to this program.

Graduate Advisement

In addition to the departmental graduate adviser, who has the formal role in graduate advising, each student will be matched with a personal adviser, who will share responsibility with the graduate adviser for monitoring a student's progress semester by semester. The graduate adviser is available to counsel any graduate student on all aspects of the graduate program. A student's personal adviser will consult informally with the student semester by semester on how to interpret his or her grades and especially the written reports provided by the instructor for each course in which the student is enrolled, discuss informally the student's selection of courses each semester, and generally keep track of the student's progress in the program. At the appropriate time, the student will consult his or her adviser concerning the appointment of a faculty committee for guidance and supervision. An official

qualifying exam committee will be appointed at the time the student passes the screening examination; for the rules governing its establishment and makeup, see General Requirements for the Doctor of Philosophy degree in the Graduate School section. The qualifying exam committee will meet with the student soon after its appointment, and at least once each academic year thereafter.

Bachelor's Degree

Philosophy (BA)

The major in philosophy is designed to acquaint students with the fundamental problems that are debated within western philosophical thought, and to introduce them to the concepts and techniques necessary for independent philosophical thinking. It is equally intended to provide a broadening perspective for the various areas of specialization in the natural and social sciences and in literature and the arts.

The major in philosophy requires nine courses in philosophy; six of these must be at the upper-division level.

Total units for degree: 128

One course must be a gateway course:

This course must be taken before taking any 400-level courses.

- PHIL 315 History of Western Philosophy: Ancient Period Units: 4
- PHIL 320 History of Western Philosophy: Modern Period Units: 4
- PHIL 336 Philosophy of Mind and Language Units: 4
- PHIL 337 Political Philosophy Units: 4
- PHIL 340 Ethics Units: 4
- PHIL 360 Epistemology and Metaphysics Units: 4
- PHIL 362 Possible Worlds Units: 4
- PHIL 385 Science and Rationality Units: 4

One course must be in logic:

- PHIL 120g Introduction to Formal Logic Units: 4
- PHIL 222g Logic and Language Units: 4
- PHIL 350 Symbolic Logic Units: 4
  or
- PHIL 450 The Limits of Logic Units: 4

Distribution Requirement

Students must take at least one course from each of the three categories listed below:

History of Philosophy

- PHIL 311 The Quest for the Individual in Early Modern Europe Units: 4
- PHIL 314 Origins of Free Market Thought in Early Modern Europe Units: 4
- PHIL 315 History of Western Philosophy: Ancient Period Units: 4
- PHIL 320 History of Western Philosophy: Modern Period Units: 4
- PHIL 337 Political Philosophy Units: 4
- PHIL 355 Existentialism Units: 4
- PHIL 410 Early Greek Thought Units: 4
- PHIL 411 Plato Units: 4
- PHIL 415 Aristotle Units: 4
- PHIL 421 Continental Rationalism Units: 4
- PHIL 422 British Empiricism Units: 4
- PHIL 423 The Critical Philosophy of Kant Units: 4
- PHIL 424 19th Century Philosophy Units: 4
- PHIL 427 Twentieth Century Anglo-American Philosophy Units: 4
- PHIL 428 Anglo-American Philosophy Since 1950 Units: 4
- PHIL 442 History of Ethics to 1900 Units: 4
- PHIL 473 Wittgenstein Units: 4

Ethics, Law and Value Theory

- PHIL 337 Political Philosophy Units: 4
- PHIL 340 Ethics Units: 4
- PHIL 347 Philosophy in Literature Units: 4
- PHIL 355 Existentialism Units: 4
- PHIL 361 Philosophy of Religion Units: 4
- PHIL 430 Philosophy of Law Units: 4
- PHIL 431 Law, Society, and Politics Units: 4
- PHIL 437 Social and Political Philosophy Units: 4
- PHIL 440 Contemporary Ethical Theory Units: 4
- PHIL 442 History of Ethics to 1900 Units: 4
- PHIL 443 Value Theory Units: 4
- PHIL 446 Aesthetics and the Film Units: 4

Systematic Philosophy

- PHIL 350 Symbolic Logic Units: 4
- PHIL 360 Epistemology and Metaphysics Units: 4
- PHIL 362 Possible Worlds Units: 4
- PHIL 363 Philosophy of Perception Units: 4
- PHIL 385 Science and Rationality Units: 4
- PHIL 427 Twentieth Century Anglo-American Philosophy Units: 4
- PHIL 428 Anglo-American Philosophy Since 1950 Units: 4
- PHIL 450 The Limits of Logic Units: 4
- PHIL 460 Metaphysics Units: 4
- PHIL 462 Philosophy of Mind Units: 4
- PHIL 463 Theories of Action Units: 4
- PHIL 465 Philosophy of Language Units: 4
- PHIL 470 Theory of Knowledge Units: 4
- PHIL 480 Philosophy of Mathematics Units: 4
- PHIL 485 Development of Physical Science Units: 4
- PHIL 486 Methodologies of the Sciences Units: 4

Note:

During the senior year, students in a Philosophy major can take a capstone seminar. Students who are enrolled in one of the minors in philosophy may enroll in a capstone seminar only with the permission of the instructor. Enrollment in these seminars will not exceed 15 students. Students may enroll in a capstone seminar only if they have satisfied the following requirements: taken at least two 400-level courses in philosophy before enrolling in the capstone.

Philosophy and Physics (BA)

Philosophy and physics is a demanding and rewarding major that combines two of the most rigorous and fundamental subjects in the arts and the sciences. There are strong links between physics and philosophy, and the stimulus for each discipline lies in part in the other. The program of study is designed to seek understanding of the nature of reality and of our knowledge of it. Philosophy and physics graduates offer an unusual and valuable combination of skills to employers in commerce and industry and are also well prepared to pursue post-graduate studies in any number of related fields.

Lower-Division Physics and Math (21 units)

Students must complete these six courses.

- MATH 129 Calculus II for Engineers and Scientists Units: 4
- MATH 229 Calculus III for Engineers and Scientists Units: 4
- MATH 245 Mathematics of Physics and Engineering I Units: 4
- PHYS 161Lg Advanced Principles of Physics I Units: 4
- PHYS 162L Advanced Principles of Physics II Units: 4
- PHYS 190 Physics Discovery Series Units: 1

Upper-Division Physics and Math (16 units)

Students must complete these four courses.

- MATH 445 Mathematics of Physics and Engineering II Units: 4
- PHYS 304 Mechanics Units: 4
- PHYS 408a Electricity and Magnetism Units: 4
- PHYS 438a Introduction to Quantum Mechanics and its Applications Units: 4

Philosophy Gateway Course (4 units)

Students must complete one gateway course. This course will count as an upper-division philosophy elective.

- PHIL 315 History of Western Philosophy: Ancient Period Units: 4

- PHIL 320 History of Western Philosophy: Modern Period Units: 4
- PHIL 336 Philosophy of Mind and Language Units: 4
- PHIL 337 Political Philosophy Units: 4
- PHIL 340 Ethics Units: 4
- PHIL 360 Epistemology and Metaphysics Units: 4
- PHIL 385 Science and Rationality Units: 4

Philosophy of Physics (4 units)

Students must complete the following course.

- PHIL 484 Philosophy of Physics Units: 4

Philosophy of Science (4 units)

Students must complete one course from this category.

- PHIL 254gp Science, Knowledge and Objectivity Units: 4
- PHIL 256g Science, Religion, and the Making of the Modern Mind Units: 4
- PHIL 385 Science and Rationality Units: 4
- PHIL 486 Methodologies of the Sciences Units: 4

Logic (4 units)

Students must complete one course from this category.

- PHIL 120g Introduction to Formal Logic Units: 4
- PHIL 222g Logic and Language Units: 4
- PHIL 452 Modal Logic Units: 4

Upper-Division Physics Electives (12 units)

Students must choose three additional upper-division physics courses to complete, from this list.

- PHYS 316 Thermodynamics and Statistical Mechanics Units: 4
- PHYS 408b Electricity and Magnetism Units: 4
- PHYS 430 General Relativity and Gravitation Units: 4
- PHYS 438b Introduction to Quantum Mechanics and its Applications Units: 4
- PHYS 440 Introduction to Condensed Matter Physics Units: 4
- PHYS 444 Physical Biology: From Molecules to Cells Units: 4

Upper-Division Philosophy Electives (8 units)

In addition to the philosophy gateway course, students must complete two upper-division philosophy courses such that one course is completed from each of the categories listed below. Note: Courses taken to satisfy other requirements will not be double counted.

History of Philosophy

Students must complete one course from this category.

- PHIL 311 The Quest for the Individual in Early Modern Europe Units: 4
- PHIL 314 Origins of Free Market Thought in Early Modern Europe Units: 4
- PHIL 315 History of Western Philosophy: Ancient Period Units: 4
- PHIL 320 History of Western Philosophy: Modern Period Units: 4
- PHIL 337 Political Philosophy Units: 4
- PHIL 355 Existentialism Units: 4
- PHIL 410 Early Greek Thought Units: 4
- PHIL 411 Plato Units: 4
- PHIL 415 Aristotle Units: 4
- PHIL 421 Continental Rationalism Units: 4
- PHIL 422 British Empiricism Units: 4
- PHIL 423 The Critical Philosophy of Kant Units: 4
- PHIL 424 19th Century Philosophy Units: 4
- PHIL 427 Twentieth Century Anglo-American Philosophy Units: 4
- PHIL 428 Anglo-American Philosophy Since 1950 Units: 4
- PHIL 442 History of Ethics to 1900 Units: 4
- PHIL 473 Wittgenstein Units: 4

Ethics, Law and Value Theory

Students must complete one course from this category.

- PHIL 337 Political Philosophy Units: 4
- PHIL 340 Ethics Units: 4
- PHIL 347 Philosophy in Literature Units: 4
- PHIL 355 Existentialism Units: 4
- PHIL 361 Philosophy of Religion Units: 4
- PHIL 430 Philosophy of Law Units: 4
- PHIL 431 Law, Society, and Politics Units: 4
- PHIL 437 Social and Political Philosophy Units: 4
- PHIL 440 Contemporary Ethical Theory Units: 4
- PHIL 442 History of Ethics to 1900 Units: 4
- PHIL 443 Value Theory Units: 4
- PHIL 446 Aesthetics and the Film Units: 4

Systematic Philosophy

Students must complete one course from this category.

- PHIL 350 Symbolic Logic Units: 4
- PHIL 360 Epistemology and Metaphysics Units: 4
- PHIL 363 Philosophy of Perception Units: 4
- PHIL 385 Science and Rationality Units: 4
- PHIL 427 Twentieth Century Anglo-American Philosophy Units: 4
- PHIL 428 Anglo-American Philosophy Since 1950 Units: 4
- PHIL 450 The Limits of Logic Units: 4
- PHIL 460 Metaphysics Units: 4
- PHIL 463 Theories of Action Units: 4
- PHIL 465 Philosophy of Language Units: 4
- PHIL 470 Theory of Knowledge Units: 4
- PHIL 480 Philosophy of Mathematics Units: 4
- PHIL 485 Development of Physical Science Units: 4
- PHIL 486 Methodologies of the Sciences Units: 4
- PHIL 462 Philosophy of Mind Units: 4

Philosophy, Politics and Economics (BA)

This demanding major trains students in political economy, grounding their study in the historical, conceptual, and moral foundations of our shared political and economic lives. The interdisciplinary major allows students to trace interconnections between political, economic and legal issues within a range of broader humanistic concerns. It also fosters the development of logical, quantitative and analytic skills needed for clear thinking and effective communication, leaving students with a wide range of options for further, more specialized study or careers in law, politics or economics. The major requires 11 courses including an introductory lower-division course, a final capstone seminar and a range of further courses in the three disciplines.

Lower-Division Course

Students must complete one of the following courses.

- PHIL 101 Free People, Free Thought and Free Markets Units: 4
- PHIL 103g Philosophy, Politics and Economics in Europe, from Renaissance to Enlightenment Units: 4
- PHIL 174gw Freedom, Equality, and Social Justice Units: 4
- PHIL 178gw Moral Dilemmas in the Legal Domain Units: 4
- PHIL 258g Probability and Rational Choice Units: 4
- PHIL 260gw Ethical Theory and Practice Units: 4
- POSC 130g Law, Politics and Public Policy Units: 4

Logic Course

Students must complete one of the following courses.

- PHIL 222g Logic and Language Units: 4
- PHIL 350 Symbolic Logic Units: 4

Lower-Division Political Science Recommendation

One lower-division POSC course is *strongly* recommended before taking any upper-division POSC courses.

Philosophy Gateway Course

Students must complete one gateway course before taking any 400-level philosophy courses. This course will count toward the upper-division philosophy requirements.

- PHIL 311 The Quest for the Individual in Early Modern Europe Units: 4
- PHIL 314 Origins of Free Market Thought in Early Modern Europe Units: 4

- PHIL 315 History of Western Philosophy: Ancient Period Units: 4
- PHIL 320 History of Western Philosophy: Modern Period Units: 4
- PHIL 336 Philosophy of Mind and Language Units: 4
- PHIL 337 Political Philosophy Units: 4
- PHIL 339 Philosophy of Economics Units: 4
- PHIL 340 Ethics Units: 4
- PHIL 360 Epistemology and Metaphysics Units: 4

Philosophy of Economics, Political or Legal Philosophy

Students must complete one of the following courses.

- PHIL 339 Philosophy of Economics Units: 4
- PHIL 431 Law, Society, and Politics Units: 4
- PHIL 437 Social and Political Philosophy Units: 4

History of Philosophy, Politics and Economics

Students must complete one of the following courses.

- PHIL 311 The Quest for the Individual in Early Modern Europe Units: 4
- PHIL 314 Origins of Free Market Thought in Early Modern Europe Units: 4
- PHIL 337 Political Philosophy Units: 4

Moral Philosophy

Students must complete one of the following courses.

- PHIL 440 Contemporary Ethical Theory Units: 4
- PHIL 442 History of Ethics to 1900 Units: 4
- PHIL 443 Value Theory Units: 4

Upper-Division Political Science

Students must complete two of the following courses.

- POSC 300 Principles, Institutions, and Great Issues of American Democracy Units: 4
- POSC 311 Political Analysis Units: 4
- POSC 334 Interest Groups and Elite Behavior Units: 4
- POSC 340 Constitutional Law Units: 4
- POSC 360 Comparative Political Institutions Units: 4
- POSC 370 European Political Thought I Units: 4
- POSC 371 European Political Thought II Units: 4
- POSC 374 The American Founders: Visions, Values and Legacy Units: 4
- POSC 375 American Political Thought Units: 4
- POSC 380 Political Theories and Social Reform Units: 2, 4
- POSC 422 Political Attitudes and Behavior Units: 4
- POSC 424m Political Participation and American Diversity Units: 4
- POSC 425 Legislative Process Units: 4
- POSC 426 The United States Supreme Court Units: 4
- POSC 427 Black Politics in the American Political System Units: 4
- POSC 430 Political Economy of Mexico Units: 4
- POSC 431 Political Economy of Central America Units: 4
- POSC 435 Politics and the Economy Units: 4
- POSC 437 Mass Media and Politics Units: 4
- POSC 439 Critical Issues in American Politics Units: 4
- POSC 440 Comparative Law and the Judicial Process Units: 4
- POSC 441m Cultural Diversity and the Law Units: 4
- POSC 442m The Politics of Human Differences: Diversity and Discrimination Units: 4
- POSC 444 Civil and Political Rights and Liberties Units: 4
- POSC 451 Politics of Resources and Development Units: 4
- POSC 452 Critical Issues in Law and Public Policy Units: 4
- POSC 476 Contemporary Political Thought Units: 4
- POSC 479 Critical Issues in Political Thought Units: 4

Economics

Students must complete the following two courses in economics.

- ECON 203g Principles of Microeconomics Units: 4
- ECON 317 Introduction to Statistics for Economists Units: 4

Upper-Division Economics

Students must complete one of the following courses *after* having completed ECON 203g and ECON 317.

- ECON 318 Introduction to Econometrics Units: 4
- ECON 330 The Political Economy of Institutions Units: 4
- ECON 332 Contracts, Organizations and Institutions Units: 4
- ECON 340 Economics of Less Developed Countries Units: 4
- ECON 342 Economic Development of the Middle East Units: 4
- ECON 343 Economic Development of East Asia Units: 4
- ECON 344 Economic Development of Sub-Saharan Africa Units: 4
- ECON 348g Current Problems of the American Economy Units: 4
- ECON 350 The World Economy Units: 4
- ECON 366 Urban Economics Units: 4

Capstone Course

Students must complete the following capstone course.

- PHIL 475 Topics in Philosophy, Politics and Economics Units: 4

Philosophy, Politics and Law (BA)

This interdisciplinary major combines, in a systematic and structured way, basic education in philosophy, political theory and elements of law. An interdisciplinary approach to the combination of these three disciplines may be of particular interest to students contemplating post-graduate work in law; those interested in a career in public service or politics; and those attracted by the rigor of philosophy and its attention to foundational issues, who are also interested in politics and law. Students are exposed to a wider range of conceptual and methodological approaches than they would in any single discipline, while learning enough philosophy and political science to leave a choice of options for graduate schools. The major requires nine classes, one of which must be a gateway course — PHIL 315, PHIL 320, PHIL 336, PHIL 337, PHIL 340, PHIL 360 or PHIL 385 — distributed as follows.

Requirements

One lower-division class from the following:

- LAW 101w Law and the U.S. Constitution in Global History Units: 4
- LAW 200w Law and Society Units: 4
- LAW 210p Fundamentals of the U.S. Legal System Units: 4
- PHIL 101 Free People, Free Thought and Free Markets Units: 4
- PHIL 166gw Current Moral and Social Issues Units: 4
- PHIL 174gw Freedom, Equality, and Social Justice Units: 4
- PHIL 178gw Moral Dilemmas in the Legal Domain Units: 4
- PHIL 240g Mind, Self, and Consciousness Units: 4
- PHIL 254gp Science, Knowledge and Objectivity Units: 4
- PHIL 256g Science, Religion, and the Making of the Modern Mind Units: 4
- PHIL 258g Probability and Rational Choice Units: 4
- PHIL 284gp Ideas on Trial Units: 4
- POSC 130g Law, Politics and Public Policy Units: 4

Note:

Students who satisfy one of their general education requirements by taking a core, thematic options course of comparable scope and content, can, at the discretion of the director of the School of Philosophy and the philosophy undergraduate adviser for this major, substitute that course for one of the above.

One course in logic:

(Note: If selected, both PHIL 122ag and PHIL 122bg must be taken as they are considered two parts of one course.)

- PHIL 120g Introduction to Formal Logic Units: 4
- PHIL 122a Reasoning and Argument Units: 2
- PHIL 122b Reasoning and Argument Units: 2
- PHIL 222g Logic and Language Units: 4
- PHIL 350 Symbolic Logic Units: 4

One course in philosophy of law:

- PHIL 430 Philosophy of Law Units: 4
- PHIL 431 Law, Society, and Politics Units: 4

Two courses from Categories A, B and C below

The two courses must belong to different categories, and one of these courses must be a gateway course: PHIL 315, PHIL 320, PHIL 336, PHIL 337, PHIL 340, PHIL 360 or PHIL 385. *Students are required to take a gateway course before enrolling in any 400-level course in philosophy.*

A. Moral and political philosophy

- PHIL 337 Political Philosophy Units: 4
- PHIL 340 Ethics Units: 4
- PHIL 437 Social and Political Philosophy Units: 4
- PHIL 440 Contemporary Ethical Theory Units: 4
- PHIL 442 History of Ethics to 1900 Units: 4
- PHIL 443 Value Theory Units: 4

B. History of philosophy:

- PHIL 315 History of Western Philosophy: Ancient Period Units: 4
- PHIL 317 History of Western Philosophy: Medieval Period Units: 4
- PHIL 320 History of Western Philosophy: Modern Period Units: 4
- PHIL 423 The Critical Philosophy of Kant Units: 4
- PHIL 427 Twentieth Century Anglo-American Philosophy Units: 4
- PHIL 428 Anglo-American Philosophy Since 1950 Units: 4

C. Systematic areas of philosophy:

- PHIL 336 Philosophy of Mind and Language Units: 4
- PHIL 360 Epistemology and Metaphysics Units: 4
- PHIL 385 Science and Rationality Units: 4
- PHIL 462 Philosophy of Mind Units: 4
- PHIL 463 Theories of Action Units: 4
- PHIL 465 Philosophy of Language Units: 4
- PHIL 470 Theory of Knowledge Units: 4

One course in constitutional politics:

- POSC 335 Political Parties, Campaigns, and Elections Units: 4
- POSC 340 Constitutional Law Units: 4
- POSC 426 The United States Supreme Court Units: 4
- POSC 444 Civil and Political Rights and Liberties Units: 4

One course in comparative or international politics and law:

- ANTH 345 Politics, Social Organization, and Law Units: 4
- POSC 345 International Law Units: 4
- POSC 440 Comparative Law and the Judicial Process Units: 4
- POSC 448a The Politics of Peace Units: 4

One course in politics, law, and public policy:

- LING 412 Language and Law Units: 4
- POSC 347 Environmental Law Units: 4
- POSC 395 Directed Governmental and Political Leadership Internship Units: 2, 3, 4, 5, 6, 7, 8
- POSC 443 Law in Film Units: 4
- POSC 452 Critical Issues in Law and Public Policy Units: 4
- SWMS 349 Women and the Law Units: 4

One course in law:

- LAW 300 Concepts in American Law Units: 4

Note:

Students in the major may enroll in a capstone seminar in philosophy if they have satisfied the general requirements: at least two 400-level courses in philosophy, completed prior to the capstone seminar.

Minor

Philosophy Minor

The minor in philosophy requires the completion of five philosophy courses, at least four of which are upper-division courses. All minors must take a gateway course — PHIL 315, PHIL 320, PHIL 340 or PHIL 360.

Distribution requirement:

Students must take at least one course from each of the three categories listed below:

History of Philosophy:

- PHIL 315 History of Western Philosophy: Ancient Period Units: 4
- PHIL 320 History of Western Philosophy: Modern Period Units: 4
- PHIL 410 Early Greek Thought Units: 4
- PHIL 411 Plato Units: 4
- PHIL 415 Aristotle Units: 4
- PHIL 421 Continental Rationalism Units: 4
- PHIL 422 British Empiricism Units: 4
- PHIL 423 The Critical Philosophy of Kant Units: 4
- PHIL 424 19th Century Philosophy Units: 4
- PHIL 427 Twentieth Century Anglo-American Philosophy Units: 4

Ethics, Law and Value Theory:

- PHIL 337 Political Philosophy Units: 4
- PHIL 340 Ethics Units: 4
- PHIL 430 Philosophy of Law Units: 4
- PHIL 437 Social and Political Philosophy Units: 4
- PHIL 440 Contemporary Ethical Theory Units: 4
- PHIL 442 History of Ethics to 1900 Units: 4

Systematic Topics:

- PHIL 350 Symbolic Logic Units: 4
- PHIL 351 Reasoning and Logic Units: 4
- PHIL 352 Logic and Language Units: 4
- PHIL 360 Epistemology and Metaphysics Units: 4
- PHIL 385 Science and Rationality Units: 4
- PHIL 427 Twentieth Century Anglo-American Philosophy Units: 4
- PHIL 428 Anglo-American Philosophy Since 1950 Units: 4
- PHIL 460 Metaphysics Units: 4
- PHIL 462 Philosophy of Mind Units: 4
- PHIL 463 Theories of Action Units: 4
- PHIL 465 Philosophy of Language Units: 4
- PHIL 470 Theory of Knowledge Units: 4
- PHIL 480 Philosophy of Mathematics Units: 4
- PHIL 485 Development of Physical Science Units: 4
- PHIL 486 Methodologies of the Sciences Units: 4

Philosophy of Law, Politics and Economics Minor

The Philosophical Foundations of Law, Politics and Economics minor requires a minimum of five courses, at least three of which must be philosophy courses, and at least four of which must be upper-division. Students must complete one course in Logic, and at least one course from each of the following three categories: Philosophy and Economics, Philosophy and Politics, Philosophy and Law.

Logic

Students must complete one course from this category.

- PHIL 120g Introduction to Formal Logic Units: 4
- PHIL 122a Reasoning and Argument Units: 2
- PHIL 122b Reasoning and Argument Units: 2
- PHIL 222g Logic and Language Units: 4
- PHIL 350 Symbolic Logic Units: 4
- PHIL 450 The Limits of Logic Units: 4

Philosophy and Economics

Students must complete at least one course from this category.

- PHIL 101 Free People, Free Thought and Free Markets Units: 4
- PHIL 314 Origins of Free Market Thought in Early Modern Europe Units: 4
- PHIL 339 Philosophy of Economics Units: 4

- ECON 101 Free People, Free Thought and Free Markets Units: 4
- ECON 203g Principles of Microeconomics Units: 4
- ECON 238xg Political Economy and Social Issues Units: 4
- ECON 339 Philosophy of Economics Units: 4

Philosophy and Politics

Students must complete at least one course from this category.

- PHIL 103g Philosophy, Politics and Economics in Europe, from Renaissance to Enlightenment Units: 4
- PHIL 174gw Freedom, Equality, and Social Justice Units: 4
- PHIL 258g Probability and Rational Choice Units: 4
- PHIL 337 Political Philosophy Units: 4
- PHIL 437 Social and Political Philosophy Units: 4
- POSC 130g Law, Politics and Public Policy Units: 4
- POSC 300 Principles, Institutions, and Great Issues of American Democracy Units: 4
- POSC 374 The American Founders: Visions, Values and Legacy Units: 4
- POSC 375 American Political Thought Units: 4

Philosophy and Law

Students must complete at least one course from this category.

- LAW 210p Fundamentals of the U.S. Legal System Units: 4
- PHIL 178gw Moral Dilemmas in the Legal Domain Units: 4
- PHIL 430 Philosophy of Law Units: 4
- PHIL 431 Law, Society, and Politics Units: 4
- POSC 340 Constitutional Law Units: 4

Minimum Units Required: 20

Master's Degree

Philosophy (MA)

The department does not accept applicants for a Master of Arts degree in philosophy. The MA degree is intended only as a transitional degree in the process of completing requirements for the PhD in philosophy.

A student may obtain an MA in philosophy by fulfilling the following requirements: a minimum of 36 units in the USC philosophy school, at least 24 of which must be at the 500 level. Requirements include: PHIL 500, PHIL 503 and a 500-level course in each of the following three areas: metaphysics and epistemology, ethics and other value theory, and history of philosophy. Of the remaining four required (4-unit) courses, only four units of PHIL 590 are applicable to the degree. A publishable research paper is also required.

Philosophy and Law (MA)

A total of 36 units are required for the degree, including at least 24 units in philosophy. Twelve of these must come from completing the specialization and breadth requirements. The former requires students to take a 4unit, 500-level course in philosophy on a topic spanning philosophy and law. The latter requires students to take PHIL 500 or PHIL 503, plus another 4-unit, 500-level course in philosophy on a topic that does not span philosophy and law, including but not limited to topics in metaphysics, epistemology, philosophy of language, philosophy of science, ethics, aesthetics and history of philosophy. Students must also demonstrate a basic proficiency in symbolic logic, typically by passing, at a sufficiently high level, one of a specified range of 4-unit courses in logic offered by the School of Philosophy. The law requirement for this degree consists of two courses in the USC Gould School of Law. The first must be either LAW 503 Contracts or LAW 509 Torts I. The second must be either LAW 504 Criminal Law or LAW 508 Constitutional Law. Students who elect to take LAW 504 would normally also take 1 unit of PHIL 590 as an accompaniment. Degree candidates must also write a master's thesis on some subject in legal philosophy. At least one of the thesis advisers must have an appointment in the School of Philosophy.

Dual Degree

Master of Arts, Philosophy/Juris Doctor (MA/JD)

Students must complete 24 units in the USC School of Philosophy and 76 units in the USC Gould School of Law.

First Year: Required law school curriculum

Second and Third Years: The Department of Philosophy prefers that students take at least one philosophy course each semester. During the four semesters, students must take at least 16 units at the 500-level, including PHIL 450 Intermediate Symbolic Logic or PHIL 510 Philosophical Logic and PHIL 500 Introduction to Contemporary Philosophical Literature, and PHIL 503 Introduction to Contemporary Philosophical Literature on Value, one 400- or 500-level course in ethics or social/political philosophy or aesthetics or philosophy of law; one 400- or 500-level course in metaphysics or epistemology or philosophy of language or philosophy of science or philosophy of mind; one 400- or 500-level course in the history of ancient or early modern philosophy; passage of the second year review that shall include a research paper based on a completed seminar paper and completion of a publishable research paper. Students must also complete 46 additional law units.

Doctoral Degree

Philosophy (PhD)

Application deadline: January 1

Course Requirements

The minimum number of course credits required for the PhD is 60 units. No more than 8 of these units may be from 590 courses and no more than 8 of these units may be from 400-level courses in the School of Philosophy. PHIL 450 or PHIL 452 do not count toward this maximum of 8 units of 400-level courses in the School of Philosophy. No more than 8 of these units may be earned in 794 Doctoral Dissertation. Each student must pass PHIL 450 or PHIL 452 with a grade of B or better and must pass both PHIL 500 and PHIL 503 with a grade of B+ or better. PHIL 450 or PHIL 452 and both PHIL 500 and PHIL 503 must be satisfactorily completed by the end of the second year.

The student may take up to two courses in a field of study related to philosophy. The PhD dissertation may be written in any area of philosophy for which adequate supervision is available from within the university. PhD students are also required to show evidence of practical or editorial training, or their equivalent.

Foreign Language/Research Tool Requirement

A foreign language examination, specified by the school, in French, German, Latin or classical Greek is required. The faculty may approve a replacement of the language requirement by a research tool requirement, consisting of an approved course or examination in a subject essential to the student's research program. The course or examination must be passed before the qualifying examination is attempted.

There are three levels of evaluation in the PhD program prior to the dissertation:

Distribution Requirement

There is a distribution requirement of six courses at the 500 level in the School of Philosophy, two each representing breadth within each of the following three areas: (1) metaphysics and epistemology (broadly construed, including philosophical logic; philosophy of science; philosophy of math, mind, and language), (2) value theory (broadly construed, including aesthetics, political philosophy, and the philosophy of law), and (3) pre-1879 history of philosophy. PHIL 500, PHIL 503 and PHIL 590 courses cannot count toward this requirement. Up to two 400-level courses may count by petition toward this requirement, provided that the departmental standards for graduate-level course work are met. For courses straddling two areas (for example, history of ancient philosophy and metaphysics; history of modern philosophy and

ethics), instructors will indicate on the syllabus which requirement the course will satisfy. Courses dealing with subject matter within more than one of the areas listed may be used to satisfy any of the areas encompassed by the course although no single course may be used to satisfy two requirements at once. The two courses within each distribution area must represent breadth, as determined in advance by the graduate adviser and in accordance with departmental guidelines. All distribution requirements must be completed by the end of the fifth semester.

Screening Procedure

Students in the PhD program must pass a screening procedure before undertaking their 25th unit (seventh course) of graduate credit. This will be based on a review of the student's work to date, and will take into account not only information acquired but also those intellectual qualities and capacities that are essential for good work in philosophy: the capacity to think and write on philosophical issues with clarity, consistency and thoroughness; the ability to understand in detail what is involved in the meaning and justification of philosophical claims or positions; the ability to recognize and to draw out fine conceptual distinctions and to perceive their logical relationships; and strong intellectual curiosity and independence of thought.

Student Reviews

Graduate student progress is reviewed on a regular basis each term. In addition, apart from the screening procedure, there are more formal reviews conducted at the end of the fourth and sixth semesters of study, as described below.

In the fourth semester of study, normally the spring of the second year, each student shall submit a journal-length paper in philosophy. The choice of papers should be made in consultation with the graduate adviser. The second year evaluation will be made on the basis of faculty review of the submitted paper and consideration of the student's total record.

For the review following the sixth semester of study, students are to select one from a list of pre-designated areas in philosophy and master the material on a pre-assigned reading list of important works in that area. At the beginning of the sixth semester, each student will take a written examination, designed by the faculty of the School of Philosophy, on the materials covered in the relevant reading list followed by an oral examination exploring their knowledge of the field. This examination must be passed by the end of the sixth semester. The examining committee for each student will consist of faculty conversant with the field and appointed by the school.

Qualifying Examination

This examination consists of a written prospectus of the proposed dissertation and an in-depth oral examination on the form and subject matter of the proposed dissertation. All faculty members may inspect the prospectus and be present at the oral, but evaluation of the qualifying examination is the responsibility of the student's qualifying exam committee. The examination is not passed if two or more members of the qualifying exam committee find it unsatisfactory.

The qualifying examination is not offered in the summer. Those who intend to take this examination must meet all the conditions specified in the section on general requirements for the PhD Students are expected to pass the qualifying exam by the end of the eighth semester. Students who have not passed the qualifying exam by the end of the eighth semester will be subject to faculty review, and may not be allowed to continue in the program.

Doctoral Dissertation

When the student passes the qualifying examination, a dissertation committee (see Graduate Advisement), replacing the qualifying exam committee, is appointed by the director of the school in consultation with the student and the philosophy faculty. Normally, the qualifying exam committee simply becomes the dissertation committee. This committee and the candidate will then agree upon how the dissertation is to be developed and written. The dissertation must be an original contribution to some well-defined area in philosophy, and must give evidence of the student's ability to do respectable, large-scale research, thinking, and writing in the field. The school requires the defense oral when the research and writing of the dissertation is substantially complete. Attendance at this oral examination is open to all members of the university faculty, but the examination is conducted and evaluated by the candidate's dissertation committee. The faculty normally works with the dissertations only in the fall and spring semesters, and the student should plan accordingly.

Physical Education

The Dornsife Physical Education program offers students a variety of opportunities to improve their general health and increase their level of physical fitness. Classes are designed in such a way that participants of all levels can benefit. Courses are designed to introduce various aspects of health and wellness principles through experiential learning. Our hands-on learning approach connects fundamental instruction with the application of skills that students can utilize beyond their tenure at the university. Courses are housed within the following divisions: Mind and Body program, Sports and Activities, Health and Fitness, and Outdoor and Safety.

Master Lecturer: Steve VanKanegan, MS
Senior Lecturers: Timothy L. Burton, MEd; Stephanie Eggert, MS; Steve Hsu, MS
Lecturers: Arthur Chivichyan, BA; Carl Collins; Salena Collins-Black; Ian Culbertson, BA; Amanda Gilbert, BA; JoAnna Hardy, BA; Natascha Grundmann, BA; Jennifer Guinter, MS; John Jessee, MS; Irina Jestkova; Clio Manuelian, BA; Isabelle Pilliere Mazumdar, BA; Sarah McGill, MS; Kevin Robinson, MS; David Romero, BS; William Slaughter, BA; Julie Sprague, MS; George Toney, JD; Jarvis Turner, MS; Linda Yaron, MeD

General Requirements

No more than 4 units of physical education *activity* courses may be applied to a student's overall unit requirement, toward his or her USC degree.

Registration in courses PHED 102a, PHED 102b–PHED 163 is contingent upon assessment of students' knowledge and competence in performance during the first two class meetings. Students who wear glasses while participating in vigorous activities must secure departmental approval of provisions made for eye protection in courses PHED 140a and PHED 140b. Course PHED 165 is reserved for students who are reporting for regular freshman or varsity athletic squads.

To obtain a prerequisite waiver to take a "b" class before having taken the "a" class, the instructor's approval and signature are needed. Students should be aware that in the future they cannot take the prerequisite course in the activity for credit after having it waived.

Physics and Astronomy

The Department of Physics and Astronomy offers the Bachelor of Science in Physics, Bachelor of Science in Astronomy, Bachelor of Science in Physics/Computer Science, Bachelor of Arts in Physics, Bachelor of Arts in Astronomy, Bachelor of Science in Biophysics, Bachelor of Science in Physical Sciences, a minor in physics and a minor in astronomy, Master of Science in Physics, Master of Arts in Physics, Master of Science in Physical Biology, a Doctor of Philosophy in Physics and a Doctor of Philosophy in Physical Biology.

Undergraduate Degrees

Grade Point Average in Major Subject

A GPA of C (2.0) or higher is required in all upper-division courses taken in the department for all of the above major degree programs. A grade of C (2.0) or higher is required in all courses in the department specifically listed as subject requirements.

Advisement

Advisement is required for all BS and BA degree candidates in the department. Students should meet with their departmental academic adviser at least once a semester to review the direction of their academic programs. Students who have not met with an adviser should contact the director of undergraduate affairs. Students are also encouraged to seek the advisement of faculty members whose specializations are appropriate to their intended field of graduate study.

Undergraduate Research Opportunities

Students are encouraged to become familiar with the research programs of the faculty in the department. Students who intend to pursue a PhD and a career in research in physics or astronomy following graduation are strongly encouraged to become involved directly in one of the research programs, whether as summer research assistants or as part-time laboratory assistants during the academic year. Specific research opportunities will depend upon individual faculty research programs.

Graduate Degrees

The Department of Physics and Astronomy offers graduate study at the master's and doctoral degree levels. The graduate program prepares students for professional careers in research, teaching and developmental applications of physics.

Entering students spend time in intensive course work providing a broad background in advanced physics regardless of degree objective. Subsequent study involves a mix of course work, practical training and independent research (depending on degree objective). The doctoral program affords exceptionally close collaboration between students and faculty.

Research Areas: Experimental, Theoretical and Computational

Opportunities for research are offered in atomic, molecular and optical/laser physics, astrophysics, biological physics, elementary particle theory, string theory, quantum field theory, earthquake physics, helioseismology, condensed matter physics, quantum electronics/nonlinear optics, space physics and ultralow temperature physics.

Degree Requirements

Graduate degrees in the Department of Physics and Astronomy are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and The Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Graduate study in physics is divided into these degree objectives:

- Master of Science and Master of Arts in Physics
- Master of Science in Physical Biology
- Doctor of Philosophy in Physics
- Doctor of Philosophy in Physical Biology

Bachelor's Degree

Astronomy (BA)

This program is intended for students with an interest in astronomy who may not intend to pursue a career in the field.

Required Lower-Division Courses

- MATH 125g Calculus I Units: 4
- MATH 126g Calculus II Units: 4

- MATH 226g Calculus III Units: 4
- MATH 245 Mathematics of Physics and Engineering I Units: 4
- PHYS 161Lg Advanced Principles of Physics I Units: 4 *
- PHYS 162L Advanced Principles of Physics II Units: 4 *
- PHYS 163L Advanced Principles of Physics III Units: 4 *
- PHYS 190 Physics Discovery Series Units: 1

Required Upper-Division Courses

- ASTR 400 The Solar System Units: 4, 2 years
- ASTR 422 Galaxies and Large-Scale Structures in the Universe Units: 4, 2 years
- ASTR 424 Cosmology Units: 4
- ASTR 450 Stellar Astrophysics Units: 4, 2 years
- PHYS 304 Mechanics Units: 4
- PHYS 316 Thermodynamics and Statistical Mechanics Units: 4
- PHYS 492L Senior Lab Units: 4

Total units: 57

*PHYS 151L, PHYS 152L and PHYS 153L may be substituted for the sequence PHYS 161L, PHYS 162L and PHYS 163L.

Astronomy (BS)

This program is intended primarily for students who are interested in a career in astronomy.

Required Lower-Division Courses

- MATH 125g Calculus I Units: 4
- MATH 126g Calculus II Units: 4
- MATH 226g Calculus III Units: 4
- MATH 245 Mathematics of Physics and Engineering I Units: 4
- PHYS 161Lg Advanced Principles of Physics I Units: 4 *
- PHYS 162L Advanced Principles of Physics II Units: 4 *
- PHYS 163L Advanced Principles of Physics III Units: 4 *
- PHYS 190 Physics Discovery Series Units: 1

Required Upper-Division Courses

- ASTR 400 The Solar System Units: 4, 2 years
- ASTR 422 Galaxies and Large-Scale Structures in the Universe Units: 4, 2 years
- ASTR 424 Cosmology Units: 4
- ASTR 450 Stellar Astrophysics Units: 4, 2 years
- MATH 445 Mathematics of Physics and Engineering II Units: 4
- PHYS 304 Mechanics Units: 4
- PHYS 316 Thermodynamics and Statistical Mechanics Units: 4
- PHYS 408a Electricity and Magnetism Units: 4
- PHYS 438a Introduction to Quantum Mechanics and its Applications Units: 4
- PHYS 438b Introduction to Quantum Mechanics and its Applications Units: 4
- PHYS 492L Senior Lab Units: 4

Total units: 73

*PHYS 151L, PHYS 152L and PHYS 153L may be substituted for the sequence PHYS 161L, PHYS 162L and PHYS 163L.

Biophysics (BS)

This program is intended for students with an interest in the interdisciplinary field of biophysics. The degree program provides the physics and biology background necessary for the field while simultaneously fulfilling medical school entrance requirements.

Required Lower-Division Courses

- BISC 120Lg General Biology: Organismal Biology and Evolution Units: 4
- BISC 220Lg General Biology: Cell Biology and Physiology Units: 4
- CHEM 115aLg Advanced General Chemistry Units: 4 *
- CHEM 115bL Advanced General Chemistry Units: 4 *
- MATH 125g Calculus I Units: 4
- MATH 226g Calculus III Units: 4
- MATH 245 Mathematics of Physics and Engineering I Units: 4
- PHYS 161Lg Advanced Principles of Physics I Units: 4 **
- PHYS 162L Advanced Principles of Physics II Units: 4 **
- PHYS 163L Advanced Principles of Physics III Units: 4 **
- PHYS 190 Physics Discovery Series Units: 1

Required Upper-Division Courses

- BISC 320Lg Molecular Biology Units: 4
- BISC 330L Biochemistry Units: 4

- PHYS 304 Mechanics Units: 4
- PHYS 316 Thermodynamics and Statistical Mechanics Units: 4
- PHYS 408a Electricity and Magnetism Units: 4
- PHYS 438a Introduction to Quantum Mechanics and its Applications Units: 4
- PHYS 444 Physical Biology: From Molecules to Cells Units: 4

Total units: 56

**PHYS 151L, PHYS 152L and PHYS 153L may be substituted for the sequence PHYS 161L, PHYS 162L and PHYS 163L.*
***PHYS 151L, PHYS 152L and PHYS 153L may be substituted for the sequence PHYS 161L, PHYS 162L and PHYS 163L.*

Physical Sciences (BS)

This program is intended for students with an interest in the physical sciences. The program is designed to allow students interested in teaching at the secondary level to enroll in courses required for the California Single Subject Teaching credential offered through the School of Education.

Required Lower-Division Courses

- CHEM 115aLg Advanced General Chemistry Units: 4 **
- CHEM 115bL Advanced General Chemistry Units: 4 **
- GEOL 105Lg Planet Earth Units: 4
- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4
- PHYS 153L Fundamentals of Physics III: Optics and Modern Physics Units: 4

Required Upper-Division Courses

- Astronomy elective* Units: 4
- Chemistry elective* Units: 4
- Earth Science elective* Units: 4
- Physics elective* Units: 4
- Three additional electives from these fields* Units: 12

Note:

**Upper-division courses must be applicable to majors in their respective departments.*
***CHEM 105aL, CHEM 105bL may be substituted for the sequence CHEM 115aL, CHEM 115bL.*

Other Courses

- MATH 125g Calculus I Units: 4
- MATH 126g Calculus II Units: 4
- MATH 226g Calculus III Units: 4

Total units: 64

Physics (BA)

This program is intended for students with an interest in physics who may not intend to pursue a career in physics.

Required Lower-Division Courses

- CHEM 105aLg General Chemistry Units: 4 **
- CHEM 105bL General Chemistry Units: 4 **
- MATH 125g Calculus I Units: 4

- MATH 126g Calculus II Units: 4

- PHYS 440 Introduction to Condensed Matter Physics Units: 4
- PHYS 492L Senior Lab Units: 4
- PHYS 493L Advanced Experimental Techniques Units: 4

Total units: 77

*PHYS 151L, PHYS 152L and PHYS 153L may be substituted for the sequence PHYS 161L, PHYS 162L and PHYS 163L.
**CHEM 105aL, CHEM 105bL may be substituted for the sequence CHEM 115aL, CHEM 115bL.

Physics/Computer Science (BS)

This program is intended for students with dual interests in physics and computer science who wish to complete the essential courses for both majors within their normal four-year career.

Required Lower-Division Courses

- CSCI 103L Introduction to Programming Units: 4
- CSCI 104L Data Structures and Object Oriented Design Units: 4
- CSCI 170 Discrete Methods in Computer Science Units: 4
- CSCI 201L Principles of Software Development Units: 4
- CSCI 270 Introduction to Algorithms and Theory of Computing Units: 4
- MATH 125g Calculus I Units: 4
- MATH 126g Calculus II Units: 4
- MATH 225 Linear Algebra and Linear Differential Equations Units: 4
- MATH 226g Calculus III Units: 4
- MATH 245 Mathematics of Physics and Engineering I Units: 4
- PHYS 161Lg Advanced Principles of Physics I Units: 4 *
- PHYS 162L Advanced Principles of Physics II Units: 4 *
- PHYS 190 Physics Discovery Series Units: 1

Required Upper-Division Courses

- CSCI 350 Introduction to Operating Systems Units: 4
- EE 352L Computer Organization and Architecture Units: 3
- MATH 445 Mathematics of Physics and Engineering II Units: 4
- PHYS 304 Mechanics Units: 4
- PHYS 408a Electricity and Magnetism Units: 4
- PHYS 408b Electricity and Magnetism Units: 4
- PHYS 438a Introduction to Quantum Mechanics and its Applications Units: 4
- PHYS 438b Introduction to Quantum Mechanics and its Applications Units: 4
- PHYS 495 Senior Project Units: 2

Total units: 81

**PHYS 151L and 152L may be substituted for PHYS 161L and 162L respectively.

Minor

Astronomy Minor

The astronomy minor is open to all students. A minimum of three courses taken toward the minor must be unique to the minor.

Required Courses (24 Units)

- MATH 125g Calculus I Units: 4
- MATH 126g Calculus II Units: 4
- MATH 226g Calculus III Units: 4
- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4
- PHYS 153L Fundamentals of Physics III: Optics and Modern Physics Units: 4

Elective - Choose 3 (12 Units)

- ASTR 400 The Solar System Units: 4, 2 years
- ASTR 422 Galaxies and Large-Scale Structures in the Universe Units: 4, 2 years
- ASTR 424 Cosmology Units: 4
- ASTR 450 Stellar Astrophysics Units: 4, 2 years

Total units: 36

Physics Minor

The physics minor is open to all students. Engineering students must take a minimum of three upper-division courses unique to the minor.

Required Courses (28 Units)

- MATH 125g Calculus I Units: 4
- MATH 126g Calculus II Units: 4
- MATH 226g Calculus III Units: 4
- MATH 245 Mathematics of Physics and Engineering I Units: 4
- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4
- PHYS 153L Fundamentals of Physics III: Optics and Modern Physics Units: 4

Electives - Choose 3 (12 Units)

- PHYS 304 Mechanics Units: 4
- PHYS 316 Thermodynamics and Statistical Mechanics Units: 4
- PHYS 408a Electricity and Magnetism Units: 4
- PHYS 438a Introduction to Quantum Mechanics and its Applications Units: 4

Total units: 40

Master's Degree

Physical Biology (MS)

The Master's Program in Physical Biology is designed for students who have backgrounds in physics, chemistry, biology, mathematics and engineering, and who are motivated to pursue training in biophysical research that emphasizes theoretical, computational, and experimental methods. The training faculty in the program includes faculty members from multiple departments at USC who have research programs in areas including structural biology, neuroscience, membrane biophysics, cellular biophysics and theoretical biophysics. Students are usually admitted to the program on the research-based thesis track; however, in special circumstances applications to the non-thesis track will be considered.

Admission

Applicants to the program will normally have earned a bachelor's degree and completed course work in mathematics (including calculus), physics, chemistry and biology. To be considered, applicants must complete a USC Graduate Admissions application and submit either GRE or MCAT test scores, a brief personal statement explaining the reasons for applying to the program, a brief statement regarding previous laboratory experience, official transcripts from all academic institutions previously attended, and three letters of recommendation. Foreign applicants are required to submit results from a TOEFL or IELTS examination. In the personal statement, applicants must specify whether they are applying to the thesis- or non-thesis track and the reasons for that choice. Normally, admission will be in the thesis track and a recommendation to admit an applicant will require Executive Committee approval of an agreement between an applicant and a faculty member who will serve as mentor of the thesis project. The agreement shall specify the general research area of the thesis. Prior to submission of a formal application, applicants may submit basic documentary information to determine how their credentials compare to expectations for admission.

The Physical Biology Master's program participates in Progressive Master's Degree Programs and seeks applications from qualified students (undergrad.usc.edu/programs/progressive/).

Continued enrollment

Continued enrollment in the program requires an average GPA of at least 3.0, and a "Pass" or "Credit" in all non-graded courses. At any time, after evaluating a student's progress, the MBPH Executive Committee, at its discretion, may require a student to pass a screening examination to be eligible to progress to the third or later semester of graduate study. If a student fails to achieve these metrics or pass a screening examination, the Executive Committee will make a recommendation as to whether or not to place the student on probationary enrollment with a defined remediation sufficient to remedy the deficiency or to recommend the student withdraw or be dismissed from the program.

Thesis track:

A three-member Guidance Committee will advise each student and monitor the progress of thesis work of each student in the thesis track. The Guidance Committee shall consist of at least:

1. the student's adviser who shall chair the committee and be a tenure-track member of the Graduate Committee;
2. the student's thesis mentor, if not the same faculty member as the adviser;
3. one (or two) additional members of the Graduate Committee.

Final examination

Passing the final examination requires: 1) submission of an acceptable thesis document describing the work of the thesis, and 2) an oral defense of the thesis. The Thesis Committee will administer the final examination. The composition of the Thesis Committee and the Guidance Committee may be the same. The thesis document shall be distributed to the student's Master's Thesis Committee and a copy provided to the Graduate Program Office at least two weeks prior to the oral examination. If the document is not provided by that date, then the oral examination shall be rescheduled to accommodate this requirement. Final acceptance of the document and passage of the oral examination requires the unanimous recommendation of all members of the Thesis Committee. If the student does not pass the examination on the first attempt, at its discretion the Executive Committee may grant a second opportunity to pass the examination according to policies in the *USC Catalogue*.

Non-thesis track:

Final Examination. A comprehensive examination replaces the thesis defense. The Executive Committee shall appoint a member of the Graduate Committee to supervise the final examination process (the "Examination Supervisor"). The examination shall be on a topic approved by the Examination Supervisor and shall consist of: 1) a document discussing the topic in sufficient detail, and 2) passing an oral examination on the substance of the topic. The document shall be submitted to the Examination Supervisor at least two weeks prior to the oral examination. If the document is not provided by that date, then the oral examination shall be rescheduled to accommodate this requirement. To qualify as the final examination, all the faculty of the Graduate Committee shall be invited to attend the presentation with notice given at least two weeks in advance and at least three members of the Graduate Committee or alternates selected by the program director shall attend.

During and following the presentation, faculty members may pose questions relevant to the presentation to determine if the student has mastered an appropriate breadth and depth of knowledge of biophysics. The Examination Supervisor shall then receive reports from faculty attending the presentation, usually within a week, and make a recommendation to the Graduate Committee as to whether or not the student passed the examination. Unless a member of the Graduate Committee objects, the recommendation shall be considered accepted. If an objection is received a decision shall be made by a secret ballot vote with two thirds of those voting in favor of passage required for passage of the examination. If the student does not pass the examination on the first attempt, at its discretion the Graduate Committee may grant a second opportunity to pass the examination according to policies in the *USC Catalogue*.

Required Courses

- CHEM 519 Biochemistry and Molecular Biology: An Introduction for Chemists Units: 4
  or
- CHEM 520a Advanced Chemical Biology Units: 2 and
- CHEM 520b Advanced Chemical Biology Units: 2
- CHEM 540 Introduction to Statistical Mechanics Units: 4
  or
- PHYS 518 Thermodynamics and Statistical Mechanics Units: 3

- PHYS 500 Graduate Colloquium Units: 1 (4 units required)
- PHYS 690 Introduction to Physical Biology Units: 3

Electives

In addition to the elective courses listed below, relevant 500- and 400-level courses may fulfill elective requirements with approval from the student's research adviser in consultation with the Program Committee. Given the interdisciplinary nature of this program, it is likely that the relevant elective courses will evolve over time. A maximum of 4 units may be taken from approved 400-level courses. The balance of the required units from Research Courses (PHYS 590).

- BISC 576 Practical Statistics and Bioinformatics Units: 2
- BISC 577a Computational Molecular Biology Laboratory Units: 2
- BISC 577b Computational Molecular Biology Laboratory Units: 2
- CHEM 521 Basic Principles of Physical Methods in Biochemistry Units: 2
- CHEM 538 Mathematical Techniques of Physical Chemistry Units: 4
- INTD 549 Protein Chemistry — Structure and Function Units: 4
- MPHY 572 Medical Physiology I Units: 4
- MPHY 573 Medical Physiology II Units: 4
- PHBI 650 Mechanisms of Ion and Solute Transport Across Cell Membranes Units: 2
- PHBI 651 Molecular Modeling and Kinetic Simulations in Membrane Transport Units: 2
- PHYS 504 Advanced Mechanics Units: 3
- PHYS 508a Advanced Electricity and Magnetism Units: 3
- PHYS 516 Methods of Computational Physics Units: 3
- PHYS 520 Methods for Complex Systems Units: 3
- PHYS 558a Quantum Mechanics Units: 3 and
- PHYS 558b Quantum Mechanics Units: 3
  or
- CHEM 544 Introduction to Quantum Chemistry Units: 4

Minimum Required Units: 24

Physics (MA)

Admission Requirements

The prerequisite for admission for a master's degree in the Department of Physics and Astronomy is a bachelor's degree in physics or a related field. All applicants for admission must take the Graduate Record Examinations, including the Physics Subject Test. Transcripts of undergraduate records as well as transcripts of any graduate level courses are required. The TOEFL or IELTS is required of international students applying for a teaching assistantship as well as for those applying for admission only. Applicants may be admitted as a degree candidate at the beginning of fall or spring semester.

Residence

All MS and MA degree students normally take at least three courses for each of two semesters. A total of 24 units of credit is required for graduation. Admitted students may transfer a maximum of 4 units of credit to apply toward the degree requirements.

Foreign Language Requirement

There is no foreign language requirement for the MS or MA

Course Requirements

Option A MS in Physics: The MS degree requires satisfactory completion of seven courses (exclusive of PHYS 500 and PHYS 594), of which no more than one course may be PHYS 590 Directed Research. In addition, satisfactory completion of a thesis (and 4 units of PHYS 594) is required.

Option B MA in Physics: The MA degree requires satisfactory completion of eight courses (exclusive of PHYS 500 and PHYS 590) plus a high level of performance on the comprehensive examination.

The required courses for either option are PHYS 504, PHYS 508a and PHYS 558a. For either option at least five courses must be at the 500 level or higher and remaining courses at the 400 level or higher; at least five courses must be in physics. All required physics courses must be passed with a grade of B- or better. No upper-division courses required for the BA in physics at USC may be counted for credit toward the MA or MS degree.

Comprehensive Examination

All master's degree candidates are required to take the departmental screening examination not later than during their second semester (excluding summer). This examination serves as the required comprehensive examination for the MA degree. A high level of performance is required for the MA degree, and a superior level is required for admission to (or continuation in) the PhD program.

Physics (MS)

Admission Requirements

The prerequisite for admission for a master's degree in the Department of Physics and Astronomy is a bachelor's degree in physics or a related field. All applicants for admission must take the Graduate Record Examinations, including the Physics Subject Test. Transcripts of undergraduate records as well as transcripts of any graduate level courses are required. The TOEFL or IELTS is required of international students applying for a teaching assistantship as well as for those applying for admission only. Applicants may be admitted as a degree candidate at the beginning of fall or spring semester.

Residence

All MS and MA degree students normally take at least three courses for each of two semesters. A total of 24 units of credit is required for graduation. Admitted students may transfer a maximum of 4 units of credit to apply toward the degree requirements.

Foreign Language Requirement

There is no foreign language requirement for the MS or MA

Course Requirements

Option A MS in Physics: The MS degree requires satisfactory completion of seven courses (exclusive of PHYS 500 and PHYS 594), of which no more than one course may be PHYS 590 Directed Research. In addition, satisfactory completion of a thesis (and 4 units of PHYS 594) is required.

Option B MA in Physics: The MA degree requires satisfactory completion of eight courses (exclusive of PHYS 500 and PHYS 590) plus a high level of performance on the comprehensive examination.

The required courses for either option are PHYS 504, PHYS 508a and PHYS 558a. For either option at least five courses must be at the 500 level or higher and remaining courses at the 400 level or higher; at least five courses must be in physics. All required physics courses must be passed with a grade of B- or better. No upper-division courses required for the BA in physics at USC may be counted for credit toward the MA or MS degree.

Comprehensive Examination

All master's degree candidates are required to take the departmental screening examination not later than during their second semester (excluding summer). This examination serves as the required comprehensive examination for the MA degree. A high level of performance is required for the MA degree, and a superior level is required for admission to (or continuation in) the PhD program.

Doctoral Degree

Physical Biology (PhD)

The interface between physics and biology is experiencing a revolution much like the one experienced by 17th century astronomers. Then, like now, new quantitative techniques allowed unprecedented observations, which in turn demanded quantitative

reasoning. Galileo's approach subjected the laws of motion to a unique blend of experiment and theory, before finally being placed in a predictive mathematical context. This style of inquiry, long favored by physicists, is now being applied to the biological sciences with increasing frequency. New experimental tools are elucidating phenomena ranging from the forces experienced by single biomolecules to the complex regulatory networks of gene expression, and the target biophysical problems range from the metabolism of individual cells to the dynamics of entire populations. The power of this physics-based approach is now widely recognized as essential for approaching all grand challenges in the biological sciences, from combating cancer to unraveling the mysteries of the brain.

Motivated by the promise of this approach at the physics/biology interface, the PhD program in Physical Biology integrates biophysical research experience leading to a dissertation with state-of-the art curriculum that (i) introduces molecular and cell biology to quantitatively minded students; (ii) presents a rigorous treatment of the physical principles underlying biological phenomena; and (iii) emphasizes the emerging physical methods that has transformed the biological sciences into a quantitative discipline. While distinct in its intellectual focus from existing graduate programs at USC, this program harnesses the critical mass of research-active biophysicists in multiple departments (physics, biological sciences, chemistry, multiple engineering departments, and the Keck School of Medicine of USC.

The Physical Biology (PBIO) PhD program is designed for graduate students who seek a quantitative framework for understanding the physical principles of biological organization and function. These students may have backgrounds from physics, engineering, mathematics and chemistry, but seek to wield their quantitative skills in the basic or applied life sciences. The program is also for students with training in the biological sciences looking for training and research opportunities grounded the physical sciences. and who seek a fundamental understanding of biological systems not emphasized in PhD programs associated with departments of biology, medicine, bioinformatics, or engineering. Graduates will likely move onto careers including medicine, pharmaceuticals and biotechnology, as well as career opportunities open to graduates with training in the physical sciences. Graduates may also pursue academic positions in the growing area of biophysics.

Admission Requirements:

Admission decisions will be made by the Department of Physics and Astronomy's Graduate Admissions Committee, which will be advised by the PBIO Program Committee (including representatives from other departments). The prerequisite for admission to the Physical Biology (PBIO) PhD program is a bachelor's (or master's) degree in physics, chemistry, biological sciences, engineering or a related field that stresses quantitative training. Successful applicants will have completed undergraduate course work in mathematics (including calculus), physics, chemistry and biological sciences. All applicants for admission must take the Graduate Record Examination (GRE). Transcripts of undergraduate records as well as transcripts of any graduate-level courses are required. The TOEFL or IELTS is required of international students applying for a teaching assistantship as well as for those applying for admission only. Applicants may be admitted to the program at the beginning of the fall or spring semester.

Potential applicants are encouraged to inquire about the program by contacting one or more members of the PBIO Program Committee prior to submitting the online application. In addition to the required test scores, as appropriate, applicants will submit a detailed personal statement explaining the reasons for applying to the PBIO Program, description of previous or ongoing research, and three letters of recommendation. Applicants who are deficient in some areas may be required to remedy the deficiencies as a condition of admittance to the program.

A minimum of 60 units is required.

Required Courses

- CHEM 519 Biochemistry and Molecular Biology: An Introduction for Chemists Units: 4
  or
- CHEM 520a Advanced Chemical Biology Units: 2 and
- CHEM 520b Advanced Chemical Biology Units: 2
- CHEM 540 Introduction to Statistical Mechanics Units: 4
  or
- PHYS 518 Thermodynamics and Statistical Mechanics Units: 3
- PHYS 500 Graduate Colloquium Units: 1 (4 units required)
- PHYS 690 Introduction to Physical Biology Units: 3

Elective Courses

Nine units minimum required.

- BIOC 522 Applications of Physical Methods in Biochemistry Units: 2
- BISC 576 Practical Statistics and Bioinformatics Units: 2
- BISC 577a Computational Molecular Biology Laboratory Units: 2
- BISC 577b Computational Molecular Biology Laboratory Units: 2
- CHEM 521 Basic Principles of Physical Methods in Biochemistry Units: 2
- CHEM 538 Mathematical Techniques of Physical Chemistry Units: 4
- CHEM 544 Introduction to Quantum Chemistry Units: 4
  or
- PHYS 558a Quantum Mechanics Units: 3 and
- PHYS 558b Quantum Mechanics Units: 3
- INTD 549 Protein Chemistry — Structure and Function Units: 4
- MPHY 572 Medical Physiology I Units: 4
- MPHY 573 Medical Physiology II Units: 4
- PHBI 650 Mechanisms of Ion and Solute Transport Across Cell Membranes Units: 2
- PHBI 651 Molecular Modeling and Kinetic Simulations in Membrane Transport Units: 2
- PHYS 504 Advanced Mechanics Units: 3
- PHYS 508a Advanced Electricity and Magnetism Units: 3
- PHYS 516 Methods of Computational Physics Units: 3
- PHYS 520 Methods for Complex Systems Units: 3

Note:

In addition to the elective courses listed above, relevant 500- and 400-level courses may fulfill the electives required after approval by the student's research adviser in consultation with the PBIO Program Committee. Given the interdisciplinary nature of this program, it is likely that the relevant elective courses will evolve over time. A maximum of 4 units may be taken from approved 400-level courses. The balance of the required units are from research and dissertation (PHYS 590, PHYS 790, PHYS 794a through PHYS 794z).

Graduate students in the program may serve as Teaching Assistants, but time as a TA is not a requirement for the degree of PhD.

Finding a Faculty Adviser

Given the interdisciplinary nature of the research interests of students coming to the program, graduate students will have research group rotations as part of the first year of the program. Each student will rotate with at least two different research groups. Rotations will begin in September and each will last six weeks. Rotation 1 and 2 will occur in the fall semester and rotation 3 will occur in the spring semester. Each student should have a tentative faculty adviser before the Screening Procedure.

Screening Procedure

The screening requirements designated for continuation in Physical Biology PhD program are: before the third semester of course work the student has demonstrated satisfactory progress towards the degree, to be determined in consultation with the

Program Director and an appointed faculty adviser; and an overall grade point average of B or better in at least 22 total units by the end of the fourth semester of course work (with no single grade lower than B-, as indicated above).

Only students who have passed the screening requirements are allowed to take the qualifying examination. Students who do not pass the qualifying exam may opt to continue their course work (as specified in the physics graduate program) toward a Master's Degree in Physics.

Qualifying Examination

The qualifying examination requires the presentation (and oral defense) of a critical review of a scientific article and a research proposal prepared by the student on the area in which the student intends to do a doctoral dissertation. The qualifying exam will be taken in the fifth semester.

The written critical review and research proposal are submitted to the committee at least one week prior to a meeting with the committee where an oral examination expands on the written parts. The qualifying examination is administered by the four-member qualifying exam committee, which is composed of the research adviser, two other members of the program, and one member from outside the program.

Language Requirement

Students in the Physical Biology PhD program are not required to pass a foreign language examination.

Dissertation and Dissertation Defense

The dissertation committee consists of three members of the qualifying exam committee including the research adviser and the outside member. An acceptable dissertation based upon completion of an original research investigation is required for the PhD in Physical Biology. The candidate must defend an approved draft of the dissertation in a public oral defense. The dissertation committee will then meet with the student in a closed session to complete the oral examination. The candidate must be prepared to answer general questions in the field as well as specific questions regarding the dissertation. Upon successful completion of the defense, the PhD in Physical Biology is awarded.

Physics (PhD)

Application deadline: January 1

Admission Requirements

The prerequisite for admission to the doctoral program in the Department of Physics and Astronomy is a bachelor's (or master's) degree in physics or related field. All applicants for admission must take the Graduate Record Examinations, including the Physics Subject Test. Transcripts of undergraduate records as well as transcripts of any graduate-level courses are required. The TOEFL or IELTS is required of international students applying for a teaching assistantship as well as for those applying for admission only. Applicants may be admitted to the program at the beginning of the fall or spring semester.

Residence

PhD students in physics normally enroll in three courses for each of the first four semesters in graduate school. A total of 60 units of credit is required for graduation. Students admitted to the PhD program may transfer a maximum of 30 units of credit to apply toward degree requirements. For students admitted with Advanced Standing (entry with an appropriate completed graduate degree from an accredited institution), a minimum of 36 units of course work beyond that graduate degree, exclusive of PHYS 794a and PHYS 794b, will be required.

Foreign Language Requirement

There is no foreign language requirement for the PhD.

Course Requirements

The student is expected to have prepared for understanding all branches of physics. The required courses for the PhD are (1) the following seven core courses: PHYS 504, PHYS 508a, PHYS 508b, PHYS 510, PHYS 518, PHYS 558a, and PHYS 558b; (2) a minimum of four elective graduate courses in Physics and Astronomy (or with departmental approval in related departments); (3) four units of PHYS 500; and (4) PHYS 794a and PHYS 794b. All required physics courses (except PHYS 500 and PHYS 794a, PHYS 794b, PHYS 794c, PHYS 794d, and PHYS 794z) must be passed with a grade of B- or better. After passing the qualifying examination the student must register for PHYS 794a, PHYS 794b, PHYS 794c, PHYS 794d, or PHYS 794z Doctoral Dissertation each fall and spring semester.

Screening Procedure

Any student proceeding toward the PhD in physics must pass the departmental screening examination at a superior level. The exam must be taken not later than during the second semester (excluding summers, but including time in the MA/MS program) in the department. New advanced students who have passed an equivalent comprehensive examination at a well-recognized research university with superior grades may apply to the departmental examination committee for an oral interview in order to be exempted from the written screening examination. A faculty member who supervises the research of such a student in the department must support this application.

Qualifying Exam Committee

The graduate adviser serves as adviser to incoming students and assists in the appointment of the qualifying exam committee, which is formed after the screening examination has been passed. After the student passes the qualifying examination and a dissertation topic is approved, the five-member qualifying exam committee becomes known as the dissertation committee and is responsible for monitoring the candidate's progress and for approving the final content and form of the dissertation.

Qualifying Examination

The qualifying examination must be attempted not later than during the seventh semester (or in the case of advanced students, the fifth semester) in the department (excluding summer). The PhD qualifying examination contains a written part and an oral part. The written part consists of a critical review by the student of a published work selected by the qualifying exam committee and of a research proposal prepared by the student on the area in which the student intends to do a doctoral dissertation. The oral part expands on the written part.

Dissertation

A doctoral dissertation in physics is expected to be an extensive description of original research carried out by the student. A complete discussion of reported research in relation to previous work by others is essential.

Defense of the Dissertation

The dissertation must be defended in a final oral examination. The candidate must be prepared to answer general questions in the field as well as specific questions regarding the dissertation.

Core Courses

- PHYS 504 Advanced Mechanics Units: 3
- PHYS 508a Advanced Electricity and Magnetism Units: 3
- PHYS 508b Advanced Electricity and Magnetism Units: 3
- PHYS 510 Methods of Theoretical Physics Units: 3
- PHYS 518 Thermodynamics and Statistical Mechanics Units: 3
- PHYS 558a Quantum Mechanics Units: 3
- PHYS 558b Quantum Mechanics Units: 3

Electives

A minimum of four elective graduate courses in Physics and Astronomy (or, with departmental approval, in related departments)

Colloquium

- PHYS 500 Graduate Colloquium Units: 1

Dissertation

- PHYS 794a Doctoral Dissertation Units: 2
- PHYS 794b Doctoral Dissertation Units: 2

Political Science

The Department of Political Science and International Relations offers: the BA in Political Science; minors in political science; law and society; race, ethnicity and politics; human rights; and practical politics.

The Political Science major combines study of the foundations of political systems and institutions with examination of public attitudes, participation and behavior. The major allows students to acquire an in-depth understanding of citizens' relationship to government while developing critical thinking and research skills.

The Political Science major offers courses in four broad fields: American politics, political thought, comparative politics, and law and public policy. Faculty provide regional specialization in Latin America, East Asia, Western Europe, Russia and Eastern Europe, the Middle East, and Africa.

The Political Science major also offers eight concentrations, allowing students to develop expertise in the areas of: applied politics; cross national and regional politics; environmental politics; law and human rights; parties, interest groups, and institutions; political thought and philosophy; public opinion, communication, and decision-making; and race, gender, and the politics of justice.

The Center for the Political Future/Jesse M. Unruh Institute of Politics offers students traditional internship opportunities with governmental and nongovernmental organizations as well as research internship opportunities as part of the political science program of study.

Center for International and Public Affairs, CPA 327

Faculty: see Political Science and International Relations

Undergraduate Degrees

Advisement

The department has faculty and staff advisers who provide academic advisement, career counseling and advisement to pre-law students and those wishing to go on to graduate studies. All majors are encouraged to see their adviser.

Political Science Honors Program

The department offers an honors program for outstanding undergraduate students in the junior and senior years. The two semester program emphasizes a specialized topic (a different area each year) in political science. The organization of the course during the first semester follows the seminar model, emphasizing independent research, discussion, and oral and written reports. In the second semester, the student is required to write a thesis under the direction of a faculty member. Students are admitted to the program after careful screening on the basis of their academic record and a personal interview. Classes are limited to about 10 students.

The department also offers an honors sequence for freshmen and sophomores, POSC 190a, POSC 190b. The first semester is a small seminar of about 10 students. The second semester is a continuation with a major research paper due as the final.

Political Science Honor Societies

There are two honor societies of special interest to political science majors. Pi Sigma Alpha stimulates scholarship and interest in the subject of government by providing tangible recognition to students who have excelled in the field. Political science majors are eligible to join after successful completion of at least three upper-division courses in political science. An overall grade point average of 3.5 or higher is required, with a minimum of 3.5 in all political science classes.

The second honor society is Blackstonians. This is a pre-law honor society for undergraduate students designed to recognize academic excellence, assist the student in his or her preparation for law school, and expand the knowledge of the legal profession. Membership is restricted to students who have completed at least 32 units (16 of which must be from USC), but not more than 118 units, and have maintained at least a 3.5 grade point average.

Mock Trial Team

The department hosts the USC Mock Trial Team. This trial advocacy training program is designed to develop students' knowledge of substantive areas of civil law, criminal law and evidence. Additionally, public speaking skills are honed and societal mores are explored. Legal concepts, sociocultural theory and presentational skills are then applied through participation in courtroom advocacy competitions nationwide and local public interest advocacy assignments. Academic credit is earned through POSC 398. Membership on the team is required to enroll.

Graduate Degrees

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and The Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

All graduate students are required to maintain regular contact with the graduate coordinator to assure compliance with departmental regulations.

Bachelor of Arts

Political Science (BA)

Department majors are required to take ten courses (40 units) in political science.

Introductory Courses Requirement

All students must take at least two of the following four 100-level core courses that introduce students to the major sub-fields of political science (American, Comparative, Law and Public Policy, Political Thought).

- POSC 100g Theory and Practice of American Democracy Units: 4
- POSC 110g Ideology and Political Conflict Units: 4
- POSC 120 Comparative Politics Units: 4
- POSC 130g Law, Politics and Public Policy Units: 4

Distribution (Field) Requirement

Students fulfill the distribution requirement by completing one upper division course (300 level or above) in three of the four major sub-fields (American, Comparative, Law and Public Policy, Political Thought).

American Politics
POSC 300, POSC 311, POSC 315, POSC 320, POSC 321, POSC 323, POSC 325, POSC 328, POSC 334, POSC 335, POSC 418, POSC 420, POSC 421, POSC 422, POSC 423, POSC 424m, POSC 425, POSC 427, POSC 428, POSC 437, POSC 439, POSC 449

Comparative Politics
POSC 350, POSC 351, POSC 352, POSC 354, POSC 355, POSC 356, POSC 358, POSC 360, POSC 363, POSC 365, POSC 366, POSC 430, POSC 431, POSC 450, POSC 451, POSC 453, POSC 456, POSC 463, POSC 464, POSC 469

Law and Public Policy
POSC 333, POSC 340, POSC 345, POSC 347, POSC 426, POSC 432, POSC 435, POSC 436, POSC 440, POSC 441m, POSC 442m, POSC 443, POSC 444, POSC 448a, POSC 448b, POSC 452

Political Thought
POSC 370, POSC 371, POSC 374, POSC 375, POSC 377, POSC 380, POSC 381, POSC 476, POSC 479

Concentration Requirement

Students fulfill the concentration requirement by taking three courses from one of eight Concentrations that focus on major topical interests in the study of politics. Students may take no more than one 200-level course per concentration. Students may not double-count any courses taken in the distribution (field) requirement and the concentration requirement. No more than a total of four units of POSC 395 and POSC 398L can count for the concentration requirement. Four units of the Honors Seminars POSC 391/POSC 392 can count toward a concentration if the topic of the honors thesis is in the area of the concentration. Critical Issues courses may count for a concentration area, but department approval must be received in advance.

The areas of concentration are:

Law and Human Rights (POSC 248gw, POSC 321, POSC 340, POSC 345, POSC 347, POSC 366, POSC 421, POSC 425, POSC 426, POSC 427, POSC 432, POSC 440, POSC 441m, POSC 442m, POSC 443, POSC 444, POSC 448a, POSC 448b, POSC 452)

Public Opinion, Communication, and Decision Making (POSC 311, POSC 334, POSC 335, POSC 422, POSC 423, POSC 426, POSC 435, POSC 437, POSC 449)

Parties, Interest Groups, and Institutions (POSC 300, POSC 311, POSC 315, POSC 325, POSC 334, POSC 335, POSC 360, POSC 420, POSC 423, POSC 425, POSC 428, POSC 435, POSC 436)

Political Thought and Philosophy (POSC 370, POSC 371, POSC 374, POSC 375, POSC 377, POSC 380, POSC 381, POSC 476, POSC 479)

Applied Politics (POSC 300, POSC 315, POSC 323, POSC 335, POSC 395, POSC 398L, POSC 418, POSC 420, POSC 425, POSC 437, POSC 449)

Cross-National and Regional Politics (POSC 350, POSC 351, POSC 352, POSC 354, POSC 355, POSC 356, POSC 358, POSC 360, POSC 363, POSC 365, POSC 366, POSC 430, POSC 431, POSC 450, POSC 451, POSC 453, POSC 456, POSC 463, POSC 464, POSC 469)

Race, Gender, and Politics of Justice (POSC 320, POSC 321, POSC 328, POSC 381, POSC 421, POSC 424m, POSC 427, POSC 428, POSC 432, POSC 441m, POSC 442m, POSC 444, POSC 448a, POSC 449)

Environmental Politics (POSC 265gw, POSC 270, POSC 321, POSC 347, POSC 363, POSC 418, POSC 436, POSC 451, POSC 456)

Elective Requirement

Students must complete two additional elective courses, both of which must be upper division (300 or 400 level courses). One course (or four units) of the following courses: POSC 395, POSC 398L or POSC 490x may be counted as an elective. In addition, one of the Honors Seminars (4 units of POSC 391/POSC 392) can count as an elective.

Students who have a double major in political science and in another department in the social sciences, may, with prior permission of the department undergraduate adviser, substitute one upper-division course from the second major for one upper-division political science course. In the development of an undergraduate program, students should consult periodically with the political science undergraduate adviser and/or with departmental faculty.

Minor

Human Rights Minor

The protection of human rights has become a matter of international concern. Despite widespread media coverage of violations, flagrant abuses occur daily throughout the world. The human rights minor provides students with in-depth knowledge about various human rights issues.

Drawing together classes from a range of departments in and outside the USC Dornsife College of Letters, Arts and Sciences, this interdisciplinary minor will cover the theoretical foundations of human rights, historical and current developments, case studies and policies. Students will be required to take their learning outside the classroom through an internship or by teaching human rights in the community and will be encouraged to join relevant student organizations.

Total unit requirements for the minor are 18*. Students take one core course in human rights, POSC 248gw Human Rights. In addition, the minor requires two courses dealing with international human rights, one domestic human rights related course and a community involvement experience through the Department of Political Science.

Required Courses (16 units)

- POSC 248gw Human Rights Units: 4

Two international human rights courses selected from:

- ANTH 330m Culture, Gender and Politics in South Asia Units: 4
- HIST 456 Race, Slavery, and the Making of the Atlantic World Units: 4
- HIST 365 The Second World War Units: 4, 2 years
- IR 310 Peace and Conflict Studies Units: 4
- IR 315 Ethnicity and Nationalism in World Politics Units: 4
- IR 316 Gender and Global Issues Units: 4
- IR 318 Violent Conflict Units: 4
- IR 325 North-South Relations in the Global Economy Units: 4
- POSC 366 Terrorism and Genocide Units: 4
- POSC 440 Comparative Law and the Judicial Process Units: 4
- POSC 456 Women in International Development Units: 4
- PPD 382 International Development Units: 4
- REL 335 Gender, Religion, and Sexuality Units: 4

One domestic human rights course selected from:

- AMST 348m Race and Environmentalism Units: 4
- COMM 412 Communication and Social Movements Units: 4
- FREN 370gm Equality and Difference around the Enlightenment Units: 4
- GERO 435m Women and Aging: Psychological, Social and Political Implications Units: 4
- JOUR 466m People of Color and the News Media Units: 4
- POSC 333 Stigma and Society: Physical Disability in America Units: 4
- POSC 380 Political Theories and Social Reform Units: 2, 4
- POSC 441m Cultural Diversity and the Law Units: 4
- POSC 444 Civil and Political Rights and Liberties Units: 4
- PPD 342 Crime and Public Policy Units: 4
- PPD 439 Housing and Community Development Units: 4
- SOCI 356m Mexican Immigrants in Sociological Perspective Units: 4
- SOCI 360m Social Inequality: Class, Status and Power Units: 4

Additional Requirements

Community Involvement (2 units)

Students are required to take their learning outside the classroom through an internship with a focus in human rights, teaching human rights in the community or an independent project. Students who choose the internship must enroll in POSC 395 and those who choose do an independent project must enroll in POSC 490x. Approval is needed to enroll in POSC 395 and POSC 490x. *Political Science majors must take four courses (16 units) outside of the Political Science Department for a total of 22 units.

Law and Society Minor

This interdisciplinary program focuses on the effect of law on society as well as the ways in which social forces influence the legal system. The idea is that students will understand the law if they look beyond "law on the books" to "law in action." Thus, it is important to study key legal institutions such as the

legal profession, the judiciary, juries, the police, legislatures and administrative agencies. In addition, the minor introduces students to legal policies like plea bargaining and the death penalty, and the constitutional principles that underlie political debates about them, e.g., equal protection, due process and privacy.

The requirements for the minor include seven courses (28 units), including at least four upper-division courses (16 units). All students are required to take POSC 130 Law, Politics, and Public Policy.

Requirements

The Law and Society Minor requires seven courses (28 units), including at least four upper-division courses (16 units). All students must take the Core class. In addition, three political science upper-division courses are required, one each from categories 2, 3 and 4. Three elective courses are required: choose one course from category 5 and choose two courses from category 6.

1. Core

- POSC 130g Law, Politics and Public Policy Units: 4

2. Constitutional Law

- POSC 340 Constitutional Law Units: 4
- POSC 426 The United States Supreme Court Units: 4
- POSC 444 Civil and Political Rights and Liberties Units: 4

3. International Law

- POSC 345 International Law Units: 4
- POSC 448a The Politics of Peace Units: 4
- POSC 440 Comparative Law and the Judicial Process Units: 4

4. Policy Analysis

- POSC 347 Environmental Law Units: 4
- POSC 395 Directed Governmental and Political Leadership Internship Units: 2, 3, 4, 5, 6, 7, 8
- POSC 432 Politics of Local Criminal Justice Units: 4
- POSC 435 Politics and the Economy Units: 4
- POSC 436 Environmental Politics Units: 4
- POSC 440 Comparative Law and the Judicial Process Units: 4
- POSC 441m Cultural Diversity and the Law Units: 4
- POSC 442m The Politics of Human Differences: Diversity and Discrimination Units: 4
- POSC 443 Law in Film Units: 4
- POSC 448b The Politics of Peace Units: 4
- POSC 452 Critical Issues in Law and Public Policy Units: 4

5. Humanistic/Historical

- PHIL 340 Ethics Units: 4
- PHIL 430 Philosophy of Law Units: 4
- PHIL 440 Contemporary Ethical Theory Units: 4

6. Society

- ANTH 345 Politics, Social Organization, and Law Units: 4
- COMM 421 Legal Communication Units: 4
- ECON 434 Economic Analysis of Law Units: 4
- LAW 200w Law and Society Units: 4
- LAW 320p Law, Slavery, and Race Units: 4
- LAW 402 Psychology and Law Units: 4
- PHIL 431 Law, Society, and Politics Units: 4
- PHIL 437 Social and Political Philosophy Units: 4

Additional Requirements

At least four classes must be unique to the minor.

Political Organizing in the Digital Age Minor

The digital environment is changing the face of political organization, both in domestic American electoral politics and in the methods used by transnational social movements to call attention to problems around the globe. Howard Dean's use of the Internet to fund his 2004 presidential campaign has made other candidates aware of the political power of the Web in fundraising and grass-roots orchestration of local (and "global") events.

This minor should be of interest to students majoring in international relations, political science or other programs who plan to use technology to affect contemporary national and international affairs. As with all minors, students must choose four courses dedicated exclusively to this minor and four courses outside their major departments. These may, but need not be, the same four courses.

This minor is intended to help students engage in domestic and international political organizing by creating Websites, podcasting and using other new technologies. It should help students secure internships and jobs with political and international organizations, and generally improve their abilities to change the world.

Course Requirements

Choose one class from each of the following five lists:

I. Domestic Political Organizing:

- POSC 315 Regulation of Elections and Political Finance Units: 4
- POSC 335 Political Parties, Campaigns, and Elections Units: 4
- POSC 422 Political Attitudes and Behavior Units: 4
- POSC 424m Political Participation and American Diversity Units: 4
- POSC 437 Mass Media and Politics Units: 4

II. Transnational Social Movements:

- IR 305w Managing New Global Problems Units: 4
- IR 306 International Organizations Units: 4
- IR 324 Multinational Enterprises and World Politics Units: 4
- IR 371 Global Civil Society: Non-State Actors in World Politics Units: 4

III. New Technologies in Organizing:

IV. The Context of Political Organizing:

- COMM 321 Communication and Social Media Units: 4
- COMM 489 Campaign Communication Units: 4
- IR 308w Economic Globalization Units: 4
- IR 325 North-South Relations in the Global Economy Units: 4
- IR 330 Politics of the World Economy Units: 4
- IR 444w Theories of Global Society Units: 4
- POSC 300 Principles, Institutions, and Great Issues of American Democracy Units: 4
- POSC 345 International Law Units: 4
- POSC 371 European Political Thought II Units: 4
- POSC 427 Black Politics in the American Political System Units: 4
- POSC 428 Latino Politics Units: 4
- POSC 451 Politics of Resources and Development Units: 4
- POSC 456 Women in International Development Units: 4
- PPD 372m Public Service in an Urban Setting Units: 4

V. Capstone Class:

The capstone class allows students to engage more deeply in one of the contributing areas of study.

- COMM 487 Communication and Global Organizations Units: 4
- IR 327 International Negotiation Units: 4
- ITP 413x Interactive Web Development Units: 4
- POSC 395 Directed Governmental and Political Leadership Internship Units: 2, 3, 4, 5, 6, 7, 8

Total: Five courses, 20 units

Political Science Minor

Students who minor in political science must take five courses, 20 units, in political science. Students can either pursue course work in a traditional subfield (American politics, comparative politics, law and public policy, or political theory) or in a specific issue area of concentration (civil liberties and human rights, race, ethnicity, and gender, urban political problems, Asian politics, etc.).

Those who focus their studies on a traditional subfield must take the lower-level introductory course in that subfield: POSC 100 Theory and Practice of American Democracy (American politics); POSC 110 Ideology and Political Conflict (political theory); POSC 120 Comparative Politics (comparative politics) or POSC 130 Law, Politics and Public Policy (law and public policy).

Students pursuing the minor must also take four upper-division courses, three of which must be in the chosen subfield. Students choose from a predetermined list of courses divided by subfield in consultation with and approval of the department's undergraduate student adviser.

Those who pursue a specific issue area of concentration are required to take the department's designated gateway course, POSC 120 Comparative Politics, and at least three upper-division courses in the issue area of concentration. A fourth upper-division course must be taken in the issue area of concentration or a complementary area. The upper-division courses are chosen in consultation with and approval of the department's undergraduate student adviser.

Practical Politics Minor

The Practical Politics Minor offers students a unique opportunity to study the theory and practice of American Democracy. The minor includes courses on campaigns, elections, political communications, legislative politics, and governing. Students will engage with faculty who possess a wealth of knowledge and experience in electoral politics and campaign strategy. The minor will help students develop a multitude of skills applicable to the job market, such as problem solving, polling, social media analytics, micro-targeting, research, writing and public speaking. Students will also complete an internship that will provide them with professional training and exposure to different careers. In addition, students can pursue courses through Maymester and the Dornsife in Washington D.C. program toward the minor.

The Practical Politics Minor complements many majors in the Dornsife College of Letters, Arts, and Sciences including economics; sociology; philosophy, politics, and law; and international relations, as well as majors outside of the college including communications; business and public policy.

Requirements

The Practical Politics minor requires students to take five courses (20 units) from the following three categories. The minor requires 16 units of upper-division courses. Only 4 units of the 20 units may be fulfilled with a 100- or 200-level course.

1. Two courses in American Politics from the following list (8 units):

- POSC 100g Theory and Practice of American Democracy Units: 4
- POSC 300 Principles, Institutions, and Great Issues of American Democracy Units: 4
- POSC 334 Interest Groups and Elite Behavior Units: 4
- POSC 335 Political Parties, Campaigns, and Elections Units: 4
- POSC 422 Political Attitudes and Behavior Units: 4
- POSC 423 Presidents and the Presidency Units: 4
- POSC 424m Political Participation and American Diversity Units: 4
- POSC 425 Legislative Process Units: 4
- POSC 435 Politics and the Economy Units: 4
- POSC 437 Mass Media and Politics Units: 4
- POSC 449 Political Psychology Units: 4

2. Two courses in Applied Politics from the following list (8 units):

- POSC 220g Critical Issues in American Politics: Presidential Election in Real Time Units: 4
- POSC 323 Applied Politics Units: 4 *
- POSC 325 State Politics Units: 4
- POSC 420 Practicum in the American Political Process Units: 4 *
- POSC 439 Critical Issues in American Politics Units: 4
- POSC 452 Critical Issues in Law and Public Policy Units: 4

Note:

Multiple sections of Applied Politics (POSC 323) and Practicum in the American Political Process (POSC 420) may be offered and can be counted toward the minor.

3. One course in Practical Experience from the following list (4 units):

- POSC 395 Directed Governmental and Political Leadership Internship Units: 2, 3, 4, 5, 6, 7, 8
  Internship in Washington DC (part of the Washington DC Program)
  Maymester in Washington DC

Race, Ethnicity and Politics Minor

The interdisciplinary minor in race, ethnicity and politics helps students analyze and critically evaluate contemporary race relations and how race matters in politics today.

Requirements: Five Courses (20 Units)*

All students are required to take POSC 421 Ethnic Politics. In addition, students must also take one course from each category: Race and Gender in a Global Context, Comparative Racial Politics, Social/Historical (Racial Perspective) and Racial Formation. The following is a list of courses that fulfill each category.

Core Requirement

- POSC 421 Ethnic Politics Units: 4

Political Science Upper-Division Courses

Choose one course from each of the groups below:

Race and Gender in a Global Context:

- POSC 350 Politics of Latin America Units: 4
- POSC 351 Middle East Politics Units: 4
- POSC 352 Politics of Southeast Asia Units: 4
- POSC 354 Japanese Politics Units: 4
- POSC 356 Politics in the People's Republic of China Units: 4
- POSC 358 Politics of Sub-Sahara Africa Units: 4
- POSC 430 Political Economy of Mexico Units: 4
- POSC 431 Political Economy of Central America Units: 4
- POSC 452 Critical Issues in Law and Public Policy Units: 4
- POSC 456 Women in International Development Units: 4
- POSC 464 Politics of Russia and Eastern Europe Units: 4

Comparative Racial Politics:

- POSC 320 Urban Politics Units: 4
- POSC 328 Asian American Politics Units: 4
- POSC 424m Political Participation and American Diversity Units: 4
- POSC 427 Black Politics in the American Political System Units: 4
- POSC 428 Latino Politics Units: 4
- POSC 441m Cultural Diversity and the Law Units: 4
- POSC 442m The Politics of Human Differences: Diversity and Discrimination Units: 4
- POSC 444 Civil and Political Rights and Liberties Units: 4

Electives

Choose one course from each of the groups below:

Social/Historical:

- HIST 265gw Racism, Sexism, and the Law Units: 4
- HIST 341 American Social History Units: 4
- HIST 347 Urbanization in the American Experience Units: 4
- SOCI 142gm Diversity and Racial Conflict Units: 4
- SOCI 155gm Immigrant America Units: 4
- SOCI 342m Race Relations Units: 4
- SOCI 432m Racial and Ethnic Relations in a Global Society Units: 4

Racial Formation:

- AMST 301gp America, the Frontier, and the New West Units: 4
- AMST 320 Social Construction of Race and Citizenship Units: 4
- AMST 365 Leadership in the Community — Internship Units: 4
- AMST 385 African American Culture and Society Units: 4

Note:

**Political science majors are required to take seven courses (28 units).*

Political science majors must take four courses (at least three must be upper-division) from the Social/Historical and the Racial Formation categories. At least four classes must be unique to the minor and not taken for additional major, minor or general education credit.

Graduate Degrees

Director: Gerardo Munck, PhD
Email: munck@usc.edu
dornsife.usc.edu/poir

Political Science and International Relations (MA)

The POIR program does not accept applicants for a Master of Arts degree in POIR. If a student admitted in the POIR doctoral program does not have a master's degree, the department strongly recommends that the student completes the requirements for the MA in POIR in his or her course of work toward the PhD degree. A student admitted to the doctoral program may also, at the recommendation of the department, earn a terminal MA degree.

A student may obtain an MA in POIR by fulfilling the following requirements: a minimum of 28 units in the POIR program, including POIR 600, POIR 610 and POIR 611, and the approval of a substantive paper.

Doctor of Philosophy in Political Science and International Relations/Juris Doctor (PhD/JD)

Application deadline (for PhD): December 1

The Political Science and International Relations program and the USC Gould School of Law jointly offer a dual degree program leading to the PhD/JD degree. Applicants must apply to the Political Science and International Relations program and

the law school and meet the requirements for admission to both. In addition to the LSAT, students interested in this program are required to take the Graduate Record Examinations (GRE).

In the first year, students take their course work in the law school exclusively. To earn the JD, all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law honors programs. The second and third years include a total of 40 units of courses in political science and international relations and 40 units of law. Students must complete a five-course core theory and methodology sequence. They must include a classics-oriented, two-semester political, social, comparative and international theory sequence (currently POIR 600), a multivariate statistics course (such as POIR 611) and a philosophies/methodologies in social inquiry course (POIR 610). Finally in their second, third or fourth year, they must take an approved advanced research methods course.

To obtain a PhD in Political Science and International Relations, students must pass the screening process. After the completion of required field course work with a grade of B or better, a substantive paper or USC MA thesis relevant to the program, students must take a PhD qualifying examination in two of their three fields of concentration. The third field will be completed by taking at least three courses and passing each with a grade of B or better. The final requirement, following successful completion of the qualifying examination, is a doctoral dissertation.

Political Science and International Relations (PhD)

USC Graduate School Requirements

The PhD degree is awarded to students who have demonstrated in-depth knowledge of the disciplines of political science and international relations and the ability to make an original research contribution. The PhD in Political Science and International Relations requirements are fulfilled by successfully completing a minimum of 70 units beyond the BA, the PhD screening process, three fields of concentration, a substantive paper, a foreign language requirement (if applicable), qualifying examinations, a dissertation proposal, and a written dissertation and its oral defense.

Admission

The faculty of the Department of Political Science and the School of International Relations welcome talented candidates from a variety of backgrounds. Although a prior degree in political science or international relations is not necessary, it is strongly recommended that applicants have completed at least some course work in related fields, including political theory, statistics and social science research methods.

Admission decisions are based on a holistic review of applications. This review includes, but is not limited to, consideration of applicants' prior academic performance, as reflected in course grades, the results of the Graduate Record Examinations, letters of recommendation, a statement of intent that demonstrates a seriousness of purpose, a high level of motivation and a desire to benefit from our faculty's areas of expertise or interest. Applicants also are required to submit a sample of their written work in English, preferably a research-oriented paper. Business, government and other practical experiences may also be taken into account. Applicants whose native language is not English must take the TOEFL or IELTS examination.

Screening Process

Before completion of 24 units, students will be reviewed by a screening committee made up of the Director of Graduate Studies and the faculty who taught the core courses. This committee will review the student's progress, including grades and written faculty evaluations of course work.

The committee will be responsible for deciding, at an early stage in the student's career, if the student is likely to finish the PhD program. After reviewing the student's record, the committee may decide to (1) continue the student, (2) not continue the student and admit the student into a terminal MA degree program, or (3) fail the student's performance in the screening process, i.e., not continue the student in either the MA or PhD programs.

Course Requirements

All doctoral candidates must complete an approved sequence of four courses in core theory and methodology, including a classics-oriented course in political theory POIR 600), a multivariate statistics course (POIR 611), a social inquiry and research design course (POIR 610), and an approved course in advanced research methods.

The selection of additional courses should be guided by the distribution requirements of the PhD program. The student will choose three fields of concentration, of which two will be examined fields. Each examined field of concentration requires completion of four graduate-level courses, including the core course in standard fields, with an average grade consistent with university and program requirements. The third non-examined field of concentration requires the completion of a minimum of three graduate-level courses with an average grade consistent with university and program requirements. Students are also advised to take an independent study course to work toward their substantive paper requirement. Additional courses necessary to complete the 70 units required by the Guidelines for Graduate Study in Political Science and International Relations should be taken in consultation with faculty advisers.

Fields of Concentration

All students must complete two examined fields of concentration and one non-examined field of concentration. The standing fields of concentration include: American politics (AP); comparative politics (CP); international relations (IR) and methods and research tools (MRT). Students may also select a customized field of concentration as their non-examined field with the approval of their faculty adviser and the Director of Graduate Studies.

For the American politics; comparative politics; international relations fields, students must complete four courses and pass a written and oral field qualifying examination. For the methods and research tools field, students must complete a total of four approved advanced methods courses. Students must also write and orally defend a methods paper as part of the qualifying exam utilizing the skills they have learned in their coursework. Students should consult the methods and research tools field coordinator(s) and the POIR Guidelines for a list of approved courses and overall field requirements and exam

The student may satisfy the third non-examined field by completing one of the following set of requirements: (a) complete at least three courses in the AP, CP, or IR fields, (b) complete three methods courses in the MRT field; and/or (c) complete at least three courses in a proposed customized field of study to be approved by relevant faculty and the Director of Graduate Studies. For example, students can design a third field that cuts across disciplinary boundaries or focuses on specific areas of political science and international relations beyond the standing fields. The guidelines and the Director of Graduate Studies can provide illustrations of this type of third field.

Foreign Language

The student is required to demonstrate intermediate proficiency in a language other than English if the student's primary field and/or dissertation research requires it. Students should consult the guidelines and the Director of Graduate Studies.

Substantive Paper

To show evidence of the capacity to conduct original research and before taking the qualifying exam, each student will submit a substantive paper. The student will submit the draft of his or her substantive paper to the chair of the qualifying exam committee one month prior to the qualifying examinations. After consultation with the chair and necessary revisions, the student is to distribute the paper to all members of the qualifying exam committee at least 14 days prior to the oral defense. The substantive paper should be presented and defended in the oral component of the qualifying

examination as a viable journal submission to a peer-reviewed professional journal. It is strongly encouraged that the paper should be submitted to a professional journal approved by the student's adviser within one year of the defense.

Qualifying Examinations

Ordinarily, students will take the qualifying exams no later than the fifth semester in the PhD program. Students will be examined in two of their three fields of concentration. The qualifying exam committee will evaluate the quality of the two written field exams as evidence of the capacity to define and complete a PhD dissertation.

The written examinations will be administered over two days at least once per academic year. Examination questions will be written by the field coordinators in consultation with the tenured and tenure track faculty in each field. Students who select the methods and research tools as one of their examined fields of concentration must complete a methods paper.

The oral portion of the student's qualifying examination will be administered by his or her qualifying exam committee. The oral examination will be based on the student's written field exams and/or methods paper; and the substantive paper. The qualifying exam committee will be made up of five members. In consultation with his or her principal adviser, the student will select two members, one from each standing field in which he or she will be examined, and the other two field examiners and the outside member of the qualifying exam committee. Final approval of the qualifying exam committee requires the signature of the Director of Graduate Studies and the Dornsife Vice Dean of Academic Programs.

Students will pass the qualifying examinations if no more than one member of the qualifying exam committee dissents after reviewing the student's record at USC and performance on the written and oral parts of the qualifying exams. At the discretion of the qualifying exam committee, students who do not pass the exams may be allowed to retake the qualifying exams the next time they are offered. Students are admitted to candidacy for the PhD when they have completed the university residency requirement, passed the written and oral portions of the PhD qualifying examinations, and defended their dissertation proposal.

Dissertation

Upon completion of the qualifying examinations, the student, in consultation with the principal adviser, selects a dissertation committee in accordance with university rules. Within six months of completing the qualifying examinations, students should have a formal defense of the dissertation proposal before their dissertation committee. The PhD is earned upon the submission of the written dissertation and its successful defense before the dissertation committee.

Consult the Requirements for Graduation section and The Graduate School section of this catalogue regarding time limitations for completion of the degree and other Graduate School requirements.

All graduate students considering an academic career should generally have research, teaching and advisement experiences as part of their program of study.

Master's Degree

Political Science and International Relations (MA)

The POIR program does not accept applicants for a Master of Arts degree in POIR. If a student admitted in the POIR doctoral program does not have a master's degree, the department strongly recommends the student completes the requirements for the MA in POIR in his/her course of work toward the PhD degree. A student admitted to the doctoral program may also, at the recommendation of the department, earn a terminal MA degree.

A student may obtain an MA in POIR by fulfilling the following requirements: a minimum of 28 units in the POIR Program, including POIR 600, POIR 610 and POIR 611, and the approval of a substantive paper.

Dual Degree

Doctor of Philosophy in Political Science and International Relations/Juris Doctor (PhD/JD)

Application deadline (for PhD): December 1

The Political Science and International Relations program and the USC Gould School of Law jointly offer a dual degree program leading to the PhD/JD degree. Applicants must apply to the Political Science and International Relations program and the law school and meet the requirements for admission to both.

In the first year students take 30 units of course work in the law school exclusively. To earn the JD, all students (including dual degree students) must complete 37 numerically graded law units at USC after the first year. The second and third years include a total of 40 units of courses in political science and international relations and 46 units of law. Students must complete a five-course core theory and methodology sequence. They must include a classics-oriented, two-semester political, social, comparative and international theory sequence (currently POIR 600), a multivariate statistics course (such as POIR 611) and a philosophies/methodologies in social inquiry course (POIR 610). Finally in their second, third or fourth year, they must take an approved advanced research methods course.

To obtain a PhD in Political Science and International Relations, students must pass the screening process. After the completion of required field course work with a grade of B or better, a substantive paper or USC MA thesis relevant to the program, students must take a PhD qualifying examination in two of their three fields of concentration. The third field will be completed by taking at least three courses and passing each with a grade of B or better. The final requirement, following successful completion of the qualifying examination, is a doctoral dissertation.

Doctoral Degree

Political Science and International Relations (PhD)

USC Graduate School Requirements

The PhD degree is awarded to students who have demonstrated in-depth knowledge of the disciplines of political science and international relations and the ability to make an original research contribution. The PhD in Political Science and International Relations requirements are fulfilled by successfully completing a minimum of 70 units beyond the BA, the PhD screening process, three fields of concentration, a substantive paper, a foreign language requirement (if applicable), qualifying examinations, a dissertation proposal, and a written dissertation and its oral defense.

Admission

The faculty of the Department of Political Science and the School of International Relations welcome talented candidates from a variety of backgrounds. Although a prior degree in political science or international relations is not necessary, it is strongly recommended that applicants have completed at least some course work in related fields, including political theory, statistics and social science research methods.

Admission decisions are based on a holistic review of applications. This review includes, but is not limited to, consideration of applicants' prior academic performance, as reflected in course grades, the results of the Graduate Record Examinations, letters of recommendation, and a statement of intent that demonstrates a seriousness of purpose, a high level of motivation and a desire to benefit from our faculty's areas of expertise or interest. Applicants also are required to submit a sample of their written work in English, preferably a research-oriented paper. Business, government and other practical experiences may also be taken into account. Applicants whose native language is not English must take the TOEFL or IELTS examination.

Screening Process

Before completion of 24 units, students will be reviewed by a screening committee made up of the director of Graduate Studies and the faculty who taught the core courses. This committee will review the student's progress, including grades and written faculty evaluations of course work.

The committee will be responsible for deciding, at an early stage in the student's career, if the student is likely to finish the PhD program. After reviewing the student's record, the committee may decide to (1) continue the student, (2) not continue the student and admit the student into a terminal MA degree program, or (3) fail the student's performance in the screening process, i.e., not continue the student in either the MA or PhD programs.

Course Requirements

All doctoral candidates must complete an approved sequence of four courses in core theory and methodology, including a classics-oriented course in political theory (POIR 660), a multivariate statistics course (POIR 611), a social inquiry and research design course (POIR 610), and an approved course in advanced research methods.

The selection of additional courses should be guided by the distribution requirements of the PhD program. The student will choose three fields of concentration, of which two will be examined fields. Each examined field of concentration requires completion of four graduate-level courses, including the core course in standard fields, with an average grade consistent with university and program requirements. The third non-examined field of concentration requires the completion of a minimum of three graduate-level courses with an average grade consistent with university and program requirements. Students are also advised to take an independent study course to work toward their substantive paper requirement. Additional courses necessary to complete the 70 units required by the Guidelines for Graduate Study in Political Science and International Relations should be taken in consultation with faculty advisers.

Fields of Concentration

All students must complete two examined fields of concentration and one non-examined field of concentration. The standing fields of concentration include: American politics (AP); comparative politics (CP); international political economy (IPE); international security and foreign policy (ISFP); and methods and research tools (MRT). Students may also select a customized field of concentration as their non-examined field with the approval of their faculty adviser and the Director of Graduate Studies.

For the American politics; comparative politics; international political economy; and international security and foreign policy fields, students must complete four courses and pass a written and oral field qualifying examination. For the methods and research tools field, students must complete the program's methods core course sequence required of all POIR students and a total of four additional approved advanced methods courses. Students must also write and orally defend a capstone project as part of the qualifying exam utilizing the skills they have learned in their coursework. Students should consult the methods and research tools field coordinator(s) and the POIR Guidelines for a list of approved courses and requirements.

The student may satisfy the third non-examined field by completing one of the following set of requirements: (a) complete at least three courses in the AP, CP, IPE or ISFP fields, (b) complete four additional methods courses in the MRT field beyond the program's methods core course sequence;and/or (c) complete at least three courses in a proposed customized field of study to be approved by relevant faculty and the Director of Graduate Studies. For example, students can design a third field that cuts across disciplinary boundaries or focuses on specific areas of political science and international relations beyond the standing fields. The guidelines and the Director of Graduate Studies can provide illustrations of this type of third field.

Foreign Language

The student is required to demonstrate intermediate proficiency in a language other than English if the student's primary field and/or dissertation research requires it. Students should consult the guidelines and the director of Graduate Studies.

Substantive Paper

To show evidence of the capacity to conduct original research and before taking the qualifying exam, each student will submit a substantive paper. The student will submit the draft of his or her substantive paper to the chair of the qualifying exam committee one month prior to the qualifying examinations. After consultation with the chair and necessary revisions, the student is to distribute the paper to all members of the qualifying exam committee at least 14 days prior to the oral defense. The substantive paper should be presented and defended in the oral component of the qualifying examination as a viable journal submission to a peer-reviewed professional journal. It is strongly encouraged that the paper should be submitted to a professional journal approved by the student's adviser within one year of the defense. Students who select the MRT field as one of their examined fields are expected to write a more sophisticated methodological section of their substantive paper that reflects the skills they have learned in their coursework; or produce an additional capstone project in addition to the substantive paper that has as its focus a significant methodological component.

Qualifying Examinations

Ordinarily, students will take the qualifying exams no later than the fifth semester in the PhD program. Students will be examined in two of their three fields of concentration. The qualifying exam committee will evaluate the quality of the two written field exams as evidence of the capacity to define and complete a PhD dissertation.

With the exception of the methods and research tools field examination, the written examinations will be administered over two days at least once per academic year. Examination questions will be written by a committee of the tenure track faculty in each field. The Director of Graduate Studies, in consultation with the chair of the Department of Political Science and the chair of the School of International Relations, will appoint one faculty member from each field to serve in the POIR Steering Committee and also serve as the field coordinator for the relevant field. The field coordinators will then seek assistance from other faculty in their field, including those with whom the student has studied, to compose the written examination questions. Students who select the methods and research tools as one of their examined fields of concentration must complete a capstone project which involves writing and orally defending a methodological component of their substantive paper or an additional paper with a substantial methodological component if the substantive paper does not have a significant methodological component.

The oral portion of the student's qualifying examination will be administered by his or her qualifying exam committee. The oral examination will be based on the student's written field exams or capstone projects; and the substantive paper. The qualifying exam committee will be made up of five members. In consultation with his or her principal adviser, the student will select two members, one from each standing field in which he or she will be examined, and the other two field examiners and the outside member of the qualifying exam committee. Final approval of the qualifying exam committee requires the signature of the Director of Graduate Studies and the Dornsife Vice Dean of Academic Programs.

Students will pass the qualifying examinations if no more than one member of the qualifying exam committee dissents after reviewing the student's record at USC and performance on the written and oral parts of the qualifying exams. At the discretion of the qualifying exam committee, students who do not pass the exams may be allowed to retake the qualifying exams the next time they are offered. Students are admitted to candidacy for the PhD when they have completed the university residency

requirement, passed the written and oral portions of the PhD qualifying examinations, and defended their dissertation proposal.

Dissertation

Upon completion of the qualifying examinations, the student, in consultation with the principal adviser, selects a dissertation committee in accordance with university rules. Within six months of completing the qualifying examinations, students should have a formal defense of the dissertation proposal before their dissertation committee. The PhD is earned upon the submission of the written dissertation and its successful defense before the dissertation committee.

Consult the Requirements for Graduation section and the Graduate School section of this catalogue regarding time limitations for completion of the degree and other Graduate School requirements.

All graduate students considering an academic career should generally have research, teaching and advisement experiences as part of their program of study.

Center for the Political Future

The mission of the Center for the Political Future is to advance civil dialogue that transcends partisan divisions and explores solutions to our most pressing national and global challenges. Now, more than ever, we need innovative pathways to restore dispassionate analysis to the political arena and renew the compromise essential to our democracy. The Center for the Political Future combines rigorous intellectual inquiry, teaching and practical politics to advance a new model for political discourse that opens those pathways.

Each semester, the Center hosts two to three Fellows on campus, each an exemplary leader in their field of politics and public service. Our Fellows spend the semester leading 2-unit seminar courses as well as hosting office hours, roundtable discussions, and bipartisan political panels designed to benefit students and the broader community. The Center also hosts weekly programs covering political issues, and conferences addressing national and global challenges such as immigration, climate change and tribalism.

An integral component of the Center is the Jesse M. Unruh Institute of Politics, which serves students by giving them the opportunity to be politically active and civically engaged through internships, scholarships, and professional development. The institute facilitates student internships in the offices of elected officials, non-profit organizations, public affairs professionals and more. At the institute, USC Dornsife students also conduct research into major public policy challenges at the local, state and national levels. In the spring, the institute organizes the Cerrell Seminar in Political Leadership, a trip to Sacramento where USC students meet with legislators, lobbyists and members of the media to discuss important issues in state politics.

Psychology

The Department of Psychology has five topical areas: 1) Brain and Cognitive Science focuses on understanding cognition, motivation, decision-making, computational modeling, emotion, and perception in terms of the underlying brain processes and manifested behaviors. Faculty work at the confluence of psychology, biology and neuroscience. 2) Clinical Science applies scientific theories and methods to examine psychosocial issues associated with significant societal problems including alcohol abuse, dementia and Alzheimer's disease, early identification of psychosis, family environments and risk and resilience in youth, bullying and peer victimization. Specialization is available in clinical-aging, child and family clinical, and adult clinical. 3) Developmental Psychology studies change in human behavior, cognition, language, neurological structure and emotions across the lifespan from childhood through early adulthood. 4) Quantitative Methods provides training in basic and advanced research methods and statistics used in psychometrics and measurement, longitudinal data analysis, behavior genetics modeling decision making, and methods for analyzing multivariate data. 5) Social Psychology studies the thoughts, feelings and actions of individuals as they are influenced by other individuals and by groups.

The department also participates in the Dornsife College's interdisciplinary program in Neuroscience.

Research is integral to psychology; it enables the faculty to make contributions in the field and to be more effective teachers. Undergraduate students are encouraged to work with members of the faculty on research projects. The most direct way for students to participate in research is to enroll in a directed research course (PSYC 290 or PSYC 490), but it is also possible to take part in ongoing research in less formal ways. Further options for research training also includes the honors program for psychology majors. The department now offers two MS programs in Applied Psychology (MAPP) and Applied Behavior Analysis (ABA).

Associate Professors of the Practice of Psychology: Shannon Couture O'Flinn, PhD; Meredith Lepley, PhD; Jonathan Tarbox, PhD; Steven Westberg, PhD
Associate Professor (Research): Karen Hennigan, PhD
Assistant Professors of the Practice of Psychology: Samantha Broitman, PhD; Lauren Shapiro, PhD
Assistant Professors (Teaching): C. Miranda Barone, PhD; Jorge Barraza, PhD; Clayton Stephenson, PhD
Assistant Professors (Research): Assal Habibi PhD; Jonas Kaplan, PhD; Matthew Kirkpatrick, PhD *(Preventive Medicine)*; Gale M. Lucas, PhD *(Computer Science)*
Lecturers: William Breland, PhD; Vitaliya Droutman, PhD; Sule Guney, PhD; Canan Ipek, PhD; Patricia George, PhD; Leslie Berntsen, PhD; Shirin Birjandi, PhD
Emeritus: Elaine Anderson, PhD; Michael A. Arbib, PhD *(Computer Science)*; Kathleen Chambers, PhD; Norman Cliff, PhD; Michael Dawson, PhD; William W. Grings, PhD; Jerald Jellison, PhD; Albert R. Marston, PhD; John J. McArdle, PhD; Norman Miller, PhD; Robert Rueda, PhD *(Education)*
**Recipient of university-wide or college teaching award.*

Undergraduate Programs

Minor in Critical Approaches to Leadership

See the Department of Interdisciplinary Studies.

Honors Program

The department offers an honors program for outstanding students in the BA, Psychology major who desire advanced research training in preparation for graduate work in the social sciences or in professional schools. The primary focus of the honors program is the completion of a research study under the guidance of a faculty adviser. Students are admitted to the program in the fall semester of their junior year and enter the program in the spring of their junior year by enrolling in PSYC 380. To be eligible for admission, a student must have an overall GPA of at least 3.5 at the time of application to the program. This program is not available to students majoring in Social Sciences with an emphasis in Psychology. Students in the honors program complete all major requirements, including PSYC 380 Junior Honors Seminar during the spring semester of their junior year and PSYC 480 Senior Honors Seminar during the spring semester of their senior year. Students complete an honors thesis proposal as part of the Junior Honors Seminar and must submit a completed senior honors thesis by April 1 of the senior year. Students are also expected to have an overall GPA of at least 3.5 at the time of graduation. For further information, contact the undergraduate adviser or the director of the program, Dr. JoAnn M. Farver.

Psi Chi

Psi Chi is the national honor society in psychology. Membership is open to graduate and undergraduates who meet the minimum qualifications. Psi Chi is a member of the Association of the College Honor Societies and is an affiliate of the American Psychological Association and the American Psychological Society.

Graduate Degrees

The Department of Psychology offers an MS in Applied Psychology, an MS in Applied Behavior Analysis, an MS in Computational Psychology, an MA in Psychology and five programs of study that lead to the PhD degree: (1) clinical science, including specializations in adult clinical, clinical-aging and child and family; (2) developmental psychology, including child and adolescent development and adult development and aging; (3) brain and cognitive science, including cognitive neuroscience, behavioral neuroscience, clinical neuroscience and behavioral genetics; (4) quantitative methods; and (5) social psychology. All five specialty PhD areas provide training for careers in research, teaching and applied work.

Admission Requirements

Psychology courses required for admission to the PhD program include the following courses: Introduction to Psychology, Statistics, Research Methods or Experimental Psychology; and at least one course from each of the following lists: (1) comparative psychology, physiological psychology, sensation and perception, learning and memory, motivation, and emotion; and (2) developmental psychology, social psychology, abnormal psychology, personality and history of psychology. Additional courses are desirable, as is work in the biological, physical and social sciences, in mathematics and in philosophy. Students with less background in psychology but outstanding undergraduate records in related fields are also encouraged to apply.

Students are selected on the basis of their undergraduate records, scores on the Graduate Record Examinations General Test, course background, letters of evaluation, personal statement of interests and goals and evidence of research skills or interests (e.g., publications or participation in research projects).

The faculty of each specialty area select the students to be admitted to that area. Therefore, applicants should designate the specialty area to which they seek admission.

Application for admission in psychology is completed online and all materials must be submitted by December 1 for admission to the following fall semester.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and

The Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Bachelor's Degree

Cognitive Science (BA)

Director: Toben Mintz, PhD

Cognitive science is an interdisciplinary major that focuses on the mind and cognition from a variety of perspectives and approaches. The core and electives sample from courses from computer science, human and evolutionary biology, linguistics, mathematics, philosophy and psychology.

The major consists of four fixed core courses, plus two tiers of flexible core courses. The first tier generally consists of more introductory courses and the second tier of more advanced courses, although there are exceptions, and some courses satisfy either tier. Students must take two courses from the first tier and three courses from the second. The purpose of the flexible tiers is to structurally implement interdisciplinary breadth with some degree of flexibility. The flexible core is a subset of the electives, from which students can choose in order to complete the required number of units.

Students may elect to focus their curriculum from one of three tracks, which are suggested courses of study for focusing on a particular theme in cognitive science. This may be accomplished through individual advisement: language, reasoning and decision-making, and the computational mind.

Total required units for major: 46–48 units. Consisting of 16 core units, 20 flexible core units and 10–12 elective units.

Core Requirements (4 Courses)

- PSYC 100Lg Introduction to Psychology Units: 4
- PSYC 274Lg Statistics Units: 4
- PSYC 301L Cognitive Processes Units: 4
- PSYC 339Lg Origins of the Mind Units: 4

  or
- PSYC 420 Animal Behavior Units: 4

Units: 16

Flexible Core Requirements (5 Courses)

Two courses from:

- CSCI 103L Introduction to Programming Units: 4 *
- LING 210g Introduction to Linguistics Units: 4
- LING 301 Introduction to Phonetics and Phonology Units: 4 *
- LING 302 Introduction to Syntax Units: 4 *
- PHIL 120g Introduction to Formal Logic Units: 4
- PHIL 246Lg Foundations of Cognitive Science Units: 4
- PSYC 304L Sensation and Perception Units: 4 *

Three courses from:

- CSCI 170 Discrete Methods in Computer Science Units: 4 *
- CSCI 270 Introduction to Algorithms and Theory of Computing Units: 4 *
- CSCI 360 Introduction to Artificial Intelligence Units: 4 *
- HBIO 306 Biology of the Non-Human Primates Units: 4
- HBIO 308 Origins and Evolution of Human Behavior Units: 4
- LING 385Lg Human Language as Computation Units: 4 *
- LING 405 Child Language Acquisition Units: 4
- LING 406 Psycholinguistics Units: 4 *
- LING 407 Atypical Language Units: 4
- LING 486 Natural Language Processing Units: 4 *
- LING 487 Speech Synthesis and Recognition Units: 4 *
- PHIL 222g Logic and Language Units: 4
- PHIL 240g Mind, Self, and Consciousness Units: 4
- PHIL 246Lg Foundations of Cognitive Science Units: 4
- PHIL 450 The Limits of Logic Units: 4 *
- PHIL 462 Philosophy of Mind Units: 4
- PHIL 465 Philosophy of Language Units: 4
- PSYC 304L Sensation and Perception Units: 4
- PSYC 305 Learning and Memory Units: 4
- PSYC 320 Principles of Psychobiology Units: 4
- PSYC 336L Developmental Psychology Units: 4
- PSYC 360 Abnormal Psychology Units: 4
- PSYC 422 Human Judgment and Decision Making Units: 4 *
- PSYC 433 Children's Learning and Cognitive Development Units: 4 *
- PSYC 450 Neural Network Models of Social and Cognitive Processes Units: 4
- PSYC 454 Social Cognition Units: 4

Units: 20

**Prerequisite required.*

Electives (3 Courses)

- BISC 230Lgx The Biology of the Brain Units: 4
- BISC 421 Neurobiology Units: 4 *
- BISC 424 Brain Architecture Units: 4
- CSCI 103L Introduction to Programming Units: 4 *
- CSCI 104L Data Structures and Object Oriented Design Units: 4 *
- CSCI 109 Introduction to Computer Science Units: 2
- CSCI 170 Discrete Methods in Computer Science Units: 4 *
- CSCI 270 Introduction to Algorithms and Theory of Computing Units: 4 *
- CSCI 360 Introduction to Artificial Intelligence Units: 4 *
- ECON 405 Neuroeconomics Units: 4 *
- HBIO 200Lg The Human Animal Units: 4
- HBIO 306 Biology of the Non-Human Primates Units: 4
- HBIO 308 Origins and Evolution of Human Behavior Units: 4
- HBIO 406 Theory and Method in Human Evolutionary Biology Units: 4 *
- ITP 115 Programming in Python Units: 2
- ITP 165 Introduction to C++ Programming Units: 2
- LING 210g Introduction to Linguistics Units: 4
- LING 275Lg Language and Mind Units: 4
- LING 285Lg Human Language and Technology Units: 4
- LING 301 Introduction to Phonetics and Phonology Units: 4 *
- LING 302 Introduction to Syntax Units: 4 *
- LING 307 Introduction to Speech-Language Pathology Units: 4
- LING 405 Child Language Acquisition Units: 4
- LING 406 Psycholinguistics Units: 4 *
- LING 407 Atypical Language Units: 4 *
- LING 412 Language and Law Units: 4
- LING 415 Phonetics Units: 4
- LING 486 Natural Language Processing Units: 4 *
- LING 487 Speech Synthesis and Recognition Units: 4 *
- PHIL 120g Introduction to Formal Logic Units: 4
- PHIL 222g Logic and Language Units: 4
- PHIL 240g Mind, Self, and Consciousness Units: 4
- PHIL 246Lg Foundations of Cognitive Science Units: 4
- PHIL 254gp Science, Knowledge and Objectivity Units: 4
- PHIL 258g Probability and Rational Choice Units: 4
- PHIL 385 Science and Rationality Units: 4
- PHIL 422 British Empiricism Units: 4
- PHIL 423 The Critical Philosophy of Kant Units: 4
- PHIL 427 Twentieth Century Anglo-American Philosophy Units: 4
- PHIL 428 Anglo-American Philosophy Since 1950 Units: 4
- PHIL 450 The Limits of Logic Units: 4 *
- PHIL 452 Modal Logic Units: 4 *
- PHIL 462 Philosophy of Mind Units: 4
- PHIL 463 Theories of Action Units: 4
- PHIL 465 Philosophy of Language Units: 4
- PHIL 486 Methodologies of the Sciences Units: 4
- PSYC 304L Sensation and Perception Units: 4
- PSYC 314L Experimental Research Methods Units: 4
- PSYC 326 Behavioral Neuroscience Units: 4
- PSYC 336L Developmental Psychology Units: 4
- PSYC 422 Human Judgment and Decision Making Units: 4 *
- PSYC 423 User Experience Units: 4
- PSYC 424 Neuropsychology Units: 4
- PSYC 425 Functional Imaging of the Human Brain Units: 4
- PSYC 428 Advanced Psychobiology Seminar Units: 4 *

- PSYC 433 Children's Learning and Cognitive Development Units: 4 *
- PSYC 438 Behavioral Genetics Units: 4
- PSYC 440 Foundations of Cognitive Neuroscience Units: 4
- PSYC 450 Neural Network Models of Social and Cognitive Processes Units: 4
- PSYC 454 Social Cognition Units: 4
  Note: Students that are interested in focusing on aspects of Cognitive Science that draw from Computer Science will need to take CSCI 103L, CSCI 104L *and* CSCI 109*, in order to take the more advanced Computer Science offerings in the curriculum. In considering how many CSCI courses to take, students should consider that units from these courses are outside of the Dornsife College, and will not be counted towards the required Dornsife College units.*
  ITP 115 *is not intended to be taken if* CSCI 103L *is taken.*

Units: 10-12

**Prerequisite required*

Total units: 46–48

Note: A course that is listed in multiple categories can only be applied once. Students must choose a minimum of 16 upper-division units from the flexible core and electives lists.

Psychology (BA)

Grade Requirement

A grade of C- or higher is required to count a class toward major requirements.

Required Courses, Lower-Division

- MATH 114gx Foundations of Statistics Units: 4 *
- PSYC 100Lg Introduction to Psychology Units: 4
- PSYC 274Lg Statistics Units: 4 **

Note:

**At least one math course of 2.67 units or more is required. MATH 114x (or MATH 208x or MATH 265) is required. Students with a strong math background may profit from a more advanced class.*

Thirty-two upper-division psychology units are required, including:

Required Courses, Upper-Division

- PSYC 314L Experimental Research Methods Units: 4 **
- PSYC 316L Non-Experimental Research Methods Units: 4

Note:

***It is recommended that no more than two upper-division psychology courses be taken prior to the completion of PSYC 274L and PSYC 314.*

One course from each of four of the following five lists is also required:

Cognitive

- PSYC 301L Cognitive Processes Units: 4
- PSYC 305 Learning and Memory Units: 4
- PSYC 440 Foundations of Cognitive Neuroscience Units: 4

Developmental

- PSYC 336L Developmental Psychology Units: 4
- PSYC 337L Adult Development and Aging Units: 4
- PSYC 339Lg Origins of the Mind Units: 4

Clinical

- PSYC 360 Abnormal Psychology Units: 4
- PSYC 361 Introduction to Clinical Psychology Units: 4
- PSYC 367g Stress, Health, and the Mind-Body Connection Units: 4

Biological

- PSYC 304L Sensation and Perception Units: 4
- PSYC 320 Principles of Psychobiology Units: 4
- PSYC 326 Behavioral Neuroscience Units: 4
- PSYC 372 Human Sexuality Units: 4
- PSYC 404L Psychophysiology of Emotion Units: 4
- PSYC 420 Animal Behavior Units: 4
- PSYC 426 Motivated Behaviors and Addiction Units: 4

Social

- PSYC 355 Social Psychology Units: 4

Additional Requirements

Two 400-level psychology courses other than 490x totaling 8 units are also required. PSYC 404L and PSYC 420 may not count toward this requirement if used to satisfy the biological category above.

An additional psychology course, either upper or lower-division of at least 2.67 units is required.

Social Sciences, with an Emphasis in Psychology (BA)

The required courses are: PSYC 100, MATH 114*, PSYC 274L and eight upper-division courses in departments in the social sciences, including five in the Department of Psychology and three outside the department but within the division. These may be any 300- or 400-numbered courses.

*MATH 208, MATH 218 or MATH 265 may substitute for MATH 114.

Minor

Consumer Behavior Interdisciplinary Minor

This interdisciplinary minor explores consumer thinking from the perspective of psychology, marketing, economics, anthropology, sociology and other departments interested in popular culture. Why do people form the attitudes and impressions they do? How do individual factors, culture, mass media, economics and social trends influence people's decisions? See USC Marshall School of Business.

Psychology and Law Minor

This interdisciplinary minor brings together courses in psychology that focus on the social, clinical, cognitive and societal aspects of psychology and how it relates to law. This knowledge is augmented with courses from the USC Gould School of Law that identify the relationship between mental health, social psychology and law.

Twenty-four units are required for the minor. A minimum of four courses (16 units) must be unique to the minor. A minimum of 16 upper-division units must be completed. Psychology majors and students majoring in social sciences with an emphasis in psychology may "double count" up to two courses toward the major and minor; however, they must take a minimum of four courses that do not apply to the major.

Lower-Division Requirements

Students must complete LAW 200w or LAW 250 and PSYC 100Lg. (PSYC 100Lg is a prerequisite to upper-division PSYC courses.)

- LAW 200w Law and Society Units: 4
  or
- LAW 250w Children and the Law Units: 4
- PSYC 100Lg Introduction to Psychology Units: 4

At least two upper-division Law courses from the following list (three minimum for PSYC majors):

- LAW 402 Psychology and Law Units: 4
- LAW 403 Mental Health Law Units: 4
- LAW 404 Law and Psychology: Examining the Criminal Justice Process Units: 4
- IR 349 International Law and Politics Units: 4
- LING 412 Language and Law Units: 4
- PHIL 431 Law, Society, and Politics Units: 4
- POSC 452 Critical Issues in Law and Public Policy Units: 4

At least two upper-division Psychology courses from the following list:

- PSYC 301L Cognitive Processes Units: 4
- PSYC 304L Sensation and Perception Units: 4

- PSYC 355 Social Psychology Units: 4
- PSYC 360 Abnormal Psychology Units: 4
- PSYC 363 Criminal Behavior Units: 4
- PSYC 365 Introduction to Forensic Psychology Units: 4
- PSYC 454 Social Cognition Units: 4

Psychology Minor

The minor requires six courses: PSYC 100 and five additional courses:

One course is required in each of three of the five topic areas listed under Major Requirements. PSYC 314L may be used to fulfill one of these topic areas.

Two elective PSYC courses. One must be upper-division, 300-level or higher.

Limitations:

1. Students must complete at least 16 upper-division PSYC units.
2. No more than four units of PSYC 490x is applicable to the minor.
3. Each of the six courses must be at least 2.67 units.

Master's Degree

Applied Behavior Analysis (MS)

The Master of Science in Applied Behavior Analysis (MABA) is designed for students who wish to pursue a career in Applied Behavior Analysis. The mission of the program is that all graduating students will become scientist-practitioners, who will be leaders in the provision of services that improve the quality of life of individuals with autism and other populations benefiting from positive behavior change. The program satisfies all requirements of the Behavior Analyst Certification Board, including 315 instructional hours of course work in applied behavior analysis, and 1,500 hours of supervised field experience. After graduating from the program, students will have completed all of the course work and fieldwork requirements to sit for the Board Certified Behavioral Analyst (BCBA) certification. A unique component of the program is the provision of two courses in developmental psychology that provide students with an up-to-date survey of theory and research in cognitive, social and emotional development of children and adolescents.

The program is especially appropriate for individuals who have majored in a behavioral science field, such as psychology and sociology, or who have a background in teaching or special education. Applicants must have received their baccalaureate degree by the semester in which they enter the program. Admission is competitive and based on grade point average, course work, GRE scores and practical experience with children. There are openings for approximately 24 students in each year of the program.

The program requires 42 units.

Applicants must apply for admission to the Graduate School, and satisfy all requirements for admission. Details on the method for applying, admission criteria and deadlines can be found at dornsife.usc.edu/aba.

Sample Student Curriculum

The following is a representative curriculum:

Fall, First Year

- PSYC 530 Concepts and Principles of Behavior Analysis Units: 3
- PSYC 531 Behavioral Assessment Units: 3
- PSYC 532 Ethics for Behavior Analysts Units: 3
- PSYC 587 Practicum in Applied Behavior Analysis Units: 2 – 18 hours per week – 15 weeks (270 hours)

Spring, First Year

- PSYC 533 Cognitive Development in Children Units: 4
- PSYC 535 Research Methods in Behavior Analysis Units: 3
- PSYC 536 Behavioral Interventions Units: 3
- PSYC 587 Practicum in Applied Behavior Analysis Units: 2 – 18 hours per week – 15 weeks (270 hours)

Fall, Second Year

- PSYC 534 Social and Emotional Development in Children Units: 4
- PSYC 537 Behavioral Supervision Units: 2
- PSYC 539 Behavioral Approaches to Skill Acquisition Units: 2
- PSYC 587 Practicum in Applied Behavior Analysis Units: 2 – 18 hours per week, 15 weeks (270 hours)
- PSYC 594a Master's Thesis Units: 2
  OR
- PSYC 597a Capstone Project in Behavior Analysis Units: 2

Spring, Second Year

- PSYC 587 Practicum in Applied Behavior Analysis Units: 2 – 20 hours per week, 15 weeks (300 hours)
- PSYC 596 Advanced Behavioral Theory Units: 3
- PSYC 594b Master's Thesis Units: 2
  OR
- PSYC 597b Capstone Project in Behavior Analysis Units: 2

Applied Psychology (MS)

Seeley G. Mudd, Room 706
(213) 740-2282
Fax: (213) 746-9082
Email: appliedpsychology@usc.edu
dornsife.usc.edu/map
Program Director: Ellen L. Leggett, EdD

The Master of Science in Applied Psychology program (MAP) is designed for individuals who wish to pursue or advance a career in a non-academic field where knowledge of human behavior is essential to effective job performance. The program stresses practical applications of psychological principles related to social influence, human motivation, interpersonal dynamics, decision-making, and performance improvement.

The program is especially appropriate for those who have majored in a behavioral science field, e.g., psychology, sociology, political science or anthropology. These applicants must have received their baccalaureate degree by the semester in which they begin the program.

Applicants must apply for admission to the Graduate School, and satisfy all requirements for admission. Details on the method for applying, admission criteria and deadlines can be found at dornsife.usc.edu/map.

Thirty-four units of course credit is required for the MAP degree. These units are taken from an inventory of courses that are specified for the MAP program. All students are required to take PSYC 505, PSYC 550a, PSYC 550b, PSYC 552, PSYC 565, 4 to 8 units of PSYC 591, and 2 units of PSYC 592. The specific number of PSYC 591 units taken in a given semester will depend in part on what options are available from internship sponsors. In addition, students choose from the following courses to focus on either organizational psychology or on consumer psychology: PSYC 513, PSYC 517, PSYC 556, PSYC 622. MAP students may take up to 4 units of PSYC 590.

Based on the student's academic background, work experience and career goals, substitutions of up to two courses may be made from other courses eligible for graduate credit.

The program for a given cohort of students begins in the fall semester. The normal expectation is that full-time students will complete the program in two semesters plus the summer. Part-time students will generally take one or two courses per semester, and must complete the program within five years.

The Master of Science in Applied Psychology program is also available as a part-time, online degree. Students may enter this program in fall, spring or summer terms.

Computational Psychology (MS)

Advances in statistical and machine learning, coupled with greater availability of human-related data, have provided unprecedented opportunities to study and model human behavior and cognition in ways that were not previously imaginable. The Master of Science in Computational Psychology provides the training in modern statistical methodology, state-of-the-art machine

learning algorithms and psychology needed to work on the cutting edge of human-related big data.

The program is 36 units in length and will typically require four semesters to complete. In addition to the required courses, students must complete a semester of lab rotation and participate in the Psychology and/or Quantitative Methods and Computational Psychology colloquium for two semesters.

Required Courses

Four courses required.

- PSYC 518 Cognitive Modeling Units: 4
- PSYC 571 Foundations of Statistical and Data Analytic Methods in Psychology Units: 4
- PSYC 573 Bayesian Data Analysis Units: 4
- PSYC 625 Applied Machine Learning Units: 4

Advanced Statistics

Choose one course:

- PSYC 520 Fundamentals of Psychological Measurement Units: 4
- PSYC 524 Research Design in Developmental Psychology Units: 4
- PSYC 575L Multilevel Modeling Units: 4
- PSYC 577 Analysis of Covariance Structures Units: 4
- PSYC 621 Seminar in Quantitative Psychology Units: 4

Substituted courses can be accepted upon approval from Director of Program:

- Selected Biostatistics courses
- Selected Math courses
- Selected Spatial Science courses (SSCI 583)
- Selected Economics courses

Data Science Core

Choose one course:

- DSCI 510 Principles of Programming for Data Science Units: 4
- DSCI 550 Data Science at Scale Units: 4

Advanced Data Science

Choose one course:

- CSCI 544 Applied Natural Language Processing Units: 4
- DSCI 553 Foundations and Applications of Data Mining Units: 4
- DSCI 554 Data Visualization Units: 4
- DSCI 555 Interaction Design and Usability Testing Units: 4
- DSCI 558 Building Knowledge Graphs Units: 4

Psychology Core

Choose two courses:

- PSYC 512 Seminar in Social Psychology Units: 4
- PSYC 540 Cognitive Neuroscience Units: 4
- PSYC 547 Functional Neuroanatomy Units: 4
- PSYC 555 Introduction to Functional Magnetic Resonance Imaging Units: 4
- PSYC 622 Decision Analysis and Behavioral Decision Theory Units: 4
- PSYC 626 Computational Social Sciences Units: 4

Psychology (MA)

The department does not admit students whose objective is this master's degree. However, if a student accepted in the doctoral program does not have a master's degree, the department strongly recommends completion of the requirements for the MA in Psychology in the course of work toward the PhD degree. This involves 24 units of course work and a thesis.

Dual Degree

Doctor of Philosophy in Psychology (Clinical) and Master of Public Health (Health Promotion) (PhD/MPH)

The PhD/MPH dual degree combines knowledge of clinical psychology research and practice with an understanding of health from a population perspective. The student enrolls primarily in the clinical science doctoral program, while taking additional course work for the MPH. During the second and subsequent years, course work is taken in both programs. The dissertation is undertaken through the Department of Psychology.

Doctoral Degree

Psychology (PhD)

Residency Requirement

A minimum of 24 graduate units at USC is required for the doctoral degree.

Course Requirements

Each student must take at least 36 substantive units in psychology at USC during the first three years. Students must complete one statistics and/or research methods course as well as a set of core courses that cover topics in brain and cognitive sciences and clinical, developmental and social areas, the specifics of which are provided in the department's handbook for graduate students. Additional course requirements vary according to specialty area.

Research Requirement

During the first and second year, students work on either a master's thesis or a research report of comparable scope and quality. A research project done at USC is required of all students (by the conclusion of the summer following the student's second year), regardless of prior graduate work.

Screening Procedure

The student's ability to master graduate-level course material is first evaluated after completion of no more than 24 units, and not later than the third semester of graduate work at USC. The final screening procedure is the successful completion of a second-year project requirement. This evaluation is based on the student's performance in courses taken and on an evaluation of the student's research competence as reflected in the second year research project. The project is evaluated by a committee of three faculty, including the student's primary adviser.

Additionally, students are evaluated each year based on adviser input, course work and research progress.

Qualifying Exam Committee

In preparation for the qualifying examination, each student assembles a five-person qualifying exam committee to direct the student's program of studies and evaluate research competence. The committee continues to serve until after the qualifying examination has been passed, the dissertation topic approved, and the student admitted to candidacy for the PhD. At that time the student assembles a dissertation committee of four or more members (usually consisting of members of the qualifying exam committee, one of whom must be a faculty member from outside the department), who advise on and evaluate the dissertation.

Qualifying Examination

The qualifying examination evaluates the student's ability to conduct independent scholarship and research. The student is evaluated based on oral and written presentation of two elements: a written review paper or written exam and the dissertation proposal. The qualifying examination is planned, administered and evaluated by the student's qualifying exam committee. It should be taken no later than during the fifth semester.

Doctoral Dissertation

A student is expected to engage in research activity throughout his or her graduate career, leading up to and culminating in the PhD dissertation. The dissertation is based on an original investigation, usually involving empirical data.

Defense of the Dissertation

The student's doctoral dissertation is defended at either a defense oral, based on an approved preliminary copy of the

dissertation, or a final oral, based on the final version of the dissertation.

Advisement

Each student has a major adviser who is usually in the specialty area. The qualifying exam committee should be formed at least one semester before the student takes the qualifying examination. Advisement concerning graduate school requirements may also be sought from the staff graduate adviser and the faculty member serving as director of graduate studies.

Internship Requirement

Students in the clinical science PhD program need a minimum of three full-time in-residence academic years of graduate study plus one full year of internship at a facility approved by the clinical faculty.

Quantitative and Computational Biology

The Department of Quantitative and Computational Biology has faculty with research specialties in statistical and evolutionary genomics and epigenomics, computational structural biology, and mathematical modeling and systems biology. The department offers a Bachelor of Science degree in Quantitative Biology and an undergraduate minor in Computational Biology and Bioinformatics. The department also offers an honors program in which a Quantitative Biology student can earn a BS degree in Quantitative Biology with honors. The honors program is available to students who maintain a GPA of 3.5 in the sciences and who have completed their freshman year. The honors program includes research opportunities, seminars and thesis preparation courses. Quantitative Biology undergraduates will become involved in research as component of their degree requirements.

At the graduate level, the department offers a doctoral degree program that leads to a PhD in Computational Biology and Bioinformatics. The department also offers a progressive MS degree in Quantitative and Computational Biology and an MS degree in Molecular and Computational Biology.

Faculty

University Professor, Provost Professor of Neurology, Biomedical Engineering, and Quantitative and Computational Biology: Steve Kay, PhD (*Neurology*)
Distinguished Professor of Chemistry, Quantitative and Computational Biology, Biochemistry, and Chemical Engineering & Materials Science and Dana and David Dornsife Chair in Chemistry: Arieh Warshel, PhD* (*Chemistry*)
Gordon S. Marshall Early Career Chair and Associate Professor of Biomedical Engineering, and Quantitative and Computational Biology: Stacey Finley, PhD (*Biomedical Engineering)*
Provost Professor of Ophthalmology, Neurology, Psychiatry and the Behavior Sciences, Radiology, Biomedical Engineering, and Quantitative and Computational Biology: Arthur Toga, PhD *(Ophthalmology*)
Professors: Liang Chen, PhD; Yan Liu, PhD (*Computer Science*); Chi H. Mak, PhD (*Chemistry*); Aiichiro Nakano, PhD (*Computer Science*); Remo Rohs, PhD; Andrew Smith, PhD; Fengzhu Sun, PhD; Paul Thomas, PhD (*Preventive Medicine*); Paul Thompson, PhD (*Ophthalmology*)
Associate Professors: Rosa Di Felice, PhD (*Physics and Astronomy*); Christoph Haselwandter, PhD (*Physics and Astronomy*); Vsevolod Katritch, PhD
Assistant Professors: Mark Chaisson, PhD; Charleston Chiang, PhD (*Preventive Medicine*); Michael Edge, PhD; Geoffrey Fudenberg, PhD; Naomi Levine, PhD (*Biological Sciences*); Adam MacLean, PhD; Nicholas Mancuso, PhD (*Preventive Medicine*)
Associate Professors (Teaching): Peter Calabrese, PhD; Rory Spence, PhD
Emeritus: Simon Tavaré, PhD; Michael S. Waterman, PhD*
**Recipient of university-wide or college teaching award.*

Undergraduate Degrees

Director of Undergraduate Studies, Quantitative Biology: Peter Calabrese, PhD

Advisement

Advisement in the Department of Quantitative and Computational Biology is required each semester. First semester freshman and transfer advisement takes place during orientation. Advisement in all remaining semesters takes place during the pre-registration period. The undergraduate coordinator forwards advisement appointment information each semester to all students in quantitative biology.

Pre-Medical Preparation

The Quantitative Biology major includes all requirements for admission to medical school.

Minor in Computational Biology and Bioinformatics

The Department of Quantitative and Computational Biology offers a minor in computational biology and bioinformatics. This minor provides essential training in using quantitative skills to solve fundamental biological problems as well as problems related to public health, neuroscience and the environment. The minor includes tracks matching the background of the students in biology, mathematics, computer science and engineering.

Graduate Degrees

Degree Programs in Quantitative and Computational Biology

The graduate programs in quantitative and computational biology include graduate level classes in computer science, mathematics, and statistics and access to high performance computing. Courses and faculty research interests allow a multidisciplinary approach. Students develop the ability to formulate and test hypotheses, integrating information and concepts in the completion of a dissertation (PhD). A qualifying exam committee is formed for each student during the first year to develop a particular program of course work and research, and to evaluate the student's progress. Specific information about the options in quantitative and computational biology can be obtained by requesting information brochures or online at dornsife.usc.edu/qcb/.

Doctor of Philosophy in Computational Biology and Bioinformatics

This program prepares students for careers in academic research in quantitative and computational biology, or data science, biotechnology and software industries. The department teaches computational biology courses after students have taken graduate level courses in computer science, algorithms, mathematics, statistics and probability, and molecular biology. Students take classes and rotate in the first year, take a written screening exam following the first year, and an oral qualifying exam after the second year. Computational biology and bioinformatics students can work with faculty members of the Department of Quantitative and Computational Biology (dornsife.usc.edu/qcb/people/) as PhD dissertation advisers.

Admission Requirements

Applicants must have a bachelor's degree in a natural science, mathematics, computer science or engineering from an accredited four-year college or university. Required background courses include computer science, general physics, bioinformatics and mathematics through integral calculus. Applicants are evaluated by their transcripts and GPA; research experience; three letters of recommendation; and a statement of interest. Applicants who are accepted into the program but judged to have minor deficiencies are expected to correct them within the first year.

Degree Requirements

These graduate degrees are awarded under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and The Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Bachelor's Degree

Quantitative Biology (BS)

The Department of Quantitative and Computational Biology offers a BS degree in Quantitative Biology (QBIO). This program allows biology students to achieve a fuller background in the quantitative sciences such as computer science and statistics that are essential for modern data-driven biological science. The students will take an introductory seminar, participate in undergraduate research and write an honors thesis. This program will have the designation on the transcript of Bachelor of Science in Quantitative Biology.

The general education, writing, language and diversity requirements for a USC Dornsife College of Letters, Arts and Sciences degree are applicable.

Core Courses (38 units)

Students must complete the following courses:

Required Introductory Course (2 units)

- QBIO 105 Introduction to Quantitative Biology Seminar Units: 2

Required Foundational Courses (36 units)

- BISC 120Lg General Biology: Organismal Biology and Evolution Units: 4 or
- BISC 121Lg Advanced General Biology: Organismal Biology and Evolution Units: 4
- BISC 220Lg General Biology: Cell Biology and Physiology Units: 4 or
- BISC 221Lg Advanced General Biology: Cell Biology and Physiology Units: 4
- CHEM 105aLg General Chemistry Units: 4 or
- CHEM 115aLg Advanced General Chemistry Units: 4
- CSCI 103L Introduction to Programming Units: 4
- CSCI 104L Data Structures and Object Oriented Design Units: 4
- CSCI 170 Discrete Methods in Computer Science Units: 4
- MATH 125g Calculus I Units: 4
- PHYS 135ag Physics for the Life Sciences Units: 4 or
- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4 or
- PHYS 161Lg Advanced Principles of Physics I Units: 4 or
- PHYS 171Lg Applied Physics I: Mechanics Units: 4
- QBIO 310 Statistical Thinking for Quantitative Biology Units: 4 or
- MATH 307 Statistical Inference and Data Analysis I Units: 4

Specialization Courses (12 units)

Choose three of the following courses:

- CHEM 105bL General Chemistry Units: 4 or
- CHEM 115bL Advanced General Chemistry Units: 4
- CHEM 322aL Organic Chemistry Units: 4
- CSCI 270 Introduction to Algorithms and Theory of Computing Units: 4
- MATH 126g Calculus II Units: 4 or
- MATH 127 Enhanced Calculus II Units: 4 or
- MATH 129 Calculus II for Engineers and Scientists Units: 4
- MATH 225 Linear Algebra and Linear Differential Equations Units: 4 or
- MATH 245 Mathematics of Physics and Engineering I Units: 4
- MATH 226g Calculus III Units: 4 or
- MATH 227 Enhanced Calculus III Units: 4 or
- MATH 229 Calculus III for Engineers and Scientists Units: 4
- MATH 407 Probability Theory Units: 4
- MATH 308 Statistical Inference and Data Analysis II Units: 4 or
- MATH 408 Mathematical Statistics Units: 4
- PHYS 135bL Physics for the Life Sciences Units: 4 or
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4 or
- PHYS 162L Advanced Principles of Physics II Units: 4 or
- PHYS 172L Applied Physics II: Electricity, Magnetism and Optics Units: 4

Capstone Course (4 units)

Choose one of the following capstone courses:

- BISC 478 Computational Genome Analysis Units: 4 or
- BISC 481 Structural Bioinformatics: From Atoms to Cells Units: 4

Biology Elective (4 units)

Choose one of the following courses:

- BISC 300L Introduction to Microbiology Units: 4
- BISC 307L General Physiology Units: 4
- BISC 313L Evolution and Population Genetics Units: 4
- BISC 315L Introduction to Ecology Units: 4
- BISC 320Lg Molecular Biology Units: 4
- BISC 325 Genetics Units: 4
- BISC 312x Molecular Biochemistry Units: 4
- BISC 330L Biochemistry Units: 4
- BISC 421 Neurobiology Units: 4
- CHEM 350g Molecular Principles of Biochemistry Units: 4
- QBIO 401 Introduction to Computational Analysis of Biological Data Units: 4

Upper-Division Electives (minimum 8 units)

Choose two to three of the following courses for upper-division electives. The capstone course and biology elective selected may not double-count toward upper-division electives.

- BISC 423 Epilepsy to Ecstasy: Biological Basis of Neurological Disorders Units: 4
- BISC 403 Advanced Molecular Biology Units: 4
- BISC 406L Biotechnology Units: 4
- BISC 407 Cellular and Molecular Neuroscience Units: 4
- BISC 408 Systems Neuroscience: From Synapses to Perception Units: 4
- BISC 410 Applications of Molecular Biology to Medicine Units: 4
- BISC 411 Advanced Cell Biology Units: 4
- BISC 424 Brain Architecture Units: 4
- BISC 434 Introduction to Genome Science Units: 4
- BISC 435 Advanced Biochemistry Units: 4
- BISC 450L Principles of Immunology Units: 4
- BISC 473L Biological Oceanography Units: 4
- BISC 478 Computational Genome Analysis Units: 4 *
- BISC 481 Structural Bioinformatics: From Atoms to Cells Units: 4 *
- BME 430 Principles and Applications of Systems Biology Units: 4
- CSCI 360 Introduction to Artificial Intelligence Units: 4
- CSCI 467 Introduction to Machine Learning Units: 4
- MATH 447 Mathematics of Machine Learning Units: 4
- MATH 466 Dynamic Modeling Units: 4
- MATH 467 Theory and Computational Methods for Optimization Units: 4

- PHYS 444 Physical Biology: From Molecules to Cells Units: 4
- QBIO 401 Introduction to Computational Analysis of Biological Data Units: 4

* Capstone course.

Research Experience (6 units)

Students are required to enroll in a total of 6 units of directed research in a lab approved by the Quantitative Biology Executive Committee or assigned faculty adviser. Students may choose from any of the courses listed below, however, students in the honors program will enroll in both QBIO 493 and QBIO 494x.

- QBIO 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8
- QBIO 493 Quantitative Biology Honors Seminar Units: 2

and

- QBIO 494x Quantitative Biology Honors Thesis Units: 2

Minor

Computational Biology and Bioinformatics Minor

The USC Dornsife College of Letters, Arts and Sciences departments of quantitative and computational biology and mathematics and the Viterbi School of Engineering departments of computer science and biomedical engineering jointly offer the cross-departmental minor in computational biology and bioinformatics. This minor provides essential training in using quantitative skills to solve fundamental biological problems as well as problems related to public health, neuroscience and environment. The minor includes four tracks according to the background of the students in biology, mathematics, computer science and engineering.

As with all minors, students must include at least four upper-division courses (16 units) and four courses (16 units) dedicated exclusively to this minor (they can overlap). Four courses (16 units) taken outside the major department are required. The courses are designed for students in biology, mathematics, computer science or biomedical engineering. Other students may need more units to receive the minor. The CHEM 105bL or CHEM 115bL prerequisite for BISC 320 may be waived if the students have the necessary background determined by the faculty adviser for the minor. Students who waive these prerequisites cannot retake CHEM 105bL or CHEM 115bL for credit.

Please see the minor adviser for specific program requirements.

Required Courses

Biological Sciences

- BISC 305g Statistics for Biological Sciences Units: 4 (Can be substituted by MATH 208 or MATH 408 or BME 423)
- BISC 320Lg Molecular Biology Units: 4
- BISC 478 Computational Genome Analysis Units: 4
- BISC 481 Structural Bioinformatics: From Atoms to Cells Units: 4

Mathematics

- MATH 125g Calculus I Units: 4 *
- MATH 126g Calculus II Units: 4 *

Computer Science

- CSCI 103L Introduction to Programming Units: 4
- CSCI 104L Data Structures and Object Oriented Design Units: 4

Electives

Biological Sciences:

- BISC 230Lgx The Biology of the Brain Units: 4
- BISC 300L Introduction to Microbiology Units: 4 *
- BISC 313L Evolution and Population Genetics Units: 4 *
- BISC 325 Genetics Units: 4 *
- BISC 330L Biochemistry Units: 4 *
- BISC 403 Advanced Molecular Biology Units: 4 *
- BISC 406L Biotechnology Units: 4 *
- BISC 410 Applications of Molecular Biology to Medicine Units: 4 *

Mathematics:

- MATH 225 Linear Algebra and Linear Differential Equations Units: 4 *
- MATH 226g Calculus III Units: 4 *
- MATH 408 Mathematical Statistics Units: 4 *
- MATH 432 Applied Combinatorics Units: 4 *
- MATH 458 Numerical Methods Units: 4 *
- MATH 465 Nonlinear Dynamics in Science and Engineering Units: 4 *
- MATH 466 Dynamic Modeling Units: 4 *
- MATH 467 Theory and Computational Methods for Optimization Units: 4 *

Computer Science:

- CSCI 170 Discrete Methods in Computer Science Units: 4 *
- CSCI 201L Principles of Software Development Units: 4 *
- CSCI 270 Introduction to Algorithms and Theory of Computing Units: 4 *
- CSCI 485 File and Database Management Units: 4 *

Note:

**Prerequisite required*

Additional Requirements

Total requirements for students with no prior course work: 30 units. Students need to take 30 units of the courses listed: all requirements, and enough electives to add up to 30 units, while fulfilling the requirement that they must take 16 units unique to the minor (not used for their major or general education) and 16 units not offered by their major.

Students majoring in biological sciences, mathematics, computer science and biomedical engineering can meet many of these requirements with course work that also satisfies their majors.

Students of other majors need to take all the required courses plus at least one elective from mathematics or computer science (e.g., MATH 226, MATH 407, CSCI 201) from the list of elective courses to meet the minor requirements.

Master's Degree

Computational Molecular Biology (MS)

The computational molecular biology program is designed to attract recent graduates in either mathematics, statistics, biology or computer science, or scientists and engineers interested in retraining. A commercial or laboratory internship is required. Students will be prepared for employment in the rapidly expanding areas of computational molecular biology and bioinformatics. The program has two tracks, appropriate for different undergraduate backgrounds: biology and mathematical science. The required courses for each track are indicated below.

Required Courses

Biological Sciences

- BISC 403 Advanced Molecular Biology Units: 4 ***
- BISC 478 Computational Genome Analysis Units: 4 **
- BISC 505 Genomics and Molecular Genetics Units: 4 *
- BISC 542 Seminar in Molecular Biology Units: 1 *
- BISC 577a Computational Molecular Biology Laboratory Units: 2 *
- BISC 577b Computational Molecular Biology Laboratory Units: 2 *

Computer Science

- CSCI 485 File and Database Management Units: 4 **
- CSCI 570 Analysis of Algorithms Units: 4 ***

Mathematics

- MATH 407 Probability Theory Units: 4 **
- MATH 408 Mathematical Statistics Units: 4 **
- MATH 505a Applied Probability Units: 3 ***
- MATH 541a Introduction to Mathematical Statistics Units: 3 ***
- MATH 578a Computational Molecular Biology Units: 3 ***

- MATH 592 Computational Molecular Biology Internship Units: 3 *
- MATH 650 Seminar in Statistical Consulting Units: 3 *

Total units: 33-34

**Both tracks*
***Biology track*
****Mathematical science track*

Students are required to demonstrate skill in C++, Java or Perl, and to demonstrate knowledge of molecular biology at the level of BISC 320L. A substantial report on the commercial or laboratory internship must be submitted (for which enrollment in MATH 592 is required).

Quantitative and Computational Biology (MS)

The Department of Quantitative and Computational Biology offers a Master of Science in Quantitative and Computational Biology (MQCB), which integrates quantitative graduate courses from the Biological Sciences, Biomedical Engineering, Chemistry, Computer Science, Mathematics, and Physics and Astronomy departments. Students will gain additional skills across these disciplines that prepare them well for advanced graduate-level work, MD/PhD programs at top universities and/or jobs in industries at the intersection of biotechnology and software.

The program requires 32 units, as indicated below.

Required Courses (8 units)

Students must complete the following courses.

- BISC 542 Seminar in Molecular Biology Units: 1 (two semesters, computational biology section)
- BISC 577a Computational Molecular Biology Laboratory Units: 2
- QBIO 502 Molecular Biology for Quantitative Scientists Units: 4

Research Experience (7-9 units)

Students are required to enroll for 7 to 9 units of directed research in a lab approved by the Quantitative Biology Executive Committee or assigned faculty adviser.

- QBIO 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12

Graduate-Level Elective Courses (7-9 units)

Select two or three of the following courses. Options include 3- and 4-unit courses.

- BISC 545 Modeling and Numerical Techniques for Marine Scientists Units: 4
- BME 530 Introduction to Systems Biology Units: 4
- CHEM 538 Mathematical Techniques of Physical Chemistry Units: 4
- CHEM 540 Introduction to Statistical Mechanics Units: 4
- CHEM 544 Introduction to Quantum Chemistry Units: 4
- CSCI 561 Foundations of Artificial Intelligence Units: 4
- CSCI 567 Machine Learning Units: 4
- CSCI 570 Analysis of Algorithms Units: 4
- CSCI 596 Scientific Computing and Visualization Units: 4
- MATH 505a Applied Probability Units: 3
- MATH 507a Theory of Probability Units: 3
- MATH 541a Introduction to Mathematical Statistics Units: 3
- MATH 541b Introduction to Mathematical Statistics Units: 3
- PHYS 518 Thermodynamics and Statistical Mechanics Units: 3
- PHYS 558a Quantum Mechanics Units: 3
- PHYS 690 Introduction to Physical Biology Units: 3

Foundational Elective Courses (8 units)

Select two of the following courses.

- BISC 478 Computational Genome Analysis Units: 4
- BISC 481 Structural Bioinformatics: From Atoms to Cells Units: 4
- CSCI 455x Introduction to Programming Systems Design Units: 4
- MATH 407 Probability Theory Units: 4
- MATH 408 Mathematical Statistics Units: 4
- QBIO 401 Introduction to Computational Analysis of Biological Data Units: 4

Doctoral Degree

Computational Biology and Bioinformatics (PhD)

Application deadline: December 15

During the first year, the student's program is under the direction of an initial qualifying exam committee composed of members of the admissions committee. After passing the screening procedure before the end of the first semester, the student must form a qualifying exam committee consisting of an adviser and four other faculty members, including at least one from another department. Thereafter, the student's program of studies and dissertation are under the direction of the permanent qualifying exam committee and the dissertation committee.

Screening Procedure

The screening examination should be taken by the end of the second semester in the program. If the student fails the examination, the department, at its discretion, may permit the student to repeat the examination during the next semester. The screening examination consists of written examinations on topics including molecular biology, mathematical probability and statistics, and algorithms.

Course Requirements

The students must complete, with no grade lower than a B, a minimum of 60 units of courses carrying graduate credit and approved by the qualifying exam committee. The required courses include: BISC 542, BISC 577a, CSCI 570, MATH 505a, MATH 541a, and MATH 578a/MATH 578b. Students must take at least one biology course in the area of molecular biology, genetics or biochemistry. An additional 6 units of elective courses will be taken from the following list: BISC 502a/BISC 502b, BME 530, MATH 502a, MATH 505b, MATH 541b, MATH 555a, MATH 650, CSCI 521, CSCI 559, CSCI 567, CSCI 596, CSCI 596, or other graduate level courses in BISC, BME, MATH or CSCI. Students must register for a minimum of 4 units of dissertation research (BISC 794a/BISC 794b). Students must be registered in BISC 542 (computational section) their first three years in the program (6 semesters). Students are required to enroll in BISC 593 (2 units) during the fall semester of their second year for TA preparation. In addition, international students may be required to take courses in the American Language Institute (ALI).

Transfer of Credit

No transfer of credit will be considered until the screening examination is passed. A maximum of 30 units of graduate work at another institution may be applied toward the course requirements for the PhD A grade of B- (A = 4.0) or lower will not be accepted and, at most, two grades of B will be accepted. A PhD candidate may petition the department for transfer of additional credit, after he or she passes the qualifying examination.

Qualifying Examination

The qualifying examination should be taken within two semesters following successful completion of the screening examination.

The written portion of the qualifying examination consists of a dissertation proposal. This document should include: introduction, statement of the problem, literature survey, methodology, summary of preliminary results, proposed research, references, appendix (including one or two fundamental references).

The oral portion of the qualifying examination consists of presentation of the PhD dissertation proposal. The student must demonstrate research potential.

Dissertation

Following passage of the screening examination and approval of a dissertation topic by the qualifying exam committee, the

student begins research toward the dissertation under the supervision of the dissertation committee. The primary requirement of the PhD is an acceptable dissertation based on a substantial amount of original research conducted by the student.

Defense of the Dissertation

The defense of the dissertation is either a defense oral or a final oral. In most cases a defense oral will suffice if approved by the dissertation committee.

Required Courses

Select one from the following:

- BISC 320Lg Molecular Biology Units: 4
- BISC 325 Genetics Units: 4
- BISC 502a Molecular Genetics and Biochemistry Units: 4

Other Required Courses

- BISC 542 Seminar in Molecular Biology Units: 1
- BISC 577a Computational Molecular Biology Laboratory Units: 2
- BISC 593 Practicum in Teaching the Biological Sciences Units: 2
- CSCI 570 Analysis of Algorithms Units: 4
- MATH 505a Applied Probability Units: 3
- MATH 541a Introduction to Mathematical Statistics Units: 3
- MATH 578a Computational Molecular Biology Units: 3
- MATH 578b Computational Molecular Biology Units: 3

Elective Courses

Choose a minimum of 6 units from the following courses:

- BISC 502a Molecular Genetics and Biochemistry Units: 4
- BISC 502b Molecular Genetics and Biochemistry Units: 4
- BME 530 Introduction to Systems Biology Units: 4
- CSCI 521 Optimization: Theory and Algorithms Units: 3
- CSCI 559 Machine Learning I: Supervised Methods Units: 4
- CSCI 567 Machine Learning Units: 4
- CSCI 596 Scientific Computing and Visualization Units: 4
- CSCI 670x Advanced Analysis of Algorithms Units: 4
- MATH 502a Numerical Analysis Units: 3
- MATH 505b Applied Probability Units: 3
- MATH 555a Partial Differential Equations Units: 3
- MATH 650 Seminar in Statistical Consulting Units: 3
- or other graduate courses in BISC, BME, CSCI or MATH selected in consulation with an adviser

Religion

The School of Religion offers undergraduate courses in biblical studies; ancient near eastern religion, east and south Asian religions, including Hinduism, Buddhism and Daoism; religions in Latin America; contemporary North American religions; the histories of Judaism, Christianity and Islam; religion and gender and topics in religious ethics. Courses are designed to facilitate a critical and comparative understanding of religious traditions in the light of the most current scholarship. The School of Religion offers the Bachelor of Arts in Archaeology, the Bachelor of Arts in Jewish Studies, the Bachelor of Arts in Religion, the minor in Archaeology, the minor in Archaeology of California, the minor in Jewish Studies, the minor in Religion, the minor in Contemplative Studies, a graduate certificate in Religious Studies, a graduate certificate in Jewish Studies, and the Doctor of Philosophy in Religion. Students also have the opportunity to enroll in USC courses offered by faculty of the Louchheim School for Judaic Studies, and receive regular USC course credit.

Ahmanson Center 130
(213) 740-0270
FAX: (213) 740-7158

Director: Duncan Williams, PhD

Faculty

King Faisal Chair in Islamic Thought and Culture and Professor of Religion and American Studies and Ethnicity: Sherman Jackson, PhD*
Knight Center Chair in Media and Religion and Associate Professor of Journalism: Diane Winston, PhD *(Communication)*
John R. Tansey Chair in Christian Ethics and Professor of Religion: Rev. Cecil (Chip) Murray, RelD
Ruth Ziegler Early Career Chair in Jewish Studies and Associate Professor of Religion, Law and History: Jessica Marglin, PhD
Alton M. Brooks Professor of Religion: James Heft, PhD
Leonard K. Firestone Professor of Religion and Professor of Religion: Donald Miller, PhD
Dean's Professor of Religion and Professor of Religion and History: Lisa Bitel, PhD *(History)*
Professors: Janet Hoskins, PhD *(Anthropology*); Paul Lichterman, PhD *(Sociology)*; Duncan Williams, PhD; Bruce Zuckerman, PhD*
Associate Professors: David Albertson, PhD*; Sheila Briggs, MA; Cavan W. Concannon, PhD; James McHugh, PhD; Lori Rachelle Meeks, PhD
Assistant Professors: Kelsey Moss, PhD; Arjun Nair, PhD; Jessica Xiaomin, PhD
Associate Professor of the Practice: Lynn Swartz Dodd, PhD
Emeritus: John P. Crossley, Jr., ThD*; Robert Ellwood, PhD; Ronald Hock, PhD; John Orr, PhD
**Recipient of university-wide or college teaching award.*

Undergraduate Degrees

Religion Major with Honors

Majors who wish to graduate from the university with honors in religion must achieve a minimum 3.5 grade point average in the major at the time of graduation. In addition to completing the required 32 units listed above, candidates for honors must register for REL 491x Undergraduate Honors Research, in which they must complete an acceptable senior honors project in religion. The total unit requirement to graduate with honors is 36 upper-division units.

Honor Society

Theta Alpha Kappa is a national honor society for those involved in the study of religion at the undergraduate and graduate level. It is open to declared majors who have completed at least three semesters of college and at least 12 units of religion courses. Students must have a GPA of at least 3.5 in major courses and an overall GPA of at least 3.0.

Judaic Studies Minor

See Jewish Studies for a full description of the minor.

Critical Approaches to Leadership Minor

See the Department of Interdisciplinary Studies for a full description of the minor.

Graduate Degrees

The School of Religion offers graduate study at the doctoral degree level in the field of religion with three tracks: Asia Pacific Religions, Comparative Christianities and Global Islam. Graduate work in the field of religion is designed to develop competencies and critical apparatuses in the distinct tracks and religious traditions as well as in religions' interactions with society, culture and the major themes that transcend the boundaries of geography, history and tradition.

Track I: Asia Pacific Religions

Trains students in the foundational texts, histories, worldviews, socio-political and cultural impact of religions in the pre-modern and modern Asia Pacific. These religious traditions include

Hinduism, Buddhism and other religious movements in the region as well as their global manifestations.

Track II: Comparative Christianities

Trains students in the vast global range of historical and contemporary Christian traditions often grouped together homogeneously as Christianity. Rather than focusing exclusively on textual and intellectual traditions, this track integrates the social, cultural and material dimensions of religion in its study of plural Christianities, and challenges students to frame their research in transnational and transhistorical terms as a matter of course.

Track III: Global Islam

Trains students in the "global" dimensions of the Islamic tradition, from the traditional confines of the Middle East, Africa and South and Southeast Asia to include Islam, Islamic thought, Muslim culture and Muslim communities in the modern Western world. In addition to the acquisition of traditional skills for the study of religious texts, doctrine and spiritual life of believers, students will learn how Muslims negotiate concrete spaces and contexts they inhabit in the modern world.

Degree Requirements

The degree is conferred under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and The Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School. Decisions regarding the number of transfer credits to be awarded will be made on a case-by-case basis by the faculty of the School of Religion.

Bachelor's Degree

Archaeology (BA)

Director: Lynn Swartz Dodd, PhD

Archaeology deepens our understanding of peoples and societies across space and time, in all parts of the world, while expanding our knowledge of issues relevant in contemporary society. Archaeologists interpret material culture and action from our shared human past using a range of tools and approaches whether the discovery occurs with trowel in hand, or through laboratory analysis, artifact study, remote sensing or by documenting heritage.

Archaeology majors strengthen their skills in critical thinking, assessing evidence, and formulating clear and persuasive arguments, both oral and written. Students from a wide range of disciplines will gain perspective on their own intellectual and professional interests through the study of the past.

In addition to the general education requirements, the following courses are required:

Lower-Division Requirement (8 units)

Required Course (4 units)

- ANTH 202g Archaeology: Our Human Past Units: 4

Select either one 4-unit course or two 2-unit courses from the following list (4 units):

- AHIS 120gp Foundations of Western Art: Prehistoric to Renaissance Units: 4
- AHIS 125gp Arts of Asia I: Antiquity to 1300 Units: 4
- AHIS 126g Arts of Asia II: 1300 to the Present Units: 4
- AHIS 127g Arts of the Ancient Americas Units: 4
- AHIS 128gp Arts of Latin America Units: 4
- AHIS 201g Digging into the Past Units: 4
- ANTH 140g Mesoamerican Cosmovision and Culture Units: 4
- ARCG 298aL Introduction to Scientific Diving Units: 2
- ARCG 298bL Introduction to Scientific Diving Units: 2
- CHEM 102 The Molecular World Units: 4
- CHEM 103Lgx General Chemistry for the Environment and Life Units: 4
- CHEM 105bL General Chemistry Units: 4
- CHEM 107Lg General Chemistry for Chemistry Majors Units: 4
- CHEM 205Lgx Chemical Forensics: The Science, and Its Impact Units: 4
- CLAS 150gp The Greeks and their Legacies Units: 4
- CLAS 151gp The Legacy of Rome Units: 4
- CLAS 212 Archaeology: Interpreting the Past Units: 4
- CLAS 280gp Classical Mythology in Art and Literature Units: 4
- CORE 103g The Process of Change in Science: Thematic Option Honors Program Units: 4*
- ENST 100g Introduction to Environmental Studies Units: 4
- ENST 150gx Environmental Issues in Society Units: 4
- GESM 110g Seminar in the Arts Units: 4*
- GESM 111g Seminar in the Arts Units: 4*
- GESM 120g Seminar in Humanistic Inquiry Units: 4*
- GESM 121g Seminar in Humanistic Inquiry Units: 4*
- GESM 130g Seminar in Social Analysis Units: 4*

Take Capstone Course (4 units):

- CLAS 465 Archaeology and Society Units: 4

Total Requirement: 9 courses (36 units)

Jewish Studies (BA)

The interdisciplinary major in Jewish Studies investigates the study of Jewish religion, history, culture and languages through a variety of academic perspectives. Students can work with scholars in the School of Religion in USC Dornsife College, the Louchheim School for Judaic Studies at Hebrew Union College-Jewish Institute of Religion and faculty across the USC campus trained in religious studies, Jewish thought, history, linguistics, literature, international relations, political science, music and sociology. The curriculum is designed to allow students options in combining courses that focus on Judaism as a religion with those that focus on history, literature and other forms of Jewish culture and civilization.

Major Requirements

Students choose among courses that focus on Judaism as a living religious system and those that focus on Jewish history, culture and society in its global setting.

Three core courses are required: REL 301 Introduction to the Study of Religion, REL 401 Seminar in Religious Studies, and either JS 100 Introduction to Jewish History or JS 180 Judaism.

Students must choose one course from the Judaism as a Religious Tradition track and one course from the Jewish History and Culture track which are listed below.

In addition, students must select three courses from either track. No more than two courses in total may come from the lower-division (100 and 200) levels. A total of eight courses are required for the degree (32 units.)

A. Core Courses

Three courses are required. Students must take REL 301 and REL 401 and select one course from either JS 100 or JS 180.

- JS 100gp Jewish History Units: 4
- JS 180gp Judaism Units: 4
- REL 301 Introduction to the Study of Religion Units: 4
- REL 401 Seminar in Religious Studies Units: 4

B. Judaism as a Religious Tradition (at least one course required)

- JS 180gp Judaism Units: 4
- JS 258gp Food, Faith and Conflict Units: 4
- JS 314gp Holy War And History: Jews, Christians, Muslims Units: 4
- JS 321 Gender and Judaism Units: 4
- JS 361 Scripture and Polemic in Judaism, Christianity and Islam Units: 4
- JS 374 Messiah: The History of an Idea Units: 4
- JS 378 Jewish Magic in the Ancient World Units: 4
- JS 382 Judaism as an American Religion Units: 4
- JS 467 Modern Jewish Thought Units: 4
- REL 111g The World of the Hebrew Bible Units: 4
- REL 112g Religions of Ancient Egypt and the Near East Units: 4
- REL 114g The Mediterranean: A Religious History Units: 4
- REL 115g Jerusalem, City of Three Faiths Units: 4
- REL 121g The World of the New Testament Units: 4
- REL 132g Origins of Western Religions Units: 4
- REL 311g The Bible in Western Literature Units: 4
- REL 312 Biblical Wisdom Literature Units: 4
- REL 317g The Bible in Its Ancient Context Units: 4

- REL 359g Culture in Diaspora: The Jews of Spain Units: 4
- REL 364 Religion and Ethics Units: 4
- REL 394 Archaeology of Egypt and the Near East Units: 4
- REL 473 Advanced Hebrew Bible Studies Units: 4

C. Jewish History and Culture (at least one course required)

- HEBR 315 Modern Hebrew Language (Hebrew IV) Units: 4
- HIST 305 Women and Gender in Pre-Modern Europe Units: 4
- HIST 323 The Holocaust in 20th Century Europe Units: 4
- HIST 383 The Modern Middle East Units: 4
- HIST 402 Cultural Heritage, Religion, and Politics in the Middle East Units: 4
- HIST 443 Race and Religious Riots in Modern World History Units: 4
- HIST 444 Mass Violence and Comparative Genocide in Modern World History Units: 4
- HIST 446 Resistance to Genocide Units: 4
- ITAL 352 The Holocaust in Italian Fiction and Film Units: 4
- JS 100gp Jewish History Units: 4
- JS 211gw The Holocaust Units: 4
- JS 214 Zionism, Israel, and the Modern World Units: 4
- JS 300 American Jewish History Units: 4
- JS 315g Anti-Semitism, Racism and Other Hatreds Units: 4
- JS 330 Jewish Power, Powerlessness, and Politics in the Modern Era Units: 4
- JS 340 Modern Jewish History Units: 4
- JS 342 Reading in Two Directions: Connecting Law and Literature in Jewish Tradition Units: 4
- JS 360m Identity, Community, and Service: Jews and Other Americans Units: 4
- JS 362 Terror and Resistance in Literature and the Media Units: 4
- JS 370gp Digs and Dispute: Religion and Archaeology in Israel Units: 4
- JS 379gm Mixing and Matching: Intermarriage in the 21st Century Units: 4
- JS 381 The Jew in American Society Units: 4
- JS 383 Jews in American Popular Culture Units: 4
- JS 389 Culture and Society in Israel: Inventing the Dream Units: 4
- JS 390 Special Problems Units: 1, 2, 3, 4
- JS 415 The American Jewish Experience in Film Units: 4
- JS 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8
- JS 499 Special Topics Units: 4
- MSCR 475 Introduction to Jewish Music Units: 2
- REL 324g Sex and the Bible: Gender, Sexuality, and Scripture Units: 4
- SPAN 350 Cultural Cross-Currents of the Iberian Middle Ages Units: 4

D. Major Electives (three courses required)

In addition to the three core courses in Area A and one required course in each of Areas B and C, students must complete three additional courses chosen from lists B and C. No more than two courses in total may come from the lower-division (100 and 200) levels.

Jewish Studies majors are encouraged to take HEBR 120, HEBR 150 and HEBR 220, which fulfill the Dornsife College foreign language requirement.

Religion (BA)

The department major requires REL 301 Introduction to the Study of Religion (preferably taken at the beginning of the student's major courses) and REL 401 Seminar in Religious Studies. Further, students must take six additional courses from the list below. The total unit requirement for the major is 32 units (at least 24 units must be upper-division).

Lower-division Options:

- REL 111g The World of the Hebrew Bible Units: 4
- REL 112g Religions of Ancient Egypt and the Near East Units: 4
- REL 114g The Mediterranean: A Religious History Units: 4
- REL 115g Jerusalem, City of Three Faiths Units: 4
- REL 121g The World of the New Testament Units: 4
- REL 125gp Introduction to Christianity: Antiquity to 1500 Units: 4
- REL 132g Origins of Western Religions Units: 4
- REL 134g Introduction to Buddhism Units: 4
- REL 135g Chinese Religions and Culture Units: 4
- REL 136g Sense and Sensuality in Indian Religions and Culture Units: 4
- REL 137g Introduction to Islam Units: 4
- REL 138g Japanese Religions and Culture Units: 4
- REL 141g Global Religions in Los Angeles Units: 4
- REL 147g Religion, Media and Popular Culture Units: 4

Upper-division Options:

- CLAS 323 Aegean Archaeology Units: 4
- COMM 426 Religion, Media and Hollywood: Faith in TV Units: 4
- EALC 431 The Taoist Tradition Units: 4
- JS 321 Gender and Judaism Units: 4
- JS 361 Scripture and Polemic in Judaism, Christianity and Islam Units: 4
- JS 382 Judaism as an American Religion Units: 4
- JS 467 Modern Jewish Thought Units: 4
- REL 302 Religions of Ancient Egypt and the Near East Units: 4
- REL 303g Exploring Ancient Ways of Living: Experimental Archaeology Units: 4
- REL 304 Ethics and Global Heritage Units: 4
- REL 311g The Bible in Western Literature Units: 4
- REL 312 Biblical Wisdom Literature Units: 4
- REL 314 Introduction to Shiism Units: 4
- REL 315 Thought and Life of Islam Units: 4
- REL 316 Women and the Islamic Tradition Units: 4
- REL 317g The Bible in Its Ancient Context Units: 4
- REL 324g Sex and the Bible: Gender, Sexuality, and Scripture Units: 4
- REL 325g Religious Experience in the Greco-Roman World Units: 4
- REL 326gp Historical Jesus Units: 4
- REL 327g Heretics, Martyrs, and Miracles Units: 4
- REL 329 Themes in the Religions of China Units: 4
- REL 330 Introduction to the Religions of India Units: 4
- REL 331 Religions of East Asia Units: 4
- REL 332 Religions of Japan Units: 4
- REL 334g Religion and Colonial Encounter Units: 4
- REL 335 Gender, Religion, and Sexuality Units: 4
- REL 336w Re-Viewing Religion in Asian America Units: 4
- REL 338 Mysticism and Religious Desire Units: 4
- REL 339 Studies in the History of Christianity Units: 4
- REL 340 Introduction to Indian Philosophy Units: 4
- REL 341 Technology, Culture, and Ethics Units: 4
- REL 342g Buddhist Modernism Units: 4
- REL 345p Islamic Mysticism: Sufism Units: 4
- REL 350 Drugs, Alcohol, Visions and Altered States in Religion Units: 4
- REL 359g Culture in Diaspora: The Jews of Spain Units: 4
- REL 361 Law and Religion Units: 4
- REL 364 Religion and Ethics Units: 4
- REL 366 Religion and Social Change Units: 4
- REL 370 Religion and Visuality Units: 4
- REL 371 Religion and the Supernatural Units: 4
- REL 376g Religion and Human Rights Units: 4
- REL 394 Archaeology of Egypt and the Near East Units: 4
- REL 402 Cultural Heritage, Religion, and Politics in the Middle East Units: 4
- REL 414 History of Islamic Law Units: 4
- REL 415 Seminar in Buddhism Units: 4

- REL 417 Seminar in South Asian Religions Units: 4
- REL 435 Religious Thought After the Enlightenment Units: 4
- REL 440 Christian Thought in the 20th Century Units: 4
- REL 441 Origins of Modern Theology Units: 4
- REL 442 Religion and Science Units: 4
- REL 462 Religion and Violence Units: 4
- REL 468 Sociology of Religion Units: 4
- REL 469 Black Religion in America Units: 4
- REL 473 Advanced Hebrew Bible Studies Units: 4
- REL 474 Advanced New Testament Studies Units: 4
- REL 475 Religion, Material Culture and the Senses Units: 4
- REL 479 Seminar in Christian Thought Units: 4
- REL 481 History of Religion in America Units: 4
- REL 483 Religion and Popular Culture in the United States Units: 4
- REL 493 Art and Archaeology of Religion Units: 4
- REL 494 Lab Methods and Theories in Archaeology Units: 4
- REL 495 Field Methods and Theories in Archaeology Units: 4
- REL 499 Special Topics in Religion Units: 2, 3, 4

Additional Requirements

Students who intend to do graduate work in some area of religious studies are encouraged to concentrate their course selections in the area of their preference and to begin learning the languages that are essential for study in that area. This includes modern languages such as Arabic, Chinese, French, German or Japanese, and perhaps an ancient language.

Minor

Archaeology Minor

Students gain long-term perspectives by studying of the material traces of the past human activity and by joining in its discovery. The minor in Archaeology is available to students in all schools and departments.

Lower-Division Requirement (4 units)

Required Course (4 units)

- ANTH 202g Archaeology: Our Human Past Units: 4

Upper-Division Requirement (16 units)

Select one course from the Theories and Methods list of the Archaeology Major (4 units).

Additionally, select any one upper-division course from those listed under Archaeology Major (4 units):

Take one course from the Ethics and Heritage list of the Archaeology Major (4 units)

Take Capstone Course (4 units)

- CLAS 465 Archaeology and Society Units: 4

Total Requirement: 5 courses (20 units)

Archaeology of California Minor

Students gain diverse, long-term perspectives on Los Angeles, California state, the west, and the USA by joining in the discovery and study of the material traces of past human activity during an archaeological excavation and/or survey on USC's campus and/or elsewhere in California. The minor in Archaeology of California is available to students in all schools and departments. Students complete this minor through the archaeology block semester program.

In a single semester, complete these three courses:

- ANTH 307 Trojan Archaeology: Excavating USC Units: 4
- REL 304 Ethics and Global Heritage Units: 4
- REL 494 Lab Methods and Theories in Archaeology Units: 4

and complete one of these courses:

- ANTH 377g Archaeological Interpretation of Complex Societies Units: 4
- CLAS 465 Archaeology and Society Units: 4

Contemplative Studies Minor

The minor in Contemplative Studies provides students with the opportunity to explore contemplative traditions — such as mindfulness, meditation and prayer — critically and from multiple perspectives. Courses taken from within the department will enable students to understand contemplative traditions from historical, doctrinal, institutional and cultural perspectives. Courses from other units included in the program place contemplative traditions within scientific, sociological and experiential frameworks and also consider contemporary applications of such practices.

Total unit requirement for the minor is 20 units; 16 units must be upper-division.

Required Course

- REL 301 Introduction to the Study of Religion Units: 4

Lower-division Electives

Complete a total of 4 units.

- ANTH 101g Body, Mind and Healing: Introduction to Medical Anthropology Units: 4
- PHED 120a Yoga Units: 1
- PHED 120b Yoga Units: 1
- PHED 120c Yoga Units: 1
- REL 134g Introduction to Buddhism Units: 4
- REL 135g Chinese Religions and Culture Units: 4
- REL 136g Sense and Sensuality in Indian Religions and Culture Units: 4
- REL 138g Japanese Religions and Culture Units: 4
- REL 141g Global Religions in Los Angeles Units: 4
- REL 146gp Spirituality in America Units: 4

Upper-division Electives

Complete 8 units.

- BAEP 472 The Science of Peak Performance Units: 2
- COLT 382gw Zen and Daoism in Asian Literature Units: 4
- HP 440 Happiness, Well-Being, and Health Units: 4
- REL 312 Biblical Wisdom Literature Units: 4
- REL 329 Themes in the Religions of China Units: 4
- REL 330 Introduction to the Religions of India Units: 4
- REL 331 Religions of East Asia Units: 4
- REL 332 Religions of Japan Units: 4
- REL 338 Mysticism and Religious Desire Units: 4
- REL 340 Introduction to Indian Philosophy Units: 4
- REL 342g Buddhist Modernism Units: 4
- REL 345p Islamic Mysticism: Sufism Units: 4
- REL 350 Drugs, Alcohol, Visions and Altered States in Religion Units: 4
- REL 415 Seminar in Buddhism Units: 4
- REL 417 Seminar in South Asian Religions Units: 4
- REL 431 The Taoist Tradition Units: 4

Additional Course Work

Select 4 additional units from Religion or Jewish Studies in consultation with an adviser.

Total Units: 20

A total of 16 units must be upper-division.

Jewish Studies Minor

Students taking the Jewish studies minor must enroll in either JS 100 or JS 180. In addition, they must complete four upper-division courses selected from the Judaism as a Religious Tradition track and the Jewish History and Culture track listed in the Jewish studies major description.

The total unit requirement for the minor is 20 units; 16 of those units must be upper-division.

Religion Minor

Students taking the religion minor must enroll in REL 301 Introduction to the Study of Religion. In addition, they must complete four additional religion courses, at least three of which must be upper-division courses.

The total unit requirement for the minor is 20 units; 16 of those units must be upper-division.

Students who wish to focus their minor in Jewish studies must minor in Judaic Studies.

Graduate Certificate

Jewish Studies Graduate Certificate

The Graduate Certificate in Jewish Studies is offered by the School of Religion in USC Dornsife College. It is designed to give students pursuing research in areas related to Jewish Studies (including Judaism as a religion, the history of Jews, Jewish thought, etc.) a solid grounding in the field, as well as mentorship from Jewish Studies faculty.

Students interested in pursuing the program should meet with the adviser to apply for the program and plan a course of study. In addition to taking relevant course work, candidates must include research on a topic related to Jewish Studies in their PhD dissertation projects (generally the PhD dissertation, though potentially an MA thesis depending on the program); or take a concluding qualifying oral exam based on three seminar or research papers written in conjunction with their Jewish Studies course work.

Completion of the certificate requires 16 units of course work, including REL 560 Colloquium in Jewish Studies and three additional courses that may be pre-approved courses or courses requiring prior approval from the adviser. After consultation and with prior approval, additional appropriate courses taught at USC and HUC-JIR may count toward the certificate. All certificate courses must be at the 500-level or above, and at least 50 percent of their content must focus on Jewish Studies. Students may apply no more than 4 units of 590 Directed Research.

Required Course (4 units)

- REL 560 Colloquium in Jewish Studies Units: 4

Electives (12 units)

Pre-Approved Courses

- HIST 516 Studies in the History of the Holocaust Units: 4
- HIST 518 Problems in Modern European Jewish History Units: 4
- HIST 589 Fascism, Nazism and Communism Units: 4
- JS 501a Bible Texts Units: 4
- JS 501b Bible Texts Units: 4
- JS 501c Bible Texts Units: 4
- JS 504 Modern Hebrew Literature Units: 3
- JS 680 Boundaries of Jewish Normative Behavior Units: 4
- MUHL 550 Music and the Holocaust Units: 2
- REL 500 Methods and Theories in the Study of Religion Units: 4

Additional Courses

Courses may be selected with prior approval from Jewish Studies Graduate Certificate Adviser.

- Hebrew Union College - Jewish Institute of Religion courses and any other appropriate 500-level course from USC.
- One 590 Directed Research course from any department.
- Courses from the list below:
  - AHIS 520 Seminar in Modern Art Units: 4
  - COLT 575 Studies in Literature and Ethnicity Units: 4
  - COLT 620 Seminar in Literature, Culture and Thought Units: 4
  - LAW 871 First Amendment Units: 2, 3, 4
  - REL 525 Colloquium in Global Islam Units: 4

Religious Studies Certificate

The Graduate Certificate in Religious Studies (GCRS) allows students across diverse fields in the humanities, social sciences and professional schools to take advantage of the broad knowledge and expertise of Dornsife's Religion faculty.

Students interested in pursuing the GCRS program should meet with the director of Graduate Studies to apply to the program and plan a course of study. In addition to taking relevant course work, candidates must also do one of the following: (1) include the study of religion in their dissertation projects; or (2) take a concluding qualifying oral exam based on three seminar or research papers written in conjunction with their Religion course work.

Students admitted into the GCRS program will be required to complete REL 500 Methods and Theories in the Study of Religion *or* REL 502 Themes in the Study of Religion. They must also take 12 units of elective courses from the pre-approved list below. (Students may also take as an elective whichever of the REL 500 - REL 502 series they did not take as a requirement.) In addition to the courses listed below, others may also be considered for credit on a case-by-case basis at the discretion of the director of Graduate Studies. All GCRS courses must be at the 500-level or above, and at least 50 percent of their content must focus on the study of religion. REL 590 Directed Research may not count for more than 4 of these additional 12 units.

Required Course (4 units)

Select one course.

- REL 500 Methods and Theories in the Study of Religion Units: 4
- REL 502 Themes in the Study of Religion Units: 4

Electives (12 units)

Select 12 units.

Pre-Approved Religion Courses

- REL 500 Methods and Theories in the Study of Religion Units: 4
- REL 502 Themes in the Study of Religion Units: 4
- REL 525 Colloquium in Global Islam Units: 4
- REL 535 Colloquium in Christian Studies Units: 4
- REL 545 Colloquium in Asia Pacific Religions Units: 4
- REL 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- REL 625 Advanced Graduate Seminar in Global Islam Units: 4
- REL 635 Advanced Graduate Seminar in Christian Studies Units: 4
- REL 645 Advanced Graduate Seminar in Asia Pacific Religions Units: 4
- REL 650 Readings in Islamic Texts Units: 4
- REL 651 Readings in Christian Texts Units: 4
- REL 652 Readings in Buddhist Texts Units: 4
- REL 653 Readings in Indic Religious Texts Units: 4
- REL 654 Readings in Chinese Religious Texts Units: 4
- REL 655 Readings in Japanese Religious Texts Units: 4

Pre-Approved Cross-Listed Courses

- EALC 610 Seminar: Buddhism and the Literary Arts in Japan Units: 4
- JOUR 585 Specialized Reporting: Religion Units: 4
- JS 501a Bible Texts Units: 4
- JS 501b Bible Texts Units: 4
- JS 501c Bible Texts Units: 4
- MSCR 571 Music of the Great Liturgies Units: 2
- SOWK 682 Spirituality, Religion, and Faith in Clinical Practice Units: 3

Doctoral Degree

Religion (PhD)

Course Requirements

Sixty-four units of course work are required for the PhD degree, including units of previous graduate work for which credit is allowed. No more than two language courses at the 400-level and no more than two non-language courses at the 400-level (i.e., 16 units) may be applied to the total requirement of 64 units. Time of residency is contingent upon the background and preparation of the student.

Core requirements for all doctoral students regardless of track include REL 500, REL 592, REL 593 and a maximum of 8 units of REL 794a Doctoral Dissertation to be applied toward the 64-unit total requirement.

Additionally, mandatory courses for students in the Asia Pacific Religions track include REL 545, REL 645, and one course from the REL 652/REL 653/REL 654/REL 655 series. Mandatory courses for students in the Christian Studies track include REL 535, REL 635 and REL 651. Mandatory courses for students in the Global Islam track include REL 525, REL 625 and REL 650.

In addition to the mandatory courses, students are expected to take elective courses in areas that will support their dissertation work. Such courses may be offered in related departments in the university as well as in the School of Religion and should be selected in consultation with the primary adviser.

Each student entering the PhD program will select a primary academic adviser before classes begin. The adviser must be a member of one of the three tracks that the student envisions specializing in. In addition, at least one other faculty member from that track is selected to constitute, along with the primary adviser, the student's "mentoring committee." The mentoring committee is responsible for overseeing the student's program of course work, course of language study, timing of qualifying exams and so on. The membership of the mentoring committee can be changed at any time with the agreement of the student, the student's primary adviser, and the School of Religion director of Graduate Studies. The dissertation Committee (see below) will replace the mentoring committee once candidacy is achieved. Students are expected to maintain a 3.5 GPA in course work.

The mentoring committee conducts an annual review of the student's academic performance and progress toward the degree in the spring of each year, before the end of the spring term. Should a student's performance be considered unsatisfactory, following consultation with the director of Graduate Studies, the student will be placed on probation for one year and given the opportunity to improve his or her performance. If a student's performance is still considered unsatisfactory at the end of the probationary year, the student will be dismissed from the program. Only after a successful annual review in the second year will the student be permitted to convene their qualifying examination committee.

Foreign Language Requirements

Language competencies vary by track and are determined in consultation with the mentoring committee. Here are some general guidelines:

Asia Pacific Religions Track: Advanced facility in at least one Asian language is considered essential to the Asia Pacific Religions Track. Each student selects a primary language area. The Mentoring Committee determines which possible additional languages are necessary for the student's course of study, and the procedures for the evaluation of proficiency in those languages. The following is provided as a guideline depending on the area of sub-specialization.

- *Chinese:* Classical and modern Chinese, as well as modern Japanese (as a research language) and a modern European research language.
- *Japanese:* Classical (Bungo) and modern Japanese, as well as Kanbun, and one modern research language (European, modern Chinese, or modern Korean)
- *Korean:* Advanced Korean, as well as either modern Japanese (as a research language) or a European modern research language.
- *Sanskrit and Hindi:* Advanced competency in two South Asian languages, classical or modern, plus a modern research language judged relevant to the student's research.

Christian Studies Track: Students are required to demonstrate advanced ability in two languages other than English in order to enable comparative research. Given the temporal and global span of Christian traditions, the specific languages will be determined on a case-by-case basis by the student's mentoring committee. Customarily the committee will select one or two ancient languages and one or two modern languages. The following are the languages most frequently studied in the Christian Studies Track, but the mentoring committee can select others as needed:

- Ancient: *Hebrew, Greek, Syriac, Latin,* as well as medieval vernaculars
- Modern: French, Spanish, Italian, German, Portuguese, Korean

Global Islam Track: Required to demonstrate advanced ability in the primary lingua franca of Islamic civilization to ensure the ability to conduct original research. Secondarily, students are generally encouraged to acquire facility in a secondary language within traditional Muslim religious and secular literature. Students are also encouraged to acquire facility in one European research language where deemed appropriate.

- *Arabic:* Classical and Modern Standard, as the primary research language.
- *Persian:* Classical and Modern, as a possible secondary research language.
- *French or Spanish:* (Elective) a reading knowledge to conduct research on or in specific modern communities.

Qualifying Examination and Dissertation Prospectus

The qualifying examination process consists of five stages: (1) constituting the qualifying examination committee (this would normally include the members of the mentoring committee), (2) determining the three exam areas by the student and the qualifying examination committee, (3) taking the written examinations, (4) submission of the dissertation prospectus, (5) the qualifying oral examination.

Preparation for these exams should begin early in the student's course work. In consultation with the mentoring committee the students will select their primary area and also take an exam in the other two cognate areas. Preparation for the qualifying exam continues with supplementary readings based on a bibliography prepared by the student in conjunction with the qualifying examination committee. This committee is responsible for setting the exam questions for the cognate written exams. The student is given 24 hours to write on a total of three questions for each exam. Each of the written exams is evaluated by all members of the examination committee.

The dissertation prospectus should begin with a general review of the scholarship in the field, and situate the thesis within that field. It should clearly articulate the thesis and program of research, identifying the available source material to be consulted. The prospectus must include a chapter outline, and a full bibliography of primary and secondary sources.

The oral examination will occur shortly after the submission of the dissertation prospectus. It will focus on the content of the written exams, the basic literature in the student's primary field, as well as the content and cogency of the prospectus.

Dissertation

The dissertation committee, consisting of three faculty members, is formed immediately following advancement to candidacy. The committee consists of at least two faculty members in the track of the student's specialization as well as one other School of Religion faculty member. Candidates may also add an additional faculty member external to the School of Religion if appropriate. This final stage of the program requires the submission of an acceptable dissertation based on original investigation. The dissertation must show technical mastery expected in each track, evidence of independent research, and the analytical and interpretive ability expected of a scholar.

Slavic Languages and Literatures

The Department of Slavic Languages and Literatures offers a BA in Russian and minors in Russian and Russian Area Studies. The major combines thorough preparation in the Russian language with the study of Russian literature, art and culture. Particular emphasis is placed on developments in contemporary Russia. Students are required to study four semesters of Russian language as a prerequisite to the major. The Russian major requires an additional three semesters of language study, three semesters of an advanced seminar on Russian culture (with varying content), and two elective courses, either in Russian literature and culture (in translation or Russian, depending on course scheduling) or in Russian Area Studies. The department also administers, together with the School of International Relations, a major in Central European Studies, which combines background in relevant languages (Russian plus either German or Polish or more intensive study of Russian) with course work in international relations and the history, culture and politics of the region. In addition, the department offers a doctorate in Slavic Languages and Literatures.

Graduate Degrees

Doctor of Philosophy in Linguistics (Specialization in Slavic Linguistics)

Application deadline: January 1
See Linguistics in this catalogue.

Bachelor's Degree

Central European Studies (BA)

The major in Central European studies combines background in relevant languages (Russian plus either German or Polish, or more intensive study of Russian) with course work in international relations and the history, culture and politics of the region.

No longer an imperial backwater, Central Europe has risen from its Cold War stasis to become one of the world's most dynamic and important regions. Stretching from the Baltic Sea to the Balkan Peninsula, and from the Eastern lands of Germany to the Western regions of Russia, this onetime great-power battleground is now a vital trade and energy corridor, a mosaic of languages and cultures, a place of both successful state-building and persistent ethnic frictions, and a promising but still-precarious bridge between the former Soviet Union and the West. Central Europe rivals the Far East and Southwest Asia as one of the world's most strategically important regions — now, and over the coming decades. Those who master its history and politics, its economic, cultural and linguistic diversity, will be well positioned for fellowships, graduate work, business or analytical careers centered on this fascinating region.

The objectives of this interdisciplinary major are to provide students with: 1) the historical background and linguistic-cultural skills necessary for in-depth study of Central Europe; 2) knowledge of its main post-Cold War political, ethnic, and economic trends; and 3) understanding of current issues from nationalism and immigration to trade, military-diplomatic and alliance politics.

Requirements

The fundamental linguistic background of the major is Russian (12 units).

Required Courses

- RUSS 120 Beginning Russian I Units: 4
- RUSS 150 Beginning Russian II Units: 4
- RUSS 220 Intermediate Russian I Units: 4

Courses

Beyond the second year of Russian, students may choose from among three options: further work on Russian; or a year of German; or a year of Polish (8 units).

Russian

- RUSS 250 Intermediate Russian II Units: 4
- RUSS 310 Advanced Russian in Popular Culture Units: 4 or
- SLL 340 Intercultural Communication in Russian Units: 4

German

- GERM 101 German I Units: 4
- GERM 102 German II Units: 4

Polish

- SLL 122 Elementary Polish I Units: 4
- SLL 152 Elementary Polish II Units: 4

Required Courses, Upper-Division

Required upper-division courses in international relations: two courses must be chosen from among the following (8 units):

- IR 345 Russian and Post-Soviet Foreign Policy Units: 4
- IR 346 Communism and Post-Communism: Eastern Europe and the Balkans Units: 4
- IR 385 European Foreign Policy and Security Issues Units: 4

Elective Courses

In addition three electives are required from among the following. At least one course must be at the 400 level. With prior approval, IR 490x Directed Research (4 units) or SLL 490x Directed Research (4 units) may be substituted for one of these courses (12 units):

- HIST 323 The Holocaust in 20th Century Europe Units: 4
- HIST 365 The Second World War Units: 4, 2 years
- HIST 414 Contemporary Europe Units: 4
- HIST 416 History of Imperial Russia: 1689–1917 Units: 4
- HIST 417 History of Soviet Russia: 1917–1991 Units: 4, 2 years
- HIST 422 European Intellectual and Cultural History: The 20th Century, 1920 to the Present Units: 4
- HIST 427 The German Question: Nation and Identity in Modern Central Europe Units: 4
- IR 369 Post-War European Relations Units: 4
- IR 439 Political Economy of Russia and Eurasia Units: 4
- IR 468 European Integration Units: 4
- POSC 366 Terrorism and Genocide Units: 4
- POSC 371 European Political Thought II Units: 4
- POSC 463 European Politics Units: 4
- POSC 464 Politics of Russia and Eastern Europe Units: 4
- SLL 302g Modern Russian Literature Units: 4
- SLL 303 Contemporary Russian Literature Units: 4
- SLL 330gp Russian Thought and Civilization Units: 4
- SLL 397 Literature and Film in Eastern European Historical Experience Units: 4
- SLL 465 Seminar in Russian Studies Units: 4

Russian (BA)

Required Courses, Lower-Division

- RUSS 120 Beginning Russian I Units: 4
- RUSS 150 Beginning Russian II Units: 4
- RUSS 220 Intermediate Russian I Units: 4
- RUSS 250 Intermediate Russian II Units: 4 or
- SLL 255 Business Russian Units: 4

Required Courses, Upper-Division

- RUSS 310 Advanced Russian in Popular Culture Units: 4
- SLL 321 Russian Culture Units: 4 or
- SLL 330gp Russian Thought and Civilization Units: 4
- SLL 340 Intercultural Communication in Russian Units: 4
- SLL 465 Seminar in Russian Studies Units: 4 (12 units required; taken three times with varying content)

Elective Courses

- Two courses approved by the undergraduate adviser

Minor

Russian Area Studies Minor

Lower-division Requirements

Four semesters of Russian language

- RUSS 120 Beginning Russian I Units: 4
- RUSS 150 Beginning Russian II Units: 4
- RUSS 220 Intermediate Russian I Units: 4 and either
- RUSS 250 Intermediate Russian II Units: 4 or
- SLL 255 Business Russian Units: 4
  or its equivalent

Upper-division Requirements

The core course

- SLL 330gp Russian Thought and Civilization Units: 4

One course outside the Slavic department, from among the following:

- HIST 415 Medieval and Early Modern Russia Units: 4, 2 years
- HIST 416 History of Imperial Russia: 1689–1917 Units: 4
- HIST 417 History of Soviet Russia: 1917–1991 Units: 4, 2 years
- HIST 424 Family, Work, and Leisure in Russian History Units: 4
- IR 345 Russian and Post-Soviet Foreign Policy Units: 4
- IR 346 Communism and Post-Communism: Eastern Europe and the Balkans Units: 4
- IR 439 Political Economy of Russia and Eurasia Units: 4
- IR 483 War and Diplomacy: The U.S. in World Affairs Units: 4
- POSC 464 Politics of Russia and Eastern Europe Units: 4

And one elective, to be chosen from among: any upper-division SLL/RUSS course in Russian literature, art or culture

- HIST 415 Medieval and Early Modern Russia Units: 4, 2 years
- HIST 416 History of Imperial Russia: 1689–1917 Units: 4
- HIST 417 History of Soviet Russia: 1917–1991 Units: 4, 2 years
- HIST 424 Family, Work, and Leisure in Russian History Units: 4
- IR 345 Russian and Post-Soviet Foreign Policy Units: 4
- IR 346 Communism and Post-Communism: Eastern Europe and the Balkans Units: 4
- IR 439 Political Economy of Russia and Eurasia Units: 4
- IR 483 War and Diplomacy: The U.S. in World Affairs Units: 4
- POSC 464 Politics of Russia and Eastern Europe Units: 4

Note:

The course taken to fulfill the requirement outside the Slavic department cannot also count as an elective.

Minimum units required: 28

Russian Minor

Lower-division requirements for the major (RUSS 120, RUSS 150, RUSS 220 and choice of RUSS 250 or SLL 255) plus three upper-division elective courses chosen from the following (at least two of the areas must be represented): Russian language (RUSS 310, SLL 340); Russian literature and culture taught in Russian (SLL 321, SLL 465); Russian literature, art and culture taught in translation (SLL 330, SLL 344, SLL 345, SLL 348, SLL 378).

Minimum units required: 28

Doctoral Degree

Slavic Languages and Literatures (PhD)

The doctorate in Slavic languages and literatures is designed to prepare students for a career of teaching and scholarship at the university level. It provides a thorough grounding in Russian literary and cultural history as well as in the theoretical perspectives current in the field. Elective course work, particularly at the upper level, allows students to take advantage of the department's expertise in such additional areas as Russian art, Russian theater, and eastern European cinema. The linguistic component of the curriculum together with the experience as a teaching assistant in Russian language courses that many students gain also serves as preparation for positions involving language teaching. Depending on departmental offerings, further study in a second Slavic language and culture may also be possible.

Admission Requirements

An undergraduate major in Russian or its equivalent is a prerequisite for graduate work.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation page and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Arts in Slavic Languages and Literatures

The department does not accept applicants for a Master of Arts degree in Slavic Languages and Literatures. The MA degree is intended only as a transitional degree in the process of completing requirements for the PhD in Slavic Languages and Literatures. The MA portion of the program comprises 30 units.

First-year Review

The program conducts a thorough review of all first-year students at the end of the second semester. To be permitted to continue doctoral work, students must receive a satisfactory evaluation in this review.

Language Requirements

Non-native speakers of Russian must successfully complete 8 units (4 semesters) of SLL 500 Topics in Advanced Russian and pass a proficiency exam in the language.

Field Examination

A written exam based on a reading list, followed by an oral exam, must be successfully passed before the MA can be awarded. It is normally taken at the end of the semester in which MA course work is completed.

Required MA - Level Courses

- SLL 500 Topics in Advanced Russian Units: 2
- SLL 501 Proseminar in Russian Literature Units: 3
- SLL 512 History of the Russian Language Units: 3
- SLL 532 18th Century Russian Literature Units: 3
- SLL 546 The Russian Novel Units: 3

Doctor of Philosophy in Slavic Languages and Literatures

Students pursuing the Ph.D. in Slavic Languages and Literatures are required to complete a minimum of 60 units of

course work beyond the baccalaureate. In addition to the 30 units completed toward the M.A., students are required to complete the courses listed below; to demonstrate proficiency in spoken and written Russian; to demonstrate reading knowledge of French and German (in exceptional cases a second Slavic language may substitute for either French or German; instruction in Slavic languages other than Russian is not scheduled on a regular basis); to pass the qualifying examination, which must be taken after all course work has been completed; to complete and successfully defend a dissertation.

Required PhD - Level Courses

- SLL 515 Russian Linguistics Units: 3
- SLL 545 19th Century Russian Poetry Units: 3
- SLL 550 Russian Modernism Units: 3
- SLL 555 Soviet Literature I (1917–1953) Units: 3

Two of the following courses (6 units):

- SLL 650 Seminar in Russian Literature Units: 3
- SLL 660 Seminar on a Single Author or Work Units: 3
- SLL 665 Seminar in Russian Culture and the Arts Units: 3

Additional Requirements

Plus electives, from SLL or relevant offerings in CSLC, COLT, ENGL, FREN, SPAN etc. as approved by the department. At least 9 of these units must be completed in SLL.

Dissertation Defense

An oral defense of the dissertation must be satisfactorily completed before the dissertation can be filed with the Graduate School.

Awarding of Degree

The degree of PhD in Slavic Languages and Literatures is conferred when all of the degree requirements have been completed satisfactorily.

Sociology

The Department of Sociology offers bachelor's degrees in Sociology, Health and Human Sciences, and Non-Governmental Organizations and Social Change. The Department of Sociology also offers a number of minors, a graduate certificate in science and technology studies, and the Doctor of Philosophy in Sociology. Students of sociology examine the patterns of social life, focusing on the relationship of individuals to society and the interaction of culture, economy and politics in shaping social life. The greater Los Angeles area provides a natural laboratory for students to explore such sociological themes as race relations, work and the workplace, immigration, the family in a changing society, population trends, globalization, religion and the criminal justice system. Matching the special strengths of our faculty and cutting edge research in the discipline, USC's sociology program offers students the opportunity to learn about social issues locally, nationally and internationally, as well as develop empirical research tools to conduct research, and analyze and interpret data in order to create social change. Many of our undergraduate courses include opportunities to engage actively with the community and to pursue multi-faceted independent research projects.

**Recipient of university-wide or college teaching award.*

Undergraduate Degrees

Honors Program

Seniors with 3.5 GPAs in the major and 3.25 overall are encouraged to apply to the sociology honors program. Under faculty guidance, honors students design and complete a significant piece of original sociological research.

Juniors and seniors who have made substantial progress toward completion of the program and have achieved a 3.3. GPA in sociology and a 3.0 GPA overall are eligible for the Alpha Kappa Delta International Sociology Honors Society.

University Requirements for All Minors

To satisfy the university's minor requirements, students must choose at least four courses (16 units) outside their major department and at least four courses (16 units) of upper-division course work. In addition, at least four courses (16 units) must be dedicated to the minor (not counting for credit toward a major, another minor or USC core requirements).

Interdisciplinary Minors

American Studies and Ethnicity (see American Studies and Ethnicity).

Law and Society (see Political Science).

Race, Ethnicity and Politics (see Political Science).

Graduate Degrees

The Department of Sociology offers programs of study leading to the Doctor of Philosophy degree. The PhD is directed toward the training of theoretically and methodologically sophisticated sociologists who have an enduring commitment to the practice and teaching of sociology.

Deadline

Applicants must complete their applications by December 1. Consideration for university fellowships is possible as early as November for students whose applications are complete.

Prerequisites

All applicants must have a bachelor's degree, a GPA of at least 3.0, and one or more courses in either undergraduate statistics or college algebra.

Criteria

Admission to regular graduate status ordinarily requires possession of a bachelor's degree, a GPA of at least 3.0, one or more courses in undergraduate statistics and/or college algebra, and three letters of recommendation. The GRE is also required. International applicants must also submit their score on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS). Approximately 5-8 students enroll each year from the available pool of applicants. Each application receives careful attention and is judged in terms of the full set of criteria.

A limited number of graduate course units taken elsewhere may be considered for transfer into the graduate program. These units are transferred in on a course-by-course basis.

Application Procedures

The following materials should be submitted to apply for graduate study:

1. an online USC application form (available at gradadm.usc.edu) plus a check for the admission fee;
2. official transcripts of all undergraduate and graduate work;
3. the official results of the general aptitude scores of the Graduate Record Examinations (verbal, quantitative and analytical);
4. for international students, a TOEFL or IELTS score;
5. a completed Sociology Department Graduate Application form (please save and upload);
6. one example of written work (normally a paper written for a course) of no more than 20 pages;
7. three letters of recommendation from persons who can write about your academic performance and your potential as a social scientist;
8. a personal statement describing (1) your present sociological interest, (2) the books, articles or ideas that have had the greatest influence on your interests in sociology, and (3) what you hope to be doing in the field of sociology 10 years after you receive your degree. We welcome you to include other aspects of your experience that you think are important sources of your sociological interests. We stress, though, that an effective personal statement will illustrate your intellectual engagement and your interest in producing high-quality scholarship.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and The Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Residence

All graduate students must be in residence and must take at least 8 units of graduate work each semester (except during Advanced and Qualifying Examinations), prior to work on the dissertation.

Master of Arts in Sociology

The department does not admit students whose objective is a master's degree. However, if a student accepted in the program does not have a master's degree, the department strongly recommends completion of the requirements for the MA in the course of work toward the PhD degree.

Bachelor's Degree

Health and Human Sciences (BA)

This degree is for individuals who desire the freedom and responsibility to design their own educational path. USC students, living in urban Los Angeles, have access to a myriad of research and volunteer experiences to complement their academic course work. The Health and Human Sciences major encourages the inquiry skills and knowledge needed to succeed in the evolving disciplines of health, science and medicine.

The field of health care, including medicine, pharmacy, dentistry and allied health providers, has changed so dramatically over the last 25 years that our traditional approach to training undergraduates has become obsolete. The traditional biology degree does not adequately provide the student with the knowledge to pursue a career in health. Preparing for a career in health requires an interdisciplinary approach with a foundation of science. As stated by the Association of American Medical Colleges (AAMC), doctors must be able to appreciate the diverse populations they work with and "have a clear understanding of the impact of behavior on health." This requires understanding how psychological, cultural, social, economic, ethical and biological factors influence our lives and most importantly, our health.

The Health and Human Sciences curriculum combines all of the necessary science, social science, humanities and critical thinking concepts, as well as field experience, in order to educate a broadly thinking and prepared student. The major is designed so that every student will be able to choose a semester abroad program as a component of this major.

This major is open to all students. Students are not required to pursue a pre-health track to declare this major.

Lower-Division Core Requirements (16 Units)

- BISC 150Lgx The Nature of Human Health and Disease Units: 4 or
- BISC 120Lg General Biology: Organismal Biology and Evolution Units: 4 or
- BISC 220Lg General Biology: Cell Biology and Physiology Units: 4
- CHEM 105aLg General Chemistry Units: 4
- MATH 114gx Foundations of Statistics Units: 4 or
- MATH 125g Calculus I Units: 4 or
- MATH 208x Elementary Probability and Statistics Units: 4
- SOCI 242g Sociology, Demography and Health Units: 4

Modules in the Human Sciences (16 Units)

Choose one module among the six below:

1. Health, Gender and Ethnicity

- ANTH 125g Social Issues in Human Sexuality and Reproduction Units: 4
- ANTH 305 Childhood, Birth and Reproduction Units: 4
- PSYC 462m Culture and Mental Health Units: 4
- SWMS 336 Health, Gender and Ethnicity Units: 4

2. Health and the Mind

- PSYC 100Lg Introduction to Psychology Units: 4
- PSYC 336L Developmental Psychology Units: 4 or
- PSYC 367g Stress, Health, and the Mind-Body Connection Units: 4
- PSYC 360 Abnormal Psychology Units: 4
- PSYC 361 Introduction to Clinical Psychology Units: 4 or
- PSYC 462m Culture and Mental Health Units: 4

3. International Health

- ANTH 101g Body, Mind and Healing: Introduction to Medical Anthropology Units: 4 or
- ANTH 105g Culture, Medicine and Politics Units: 4
- IR 339 Public Health and International Relations Units: 4
- IR 306 International Organizations Units: 4 or
- IR 371 Global Civil Society: Non-State Actors in World Politics Units: 4
- IR 382w Order and Disorder in Global Affairs Units: 4 or
- SOCI 362 Global and Transnational Sociology Units: 4 or
- ANTH 305 Childhood, Birth and Reproduction Units: 4

4. Sociology of Health

- ANTH 336 Health, Gender and Ethnicity Units: 4 or
- IR 339 Public Health and International Relations Units: 4
- SOCI 200gm Introduction to Sociology Units: 4 or
- SOCI 225gw Sociology of Health and the Body Units: 4 or
- SOCI 210g Science, Technology, and Social Conflict Units: 4
- SOCI 360m Social Inequality: Class, Status and Power Units: 4
- SOCI 475 Medical Sociology Units: 4

5. Health and Aging

- GERO 321 Introduction to Psychology and Aging Units: 4 or
- GERO 330 Society and Adult Development Units: 4
- GERO 340 Policy, Values, and Power in an Aging Society Units: 4 or
- GERO 437 Social and Psychological Aspects of Death and Dying Units: 2 or 4 (4 units required)
- GERO 380m Diversity in Aging Units: 4 or
- GERO 435m Women and Aging: Psychological, Social and Political Implications Units: 4
- GERO 416 Health Issues in Adulthood Units: 4

6. Biology of Health

- HBIO 300 Evolution, Ecology, and Culture Units: 4
- HBIO 301L Human Anatomy Units: 4
- HBIO 302L Nutrition and Metabolism Units: 4 or
- BISC 450L Principles of Immunology Units: 4
- BISC 307L General Physiology Units: 4 or
- HBIO 420L Applied Human Physiology Units: 4

Experiential Learning Component (1-4 Units)

Choose one course from the list below:

- AMST 365 Leadership in the Community — Internship Units: 4
- GERO 495 Practicum in Geriatric Care Units: 4
- MDA 250 Internship for Liberal Arts: Work and Career — Theory and Practice Units: 1, 2
- POSC 395 Directed Governmental and Political Leadership Internship Units: 2, 3, 4, 5, 6, 7, 8
- SOCI 450 Non-Governmental Organizations/Non-profits Field Practicum Units: 4
- SOCI 472 Health, Disease, Language and Culture: Guatemala Units: 3
- SWMS 311 Gender and Sexuality Studies: Internship Units: 2, 4, 8

Upper-Division Electives (8 Units)

Choose two courses from the list below, *or* one from this list and one upper-division elective from a different module option that you have not completed.

- BISC 312x Molecular Biochemistry Units: 4 or
- CHEM 350g Molecular Principles of Biochemistry Units: 4
- BISC 325 Genetics Units: 4
- BISC 406L Biotechnology Units: 4
- BISC 421 Neurobiology Units: 4
- BISC 440 Biodemography of Aging Units: 4
- CHEM 322aL Organic Chemistry Units: 4
- HBIO 405 Evolutionary Medicine Units: 4
- HIST 330 Drugs: A Global Cultural History Units: 4
- MDA 320 Global Ethics: Poverty, Health and the Human Condition Units: 4
- REL 460 Senior Seminar: Medical Ethics Units: 4
- PSYC 320 Principles of Psychobiology Units: 4
- PSYC 326 Behavioral Neuroscience Units: 4
- PSYC 337L Adult Development and Aging Units: 4
- PSYC 355 Social Psychology Units: 4
- SOCI 305m Sociology of Childhood Units: 4
- SOCI 325 Applied Social Research Methods Units: 4
- SOCI 342m Race Relations Units: 4
- SOCI 369 The Family in a Changing Society Units: 4
- SOCI 431 Cities Units: 4
- SOCI 450 Non-Governmental Organizations/Non-profits Field Practicum Units: 4
- SSCI 340 Community Health Scan Units: 4

Total units required for the BA in Health and Human Sciences: 41-44

(at least 20 upper-division)

Non-Governmental Organizations and Social Change (BA)

This interdisciplinary program focuses on the roots of social conflict, on theories and methods for understanding them, and on the non-governmental organizations (NGOs) and nonprofits that address them. To remedy social problems, we need to examine their economic, political and social roots, as well as the varied forms of organizations that aim to fix them. Students will engage in various methods of analysis, from investigations of everyday interactions to explorations of larger economic, political and social structures. In classrooms and internships, students will learn how people in NGOs and nonprofits promote new forms of citizenship and governance, aiming to protect the environment and to lessen the suffering of people around the world.

The major requires nine courses (36 units) chosen from the specific lists of requirements below. As with all interdisciplinary majors, students may double-count no more than three courses from this degree to satisfy any other major.

Course Requirements

A. Lower division requirement

Choose one course (4 units) from the following list:

- AMST 252gmw Black Social Movements in the U.S. Units: 4
- ECON 238xg Political Economy and Social Issues Units: 4
- ENST 150gx Environmental Issues in Society Units: 4
- ENST 270 Introduction to Environmental Law and Politics Units: 4
- GEOL 108Lg Crises of a Planet Units: 4
- IR 101gxw International Relations Units: 4
- IR 210gw International Relations: Introductory Analysis Units: 4
- PHIL 141gp The Professions and the Public Interest in American Life Units: 4
- POSC 130g Law, Politics and Public Policy Units: 4
- POSC 248gw Human Rights Units: 4
- POSC 255g Cultures, Civilizations and Ethnicities in World Politics Units: 4
- POSC 265gw Environmental Challenges Units: 4
- SOCI 100gm Los Angeles and the American Dream Units: 4
- SOCI 150gm Social Problems Units: 4
- SOCI 200gm Introduction to Sociology Units: 4
- SOCI 255g Sociology of Globalization Units: 4
- SWMS 215gw Introduction to Gender and Sexuality: International Perspectives Units: 4

B. Core methods

Choose one course (4 units) from the following two:

- SOCI 313L Sociological Research Methods Units: 4
- SOCI 314Lg Analyzing Social Statistics Units: 4

C. Core theory

Choose one course (4 units) from the following five:

- PHIL 337 Political Philosophy Units: 4
- PHIL 437 Social and Political Philosophy Units: 4
- POSC 380 Political Theories and Social Reform Units: 2, 4
- SOCI 270g Sociological Theory Units: 4
- SOCI 445 Political and Social Theory Units: 4

D. Perspectives on NGOs

Choose one course (4 units) from the following three:

- IR 371 Global Civil Society: Non-State Actors in World Politics Units: 4
- SOCI 250gmw Grassroots Participation in Global Perspective Units: 4
- SOCI 408 Volunteers, Non-Governmental Organizations, and Everyday Politics Units: 4
- PPD 371 The Nonprofit Sector and the Public Interest Units: 4

E. Analyzing and identifying roots of social conflict

Choose two courses (8 units):

- ANTH 355 Urban Anthropology Units: 4
- ANTH 316gmp Native Americans in American Public Life Units: 4
- ANTH 357g Cultures of Genocide, Cultures of Care Units: 4
- ANTH 371gm Cross-Cultural Research on Urban Gangs Units: 4

- ANTH 380 Sex and Gender in Anthropological Perspective Units: 4
- BISC 427 The Global Environment Units: 4
- ECON 340 Economics of Less Developed Countries Units: 4 *
- ECON 344 Economic Development of Sub-Saharan Africa Units: 4 *
- ECON 350 The World Economy Units: 4 *
- GERO 340 Policy, Values, and Power in an Aging Society Units: 4
- GERO 483 Global Health and Aging Units: 4
- HIST 323 The Holocaust in 20th Century Europe Units: 4
- HIST 372 Modern Latin America Units: 4
- IR 308w Economic Globalization Units: 4
- IR 310 Peace and Conflict Studies Units: 4
- IR 315 Ethnicity and Nationalism in World Politics Units: 4
- IR 316 Gender and Global Issues Units: 4
- IR 323 Politics of Global Environment Units: 4
- IR 324 Multinational Enterprises and World Politics Units: 4
- IR 325 North-South Relations in the Global Economy Units: 4
- IR 344 The Global South in World Politics Units: 4
- IR 349 International Law and Politics Units: 4
- IR 364 The Political Economy of Latin American Development Units: 4
- IR 367 Africa in International Affairs Units: 4
- MOR 385gm Business, Government and Society Units: 4
- MOR 466 Business and Environmental Sustainability Units: 4
- PHIL 340 Ethics Units: 4
- POSC 320 Urban Politics Units: 4
- POSC 321 Urban Political Problems Units: 4
- POSC 345 International Law Units: 4
- POSC 347 Environmental Law Units: 4
- POSC 350 Politics of Latin America Units: 4
- POSC 363 Cities and Regions in World Politics Units: 4
- POSC 381 Sex, Power, and Politics Units: 4
- POSC 436 Environmental Politics Units: 4
- SOCI 362 Global and Transnational Sociology Units: 4
- SOCI 402 Human Trafficking Units: 4
- SOCI 429 Immigration, Work and Labor Units: 4
- SOCI 430m Work and the Workplace Units: 4
- SOCI 432m Racial and Ethnic Relations in a Global Society Units: 4
- SOCI 460 Key Issues in Contemporary International Migration Units: 4
- SOCI 464 Sociology of Gender and Work Units: 4

Note:

**Prerequisite required*

F. Addressing social conflict and organizing advocacy

Choose two courses (8 units):

- AMST 357m Latino Social Movements Units: 4
- BAEP 491 Introduction to Social Entrepreneurship Units: 4
- BUCO 485 Business Communication Management for Nonprofits Units: 4
- COMM 322 Argumentation and Advocacy Units: 4
- COMM 366 Designing Media for Social Change Units: 4
- COMM 400 Seminar in Communication Units: 4
- COMM 402 Public Communication Campaigns Units: 4
- COMM 412 Communication and Social Movements Units: 4
- COMM 413 Propaganda, Ideology and Public Controversy Units: 4
- COMM 487 Communication and Global Organizations Units: 4
- GERO 350 Administrative Problems in Aging Units: 2 or 4
- IR 306 International Organizations Units: 4
- IR 318 Violent Conflict Units: 4
- IR 337 The Impact of Remittances on Development in Mexico Units: 4
- JS 360m Identity, Community, and Service: Jews and Other Americans Units: 4
- POSC 323 Applied Politics Units: 4
- PPD 318 Financial Accounting in Public and Nonprofit Organizations Units: 4
- PPD 353 Philanthropy and Social Change Units: 4
- REL 468 Sociology of Religion Units: 4
- SOCI 340 Organizations: Bureaucracy and Alternatives to Bureaucracy Units: 4
- SOCI 425 Social Movements: Power, Resistance and Political Dynamics Units: 4
- SOWK 350 Adolescent Gang Intervention Units: 4
- THTR 488mw Theatre in the Community Units: 4

G. Internship experience

One course (4 units) required

- SOCI 450 Non-Governmental Organizations/Non-profits Field Practicum Units: 4

Total course requirements: 36 units

Sociology (BA)

All students must achieve an overall average of C (2.0) or better in the 10 courses (40 units) required for completion of the major.

All sociology majors must complete five core courses of sociology.

At least 8 of the 20 elective units must come from 400-level courses.

Core Courses

- SOCI 200gm Introduction to Sociology Units: 4
- SOCI 270g Sociological Theory Units: 4
- SOCI 313L Sociological Research Methods Units: 4
- SOCI 314Lg Analyzing Social Statistics Units: 4
- SOCI 325 Applied Social Research Methods Units: 4 or
- SSCI 301L Maps and Spatial Reasoning Units: 4

Electives

20 elective units are required to complete the major, with at least 8 of the 20 units from 400-level courses.

300-Level Electives

- AMST 357m Latino Social Movements Units: 4
- JS 379gm Mixing and Matching: Intermarriage in the 21st Century Units: 4
- JS 382 Judaism as an American Religion Units: 4
- SOCI 305m Sociology of Childhood Units: 4
- SOCI 335 Society and Population Units: 4
- SOCI 340 Organizations: Bureaucracy and Alternatives to Bureaucracy Units: 4
- SOCI 342m Race Relations Units: 4
- SOCI 345 Social Institutions Units: 4
- SOCI 350 Social Exclusion, Social Power and Deviance Units: 4
- SOCI 351 Public Policy and Juvenile Justice Units: 4
- SOCI 353 Public Policy and Criminal Justice Units: 4
- SOCI 355m Immigrants in the United States Units: 4
- SOCI 356m Mexican Immigrants in Sociological Perspective Units: 4
- SOCI 360m Social Inequality: Class, Status and Power Units: 4
- SOCI 362 Global and Transnational Sociology Units: 4
- SOCI 369 The Family in a Changing Society Units: 4
- SOCI 376m Contemporary Issues in Asian American Communities Units: 4
- SWMS 385m Men and Masculinity Units: 4

400-Level Electives

- REL 468 Sociology of Religion Units: 4
- SOCI 402 Human Trafficking Units: 4
- SOCI 408 Volunteers, Non-Governmental Organizations, and Everyday Politics Units: 4
- SOCI 410 The Sociology of Popular Culture Units: 4
- SOCI 425 Social Movements: Power, Resistance and Political Dynamics Units: 4
- SOCI 429 Immigration, Work and Labor Units: 4

- SOCI 430m Work and the Workplace Units: 4
- SOCI 431 Cities Units: 4
- SOCI 432m Racial and Ethnic Relations in a Global Society Units: 4
- SOCI 435m Women in Society Units: 4
- SOCI 445 Political and Social Theory Units: 4
- SOCI 450 Non-Governmental Organizations/Non-profits Field Practicum Units: 4
- SOCI 460 Key Issues in Contemporary International Migration Units: 4
- SOCI 464 Sociology of Gender and Work Units: 4
- SOCI 465 Visual Sociology of the City and Its Residents Units: 4
- SOCI 470 Social Change in Low-Income Countries Units: 4
- SOCI 475 Medical Sociology Units: 4
- SOCI 480 The Sociology of Risk and Disaster Units: 4
- SOCI 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8
- SOCI 494 Sociology Honors Seminar I Units: 4
- SOCI 495 Sociology Honors Seminar II Units: 4
- SOCI 499 Special Topics Units: 2, 3, 4

Minor

Forensics and Criminality Minor

The interdisciplinary minor in forensics and criminality was designed for students interested in the study of law, deviant behavior or careers in the criminal justice system. In this program, students study psychological and/or ethical issues related to criminal behavior, consider criminality in the context of social class analysis, and learn about the American system of criminal justice. Twenty units are required, 4 at the lower-division and 16 at the upper-division level. Contact Dornsife College Advising for further details.

Students should choose a curriculum for their minor based on their academic interests. Those students interested in white collar crime, for example, might choose POSC 130 Law, Politics, and Public Policy at the lower-division level, SOCI 350 Social Exclusion, Social Power, and Deviance and PPD 342 Crime and Public Policy.

Those who are interested in the criminal justice system might choose LAW 200x Law and Society, REL 341 Ethics in a Technological Society, SOCI 351 Public Policy and Juvenile Justice, POSC 340 Constitutional Law and POSC 432 The Politics of Local Criminal Justice.

Those interested in individual and social determinants of deviancy might take PSYC 100 Introduction to Psychology, PSYC 360 Abnormal Psychology, or PSYC 363 Criminal Behavior, or PSYC 365 Introduction to Forensic Psychology; SOCI 360 Social Inequality: Class, Status, and Power, LAW 402 Psychology and Law and SOCI 353 Public Policy and Criminal Justice.

Lower-Division Requirement (4 Units)

Choose one course from:

- AMST 101gmw Race and Class in Los Angeles Units: 4
- LAW 200w Law and Society Units: 4
- POSC 130g Law, Politics and Public Policy Units: 4
- PSYC 100Lg Introduction to Psychology Units: 4
- PSYC 165Lg Drugs, Behavior and Society Units: 4
- SOCI 142gm Diversity and Racial Conflict Units: 4
- SOCI 150gm Social Problems Units: 4
- SOCI 200gm Introduction to Sociology Units: 4

Upper-Division Requirements (16 Units)

Choose one course from each group below:

The Individual in Society

- LAW 404 Law and Psychology: Examining the Criminal Justice Process Units: 4
- LING 412 Language and Law Units: 4
- LING 450 New Horizons in Forensic Speaker Identification Units: 4
- PSYC 355 Social Psychology Units: 4 * or
- POSC 441m Cultural Diversity and the Law Units: 4
- PSYC 360 Abnormal Psychology Units: 4 *
- PSYC 363 Criminal Behavior Units: 4 *
- PSYC 365 Introduction to Forensic Psychology Units: 4 *
- REL 341 Technology, Culture, and Ethics Units: 4

Note:

**Prerequisite: PSYC 100*

Social Class and Criminality

- ANTH 371gm Cross-Cultural Research on Urban Gangs Units: 4
- SOCI 350 Social Exclusion, Social Power and Deviance Units: 4
- SOCI 351 Public Policy and Juvenile Justice Units: 4
- SOCI 360m Social Inequality: Class, Status and Power Units: 4
- SOWK 350 Adolescent Gang Intervention Units: 4

The System of Criminal Justice

- LAW 402 Psychology and Law Units: 4
- LAW 403 Mental Health Law Units: 4
- PHIL 430 Philosophy of Law Units: 4
- PHIL 437 Social and Political Philosophy Units: 4
- POSC 340 Constitutional Law Units: 4
- POSC 426 The United States Supreme Court Units: 4
- POSC 444 Civil and Political Rights and Liberties Units: 4
- PPD 340 The American System of Justice Units: 4

Crime and Punishment

- POSC 432 Politics of Local Criminal Justice Units: 4
- PPD 342 Crime and Public Policy Units: 4
- SOCI 353 Public Policy and Criminal Justice Units: 4

Total requirements: five courses (20 units)

Managing Human Relations Minor

College Academic Services Building

(213) 740-2534

This interdisciplinary minor is intended for students in all schools with an interest in human relations as a subject of study or professional goal. In addition to course work in organizational behavior, social psychology and management, this minor includes attention to questions of ethics and leadership.

As with all minors, students must include at least four upper-division courses and four courses dedicated exclusively to this minor (not used for credit toward a major, another minor or general education requirements). Finally, students must select four courses outside their major department. Students seeking the Bachelor of Arts in Sociology must choose four courses outside of sociology; those seeking the Bachelor of Science in Business Administration must choose four courses outside the USC Marshall School of Business.

Requirements

Choose one course from the following (4 units):

- BUAD 304 Organizational Behavior and Leadership Units: 4
- PSYC 355 Social Psychology Units: 4 *

Choose one course from the following (4 units):

- MOR 431 Interpersonal Competence and Development Units: 4 *
- SOCI 340 Organizations: Bureaucracy and Alternatives to Bureaucracy Units: 4
- SOCI 342m Race Relations Units: 4
- SOCI 345 Social Institutions Units: 4

Choose one course from the following list of classes on leadership (4 units):

- CLAS 370 Leaders and Communities: Classical Models Units: 4
- IR 303 Leadership and Diplomacy Units: 4
- MDA 325 Case Studies in Modern Leadership Units: 2 or 4

- MDA 365 The Art and Adventure of Leadership Units: 4
- MOR 470 Global Leadership Units: 4 *

Choose one course from the following list of classes on ethics (4 units):

- BUCO 425 Ethics and Professional Communication Units: 4 *
- MOR 421 Social and Ethical Issues in Business Units: 4 *
- PHIL 340 Ethics Units: 4
- REL 341 Technology, Culture, and Ethics Units: 4

Choose one of the following three capstone classes (4 units):

- ECON 332 Contracts, Organizations and Institutions Units: 4 *
- ECON 471 Economics of Labor Markets and Human Capital Units: 4 *
- MOR 471 Managing and Developing People Units: 4
- SOCI 340 Organizations: Bureaucracy and Alternatives to Bureaucracy Units: 4

Note:

**Course has prerequisite or corequisite*

Total requirements: five courses, 20 units

Photography and Social Change Minor

This minor explores the potential of photography as an instrument of social change that allows individuals to document their circumstances, share their stories and change their lives. Students have the opportunity to examine the impact of images and the power of storytelling both in the classroom and in the field and study the issues raised by this kind of social exploration and commentary.

Students learn techniques of digital photography and theories of culture to help them understand diverse cultural phenomena and navigate their own cultural biases. In the field, students apply these techniques and theories by developing their own body of work. In addition, students can mentor individuals in the community to use photography and digital media to share their personal narratives, thus empowering community members to reflect critically upon their circumstances and to participate in their visual representation.

This interdisciplinary minor brings together students from schools and majors across the USC campus, allowing them to interact with one another and with scholars, artists and professionals associated with key organizations such as the Institute for Photographic Empowerment and Venice Arts.

Lower-Division Requirement

Select one course, based on prior preparation (4 units):

- AHIS 255g Culture Wars: Art and Social Conflict in the Modern World Units: 4
- ANTH 240gm Representing 9/11 and Hurricane Katrina Units: 4
- SOCI 250gmw Grassroots Participation in Global Perspective Units: 4

Upper-Division Requirements

Select two courses in each category below, from different departments (16 units):

Understanding Culture and Change

(8 units, in 2 courses — each from a different department)

- AMST 348m Race and Environmentalism Units: 4
- AMST 357m Latino Social Movements Units: 4
- COLT 303 Globalization: Culture, Change, Resistance Units: 4
- IR 371 Global Civil Society: Non-State Actors in World Politics Units: 4
- JS 330 Jewish Power, Powerlessness, and Politics in the Modern Era Units: 4
- POSC 323 Applied Politics Units: 4
- POSC 441m Cultural Diversity and the Law Units: 4
- REL 336w Re-Viewing Religion in Asian America Units: 4
- REL 366 Religion and Social Change Units: 4
- SOCI 360m Social Inequality: Class, Status and Power Units: 4
- SOCI 470 Social Change in Low-Income Countries Units: 4

Media and Message

(8 units, in 2 courses — each from a different department)

- AHIS 373g History and Theory of Photography Units: 4
- AHIS 469 Critical Approaches to Photography Units: 4
- ANTH 472 Visual Techniques in Anthropology: Stills Units: 4
- COLT 487 Critical Image Units: 4
- COMM 366 Designing Media for Social Change Units: 4
- COMM 451 Visual Communication and Social Change Units: 4
- JOUR 422 Visual Journalism for Non-Majors Units: 4

Note:

Students in this program will also have opportunities for special access to USC Annenberg's Public Diplomacy classes.

Total requirements: 20 units

Sociology Minor

Five courses (20 units) are required to complete the minor in sociology.

All minors are required to take at least two of the core courses in sociology:

Core Courses

- SOCI 200gm Introduction to Sociology Units: 4

  or
- SOCI 270g Sociological Theory Units: 4
- SOCI 313L Sociological Research Methods Units: 4

  or
- SOCI 314Lg Analyzing Social Statistics Units: 4

Note:

The remaining three courses may be chosen from among the upper-division elective courses offered by the department, or as follows:

- AMST 357m Latino Social Movements Units: 4
- JS 379gm Mixing and Matching: Intermarriage in the 21st Century Units: 4
- JS 382 Judaism as an American Religion Units: 4
- REL 468 Sociology of Religion Units: 4
- SOCI 305m Sociology of Childhood Units: 4
- SOCI 335 Society and Population Units: 4
- SOCI 340 Organizations: Bureaucracy and Alternatives to Bureaucracy Units: 4
- SOCI 342m Race Relations Units: 4
- SOCI 345 Social Institutions Units: 4
- SOCI 350 Social Exclusion, Social Power and Deviance Units: 4
- SOCI 351 Public Policy and Juvenile Justice Units: 4
- SOCI 353 Public Policy and Criminal Justice Units: 4
- SOCI 355m Immigrants in the United States Units: 4
- SOCI 356m Mexican Immigrants in Sociological Perspective Units: 4
- SOCI 360m Social Inequality: Class, Status and Power Units: 4
- SOCI 362 Global and Transnational Sociology Units: 4
- SOCI 369 The Family in a Changing Society Units: 4
- SOCI 376m Contemporary Issues in Asian American Communities Units: 4
- SOCI 402 Human Trafficking Units: 4
- SOCI 408 Volunteers, Non-Governmental Organizations, and Everyday Politics Units: 4
- SOCI 410 The Sociology of Popular Culture Units: 4
- SOCI 425 Social Movements: Power, Resistance and Political Dynamics Units: 4
- SOCI 429 Immigration, Work and Labor Units: 4
- SOCI 430m Work and the Workplace Units: 4

- SOCI 432m Racial and Ethnic Relations in a Global Society Units: 4
- SOCI 435m Women in Society Units: 4
- SOCI 445 Political and Social Theory Units: 4
- SOCI 460 Key Issues in Contemporary International Migration Units: 4
- SOCI 464 Sociology of Gender and Work Units: 4
- SOCI 465 Visual Sociology of the City and Its Residents Units: 4
- SOCI 470 Social Change in Low-Income Countries Units: 4
- SOCI 475 Medical Sociology Units: 4
- SOCI 480 The Sociology of Risk and Disaster Units: 4
- SWMS 385m Men and Masculinity Units: 4

Graduate Certificate

Science and Technology Studies Graduate Certificate

The graduate certificate in Science and Technology Studies (STS) provides a foundation for USC doctoral students who wish to gain expertise in the interdisciplinary field of STS and apply it in their research. STS provides tools for critical analysis of the forms of political, epistemological and cultural authority that underpin scientific knowledge and technological systems.

The graduate certificate is open to PhD students in any USC program. It requires doctoral students to take one core course, SOCI 653 Seminar in Science and Technology Studies, as well as three elective seminars focusing on special topics in the field. In addition, students may take electives approved for their particular program of research by the Program faculty. One of these courses may be a research workshop course geared toward doctoral prospectus development. Directed research may not be counted toward the award of the certificate.

In addition to the completion of these course requirements, students must demonstrate a focus on STS as a meaningful component of their doctoral dissertation. This will include working with faculty with expertise in STS on the doctoral committee (as a primary adviser or minor member). Faculty will be responsible for judging the adequacy of the STS component in the student's dissertation.

Completion of the certificate requires a minimum of 16 units.

Required Course (4 units)

- SOCI 653 Seminar in Science and Technology Studies Units: 4

Electives (12 units)

- AHIS 512 Seminar in Renaissance Art Units: 4
- AMST 700 Theories and Practices of Professional Development Units: 4
- COMM 573 Networked Publics: Theories and Encounters Units: 4
- COMM 574 Science and Technology Studies for Communication and Media Units: 4
- COMM 620 Studies in Communication Theory Units: 4
- COMM 630 Communication Technology and Social Change Units: 4
- COMM 647x Network Society Units: 4
- COMM 652 Ethnographic Field Research in Communication Units: 4
- CSCI 631 Privacy in the World of Big Data Units: 4
- CSCI 699 Special Topics Units: 2, 3, 4
- ENGL 536 Literatures and Cultures of the Victorian Period Units: 4
- ENGL 610 Theory and Criticism Units: 4
- ENGL 620 Literature and Interdisciplinary Studies Units: 4

Note:

- Computer Science electives require a significant background in Computer Science.
- Directed Research units may not be applied to the certificate.

Doctoral Degree

Sociology (PhD)

Course Requirements

A minimum of 60 graduate units is necessary for the PhD, among which are the following required courses: SOCI 500, SOCI 510, SOCI 520, SOCI 521, SOCI 511, and SOCI 621 or 620. In addition, each student must specialize in two subareas of sociology and must take at least 8 units in each area such as: urban sociology, complex organizations, stratification, ethnic relations, sociology of aging, medical sociology, communication and culture, deviance, sociology of gender, demography, and so on.

Screening Procedure

Normally, students must complete the screening procedure during the third semester of enrollment. Students will have completed two full semesters of work by this point and, hence, will have taken no fewer than 16 and no more than 32 units, including at least the following: SOCI 500, SOCI 510 and SOCI 511. Students are evaluated on subject matter competence and satisfactory progress. When the screening procedure is successfully completed, the student has one semester in which to form a qualifying exam committee.

Empirical Paper

Each student is required to complete an independent empirical research project that is approved by two members of his or her qualifying exam committee. In some instances, this requirement may be met by acceptance of a satisfactory master's thesis from some other university.

Foreign Language Requirement

The department does not generally require proficiency in a foreign language; however, as with other courses outside the department, a student's qualifying exam committee may in some cases require proficiency in a foreign language.

Qualifying Examinations

Following the completion of their empirical papers and most of their course work, students are required to take a written and oral examination in their two standard areas. If the written examination is passed, the oral part of the examination can be devoted to a preliminary discussion of dissertation plans. When these are completed successfully, the student is advanced to PhD candidacy.

Dissertation

After the dissertation is completed, the student and the dissertation committee, in conjunction with the department chair, may elect either a defense oral or a final oral examination in defense of the dissertation. The defense oral is normally chosen in sociology.

Sophomore Seminars

Sophomore Seminars focus on topics of current interest in research and scholarship. They are small classes that encourage close interaction between faculty and students.

During the fall and spring semesters, sophomores earn 2 units of credit through participation in these weekly seminars. During intensive special sessions, sophomores earn 1 unit of credit. These courses emphasize active exploration of the life of the mind through a variety of classroom activities and assignments.

To encourage a relaxed interchange of information and ideas, each seminar is graded credit/no credit and limited in enrollment to 18 students.

Sophomore Seminars will be offered for the fall and spring semesters in a variety of subjects. They will also be offered during intensive special sessions. Individual topics will be indicated in the *Schedule of Classes* under the SSEM designation.

Spatial Sciences Institute

Since its founding in 2010, the USC Spatial Sciences Institute has used the power of spatial thinking and literacy – the ability to connect place and space and to integrate geography into everything we do – to help address global challenges. Through its innovative academic programs and research enterprise, the Spatial Sciences Institute educates and cross-trains scholars at every higher-educational level to expand our ability to collect, analyze, model, visualize and share location-based data and information in support of policies and decisions that help sustain our planet, promote public health and ensure human security.

Spatial Sciences Institute students work in the field, studio and lab with an internationally recognized faculty who are contributing to the rapidly evolving body of geospatial knowledge. Student researchers in the Spatial Sciences Institute join its interdisciplinary faculty on their funded research with agencies, businesses, non-profits, NGOs and other entities to produce actionable impact. The Spatial Sciences Institute provides numerous opportunities for internships, conference paper and poster presentations and networking, so its students are poised for geospatial careers, which are among the fastest-growing in the United States and world today, and other endeavors.

The Spatial Sciences Institute is a founding member of the UNIGIS International Association, a network of universities around the world that lead and share in the development of online GIS education programs, and an Esri Education Development Center.

Faculty

Professors: Francois Bar, PhD *(Communication)*; Myles Cockburn, PhD *(Preventive Medicine)*; Maged Dessouky, PhD *(Industrial and Systems Engineering)*; William F. Deverell, PhD *(History)*; Philip Ethington, PhD *(History)*; Sofia Gruskin *(Preventive Medicine)*; Steven Lamy, PhD *(Political Science and International Relations)*; Rob McConnell, PhD *(Preventive Medicine)*; Jeffrey Sellers, PhD *(Political Science and International Relations)*; John P. Wilson, PhD* *(Sociology)*
Associate Professors: George Ban-Weiss, PhD *(Civil and Environmental Engineering)*; Lihua Liu, PhD *(Preventive Medicine)*; Nathan Perl-Rosenthal *(History)*; Paulina Oliva, PhD *(Economics)*; Alexander Robinson, PhD *(Architecture);* Emily Smith-Greenaway, PhD *(Sociology)*
Assistant Professors: Laura Ferguson, PhD *(Preventive Medicine)*; Daniel A. Hackman, PhD *(Social Work)*; Jessica Ho, PhD *(Geronotology)*; Jill Johnston, PhD *(Preventive Medicine)*; Stephen Sanko, PhD (*Clinical Emergency Medicine*)
Professors of the Practice: Steven D. Fleming, PhD; Gregory Treverton, PhD *(Political Science and International Relations)*
Professors (Research): Yolanda Gil, PhD *(Computer Science)*; Craig Knoblock, PhD *(Computer Science)*
Associate Professors of the Practice: Lynn Dodd, PhD *(Religion)*; Andrew Marx, PhD
Associate Professors (Teaching): Darren M. Ruddell, PhD; Jennifer N. Swift, PhD; Robert Vos, PhD
Associate Professors (Clinical): Meredith Franklin, PhD *(Preventive Medicine)*; Rima Habre, PhD *(Preventive Medicine)*
Associate Professors (Research): Yao-Yi Chiang, PhD; Michael Orosz, PhD
Assistant Professors (Teaching): Laura Loyola, PhD; Elisabeth Sedano, PhD; An-Min Wu, PhD
Lecturers: Jennifer Bernstein, PhD; Leilei Duan, PhD
Emeritus: Karen Kemp, PhD
**Recipient of university-wide or college teaching award.*

Degree Programs

The Spatial Sciences Institute offers a Bachelor of Science in Geodesign and a Bachelor of Science in Global Geodesign (both with the USC School of Architecture and USC Price School of Public Policy), a Bachelor of Science in Human Security and Geospatial Intelligence, and minors in GIS and Sustainability Science; Human Security and Geospatial Intelligence; and Spatial Studies. The Institute also features an online Master of Science and a Graduate Certificate in Geographic Information Science and Technology and an Master of Arts in Global Security Studies as well as online Graduate Certificates in Geospatial Intelligence, Geospatial Leadership, Remote Sensing for Earth Observation, and Spatial Analytics; an online Master of Science in Human Security and Geospatial Intelligence, a Master of Science in Spatial Data Science, a Master of Science in Spatial Economics and Data Analysis (with the Department of Economics), and a Mater of Science and a Doctor of Philosophy in Population, Health and Place (with the Departments of Preventive Medicine and Sociology).

All of the programs and courses offered by the Spatial Sciences Institute explore the various ways in which location is used to acquire, represent, organize, analyze, model and visualize information. They seek to engage students enrolled in a range of academic programs in the natural and social sciences, the humanities and the professional schools.

Undergraduate Degrees

The BS in Geodesign and BS in Global Geodesign are interdisciplinary majors that include curriculum from the Dornsife College of Letters, Arts and Sciences, the USC School of Architecture and the USC Price School of Public Policy. These two degrees treat planning as a globally relevant framework for collective action, the spatial sciences as a platform for supporting science-based decision-making, and design as a vehicle for solving the world's wicked problems. With a broad base of knowledge from these disciplines around a liberal arts core, Geodesign and Global Geodesign majors are poised for graduate studies and professional opportunities in the public, private and not-for-profits sectors, including urban planning, geographic information science and technology, real estate development, community health and preventive medicine. Geodesign and Global Geodesign majors may take advantage of USC's progressive degree path to obtain a BS in Geodesign or Global Geodesign with an MA in Environmental Studies, a Master of Planning, or an MS

in Geographic Information Science and Technology in as few as five years.

The BS in Human Security and Geospatial Intelligence provides students with a conceptual and technical grounding in human security, including how to evaluate security around the world, create and gather geospatial data, and design security solutions. The topics covered include international border conflicts, humanitarian response and relief, global human rights, the monitoring and prevention of genocide, and refugee migration and crisis management. This program connects collaborative and interrelated disciplines and as such, provides a framework for undergraduate-level analysis and planning in future human security and Geospatial Intelligence work within the U.S. Department of Defense, U.S. State Department, related U.S. support/non-governmental agencies, and within comparable city, county, state, and international organizations.

Honors Program

Candidates for the BS in Geodesign, the BS in Global Geodesign, and the BS in Human Security and Geospatial Intelligence can qualify for graduation with departmental honors by meeting these requirements: a 3.7 GPA in the courses counted toward the major at the time of graduation and completion of a research project or thesis under the guidance of a faculty member teaching the appropriate capstone course (SSCI 412 for Geodesign and Global Geodesign, and SSCI 420 for Human Security and Geospatial Intelligence). In addition, students must receive an A or A- in the appropriate capstone course. Departmental honors are noted on academic transcripts but not on the diploma.

Minors

The undergraduate minor in Spatial Studies can be combined with any major and provides the scientific understanding and technical skills in geographic information science, mapping, and the accompanying geospatial technologies (GIS, GPS, remote sensing). Graduates with competencies in spatial sciences are problem solvers and have competitive edges in sectors such as diplomacy, finance, healthcare, retail, logistics, communications, manufacturing and conservation.

The undergraduate minor in Human Security and Geospatial Intelligence educates future leaders in location-based analytics to gather, interpret and implement actionable intelligence to promote human security. In combination with any major, this minor helps position graduates for career paths and/or graduate education in areas such as humanitarian relief, law enforcement, national security and defense.

The undergraduate minor in GIS and Sustainability Science educates future leaders in location-based analytics to gather, interpret, and implement plans and policies to build healthy and sustainable communities. In combination with any other major, this minor helps position graduates for career paths and/or graduate education in areas such as urban and regional planning, economics, landscape architecture, urban design, public health, and international development.

Graduate Degrees

The online Graduate Certificate in Geographic Information Science and Technology provides the foundation for professional advancement utilizing geographic information science and the latest geospatial technologies. The online Graduate Certificate in Geospatial Intelligence is accredited by the U.S. Geospatial Intelligence Foundation, and develops career readiness for those interested in the human security applications of geographic information science and technology. The online Graduate Certificate in Remote Sensing for Earth Observation develops career readiness for those interested in using remote sensing to collect various kinds of spatial data about places on the Earth from a distant location. Our vision mirrors that of the Group on Earth Observations (GEO), an international, intergovernmental agency, working to improve the availability, access, and use of Earth observations for the benefit of society through major initiatives, such as the UN 2030 Agenda for Sustainable Development, the Paris Climate Agreement, and the Sendai Framework for Disaster Risk Reduction. The online Graduate Certificate in Geospatial Leadership is for individuals with some training and experience looking to increase their potential for advancement in the geospatial field. In addition, all three of these online graduate certificates may be taken by USC master's and doctoral students in other disciplines.

The online MS in Geographic Information Science and Technology provides state-of-the-art education in core geographic information science and accompanying applications. Students may choose among three tracks - Spatial Data Acquisition and Integration; Spatial Data Analysis and Visualization; Spatial Application Development – or select elective courses that better match their own needs and aspirations.

The online MS in Human Security and Geospatial Intelligence provides state-of-the-art knowledge of GIS techniques and data within the context of incident preparation and response. This program empowers graduates to build leadership skills and to pursue management roles within the geospatial intelligence and human security fields, and is ideal for individuals who thrive in highly dynamic, chaotic environments and who have a passion for risk mitigation, disaster planning and threat mitigation in military, disaster management, and humanitarian operations.

The courses in the online Graduate Programs in Geographic Information Science and Technology and Human Security and Geospatial Intelligence are offered year-round and students can start these programs in the fall, spring or summer semesters. Students in the online Master of Public Health program offered by the Keck School of Medicine of USC can complete a GeoHealth track by completing four spatial sciences courses offered by the Spatial Sciences Institute. Students interested in this GeoHealth track should contact the Master of Public Health program in the Department of Preventive Medicine.

The MS in Spatial Economics and Data Analysis provides state-of-the-art knowledge of the spatial and economic principles and methods that are used to support spatial econometrics and related forms of spatiotemporal analysis. This program, which draws on classes from the USC Dornsife Department of Economics and the Spatial Sciences Institute, seeks to empower graduates with the scientific knowledge and methods to identify new business opportunities and develop new policy solutions to help address some of the challenges in our increasingly interconnected and urban world.

The MS in Spatial Data Science is jointly offered with the Viterbi School of Engineering's Department of Computer Science and the Spatial Sciences Institute. The individual courses focus on modern computational tools and how these can be leveraged with new analysis methods, such as artificial intelligence and machine learning, to turn various forms of spatial "big" data into actionable information.

The MA in Global Security Studies is a two-year program designed for students who already have a substantial undergraduate background in social sciences or relevant professional experience in subjects such as international relations, political science, environmental studies and social sciences. Students in the program may concentrate in security, intelligence and military issues; human security and humanitarian crises issues; or environmental security issues.

Students in the MS in Transportation Systems Management offered by the Viterbi School of Engineering can complete a Geographic Information Systems track by completing three spatial sciences courses offered by the Spatial Sciences Institute. Students interested in this GIS track should contact the MS in Transportation Systems Management program in the Department of Civil and Environment Engineering.

The Graduate Certificate in Spatial Analytics provides USC doctoral students with customized opportunities to learn about the fundamental geographic information science principles and a series of rapidly evolving geospatial technologies that take

advantage of the Cloud and the Web along with advances in analytical techniques, modeling tools and online geographic data sources. The learning goals and outcomes in the courses that contribute to this certificate can be customized to match the student's disciplinary interests and research objectives.

In the interdisciplinary Population, Health and Place master of science and PhD programs, faculty from the USC Dornsife Department of Sociology, the Department of Preventive Medicine of the Keck School of Medicine of USC, and the USC Dornsife Spatial Sciences Institute provide training for careers in research, teaching and applied work with large data sets and varied modeling and computation approaches in public health, epidemiology, demography, biostatistics, sociology, medical geography, spatial sciences and other fields.

PhD Admission Requirements

The courses required for admission are an introductory geography or sociology course, a course in statistics, a course in research methods or experimental design and at least one course from each of the following lists: (1) one or more of social demography, society and population, medical sociology; (2) one or more of cartography, human geography, medical geography, spatial analysis.; and (3) one or more of climatology, hydrology, environment and health. Additional courses are desirable, as is work in the biological, physical and social sciences, in mathematics and in philosophy. Students with less background in public health, sociology or the spatial sciences, but outstanding undergraduate records in related fields are also encouraged to apply.

Students are selected on the basis of undergraduate records, scores on the Graduate Record Examinations General Test, course background, three letters of evaluation, personal statement of interests and goals, and evidence of research skills or interests (e.g., publications or participation in research projects).

Application for admission to the PhD Program in Population, Health and Place requires submission of two sets of material: special program forms and university application forms. Students are admitted only for study beginning in the fall semester; both sets of completed application forms must be submitted by December 1 for admission the following fall.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and The Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Bachelor's Degree

Geodesign (BS)

The Bachelor of Science in Geodesign is an interdisciplinary major offered by the Dornsife College of Letters, Arts and Sciences, the USC School of Architecture, and the USC Price School of Public Policy. This degree prepares students for professional careers and/or graduate study by engaging them in the acquisition, representation, analysis, modeling and visualization of spatial information set in the context of the built environment and policy. The underlying spatial principles, methods and tools can be used to support sustainable planning, facility and infrastructure management, the design of livable and healthy communities, and a series of regional planning applications to address pollution, water and energy needs, and the impact of population growth on the environment. The major electives provide students with opportunities to explore one or more facets of the built environment and a series of complementary analytical and visualization tools in more detail. Finally, the major is structured to provide students with sufficient elective credits to explore minors or other programs at USC so they can broaden their education to better prepare themselves for the next stage of their lives.

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. For more information about USC's general education requirements, see General Education.

Major Requirements

A minimum grade of C, 2.0 (A = 4.0) must be earned in each of the core courses and the capstone course. In addition, a minimum grade point average of C (2.0) or higher must be achieved in the major to earn the geodesign degree. No more than 16 units of core courses may be taken prior to the successful completion of the geodesign pre-major requirements.

Pre-major Requirements

Both pre-major requirements must be taken for a letter grade and a minimum grade of C, 2.0 (A = 4.0), must be earned in each of the pre-major courses.

Pre-Major Courses (8 Units)

- ECON 203g Principles of Microeconomics Units: 4
- MATH 114gx Foundations of Statistics Units: 4

Core Courses + Capstone Course (48 Units)

- ARCH 203 Visualizing and Experiencing the Built Environment Units: 4
- ARCH 303 Principles of Spatial Design I Units: 4
- ARCH 403 Principles of Spatial Design II Units: 4
- PPD 227 Urban Planning and Development Units: 4
- RED 417 History of Planning and Development Units: 4
- RED 425 Designing Livable Communities Units: 4
- SSCI 201 Principles of GeoDesign Units: 4
- SSCI 301L Maps and Spatial Reasoning Units: 4
- SSCI 381 Statistics for the Spatial Sciences Units: 4
- SSCI 382L Geographic Information Science: Spatial Analytics Units: 4
- SSCI 383L Geographic Information Science: Geospatial Modeling and Customization Units: 4 (capstone course)
- SSCI 412L GeoDesign Practicum Units: 4

Additional Requirements

Capstone Course

All students will take four units of a capstone experience during their senior year. This may be fulfilled by taking SSCI 412L GeoDesign Practicum (4 units) which may be offered by any of the three units cross-listed (SSCI, ARCH, PPD) and will require students to use their knowledge and skills on a real project with a real client.

Major Electives (24 Units)

A suite of courses that further the development of practical, theoretical, and field knowledge and skills, including computer graphics, drawing, policy analysis, public finance, and statistics. Choose additional electives from the two lists equal to at least six courses (24 units) in all. At least two courses must come from Group A and two courses from Group B.

Group A: Built Environment

- ARCH 306m Shelter Units: 4
- ARCH 447 Ecological Factors in Design Units: 3
- ENST 323 Politics of Global Environment Units: 4
- HIST 458 History of California Units: 4
- POSC 363 Cities and Regions in World Politics Units: 4
- PPD 360 Urban Transportation Planning and Policy Units: 4
- PPD 361 Sustainable Communities, Policy and Planning Units: 4

- PPD 410 Comparative Urban Development Units: 4
- SOCI 335 Society and Population Units: 4
- SSCI 165Lgw Sustainability Science in the City Units: 4
- SSCI 214g Human Populations and Natural Hazards Units: 4
- SSCI 265Lg The Water Planet Units: 4
- SSCI 350 International GeoDesign Units: 4

Group B: Design, Analysis And Computation

- ANTH 481L GIS for Investigating the Past Units: 4
- ARCH 307 Digital Tools for Architecture Units: 3
- DES 102 Design Fundamentals Units: 4
- ENST 387 Economics for Natural Resources and the Environment Units: 4
- HIST 393g Quantitative Historical Analysis Units: 4
- IR 323 Politics of Global Environment Units: 4
- POSC 265gw Environmental Challenges Units: 4
- POSC 363 Cities and Regions in World Politics Units: 4
- POSC 436 Environmental Politics Units: 4
- PPD 306 Visual Methods in Policy, Management, Planning and Development Units: 4
- PPD 427L Geographic Information Systems and Planning Applications Units: 4
- SSCI 135g Maps in the Digital World Units: 4
- SSCI 220L Spatial Data Collection Using Drones Units: 4

Additional Requirements

Honors

Candidates for the BS in Geodesign can receive an honors degree by meeting these requirements: a 3.7 GPA in department courses at the time of graduation; completion of an honors research project or thesis under the guidance of a faculty member (SSCI 412L). Admission to the program is granted by the departmental undergraduate adviser in the semester preceding enrollment in SSCI 412L; students should have a 3.7 GPA in the major at this time.

Global Geodesign (BS)

The USC Dornsife Spatial Sciences Institute offers a pioneering BS in Global Geodesign to prepare individuals with the integrative ability to analyze the role of place, space and time to address issues of environmental sustainability and human well-being on neighborhood, community, regional and global scales in multidisciplinary and multi-dimensional ways.

Throughout their program, USC Global Geodesign students engage with the faculty and students in the global geodesign programs at the Amsterdam University College/ Vrije University Amsterdam consortium in the Netherlands and Peking University in China, considered the leading academic institutions for geodesign on their respective continent. This global cohort undertakes course work, research-based field work, intensive studios and a rich extracurricular program in Los Angeles, Amsterdam and Beijing coordinated among the three university faculties. Through these immersive multicultural and interdisciplinary experiences in spatial sciences, architecture, landscape architecture and urban and regional planning, global geodesign graduates will have perspectives and backgrounds that will uniquely position them to contribute to improving the built and natural environments around the world.

Major Requirements

Courses should be taken in addition to core major requirements and general degree requirements.

- ECON 203g Principles of Microeconomics Units: 4
- MATH 114gx Foundations of Statistics Units: 4
- SSCI 381 Statistics for the Spatial Sciences Units: 4
- WRIT 450 Advanced Research Writing Units: 4

Global Geodesign Core Requirements

Major core requirements

- ARCH 203 Visualizing and Experiencing the Built Environment Units: 4
- ARCH 303 Principles of Spatial Design I Units: 4
- ARCH 403 Principles of Spatial Design II Units: 4
- ARCH 447 Ecological Factors in Design Units: 3
- PPD 227 Urban Planning and Development Units: 4
- RED 417 History of Planning and Development Units: 4
- RED 425 Designing Livable Communities Units: 4
- SSCI 201 Principles of GeoDesign Units: 4
- SSCI 301L Maps and Spatial Reasoning Units: 4
- SSCI 313 Global Geodesign and Stakeholder Engagement Units: 2
- SSCI 314 Comparative Sustainability Theory and Practice for Geodesign Units: 2
- SSCI 382L Geographic Information Science: Spatial Analytics Units: 4
- SSCI 383L Geographic Information Science: Geospatial Modeling and Customization Units: 4

Global Geodesign Intensive Studios

International geodesign courses taken during two separate summer sessions while students are abroad.

- SSCI 311 Global Geodesign Studio - Europe Units: 4
- SSCI 312 Global Geodesign Studio - Asia Units: 4

Global Geodesign Capstone

Culminating capstone class required for degree completion

- SSCI 412L GeoDesign Practicum Units: 4

Human Security and Geospatial Intelligence (BS)

The Bachelor of Science in Human Security and Geospatial Intelligence offered by the USC Dornsife College of Letters, Arts and Sciences prepares students for professional careers and/ or graduate study by engaging them in the framework for the analysis and planning in future human security and geospatial intelligence (GEOINT) work. The underlying spatial and GEOINT principles and expertise can be used to support within the U.S. Department of Defense, U.S. State Department, related U.S. support/non-governmental agencies and within comparable international organizations. The course work, and in particular the capstone course, provides students with opportunities to develop the skills and expertise to lead innovative ventures in areas such as international border conflicts, humanitarian response and relief, global human rights, the monitoring and prevention of genocide and refugee migration and crisis management. Finally, the major is structured to provide students with sufficient elective credits to explore minors or other programs at USC so that they can broaden their education to better prepare themselves for future stages in their lives.

The program encompasses a 128-units course structure comprised of five core courses, three additional management and leadership courses and a capstone experience course. The BS in HSGI degree can be completed in the planned 4-year undergraduate experience (8 semesters) for full-time registrants.

Pre-Major Requirement (4)

Course to be completed within first two semesters of enrolling in the major.

- MATH 114gx Foundations of Statistics Units: 4

Major Requirements (60)

- IR 210gw International Relations: Introductory Analysis Units: 4
- IR 304 National Intelligence and the Shaping of Policy Units: 4
- IR 319 Human Security and Humanitarian Intervention Units: 4
- IR 381 Introduction to International Security Units: 4
- POSC 110g Ideology and Political Conflict Units: 4
- PPD 225 Public Policy and Management Units: 4
- PPD 402 Management of Public and Nonprofit Organizations Units: 4
- SSCI 214g Human Populations and Natural Hazards Units: 4
- SSCI 220L Spatial Data Collection Using Drones Units: 4

- SSCI 301L Maps and Spatial Reasoning Units: 4
- SSCI 381 Statistics for the Spatial Sciences Units: 4
- SSCI 382L Geographic Information Science: Spatial Analytics Units: 4
- SSCI 383L Geographic Information Science: Geospatial Modeling and Customization Units: 4
- SSCI 401L Geospatial Intelligence Units: 4

Practicum

Course to be completed as culminating requirement.

- SSCI 420 Human Security and Geospatial Intelligence Practicum Units: 4

Minor

GIS and Sustainability Science Minor

The innovative Minor in GIS and Sustainability Science provides an interdisciplinary foundation for individuals to address environmental sustainability, among the most pressing challenges of our time. With an understanding of concepts of spatial sciences, including geographic information science, cartographic principles, spatial data acquisition and analysis, and techniques of programming and customization, students will be capable of analyzing and utilizing geospatial information linked with human and natural systems to understand how humans create stress on ecosystems and make informed decisions about how to alleviate stress or restore damaged ecosystems.

In the capstone course, students have the opportunity to explore their specific interests in greater depth as they design a geospatial technology project that contributes to one or more sustainable development goals at various scales and in locations around the globe.

Geospatial careers are among the fastest-growing in the U.S. and world today, and geospatial jobs are currently available in every industry and discipline in consulting firms, non-profit organizations, government agencies, and private-sector companies.

Lower Division Elective

Choose one of the following courses:

- SSCI 165Lgw Sustainability Science in the City Units: 4
- SSCI 265Lg The Water Planet Units: 4

Core Requirements

Complete all of the following courses:

- SSCI 301L Maps and Spatial Reasoning Units: 4
- SSCI 382L Geographic Information Science: Spatial Analytics Units: 4
- SSCI 383L Geographic Information Science: Geospatial Modeling and Customization Units: 4

Capstone Course

Complete the following course after finishing core requirements:

- SSCI 402 Geospatial Technology Management for Sustainability Science Units: 4

Human Security and Geospatial Intelligence Minor

The interdisciplinary minor in Human Security and Geospatial Intelligence aims to educate future leaders in location-based analytics to gather, interpret, and implement actionable intelligence to promote human security and serves to connect many collaborative and interrelated disciplines to provide a framework for students interested in learning how to develop and deliver analytical and spatial solutions.

Lower-Division Elective (4 units)

- ENST 100g Introduction to Environmental Studies Units: 4
- GEOL 108Lg Crises of a Planet Units: 4
- IR 100gx The United States and World Affairs Units: 4
- IR 101gxw International Relations Units: 4
- IR 210gw International Relations: Introductory Analysis Units: 4
- POSC 110g Ideology and Political Conflict Units: 4
- POSC 120 Comparative Politics Units: 4
- POSC 130g Law, Politics and Public Policy Units: 4
- POSC 248gw Human Rights Units: 4
- POSC 255g Cultures, Civilizations and Ethnicities in World Politics Units: 4
- POSC 260 Global Ethnic Politics Units: 4
- SSCI 135g Maps in the Digital World Units: 4
- SSCI 165Lgw Sustainability Science in the City Units: 4
- SSCI 214g Human Populations and Natural Hazards Units: 4
- SSCI 220L Spatial Data Collection Using Drones Units: 4
- SSCI 265Lg The Water Planet Units: 4

Required Core (12 units)

- IR 304 National Intelligence and the Shaping of Policy Units: 4 or
- IR 319 Human Security and Humanitarian Intervention Units: 4
- SSCI 301L Maps and Spatial Reasoning Units: 4
- SSCI 401L Geospatial Intelligence Units: 4

Upper-Division Elective (4 units)

- AEST 400a Aerospace Studies IV: National Security Forces in Contemporary American Society Units: 3
- AEST 400b Aerospace Studies IV: National Security Forces in Contemporary American Society Units: 3
- IR 304 National Intelligence and the Shaping of Policy Units: 4
- IR 381 Introduction to International Security Units: 4
- IR 386 Terrorism and Counterterrorism Units: 4
- MDES 314p Political Thought in the Middle East Units: 4
- MS 401 Leadership and Management I Units: 3
- MS 402 Leadership and Management II Units: 3
- NSC 453 Leadership and Management I Units: 3
- NSC 454 Leadership and Management II Units: 3
- POSC 351 Middle East Politics Units: 4
- SSCI 382L Geographic Information Science: Spatial Analytics Units: 4

Note:

ROTC courses (AEST, MS, NSC) are not open to non-ROTC students.
IR 304 cannot be counted as both a core and an elective course.

Spatial Studies Minor

The spatial studies minor requires a minimum of 20 units, consisting of one lower-division elective, three required courses and an upper-division elective. The minor offers students an opportunity to examine some of the major challenges of the 21st century (climate change, human health and sustainability, urbanization and cultural homogenization, among others) through a spatial lens.

Required Courses (12 Units)

- SSCI 301L Maps and Spatial Reasoning Units: 4
- SSCI 382L Geographic Information Science: Spatial Analytics Units: 4
- SSCI 383L Geographic Information Science: Geospatial Modeling and Customization Units: 4

Lower-Division Electives (4 Units)

- ANTH 201g Introduction to Sociocultural Anthropology Units: 4
- ANTH 202g Archaeology: Our Human Past Units: 4
- ARCH 105L Fundamentals of Design Communication Units: 2
- ARCH 114 Architecture: Culture and Community Units: 2
- ARCH 220 The Architect's Sketchbook Units: 2
- BISC 102Lgx Humans and Their Environment Units: 4
- BISC 140g Our Blue Planet in a Changing Climate Units: 4
- CLAS 212 Archaeology: Interpreting the Past Units: 4
- GEOL 108Lg Crises of a Planet Units: 4
- GEOL 150Lg Climate Change Units: 4
- HIST 240gp The History of California Units: 4

- POSC 265gw Environmental Challenges Units: 4
- PPD 245g The Urban Context Units: 4
- SOCI 100gm Los Angeles and the American Dream Units: 4
- SOCI 200gm Introduction to Sociology Units: 4
- SSCI 135g Maps in the Digital World Units: 4
- SSCI 165Lgw Sustainability Science in the City Units: 4
- SSCI 214g Human Populations and Natural Hazards Units: 4
- SSCI 220L Spatial Data Collection Using Drones Units: 4
- SSCI 265Lg The Water Planet Units: 4

Upper-Division Electives (4 Units)

- ANTH 481L GIS for Investigating the Past Units: 4
- ARCH 432 People, Places and Culture: Architecture of the Public Realm Units: 4
- IR 319 Human Security and Humanitarian Intervention Units: 4
- JOUR 422 Visual Journalism for Non-Majors Units: 4
- PPD 306 Visual Methods in Policy, Management, Planning and Development Units: 4
- PPD 427L Geographic Information Systems and Planning Applications Units: 4
- SOCI 314Lg Analyzing Social Statistics Units: 4
- SSCI 397 Spatial Sciences Internship Units: 2, 3, 4

Master's Degree

Geographic Information Science and Technology (MS)

AHF B55B
(213) 740-8298
Email: watsonke@usc.edu
Director: John P. Wilson, PhD

The online MS in Geographic Information Science and Technology requires 28 units of graduate work and provides state-of-the-art training in the core geographic information technologies (geographic information systems, global positioning systems and remote sensing, among others) and the underlying scientific principles and concepts that guide their design and use. The individual courses incorporate multiple curricular pathways tailored to the increasingly diverse backgrounds, occupations and applications that rely on geospatial data, analysis and visualization.

Course Requirements

Twenty-eight units of graduate work are required.

Core Courses (12 units)

All students complete the following courses:

- SSCI 581 Concepts for Spatial Thinking Units: 4
- SSCI 587 Spatial Data Acquisition Units: 4
- SSCI 594a Master's Thesis Units: 2
- SSCI 594b Master's Thesis Units: 2

Course Tracks

Students must choose one of the following tracks:

Spatial Data Management (12 units)

Students in the Spatial Data Management track must take the following courses:

- SSCI 582 Spatial Databases Units: 4
- SSCI 585 Geospatial Technology Project Management Units: 4
- SSCI 588 Remote Sensing for GIS Units: 4

Electives (4 units)

Students in the Spatial Data Management track must choose one of the following electives:

- SSCI 575 Spatial Data Science Units: 4
- SSCI 576 Remote Sensing Applications and Emerging Technologies Units: 4
- SSCI 591 Web and Mobile GIS Units: 4

Spatial Computing (12 units)

Students in the Spatial Computing track must take the following courses:

- SSCI 582 Spatial Databases Units: 4
- SSCI 586 GIS Programming and Customization Units: 4
- SSCI 591 Web and Mobile GIS Units: 4

Electives (4 units)

Students in the Spatial Computing track must choose one of the following electives;

- SSCI 576 Remote Sensing Applications and Emerging Technologies Units: 4
- SSCI 588 Remote Sensing for GIS Units: 4
- SSCI 589 Cartography and Visualization Units: 4

Spatial Analytics (12 units)

Students in the Spatial Analytics track must take the following courses:

- SSCI 574 Spatial Econometrics Units: 4
- SSCI 583 Spatial Analysis and Modeling Units: 4
- SSCI 589 Cartography and Visualization Units: 4

Electives (4 units)

Students in the Spatial Analytics track must choose one of the following electives:

- SSCI 575 Spatial Data Science Units: 4
- SSCI 586 GIS Programming and Customization Units: 4
- SSCI 588 Remote Sensing for GIS Units: 4

Additional Requirements

All electives are chosen in direct consultation with the student's academic adviser based on background, academic interests, etc.

The courses in this program are open to students living and/or working anywhere, including students at USC's Los Angeles, Orange County, Sacramento and Washington, D.C. centers. The master's program can be completed in two to three years as long as students take one or two courses in each of the fall, spring and summer semesters. Continuous enrollment in the fall, spring and summer terms is required in this program, including SSCI 594a, SSCI 594b and SSCI 594z summer registration.

Admission Requirements

Four groups of students are served by this program:

1. New students who wish to apply directly to the geographic information science and technology master's program.
2. Students currently enrolled in the geographic information science and technology graduate certificate program since this certificate program may serve as a possible "stepping stone" toward the master's program.
3. Students currently matriculated in a USC master's or doctoral degree program.
4. USC undergraduate students who want to stay for a fifth year and earn both bachelor's and master's degrees.

Candidates for admission among the first two groups of students must have: (1) a BA or BS degree or its international equivalent; (2) a minimum 3.0 GPA (A = 4.0). All course work taken at the undergraduate level is used to calculate the GPA. Exceptions will be made in cases of very high GRE scores or some other compelling evidence of potential to excel in graduate studies (e.g., outstanding letters of recommendation). Preference will be given to candidates with significant professional experience working with geographic information systems and related geospatial technologies.

Application Procedures

Applicants are required to submit the following documents: (1) completed application for admission, which can be found online at usc.edu/admission/graduate; (2) statement of purpose; (3) a writing sample; (4) official transcripts from all schools previously attended; and (5) two letters of recommendation. International students must submit TOEFL scores with a minimum score of 100 on the Internetbased examination, or an IELTS score of 7.

The statement of purpose should be uploaded into the online application. This statement should: (1) describe the student's motivation, field of interest and career goals; and (2) identify potential projects that the student might pursue for the master's thesis project.

The master's program utilizes rolling admissions and enrollment based on the standard academic calendar. This means that students may start the program in either the fall, spring or summer semesters.

Those interested in learning more about this program should contact Ken Watson, University of Southern California, 3616 Trousdale Parkway, AHF B55B, Los Angeles, CA 90089-0374.

Global Security Studies (MA)

The Master of Arts in Global Security Studies is a two-year program designed for students who already have a substantial undergraduate background in social sciences or relevant professional experience in subjects such as international relations, political science, environmental studies and social sciences. Students in the program may concentrate in one of three issue areas: security, intelligence and military issues; human security and humanitarian crises issues; or environmental security issues. These concentrations lead to a career in public service, the corporate world or in a nongovernmental organization (NGO) working in the ever-expanding global civil society. Students may opt to study one semester in USC's Washington DC Semester Program or at Vrije Universiteit's Institute for European Studies in Brussels, Belgium.

Requirements for the completion of this degree program are 48 units, including 8 units of credit for internship, a first year policy exercise, and a required final policy project related to a major global issue addressed in the program.

The program requirements are as follows:

Required Core Courses (12 Units)

Select three courses.

- GSEC 501 Foundations of Global Security Units: 4
- GSEC 502 Global Governance and Globalization Units: 4
- GSEC 503 Economic Analysis and Global Policy Issues Units: 4
- GSEC 504 Research Design for Policy Evaluation Units: 4

Concentrations (24 units)

Selected in consultation with an adviser, students are required to take two courses in two different concentrations (16 units) and up to two additional courses in their area of specialization (8 units).

- Security, Intelligence and Military Issues
- Human Security and Humanitarian Crises Issues
- Environmental Security Issues

Internship (8 units)

Internships for credit must be selected in consultation with a GSEC Program adviser.

Additional Requirements

First Year Policy Exercise

In the last two weeks of the second semester, those students in residence will participate in a problem-based learning policy exercise. Students will apply policy skills mastered in their first-year courses to develop a policy response to a timely real-world issue.

Final Policy Project (4 units)

The final requirement for the Master of Arts in Global Security Studies is the completion of a comprehensive policy project related to the security concentration or concentrations selected by the student. Students will explore the nature of a problem, provide a comprehensive review of related existing literature and current research, and offer possible policy prescriptions aimed at mitigating the impact of the problem explored.

The course(s) taken to complete this requirement will be selected in consultation with an adviser. Two faculty members selected by the student will supervise and evaluate the project. A student may add an external expert as a third member of the committee with the permission of the two supervising faculty members. This external member may be a faculty member at another university or a staff member in a government agency or nongovernmental organization.

Students must earn a grade of B or higher to pass this requirement. A list of selected topics and an archive of completed projects will be available for review.

Minimum Units Required: 48

Human Security and Geospatial Intelligence (MS)

The online MS in Human Security and Geospatial Intelligence requires 34 units of graduate work and provides a set of viable tools for graduate-level planning and leadership on future human security and GEOINT work within the United States Department of Defense, State Department, related U.S. support and non-governmental agencies, and within comparable international organizations. The program provides workforce-focused leadership, management, and technical knowledge that gives graduates the skills and expertise to lead and manage new initiatives in the rapidly shifting landscape of GEOINT applications, data collection systems, analytic methods, and mission support.

Core Courses (28 units)

Students must take the following courses.

- SSCI 577 Human Security and Disaster Management Units: 4
- SSCI 578 The Practice of Geospatial Leadership Units: 4
- SSCI 579 Geospatial Intelligence Tradecraft Units: 4
- SSCI 581 Concepts for Spatial Thinking Units: 4
- SSCI 585 Geospatial Technology Project Management Units: 4
- SSCI 587 Spatial Data Acquisition Units: 4
- SSCI 588 Remote Sensing for GIS Units: 4

Elective (4 units)

Select one of the following.

- SSCI 576 Remote Sensing Applications and Emerging Technologies Units: 4
- SSCI 586 GIS Programming and Customization Units: 4
- SSCI 589 Cartography and Visualization Units: 4

Capstone (2 units)

Students must take the following course in their final semester.

- SSCI 595 Applied Geospatial Intelligence Problem Solving Units: 2

Population, Health and Place (MS)

The Master of Science in Population, Health and Place trains students for applied professional research in geospatial public health, led by faculty from the USC Dornsife Department of Sociology, the Department of Preventive Medicine of the Keck School of Medicine of USC and the USC Dornsife Spatial Sciences Institute. Students do not complete a thesis but take courses in various modeling and computation approaches in demography, biostatics, epidemiology and spatial sciences.

Required Course Work (10 units)

- SSCI 600 The Geography of Life and Death Units: 4
- SSCI 601a Population, Health and Place Research Practicum Units: 2
- SSCI 681 Advanced Quantitative Methods for Population, Health and Place Units: 4

Electives (20 units)

Students must complete five of the following courses.

- PM 510L Principles of Biostatistics Units: 4
- PM 512 Principles of Epidemiology Units: 4
- PM 529 Environmental Health: An Epidemiological Approach Units: 4

- SOCI 625 Demographic Methods Units: 4
- SOCI 656 Social Demography Units: 4
- SOCI 658 Sociology of Health and Medicine Units: 4
- SSCI 680 Advanced Spatial Computing Units: 4
- SSCI 683 Principles of Spatial Data Analysis Units: 4
- SSCI 684 Spatial Modeling with GIS Units: 4

Total Units: 30

Spatial Data Science (MS)

Dornsife College of Letters, Arts and Sciences, Spatial Sciences Institute
Viterbi School of Engineering, Computer Science/Data Science
spatial.usc.edu
datascience.usc.edu
Program Director (Spatial Science): John P. Wilson, PhD
Program Associate Director: Susan H. Kamei, PhD
Program Co-Director (Data Science): Yolanda Gil, PhD

The Master of Science in Spatial Data Science is a cross-disciplinary joint degree program offered by the Viterbi School of Engineering and the Dornsife College of Letters, Arts and Sciences. Students must be admitted by both the Viterbi School of Engineering and the Dornsife College of Letters, Arts and Sciences.

Geospatial data accessibility, spatial decision support systems and geospatial problem solving environments are revolutionizing most industries and disciplines, including health care, marketing, social services, human security, education, environmental sustainability and transportation. Spatial data science professionals draw upon engineering, computer science and spatial sciences principles to solve data-intensive, large-scale, location-based problems.

The USC Master of Science in Spatial Data Science provides students with the knowledge and skills to:

- Understand and contribute toward the significant technical and societal challenges created by large location-based data environments, including their architecture, security, integrity, management and scalability.
- Understand how spatial data can be acquired and used to support various forms of analysis, modeling and geo-visualization in large data environments.
- Understand how artificial intelligence, machine learning and data mining can be used to augment the typical geographic information science (GIS) concepts and workflows to intelligently mine data to provide enterprise-centric solutions for a variety of societal challenges and issues spanning the public, private and not-for-profit sectors.

Students complete a core set of courses to provide a foundation in information engineering, spatial analysis and thinking with their choice of electives to optimize preparation for their preferred career path and unique professional opportunities.

Students will understand the overall field of data science, the role of the analyst and/or data scientist and the domains where spatial data science skills can be applied to critical organization missions. They will understand how data management, data visualization and artificial intelligence techniques (specifically data mining and machine learning) are critical to the spatial analysis process and how these can be applied to real world challenges. Throughout their course work, students will assemble a digital portfolio of work product that is intended to help them demonstrate their capabilities and skills for the job market.

The curriculum is designed to be accessible to students with any background, including students with a geography background and no computer science knowledge as well as students with a computer science background and no geography knowledge. Students with undergraduate degrees in computer science, engineering, science or mathematics will acquire the necessary knowledge to analyze spatial data with diverse sources and purposes, and can request to replace introductory data science courses with more advanced ones. Students with undergraduate degrees in geography, geographic information science (GIS) and related disciplines will acquire formal and practical data science skills, and can request to substitute introductory courses in the spatial core with more advanced ones. There is no requirement of prior knowledge of programming or computer science, as the curriculum is designed with special introductory courses that are accessible to students with diverse backgrounds.

For information refer to the Spatial Sciences Institute.

Degree Requirements

A minimum of 32 units with an overall cumulative GPA of at least 3.0 is required for the MS in Spatial Data Science. Students should consult with an academic adviser prior to registering for any classes.

Required Courses (6 courses/24 units)

Foundation (take both courses):

- DSCI 549 Introduction to Computational Thinking and Data Science Units: 4
- SSCI 581 Concepts for Spatial Thinking Units: 4

Spatial core (take both courses):

- SSCI 575 Spatial Data Science Units: 4
- SSCI 586 GIS Programming and Customization Units: 4

Data Science core (take both courses):

- DSCI 510 Principles of Programming for Data Science Units: 4
- DSCI 550 Data Science at Scale Units: 4

Spatial and Data Science Elective Courses (8 units)

Spatial elective (4 units)

- SSCI 582 Spatial Databases Units: 4
- SSCI 583 Spatial Analysis and Modeling Units: 4
- SSCI 591 Web and Mobile GIS Units: 4

Data Science elective (4 units)

- CSCI 587 Geospatial Information Management Units: 4 *
- DSCI 551 Foundations of Data Management Units: 4
- DSCI 552 Machine Learning for Data Science Units: 4
- DSCI 553 Foundations and Applications of Data Mining Units: 4
- DSCI 554 Data Visualization Units: 4
- DSCI 555 Interaction Design and Usability Testing Units: 4
- DSCI 560 Data Science Professional Practicum Units: 4

Note:

*SSCI 582 meets the CSCI 585 prerequisite for CSCI 587 and must be taken before it.

Spatial Economics and Data Analysis (MS)

The widespread diffusion of smartphones, grid sensors and Internet technology has created vast new spatial data sets. One example is residential electricity consumption for each house in California for each 15 minutes. Another example is the universe of all UBER rides in San Francisco in a given month. To analyze these data in order to spot patterns and test hypotheses requires three skills. First, the analyst must be able to manipulate these huge data bases in order to create spatial databases plus maps and other geovisualizations. Second, the analyst must have a sophisticated understanding of spatial economics in order to have a framework for understanding potential causal relationships that can be inferred from the data. Third, the analyst must be trained in spatial analytics and statistics to be able to generate interesting new facts that form the basis for testing the spatial and economic theories and producing new actionable knowledge.

This degree trains students in spatial economics and spatial sciences. By combining the insights from these two different fields, there are significant synergies. The geospatial curriculum teaches best practices in spatial data creation, mapping and data manipulation while simultaneously also teaching students how the economist's perspective informs one's understanding about "why" such patterns are observed.

Trained students will gain new insights about emerging business opportunities, environmental trends, and urban crime and congestion trends. Such spatial patterns are directly tied to real estate valuation and to identifying emerging opportunities and challenges for companies operating in cities around the world. Given the large (and growing) number of Big Data startups in the Los Angeles area, we will use our network of contacts to place our students as interns in these firms.

The program is 32 units in length.

Requirements for Completion

To complete the program and receive a degree, specific courses must be completed.

Students should note the following USC degree requirements:

- A minimum of 32 units must be taken in residence at USC. The units applied toward this requirement must be taken for a letter grade and cannot be taken on a P/NP or CR/NC basis.

Required Courses (24 Units)

Students must complete all of the following required courses:

- ECON 500 Microeconomic Analysis and Policy Units: 4
- ECON 513 Practice of Econometrics Units: 4
- ECON 570 Big Data Econometrics Units: 4
- SSCI 581 Concepts for Spatial Thinking Units: 4
- SSCI 574 Spatial Econometrics Units: 4
- SSCI 583 Spatial Analysis and Modeling Units: 4

Elective Options (8 Units)

Students must complete one course from SSCI (4 units) and one course from ECON (4 units):

- ECON 506 Field Experiments Units: 4
- ECON 515 Time Series Analysis Units: 4
- ECON 584 Economic Consulting and Applied Econometrics Units: 4
- SSCI 575 Spatial Data Science Units: 4
- SSCI 582 Spatial Databases Units: 4
- SSCI 589 Cartography and Visualization Units: 4

Graduate Certificate

Geographic Information Science and Technology Graduate Certificate

AHF B55B
(213) 740-8298
Email: watsonke@usc.edu
Director: John P. Wilson, PhD

The online Graduate Certificate in Geographic Information Science and Technology requires 16 units of graduate work and provides state-of-the-art training in some of the core geographic information science technologies and the underlying scientific principles and concepts that guide their design and use.

Course Requirements

Sixteen units of graduate work are required.

Core Courses (8 Units)

Students must take both of the following courses:

- SSCI 581 Concepts for Spatial Thinking Units: 4
- SSCI 587 Spatial Data Acquisition Units: 4

Electives (8 Units)

Students must choose two of the following courses:

- SSCI 574 Spatial Econometrics Units: 4
- SSCI 582 Spatial Databases Units: 4
- SSCI 583 Spatial Analysis and Modeling Units: 4
- SSCI 585 Geospatial Technology Project Management Units: 4
- SSCI 586 GIS Programming and Customization Units: 4
- SSCI 588 Remote Sensing for GIS Units: 4
- SSCI 589 Cartography and Visualization Units: 4
- SSCI 591 Web and Mobile GIS Units: 4

Note:

The courses in this program are open to students living and/or working anywhere, including students at USC's Los Angeles, Orange County, Sacramento and Washington, D.C. centers. The certificate program can be completed in one to two years as long as students take one or two courses in each of the fall, spring and summer semesters. The graduate certificate program can serve as a possible "stepping stone" toward the geographic information science and technology master's degree program. Continuous enrollment in the fall, spring and summer terms is required in this program.

Geospatial Intelligence Graduate Certificate

AHF B55B
(213) 740-8298
Email: watsonke@usc.edu
Director: John P. Wilson, PhD

The online Graduate Certificate in Geospatial Intelligence requires 16 units of graduate work and provides state-of-the-art training in some of the core geospatial technologies and the underlying scientific concepts and analytical methods that guide their design and use to solve a variety of human security problems and challenges.

Course Requirements

Sixteen units of graduate work are required.

Core Courses (12 Units)

- SSCI 581 Concepts for Spatial Thinking Units: 4
- SSCI 577 Human Security and Disaster Management Units: 4
- SSCI 579 Geospatial Intelligence Tradecraft Units: 4

Electives (4 Units)

Students choose one of the following:

- SSCI 576 Remote Sensing Applications and Emerging Technologies Units: 4
- SSCI 585 Geospatial Technology Project Management Units: 4
- SSCI 588 Remote Sensing for GIS Units: 4

Note:

The courses in this program are open to students living and/or working anywhere, including students at USC's Los Angeles, Orange County, Sacramento and Washington, D.C. centers. The certificate program can be completed in as few as two and no more than four semesters depending on the numbers of courses taken in each of the fall, spring and summer semesters. The graduate certificate program can serve as a possible "stepping stone" toward the geographic information science and technology master's degree program. Continuous enrollment, including summer, is required.

Geospatial Leadership Graduate Certificate

AHF B55B
(213) 740-8298
Email: watsonke@usc.edu
Director: John P. Wilson, PhD

The online Graduate Certificate in Geospatial Leadership requires 16 units of graduate work. The capstone course focuses on the cultivation of leadership skills and practices, and the electives afford students the opportunity to strengthen their knowledge of selected geospatial technologies, the underlying scientific concepts and analytical methods, and the ways they can be used in decision-making.

Course Requirements

Sixteen units of graduate work are required.

Core Courses (8 Units)

- SSCI 578 The Practice of Geospatial Leadership Units: 4
- SSCI 585 Geospatial Technology Project Management Units: 4

Electives (8 Units)

Students must choose two of the following:

- SSCI 574 Spatial Econometrics Units: 4
- SSCI 575 Spatial Data Science Units: 4
- SSCI 582 Spatial Databases Units: 4
- SSCI 583 Spatial Analysis and Modeling Units: 4
- SSCI 586 GIS Programming and Customization Units: 4
- SSCI 591 Web and Mobile GIS Units: 4

Additional Requirements

The courses in this program are open to students living and/or working anywhere, including students at USC's Los Angeles, Orange County, Sacramento and Washington, D.C. centers. The certificate program can be completed in as few as two and no more than four semesters depending on the numbers of courses taken in each of the fall, spring and summer semesters. Continuous enrollment, including summer, is required.

Admission Requirements

Two groups of students are served by this program:

1. New students who wish to apply directly to one of the spatial sciences graduate certificate program.
2. Students currently matriculated in a USC master's or doctoral degree program (other than the MS in geographic information science and technology).

Candidates for admission among the first group of students must have: (1) a BA or BS degree or its international equivalent; (2) a minimum 3.0 GPA (A = 4.0) undergraduate GPA. All course work taken at the undergraduate level is used to calculate the GPA. Exceptions will be made in cases of very high GRE scores or some other compelling evidence of potential to excel in graduate studies (e.g., outstanding letters of recommendation). Preference will be given to candidates with significant professional experience working with geographic information systems and related geospatial technologies.

Application Procedures

Applicants are required to submit the following documents: (1) completed application for admission, which can be found online at usc.edu/admission/graduate; (2) statement of purpose; (3) official transcripts from all schools previously attended. International students must submit TOEFL scores with a minimum score of 100 on the Internet-based examination, or an IELTS score of 7.

The graduate certificate program utilizes rolling admissions and enrollment based on the standard academic calendar. This means that students may start the program in either the fall, spring or summer semesters.

Those interested in learning more about this program should contact Ken Watson, University of Southern California, 3616 Trousdale Parkway, AHF B55B, Los Angeles, CA 90089-0374.

Remote Sensing for Earth Observation Certificate

The online graduate certificate in Remote Sensing for Earth Observation requires 16 units of graduate course work in the rapidly evolving and expanding area of remote sensing and geographic information science (GIS) as it is applied to Earth observation, spatial data collection and the integration and management of Big Data, including human-generated geo-referenced information.

Required Courses

Students must take both of the following courses:

- SSCI 576 Remote Sensing Applications and Emerging Technologies Units: 4
- SSCI 581 Concepts for Spatial Thinking Units: 4

Elective Options

Students must take two of the following:

- SSCI 575 Spatial Data Science Units: 4
- SSCI 587 Spatial Data Acquisition Units: 4
- SSCI 588 Remote Sensing for GIS Units: 4
- Additional SSCI course selected in consultation with an adviser

Spatial Analytics Graduate Certificate

AHF B56C
(213) 740-8298
Email: watsonke@usc.edu
Director: John P. Wilson, PhD

The Graduate Certificate in Spatial Analytics requires 12 units of graduate work and provides doctoral students with an opportunity to learn about the fundamental guiding principles (i.e. spatial cognition, positioning, spatial representations and data models, map projections and datums, modifiable unit area problems, remote sensing, spatial analysis and modeling techniques and cartographic principles) and a series of rapidly evolving geospatial technologies that take advantage of the Cloud and the Web as well as advances in analytical techniques, modeling tools and online data sources.

Course Requirements

Twelve units of graduate work are required.

Courses (12 Units)

- SSCI 680 Advanced Spatial Computing Units: 4
- SSCI 683 Principles of Spatial Data Analysis Units: 4
- SSCI 684 Spatial Modeling with GIS Units: 4

Note:

The courses in this program are open to students enrolled in any one of USC's doctoral programs. The three courses that make up this graduate certificate provide a vibrant and evolving series of learning opportunities for doctoral students wishing to look at their own disciplines and potential research topics through a spatial lens.

Doctoral Degree

Population, Health and Place (PhD)

Course Requirements

Each student must take at least 44 substantive units in preventive medicine (health), sociology (population) and the spatial sciences (place) at USC during the first three years. Students must complete two laboratory rotations (4 units total) as well as a set of core courses that cover topics in biostatistics, demography, epidemiology and spatial sciences, the specifics of which are provided in the Spatial Sciences Institute's handbook for graduate students. Additional course requirements vary according to specialty area and/or dissertation topic.

Research Requirement

During the first and second year, students work on either a refereed journal article, book chapter or a research report of comparable scope and quality. A research project done at USC is required of all students (by the conclusion of the summer following the student's second year), regardless of prior graduate work.

Screening Procedure

The student's ability to master graduate-level course material is first evaluated after completion of no more than 24 units, and not later than the third semester of graduate work at USC. The final screening procedure is the successful completion of a second-year project requirement. This evaluation is based on the student's performance in courses taken and on an evaluation of the student's research competence as reflected in the first- and second-year research projects. The projects are evaluated by a committee of three faculty, including the student's primary adviser.

Additionally, students are evaluated each year based on adviser input, course work and research progress.

Guidance Committee

In preparation for the qualifying examination, each student assembles a five-person guidance committee to direct the student's program of studies and evaluate research competence. The committee must include at least one member from the lists of eligible faculty in Demography, Preventive Medicine and Spatial Sciences listed in the each of the contributing fields specified in

the Spatial Sciences Institute's handbook for graduate students. The committee continues to serve until after the qualifying examination has been passed, the dissertation topic approved, and the student admitted to candidacy for the PhD. At that time the student assembles a dissertation committee of four or more members (usually consisting of members of the guidance committee, one of whom must be a faculty member from outside the three contributing departments), who advise on and evaluate the dissertation.

Qualifying Examination

The qualifying examination evaluates the student's ability to conduct independent scholarship and research. The student is evaluated based on oral and written presentation of two elements: a written review paper or written exam and the dissertation proposal. The qualifying examination is planned, administered and evaluated by the student's guidance committee. It should be taken no later than during the sixth semester.

Doctoral Dissertation

A student is expected to engage in research activity throughout his or her graduate career, leading up to and culminating in the Ph.D. dissertation. The dissertation is based on an original investigation, usually involving empirical data.

Defense of the Dissertation

The student's doctoral dissertation is defended at either a defense oral, based on an approved preliminary copy of the dissertation, or a final oral, based on the final version of the dissertation.

Advisement

Each student has a major adviser who is usually in the specialty area. The guidance committee should be formed at least one semester before the student takes the qualifying examination. Advisement concerning graduate school requirements may also be sought from the Spatial Sciences staff student adviser and the faculty member serving as director of graduate studies.

Residency Requirement

A minimum of 24 graduate units at USC is required for the doctoral degree.

Courses

- PM 510L Principles of Biostatistics Units: 4
- PM 512 Principles of Epidemiology Units: 4
- PM 529 Environmental Health: An Epidemiological Approach Units: 4
- SOCI 625 Demographic Methods Units: 4
- SOCI 656 Social Demography Units: 4
- SSCI 600 The Geography of Life and Death Units: 4
- SSCI 601a Population, Health and Place Research Practicum Units: 2
- SSCI 601b Population, Health and Place Research Practicum Units: 2
- SSCI 680 Advanced Spatial Computing Units: 4
- SSCI 681 Advanced Quantitative Methods for Population, Health and Place Units: 4
- SSCI 683 Principles of Spatial Data Analysis Units: 4
- SSCI 684 Spatial Modeling with GIS Units: 4
- SSCI 790 Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- SSCI 794a Doctoral Dissertation Units: 2
- SSCI 794b Doctoral Dissertation Units: 2
- SSCI 794c Doctoral Dissertation Units: 2
- SSCI 794d Doctoral Dissertation Units: 2
- SSCI 794z Doctoral Dissertation Units: 0

Thematic Option

Thematic Option, the university's general education core honors program, is an alternative to regular core general education requirements. This rigorous, interdisciplinary program provides a strong, tight-knit, intellectual community for undergraduate students and requires extensive reading and writing.

The program teaches students to formulate ethical questions, to analyze and understand the reasoning behind views that differ from their own, to recognize the roles that historical, political and social forces play in matters of personal choice, and to express their views coherently in writing.

To maintain small classes and allow for extensive discussion, Thematic Option is limited to just under 200 students each year. To apply, students must be highly motivated, have a record of academic achievement, and, most importantly, love learning.

Allen Hancock Foundation Building 410
(213) 740-2955
Email: thematicoption@dornsife.usc.edu
dornsife.usc.edu/thematic-option
Executive Director: Richard Edinger, PhD
Faculty
Associate Professor (Teaching) of Writing: Trisha Tucker, PhD
Assistant Professors (Teaching) of Writing: Amy Cannon, MFA; Michael Petitti, PhD
Lecturer: Patience Moll, PhD

Program Requirements

The Thematic Option honors curriculum consists of four interdisciplinary core classes taught around distinct themes: CORE 101g Symbols and Conceptual Systems: Thematic Option Honors Program ; CORE 102gp Culture and Values: Thematic Option Honors Program ; CORE 103g The Process of Change in Science: Thematic Option Honors Program; and CORE 104gw Change and the Future: Thematic Option Honors Program .

CORE 111 Writing Seminar I: Thematic Option Honors Program and CORE 112 Writing Seminar II: Thematic Option Honors Program make up the 8 units of writing to meet the university requirement. The classes are accompanied by individual, bi-weekly tutorials. CORE 111, which requires concurrent enrollment with an affiliated CORE 102, focuses on critical thinking and analysis, and academic argument and reasoning through close reading of primary texts. CORE 112 introduces research methodology as it teaches students to convey complex ideas, to advance sophistication of essay structure, grounded argument, and to identify and address specific audiences persuasively in academic discourse.

The core Thematic Option curriculum is supplemented by four additional courses taken from the General Education Program: one in Quantitative Reasoning, one in The Arts, one in Social Analysis, and one in the Physical Sciences. Completion of CORE 102 and CORE 111 with a passing grade satisfies the university's General Education Seminar requirement.

Minor

Thematic Approaches to Humanities and Society Minor

The interdisciplinary minor in Thematic Approaches to Humanities and Society allows students to examine a range of thematic and theoretical approaches to understanding culture and society from multiple standpoints in the humanities. The minor is rich in course and schedule options, enabling students with an interest in the humanities to continue their studies. It also includes co-curricular events and advisement from Thematic Option staff. Thematic approaches to humanities and society builds on the intellectual community developed in the Thematic Option honors program and is open to all interested students.

The minor focuses on themes such as interdisciplinary perspectives and modes of inquiry; approaches to criticism and history; reification, ideology, contextualization; and knowledge, human diversity and social relations. Students choose six 4-unit

classes, including one lower-division elective, one upper-division Thematic Option class (CORE 301 Modes of Inquiry), and four upper-division electives. Students also complete a 2-unit reading salon (CORE 200 Liberal Arts Reading Salon).

Requirements, Lower-Division (Choose One, 4 Units)

- CLAS 150gp The Greeks and their Legacies Units: 4
- CLAS 151gp The Legacy of Rome Units: 4
- CORE 102gp Culture and Values: Thematic Option Honors Program Units: 4
- HIST 101gp State and Society in the Ancient World Units: 4
- HIST 102gm The Worlds of Medieval Europe Units: 4
- PHIL 115g Ancient Greek Culture and Society Units: 4
- REL 132g Origins of Western Religions Units: 4

Course Requirements (6 Units)

- CORE 200 Liberal Arts Reading Salon Units: 2
- CORE 301 Modes of Inquiry Units: 4

Requirements, Upper-Division (16 Units)

Enroll in four of the following, at least one from List A, one from List B and not more than one from List C. Not more than two may come from any one department. Courses must be chosen in consultation with a Thematic Option adviser.

List A

Early:

- CLAS 310 Pagans and Christians Units: 4
- CLAS 320gmp Diversity and the Classical Western Tradition Units: 4
- CLAS 333 Cult and City in Ancient Greece Units: 4
- CLAS 470 Democracies Ancient and Modern Units: 4
- EALC 340gp Japanese Civilization Units: 4
- EALC 345 Korean Civilization Units: 4
- EALC 350gp Chinese Civilization Units: 4
- EALC 355 Studies in Chinese Thought Units: 4
- EALC 365 Studies in Japanese Thought Units: 4
- REL 311g The Bible in Western Literature Units: 4
- REL 315 Thought and Life of Islam Units: 4
- REL 317g The Bible in Its Ancient Context Units: 4

Modern:

- COLT 426 Utopias Units: 4
- COLT 445 Europe and the Writing of Others Units: 4
- EALC 332 Modern Korean Literature in Translation Units: 4

The Writing Program

Writing Program courses are designed to help students develop practices of reading, writing and critical reasoning that are necessary for success in academic and professional discourse. Writing Program pedagogy emphasizes small classes and frequent conferences in order to provide the highly individuated instruction and careful feedback necessary to extend the writing process and enhance the rhetorical judgment of each student. To meet the university's writing requirement, students must complete WRIT 150 (or its equivalent) and an advanced writing course, WRIT 340.

Lower-Division Requirement

WRIT 150 Writing and Critical Reasoning–Thematic Approaches focuses on the rhetorical principles and techniques necessary for successful college-level writing. Special attention is paid to critical thinking and reading, sentence-level fluency, research techniques, and the elements of academic argument and reasoning. WRIT 150 will not satisfy the lower-division writing requirement if taken on a Pass/No Pass basis.

Advanced Writing Requirement

All students at USC, except those who satisfy their general education requirements through the Thematic Option Program, must complete WRIT 340 Advanced Writing, an upper-division course designed to help students write on topics related to their disciplinary or professional interests. Students usually enroll in WRIT 340 in their junior year, and may not take the course earlier than their sophomore year. Different schools within the university offer sections of this course. Students should consult their major departments to determine which version of WRIT 340 best complements their program of study. WRIT 340 will not satisfy the university's advanced writing requirement if taken on a Pass/No Pass basis.

All classes that meet the university's advanced writing requirement teach students to write clear, grammatical, well-structured prose; to discover and convey complex ideas critically; and to appreciate the nuances of effective argumentation. The principal aim of the requirement is to develop a student's capacity to formulate thoughtful and compelling writing for specific academic, professional and public audiences.

Preparatory Course Work

Some students are better served by taking a preparatory course before they enroll in WRIT 150. Entering freshmen who score below a specified level on the verbal portion of the SAT take the University Writing Examination. Based on the results of this examination, certain students enroll in WRIT 120 Introduction to College Writing or WRIT 121 Introduction to College Writing in a Second Language during their first semester at USC.

International students take the University Writing Examination after having completed any course work required by the American Language Institute.

Transfer Credit

Students may complete the lower-division requirement by completing an equivalent second-semester composition course that is taken for a letter grade option (not Pass/No Pass) at another institution after high school graduation and prior to enrolling at USC. Equivalent transfer credit is determined by the university's articulation officer. The advanced writing requirement must be completed at USC.

Time Limits

Students should complete the lower-division writing course requirement by the end of their first year at USC and must complete it before they enroll in their 65th unit. Transfer students who have not completed the lower-division requirement prior to entering USC should enroll in WRIT 150 during their first semester at USC, and must enroll in WRIT 150 no later than their 19th unit (second semester) at USC.

USC Annenberg School for Communication and Journalism

The USC Annenberg School for Communication and Journalism is an international leader in education and scholarship in the fields of communication, journalism, public diplomacy and public relations. The school offers a comprehensive curriculum emphasizing the core skills of leadership, innovation, service and entrepreneurship while drawing upon the resources of a networked university located in the media capital of the world. USC Annenberg's commitment to the converged practice of communication and journalism, interdisciplinary studies, and collaboration makes it unique among peer institutions. Students learn from theory and practice, and the school's programs put it at the crossroads of media, technology and culture.

USC Annenberg's nationally accredited School of Journalism provides experience for students in all media platforms, with a digital newsroom, state-of-the-art editing equipment for radio and television news production, and the opportunity to work at on-campus media outlets. The school's public relations program prepares students to thrive in advocacy communication, learning to write and communicate targeted messages across media platforms. The School of Communication's multidisciplinary curriculum explores how human interaction and technology affect communities, businesses, nations and the world, preparing students for careers in communication, persuasion and leadership. USC Annenberg's active internship program and study abroad opportunities give students the broad, global perspective required to be successful professionals.

USC Annenberg alumni fill top posts in the communication and media industries, and remain an invaluable resource to students and faculty. USC Annenberg's more than 200 faculty members have been recognized in diverse fields, and their expertise challenges students to become communication leaders.

Administration

Degree Programs

The School of Communication offers programs of study leading to a BA in Communication as well as eight minors and five interdisciplinary minors. The school offers progressive degrees in Master of Science in Communication Data Science, Master of Communication Management, Master of Digital Social Media, and Master of Public Diplomacy; a Master of Science in Communication Data Science (joint program with the Viterbi School of Engineering); a Master of Communication Management; a Master of Science in Digital Social Media; a Master of Science in Digital Media Management; a Master of Arts in Global Communication (in conjunction with the London School of Economics); two Master of Public Diplomacy programs; and an MA and PhD in Communication. The Communication Management Program has established dual degree programs with the USC Gould School of Law and Hebrew Union College.

Undergraduate Degrees

The School of Communication offers programs of study leading to a BA in Communication and minors in Communication Policy and Law; Communication Technology Practices and Platforms; Cultural Diplomacy; Culture, Media and Entertainment; Justice, Voice and Advocacy; Media Economics and Entrepreneurship; Professional and Managerial Communication; and Sports Media Studies. It also offers interdisciplinary minors in Cultural Studies; Global Communication; Health Communication; Law and Society; and Photography and Social Change. Many communication majors pursue, with the school's encouragement, a double major with another discipline or a minor to complement the major. Through careful planning, students can complete these options within four years.

Students must consult with an undergraduate academic adviser at least once each semester to explore course selections within the major, the minor, general education offerings, and electives.

Admission

Admission is competitive. Fall 2020 first-year admitted students had an average GPA of 3.82 unweighted with an SAT score of 1370-1500 (middle 50%). Transfer admitted students had an average college GPA of 3.88. For admission information and deadlines, refer to the USC Admission website. All transfer applicants must review the transfer admission application guidelines on the Annenberg Admissions website; contact the Annenberg Admissions Office for more information. USC exclusively uses the Common Application for freshman and transfer admission. Applicants must submit the Common Application and the USC Writing Supplement, both of which can be accessed at commonapp.org. For transfer applicants, in addition to the university writing samples, a 250-word statement of intent is required; instructions are included with the USC Writing Supplement.

Students currently enrolled at USC who wish to change their major to communication must file a formal application with all supporting documents through the Annenberg Student Services Office. Students who entered USC as freshmen or transfers must have 16 units completed at USC with a minimum cumulative GPA of 3.0. The 3.0 GPA is a minimum standard and does not guarantee admission.

For current USC students, the application period is the first week of classes each fall, spring and summer terms. No applications will be accepted after the first week of classes.

Students who have not been admitted to the communication major or one of the minors may complete a maximum of 20 communication (COMM) units at USC. No further communication course work may be taken until the student is admitted. Students who complete the maximum number of units without gaining admission to the school will be advised to select another major. Students are encouraged to contact the Annenberg Student Services Office, ASC 140, (213) 740-0900, for advisement on change of major criteria and major requirements. In certain cases, students may be referred to Academic Counseling Services, STU 300, (213) 740-1741, to consult with an adviser to select another major.

Academic Integrity Policy

The School of Communication maintains a commitment to the highest standards of ethical conduct and academic excellence. Any student found responsible for plagiarism, fabrication, cheating on examinations, or purchasing papers or other assignments will be reported to the Office of Student Judicial Affairs and Community Standards and may be dismissed from the School of Communication. There are no exceptions to the school's policy.

Curriculum Areas of Study

By design, the courses in the curriculum tend to cluster into different areas of study. These areas represent important foci in the communication discipline and are areas in which the school's faculty possess special expertise. Four such areas of study are described below. They are not mutually exclusive, nor do they exhaust the curriculum; rather, they represent partially overlapping areas of unusual depth. Students may specialize in one of these areas or may design individual programs of study by choosing other combinations of electives that best meet their needs and career objectives.

Communication and Culture Option: This option will be attractive to a broad range of students whose careers have an international or multicultural dimension, from those interested in foreign service, travel and consulting to those seeking careers in the arts. In addition, students taking this option will be well prepared for advanced graduate study. Courses emphasize: communication as an essential component of culture and cultural production; cultural forces that shape communication practices; cultural barriers to communication; gender and diversity issues in human and mass communication and cultural production; media representations of race, ethnicity and gender; the production of meaning in diverse modes such as art, religion, popular culture and technology; and cultural criticism.

Entertainment, Communication and Society Option: This option is for students who wish to pursue careers in the entertainment industry, as well as students interested in the relationship of communication and entertainment to popular culture, globalization, cultural studies, marketing, advertising and ethics. Students taking this option will be well prepared for graduate study; they will also be able to enter the entertainment industry with a grounding in the theory, roles, issues and effects of entertainment. Courses emphasize: the theoretical underpinnings of entertainment studies; the historical context of entertainment; the roles and effects of entertainment concepts in "high art" and popular culture; the impact of entertainment on politics; advertising in an entertainment society; the blurring of marketing and entertainment and the effects of this on culture; the effects of entertainment in general and specifically on constructions of race and childhood; issues in the blurring of fact and fiction; ethical dilemmas; and the globalization of entertainment industries.

Media, Law and Politics Option: This option is designed for students who are interested in careers in government and public service, the law, and political and legal consulting, as well as advanced graduate study. Students examine communication processes in the public sphere and learn how to participate competently in these practices. Courses emphasize: the role of persuasion in the political and legal processes; the techniques used by individuals, institutions and social movements to influence public affairs; the history, design, implementation and evaluation of political campaigns; the role of public opinion; ethical issues

in public communication, including the influence of media in the political and justice systems, the role of the First Amendment and the changing nature of freedom of expression in a mass-mediated environment, and problems of public participation.

Organizational and Interpersonal Communication Option: This option is most relevant to students interested in careers in business, management, human resources and development, corporate communication, and consulting, as well as advanced graduate study. Courses emphasize: interpersonal communication processes that affect and reflect personality, motives, beliefs, attitudes and values; communication's role in the development, maintenance and disintegration of social, family and intimate relationships; managing interpersonal conflict; communication between superiors and subordinates and in teams; communication's role in determining organizational culture; managing information in organizations; and the role of information technology in processes of globalization.

Progressive Degree Program

This progressive degree program allows USC students to complete a bachelor's degree and a master's degree in as little as five years. Students with a 3.0 overall GPA or higher in all classes taken at the university level are eligible to apply for admission to the degree program during their junior year, if a minimum of 24 semester hours will be completed in the final year of undergraduate enrollment. However, a 3.0 GPA does not guarantee acceptance.

Current students must attend a mandatory information session conducted by Annenberg Admissions and a member of the faculty before initiating the application process. Students admitted into the progressive degree program begin taking master's level courses in their senior year and may complete the master's degree in year five. For information on the application process, refer to the Annenberg website. For further details on progressive degree programs, see the Requirements for Graduation page.

Other Programs

Debate Squad

The Trojan Debate Squad provides an opportunity for outstanding students (3.0 GPA or better), both communication majors and non-majors, to compete in an intensive intercollegiate laboratory setting. Whatever the student's intended career, the skills he or she develops in research, critical thinking and oral advocacy will be invaluable. The team has an excellent record in team policy debate and is now also offering British parliamentary (worlds format) debating. The team competes at both regional and national competitions.

Honors Program

The School of Communication offers an 8-unit honors program for exceptional students. To qualify, students must have a 3.5 GPA both overall and in the COMM major after completing the core courses (COMM 200 or COMM 313, COMM 206 or COMM 311, COMM 209 or COMM 309, COMM 204 or COMM 322, COMM 301 or COMM 305, ASCJ 200 or ASCJ 210). To graduate with School of Communication honors, a student must maintain a 3.5 overall and COMM major GPA and receive at least a B+ or higher in the two honors courses. Students take COMM 495 Honors Seminar (4 units) and COMM 497x Honors Thesis (4 units). Contact an undergraduate adviser for further information and application forms.

Honor Society

Lambda Pi Eta is a national communication/journalism honor society that is open to students in graduate and undergraduate Annenberg programs. To be eligible, students must have a USC cumulative GPA and an Annenberg major GPA of 3.5 or higher. In addition, undergraduate students must have a declared communication, journalism or public relations major, and have completed (or currently be registered for) at least 60 units, at least 12 of which are in the major. Graduate students must have completed at least 12 units in the fields of communication, journalism or public relations.

Annenberg Career Development

The USC Annenberg Career Development Office has listings for paid and unpaid internships from around the country. Career advisers conduct mandatory advisement appointments for all sophomores and offer career workshops, guest speakers and mentoring opportunities. Students are advised to participate in internships before graduation.

Annenberg International Programs

Annenberg International Programs follows health and safety directives provided by the University and programs may be subject to suspension due to COVID-19 complications.

Spring Semester in Australia

This semester program offers students the chance to study at one of Australia's premier universities, in one of the country's most exciting cities. Students take communication courses that count for major credit at USC at the University of New South Wales (UNSW) and can choose from a wide variety of elective courses. UNSW is located in Kensington, just south of the center of Sydney and its commercial hub. The program gives students the chance to explore mass media and communication in a challenging environment with a distinct worldview, very different from that of the United States. Students may earn a maximum of 12 USC units of upper-division COMM elective credit. A minimum USC cumulative GPA of 3.0 is required for this program.

Fall and Spring Semester in Hong Kong

The semester program offers students the opportunity to learn about Chinese culture at the Chinese University in Hong Kong, a bilingual institution. The program also gives students the experience of living in Hong Kong where they can witness the "one country, two systems" experiment. Courses in English are offered in fine arts, literature, history, Japanese studies, intercultural studies, music, philosophy, computer science, anthropology, economics, international relations, as well as journalism and communication. For students interested in Chinese language, courses are offered in Putonghua (Mandarin) or Cantonese. Extracurricular activities include the opportunity to teach English in rural China, monthly dinner talks with Asian studies specialists and excursions to local areas of interest. Students may earn a maximum of 12 USC units of upper-division COMM elective credit. A minimum USC cumulative GPA of 3.0 is required for this program.

Fall and Spring Semester in London

The semester program offers students the opportunity to study communication in London, the most important center of media in Europe. Many of the communication courses offered include British media guest lecturers and site visits. The program includes one-day visits to such places as Oxford, Cambridge and Liverpool. Planned activities within London include theatre and museum visits. Students may earn 16 units of upper-division COMM elective credit. A minimum USC cumulative GPA of 3.0 is required for this program. Please visit the Annenberg International Programs website for more information on additional program requirements.

Spring Semester in New Zealand

Annenberg's New Zealand program offers students the opportunity to travel to the Southern Hemisphere. Each spring, students can study at the Auckland University of Technology (AUT), a world-class institution that offers students the chance to take communication courses that count toward major credit at USC, all the while exploring the beautiful city of Auckland and the surrounding countryside. The AUT program offers communication students an exciting way to broaden their understanding of media and mass communication in a challenging environment with an outlook distinctly different from that of the United States and Southern California. Students may earn 12 units of upper-division COMM elective credit. A minimum USC cumulative GPA of 3.0 is required for this program.

Spring Semester in Rome, Italy

Undergraduate students may spend a spring semester exploring how media, culture, history and politics are embedded within this iconic city and drive innovation there. Taking courses at a dedicated study center located in the heart of the historic city center in Rome, students meet communication executives and government policy-makers and gain exposure to Italian media, culture and civilization. The program also includes guided visits to museums and historical districts, as well as an overnight group excursion to Bologna. Students may earn 16 units of upper-division COMM elective credit. A minimum USC cumulative GPA of 3.0 is required for this program. Please visit the Annenberg International Programs website for more information on additional program requirements.

Summer International Communication Studies — London, Paris, Madrid, Berlin and Budapest

The International Communication Studies program (ICS) allows undergraduate students to study a range of approaches to public communication media across Europe.

Students divide the five-week course into stays in Los Angeles, London, Paris, Madrid, Berlin and Budapest. In addition to regular class meetings, students discuss the interplay of current world issues and international media practices with communication practitioners from international news and public relations media, government institutions, private industry and global organizations.

Students enroll in JOUR 482 Comparative Media in Europe (4 units), which will count as 4 units of upper-division COMM elective credit. A minimum USC cumulative GPA of 3.0 is required for this program.

Alternative Spring Break Program – Bangkok and Chiang Mai, Thailand

Students spend spring break in two of the country's most iconic cities, Bangkok and Chiang Mai, where they visit with companies, NGOs and foundations focusing on corporate social responsibility and communication advocacy. Explore the fields of communication and public relations through a lens of social change and advocacy, while developing a global perspective and first-hand insight into the challenges and effectiveness of organizations operating in Southeast Asia. This program offers students the unique opportunity to evaluate the areas of community development, sustainability and social responsibility in an emerging area of the world. A minimum USC cumulative GPA of 3.0 is required for this program. Please visit the Annenberg International Programs website for more information on additional program requirements.

Graduate Internship Program – Berlin, Cape Town, Hong Kong or São Paulo

The Annenberg International Programs Graduate Internship Program allows graduate students the opportunity to explore the communication and journalism fields from a distinctively global perspective. Students have the opportunity to intern in one of the following four global cities: Berlin, Germany; Cape Town, South Africa; Hong Kong SAR, China; or São Paulo, Brazil. The program takes place over the course of eight weeks during the summer semester. Students enroll in CMGT 591 and earn 1 unit of academic credit. Program dates and fees vary based on program city.

For further information, contact Annenberg International Programs at (213) 821-1276, email ascintl@usc.edu or visit annenberg.usc.edu/international.

Graduate Degrees

Degree Programs

The School of Communication offers programs of study leading to a professional Master of Communication Management, an MA/MSc in Global Communication in collaboration with the London School of Economics, a Master of Science in Digital Social Media, a Master of Science in Digital Media Management, two Master of Public Diplomacy programs, and research-oriented Master of Arts and Doctor of Philosophy degrees in Communication. The School of Communication also collaborates with the USC Viterbi School of Engineering to offer a Communication Data Science (MS), which gives students the opportunity to innovate at the intersection of communication and engineering. In addition, special programs enable students to earn dual degrees in Communication Management and Law (USC Gould School of Law) and in Communication Management and Jewish Nonprofit Management (Hebrew Union College).

The degree programs are designed to ensure that students are educated in substantive studies that constitute the discipline of communication and provide a basis for competing effectively in the job market.

All students seeking the degrees in Communication Management and Global Communication will take a range of courses that prepare them for successful professional management careers in communication-related businesses, organizations and fields.

All students pursuing the research-oriented degree (PhD in Communication) are required to take two theory courses that introduce them to inquiry in human communication and two research methods courses that acquaint them with the historical/critical and social scientific techniques available to conduct scholarly research. These requirements strengthen the student's appreciation of the intellectual bases of human communication study and further the concept of a community of scholars and practitioners in the profession. Students specialize in one of seven available tracks: Groups, Organizations and Networks; Health Communication and Social Dynamics; Information, Political Economy and Entertainment; Media, Culture and Community; New Media and Technology; Political Economy of Global Communication; Rhetoric, Politics and Publics. In addition, students are encouraged to sample courses in the remaining tracks, thus obtaining an education of unparalleled breadth and depth.

Honor Society

Lambda Pi Eta is a national communication/journalism honor society that is open to students in graduate and undergraduate Annenberg programs. To be eligible, students must have a USC cumulative GPA and an Annenberg major GPA of 3.5 or higher. In addition, undergraduate students must have a declared communication, journalism or public relations major, and have completed (or currently be registered for) at least 60 units, at least 12 of which are in the major. Graduate students must have completed at least 12 units in the fields of communication, journalism or public relations.

Admission Requirements

Master of Communication Management, Master of Science in Digital Social Media, Master of Arts in Global Communication, Master of Public Diplomacy and Master of Public Diplomacy (Practitioner and Mid-Career Professional)

The school accepts students from a broad range of academic backgrounds in social sciences, humanities, physical sciences or professional schools. Some are employed or have work experience in communication-related fields. Others apply immediately after completing baccalaureate degrees.

Criteria: All applicants must submit the online USC Graduate Admission Application. The faculty admission committees consider many criteria in the admission selection process: the academic record and professional and work-related accomplishments are taken into account. The minimum criteria are the equivalent of a U.S. bachelor's degree and a 3.0 GPA for all undergraduate and graduate work completed. The Master of Arts in Global Communication requires a minimum 3.5 (on a 4.0 scale) cumulative GPA or international equivalent for admission. Refer to the Annenberg graduate application guidelines on the School website for complete details about graduate application requirements. Scores on the Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS) or Pearson's Test of English (PTE) are required

for applicants whose undergraduate degree was not completed in a country where English is the only official language. Letters of recommendation from those persons familiar with the applicant's work — preferably academically — are also required. In addition, applicants must submit a statement of purpose, transcripts of all previous college and university work attempted, résumé and writing samples.

Applicants to the Global Communication degree program must apply to USC and the London School of Economics (LSE). Participation in this degree program requires that students simultaneously gain admission to LSE and USC. GRE or GMAT scores are not required for admission. Scores on the Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS) or Pearson's Test of English (PTE) are required for applicants whose undergraduate degree was not completed in a country where English is the only official language. All students will begin their studies in London at the LSE.

Procedure: Refer to the Annenberg Admissions website for degree program admission application guidelines and deadlines.

Doctor of Philosophy

Students may enter from a variety of academic fields and majors. Applicants whose undergraduate work was in fields other than communication may be admitted on the condition that adequate preparation in directly relevant areas is evident. Completion of a master's degree in communication is not required for admission to the Doctor of Philosophy.

Criteria: All applicants must submit the online USC Graduate Admission Application. The faculty admission committee reviews each application comprehensively. Three letters of recommendation from faculty qualified to comment on an applicant's capacities for a rigorous program of study are required. Completion of a basic descriptive statistics course is recommended. In addition, a personal statement, transcripts of all previous college and university work attempted, a résumé and a sample of scholarly writing are required. The MA in Communication is earned as part of the PhD program.

Procedure: Admission is granted for the fall semester only. Refer to the Annenberg graduate application guidelines on the School website for complete details about graduate application requirements.

Degree Requirements

The Master of Arts in Global Communication, Master of Arts in Communication and Doctor of Philosophy in Communication are awarded under the jurisdiction of the Graduate School. Refer to The Graduate School section of this catalogue and the Requirements for Graduation section for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Bachelor's Degree

Communication (BA)*

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. See the General Education Program for more information.

Course Requirements

Required Courses

Theoretical and Foundational Classes (12 units total)

These courses introduce students to theories and subject matter that provide foundational understanding for the Communication major. Each area below broadly explores the way messages and meanings are socially and culturally produced, received by individuals and society, and transformed through technological and industrial shifts.

Communication Interaction, Influence and Impact (4 units)

- COMM 200 Communication and Social Science Units: 4

  or
- COMM 313 Communication and Mass Media Units: 4

Communication, Civic Life and Culture (4 units)

- COMM 206 Communication and Culture Units: 4

  or
- COMM 311 Communication and Publics Units: 4

Economics and Technologies of Communication (4 units)

- COMM 209 Communication and Media Economics Units: 4

  or
- COMM 309 Communication and Technology Units: 4

Methods of Communication Practice (8 units total)

The courses in this area help to provide students with the critical thinking, tools, and methods of inquiry necessary for the interpretation, development, and expression of messages, systematic arguments, and empirical evidence.

Four units that center on the design and execution of arguments

- COMM 204 Public Speaking Units: 4

  or
- COMM 322 Argumentation and Advocacy Units: 4

Four units that center on the design, execution and interpretation of empirical evidence

- COMM 301Lg Empirical Research in Communication Units: 4

  or
- COMM 305 Understanding Social Science Research Units: 4

Annenberg Experience (4 units)

Students are required to take one 4-unit course that prepares Annenberg students to enhance their digital literacy and contextualize modern communication controversies, contemplating changes in the way we process and produce information.

- ASCJ 200 Navigating Media and News in the Digital Age Units: 4

  or
- ASCJ 210 Contours of Change in Media and Communication Units: 4

Electives (24 units total)

- Upper-division COMM courses: 16 units
- Lower- or upper-division COMM or ASCJ courses: 4 units
- One 400-level non-cross-listed COMM course (excluding COMM 490, COMM 494 and COMM 499): 4 units

Additional Requirements

Students must maintain a minimum 2.0 overall GPA in upper-division course work applied toward the major. No more than 4 units of COMM 380 may be counted toward the department major. The School of Communication is committed to ensuring that all declared communication majors follow the necessary requirements. Mandatory advisement is required of all communication majors each semester prior to registration. All students taking communication classes are held to the highest academic integrity standards and may be denied admission or have admission revoked as a result of conduct violations.

Qualified non-majors (generally, students with junior/senior status, a minimum 3.0 GPA and a declared major elsewhere at the university) with appropriate academic preparation may be permitted to enroll in communication electives without fulfilling prerequisite requirements. Application for a waiver should be made to an undergraduate adviser.

Minor

Communication Policy and Law Minor

Information and communication practices and technologies have an increasingly powerful impact on nearly every aspect of our lives. From the level of privacy in our personal lives to the way

we govern our communities or manage our businesses, the legal and policy issues in the communication field are ever-changing and increasingly complex. To prepare students to navigate this dynamic and complicated world, the minor in communication policy and law combines courses in communication, law, ethics, and the business of communication taught at both the School of Communication and the School of Journalism at USC Annenberg. Students can choose to focus on policy or legal issues that affect communication technologies, strategies, and uses. This minor will not only enable students to understand the revolution in media and telecommunications technology and practice, it will ground them in the fundamentals of free speech, intellectual property and the local, state and federal role in the regulation of communication platforms ranging from emerging social media to the legacy media of broadcasting and newspapers. This is an ideal minor for students interested in law or advanced communication scholarship. Admission requirements are a minimum 3.0 grade point average and completion of 32 units (sophomore standing). The 3.0 GPA is a minimum standard and does not guarantee admission.

Required Core Courses (8 units)

- ASCJ 210 Contours of Change in Media and Communication Units: 4
- COMM 322 Argumentation and Advocacy Units: 4

Choose three electives (12 units)

- COMM 345 Social and Economic Implications of Communication Technologies Units: 4
- COMM 371 Media Censorship and the Law Units: 4
- COMM 402 Public Communication Campaigns Units: 4
- COMM 412 Communication and Social Movements Units: 4
- COMM 421 Legal Communication Units: 4
- COMM 422 Legal Issues and New Media Units: 4
- COMM 427 Topics in Media Economics, Law and Policy Units: 4
- COMM 489 Campaign Communication Units: 4
- JOUR 462 Law of Mass Communication Units: 4

Communication Technology Practices and Platforms Minor

Students in this minor trace the roots and dynamics of contemporary networked technologies and learn how to participate and excel within media cultures, online networks and organizational workplaces. The minor focuses on three areas: cultures (connecting communication technologies to histories, values, and ethics of social relationships and civic communities); networks (developing qualitative and quantitative skills to model, explain and influence relationships among media and people at local and global scales); institutions (tracing the legal, organizational, economic and interpersonal contexts that produce and transform communication technologies). The field of communication technology requires individuals who can critique, cultivate, build and influence new relationships among people, platforms and practices. Whether starting careers in strategic consulting, medical informatics, non-profit management, social media design, public sector service or new media entrepreneurship, students are encouraged to utilize skills and foundational concepts underlying 21st century communication technologies.

Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing). The 3.0 GPA is a minimum standard and does not guarantee admission.

Required Core Communication Courses

- COMM 309 Communication and Technology Units: 4
- COMM 339 Communication Technology and Culture Units: 4
- COMM 340 The Cultures of New Media Units: 4

Electives-Choose Two From The Following

- COMM 310 Media and Society Units: 4
- COMM 321 Communication and Social Media Units: 4
- COMM 345 Social and Economic Implications of Communication Technologies Units: 4
- COMM 350 Video Games: Content, Industry, and Policy Units: 4
- COMM 422 Legal Issues and New Media Units: 4
- COMM 431 Global Strategy for the Communications Industry Units: 4
- COMM 449 Perspectives on the Networked Press Units: 4
- COMM 465m Gender in Media Industries and Products Units: 4
- COMM 486 Human and Technological Systems in Organizations Units: 4
- COMM 498 Ethical Issues in Entertainment and Communication Units: 4
- CTIN 462 Critical Theory and Analysis of Games Units: 4
- CTIN 463 Anatomy of a Game Units: 4
- CTIN 488 Game Design Workshop Units: 4

Total units: 20

Cultural Diplomacy Minor

This 20-unit minor focuses on cultural diplomacy and the ways in which consideration of cultural issues and engagement in the cultural sphere can enhance foreign affairs and international interactions. It links existing classes and faculty expertise to expose students to a range of international issues while introducing culturally focused approaches to addressing and rectifying such issues. This minor builds a coherent picture of the power of culture as an essential dimension of foreign policy either as a barrier or a medium for engagement and a common ground. Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing). The 3.0 GPA is a minimum standard and does not guarantee admission.

Required Core Course (4 units)

- PUBD 369w Public Diplomacy and Global Citizenship Units: 4

Required Course (4 units)

Choose one of the following courses:

- PUBD 417 Global Engagement: Designing Public Diplomacy Strategies Units: 4
- PUBD 418 International Exchanges and Public Diplomacy Units: 4
- PUBD 419 Public Diplomacy in Los Angeles Units: 4
- PUBD 420 Regional Studies in Public Diplomacy Units: 4

Electives (12 units)

Choose 12 units from the following:

- AHIS 486 Introduction to Museums: Past, Present, and Future Units: 4
- ANTH 205g Introduction to Global Studies and Cross-cultural Research Units: 4
- COMM 206 Communication and Culture Units: 4
- COMM 308 Communication and Conflict Units: 4
- COMM 310 Media and Society Units: 4
- COMM 324mw Intercultural Communication Units: 4
- COMM 366 Designing Media for Social Change Units: 4
- COMM 392 Media and Migration in Times of European Crisis Units: 4
- COMM 405 From the Ground Up: Communicating About Food Units: 4
- COMM 412 Communication and Social Movements Units: 4
- COMM 413 Propaganda, Ideology and Public Controversy Units: 4
- COMM 430 Global Entertainment Units: 4
- COMM 445 Global Networks of Sport Units: 4
- COMM 475 Environmental Communication Units: 4
- CRIT 350gw Global Art, Design and Visual Culture since 1960 Units: 4
- CTCS 367 Global Media Units: 4
- DANC 342gp International and Historical Perspectives on Dance Units: 4

- IR 101gxw International Relations Units: 4
- JOUR 484 American Religion, Foreign Policy and the News Media Units: 4
- MUSC 372g Music, Turmoil and Nationalism Units: 4
- PUBD 418 International Exchanges and Public Diplomacy Units: 4
- PUBD 419 Public Diplomacy in Los Angeles Units: 4
- PUBD 420 Regional Studies in Public Diplomacy Units: 4

Culture, Media and Entertainment Minor

This 20-unit minor offers courses that examine the theory, content, social impact and economics of a range of creative, media, culture and entertainment industries. Through the lens of music, film, television, advertising, digital media, games, comics and fashion, students will learn strategies for analyzing popular culture and entertainment texts, mechanisms and platforms of content distribution, as well as the historical, social, cultural and political issues shaping these entertainment fields. Taking into account shifts and disruptions in contemporary media and entertainment, students will further examine consumption, audience engagement and participation that necessarily shape our individual and collective identities. These courses will highlight the production, consumption and meanings inscribed in entertainment media industries and products. Depending on the courses selected, the minor will prepare students for a variety of careers in and/or further critical scholarship about media and entertainment industries.

Admission requirements are a minimum 3.0 grade point average and completion of 32 units (sophomore standing). The 3.0 GPA is a minimum standard and does not guarantee admission.

Required Core Courses (8 Units)

- COMM 300 Entertainment, Communication and Society Units: 4
- COMM 384 Interpreting Popular Culture Units: 4

Choose Three Electives (12 units)

- COMM 306 Innovation, Entertainment, and the Arts Units: 4
- COMM 307 Sound Clash: Popular Music and American Culture Units: 4
- COMM 310 Media and Society Units: 4
- COMM 312 The Business and Culture of Celebrity Units: 4
- COMM 326 Latinx Media Studies Units: 4
- COMM 350 Video Games: Content, Industry, and Policy Units: 4
- COMM 355 Advertising and Communication Units: 4
- COMM 360 Los Angeles: Communication and Culture Units: 4
- COMM 363 Media Consumption Units: 4

- COMM 498 Ethical Issues in Entertainment and Communication Units: 4
- CTCS 482 Transmedia Entertainment Units: 4
- JOUR 381 Entertainment, Business and Media in Today's Society Units: 4
- JOUR 493 Comics and Graphic Storytelling Units: 4

Total units: 20

Justice, Voice, and Advocacy Minor

The 20-unit minor offers courses that prompt students to explore the central role communication, media, news and public relations play in a multicultural society. As a cross-school minor, students will examine questions and perspectives on identity and community through an interdisciplinary lens that centers on theory and praxis, impact and change. The courses in this minor are grouped in order to give students a foundational understanding of the cultural roots and representations of identity, the practice of storytelling in the context of local and disenfranchised communities, as well as various institutional structures and policies that create barriers or avenues of social justice. Familiarity with these important issues serves students on a practical level by improving their ability to understand, anticipate and appreciate diverse viewpoints and audiences. The minor also helps students develop as more engaged, informed and empathetic citizens who are empowered to bring resolution and shared understanding to areas of conflict and difference in their own lives, the broader community and the workplace. Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing). The 3.0 GPA is a minimum standard and does not guarantee admission.

Required Core Courses (8 units)

- ASCJ 210 Contours of Change in Media and Communication Units: 4
- COMM 366 Designing Media for Social Change Units: 4

Culture and Identity (4 units)

Choose 4 units from the following:

- COMM 307 Sound Clash: Popular Music and American Culture Units: 4
- COMM 322 Argumentation and Advocacy Units: 4
- COMM 324mw Intercultural Communication Units: 4
- COMM 326 Latinx Media Studies Units: 4
- COMM 360 Los Angeles: Communication and Culture Units: 4

- SOCI 408 Volunteers, Non-Governmental Organizations, and Everyday Politics Units: 4
- SOCI 445 Political and Social Theory Units: 4

Media Economics and Entrepreneurship Minor

This 24-unit minor equips students with the skills and critical framework to navigate the ongoing transformation sweeping the media industry. The interdisciplinary curriculum, which includes courses from Communication, Journalism and Entrepreneurship, promotes an understanding of the key economic forces that are reshaping television, film, music and news. The program emphasizes innovation and problem solving. Above all, it prepares students to embrace the exciting changes that are reshaping the media landscape. Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing). The 3.0 GPA is a minimum standard and does not guarantee admission.

Required Core Courses (8 Units)

- BAEP 450 Fundamentals of Entrepreneurship Units: 4 or
- BAEP 451 The Management of New Enterprises Units: 4

- COMM 209 Communication and Media Economics Units: 4

Elective Courses (16 Units)

4 units must be in BAEP:

- BAEP 452 Feasibility Analysis Units: 4 *
- BAEP 454 Venture Initiation: Launching and Scaling Your Startup Units: 4 **
- BAEP 460 Seminar in Entrepreneurship Units: 2
- BAEP 465 Digital Playbook for Entrepreneurs: Creating a Tech Startup Units: 2
- BAEP 470 The Entrepreneurial Mindset — Taking the Leap Units: 2
- BAEP 475 Entertainment Entrepreneurship Units: 2

Note:

**Prerequisite: BAEP 450 or BAEP 451*
***Prerequisite: BAEP 452*

4-8 units must be in COMM:

- COMM 306 Innovation, Entertainment, and the Arts Units: 4
- COMM 345 Social and Economic Implications of Communication Technologies Units: 4
- COMM 427 Topics in Media Economics, Law and Policy Units: 4
- COMM 429 The Internet, Economy, and Society Units: 4
- COMM 430 Global Entertainment Units: 4
- COMM 431 Global Strategy for the Communications Industry Units: 4
- COMM 454 Media, Money, and Society Units: 4
- COMM 465m Gender in Media Industries and Products Units: 4

4-8 units must be in JOUR or PR:

- JOUR 380 Sports, Business and Media in Today's Society Units: 4
- JOUR 381 Entertainment, Business and Media in Today's Society Units: 4
- JOUR 469 Money, Markets and Media Units: 4
- JOUR 472 Strategies for Monetizing New Media Units: 4
- PR 428 Social, Legal and Ethical Foundations of Public Relations Units: 4 *
- PR 429 Business and Economic Foundations of Public Relations Units: 4 **
- PR 450 Advanced Strategic Public Relations Units: 4 ***
- PR 491 Fan Relations Units: 4
- PR 492 Personal Branding Units: 4

Note:

**Prerequisite: PR 250*
***Prerequisite: PR 351a*
****Prerequisite: PR 351b and PR 463*

Total units: 24

Professional and Managerial Communication Minor

The ability to succeed in today's workplace necessitates a growing number of communication skills. As today's increasingly global and highly competitive marketplace grows in complexity, the need to understand intercultural differences, the power of structure in the workplace and other issues such as dealing with interpersonal conflicts continues to increase. This minor will provide students interested in the management of people, resources or products with these necessary tools. Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing). The 3.0 GPA is a minimum standard and does not guarantee admission.

Required Core Communication Courses

- COMM 320 Small Group and Team Communication Units: 4
- COMM 375 Business and Professional Communication Units: 4
- COMM 385 Organizational Communication Units: 4

Electives-Choose Three From The Following:

- COMM 302 Persuasion Units: 4
- COMM 304 Interpersonal Communication Units: 4
- COMM 308 Communication and Conflict Units: 4
- COMM 315 Health Communication Units: 4
- COMM 321 Communication and Social Media Units: 4
- COMM 322 Argumentation and Advocacy Units: 4
- COMM 324mw Intercultural Communication Units: 4
- COMM 345 Social and Economic Implications of Communication Technologies Units: 4
- COMM 388 Ethics in Human Communication Units: 4
- COMM 431 Global Strategy for the Communications Industry Units: 4
- COMM 486 Human and Technological Systems in Organizations Units: 4
- COMM 487 Communication and Global Organizations Units: 4

Total units: 24

Sports Media Studies Minor

USC has a unique historical relationship to sports and sports media, and is near the center of the current sports media capital of Los Angeles. The courses examine the role of sports and sports media in culture, how the presentation of sports in media has evolved, has been shaped by cultural issues and, itself, impacted culture. This minor will enhance students' skills in working and interacting with, sports media.

Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing). The 3.0 GPA is a minimum standard and does not guarantee admission.

Required Core Communication Courses

- COMM 381 Issues in Contemporary Sport Units: 4
- COMM 383m Sports, Communication and Culture Units: 4

Electives

Choose four classes from the following:

- COMM 300 Entertainment, Communication and Society Units: 4

- COMM 310 Media and Society Units: 4
- COMM 363 Media Consumption Units: 4
- COMM 387 Sports and Social Change Units: 4
- COMM 444 Critical Theories of Sport Units: 4
- JOUR 380 Sports, Business and Media in Today's Society Units: 4
- JOUR 432 Sports Commentary Units: 4
- MOR 479 The Business of Sports Units: 4
- OT 333 Sports Ethics Units: 4

Total units: 24

Master's Degree

Communication (MA)

Individuals seeking the Master of Arts in Communication are expected to acquire and demonstrate a general knowledge of human communication, including humanistic and social scientific approaches.

Students must apply to the PhD program in Communication and complete all application requirements. The faculty admission committee determines candidates appropriate for the MA.

The program, arranged in consultation with the school's director of doctoral studies, provides two options: degree with comprehensive examination requires a total of 32 units (normally eight courses), including core courses COMM 525, COMM 526, COMM 550 and COMM 552 and four electives; or degree with thesis requires successful completion of core courses, three electives and 4 units of COMM 594a Master's Thesis, COMM 594b Master's Thesis.

Not more than two approved 400-level courses may be applied to a student's program and a maximum of 4 semester units with grades of B or better may be accepted by transfer from another institution of higher learning. The minimum acceptable GPA for successful completion of this program is 3.0.

The majority of students choose the comprehensive examination option. The examination consists of six hours of writing, taken on two different days. Permission to take an MA degree with thesis can be obtained only by application to the school screening committee.

Communication Management (MCG)

Each student builds a program of study with faculty academic advisors, drawing on earlier academic and work experience in order to achieve desired professional goals.

Residence

Students may pursue the Master of Communication Management on either a full- or part-time basis. Full time, the degree can be finished in one year and four months (across four terms, including the summer session); parttime, all course work can be finished in two to three years. With permission from a School of Communication committee, a maximum of 4 graduate units may be transferred from another accredited institution.

Foreign Language Requirement

There are no foreign language requirements for this degree.

Course Requirements

Thirty-two units in approved graduate-level course work are required.

Students will take a required 4-unit research methods course in their first semester. In their second semester, students will take a required 4-unit core conceptual foundation course. During their course of study, students take 4 units from a list of approved theory-practice integration courses.

A maximum of two courses may be taken in the first semester. In the second and subsequent semesters, with approval from the director of the Master of Communication Management program, students may take up to three courses.

Among the remaining courses, at least 12 units must be from Communication Management elective areas of focus. Up to 8 may be taken at USC outside the Communication Management program; these courses must be approved by the director of the Master of Communication Management program, and may be selected from a variety of disciplines, depending upon academic and career interests.

Any given course may be taken at most three times, after which the student is no longer eligible to take the course.

Digital Media Management (MS)

The acceleration of worldwide mobile internet access has made digital media indispensable to commerce, culture, and human connection. Digital media platforms and content are driving growth across industries, with sectors such as streaming video, music, games and online publishing experiencing an unprecedented increase in global revenues. Envisioning and deploying the digital media products of the future will involve collaboration between culturally diverse and geographically dispersed teams. The Master of Science in Digital Media Management (MSDMM) program is designed to prepare managers to better understand the evolving media landscape, to make data-driven and ethical decisions, and to build a more equitable future by leading diverse teams with the technical, artistic, analytical and production skills needed to create engaging content and technologies for the global marketplace.

Meeting the demands of diverse markets starts with digital media managers who can effectively advance an inclusive and equitable culture within their own organizations. MSDMM students will learn professional practices needed for the strategic management of their teams, including: recruiting and onboarding an optimal mix of talent, promoting anti-racist and non-discriminatory policies, and cultivating a work environment where each person thrives. Additionally, by analyzing how organizations use digital platforms to aggregate and empower users, students will explore how to support diverse perspectives in storytelling and content-creation, delivering a user experience that balances organizational needs with the ethical imperatives to foster inclusivity, equity and access.

Through an examination of the intersecting relationships between digital media practices, consumer culture and society, students will also acquire a holistic understanding of digital media culture and business practices, and develop a critically-oriented foundation that prepares them for their roles as future leaders. Students will use real-world case studies as a springboard to ideate, create and evaluate the cutting-edge techniques, data collection methodologies and creative guidelines that can be used to implement long-range strategies for ethical media management. The program encourages immediate application of key concepts to industry challenges and opportunities with consideration of emerging technologies. Strategies for effectively communicating complex ideas to a variety of audiences and stakeholders are incorporated throughout the program.

A Master of Science degree in Digital Media Management requires 24 units of coursework offered in the fall, spring and summer semesters. The program may be completed on a full-time or part-time basis. Students attending the program on a full-time basis can earn a degree within 12 months, and those on a part-time basis can complete the program in two years or less.

Required Courses

- DMM 500 Principles and Theories of Digital Media Management Units: 2
- DMM 505 Digital Audience Research and Analysis Units: 2
- DMM 510 Digital Media Buying, Measurement and Analytics Units: 2
- DMM 515 Digital Content, Production and Distribution Units: 2
- DMM 520 Strategic Digital Media Marketing Units: 2
- DMM 525 Digital Media Leadership Units: 2
- DMM 530 Managing Digital Media Teams and Projects Units: 2
- DMM 535 Digital Content Direction Units: 2
- DMM 540 Developing Effective User Engagement Strategies Units: 2
- DMM 545 Digital Platforms: Disruptions and Directions Units: 2

- DMM 550 Digital Media Innovation and Entrepreneurship Units: 2
- DMM 555 Digital Media Management Capstone Units: 2

Digital Social Media (MS)

A STEM-designated degree program, the Master of Science in Digital Social Media (DSM) aims to equip students with the practical skills, critical knowledge and state-of-the-art strategies to succeed in a cutting-edge career in the digital and social media sectors. Beyond learning the fundamentals of digital and social media industries theories and methods, students pursue a customized curriculum toward the design, incubation, and execution of a rigorous, portfolio-building capstone project.

The 32-unit degree program may be completed in three consecutive semesters (fall/spring/summer) or over two academic years (fall/spring/fall/spring).

Students must maintain a 3.0 GPA in the program to graduate.

More information about STEM designation can be found here.

Graduate admissions requirements for the Annenberg School of Communication can be found here.

Course Requirements

Mandatory Courses:

- DSM 510 Introduction to Digital Social Media Units: 4
- DSM 520 Managing Technologies for Digital Media Units: 4
- DSM 550 Analytics and Research Methodology Units: 4
- DSM 596 Final Project Capstone Units: 4

Electives:

Among the remaining courses, at least 8 units must be from a list of approved electives across the Annenberg School for Communication and Journalism. Up to 8 units may be taken at USC outside the Annenberg School; these courses must be approved by the DSM program director and may be selected from a variety of disciplines.

Global Communication (MA)

The USC Annenberg School for Communication and Journalism collaborates with the London School of Economics and Political Science (LSE) to provide the course work necessary for students to become fully engaged with the phenomenon of global communication through this dual master's degree program. Upon satisfaction of all program requirements, students will be awarded a Master of Arts (MA) in Global Communication by USC as well as a Master of Science (MSc) in Global Media and Communications by the LSE.

Residence

This is a two-year program during which students spend their first year at the LSE and their second year at USC.

Foreign Language/Research Tool Requirements

There are no foreign language requirements. Students take a one-term research methods course as part of their course work at the LSE.

Course Requirements

The Master of Arts in Global Communication requires 42 units; the equivalent of 18 units earned at the LSE and 24 units earned at USC.

Year One at LSE: The LSE academic year has three terms. Students will complete classes approved by faculty at the LSE. Students must earn at least 3 units at the LSE, which articulates as 18 units at USC.

Year Two at USC: Students must complete COMM 598 as well as 20 elective units (5 courses) from the School of Communication graduate curriculum, excluding COMM 525, COMM 526, COMM 550 and COMM 552. All students are required to complete an internship/practicum during their year at Annenberg.

Students may choose one of their elective courses from a department outside Annenberg with the approval of their advisers.

Students will produce a final research project on global communication that will be the product of work done both at the LSE and Annenberg. Students complete a research project during the summer after their year at the LSE for which grades are awarded by LSE faculty. A passing grade is required. They will continue to develop this project during the year at Annenberg in COMM 598 and must earn a grade of B minus or higher.

Public Diplomacy (MPD)

The Master of Public Diplomacy is designed for students who already have a substantial undergraduate background in social sciences or relevant professional experience in subjects such as communications, film and media studies, journalism, political science, public relations and international relations. Students in the program may decide to emphasize public diplomacy training most appropriate for a career in public service, the corporate world or in a nongovernmental organization (NGO) working in the ever-expanding global civil society. USC is a member of the Association of Professional Schools of International Affairs (APSIA).

For admission requirements, refer to the Admission Requirements section in the School of Communication.

Requirements for the completion of this degree program are 32 units, including the required substantive paper or alternative project. The course requirements are as follows:

Required Courses (16 Units)

Master of Public Diplomacy is a 32-unit degree program, typically requiring two to three courses per semester.

- PUBD 502 Historical and Comparative Approaches to Public Diplomacy Units: 4
- PUBD 504 Global Issues and Public Diplomacy Units: 4
- PUBD 526 Public Diplomacy Evaluation Units: 4
- PUBD 596 Practicum in Public Diplomacy Research Units: 4

Electives (16 Units)

Students must choose at least 8 elective units of PUBD or other Annenberg School graduate courses. A maximum of 8 units may be taken at USC outside the Annenberg School; these courses must be approved by the program director and may be selected from a variety of disciplines.

Public Diplomacy (Practitioner and Mid-Career Professional) (MPD)

This program is designed for students who already have at least five years of experience working in public diplomacy (engaged in international advocacy, international publicity/public relations, international broadcasting, cultural and/or exchange work or other work which the admissions committee deems to fall within their definition of public diplomacy). The program is taught over a single calendar year beginning with a summer course introducing the advanced study of public diplomacy and ending in the middle of the following summer with the submission of a piece of research work. USC is a member of the Association of Professional Schools of International Affairs (APSIA).

For admission requirements, refer to the Admission Requirements section in the School of Communication.

Requirements for the completion of this degree program are 32 units, including a substantive paper or alternative project. The course requirements are as follows:

Required Courses (16 Units)

Master of Public Diplomacy is a 32-unit degree program, typically requiring three courses per semester in fall and spring to be completed over a single calendar year.

- PUBD 500 Introduction to the Advanced Study of Public Diplomacy Units: 4
- PUBD 502 Historical and Comparative Approaches to Public Diplomacy Units: 4
- PUBD 526 Public Diplomacy Evaluation Units: 4
- PUBD 596 Practicum in Public Diplomacy Research Units: 4

Electives (16 Units)

Students must choose at least 8 elective units of PUBD or other Annenberg School graduate courses. A maximum of 8 units may be taken at USC outside the Annenberg School; these courses

must be approved by the program director and may be selected from a variety of disciplines.

Dual Degree

Master of Communication Management/Juris Doctor (MCG/JD)

Academic training in law and in communication management provides a powerful background for careers in business, entertainment or government life. The USC Gould School of Law and the USC Annenberg School of Communication collaborate in a program that enables these educational opportunities. Students complete both the JD and the Master of Communication Management in three years, the time normally required for the law degree alone.

Students must complete 20 units (five courses) of communication courses at the School of Communication: one required research methods course; one required core conceptual foundation course; one approved theory-practice integration course; and two courses from approved CMGT elective areas of focus.

Students are required to complete 76 units from the law school. To earn the JD, all students (including dual degree students) must complete 37 numerically graded law units at USC after the first year. The associate dean of the USC Gould School of Law may make exceptions to this rule for students enrolled in law school honors programs.

First Year: Required law school courses.

Second and Third Years: 20 units of communication courses, including the 4-unit required research methods course in the first semester of the second year, and the 4-unit required core conceptual foundation course in the second semester of the second year, and an approved 4-unit theory-practice integration course; 46 units of law courses, of which 8 units must be approved as appropriate for acceptance by the School of Communication toward its degree.

Application to pursue the dual degree should be made before completion of 15 units of work in law or 8 units toward the Master of Communication Management degree. Admission by the law school to its JD degree will be evaluated as a substitute for GRE scores.

Master of Communication Management/ Master of Arts, Jewish Nonprofit Management (MCG/MA)

The dual degree program, Communication Management/ Jewish Nonprofit Management, offers students the opportunity for advanced study of sophisticated communication processes and technologies in the context of the nonprofit arena. The program has been developed by the USC Annenberg School for Communication and Journalism and the Zelikow School of Jewish Nonprofit Management at Hebrew Union College-Jewish Institute of Religion (HUC-JIR) to combine the study of communication theory, processes and technologies with postgraduate education in Jewish nonprofit management and leadership. The goal of this program is for graduates to perform more effectively in the nonprofit sector, having received specific training in areas such as organizational communication, media impacts and policy.

Students of this program are admitted separately to each school. Students are required to complete a minimum of 34 credits in Jewish nonprofit management. Four of the 34 required credits of graduate course work at the Zelikow School are used to fulfill the School of Communication's cognate option.

In addition, students are required to take 24 units (six courses) at the School of Communication, including one required research methods course in the first semester; one required core conceptual foundation course in the second semester; one approved theory-practice integration course; and three courses from approved CMGT elective areas of focus.

Those interested in this program should contact Melissa Garai at the Zelikow School at (213) 765-2173 or visit the Website at zsjnm.huc.edu for more information about its requirements.

Graduate Certificate

Health Communication Management Graduate Certificate

This certificate program is for students holding master's degrees who wish to pursue or expand careers in health communication. Students will study the most recent theoretical and practical developments in the area of health communication and how this information can be used to improve public health as well as individual behavior.

Students take 16 units of graduate course work beyond the master's degree, of which 4 units may be cognate courses. One course must be from a preventive medicine, public health, pharmacology or other health science program that focuses on "what is communicated" in health communication.

A partial list of courses includes:

- CMGT 510 Communication, Values, Attitudes and Behavior Units: 4
- CMGT 511 Health Communication Units: 4
- CMGT 520 Social Roles of Communication Media Units: 4
- CMGT 541 Integrated Communication Strategies Units: 4
- CMGT 578 Non-profit Advocacy Units: 4
- CMGT 581 Media in Social Services: Design and Evaluation of Campaigns Units: 4
- CMGT 583 Social Marketing and Entertainment Education Units: 4

International and Intercultural Communication Management Graduate Certificate

This certificate program is for students holding master's degrees who wish to pursue or expand careers in international and intercultural communication management. Students will study the latest developments in information and communication technologies, markets and cultures, and industry practices within cross-nation, cross-cultural contexts.

Students take 16 units of graduate course work beyond the master's degree, of which 4 units may be cognate courses.

A partial list of courses includes:

- CMGT 531 Communication and the International Economy Units: 4
- CMGT 545 Communication and Global Competition Units: 4
- CMGT 556 Global Marketing Communication Units: 4
- CMGT 558 The International Entertainment Marketplace Units: 4
- CMGT 559 Global Hollywood Units: 4
- CMGT 580 Chinese Media and Society Units: 4
- CMGT 582 International Communication: National Development Units: 4
- CMGT 584 Communication and the Multicultural Marketplace Units: 4
- COMM 559 Globalization, Communication and Society Units: 4
- COMM 561 Leading and Communicating Change in Global Organizations Units: 4

Marketing Communication Management Graduate Certificate

This certificate program is for students holding master's degrees who wish to pursue or expand careers in marketing communication. Students will study the latest developments in marketing communication research and theory and the application to marketing communication issues.

Students take 16 units of graduate course work beyond the master's degree, of which 4 units may be cognate courses.

A partial list of courses includes:

- CMGT 510 Communication, Values, Attitudes and Behavior Units: 4
- CMGT 541 Integrated Communication Strategies Units: 4
- CMGT 544 Creating Organizational Identity: Meaning Through Messages Units: 4

- CMGT 554 Copywriting and Creativity Units: 4
- CMGT 555 Online Marketing Communication Development and Analysis Units: 4
- CMGT 556 Global Marketing Communication Units: 4
- CMGT 578 Non-profit Advocacy Units: 4
- CMGT 581 Media in Social Services: Design and Evaluation of Campaigns Units: 4
- CMGT 583 Social Marketing and Entertainment Education Units: 4
- CMGT 584 Communication and the Multicultural Marketplace Units: 4
- CMGT 587 Audience Analysis Units: 4

Media and Entertainment Management Graduate Certificate

This certificate program is for students who have already earned master's degrees and who wish to pursue or expand careers in the entertainment industry. Students will study the latest areas of entertainment-related research, theory and application. They will have a strong grounding in the theory, roles, issues and effects of entertainment as well as the impact of entertainment and new entertainment technologies on society, behavior and the entertainment industry.

Students take 16 units of graduate course work that may not be used or have been used for any other degree or certificate program, of which 4 units may be cognate courses.

A partial list of courses includes:

- CMGT 537 The Industry, Science and Culture of Video Games Units: 4
- CMGT 542 Business Strategies of Communication Firms Units: 4
- CMGT 543 Managing Communication in the Entertainment Industry Units: 4
- CMGT 546 Sports Media and Society Units: 4
- CMGT 547 Distribution of Recordings: Media, Retail and Online Channels Units: 4
- CMGT 549 Case Studies in Digital Entertainment Units: 4
- CMGT 550 Hollywood 3.0 — Entertainment Industry in the Convergence Age Units: 4
- CMGT 551 Communicating Entertainment Media Identities Units: 4
- CMGT 558 The International Entertainment Marketplace Units: 4
- CMGT 559 Global Hollywood Units: 4
- CMGT 574 Tele-Media: Strategic and Critical Analysis Units: 4
- CMGT 581 Media in Social Services: Design and Evaluation of Campaigns Units: 4
- CMGT 583 Social Marketing and Entertainment Education Units: 4
- CMGT 586 Entertainment Media: Content, Theory, and Industry Practices Units: 4
- COMM 570 Economics of the Communication Industries Units: 4
- COMM 579 Entrepreneurship in the New Media Units: 4

New Communication Technologies Graduate Certificate

This certificate program is for students holding master's degrees who wish to pursue or expand careers in communication technologies. Students will study the latest developments in new communication and media technologies and their application in a variety of organizational and social contexts.

Students take 16 units of graduate course work beyond the master's degree, of which 4 units may be cognate courses.

A partial list of courses includes:

- CMGT 515 Innovation and the Information Economy Units: 4
- CMGT 530 Social Dynamics of Communication Technologies Units: 4
- CMGT 533 Emerging Communication Technologies Units: 4
- CMGT 547 Distribution of Recordings: Media, Retail and Online Channels Units: 4
- CMGT 571 Communications Technologies Units: 4
- COMM 570 Economics of the Communication Industries Units: 4
- COMM 579 Entrepreneurship in the New Media Units: 4

Strategic Corporate and Organizational Communication Management Graduate Certificate

This certificate program is for students holding master's degrees who wish to pursue or expand careers in corporate communication and communication consulting. Students will study the latest developments in organizational communication research and theory and the application to business communication issues.

Students take 16 units of graduate course work beyond the master's degree, of which 4 units may be cognate courses.

A partial list of courses includes:

- CMGT 500 Managing Communication Units: 4
- CMGT 502 Strategic Corporate Communication Units: 4
- CMGT 503 Strategic Communication Consulting Units: 4
- CMGT 504 Writing for Strategic Communication Units: 4
- CMGT 505 Communication in Work Settings Units: 4
- CMGT 508 Communicating Strategy and Change Units: 4
- CMGT 510 Communication, Values, Attitudes and Behavior Units: 4
- CMGT 536 Team Communication and Leadership Units: 4
- CMGT 573 Evaluating Communication Needs Units: 4
- CMGT 576 Communication Strategies for Conflict Management Units: 4
- CMGT 577 Communicating Corporate Social Responsibility Units: 4
- COMM 561 Leading and Communicating Change in Global Organizations Units: 4

Doctoral Degree

Communication (PhD)

Students in the doctoral program learn theories that guide research into communication processes and effects and into institutions and technologies that lend pattern to communication. Applicants for the PhD are expected to acquire and demonstrate humanistic and behavioral knowledge of communication while acquiring skills requisite to scholarly research in the discipline.

Screening Procedures

Student progress is carefully monitored by the School of Communication faculty. Students are normally screened at the end of their first year of graduate study. At that time they must have completed no fewer than 16 and no more than 24 units, including COMM 525, COMM 526, COMM 550 and COMM 552. Students are evaluated on subject matter competence, teaching potential and their ability to conduct independent research. Upon successful passage of the screening procedure, the student has 30 days in which to form a qualifying exam committee.

Course Requirements

The student is required to take a minimum of 76 units and write an approved dissertation.

Four core courses

- COMM 525x Humanistic and Social Scientific Approaches to Human Communication I Units: 4
- COMM 526x Humanistic and Social Scientific Approaches to Human Communication II Units: 4
- COMM 550 Quantitative Research Methods in Communication Units: 4
- COMM 552 Qualitative Research Methods in Communication Units: 4

And Doctoral Dissertation

- COMM 794a Doctoral Dissertation Units: 2 are required for all students

- COMM 794b Doctoral Dissertation Units: 2 are required for all students

Students specialize in one of seven tracks by completing a minimum of three courses (12 units) in one of the following:

(1) Rhetoric, Politics and Publics:

- COMM 509x Classical Rhetorical Theory Units: 4
- COMM 511x Contemporary Rhetorical Theory Units: 4
- COMM 512x Rhetorical Criticism Units: 4
- COMM 513x Neoclassical Rhetorical Theory Units: 4
- COMM 514x Social Movements as Rhetorical Form Units: 4
- COMM 515x Postmodern Rhetorical Theory Units: 4
- COMM 517x Rhetorical Theory and Culture Units: 4
- COMM 518x American Public Address Units: 4
- COMM 520 The Rhetoric of the Presidential Campaign Trail Units: 4
- COMM 521x Argumentation Units: 4
- COMM 522x Kenneth Burke's Dramatistic Theory Units: 4
- COMM 573 Networked Publics: Theories and Encounters Units: 4
- COMM 576 Civic Media and Participatory Politics Units: 4
- COMM 580 Media and Politics Units: 4

(2) Media, Culture and Community:

- CMGT 587 Audience Analysis Units: 4
- COMM 516x Feminist Theory and Communication Units: 4
- COMM 517x Rhetorical Theory and Culture Units: 4
- COMM 519x Cultural Studies in Communication Units: 4
- COMM 564 Communication, Culture and Capitalism Units: 4
- COMM 573 Networked Publics: Theories and Encounters Units: 4
- COMM 575 Advocacy and Social Change in Entertainment and the Media Units: 4
- COMM 580 Media and Politics Units: 4
- COMM 605 Advanced Macro Theories of Communication Units: 4
- COMM 618 Mass Media Effects Units: 4
- COMM 629 Global Culture Units: 4
- COMM 653 Research, Practice and Social Change Units: 4
- COMM 654 Art, Artists and Society Units: 4
- COMM 655 Studies in Sound, Music and Communication Units: 4
- COMM 656 Theorizing Race, Culture, Cross-Cultural Exchange Units: 4
- COMM 662 Video Games Research Units: 4
- COMM 672 Experiments in Critical Writing Units: 4

(3) Health Communication and Social Dynamics:

- CMGT 581 Media in Social Services: Design and Evaluation of Campaigns Units: 4
- CMGT 583 Social Marketing and Entertainment Education Units: 4
- CMGT 587 Audience Analysis Units: 4
- CMGT 588 Global Storytelling: The Power of Narrative Units: 4
- COMM 554 Regression and Multivariate Communication Research Units: 4
- COMM 602 Seminar in Persuasion Units: 4
- COMM 611 Communication Technology and Healthcare Units: 4
- COMM 612 Designing Health Communication Interventions Units: 4
- COMM 613 Grant Writing in Communication Units: 4
- COMM 614 Computational Approaches in Health Communication Units: 4
- COMM 615 Health Communication Units: 4
- COMM 616 Health Communication for Prevention Units: 4
- COMM 650 Survey Construction and Validation Units: 4
- COMM 651 Experimental and Quasi-Experimental Designs Units: 4

(4) Groups, Organizations and Networks:

- COMM 508x Power, Politics and Conflict in Communication Units: 4
- COMM 524x Small Group Process Units: 4
- COMM 585x Organizational Communication Units: 4
- COMM 635 Economics of Information Units: 4
- COMM 636 Interpretive and Cultural Approaches in Organizational Communication Units: 4
- COMM 637 Current Readings in Organizational Communication Units: 4
- COMM 638 Global, International and Intercultural Communication in Organizations Units: 4
- COMM 640 Communication and Organizational Change Units: 4
- COMM 641 Organizations and Communication Technologies Units: 4
- COMM 645 Communication Networks Units: 4
- COMM 648 Online Communities and Networks Units: 4
- COMM 652 Ethnographic Field Research in Communication Units: 4

(5) Political Economy of Global Communication:

- COMM 546 The Political Economy of Innovation Units: 4
- COMM 553 Global Internet Governance Units: 4
- COMM 559 Globalization, Communication and Society Units: 4
- COMM 560 Global Media and Communication in China and Asia Units: 4
- COMM 561 Leading and Communicating Change in Global Organizations Units: 4
- COMM 567 The Political Economy of Privacy and Cybersecurity Units: 4
- COMM 570 Economics of the Communication Industries Units: 4
- COMM 582 Information and Communication Technology for Development Units: 4
- COMM 629 Global Culture Units: 4
- COMM 630 Communication Technology and Social Change Units: 4
- COMM 635 Economics of Information Units: 4
- COMM 645 Communication Networks Units: 4
- COMM 647x Network Society Units: 4
- PUBD 504 Global Issues and Public Diplomacy Units: 4
- PUBD 510 Technologies and Public Diplomacy Units: 4
- PUBD 515 Transnational Diplomacy and Global Security Units: 4
- PUBD 516 International Broadcasting Units: 4
- PUBD 522 Hard Power, Soft Power and Smart Power Units: 4

(6) Information, Political Economy and Entertainment:

- CMGT 582 International Communication: National Development Units: 4
- COMM 516x Feminist Theory and Communication Units: 4
- COMM 559 Globalization, Communication and Society Units: 4
- COMM 560 Global Media and Communication in China and Asia Units: 4
- COMM 563 Black Popular Culture: Theory and Central Debates Units: 4
- COMM 564 Communication, Culture and Capitalism Units: 4
- COMM 566 Using Theory to Craft Policies to Affect Change Units: 4
- COMM 570 Economics of the Communication Industries Units: 4
- COMM 630 Communication Technology and Social Change Units: 4
- COMM 647x Network Society Units: 4
- COMM 654 Art, Artists and Society Units: 4
- COMM 660 Entertainment and Games Units: 4
- COMM 662 Video Games Research Units: 4
- COMM 670 Economic Cultures Units: 4

(7) New Media and Technology:

- CMGT 530 Social Dynamics of Communication Technologies Units: 4
- CMGT 531 Communication and the International Economy Units: 4
- CMGT 537 The Industry, Science and Culture of Video Games Units: 4
- COMM 524x Small Group Process Units: 4
- COMM 570 Economics of the Communication Industries Units: 4
- COMM 572 Theories of Computer-Mediated Communication Units: 4
- COMM 573 Networked Publics: Theories and Encounters Units: 4
- COMM 576 Civic Media and Participatory Politics Units: 4
- COMM 577 Fandom, Participatory Culture and Web 2.0 Units: 4
- COMM 578 New Media Literacies Units: 4
- COMM 611 Communication Technology and Healthcare Units: 4
- COMM 641 Organizations and Communication Technologies Units: 4
- COMM 647x Network Society Units: 4

Additional Requirements

In addition, students must take at least two courses in one other track outside their specialization (8 units total). Students also pursue an approved cognate elective program of study in which at least two courses (normally 8 units) are taken in a related field outside USC Annenberg School. Students entering the School of Communication with a master's degree may, with permission, apply part of their previous graduate course work to the cognate requirement. Students in the organizational communication track are required to take at least two methods classes in addition to the core courses, COMM 550 and COMM 552. If taken in a department or unit other than the School of Communication, these courses cannot also be counted toward the student's cognate requirement.

Research Tool Requirement

Doctoral students are expected to demonstrate methodological competence in an area of specialization prior to taking the qualifying examination. Such competence is usually demonstrated through course work (the successful completion, with grade B or better, of selected course work in addition to their content courses that is approved by the PhD qualifying exam committee taken in the school and/or related departments), and by completion of a preliminary research project. Under special circumstances, students with an exceptional prior background in research methods may demonstrate their competence by successfully passing a research tool examination designed and administered by the PhD qualifying exam committee.

Qualifying Exam Committee

This committee is composed of five USC faculty members, at least three of whom are from the School of Communication. Students are expected to work closely with the members of their qualifying exam committee, especially their committee chair, in selecting advanced course work and shaping areas of interest and research. In addition to helping the student plan a program, the committee administers the oral portion of the qualifying examination and approves the dissertation committee.

Qualifying Examination

Qualifying examinations for the PhD usually are taken in the third year of study following completion of all required courses and a preliminary research paper. The examination includes both written and oral portions. The written portion is composed by committees of faculty in the relevant areas of study; the oral portion is administered by the student's qualifying exam committee. Students must pass both portions to be advanced to candidacy. Students must confer with their qualifying exam committee chair, not later than the second week of the semester during which the examinations are to be taken, regarding distribution of written examination hours among subject matter areas.

Doctoral Dissertation

The dissertation is an original research project contributing to knowledge about human communication and should demonstrate a high level of competence in methodologies of scholarly inquiry.

Defense of Dissertation

Dissertations are defended in a formal meeting with the three-member dissertation committee. The school prefers that the defense oral be taken prior to final typing so that recommended changes can be made in the final manuscript.

Administration

Director: Gordon Stables, PhD

Faculty

Wallis Annenberg Chair in Communication and Journalism: Afua Hirsch, MA (Oxon), BL
Walter H. Annenberg Chair in Communication: Willow Bay, MBA
University Professor and Annenberg Family Chair in Communication Leadership: Geoffrey Cowan, LLB
Jayne and Hans Hufschmid Chair in Strategic Public Relations and Business Communication: Robert Kozinets, PhD
Knight Chair in Media and Religion: Diane Winston, PhD
Norman Lear Chair in Entertainment, Media and Society: Martin H. Kaplan, PhD
Provost Professor of Communication, Journalism and Cinematic Arts: Henry Jenkins, PhD
Professors: Willow Bay, MBA; Geoffrey Cowan, LLB*; Henry Jenkins, PhD; Robert Kozinets, PhD; Josh Kun, PhD *(Communication)*; Joe Saltzman, MS*; Roberto Suro, MS; Sandy Tolan, BFA
Associate Professors: Mike Ananny, PhD *(Communication)*; Ben Carrington, PhD; William Celis, MS*; Jonathan Kotler, JD*; Jian Wang, PhD; Diane Winston, PhD; Aimei Yang, PhD
Assistant Professors: Eunjin Kim, PhD; Su Jung Kim, PhD; Allissa Richardson, PhD
Visiting Professor: Mark Schoofs
Professors of Professional Practice: Christina Bellantoni, BA; Clarissa Beyah, MBA; Daniel Birman, MA; Laura Castañeda, EdD; Fred Cook, BA; Jennifer Floto, MA*; Vince Gonzales, MA; Robert Hernandez, BA; Gabriel Kahn, BA; Matthew Le Veque, BA; Lisa Pecot-Hébert, PhD; Stacy Scholder, BA; Willa Seidenberg, BA; Burghardt Tenderich, PhD
Associate Professors of Professional Practice: Alan Abrahamson, JD; Amara Aguilar, MA; Peggy Bustamante, MA; Laura Davis, BA; Jeff Fellenzer, MA; Rebecca Haggerty, EdD; Alan Mittelstaedt, BA; Mary Murphy, BA; Miki Turner, BA
Assistant Professor of Professional Practice: Keith Plocek, MPhil
Research Professor of Communication and Journalism: Martin H. Kaplan, PhD

Lecturer: Dana Chinn, MBA
Emeritus Professors: K.C. Cole, BA; Felix Gutierrez, PhD; Judy Muller, BA; Bryce Nelson, MPhil; Michael Parks, BA; Philip Seib, JD
Emeritus Professors of Professional Practice: Sasha Anawalt, BA; Gerald Swerling, MS
Emeritus Associate Professor: Larry Pryor, MS
**Recipient of university-wide or college teaching award.*

Degree Programs

The School of Journalism offers Bachelor of Arts degrees in Journalism and Public Relations. It also offers minors in Advertising, News Media and Society, Podcasting, Public Relations and Sports Media Industries and an interdisciplinary minor in Nonprofits, Philanthropy and Volunteerism. The School of Journalism offers a News and Information Innovation minor in collaboration with the Iovine and Young Academy in which students develop novel solutions to problems facing modern newsrooms. The school stresses a broad-based liberal arts education to enhance writing and reporting and encourages undergraduate students to pursue double majors or minors in disciplines outside the school.

At the graduate level, a Master of Science degree is offered in Journalism and Master of Arts degrees are offered in Specialized Journalism, Specialized Journalism (The Arts) and Public Relations and Advertising. The MS in Journalism degree teaches students to write, report, produce, code, publish and promote cross-platform stories in a converged news environment. Cutting-edge digital courses cater to students interested in careers in social media, data journalism, data visualization, emerging technology and coding. The Specialized Journalism degree is designed for experienced professionals and recent journalism graduates interested in developing specialized reporting expertise. The Specialized Journalism (The Arts) degree is designed for experienced professionals, art practitioners and recent journalism graduates interested in arts, food and culture criticism and reporting. The Public Relations and Advertising degree emphasizes the requisite skills of that discipline, with an emphasis on strategic problem solving, critical thinking, research-based planning and analysis, writing, digital multiplatform content development, and the application of the discipline to specific industry categories.

Student Services

Students must meet with an adviser each semester to receive academic advisement covering university degree requirements and major course selection. The school also offers several international study programs to students. The USC Annenberg Career Development Office has listings for paid and unpaid internships from around the country. Career advisers conduct mandatory advisement appointments for all sophomores and offer career workshops, guest speakers and mentoring opportunities. Students are advised to participate in at least two internships before graduation.

Honor Society

Lambda Pi Eta is a national communication/journalism honor society that is open to students in graduate and undergraduate Annenberg programs. To be eligible, students must have a USC cumulative GPA and an Annenberg major GPA of 3.5 or higher. In addition, undergraduate students must have a declared communication, journalism or public relations major, and have completed (or currently be registered for) at least 60 units, at least 12 of which are in the major. Graduate students must have completed at least 12 units in the fields of communication, journalism or public relations.

Undergraduate Degrees

The School of Journalism offers Bachelor of Arts degrees in Journalism and Public Relations. The school also offers minors in Advertising, News Media and Society, Podcasting, Public Relations and Sports Media Industries and an interdisciplinary minor in Nonprofits, Philanthropy and Volunteerism. Journalism students are encouraged to pursue double majors or minors in other areas of study.

To meet accrediting guidelines, a minimum of 72 units must be completed outside the major area of journalism. A maximum of 16 units of course work taken prior to high school graduation and a combined 32 units of AP, IB and pre-high school graduation course work will count toward this requirement. Journalism and public relations majors can take up to a maximum of 48 journalism units; however, the major unit total (44 units) cannot be exceeded, unless the student has fulfilled the accreditation requirement.

A grade point average of at least C (2.0) on all baccalaureate units attempted at USC, as well as on the combined USC-transfer GPA, is required for undergraduate degrees. A minimum cumulative grade point average of 2.0 in all upper-division courses applied toward the major is also required. Students must complete each journalism and public relations class with at least a grade of C- in order to count the course toward a major requirement. Journalism and public relations courses with a grade of D+ or below must be repeated; courses may only be retaken once. If students do not pass a required major course the second time, then the School of Journalism will drop them from the journalism or public relations major and have their major changed to undeclared. It will be the students' responsibility to declare another major. If students do not pass a major elective course the second time, they can choose to take a different journalism or public relations course for their major elective requirement.

Students interested in taking JOUR 489 Hands-on Disruption: Experimenting with Emerging Technology must contact the instructor for permission to enroll. The instructor will need to assess the technical skill sets of the students to ensure that everyone who enrolls meets the class requirements.

Undergraduate students who are interested in enrolling in JOUR 585 Specialized Reporting: Religion must be a senior, have at least a 3.7 cumulative GPA, and must contact the instructor for permission to enroll.

Non-majors who are interested in enrolling in PR 209 Effective Writing for Strategic Public Relations and/or PR 250 Strategic Public Relations: An Introduction must have at least a 2.5 GPA.

Admission Requirements

Admission is competitive. Fall 2020 first-year students had an average GPA of 3.82 unweighted with an SAT score of 1370-1500 (middle 50%). Transfer students had an average college GPA of 3.88. For admission information and deadlines, refer to the USC Admission website. All transfer applicants must review the transfer admission application guidelines on the Annenberg Admissions website; contact the Annenberg Admissions Office for more information. USC exclusively uses the Common Application for freshman and transfer admission. Applicants must submit the Common Application and the USC Writing Supplement, both of which can be accessed at commonapp.org. For transfer applicants, in addition to the university writing samples, a 250-word statement of intent is required; instructions are included with the USC Writing Supplement.

Students currently enrolled at USC who wish to apply to the School of Journalism must complete the online application with all supporting documents. Students must have 16 units completed at USC with a minimum USC cumulative GPA of 3.0 in order to be eligible to apply to the journalism or public relations major. The 3.0 GPA is a minimum standard and does not guarantee admission. In order to be eligible to apply for the Advertising or New Media and Society minors, students must have a minimum USC cumulative GPA of 2.0 and a declared major. To apply to the Public Relations or Sports Media Industries minors, students must have a minimum USC cumulative GPA of 2.5 and a declared major. For further information on the application process, current USC students are encouraged to attend an information session conducted by Annenberg Advisement and Academic Services.

General Education Requirements

The university's general education program provides coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. For more information about USC's general education requirements, see the General Education Program.

Annenberg International Programs

Fall and Spring Semester in London, England (Journalism and Public Relations)

Undergraduate journalism and public relations students may spend the fall or spring semester of their junior year at a dedicated study center, where they enroll in 16 units of upper-division Annenberg course work, eight of which are for major credit. In addition to their studies, students tour publishing and broadcasting companies, meet communication executives and government policy-makers and gain exposure to British media, culture and civilization. The program also includes group excursions to such places as Bath, Oxford, Liverpool and Hampton Court. A minimum USC cumulative GPA of 3.0 is required for this program.

Spring Semester in Auckland, New Zealand (Journalism and Public Relations)

This undergraduate semester program offers students the opportunity to study at the Auckland University of Technology in New Zealand, a leading southern hemisphere school of journalism and media studies. Fully integrated into the university and its vibrant urban surroundings with strong connections to the nation's indigenous heritage, the program allows students to earn 8 units that fulfill journalism/public relations electives and 8 units of general electives. A minimum USC cumulative GPA of 3.0 is required for this program.

Fall and Spring Semester in Hong Kong, SAR China (Journalism and Public Relations)

The Annenberg Hong Kong program offers students the exciting opportunity to live and study in the cosmopolitan city of Hong Kong. Students study alongside local and international students in a variety of disciplines at the highly regarded, global research institution the Chinese University of Hong Kong (CUHK). The program allows students to directly enroll in the university and earn 6-9 units that fulfill journalism/public relations electives and 6-9 units of general electives. A minimum USC cumulative GPA of 3.0 is required for this program.

Spring Semester in Sydney, Australia (Journalism and Public Relations)

This undergraduate semester program offers students the opportunity to study at the University of New South Wales (UNSW) in Australia, one of the top universities in Oceania and highly ranked globally. Conveniently located in the center of Sydney with strong connections to a vibrant media scene, the program allows students to fully integrate into the university and earn 8 units that fulfill journalism/public relations electives and 8 units of general electives. A minimum USC cumulative GPA of 3.0 is required for this program.

Spring Semester in Rome, Italy (Journalism and Public Relations)

Undergraduate journalism and public relations students may spend a spring semester at a dedicated study center, where they enroll in 16 units of upper-division Annenberg course work, eight of which are for major credit. In addition to their studies, students tour publishing and broadcasting companies, meet communication executives and government policy-makers and gain exposure to Italian media, culture and civilization. The program also includes guided visits to museums and historical districts, as well as an overnight group excursion to Tuscany. A minimum USC cumulative GPA of 3.0 is required for this program.

Spring Break Career Immersions in Thailand and Mexico City

Undergraduate and graduate students may spend spring break immersed in two dynamic regions of the world, Southeast Asia or Central America. Students develop first-hand insights into social impact, development, and non-profits in Thailand. In Mexico City, students engage with the most influential media hub in Latin America by visiting industry leaders and various media companies. These programs offer students the unique opportunity to evaluate the Annenberg disciplines of practice in different emerging areas of the world. A minimum USC cumulative GPA of 3.0 is required for these programs. Please visit the Annenberg International Programs website for more information on additional program requirements.

Summer International Communication Studies — London, Paris, Madrid, Berlin and Prague

The International Communication Studies Program (ICS) allows undergraduate students to study a range of approaches to public communication media across Europe during the summer semester. Students divide the five-week course into stays in Los Angeles, London, Paris, Madrid, Berlin and Prague. In addition to regular class meetings, students discuss the interplay of current world issues and international media practices with communication practitioners from international news and public relations media, government institutions, private industry and global organizations. Students enroll in JOUR 482 Comparative Media in Europe (4 units). A minimum USC cumulative GPA of 3.0 is required for this program.

For further information, contact Annenberg International Programs at (213) 821-1276, email ascintl@usc.edu or visit annenberg.usc.edu/international.

Departmental Honors

Undergraduate students who are nominated by journalism faculty to participate in JOUR 498 – Honors Seminar (2 units) or PR 498 – Public Relations Honor Seminar (2 units) their senior year are eligible for departmental honors. Nominations are based on academic achievement, performance in the classroom, leadership and involvement in the school. Students who successfully complete JOUR 498 or PR 498 with a B+ or higher and achieve no less than a USC cumulative GPA of 3.0 and a journalism or public relations major GPA of 3.5 at the time of graduation will receive departmental honors.

Academic Integrity Policy

Since its founding, the School of Journalism has maintained a commitment to the highest standards of ethical conduct and academic excellence. Any student found plagiarizing, fabricating, cheating on examinations, and/or purchasing papers or other assignments faces sanctions ranging from an "F" on the assignment to dismissal from the School of Journalism.

Progressive Degree Program

The School of Journalism offers progressive degree options for the Master of Science in Journalism, Master of Arts in Specialized Journalism and Master of Arts in Public Relations and Advertising. The progressive degree program allows USC students to complete a bachelor's degree and master's degree in as little as five years.

Students with a USC cumulative GPA of 3.0 or higher in all classes taken at the university level are eligible to apply for admission to the degree program during their junior year. The 3.0 GPA is a minimum standard and does not guarantee acceptance. Current students must attend a mandatory information session conducted by Annenberg Admissions and a faculty member before initiating the application process. Students admitted into the progressive degree program begin taking master's level courses in their senior year and then enroll exclusively in graduate courses until the master's degree is completed.

For further information on the application process, current

USC students must attend a mandatory information session. Contact Annenberg Admissions for session dates. Application materials must be downloaded from undergrad.usc.edu/programs/progressive/.

Graduate Degrees

The School of Journalism offers one Master of Science degree program in Journalism, three Master of Arts degree programs in Specialized Journalism, Specialized Journalism (The Arts) and Public Relations and Advertising, and two certificates in Journalism and Public Policy Advocacy.

The 11-month, 36-unit MS in Journalism is an intense, deadline-driven program in which students learn to write, report, produce, code, publish and promote cross-platform stories in a converged news environment. Students also choose a specialty area that prepares them for careers across a broad spectrum, including but not limited to broadcast television and radio news, long-form audio and video documentaries, investigative, sports and entertainment reporting and writing and/or multimedia news production. The MS program accepts applicants with little to no journalism experience as well as seasoned journalists who wish to learn cross platform/multimedia reporting and producing skills.

The 11-month, 34-unit MA in Specialized Journalism is a program geared toward experienced journalists seeking subject-matter expertise and toward experienced professionals in other fields seeking journalism skills to advance their expertise. The program is also open to recent journalism school graduates with records of excellence and a demonstrated aptitude and commitment to developing an expertise in a specialized field of reporting.

The 11-month, 34-unit MA in Specialized Journalism (The Arts) is geared toward experienced arts and food journalists, as well as recent graduates with a demonstrated commitment to specializing in arts and/or food journalism. The program is also open to people who have no background in journalism, but who are deeply experienced in at least one art form as a practice or profession, or in the world of food as a practice or profession; the acquisition of journalism skills toward a future specializing in the coverage of arts and culture, or food and culture, is the objective.

The 16- to 21-month professionally oriented MA in Public Relations and Advertising degree is designed to train both recent graduates interested in public relations, advertising and related fields, and young professionals considering transitions into that field or seeking to advance their careers, for eventual management-level positions in all types of organizations. In their first two semesters, students take a core group of courses focusing on strategic problem-solving, research-based actionable insight, business acumen, persuasive writing, multiplatform content production and leadership skills. In their third and fourth semester students choose from a wide variety of electives and have the opportunity to specialize in one of six specific tracks.

Admission to the Journalism certificate is by permission only. Only current graduate students may apply to the Public Policy Advocacy certificate.

Admission Requirements

Prerequisites

An applicant must have the equivalent of a four-year bachelor's degree from an accredited college or university for the MS or MA degree. Applicants with a three-year bachelor's will be considered for admission to the graduate journalism certificate.

Criteria

Refer to the Annenberg graduate application guidelines on the School website for complete details about graduate application requirements. Scores on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required for applicants whose undergraduate degree was not completed in a country where English is the only official language.

Procedure

Applicants must complete and submit the online USC Graduate Admission Application. Before initiating the application, refer to the Annenberg graduate application guidelines on the Annenberg Admissions Website for deadlines and details about specific materials that must be uploaded to the application and documents that must be submitted directly to USC Graduate Admission.

New students are admitted to the MS in Journalism, the MA in Specialized Journalism, the MA in Specialized Journalism (The Arts) and the Journalism Certificate for the summer session only.

New students are admitted to the MA in Public Relations and Advertising degree program for the fall semester only.

Annenberg International Programs

Graduate Internship Program (Journalism and Public Relations) – Berlin, Cape Town, Hong Kong and Sao Paulo

The Annenberg International Programs Graduate Internship Program allows graduate students the opportunity to explore the communication and journalism fields from a distinctively global perspective. Students have the opportunity to intern in one of the following four global cities: Berlin, Germany; Cape Town, South Africa; Hong Kong SAR, China; or Sao Paulo, Brazil. The program takes place over the course of eight weeks during the summer semester. Students enroll in JOUR 545 and earn 1 unit of academic credit. Program dates and fees vary based on program city. For further information, contact Annenberg International Programs at (213) 821-1276, email ascintl@usc.edu or visit annenberg.usc.edu/international.

Spring Break Career Immersions in Thailand and Mexico City

Undergraduate and graduate students may spend spring break immersed in two dynamic regions of the world, Southeast Asia or Central America. Students develop first-hand insights into social impact, development, and non-profits in Thailand. In Mexico City, students engage with the most influential media hub in Latin America by visiting industry leaders and various media companies. These programs offer students the unique opportunity to evaluate the Annenberg disciplines of practice in different emerging areas of the world. A minimum USC cumulative GPA of 3.0 is required for these programs. Please visit the Annenberg International Programs Website for more information on additional program requirements.

Degree Requirements

All course work applied toward a degree must be approved by the School of Journalism and the Graduate School.

Academic Integrity Policy

Since its founding, the School of Journalism has maintained a commitment to the highest standards of ethical conduct and academic excellence. Any student found plagiarizing, fabricating, cheating on examinations and/or purchasing papers or other assignments faces sanctions ranging from an "F" on the assignment to dismissal from the School of Journalism.

Bachelor's Degree

Journalism (BA)*

Building upon Annenberg's record of innovation in journalism education, the BA in Journalism offers a forward-thinking curriculum that encourages students to embrace technology, assess it critically, and employ it in the service of powerful and effective journalism. Team-taught courses leverage faculty expertise in video, audio, text and digital journalism to help students establish their reporting and writing expertise across multiple platforms. Through a newly integrated Media Center experience, students will acquire the editing, production and digital storytelling skills to produce journalism across a range of media. At the conclusion of the degree program, students will complete an advanced reporting project that showcases their abilities.

Students are required to complete 44 units for the major, including 30 units required core courses.

Required Courses, Lower Division

- JOUR 201 Culture of Journalism: Past, Present and Future Units: 4
- JOUR 206 Reporting and Writing Practicum Units: 1 (2 units required)
- JOUR 207 Reporting and Writing I Units: 3

Required Courses, Upper Division

- JOUR 307 Reporting and Writing II Units: 3
- JOUR 320 Introduction to Coding for Storytelling Units: 2
- JOUR 321 Visual Journalism Units: 2
- JOUR 322 Introduction to Investigative and Data Journalism Units: 2
- JOUR 372 Engaging Diverse Communities Units: 2
- JOUR 414 Advanced Digital Media Storytelling Units: 2
- JOUR 462 Law of Mass Communication Units: 4

Annenberg Experience

Choose one of the following required core courses (4 units total):

- ASCJ 200 Navigating Media and News in the Digital Age Units: 4
- JOUR 300 Journalism and Society Units: 4

Advanced Reporting Elective

Choose one course:

- JOUR 402 Advanced Video Reporting Units: 6
- JOUR 403 Television News and Sports Production Units: 6
- JOUR 405 Non-Fiction Television Units: 4
- JOUR 409 Radio Storytelling and Podcasts Units: 4
- JOUR 448 Government and Public Affairs Reporting Units: 4

Upper-Division Electives

Complete 8-10 upper division journalism or public relations elective units chosen in consultation with your adviser. Note: Students who choose a 4-unit Advanced Reporting course will need 10 units of upper division electives; students who choose a 6-unit Advanced Reporting course will need 8 units of upper division electives.

Public Relations (BA)*

Public Relations — sometimes called Strategic Communication — is a dynamic, fast-growing discipline found in organizations of all types, including non-profits, entertainment firms, sports teams, social action groups, universities and Fortune 500 companies. Its purpose is to help those organizations achieve their goals by maintaining healthy relationships with their most important audiences. Practitioners use a wide variety of creative strategies and tactics, including both digital/social media and traditional mass media, as their most important tools. Every day thousands of PR professionals rely on the training they received at USC Annenberg to analyze trends, develop and implement sophisticated programs, and counsel senior management. Internships with leading PR agencies, non-profit organizations, entertainment companies and government agencies provide real-world experience that prepares students for successful careers.

Total units: 44

Required Courses, Lower Division

- PR 209 Effective Writing for Strategic Public Relations Units: 4
- PR 250 Strategic Public Relations: An Introduction Units: 4

Required Courses, Upper Division

- PR 351a Strategic Public Relations Media and Content Units: 4
- PR 351b Strategic Public Relations Media and Content Units: 4
- PR 429 Business and Economic Foundations of Public Relations Units: 4
- PR 450 Advanced Strategic Public Relations Units: 4
- PR 463 Strategic Public Relations Research, Analysis and Insights Units: 4

  Plus 16 upper-division PR and/or JOUR elective units chosen in consultation with an adviser

Minor

Advertising Minor

The advertising minor is designed for students interested in building a career in, or developing a better understanding of, the field of advertising. It explores the key role played by advertising in today's global economy. At no time has advertising been more successful or more controversial than it is today, and this program will explore both the positives and the negatives. Emphasis is placed throughout the program on both the practical skills required to meet the demands of the marketplace and the theoretical underpinnings of those practices. Program content includes: the history of advertising; creation of written and visual advertising elements; the measurement, selection and analysis of media; the concept of "branding;" the role of advertising in creating and maintaining successful brands; the analysis of advertising campaign case studies; and the creation of integrated marketing communications campaigns.

Required Courses

- MKT 406 Practicum in Advertising and Promotion Design Units: 4.0
- PR 340 Introduction to Advertising Units: 4
- PR 341 Advertising Copywriting Units: 4
- PR 342 Advertising Media and Analysis Units: 4
- PR 343 Advertising Design and Production Units: 4

Select one additional course from the following:

- MKT 402 Introduction to Marketing Analytics Units: 4
- MKT 405 Advertising and Promotion Management Units: 4
- MKT 425 Marketing in a Digital World Units: 4

Total units: 24

News Media and Society Minor

News media and society is a journalism minor that explores the responsibilities, the influence, the ethics and the diversity of the news media. It explores the myths about news media in the United States and explains what the news media are, how they work, what they do wrong and what they do right, and why they are important to a society whose citizens depend on the free and unfettered flow of information. This minor will help all students in all majors to understand one of the most important and misunderstood forces in American society: the news media.

News media and society benefits every student at the university because it gives students a new appreciation and understanding of the news media that so much influence their lives on a daily basis.

Required Core Courses

- JOUR 200w The Power and Responsibility of the Press Units: 4
- JOUR 201 Culture of Journalism: Past, Present and Future Units: 4

Electives

Choose 12 units from the following:

- COMM 371 Media Censorship and the Law Units: 4
- JOUR 373 Journalism Ethics Goes to the Movies Units: 4
- JOUR 375 The Image of the Journalist in Popular Culture Units: 4
- JOUR 460 Social Responsibility of the News Media Units: 4
- JOUR 466m People of Color and the News Media Units: 4
- JOUR 467 Gender and the News Media Units: 4
- JOUR 484 American Religion, Foreign Policy and the News Media Units: 4

Total units: 20

Nonprofits, Philanthropy and Volunteerism Interdisciplinary Minor

This four-course minor enables students to learn about the nonprofit sector — its organizations, philanthropy and voluntary action. See complete description in the USC Price School of Public Policy section.

Podcasting Minor

The minor is designed to give students a grounding in the history, theory, production and business of podcasting. Students will develop a discerning ear for quality audio content and the best practices for effective oral communication. Students will learn practical skills required for the production of a variety of podcast formats, from narrative storytelling to interview/conversational to fictional podcasts. In addition, the coursework will expose students to non-production aspects of podcasting such as branding, marketing, distribution, analytics, monetization and legal issues. The minor will equip students to start a podcast or seek employment for podcast production jobs.

Required Courses

- CTPR 404 Practicum in Podcast Production Units: 2
- CTWR 403 Writing the Narrative Podcast Series Units: 2
- JOUR 407 The World of Podcasting Units: 4
- JOUR 412 Podcasting: Origin Stories Units: 2
- THTR 318 Creating the Hit Podcast Units: 2

Electives

Choose at least 4 units from the following:

- COMM 383m Sports, Communication and Culture Units: 4
- COMM 422 Legal Issues and New Media Units: 4
- COMM 458m Race and Ethnicity in Entertainment and the Arts Units: 4
- CTCS 411 Film, Television and Cultural Studies Units: 4
- IML 328 Sonic Media Art Units: 2
- IML 428 Exploring and Creating Sonic Environments Units: 4
- JOUR 411 Broadcast and Digital Writing for Video and Audio for Non-Majors Units: 2
- JOUR 472 Strategies for Monetizing New Media Units: 4
- PR 486 Multimedia PR Content: Introduction to Digital Design Tools Units: 2
- THTR 306 Audio-Drama Units: 2.0
- THTR 489 Theatre Internship Units: 2, 3, 4, 5, 6

Units Required: 16

Public Relations Minor

The public relations minor is designed for students interested in building a career in, or developing a better understanding of, the field of public relations. At no time has public relations been more successful or more visible than it is today. Emphasis is placed throughout the program on both the practical skills required to meet the demands of the marketplace and the critical thinking required to be a successful entry-level public relations practitioner.

Required Courses

- PR 209 Effective Writing for Strategic Public Relations Units: 4
- PR 250 Strategic Public Relations: An Introduction Units: 4
- PR 352 Public Relations Media and Content for Non-Majors Units: 4

Elective Courses

Choose 12 units of PR and/or JOUR 300-499 level electives.

Sports Media Industries Minor

Organized sports are one of the most popular forms of live and participatory entertainment, and produce vast quantities of mediated content. Virtually all professional sport, and increasingly much of amateur competition, is influenced by the importance of having the competitions shared with a wide range of audiences and utilizing diverse platforms to engage these fans. This content rich environment highlights how leagues, teams, players and coaches are each independent and interdependent brands, as well as creators and distributors of multimedia content. This volume of sports content creates new challenges for journalistic norms and storytelling techniques as well as new opportunities for the business of sports media management. The Sports Media Industries minor introduces students to a range of professional settings, activities and challenges related to the growth of sports media.

This 20-unit minor requires that students be introduced both to sports journalism as content production and also to the notion of sports media as a unique setting for publicity, advertising, and public relations. Students will develop the skills required to create sports media content, and increase their ability to critically examine sports media's influence on contemporary culture, particularly issues related to race, gender, class and sexual orientation. The minor will also establish an introductory knowledge of the business of sports and sports media. Elective courses allow students greater opportunity to explore these fields as well as take courses dedicated to specific aspects of sports media.

Required Core Course

- JOUR 350 Introduction to Sports Media Units: 4

Electives

Choose at least 16 units from the following:

- COMM 387 Sports and Social Change Units: 4
- JOUR 380 Sports, Business and Media in Today's Society Units: 4
- JOUR 404 Produce and Host Sports Content in Studio A Units: 2
- JOUR 432 Sports Commentary Units: 4
- JOUR 441 Sports Reporting Units: 2
- JOUR 478 Politics of Sports Writing Units: 4
- JOUR 479 Storytelling for Action Sports Units: 4
- JOUR 480 Sports and Media Technology Units: 4
- JOUR 481 The Athlete, Sports Media and Popular Culture Units: 4
- JOUR 485 Sports Investigative Reporting Units: 4
- PR 453 Public Relations Strategies for Working with Athletes Units: 4
- PR 454 Sports Public Relations Units: 2

Total units: 20

Master's Degree

Journalism (MS)

Studies toward the Master of Science in Journalism require 36 units of prescribed courses and approved electives in the student's field of study. No more than 12 units of 400-level course work may be applied toward the Master of Science in Journalism.

Students who earn a GPA of below 3.0 will be placed on academic probation and must improve according to established terms if they are to remain in the school. In the case of courses offered on Credit/No Credit (CR/NC) basis, faculty review of competence will be substituted for grades.

Residence

Students in the Master of Science in Journalism can complete the program in eleven months by enrolling in the seven-week summer immersion course and enrolling in 14 units in the fall and spring semesters. The School of Journalism will accept only 4 units of approved transferred graduate credit.

Foreign Language/Research Tool Requirements

There is no foreign language or research tool requirement for the master's degree, but fluency in the English language is needed for success in the program.

Grammar, Spelling and Punctuation (GSP)

Journalism students are required to complete an online tutorial about Grammar, Spelling and Punctuation (GSP) and pass the GSP test before the end of the spring semester. Students who fail to complete the GSP tutorial and pass the test will not receive a degree from the School of Journalism.

Note: Students with disabilities may register with the Disability Services and Programs office (DSP) so the DSP staff can assess the nature of the students' disabilities and recommend the appropriate accommodations to be provided for each student.

Capstone Project

MS in Journalism students must enroll in JOUR 598 (4 units) in order to graduate. Completed projects are judged by a committee

appointed by the director of the School of Journalism and degrees are conferred based on the committee's review.

Course Requirements (36 units)

- JOUR 505 The Practice: Journalism's Evolution as a Profession Units: 1
- JOUR 510 Special Assignment Reporting Units: 2
- JOUR 528 Summer Digital Journalism Immersion Units: 3
- JOUR 531 Fall Digital Journalism Immersion Units: 3
- JOUR 539 Introduction to Investigative Reporting Units: 2
- JOUR 546 News, Numbers and Introduction to Data Journalism Units: 2
- JOUR 547 Navigating the Media Marketplace Units: 1
- JOUR 553 Coding and Programming for Storytelling Units: 2
- JOUR 560 Seminar in Mass Communication Law Units: 2
- JOUR 598 Journalism Capstone Project Units: 4

Plus 14 approved elective units (400-level courses and above).

Emphases

Students interested in specific journalistic platforms are encouraged to select an emphasis and complete the recommended courses for that emphasis:

Long-Form Video

- JOUR 521 Documentary Pre-Production Units: 2
- JOUR 522 Video Documentary Production Units: 4
- JOUR 575 Converged Media Center Units: 2, 4

News Video

- JOUR 403 Television News and Sports Production Units: 6
- JOUR 524 Advanced Broadcast Reporting Units: 4
- JOUR 552 Television Reporting and Production Units: 2
- JOUR 575 Converged Media Center Units: 2, 4

Audio

- JOUR 409 Radio Storytelling and Podcasts Units: 4
- JOUR 523 Public Radio Reporting Units: 2
- JOUR 525 This California Life: Storytelling for Radio and Podcasting Units: 4
- JOUR 575 Converged Media Center Units: 2, 4

Text

- JOUR 517 Advanced Investigative Reporting Units: 4
- JOUR 519 Advanced Writing and Reporting for Magazine and the Web Units: 4
- JOUR 542 Foreign Affairs Reporting Units: 3
- JOUR 575 Converged Media Center Units: 2, 4
- JOUR 577 Monetization and the New Media Units: 3
- JOUR 585 Specialized Reporting: Religion Units: 4

Digital

- JOUR 475 Print and Digital Design for 21st Century Storytelling Units: 4
- JOUR 479 Storytelling for Action Sports Units: 4
- JOUR 489 Hands-on Disruption: Experimenting with Emerging Technology Units: 2
- JOUR 494 Python Coding for Data Journalism Units: 2
- JOUR 496 Interactive Media Design for Publishing Units: 4
- JOUR 497 Data Visualization and Interactive Tools Units: 2
- JOUR 533 Web Journalism and Editorial Site Management Units: 2
- JOUR 555 Advanced Coding for Creative Storytelling Units: 2
- JOUR 561 Fundamentals of Data Journalism Reporting Units: 2
- JOUR 575 Converged Media Center Units: 2, 4

Public Relations and Advertising (MA)

Few industries have been as radically transformed by new technologies in the past 20 years as the public relations and advertising professions. Now increasingly converged fields of practice and study, they remain central to the success of organizations of all types, whether business or purpose-driven. The Master of Arts in Public Relations and Advertising offers students a broad perspective across a changing global communication landscape and a deep grounding in foundational courses across disciplines such as persuasive writing, strategy, business fundamentals, advocacy, digital content creation, improvisational leadership and storytelling backed by data intelligence. Through a combination of conceptual courses, research and content creation labs plus electives, specializations and study abroad opportunities, this highly applied program prepares students to become a leader in one of the most dynamic global industries.

Upon completion of the program, graduates will be able to utilize strategic and critical thinking principles, quantitative and qualitative analyses, multi-platform content creation methods and ethical reasoning models to conceptualize and execute effective communication campaigns across all forms of media. In addition to the core competencies of public relations and advertising, graduates will work in other digital communication fields that include social media management, influencer relations, digital brand activation, etc.

Studies toward the Master of Arts in Public Relations and Advertising require 36 units in total, 27 of which are required, foundational courses. The remaining 9 units may be taken as PR and Advertising specializations, Annenberg electives or at other USC schools. No more than 9 units of 400-level course work may be applied toward the MA in Public Relations and Advertising.

Students who earn a GPA of below 3.0 will be placed on academic probation and must improve according to established terms if they are to remain in the school.

Residence

Normally, full-time students in the MA in Public Relations and Advertising can complete the program in four semesters.

Foreign Language/Research Tool Requirement

There is no foreign language or research tool requirement; however, prior knowledge of digital media and research tools is beneficial.

Master's Thesis/Capstone

The Master of Arts in Public Relations and Advertising culminates in either a Thesis or Capstone option. Students may choose between two options: a) the 4-unit thesis/professional project option, which entails one of three approaches: a traditional academic thesis (generally reserved for students who intend to pursue a PhD); a research project (a strategic campaign plan or a white paper); or a video thesis. Alternatively, students may select b) a practicum to craft a digital capstone portfolio that tests overall program knowledge. A passing grade in the capstone portfolio is required for graduation.

Course Requirements (36 Units)

- PR 508 Public Relations and Advertising Fundamentals and Strategy Units: 3
- PR 522 Storytelling with Data Intelligence Units: 3
- PR 523 Advanced Audience Insight Mining Units: 3
- PR 524 Multimedia Content Creation for Brand Storytelling I Units: 3
- PR 525 Multimedia Content Creation for Brand Storytelling II Units: 3
- PR 526 Understanding Transmedia Audiences Units: 3
- PR 529 Business and Economic Foundations for Communicators Units: 3
- PR 535 Persuasive Writing Units: 3
- PR 598 Improvisational Leadership Units: 3
- Plus 9 units of approved elective courses*

Note:

*Students electing the thesis option are required to enroll in PR 594a (2 units) and PR 594b (2 units) and must complete 5 units of approved elective courses. Students electing the comprehensive examination option must complete 9 units of approved elective courses.

Specialized Journalism (MA)

The Master of Arts in Specialized Journalism is a program geared toward experienced journalists seeking subject matter expertise and toward experienced professionals in other fields seeking journalism skills to advance their expertise. The program is also open to recent School of Journalism graduates with records of excellence in their university classes and internships and a demonstrated aptitude and commitment to developing an expertise in a specialized field of reporting.

In the SJ program, award-winning, experienced journalists guide students toward publication in professional outlets, generating "impact journalism" that makes a difference. Students are encouraged to explore documentary, investigative, and narrative journalism genres through a range of specialties and disciplines, including international reporting, social justice journalism and reporting on religion, climate change, sports, entertainment and other subjects. Under the guidance of faculty advisers, and with a wide range of electives for study throughout the university, students craft their own unique master's degree.

Students must begin the program in summer term, enrolling in a required 3-unit, intensive session course focused on journalism and society and on digital media. In addition to the formal classes, the course includes multimedia skills workshops. This gateway course provides the master's students with a working knowledge of the specialized journalism and the multimedia storytelling skills necessary for study in the program. Students also are required take a 2-unit class in media law and a 1-credit course in narrative nonfiction in the summer. These classes set the stage for two semesters of access to courses as substantively broad as a major research university such as USC makes available and for advanced courses in the School of Journalism's graduate program.

In the fall semester, students will enroll in the required "Power of Narrative" and "Critical Thinking" courses for journalists in the School of Journalism. They will also select from one of the reporting tracks or reporting platforms. With the advice of their academic adviser and faculty mentors, students will select elective course work appropriate to their fields of specialization. These courses will be drawn from regular graduate and 400-level courses taught in Annenberg or across the university. Students also will begin research for their master's professional project. Thesis topics must be approved in advance by faculty. These projects will be extended works of journalism, such as a full-length magazine article, similar radio, television or multimedia treatments or the equivalent in their professional field. In addition, students will choose one or more concentrations from the available reporting tracks and platforms. These include additional required classes of a minimum of three units each.

In the spring semester, students will enroll in approved electives. Students will also enroll in elective course work, depending on their chosen concentration, selected again from offerings across the university and in consultation with their faculty mentors. Finally, students will complete their master's professional project.

Reporting Tracks

Race and Social Justice

Develop the skills, critical thinking and expertise to report on the ongoing struggles over race, equality and justice in America. Students will deepen their understanding of the struggle for racial equality and justice through the study of critical theories of race, the lived experiences of journalists of color in newsrooms, and the history and coverage of race and justice in California and beyond. Students will understand the way history, global discourses, newsroom dynamics and technological change are shaping foundational social issues, forming practical knowledge of how race manifests in and shapes reporting in the media today. Students will apply these ideas in the service of producing compelling, deeply-reported stories on race and justice, for publication in local, national, and international media outlets.

Sports and Society

Tap into Annenberg's vast resources to produce deeply-informed, socially-aware sports journalism in LA and around the world. USC Annenberg's location in downtown Los Angeles positions students at the hub Southern California's sports media landscape, close to major networks and digital outlets. Students cover the Lakers, Clippers, Dodgers, Kings, Rams, Chargers and Sparks, plus top-level college athletics and Olympic competition. Annenberg faculty have built unparalleled relationships across multiple media platforms and including athletes, coaches and content creators. Students produce on-site field reporting, write longer-form and investigative sports stories, and meet leaders and executives from the NBA, WNBA, MLB, NHL and MLS. Students will also learn the social, political and economic context of sports in American society and culture, equipping them with the tools for both top-notch reporting and critical analysis in a rapidly changing, global sports media environment.

Entertainment and Pop Culture

Go beyond the red carpet to produce deeply reported stories on the culture, social impact, ethics and economics of entertainment and pop culture. Entertainment journalism has a profound impact on how people view politics, government, race, gender and international affairs. With Los Angeles, the entertainment capital of the world, as the backdrop, students will be steeped in the content, social impact, history, ethics and economics of entertainment and pop culture reporting in the United States and the world. Building on this understanding, and critical skills of research, interviewing, writing and production, students will produce groundbreaking reporting on journalism and pop culture. And, they will be introduced to key players, leaders and celebrities, to understand and challenge those who are making decisions that are having an impact on our lives.

Religion

Through Annenberg's Knight Chair in Media and Religion, explore the intersection among religion, politics and culture to write complex stories reported domestically and internationally. Religion plays a crucial role in domestic politics and international relations. Spirituality – the individual search for meaning – shapes our sense of self and our orientation to the world. Report on what gives nations, communities and individuals meaning, identity and purpose whether through arts and entertainment, sports, climate concern, racial justice, politics or humanitarian outreach. Each year, the class travels abroad for an immersive reporting experience focused on religion, politics and culture in countries such as India, Indonesia, South Korea and Israel/Palestine.

International

Combine on-location global reporting through Annenberg with study of international issues across USC, to build top-notch international reporting expertise. To report on the world, you must know the world. Students who opt to specialize in international reporting explore international relations, public policy, religion, health, immigration and environmental studies across the university in tandem with their journalism courses at USC Annenberg. Students have traveled to and reported from countries like Greece, Ireland and Indonesia. As an extension of their coursework, students have also partnered with various media organizations like The Washington Post, The Atlantic, Daily Beast and Public Radio International to have their stories published.

Climate

Work with top climate journalists and experts in science and public policy to build top-notch climate reporting expertise. From devastating hurricanes to annual record-breaking heat waves, from "sunny-day floods" in southern Florida to the annual new normal of a California on fire, climate change has reached deep into the American landscape, its economy, politics, even its collective psyche. With these effects has come new awareness, and an urgency to tackle the problem. Never has there been such a need for an original, compelling and accurate accounting of the threat of climate change, and the promise of constructive measures to address it. Students will sharpen their expertise in climate science and social policy, and consider agriculture, water and food sustainability, while producing groundbreaking narrative, documentary and investigative reporting on a central issue of our time.

Reporting Platforms

Documentary

Report beyond the news through in-depth storytelling and analyses of issues you are passionate about, and contextualize them for a broader audience. The documentary sequence at USC Annenberg provides an opportunity to report beyond the news. You have the opportunity do in-depth analyses of stories that you are passionate about and learn ways to contextualize them for a broader audience. Completed docs are eligible for publication on Impact, a student-produced series that is featured on the Annenberg Media website, and is broadcast by Spectrum News1, L.A.'s 24-hour news channel. You will learn advanced ideas centering on visual literacy, production, techniques to manage large amounts of content, and organized approaches to building documentaries for multi-platform distribution. These are skills that translate to all aspects of journalism.

Data and Innovation

Enhance new forms of storytelling, develop smarter platforms to deliver news, explore techniques in data mining and work on new business models to increase the value of journalistic content. Journalism is at the midst of a bold transformation. The Data and Innovation track is designed for students who are seeking to embrace the technologies that have opened up new frontiers for the profession and to capitalize on this moment by charting the next phase of the communications revolution. Students work closely with leading players in the industry to: (1) enhance new forms of storytelling; (2) develop smarter platforms to deliver news; (3) improve reporting techniques and data mining; and (4) work on new business models to increase the value of journalistic content.

Podcasting and Audio

Explore the power of audio storytelling through advanced production and mixing techniques, narrative point of view, and the history, economics and journalistic range of the podcast. The Audio and Podcasting track gives students grounding in the production and business of podcasting as an outlet for their journalistic work. Students will explore the power of audio storytelling, from classic public radio-style productions to innovative and experimental podcasts. They will learn advanced production and mixing techniques, narrative point of view and the history, economics and journalistic range of the podcast. They will develop a discerning ear for quality audio content and the best practices for effective oral communication. Course work will also expose students to non-production aspects of podcasting such as branding, marketing, distribution, analytics, monetization and legal issues.

Investigative

USC Annenberg is seeking students and early-career journalists of exceptional promise who aspire to journalism's highest calling: producing stories that expose harm, wrongdoing, abuse of power. Stories that matter. Building on the work of the Beacon Project, profiled in *The New York Times*, you will work on a major investigative project under the mentorship of award-winning journalists who will help place deserving stories in professional news outlets. You will learn how to find documents most reporters would not even think to look for; persuade reluctant or hostile sources to reveal their secrets; obtain and analyze data; protect your sources with digital-security savvy and counter-surveillance techniques; bulletproof your stories against libel actions and write compelling stories for text, audio or video.

Narrative

Immerse yourself in myriad ways of nonfiction and longform storytelling, learning from award-winning authors and magazine writers the best ways to produce compelling narrative journalism. Top narrative journalists will show you how to cut through the crowded content landscape to tell the stories that matter. In the narrative track, you will learn nonfiction storytelling techniques across a range of styles and interests of your choice – from the arts to religion and social justice issues, from climate reporting to sports and entertainment – to tell the stories that matter. In the process, you will examine fundamental principles embedded in all good narrative journalism: in-depth, empathetic, and creative storytelling. Work that makes a difference. Here you will learn how to create the "journalism of the heart" – groundbreaking, deeply-reported, humane storytelling that bears witness to the world around us.

The 11-month program has been designed for a fall and spring semester enrollment cycle; however, students may also elect to complete the program over a longer time span on a part-time basis, but must start with the intensive summer course.

Studies toward the Master of Arts in Specialized Journalism require 34 units of prescribed courses and approved electives. No more than 10 units of 400-level course work may be applied toward the Master of Arts in Specialized Journalism.

Residence

The Master of Arts in Specialized Journalism can be completed in an 11-month enrollment cycle that includes the seven-week summer session, plus the fall and spring semesters. These programs may be attended on a part-time basis.

Foreign Language/Research Tool Requirements

There is no foreign language or research tool requirement for the master's degree.

Grammar, Spelling and Punctuation (GSP)

Journalism and strategic public relations graduate students are required to complete an online tutorial about Grammar, Spelling and Punctuation (GSP) and pass the GSP test before the end of the fall semester of their first year. Students who fail to complete the GSP tutorial and pass the test will not receive a degree from the School of Journalism.

Note: Students with disabilities may register with the Office of Student Accessibility Services (OSAS) so the OSAS staff can assess the nature of the students' disabilities and recommend the appropriate accommodations to be provided for each student.

Master's Thesis

MA in Specialized Journalism students normally enroll in JOUR 594a (2 units) and JOUR 594b (2 units) in their single year of study.

For complete admission requirements refer to the section on the School of Journalism page.

Course Requirements

- JOUR 511 Introduction to Narrative Non-Fiction Units: 1
- JOUR 528 Summer Digital Journalism Immersion Units: 3
- JOUR 560 Seminar in Mass Communication Law Units: 2
- JOUR 567 The Power of Narrative Units: 2
- JOUR 594a Master's Thesis Units: 2
- JOUR 594b Master's Thesis Units: 2
- JOUR 595 Critical Thinking: The Art and Science of Not Getting Fooled Units: 3

One course from:

- JOUR 411 Broadcast and Digital Writing for Video and Audio for Non-Majors Units: 2
- JOUR 431 Feature Writing Units: 4
- JOUR 517 Advanced Investigative Reporting Units: 4
- JOUR 519 Advanced Writing and Reporting for Magazine and the Web Units: 4
- JOUR 523 Public Radio Reporting Units: 2
- JOUR 525 This California Life: Storytelling for Radio and Podcasting Units: 4
- JOUR 552 Television Reporting and Production Units: 2
- JOUR 588 Cities, Climate and Risk Units: 3

Concentrations

Choose one reporting track or platform.

Climate

Required course:

- JOUR 588 Cities, Climate and Risk Units: 3

Electives

Choose at least one course:

- COMM 475 Environmental Communication Units: 4
- JOUR 568 The Art of (Micro) Food Journalism: Los Angeles and California Units: 3

- JOUR 569 The Art of (Macro) Food Journalism: A Global View Units: 3

Data and Innovation

Required course:

- JOUR 488 Data-Driven Storytelling About Los Angeles Units: 4

Electives

Choose at least one course:

- CMGT 564 Methodological Fundamentals of Big Data in Communication Units: 4
- COMM 502 Theoretical Approaches to Multidisciplinary Design Projects Units: 4
- COMM 557 Data Science for Communication and Social Networks Units: 4
- COMM 614 Computational Approaches in Health Communication Units: 4
- JOUR 497 Data Visualization and Interactive Tools Units: 2
- JOUR 553 Coding and Programming for Storytelling Units: 2
- JOUR 554 Reporting with Data Units: 2
- JOUR 555 Advanced Coding for Creative Storytelling Units: 2
- JOUR 561 Fundamentals of Data Journalism Reporting Units: 2
- PR 478 Social Media Analytics: Data and Content Creation for Real-time Public Relations Units: 4
- PR 522 Storytelling with Data Intelligence Units: 3
- PR 523 Advanced Audience Insight Mining Units: 3

Documentary

Required courses:

- JOUR 503 Visual Literacy and Introduction to Documentary Storytelling Units: 1
- JOUR 521 Documentary Pre-Production Units: 2
- JOUR 522 Video Documentary Production Units: 4

Electives

Choose at least one course:

- JOUR 405 Non-Fiction Television Units: 4
- JOUR 431 Feature Writing Units: 4
- JOUR 519 Advanced Writing and Reporting for Magazine and the Web Units: 4

Entertainment and Pop Culture

Required courses:

- COMM 458m Race and Ethnicity in Entertainment and the Arts Units: 4
- JOUR 572 Reporting on Entertainment and Popular Culture Units: 3

Electives

Choose at least two courses:

- CMGT 543 Managing Communication in the Entertainment Industry Units: 4
- COMM 426 Religion, Media and Hollywood: Faith in TV Units: 4
- COMM 430 Global Entertainment Units: 4
- COMM 431 Global Strategy for the Communications Industry Units: 4
- COMM 432 American Media and Entertainment Industries Units: 4
- COMM 433 Home Entertainment: From Networks to Streaming Units: 4
- COMM 456 Entertainment, Marketing and Culture Units: 4
- COMM 465m Gender in Media Industries and Products Units: 4
- JOUR 430 Writing the Film Review Units: 4
- JOUR 446 Entertainment Reporting Units: 2
- JOUR 447 Arts Reporting Units: 2
- JOUR 458 Media, Food and Culture Units: 4
- JOUR 459 Fact and Fiction: From Journalism to the Docudrama Units: 4
- JOUR 576 The Image of the Journalist in Popular Culture Seminar Units: 2
- PR 452 Public Relations in Entertainment Units: 4
- PR 457 The Role of Celebrity in Public Relations Units: 4

International

Required course:

- JOUR 585 Specialized Reporting: Religion Units: 4

Electives

Choose at least one course:

- JOUR 484 American Religion, Foreign Policy and the News Media Units: 4
- JOUR 542 Foreign Affairs Reporting Units: 3

Investigative

Required courses:

- JOUR 517 Advanced Investigative Reporting Units: 4
- JOUR 539 Introduction to Investigative Reporting Units: 2

Electives

Choose at least one course:

- JOUR 553 Coding and Programming for Storytelling Units: 2
- JOUR 554 Reporting with Data Units: 2
- JOUR 555 Advanced Coding for Creative Storytelling Units: 2
- JOUR 561 Fundamentals of Data Journalism Reporting Units: 2
- PR 523 Advanced Audience Insight Mining Units: 3

Narrative

Required course (choose one):

- JOUR 431 Feature Writing Units: 4
- JOUR 519 Advanced Writing and Reporting for Magazine and the Web Units: 4

Electives

Choose at least two courses:

- JOUR 400 Interpretive Writing Units: 4
- JOUR 440 Environmental Journalism Units: 4
- JOUR 447 Arts Reporting Units: 2
- JOUR 470 Community Journalism Units: 2
- JOUR 474 Interviewing and Profile Writing Units: 2
- JOUR 512 Advanced Interpretive Writing Units: 2
- JOUR 585 Specialized Reporting: Religion Units: 4
- JOUR 588 Cities, Climate and Risk Units: 3
- JOUR 592 Arts Journalism: Storytelling and Production Units: 3
- JOUR 593 Arts Criticism and Commentary Units: 3
- JOUR 596 Follow the Money: Business and Economics Units: 3

Podcasting and Audio

Required courses:

- JOUR 523 Public Radio Reporting Units: 2
- JOUR 525 This California Life: Storytelling for Radio and Podcasting Units: 4

Electives

Choose at least one course:

- JOUR 407 The World of Podcasting Units: 4
- JOUR 575 Converged Media Center Units: 2, 4

Race and Justice

Required course:

- JOUR 580 Reporting on Race and Justice Units: 4

Electives

Choose at least one course:

- CMGT 584 Communication and the Multicultural Marketplace Units: 4
- COMM 458m Race and Ethnicity in Entertainment and the Arts Units: 4
- COMM 563 Black Popular Culture: Theory and Central Debates Units: 4
- JOUR 406 Social Media Storytelling for Latinx Audiences Units: 2
- JOUR 465m Latino News Media in the United States Units: 4
- JOUR 467 Gender and the News Media Units: 4

- JOUR 468m The American Press and Issues of Sexual Diversity Units: 4

Religion

Required course:

- JOUR 585 Specialized Reporting: Religion Units: 4

Electives

Choose at least one course:

- COMM 426 Religion, Media and Hollywood: Faith in TV Units: 4
- JOUR 484 American Religion, Foreign Policy and the News Media Units: 4

- JOUR 441 Sports Reporting Units: 2
- JOUR 479 Storytelling for Action Sports Units: 4
- JOUR 481 The Athlete, Sports Media and Popular Culture Units: 4
- JOUR 519 Advanced Writing and Reporting for Magazine and the Web Units: 4
- JOUR 571 21st Century Sports Storytelling Units: 3
- PR 453 Public Relations Strategies for Working with Athletes Units: 4

Total units: 34

Specialized Journalism (The Arts) (MA)

The Master of Arts in Specialized Journalism (The Arts) comprises two separate and distinct journalism concentrations – one focusing on the arts and the other on food. These journalism disciplines begin at the same place of origin with a seven-week 3-unit summer digital immersion course, and join forces for one required course in the fall. After that they go their separate ways, each required to take the same number of units, including a 2-unit commitment to a thesis project in each of the fall and spring semesters.

The Master of Arts in Specialized Journalism (The Arts) is primarily geared toward the experienced journalist, and yet it also, with no less parity, welcomes the amateur. What must be demonstrated prior to acceptance is a strong record of interest and competence in a subject area. For the arts, this spans the critical environments of film, television, music, theatre, dance, literature, architecture and visual arts. We welcome artists with a solid background and/or arts conservatory training who express sincere commitment to wanting to learn the journalism practice and skills to tell compelling stories. The arts master's students' electives will primarily be taken at one or more of USC's arts schools. For food MA students, a demonstrable knowledge about food, and a socio-political understanding and curiosity about the places where food intersects with culture is expected.

For both concentrations, the emphasis is on culture: arts and *culture;* food and *culture*. This program is multidisciplinary and entrepreneurial. The university is a laboratory for experimentation, enlisting the skills of professional artists, journalists, economists, technologists, entrepreneurs, alumni and citizens to welcome students of varied experience and omnivorous interests. Print, online, audio, video and social media are practiced and taught in this program with equal opportunity.

Students will complete 20-25 units of specialized journalism course work, including a master's professional project and 9-14 units of approved elective course work from faculty-recommended lists. For those on the arts journalism track, other electives must be in at least two arts schools ideally with at least 8 units from one school. The arts schools are Architecture, Art and Design, Cinematic Arts, Dance, Dramatic Arts and Music.

Students must begin the program in summer term, enrolling in a required 3-unit intensive summer session course focused on journalism and society and digital media. In addition to the formal classes, the course includes discussions, workshops and field reporting. This gateway course provides master's students with a working knowledge of the specialized journalism background and the multimedia and digital storytelling skills necessary for study in the program. It sets the stage for two semesters of access to courses as substantively broad as a major research university such as USC makes available. Students also take media law, one required writing course and another required in audio in the summer.

In the fall semester, arts journalism students will enroll in an arts reporting and online magazine production seminar and a narrative writing practicum. In the spring, arts journalism students will enroll in an arts reporting and online magazine production seminar.

In the fall semester, food journalism students will enroll in a food journalism course focusing on Los Angeles and California and a course on food media and culture. In the spring semester, food journalism students will enroll in reporting on global issues course and a food narrative writing course.

With the advice of their academic adviser and faculty mentors, students will select elective course work appropriate to their fields of specialization. These courses will be drawn from regular graduate and 400-level courses taught across 14 of the university's schools and within the USC Annenberg School for Communication and Journalism. Students also will begin research for their master's professional project. These projects may be full-length magazine (print, audio, broadcast and/or multimedia) treatments of issues in their field or similar professional work.

The 11-month program has been designed for a summer, fall and spring semester enrollment cycle; however, students also may elect to complete the program on a part-time basis with the approval of the director of the School of Journalism, but must start with the intensive summer course.

Studies toward the Master of Arts in Specialized Journalism (the Arts) require 34 units of prescribed courses and approved electives. No more than 11 units of 400-level course work may be applied toward the Master of Arts in Specialized Journalism (The Arts).

Residence

The Master of Arts in Specialized Journalism can be completed in an 11-month enrollment cycle that includes the four-week summer session, plus the fall and spring semesters. These programs may be attended on a part-time basis.

Foreign Language/Research Tool Requirements

There is no foreign language or research tool requirement for the master's degree.

Grammar, Spelling and Punctuation (GSP)

Journalism and strategic public relations graduate students are required to complete an online tutorial about Grammar, Spelling and Punctuation (GSP) and pass the GSP test before the end of the fall semester of their first year. Students who fail to complete the GSP tutorial and pass the test will not receive a degree from the School of Journalism.

Note: Students with disabilities may register with the Disability Services and Programs office (DSP) so the DSP staff can assess the nature of the students' disabilities and recommend the appropriate accommodations to be provided for each student.

Master's Thesis

MA in Specialized Journalism students normally enroll in JOUR 594a (2 units) and JOUR 594b (2 units) in their single year of study.

For complete admission requirements refer to the section on the School of Journalism page.

Course Requirements (34 Units)

Required Courses:

- JOUR 511 Introduction to Narrative Non-Fiction Units: 1
- JOUR 515 Introduction to Audio Storytelling Units: 1
- JOUR 528 Summer Digital Journalism Immersion Units: 3
- JOUR 560 Seminar in Mass Communication Law Units: 2
- JOUR 594a Master's Thesis Units: 2
- JOUR 594b Master's Thesis Units: 2

Concentration Courses:

Choose all courses from either the arts concentration or the food concentration.

Arts Concentration

- JOUR 591 Arts Writing Practicum Units: 3
- JOUR 592 Arts Journalism: Storytelling and Production Units: 3
- JOUR 593 Arts Criticism and Commentary Units: 3

Food Concentration

- JOUR 458 Media, Food and Culture Units: 4
- JOUR 568 The Art of (Micro) Food Journalism: Los Angeles and California Units: 3
- JOUR 569 The Art of (Macro) Food Journalism: A Global View Units: 3
- JOUR 597 Food Culture Journalism Units: 4

Elective Courses:

Plus 9-14 approved elective units (400-level courses and above).

Note:

**All students must take their elective course work (400-level courses and above) from faculty-recommended lists with advisement from the program director and USC Annenberg's graduate advisement assistant director. The number of elective units is based on the concentration category selected. No more than 11 units of 400-level electives may be taken. For the arts students, these electives must be in at least two arts schools, ideally with at least 8 units from one school. The arts schools are Architecture, Art and Design, Cinematic Arts, Dance, Dramatic Arts and Music. If an arts student wants to take an elective course outside of these schools, your petition will be heard and duly considered. For the food concentration student, these electives are not restricted across the university except at the discretion of the individual professor. Permission may be required.*

Graduate Certificate

Journalism Certificate

The certificate program requires students to complete a 3-unit course in the summer and then complete 17 units during the fall semester, for a total of 20 units.

Course Requirements (20 Units)

- JOUR 505 The Practice: Journalism's Evolution as a Profession Units: 1
- JOUR 510 Special Assignment Reporting Units: 2
- JOUR 528 Summer Digital Journalism Immersion Units: 3
- JOUR 531 Fall Digital Journalism Immersion Units: 3
- JOUR 553 Coding and Programming for Storytelling Units: 2
- JOUR 560 Seminar in Mass Communication Law Units: 2

Plus 7 approved graduate-level elective units.

Public Policy Advocacy Graduate Certificate

The graduate certificate is offered jointly by the Sol Price School of Public Policy and the Annenberg School of Communication and Journalism. The certificate provides students with knowledge of the increasingly important role played by information flows in politics and governance. Students will assess the structure of campaigns designed to influence public opinion, the messaging strategies utilized by political players and civic society organizations and new scholarship on the pathways of persuasion in the digital age. The certificate is especially appropriate for students who intend to pursue work with elected officials, think tanks, foundations, community-based organizations, consulting firms and corporate offices that aim to shape public policy through advocacy.

Applicants for the Certificate in Public Policy Advocacy must be currently enrolled in a graduate program at USC and in good standing, with a 3.0 GPA. Students can apply for the certificate through the student services office at the Price or the Annenberg School.

The Certificate in Public Policy Advocacy requires a minimum of 14 units for students taking two 3-unit electives in the Strategic Public Relations Program. More typically students will earn 15 or 16 units by taking one or two 4-unit electives. All units earned in pursuit of the certificate can be applied toward the completion of degree requirements if they fall within existing criteria. However, courses taken solely for certificate purposes will not substitute for degree requirements.

Required Courses

- PPD 693 Communicating Public Policy Units: 4
- PR 501 Advocacy Communications Units: 4

Elective Courses

Pick any two courses from the following:

Annenberg

- CMGT 508 Communicating Strategy and Change Units: 4
- CMGT 581 Media in Social Services: Design and Evaluation of Campaigns Units: 4
- COMM 561 Leading and Communicating Change in Global Organizations Units: 4
- PR 534 Case Studies in Public Relations Units: 3
- PR 536 Digital, Social and Mass Media Public Relations Strategies Units: 3
- PR 568 Crisis Management in Strategic Public Relations Units: 3

Price

- PPD 554 Foundations of Policy Analysis Units: 4
- PPD 616 Participatory Methods in Planning and Policy Units: 4
- PPD 657 Political Leadership in Public Organizations Units: 4
- PPDE 647 Civic Engagement in Governance Units: 4

USC Kaufman School of Dance

Founded in 2015, the USC Glorya Kaufman School of Dance embodies excellence in the interdisciplinary study of dance. Dance in the twenty-first century is a dynamic art form, and the professionals who will shape the future of the field will need to move seamlessly throughout this changing landscape. These thought leaders will embrace innovation alongside tradition, study classical genres as well as emerging dance forms, and engage with the latest technologies while exploring the historical origins of dance. USC Kaufman is creating a unique model in which intersecting dance techniques create hybrid art forms expressed through performance, choreography, media, scholarship, and beyond. We call this vision The New Movement.

The state-of-the-art Glorya Kaufman International Dance Center is the school's vision realized in brick and mortar. The largest facility dedicated to dance at any private university, it includes six studios, a performance venue, four classrooms and a collaborative workspace for students.

The Bachelor of Fine Arts in Dance provides a rigorous conservatory experience at one of the world's leading private research universities. The BFA curriculum includes world-class training in a multitude of dance forms including ballet, hip-hop, jazz, African and contemporary dance. Students are exposed to world-renowned practicing artists, provided opportunities to pursue interdisciplinary projects, and studies in dance science, history, new media, and entrepreneurship - all the while providing an expansive liberal arts education. A robust performance repertory includes works by current faculty as well as other influential artists in dance such as George Balanchine, Alejandro Cerrudo, Merce Cunningham, Martha Graham, Francesca Harper, Jiří Kylián, Matthew Neenan, Crystal Pite, Paul Taylor, Rauf "RubberLegz" Yasit, and many more.

Led by Dean Robert Cutietta, USC Kaufman faculty are unparalled in their depth and diversity of experience. Full-time and part-time faculty have highly regarded careers in the field. Faculty Artists in Residence include leading dance innovators such as Hope Boykin, Marjani Forté-Saunders, Zippora Karz, Fiona Lummis, Barak Marshall, Victor Quijada, Dwight Rhoden, Desmond Richardson, Jermaine Spivey, Micaela Taylor, and Doug Varone. Students have also worked with guest artists from all over the world, including Kyle Abraham, Bill T. Jones, Akram Khan, Alonzo King, Sonya Tayeh, Diana Vishneva, Wendy Whelan and Andrew Winghart – to name a few.

Established relationships with Glorya Kaufman Presents Dance at The Music Center and the USC Thornton School of Music afford significant opportunities to collaborate with acclaimed artists. Joint efforts with the USC Division of Biokinesiology and Physical Therapy and USC Counseling and Mental Health put student wellness front and center. Through its partnership with the USC School of Dramatic Arts, USC Kaufman provides dance training to students pursuing the BFA in Musical Theatre. USC Kaufman's location in Los Angeles, a global center for the arts and entertainment, provides students with easy access to rich artistic and professional opportunities.

In addition to the Bachelor of Fine Arts, USC Kaufman offers a wide variety of classes open to all USC students. It has studio courses in African Dance, Afro-Cuban Dance, Bollywood Dance, Ballet, Choreography, Commercial Dance, Contemporary Dance, Gaga, Hip-Hop Dance, International Ballroom Dance, Jazz Dance, Mat Pilates, and Tap Dance. General Education courses on the history and culture of dance, including African American Dance, Hip-Hop Don't Stop, and Dancing on the Screen provide a rewarding introduction to the field. A wide range of other electives such as Dance and New Media and World Perspectives on Dance Performance provide specialized studies of the art form.

USC students may also pursue minors that complement other areas of study. These 16- to 20-unit offerings include Choregraphy for Stage and Screen; Dance; Hip-Hop, Street and Social Dance Forms; and Dance in Entertainment.

Assistant Professors of Practice in Dance: Shannon Grayson; Saleemah E. Knight, MFA
Adjunct Professor: Rosana Tavarez
Adjunct Assistant Professor in Dance: Bonnie Oda Homsey, MFA
Lecturers: Tiffany Bong; Kathryn Dunn; Bret Easterling; Gillian Finley; Jesus Fuentes; Anindo Marshall; Achinta S. McDaniel; Amy O'Neal
Instructor of Clinical Physical Therapy and Instructor of Dance: Marisa Hentis, PT, DPT, OCS, CSCS
Artists in Residence: Hope Boykin; Marjani Forté-Saunders; Zippora Karz; Fiona Lummis; Barak Marshall; Victor Quijada; Desmond Richardson; Dwight Rhoden; Penny Saunders; Jermaine Spivey; Micaela Taylor; Doug Varone

Bachelor's Degree

Dance (BFA)

The Bachelor of Fine Arts in Dance is a four-year professional degree designed to prepare the artist, innovator and entrepreneur. A diverse array of electives, in combination with a rigorous core curriculum, provides students with ample opportunity to explore their artistic and intellectual passions and develop a strong personal vision of dance.

Intensive studio instruction is in three core areas: ballet, hip hop and contemporary styles. Emphasis is on performance and composition, while also building a solid foundation in dance history, science, conditioning, new media, entrepreneurship and critical theory. Upperclassmen continue to work on technique as well as performance and/or composition, while also pursuing individual interests.

In the junior and senior years, students pursue one of four concentrations: Dance Performance, Choreography for Stage and Screen, Dance and Music or Design Your Own. They are mentored by faculty and assisted by academic advisers in selecting elective courses both within and outside of USC Kaufman that support their personal and professional goals.

Emphasis in the final year of study is placed on the development of a professional quality project in the areas of performance, choreography, music, media, scholarship or entrepreneurship.

Dance Performance Concentration

The Dance Performance concentration is designed for students who are interested in careers as professional dancers or in other performance mediums. Emphasis is placed on providing students with the skills to succeed in a variety of entertainment positions. Students work with artists and scholars in the field,

learning essential tools needed for a successful career in dance performance.

Dance and Music Concentration

The Dance and Music concentration provides students with a unique perspective on dance by combining dance training with substantial studies in music. Courses in vocal arts, music theory or instrumental training, for example, equip students interested in choreography or dance performance with the knowledge to explore careers in the music and larger entertainment industry.

Choreography for Stage and Screen Concentration

The Choreography for Stage and Cinematic Arts concentration is designed to guide students who are interested in the field of dance for the stage, motion pictures, television, digital media and animation. Students are mentored in experimental types of dance media, both as individual performers and in collaboration with other visual and performing artists.

Design Your Own Concentration

The Design Your Own concentration allows students to pursue a truly custom program of study by combining hand-picked elective courses from across the university with dance electives. This is the only concentration for which students must formally apply in their junior year. The application requires students to demonstrate how the concentration is different from a major and minor combination and to provide preliminary ideas about how their senior project brings together their hand-picked courses with their dance studies.

General Requirements

Candidates must submit the Common Application and USC Writing Supplement as well as the USC Kaufman Portfolio, which includes a headshot, action shot, written short answer, dance résumé, one-minute video response, and two video auditions showing contrasting solos. Final candidates are selected to audition and interview in person. Specific audition requirements, along with other entrance requirements, are reviewed on an annual basis and published under the Apply section at *kaufman.usc.edu*.

Curriculum Requirements

The Bachelor of Fine Arts in Dance requires a total of 132 units.

All students in the dance program are required to complete the university's General Education and Writing requirements.

Within USC Kaufman, students will receive foundational training and insight through the core curriculum. In addition, they must complete a minimum of 23 electives toward their concentration.

The BFA degree's 132 unit requirement includes at least 16 general elective units. Students are encouraged to use these units in order to pursue a minor outside of USC Kaufman.

Core Requirements (61 units)

Lower Division

- DANC 101 Colloquium: What is the Medium of Dance Today? Units: 1
- DANC 103 Conditioning for Dancers Units: 2
- DANC 105 Dance Science: Analysis of Dance Movement Units: 4
- DANC 107 World Perspective on Dance Performance Units: 2
- DANC 110 Dance Technique I Units: 3 + 3
- DANC 120L Repertory and Performance I Units: 2 + 2
- DANC 130 Improvisation and Composition I: Introduction Units: 2
- DANC 131 Improvisation and Composition II: Introduction Units: 2
- DANC 201 Colloquium: History of Performance and Cultural Context Units: 1
- DANC 210 Dance Technique II Units: 3 + 3
- DANC 218 Introduction to Dance for the Camera: New Media and Editing Units: 2
- DANC 220L Repertory and Performance II Units: 2 + 2
- DANC 230 Improvisation and Composition III: Intermediate Units: 2
- DANC 231 Improvisation and Composition IV: Intermediate Units: 2
- MUCO 140 Music for Dancers Units: 2

Upper Division

- DANC 301 Colloquium: The Role of the Dance Artist in Society Units: 1
- DANC 310 Dance Technique III Units: 3 + 3
- DANC 312gw African American Dance Units: 4
- DANC 342gp International and Historical Perspectives on Dance Units: 4
- DANC 470 Dance Leadership Units: 2
- DANC 480 Advanced Performance Studies: Senior Seminar Units: 1
- DANC 485 Advanced Performance Studies: Senior Project Units: 1

Dance Performance Concentration (minimum 23 units)

Required Electives (14 units)

- DANC 320L Repertory and Performance III Units: 2 + 2
- DANC 410 Dance Technique IV Units: 3 + 3
- DANC 420L Repertory and Performance IV Units: 2 + 2

Additional Electives (minimum 9 units)

In addition to DANC courses, students in this concentration are able to take up to 8 units in the USC Thornton School of Music, USC School of Cinematic Arts and/or USC School of Dramatic Arts. More details are below.

- ARTL 310 Music and Dance In Paris Salon Culture Units: 2
- DANC 150 Dance and New Media Units: 1, 2, 3, 4
- DANC 170 Choreography and Performance Units: 2
- DANC 171 Commercial Dance: Professional Dance Preparation Units: 1, 2
- DANC 175 Choreography for the Screen Units: 2
- DANC 180-189c - Dance Technique
- DANC 190 Gaga: People Units: 1, 2
- DANC 191 Gaga: Dancers Units: 1, 2
- DANC 212g Dance in Popular Culture Units: 4
- DANC 285 Elements of Dance Production Units: 1, 2, 3, 4
- DANC 302g Hip Hop Don't Stop: Black Social Dance Culture and Media Units: 4
- DANC 333gw Origins of Jazz Dance Units: 4
- DANC 345 Artist in Residence Units: 1, 2, 3, 4
- DANC 347 Artist Collaborative Units: 1, 2, 3, 4
- DANC 350 Advanced Composition Units: 2
- DANC 352g Dancing with Words Units: 4
- DANC 355 Performance Lab Units: 1, 2, 3, 4
- DANC 362 Pilates Mat Training Units: 2
- DANC 363g Dancing on the Screen Units: 4
- DANC 370 Dance in Los Angeles Units: 1, 2, 3, 4
- DANC 399 Maymester: Dance Capitals of the World Units: 1, 2, 3, 4
- DANC 432 Creativity, Culture, Commerce and Community Units: 2
- DANC 442 International and Historical Perspectives on Dance II Units: 4
- DANC 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- DANC 495 Dance Internship Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18
- DANC 499 Special Topics Units: 1, 2, 3, 4
  Students may take courses under the below prefixes. These courses must be approved within USC Kaufman by the faculty mentor, assistant dean of admission and student services and vice dean. Students must also meet any eligibility requirements (i.e. prerequisites) and/or receive approval from the school or department when needed.

USC Thornton School of Music

Total Units Required: 132

Minor

Choreography for Stage and Screen Minor

The Choreography for Stage and Screen Minor explores the different techniques used to create dances for the stage and screen, including new media. By researching classic and contemporary film and stage musicals and existing choreographic works, combined with technical skills, students learn methods used to generate movement vocabulary and gain practical experience in choreographing for multiple mediums.

This minor consists of three lower-division courses, one upper-division course and 7 units of elective courses. Students must be in good academic standing to be admitted. No previous dance experience is required.

Required Lower-Division Courses (7 units)

- DANC 150 Dance and New Media Units: 1, 2, 3, 4
- DANC 170 Choreography and Performance Units: 2
- DANC 280g Introduction to Dance as an Art Form Units: 4

Required Upper-Division Course (4 units)

- DANC 363g Dancing on the Screen Units: 4

Elective Courses (7 units)

- ARTL 310 Music and Dance In Paris Salon Culture Units: 2
- DANC 103 Conditioning for Dancers Units: 2
- DANC 105 Dance Science: Analysis of Dance Movement Units: 4
- DANC 107 World Perspective on Dance Performance Units: 2
- DANC 171 Commercial Dance: Professional Dance Preparation Units: 1, 2
- DANC 175 Choreography for the Screen Units: 2
- DANC 180-189c Dance Technique Courses*
- DANC 190 Gaga: People Units: 1, 2
- DANC 191 Gaga: Dancers Units: 1, 2
- DANC 212g Dance in Popular Culture Units: 4
- DANC 285 Elements of Dance Production Units: 1, 2, 3, 4
- DANC 302g Hip Hop Don't Stop: Black Social Dance Culture and Media Units: 4
- DANC 312gw African American Dance Units: 4
- DANC 333gw Origins of Jazz Dance Units: 4
- DANC 342gp International and Historical Perspectives on Dance Units: 4

- DANC 352g Dancing with Words Units: 4
- DANC 355 Performance Lab Units: 1, 2, 3, 4
- DANC 362 Pilates Mat Training Units: 2
- DANC 370 Dance in Los Angeles Units: 1, 2, 3, 4
- DANC 399 Maymester: Dance Capitals of the World Units: 1, 2, 3, 4
- DANC 432 Creativity, Culture, Commerce and Community Units: 2
- DANC 442 International and Historical Perspectives on Dance II Units: 4
- DANC 483 Dance Performance Units: 2
- DANC 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- DANC 495 Dance Internship Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18
- DANC 499 Special Topics Units: 1, 2, 3, 4

Dance Technique Courses*

Students with previous dance experience may place into intermediate (b-level), intermediate/advanced (c-level) and/or advanced (d-level) courses. Such students must submit a Prerequisite Waiver Form, which requires the instructor's approval.

- DANC 180 African Dance Units: 2
- DANC 181a Contemporary Dance Units: 2
- DANC 181b Contemporary Dance Units: 2
- DANC 181c Contemporary Dance Units: 2
- DANC 183a Ballet Units: 2
- DANC 183b Ballet Units: 2
- DANC 183c Ballet Units: 2
- DANC 183d Ballet Units: 2
- DANC 184a Jazz Dance Units: 2
- DANC 184b Jazz Dance Units: 2
- DANC 184c Jazz Dance Units: 2
- DANC 184d Jazz Dance Units: 2
- DANC 185a Hip Hop Dance Units: 2
- DANC 185b Hip Hop Dance Units: 2
- DANC 186 Afro Cuban Dance Units: 2
- DANC 187 Bollywood Dance Units: 2
- DANC 188a International Style Ballroom Dance Units: 2
- DANC 188b International Style Ballroom Dance Units: 2
- DANC 189a Tap Dance Units: 2
- DANC 189b Tap Dance Units: 2
- DANC 189c Tap Dance Units: 2

Total Units Required: 18

Dance in Entertainment Minor

The Dance in Entertainment Minor offers undergraduate students an opportunity to explore dance in the commercial realm, from Hollywood to Broadway, primarily focused on performance, choreography and dance entrepreneurship. The program offers a wide variety of courses in dance technique, theory, the business of dance and choreography.

This minor consists of one lower-division course, one upper-division course and 10 units of elective courses. Students must be in good academic standing to be admitted. No previous dance experience is required.

Required Lower-Division Requirement (4 units)

- DANC 280g Introduction to Dance as an Art Form Units: 4

Required Upper-Division Requirement (4 units)

- DANC 333gw Origins of Jazz Dance Units: 4 or
- DANC 363g Dancing on the Screen Units: 4

Elective Courses (10 units)

- ARTL 310 Music and Dance In Paris Salon Culture Units: 2
- DANC 103 Conditioning for Dancers Units: 2
- DANC 105 Dance Science: Analysis of Dance Movement Units: 4
- DANC 107 World Perspective on Dance Performance Units: 2
- DANC 150 Dance and New Media Units: 1, 2, 3, 4
- DANC 170 Choreography and Performance Units: 2
- DANC 171 Commercial Dance: Professional Dance Preparation Units: 1, 2
- DANC 175 Choreography for the Screen Units: 2
- DANC 180-189c Dance Technique Courses*
- DANC 190 Gaga: People Units: 1, 2
- DANC 191 Gaga: Dancers Units: 1, 2
- DANC 212g Dance in Popular Culture Units: 4

Hip Hop, Street and Social Dance Forms Minor

The Hip Hop, Street and Social Dance Forms minor delves into the historical, social and aesthetic issues of dance in the contemporary settings of entertainment, concert, vernacular and recreational forms. This minor is designed to explore the foundations and structures of hip hop, street and social dances and to introduce and orient non-major students to the language of dance in contemporary society. In the hip hop culture dance has become a major avenue of expression, acceptance and power. This minor will address issues of art, race and politics within the parameters of dance as an art form, entertainment and personal expression.

This minor consists of one lower-division course, one upper-division course and 8 units of elective courses. Students must be in good academic standing to be admitted. No previous dance experience is required.

Required Lower-Division Course (4 Units)

Herman Ostrow School of Dentistry of USC

Since 1897, the Herman Ostrow School of Dentistry of USC has provided students with unique, intensive clinical experiences using the most advanced techniques and technologies in the field. Graduates form a tightly knit community of proud alumni, provide top-notch patient care, conduct world-class research and lead the oral health field.

The school's strength is its educators. Their world-renowned expertise, combined with innovative curricula, gives students the strong clinical education they need to become great oral health professionals. The curricula include the Doctor of Dental Surgery program and postdoctoral advanced and specialty programs: endodontics, general practice residency, operative dentistry, oral and maxillofacial surgery, orofacial pain, orthodontics, pediatric dentistry, periodontology and prosthodontics. Other programs include an advanced standing program for international dentists; online master of science degrees in geriatric dentistry, orofacial pain and oral medicine, and community oral health; online graduate certificate programs in geriatric dentistry, orofacial pain, oral pathology and radiology, community oral health; and master's and doctor of philosophy degrees in craniofacial biology.

The Herman Ostrow School of Dentistry's celebrated status as a well-funded dental and craniofacial research unit allows students to enrich their education through laboratory activities and bolster their clinical skills with strong scientific foundations.

Through community service, the Herman Ostrow School of Dentistry provides valuable clinical experiences to the students while helping disadvantaged individuals improve their oral health. Serving the surrounding community helps students develop clinical competency and learn to treat all members of diverse communities with care and compassion.

Degrees Offered

The Herman Ostrow School of Dentistry awards the following degrees and certificates: Master of Science, Craniofacial Biology; Master of Science, Biomaterials and Digital Dentistry; Master of Science, Biomedical Implants and Tissue Engineering; Doctor of Philosophy, Craniofacial Biology; Doctor of Dental Surgery; Advanced Operative and Adhesive Dentistry Certificate; Advanced Orthodontics Certificate; Advanced Pediatric Dentistry Certificate; Advanced Periodontology Certificate; Advanced Oral and Maxillofacial Surgery; Advanced Orofacial Pain; and Advanced Prosthodontics Certificate. A Minor in Craniofacial and Dental Technology is also offered jointly by the Herman Ostrow School of Dentistry, the Viterbi School of Engineering and the Dornsife College of Letters, Arts and Sciences.

The Herman Ostrow School of Dentistry awards the following online degrees and certificates: Master of Science, Geriatric Dentistry; Master of Science, Orofacial Pain and Oral Medicine; Master of Science, Community Oral Health; Orofacial Pain Certificate; Oral Pathology and Radiology Certificate; Geriatric Dentistry Certificate; and Community Oral Health Certificate.

General Information

The Grading System

Grades are issued by members of the faculty to indicate to students their level of achievement and to provide information to committees given the responsibility of reviewing a student's total academic record and assigning honor or deficient status.

Newly admitted students to all programs in the school are bound by the university grading system (excluding plus/minus grades), which is detailed in the Academic Standards section of this catalogue.

Grades used by course directors of advanced clinical classes are: "Cr" — credit and "NC" — no credit. Other notations appearing on the transcript are: A — excellent; B — good; C — minimum passing in courses for graduate credit; F — failed; "IP" — course in progress indicating that the grade in a course is not issued until a subsequent trimester; "IN" — incomplete work; "MG" — missing grade; and "W" — withdraw. Students pursuing a Master of Science, Doctor of Philosophy in Craniofacial Biology, and Doctor of Dental Surgery classes should refer to the Academic Standards section of this catalogue.

Probation and Disqualification

A student evaluation policy has been developed that outlines methods by which the faculty can recognize outstanding achievements by students and identify those who have difficulty meeting the school's academic standards.

In this policy, the procedures dealing with the assignment and consequences of academic status, including academic probation and disqualification, are outlined in detail. It is hoped that the development of specific guidelines will eliminate confusion and minimize the amount of time spent in determining the student's status, thus allowing faculty and students to concentrate on their primary responsibility — the training of dental health professionals. Copies of Student Professional Performance Evaluation Committee guidelines are available online on the Dental School intranet.

DDS (including Advanced Standing Program for International Dentists)

A student will be placed on academic warning ("AW") if: (1) the GPA of a given Academic Time Unit (ATU) falls below a 2.0; (2) a failing course grade in a course of 1 unit or less is received; (3) a student does not successfully pass National Board Part I and National Board Part II or does not take the exams during the time-frame designated; and/or (4) if in the judgment of the Student Professional Performance Evaluation Committee, such a warning is warranted for other reasons, such as poor attendance or consistent tardiness.

A student will be placed on academic probation ("AP") if: (1) a failing grade is received in 2 or more units completed in one ATU; (2) a second consecutive academic warning is warranted: (2) two conditions that justify academic warning are met in a single ATU or if a single condition is met twice in an ATU; and/or (4) a student receives a failing score or an F in a module that results in an MG. A first-year student in trimesters I, II or III will be placed on academic probation if: (1) the quality of preclinical work is unsatisfactory as reflected by a failing score or an F in a module; (2) the quality of preclinical work is poor enough to jeopardize the student's timely transition to clinic with the rest of the class; (3) warranted by other factors related to the quality of preclinical/clinical work such as poor attendance, unprofessional behavior and/or poor performance in written examinations; (4) in the judgment of the Student Professional Performance Evaluation Committee, probation is warranted by other academic factors; and/or (5) recommended by the group practice director, due to the quality of clinical work.

A student may be placed on clinical probation upon recommendation of the group practice director, associate dean for Clinical Affairs, or any other faculty who have supervised the student's clinical activities if a failing score is received in any of the graded categories of group practice performance, or, in the judgment of the group practice director, the associate dean for Clinical Affairs, or any other faculty who have supervised the student's clinical activities, probation is warranted by other factors related to the delivery of health care or clinical accomplishment.

A student will be considered for disqualification if: (1) at the end of any trimester during the first year (trimesters I, II, III), a student's continued lack of preclinical accomplishment is significant enough to suggest a deterioration of preclinical skills; (2) a second academic probation is warranted; (3) a failing grade is not reconciled; (4) at the end of the academic year the grade point average for the preceding year is below 2.0; (5) academic probation is warranted while repeating a trimester on probation; (6) a deficiency in any area is determined by the Student Professional Performance Evaluation Committee to be

insurmountable; (7) at the end of the second trimester of the Advanced Standing Program for International Dentists (ASPID), the cumulative average is less than 2.0; (8) it is recommended by the group practice director, based on severe and irreconcilable deficiencies relating to the quality and/or quantity of patient treatment; and/or (9) at the end of any trimester following trimester VI, a student's ongoing lack of clinical accomplishment is significant enough to suggest a deterioration of skills and/or inadequate treatment of patients assigned to his/her care.

Advanced Clinical Programs and Online Master of Science Degrees and Online Certificate Programs

A student will be placed on academic probation if a failing grade is received in any course or if, in the judgment of the program director, a student's performance warrants such status due to academic or other factors. A student may be disqualified if: (1) the stipulations of a probationary period are not met by the required deadline; (2) a failing grade is not reconciled in the period specified by the course director; (3) if a student is placed on second academic probation; and/or (4) a deficiency in any area is acquired that is determined by the program director to be insurmountable. A student who is placed on academic probation a second time can continue in the program only with the approval of the program director and the Advanced Student Professional Performance Evaluation Subcommittee.

Advanced Clinical Programs Graduation Requirements

A minimum program GPA of 3.0 is required to graduate from the following advanced clinical dentistry programs: endodontics, operative and adhesive dentistry, orofacial pain, periodontology and prosthodontics.

Honor Status

The Herman Ostrow School of Dentistry recognizes excellence in achievement by assigning special honor status during the course of study and by presentation of awards upon graduation.

Dean's List

Students who complete all course work by a prescribed deadline and earn a grade point average of 3.5 or above for a trimester are eligible for and will be considered for placement on the Dean's List for that ATU. Placement is not automatic and is not based on any single marker of performance. Students shall not be placed on the Dean's List if they are on academic warning, academic probation or continued academic probation at any time during that trimester, or are under active ethics sanctions as a result of having been found guilty of or engaged in a direct resolution of an ethics violation.

Graduation Awards

There are numerous awards made each year at graduation to recognize excellence in members of the graduating doctoral, dental hygiene and ASPID classes. A complete list is available at the Herman Ostrow School of Dentistry.

Voluntary Withdrawal/Leave of Absence

The Herman Ostrow School of Dentistry recognizes that in some special instances it may be necessary or beneficial for a student to interrupt or discontinue dental education. A student wishing to withdraw from School or request a leave of absence must contact the Office of Academic Affairs for procedures to be followed. An approved leave of absence will not be granted for more than one year.

Students at the Herman Ostrow School of Dentistry who have not been formally dropped by the school, are considered enrolled each term unless they have submitted a letter of intent to withdraw. A student's verbal indication that he or she intends to withdraw or failure to settle a fee bill are not sufficient to eliminate the student from class rosters. Final course grades will be collected for students who do not have a letter of intent to withdraw on file with the Office of Academic Affairs.

A student who withdraws at any time during the first three weeks of a trimester will receive no grades for enrolled courses. A student who withdraws after three full weeks of an Academic Time Unit (ATU) will receive a mark of "W" for all enrolled courses not completed. Withdrawal is not permitted after the 12th week of a trimester.

Family Educational Rights and Privacy Act

The University of Southern California recognizes and acts in full compliance with regulations set in accordance with the Family Educational Rights and Privacy Act of 1974 (The Buckley Amendment). A student may have access to all records about him or her maintained by the university except those considered confidential under the act. Students of the School of Dentistry wishing to review records or to appeal for a change in those records should contact the Herman Ostrow School of Dentistry or USC Registrar. A small charge may be made to cover the time and costs of duplication of the record.

Tuition and Fees (Estimated)

Tuition at the Herman Ostrow School of Dentistry is charged on a flat fee basis for enrollment in the regular degree and advanced certificate programs of the school. Exceptions do not apply to students who have courses waived based on their prior education. In such cases, students are charged the standard flat fee for the program in which they are enrolled.

Auditors pay the regular tuition rate. Auditors are not required to participate in class exercises (discussions and examinations); they receive no grades or credit.

The information outlined here is for Herman Ostrow School of Dentistry fees and tuition deposits only. For information about Herman Ostrow School of Dentistry tuition and university fees, refer to the Tuition and Fees (Estimated), Fall 2021 section of this catalogue. The university reserves the right to assess new fees or charges as it may determine.

Processing Fee (not refundable):	
Domestic applicants	85
Graduates of foreign dental schools or students requiring a student visa	145
Commitment Deposit	
Dentistry	3,000
International Dental	3,000
Advanced Dental	1,000
Pre-Tuition Payment (refundable in accordance with the refund policy)	1,500

Mandatory Fees (School of Dentistry fees only; for other fees, refer to the Tuition and Fees (Estimated), Fall 2020 section of this catalogue.)	
CDA/ASDA Dues	96
Doctoral dental and Advanced Standing Program for International Dentists students only; fall only.	
Gown Usage Fee	165
Disability Insurance (Doctoral, Advanced Standing Program for International Dentists and Advanced Certificate)	53
Scrubs (first year only)	420

Financial Aid

Detailed information concerning financial aid programs available to dental students can be obtained by contacting the Herman Ostrow School of Dentistry of USC Office of Financial Aid at (213) 740-2861, uscsdfa@usc.edu or visit dentistry.usc.edu/admission.

Minor

Craniofacial and Dental Technology Minor

The Herman Ostrow School of Dentistry, the Viterbi School of Engineering Department of Biomedical Engineering and the Dornsife College of Letters, Arts and Sciences Department of Biological Sciences jointly offer the minor in craniofacial and dental technology. This minor is designed to prepare engineering, pre-dental, pre-medical and biological sciences undergraduates to enter the dental biotechnology industry as well as to introduce them to recent innovations in craniofacial sciences and therapeutics. The course work introduces students to concepts in dental and craniofacial sciences and technology, tissue engineering, molecular biology, genetics, biochemistry and biotechnology as well as applications to dental diagnostics, imaging and dental therapies (dental implants, restorative dentistry, salivary diagnostics).

This minor requires a minimum of 16 units outside your home department; further, at least 16 units must be unique to the minor.

Please see a biomedical engineering, biological sciences or Herman Ostrow School of Dentistry adviser for specific program requirements.

Core Required Courses, Upper Division

- DENT 412 Fundamentals of Craniofacial and Dental Technology Units: 3
- BISC 320Lg Molecular Biology Units: 4
- BISC 325 Genetics Units: 4 *
- BME 410L Introduction to Biomaterials and Tissue Engineering Units: 4 *

Total core units: 15

Electives

Enroll in at least two courses from the following to complete at least 16 units outside your home department; further, at least 16 units must be unique to the minor:

- BISC 330L Biochemistry Units: 4 *
- BISC 403 Advanced Molecular Biology Units: 4 *
- BISC 406L Biotechnology Units: 4 *
- BISC 410 Applications of Molecular Biology to Medicine Units: 4 *
- BISC 435 Advanced Biochemistry Units: 4 *
- BME 404 Orthopaedic Biomechanics Units: 4 *
- BME 415 Regulation of Medical Products Units: 2
- BME 416L Development and Regulation of Medical Products Units: 4
- BME 451L Fundamentals of Biomedical Microdevices Units: 4 *
- DENT 221 Introduction to Dentistry Units: 1
- ENGR 305 Engineering Biology Matters Units: 3

- HP 340Lg Health Behavior Statistical Methods Units: 4
- HP 350L Health Behavior Research Methods Units: 4
- MASC 310 Materials Behavior and Processing Units: 4
- RXRS 416 Medical Products: From Idea to Market Units: 4

Total elective units: 3-8

Note:

**Prerequisite required*

Master's Degree

Advanced Orofacial Pain and Oral Medicine (MS)

The Master of Science degree in orofacial pain and oral medicine program consists of a 36-month hybrid program (online and face-to-face) leading to a master's degree in orofacial pain and oral medicine (OFPOM). The curriculum is designed to provide practicing dentists with advanced knowledge and training in the areas of orofacial pain and oral medicine including sleep medicine.

The program consists of a series of 14 online didactic courses where the students will gain knowledge about the underlying science as well as the diagnosis, pathobiology and treatment of different oral and maxillofacial diseases and disorders. In addition to these courses, the student will attend USC for two weeks each summer during the three-year period for an additional three face-to-face assessment courses where they will be tested for knowledge acquisition using a set of objective standardized clinical examinations, oral interviews and written examinations. They will also be required to prepare a final portfolio of cases and conduct and present a research project report. During their visits to USC, the residents will gain experience diagnosing and treating patients in the USC OFOPM center.

During the year, the residents will attend weekly video conferences where online students are required to analyze, diagnose and prepare treatment plan cases that are posted for analysis. These cases will cover the following diseases: temporomandibular disorders; infectious, dysplastic, neoplastic proliferative, erosive and ulcerative oral and pharyngeal mucosal diseases. Students will also learn about and work with patients who have various salivary, neurogenic, osseous, and odontogenic infections, tumors and diseases including oral neuropathic pain, oral spasticity, migraine, tension type and chronic daily headache and sleep apnea disorders.

Required Courses

- GDEN 733 Research Methodology Units: 2
- OFPM 702a Soft Tissue Disease for Dental Residents Units: 1
- OFPM 702b Soft Tissue Disease for Dental Residents Units: 2
- OFPM 704 Bony Pathology, Radiology and Advanced Imaging for Dental Residents Units: 1
- OFPM 705 Neurogenic Based Oral and Facial Pains for Dental Residents Units: 2
- OFPM 706 TMD, Orthopedics, Rheumatology and Physical Therapy for Dental Residents Units: 2
- OFPM 707 Pharmacology Series for Dental Residents Units: 2
- OFPM 710a Knowledge Assessment for OFPOM Residents Units: 1
- OFPM 710b Knowledge Assessment for OFPOM Residents Units: 1
- OFPM 721 Neurosciences for Dental Residents Units: 2
- OFPM 722 Internal Medicine and Systemic Disease for Dental Residents Units: 2
- OFPM 723 Systems Physiology, Motor Disorders and Sleep Apnea for Dental Residents Units: 2
- OFPM 724 Psychological and Psychometric Assessment for Dental Residents Units: 2
- OFPM 725 Epidemiology, Nutrition and Aging for Dental Residents Units: 2
- OFPM 726 Immunology and Immunosuppression for Dental Residents Units: 2
- OFPM 727 Infectious Disease, Oral Microbiology and Virology for Dental Residents Units: 2
- OFPM 729a Capstone Project for OFPOM Residents Units: 0.5
- OFPM 729b Capstone Project for OFPOM Residents Units: 0.5
- OFPM 729c Capstone Project for OFPOM Residents Units: 0.5
- OFPM 729d Capstone Project for OFPOM Residents Units: 0.5
- OFPM 730a Case Portfolio Preparation by Online OFPOM Residents Units: .5
- OFPM 730b Case Portfolio Preparation by Online OFPOM Residents Units: .5
- OFPM 730c Case Portfolio Preparation by Online OFPOM Residents Units: .5
- OFPM 730d Case Portfolio Preparation by Online OFPOM Residents Units: .5
- OFPM 730e Case Portfolio Preparation by Online OFPOM Residents Units: .5

Total units: 32.5

Biomaterials and Digital Dentistry (MS)

The Herman Ostrow School of Dentistry offers a 24-month program leading to a Master of Science (MS) in Biomaterials and Digital Dentistry (BMDD). The MS in Biomaterials and Digital Dentistry provides dental professionals with in-depth knowledge in dental material properties, characterization, biological interactions of dental adhesive systems, composite resins, ceramics, implants, 3D printing, digital scanning and Computer-Aided Design/ Computer-Aided Manufacturing (CAD/CAM).

The MS BMDD also places an academic focus on skills to master cutting-edge digital technologies for improving dental health. Developing skills in cutting-edge digital technologies is an emphasis and strength of the program. The MS BMDD program will prepare graduates for future careers in dental research and academic positions, industry jobs, and public service in Dental Healthcare management.

The admissions requirements include a DDS, DMD or equivalent degree (for international dentist applicants), three letters of recommendation, curriculum vitæ, Educational Credential Evaluators (ECE) Report and statement of purpose. The GRE is not required for the MS in BMDD program. For non-native English speakers, an Internet-based TOEFL (iBT) test score of 90 or above is required, with 20 or above on each section (reading, listening, speaking, and writing). The exam score should be current (less than two years old). The MS BMDD is only available to current residents on USC Operative and Adhesive Dentistry and Prosthodontics. Please refer to the Admissions section of the Herman Ostrow School of Dentistry for more information.

All students are required to complete an original research project and a master's thesis following a thesis protocol approved by their advisory committee. An advisory committee normally includes three faculty members, who will establish thesis requirements to be completed by each student.

Required Courses

- BMDD 588a Digital Technology Applied to Dentistry Units: 3
- BMDD 588b Digital Technology Applied to Dentistry Units: 3
- BMDD 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
  (3 units required)
- BMDD 594a Master's Thesis Units: 2
- BMDD 594b Master's Thesis Units: 2
- BMDD 594z Master's Thesis Units: 0
- DMAT 701 Advanced Biomaterials Units: 2
- OPER 704a Operative Dentistry and Biomaterials Literature Review Units: 1

- OPER 704b Operative Dentistry and Biomaterials Literature Review Units: 1
- OPER 704c Operative Dentistry and Biomaterials Literature Review Units: 1
- OPER 704d Operative Dentistry and Biomaterials Literature Review Units: 1
- OPER 705L Dental Photography Units: 1
- OPER 735aL Research Methodology Units: 2
- OPER 735bL Research Methodology Units: 2

Total units: 24

Biomedical Implants and Tissue Engineering (MS)

The Master of Science in "Biomedical Implants and Tissue Engineering (BITE)" is an intense academic program designed to enhance the knowledge and critical thinking skills of graduate students interested in biological and clinical aspects of osseointegration and clinical applications of tissue engineering sciences. Through rigorous review of the scientific literature, graduate students are expected to gain advanced knowledge of clinical and scientific studies involving dental implants and related procedures required to regenerate oral and craniofacial tissues. These studies are intended to form the fundamental basis to pursue evidence-based practice for clinicians, as well as conduct scientific studies for clinical researchers. This academic degree is suitable for those, who are interested to gain expertise in dental implant therapeutics and regenerative sciences. In addition to the didactic courses and gaining comprehensive understanding with relevant scientific literature, graduate students are required to design and complete a scientific research project, under the supervision of an academic committee, composed of mentors with relevant expertise. The resulting data from the scientific study is expected to be prepared in manuscript format and submitted for publication in a peer-reviewed journal.

The BITE MS program is 6 trimesters (24 months) in length. The program is a purely academic program and there is no clinical patient care component to this program.

Required Courses

- BITE 582 Introduction to Biomedical Implants Units: 3
- BITE 583 Clinical Applications of Tissue Engineering Units: 4
- BITE 584 Evidence Based Practice Units: 3
- BITE 585 Biomaterial and Protocols Units: 3
- BITE 586 Current Trends in Biomedical Implants and Tissue Engineering Units: 3
- BITE 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 (4 units)
- BITE 594a Master's Thesis Units: 2
- BITE 594b Master's Thesis Units: 2
- BITE 594z Master's Thesis Units: 0

Community Oral Health (MS)

The online Master in Community Oral Health is a program with a total 16 courses (30 units), specifically designed for the professional who wants to improve skills and gain expertise to ensure the best care for patients within their communities. The curriculum is designed with a series of didactic courses where students will gain knowledge about health sciences and education, programs assessment, planning and administration, epidemiology, environmental and cultural issues, social and behavioral sciences. The student will select electives in one of two areas: vulnerable populations and community health care, or project administration. The goal of this postdoctoral two-year master's program is to give health care providers, educators and administrators and advanced didactic and evidence-based education in the field of community health.

Core Courses

(24 units)

- COH 593a Capstone Project Units: 2
- COH 593b Capstone Project Units: 2
- COH 701 Community Health Sciences Units: 2
- COH 702 Social and Behavioral Sciences Units: 2
- COH 703 Community Health Program Planning and Implementation Units: 2
- COH 704 Environmental Health Sciences Units: 3
- COH 705 Research and Biostatistics in Healthcare Units: 2
- COH 706 Foundations and Strategies in Health Education Units: 2
- COH 707 Epidemiology Units: 2
- COH 708 Community Health Science Administration, Assessment and Evaluation Units: 2
- COH 711 Practicum 1 Units: 1
- COH 712 Practicum 2 Units: 1
- COH 717 Practicum 3 Units: 1

Elective Courses

Select three courses (total of 6 units)

- COH 709 Community Health Program Execution and Communication Units: 2
- COH 710 Health Assessment Units: 2
- COH 713 Health Education and Promotion Units: 2
- COH 714 Community Health Funding and Support Units: 2
- COH 715 Community Health Practice Standards Units: 2
- COH 716 Healthcare Communication Technology Units: 2

Geriatric Dentistry (MS)

The Master of Science in Geriatric Dentistry online program consists of 30.5 units of course work delivered online and in person leading to a master's degree in geriatric dentistry. The curriculum is designed to prepare students to work in the area of geriatric dentistry. The program consists of a series of didactic courses where the students will gain in-depth knowledge about older adults from a variety of perspectives that will include learning about the aging process and how it affects and is affected by social, behavioral and health factors commonly seen with aging. The program will focus on the most common medical and oral health conditions seen in older adults including oral lesions and orofacial pain conditions and their treatments, as well as cognitive changes, mental disorders, and social factors that will impact and thus require adjustments to oral health care delivery.

During the year, the students will attend weekly video conferences where they will discuss lesions most likely to be found in older adults or composite patient case scenarios, during which the patient's medical, pharmacologic and psychologic profiles and social status is taken into consideration in determining treatment modifications.

All master students are required to choose and finish a capstone project and 18 portfolio cases during the program duration. The students will attend USC for 8-10 days during two summer trimesters for knowledge assessment courses. As part of the graduation requirements, the students are required to successfully defend their capstone project and portfolio cases during their last summer term and pass all the courses with a grade point average of 3.0 or more.

Required Courses

- GDEN 710 Knowledge Assessment for GDEN Students Units: 1
- GDEN 712a Capstone Research Project for GDEN Students Units: .5
- GDEN 712b Capstone Research Project for GDEN Students Units: .5
- GDEN 712c Capstone Research Project for GDEN Students Units: .5
- GDEN 712d Capstone Research Project for GDEN Students Units: .5
- GDEN 713 Common Systemic Conditions in Older Patients Units: 2
- GDEN 714 Topics in Gerontology Units: 2
- GDEN 715 Geriatric Dentistry Issues Units: 2
- GDEN 722 Internal Medicine and Systemic Disease for Dental Residents Units: 2

- GDEN 725 Epidemiology, Nutrition and Aging for Dental Residents Units: 2
- GDEN 730 OFPM Case Portfolio Preparation for Dental Residents Units: .5
  (1 unit required)
- GDEN 731 GDEN Case Portfolio Preparation for Dental Residents Units: .5
  (1 unit required)
- GDEN 732 Case Portfolio Defense for GDEN Students Units: .5
- GDEN 733 Research Methodology Units: 2
- OFPM 702a Soft Tissue Disease for Dental Residents Units: 1
- OFPM 702b Soft Tissue Disease for Dental Residents Units: 2
- OFPM 704 Bony Pathology, Radiology and Advanced Imaging for Dental Residents Units: 1
- OFPM 705 Neurogenic Based Oral and Facial Pains for Dental Residents Units: 2
- OFPM 707 Pharmacology Series for Dental Residents Units: 2
- OFPM 710a Knowledge Assessment for OFPOM Residents Units: 1
- OFPM 723 Systems Physiology, Motor Disorders and Sleep Apnea for Dental Residents Units: 2
- OFPM 726 Immunology and Immunosuppression for Dental Residents Units: 2

Total units: 30.5

Graduate Certificate

Advanced Orthodontics Certificate

The advanced orthodontics certificate program is a 34-month course of study leading to a certificate in orthodontics. The program in orthodontics is accredited by the Commission on Dental Accreditation of the American Dental Association, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education. Upon completion of all requirements, the graduate is eligible for examination and certification by the American Board of Orthodontics.

The program has as its primary mission the preparation and training of residents for clinical practice in the specialty of orthodontics. This is achieved through a broad, in-depth curriculum designed to develop proficiency in clinical orthodontics with a solid foundation in fundamental and advanced biological and mechanical principles. Clinical training is evidence-based and includes treatment of orthognathic, esthetic, interdisciplinary, interceptive, growth modification and all types of malocclusion cases. Research is an integral part of the program and the student must complete an original research project. Preparation for a successful orthodontic career includes formal courses in orthodontic practice management, and current orthodontic technology and techniques.

Required Courses

- ADNT 710 Internship: Dental Education Units: 1, 2, 3, 4, 5
- AMED 750a Physical Evaluation and Anesthesia Units: 2
- AMED 750b Physical Evaluation and Anesthesia Units: 2
- ORTH 674 Clinical and Molecular Bone Biology Units: 2
- ORTH 701a Cephalometrics: Growth and Development Units: 2, 3, 4
- ORTH 701b Cephalometrics: Growth and Development Units: 2, 3, 4
- ORTH 702 Seminar: Review of the Orthodontic Literature Units: 5
- ORTH 703a Seminar: Advanced Orthodontics Units: 2, 3, 4, 5, 6, 7, 8 each
- ORTH 703b Seminar: Advanced Orthodontics Units: 2, 3, 4, 5, 6, 7, 8 each
- ORTH 703c Seminar: Advanced Orthodontics Units: 2, 3, 4, 5, 6, 7, 8 each
- ORTH 703d Seminar: Advanced Orthodontics Units: 2, 3, 4, 5, 6, 7, 8 each
- ORTH 703e Seminar: Advanced Orthodontics Units: 2, 3, 4, 5, 6, 7, 8 each
- ORTH 703f Seminar: Advanced Orthodontics Units: 2, 3, 4, 5, 6, 7, 8 each
- ORTH 703h Seminar: Advanced Orthodontics Units: 2, 3, 4, 5, 6, 7, 8 each
- ORTH 703i Seminar: Advanced Orthodontics Units: 2, 3, 4, 5, 6, 7, 8 each
- ORTH 704a Seminar: Orthodontics in Theory and Practice Units: 2
- ORTH 704b Seminar: Orthodontics in Theory and Practice Units: 2
- ORTH 704c Seminar: Orthodontics in Theory and Practice Units: 2
- ORTH 705a Orthodontic Practice Management Units: 2
- ORTH 705b Orthodontic Practice Management Units: 2
- ORTH 705c Orthodontic Practice Management Units: 2
- ORTH 706 Surgical Orthodontics Units: 2
- ORTH 707 Interdisciplinary Aesthetic Treatment Units: 2
- ORTH 708 Information Technology in Orthodontic Practice Units: 2
- ORTH 709 Advanced Information Technology in Orthodontic Practice Units: 2
- ORTH 721 Biomechanics and Orthodontic Technic Units: 8
- ORTH 744 Statistical Methods and Research Design in Orthodontics Units: 2
- ORTH 751a Clinic: Advanced Orthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- ORTH 751b Clinic: Advanced Orthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- ORTH 751c Clinic: Advanced Orthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- ORTH 751d Clinic: Advanced Orthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- ORTH 751e Clinic: Advanced Orthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- ORTH 751f Clinic: Advanced Orthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- ORTH 751h Clinic: Advanced Orthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- ORTH 751i Clinic: Advanced Orthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- PERI 752 Interdisciplinary Treatment: An Orthodontic Perspective Units: 2

Community Oral Health Certificate

The online university certificate in Community Oral Health is a program with a total of six courses (13 units), specifically designed for the professional who wants to improve skills and gain expertise to ensure the best care for patients within their communities.

The curriculum is designed with a series of didactic courses in which students will gain knowledge about health sciences and education, programs assessment, planning and administration, epidemiology, environmental and cultural issues, social and behavioral sciences.

The goal of this one-year certificate program is to give health care providers, educators and administrators an advanced didactic and evidence-based education in the field of community oral health.

Certificate in Community Oral Health

- COH 701 Community Health Sciences Units: 2
- COH 702 Social and Behavioral Sciences Units: 2
- COH 703 Community Health Program Planning and Implementation Units: 2
- COH 704 Environmental Health Sciences Units: 3
- COH 705 Research and Biostatistics in Healthcare Units: 2
- COH 706 Foundations and Strategies in Health Education Units: 2

Geriatric Dentistry Graduate Certificate

The graduate certificate in geriatric dentistry program is designed to prepare practicing dentists and dental hygienists who have already completed their professional training in general or advanced dentistry or dental hygiene to acquire a greater understanding of gerontology and geriatrics. Dental hygienists must have a minimum of a baccalaureate degree in order to apply for the program. The program consists of a total of 12 units of course work delivered online and in-person in which the students will gain knowledge about older adults from a variety of perspectives, focusing on those topics that will have a direct impact on professional practice.

Clinical privilege status is not required for any of the course work. Students admitted to the non-degree certificate program are expected to enroll each semester until the program is completed.

There are seven required courses (six online and one residential) and no electives. As part of the required curriculum, all students will attend USC for a two-week period during the summer trimester following completion of the didactic courses, for a knowledge assessment course (GDEN 710). This course will consist of reviews, practical demonstrations and assessment activities.

Required Courses

- GDEN 710 Knowledge Assessment for GDEN Students Units: 1
- GDEN 713 Common Systemic Conditions in Older Patients Units: 2
- GDEN 714 Topics in Gerontology Units: 2
- GDEN 715 Geriatric Dentistry Issues Units: 2
- GDEN 722 Internal Medicine and Systemic Disease for Dental Residents Units: 2
- GDEN 725 Epidemiology, Nutrition and Aging for Dental Residents Units: 2
- GDEN 731 GDEN Case Portfolio Preparation for Dental Residents Units: .5

(1 unit required)

Total units: 12

Oral Pathology and Radiology Certificate

The Hybrid-Online Certificate in Oral Pathology and Radiology is a program with a total of eight courses (12 academic units), specifically designed for the practicing professional who wants the knowledge to improve skills and gain expertise to in the field of Oral Pathology and Radiology. The certificate curriculum is designed with a series of didactic courses in which students will gain knowledge about the diagnosis, pathobiology and treatment of different oral diseases in the field of Oral Pathology and confidence in Oral Radiology and the use of conventional and advanced imaging studies for the diagnostic process. The goal of this postdoctoral one-year certificate program is to give practicing dentist or physician advanced didactic and evidence-based education in the field of oral diagnostics, specifically oral pathology and radiology. With the onset of new diseases to dentistry and advancements in diagnostics and therapeutics in the last few decades, many clinicians may feel ill-prepared to comprehensively manage patients with oral lesions or patients with oral manifestations of complex medical conditions. Therefore, this program taught by expert USC Ostrow School of Dentistry faculty is designed to provide clinicians with the knowledge and confidence necessary for patient care.

The students participate in weekly live online sessions with faculty and other program residents, ensuring a collaborative and social learning experience. There are two to three courses per trimester, with 2-4 streaming video lectures for viewing each week. After each video lecture students complete an associated online quiz (composed of multiple choice, short answer or fill-in questions). The program is primarily online but also includes a 10-day practical training conducted on-campus at USC, with skills development and competence evaluation.

Mandatory courses

All courses on this program are required.

- OFPM 707 Pharmacology Series for Dental Residents Units: 2
- OPR 701 Bone Pathology and Oral and Maxillofacial Radiology Units: 1
- OPR 702 Principles and Practice of Oral Medicine Units: 1
- OPR 703 General and Systemic Human Pathology Units: 1
- OPR 704 Oral Pathology and Maxillofacial Medicine Units: 2
- OPR 708 Diagnostic Radiology Units: 2
- OPR 730 Clinical Cases in Oral Pathology and Radiology Units: 2
- OPR 732 Knowledge Assessment Units: 1

Orofacial Pain Certificate

The Certificate in Orofacial Pain is a hybrid program (face-to-face and online classes) with a total of nine courses (12.5 academic units), specifically designed for the practicing dentist who wants to improve skills and gain expertise to deliver the best care for patients with complex conditions. The certificate curriculum is designed with a series of didactic courses in which students will gain knowledge about the diagnosis, pathobiology and treatment of different oral diseases in the field of orofacial pain, including masticatory musculoskeletal pain, neurogenic orofacial pain, temporomandibular disorders, headaches, orofacial motor disorders including orofacial dystonias and bruxism, intraoral, intracranial, extracranial and systemic disorders that cause orofacial pain.

Students will participate in weekly live webinar sessions with the faculty and other residents, ensuring a collaborative and social learning experience. There are two-three courses per trimester, with two-four streaming video lectures for viewing each week. After each video lecture students complete an associated online quiz (comprising multiple choice, short answer or fill-in questions). The program is primarily online but also includes a 10-day practical training program conducted at the USC campus, with skills development and competence evaluation. At the end of the program, the students present and defend a case portfolio.

This program is consistent with the global vision of the University of Southern California, and looks for a worldwide presence. All students will need English language proficiency, but we will provide support for our Spanish speaking students. This is achieved by providing lectures with the option of closed captioning in Spanish and live-webinars both in English and Spanish.

Course List

Course List of the Orofacial Pain Certificate

- OFP 705 Neurogenic Based Oral and Facial Pains Units: 2
- OFP 706 TMD, Orthopedics, Rheumatology, and Physical Therapy Units: 2
- OFP 707 Pharmacology Series Units: 2
- OFP 710 Knowledge Assessment Units: 1
- OFP 723 Systems Physiology, Motor Disorders, and Sleep Apnea Units: 2
- OFP 724 Psychological and Psychometric Assessment Units: 2
- OFP 730a Case Portfolio Preparation Units: .5
- OFP 730b Case Portfolio Preparation Units: .5
- OFP 730c Case Portfolio Preparation Units: .5

Doctoral Degree

Dental Surgery (DDS)

The Doctor of Dental Surgery (DDS) program covers 11 consecutive 14-week trimesters. The course of study maximizes the interrelationship of all basic sciences and clinical detail sciences required by the Commission on Dental Accreditation of the American Dental Association.

USC's reputation for excellent preparation of its graduates for private practice has been enhanced by curriculum changes that permit students to begin clinical experience in their first year. At the same time, opportunity and encouragement are given to those who might elect to pursue careers in teaching and research.

Admission

The Herman Ostrow School of Dentistry of USC admits 144 students each year for the curriculum leading to the Doctor of Dental Surgery. Admission to the school is granted through the Office of Admissions, which receives and processes all applications, evaluates credentials and notifies applicants who qualify for entrance by forwarding letters of acceptance. Students are selected by the Admissions Committee, which bases its decision on consideration of an applicant's personal qualities, aptitude and superior scholarship necessary for the successful study and practice of dentistry. Candidates who have received or will receive a baccalaureate or higher degree will be considered more favorably than applicants who have fulfilled only minimum requirements. As a precondition of enrollment, accepted students must undergo a background screening and provide evidence of sound health and meet the school's health requirements.

Admission information may be obtained by mail, online or in person. Address inquiries to: Herman Ostrow School of Dentistry of USC, Office of Admissions, 925 W. 34th Street, Room 201, Los Angeles, CA 90089-0641, (213) 740-2841, email: uscsdadm@usc.edu or access the school's Website at dentistry.usc.edu.

Admission Requirements

Minimum entrance requirements include: (1) graduation from an accredited secondary school, with credit for at least 12 academic units, including three in English, three in one laboratory science course, two in one foreign language and two in college preparatory mathematics; (2) a minimum of 60 semester units, or the equivalent completed or in progress, at the time of application, in an accredited college or university in the United States or Canada. A baccalaureate or higher degree is preferred. No more than 60 semester hours earned at a community college will be accepted and preference is given to candidates who complete the science prerequisites at a four-year institution; (3) required courses, semester hours with laboratory required: 8 units each — one year's completed course — of general biology, inorganic/general chemistry, organic chemistry, physics; other courses: English composition (8 units or one year), philosophy, history or fine arts (8 units or one year). All prerequisite course work must be completed with a grade of "C" or better; (4) it is strongly suggested that students take additional upper division courses. Biochemistry, human or comparative anatomy, embryology, histology, genetics, physiology, microbiology, immunology and economics are examples of recommended courses; (5) all students who apply for admission to the School of Dentistry are required to take the Dental Admission Test (DAT), given under the auspices of the Council on Dental Education of the American Dental Association. The Dental Admission Test must be taken no later than February 1 of the year for which formal application is made.

To expedite the admissions process, it is recommended that the DAT be taken during a testing period before filing formal application through the Associated American Dental Schools Application Service (AADSAS). Test scores more than three years old will not be accepted. Applicants should check with the Dental Admissions Office. Full information about the test is sent to all applicants upon request, or can be obtained from the Division of Educational Measurements, Council on Dental Education, American Dental Association, 211 East Chicago Avenue, Chicago, IL 60611. No action can be taken on the application until DAT scores have been received.

(6) An interview at the School of Dentistry is required of all applicants who appear qualified for consideration as determined by the Office of Admissions; (7) complete transcripts of undergraduate and graduate work, including degree notations, must be on file in the Office of Admissions by July 15 prior to enrolling; (8) residency requirements: as a private institution, USC seeks a culturally and geographically diverse population. Therefore, out-of-state applicants are evaluated and selected based on the same criteria as California residents.

No applicant will be denied admission on the basis of race, religion, creed or disability. All admitted students must provide evidence that functional health is sufficient to meet professional demands, both in the student role and as an entry-level practitioner.

Application Procedure

(1) An application form should be obtained from the Associated American Dental Schools Application Service (AADSAS) online at adea.org. (2) The AADSAS application form must be completed and returned to AADSAS. USC requires that the application be received by AADSAS no later than February 1 of the year in which enrollment is anticipated. Early application and file completion is recommended. Do not send the application form to USC directly. In addition to submitting the ADEA AADSAS application, applicants must submit DAT scores and one official transcript from every college/university attended directly to AADSAS. Application evaluation cannot begin until these items are received by ADEA AADSAS. (3) Applicants are required to pay a nonrefundable $85 processing fee, which should be forwarded directly to the Ostrow Office of Admissions (international students requiring a student visa must submit a $145 processing fee). (4) Notification from the Office of Admissions will be sent, indicating that the application has been received from AADSAS. (5) Candidates who are being seriously considered for acceptance will be sent an invitation for an interview and will be required to submit additional information. No interview can be granted unless the file is complete, including DAT scores. (6) Notification of acceptance will be sent by the Office of Admissions sometime after December 1. (7) A non-refundable commitment fee of $2,000 is required from admitted students by the deadline indicated in the acceptance letter to hold a place in the entering class. A second commitment fee of $1,000 is required by the deadline in their acceptance letter. These non-refundable fees will be applied toward tuition upon enrollment. (8) Preregistration for the first year dental class is held before orientation. (9) All entering students are required to prepay $3,000 toward the initial tuition by their deadline. (10) As a precondition of enrollment, accepted students undergo a background screening conducted by Certiphi Screening, Inc. to help ensure patient safety and compliance with state laws and regulations and provide evidence of sound health and meet the school's health requirements.

Orientation

Students who have been accepted into the predoctoral dental program and who have reserved their place in the class will receive information on orientation during the first two weeks in July.

Orientation takes place prior to the first week of classes. The purpose of the orientation program is to acquaint incoming students with the school, its policies, programs, faculty and facilities. Incoming students receive financial counseling and receive their initial equipment issue during this orientation period.

Graduation Requirements

A student is eligible for the Doctor of Dental Surgery after successfully attaining the qualitative and quantitative level expected in the doctoral curriculum, specifically: has met the 2.0 GPA requirement for graduation; has no conditions existing at the termination of the final academic time unit that would qualify him or her for academic probation, clinical probation or academic disqualification; has no marks of "F," "IN" or "MG"; has passed Part I and Part II of the National Dental Board Examinations; has demonstrated the personal characteristics expected of a professional; has fulfilled his or her financial obligations as well as all other obligations and requirements for graduation.

In addition to meeting the academic requirements indicated above, students must have a completed administrative clearance form on file in the Office of Academic Affairs before a degree can be conferred. This administrative clearance indicates that the student has met other obligations to the university and to the student's patients.

Curriculum

The curriculum leading to the Doctor of Dental Surgery degree undergoes constant change to meet the challenges of modern dental practice.

Doctor of Dental Surgery — Learner-Centered Curriculum

Required Courses

- DPBL 501a Dental Problem Based Learning — Human Structure I Units: 3
- DPBL 501b Dental Problem Based Learning — Human Structure I Units: 3
- DPBL 501c Dental Problem Based Learning — Human Structure I Units: 3
- DPBL 502a Dental Problem Based Learning — Human Function I Units: 8
- DPBL 502b Dental Problem Based Learning — Human Function I Units: 8
- DPBL 502c Dental Problem Based Learning — Human Function I Units: 8
- DPBL 503a Dental Problem Based Learning — Human Behavior I Units: 2
- DPBL 503b Dental Problem Based Learning — Human Behavior I Units: 2
- DPBL 503c Dental Problem Based Learning — Human Behavior I Units: 2
- DPBL 504a Dental Problem Based Learning — Human Clinical Dentistry I Units: 4
- DPBL 504b Dental Problem Based Learning — Human Clinical Dentistry I Units: 4
- DPBL 504c Dental Problem Based Learning — Human Clinical Dentistry I Units: 4
- DPBL 511a Dental Problem Based Learning — Human Structure II Units: 2
- DPBL 511b Dental Problem Based Learning — Human Structure II Units: 2
- DPBL 511c Dental Problem Based Learning — Human Structure II Units: 2
- DPBL 512a Dental Problem Based Learning — Human Function II Units: 5
- DPBL 512b Dental Problem Based Learning — Human Function II Units: 5
- DPBL 512c Dental Problem Based Learning — Human Function II Units: 5
- DPBL 513a Dental Problem Based Learning — Human Behavior II Units: 3
- DPBL 513b Dental Problem Based Learning — Human Behavior II Units: 3
- DPBL 513c Dental Problem Based Learning — Human Behavior II Units: 2
- DPBL 514a Dental Problem Based Learning — Human Clinical Dentistry II Units: 7
- DPBL 514b Dental Problem Based Learning — Human Clinical Dentistry II Units: 7
- DPBL 514c Dental Problem Based Learning — Human Clinical Dentistry II Units: 8
- DPBL 521a Dental Problem Based Learning — Human Structure III Units: 1
- DPBL 521b Dental Problem Based Learning — Human Structure III Units: 1
- DPBL 521c Dental Problem Based Learning — Human Structure III Units: 1
- DPBL 522a Dental Problem Based Learning — Human Function III Units: 1
- DPBL 522b Dental Problem Based Learning — Human Function III Units: 1
- DPBL 522c Dental Problem Based Learning — Human Function III Units: 1
- DPBL 523a Dental Problem Based Learning — Human Behavior III Units: 1
- DPBL 523b Dental Problem Based Learning — Human Behavior III Units: 1
- DPBL 523c Dental Problem Based Learning — Human Behavior III Units: 1
- DPBL 524a Dental Problem Based Learning — Human Clinical Dentistry III Units: 14
- DPBL 524b Dental Problem Based Learning — Human Clinical Dentistry III Units: 14
- DPBL 524c Dental Problem Based Learning — Human Clinical Dentistry III Units: 14
- DPBL 531a Dental Problem Based Learning — Human Structure IV Units: 1
- DPBL 531b Dental Problem Based Learning — Human Structure IV Units: 1
- DPBL 532a Dental Problem Based Learning — Human Function IV Units: 1
- DPBL 532b Dental Problem Based Learning — Human Function IV Units: 1
- DPBL 533a Dental Problem Based Learning — Human Behavior IV Units: 1
- DPBL 533b Dental Problem Based Learning — Human Behavior IV Units: 1
- DPBL 534a Dental Problem Based Learning — Human Clinical Dentistry IV Units: 13
- DPBL 534b Dental Problem Based Learning — Human Clinical Dentistry IV Units: 13

Note:

For those individuals who are not familiar with the problem-based pedagogy which is an integrated curriculum, the content of the curriculum listed above is based on what was traditionally housed in the following courses.

Doctor of Dental Surgery — Traditional Program Curriculum

Required Courses

- AMED 502 Emergency Medicine Units: 2
- AMED 523 Pharmacosedation II Units: 1
- AMED 524 Pain and Anxiety Control Units: 2
- ANAT 521 Head and Neck Anatomy Units: 2
- ANAT 522 Systemic Human Anatomy Units: 3
- ANAT 523 Head and Neck Dissection Units: 1
- CMDT 501 Introduction to Community Dentistry Programs Units: 1
- CMDT 502a Contemporary Dental Practice Units: 2
- CMDT 502b Contemporary Dental Practice Units: 2

Note:

Five units of selective courses are required in addition to the above.

Advanced Standing Program for International Dentists Curriculum

Advanced Placement Doctoral Dental Degree

The Herman Ostrow School of Dentistry of USC offers a unique pathway for talented students to earn a bachelor's degree in Dental Hygiene (DH) on their way to a Doctor of Dental Science (DDS) degree. Successful candidates for the six-year DH to DDS Pathway will immediately transition to the DDS degree program following graduation from the Dental Hygiene program.

Admission Requirements

(1) Application materials for the American Dental Education Association Dental Hygiene Application Service (ADEA DHCAS) are due by March 1 of the year in which enrollment are desired. (2) Applicants must complete the Dental Hygiene prerequisite and USC General Education course work prior to entering the program. (3) The Dental Admissions Committee makes the final selection of students admitted for the pathway. Five to ten students are accepted each year. (4) Prior to enrollment in the DDS program, applicants must submit an application through the American Dental Education Association's Associated American Dental Schools Application Service (ADEA AADSAS). The AADSAS application must be submitted by the February 1 deadline during the applicant's senior year. Applicants must also take the Dental Admission Test (DAT) and achieve a score of 15 or higher in all tested categories. DAT results must be submitted by the applicant's senior year of Dental Hygiene studies.

Additional requirements include: Successful graduation from the Dental Hygiene program with a minimum overall GPA of 3.0; a letter of recommendation from the Dental Hygiene program director and recommendations from two additional USC faculty members; certification that the student has maintained the school's professional standards and ethical requirements.

Advanced Standing Program for International Dentists

This program is designed to teach qualified dentists from other countries the knowledge and skills available in the United States. Time necessary to complete the program depends upon the doctor's ability; a minimum of two years is usually required. About eight months will be devoted to fundamental, technical and academic procedures. The remaining time is devoted to clinical training as necessary to achieve graduation qualifications. Graduation from the Advanced Standing Program for International Dentists leads to a DDS degree but does not give automatic licensure to practice dentistry. However, graduates are eligible to take the State Board Dental Examinations in most of the United States. (A few states still require U.S. citizenship.)

Additional information may be requested from the Herman Ostrow School of Dentistry of USC, Office of Admissions , 925 W. 34th Street, Room 201, Los Angeles, CA 90089-0641, (213) 740-2841, email: uscsdadm@usc.edu or access the school's Website at dentistry.usc.edu.

Admission

Prospective students must apply to the Advanced Standing Program for International Dentists through the ADEA Centralized Application for Advanced Placement for International Dentists (ADEA CAAPID℠). The application is available online only. You can access the ADEA CAAPID℠ application at portal.caapid.org.

Selected applicants will be interviewed and tested in October and accepted based on the following requirements: (1) completion of the formal application (before August 15 for admission to the program in April). A $145 processing fee must accompany the application. (2) Starting summer 2021, successful completion of the National Board Part I and Part II or Integrated National Board Dental Examination of the American Dental Association (ADA). A score of 75 percent must be attained in each category. Higher scores are advantageous in evaluation of the candidate's academic level. (3) Applicants are strongly encouraged to submit scores from the National Board Part II and competitive scores on both the quantitative and verbal sections of the Graduate Record Examinations. For information about the GRE test visit ets.org/gre. (4) Applicants for the Advanced Standing Program for International Dentists must demonstrate English-language proficiency by submitting either Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores. Competitive applicants should submit an Internet Based TOEFL (iBT) score of 100, or an IELTS score of 7, with at least 6 on each band. Official scores must be received directly from the testing service and dated no earlier than two years (24 months) prior to the start of the student's intended first term at USC. For TOEFL, the institution code for USC is 4852 (no department code is required). To submit IELTS scores, please choose USC from the list of available institutions. Additional information about these exams can be found at ets.org for the TOEFL and at ielts.org for the IELTS. (5) A small group problem-based interview evaluation session with members of the School of Dentistry. (6) Two letters

of recommendation from dental school faculty submitted with the CAAPID application. (7) A brief but accurate account of clinical experience and a personal statement submitted with the CAAPID application. (8) Documentary proof of license to practice from a Ministry of Health or proper governing body. (9) Satisfactory completion of and competence in the following academic and artistic entrance examinations to be given to invited applicants in October: (a) fixed prosthodontics (practical); (b) operative dentistry (practical). In addition, a separate written examination may be administered. (10) Complete official documents (transcripts) of all college and university course work, including dental education in the original language accompanied by certified English translation when necessary. (11) Certification of dental degree. Candidates chosen will be those who demonstrate the best qualifications in all academic and practical skills. (12) Submit a course-by-course World Education Services evaluation. (13) As a precondition of enrollment, accepted students must undergo a background screening conducted by Certiphi Screening, Inc. to help ensure patient safety and compliance with state laws and regulations and all students must provide evidence of sound health and meet the school's health requirements.

Student Visas

The I-20 Student Visa is issued to the applicant only after complete admission and acceptance has been granted. Before the papers can be processed, the applicant must present a copy of the I-94 form (white sheet in the passport) and a notarized statement of financial support for tuition and expenses for one year ($120,000) to the Advanced Standing Program for International Dentists. These materials must be submitted at the time of application. The International Admission Office will issue the I-20 visa upon receipt and approval of these documents.

Financial Assistance

The United States government requires all international applicants to provide proof of ability to pay tuition and living expenses before a formal letter of admission or the forms needed to obtain a visa will be issued.

International students are not eligible to participate in U.S. federal financial aid programs. Please contact the Herman Ostrow School of Dentistry of USC Office of Financial Aid to discuss other financing options at (213) 740-2841, uscsdfa@usc.edu or visit usc.edu/admission/fa/loans/private.html.

Curriculum

Each candidate for the DDS degree should complete the course of instruction in two years, however, some individuals may need more time. The first four to eight months will be spent in preclinical exercises to acquaint the student with the fundamental technical procedures used at USC. The balance will be used for clinical procedures related to diagnosis and treatment of patients.

Grade Point Average Standards

Since this is a short program and highly concentrated, a GPA of 2.0 (A = 4.0) must be maintained each trimester. Therefore, each applicant will be provisionally accepted. If a doctor is unable to maintain an average GPA of 2.0, he or she will be asked to resign.

Each trimester, Advanced Standing Program for International Dentists students are evaluated by the student professional performance evaluation committee. From these meetings, recommendations are made regarding advancement, special programs and disqualification.

Graduation Requirements

In order to receive the Doctor of Dental Surgery (DDS) degree, students in the Advanced Standing Program for International Dentists must: (1) successfully complete all the required courses and clinical patient care assigned in trimesters VI, VII, VIII, IX, X and XI of the Problem Based Learning DDS curriculum; (2) pass Part I and Part II of the National Dental Board Examinations; and (3) achieve all of the competencies defined for the DDS curriculum and complete all required clinical performance evaluations. All assessments of progress to degree completion will be equivalent for all students seeking the DDS degree.

In addition to meeting the academic requirements indicated above, students must have a completed administrative clearance form on file in the Office of Academic Affairs before a degree can be conferred. This administrative clearance indicates that the student has met financial and other obligations to the university and to the student's patients.

Required Courses

- DPBL 511c Dental Problem Based Learning — Human Structure II Units: 2
- DPBL 512c Dental Problem Based Learning — Human Function II Units: 5
- DPBL 513c Dental Problem Based Learning — Human Behavior II Units: 2
- DPBL 514c Dental Problem Based Learning — Human Clinical Dentistry II Units: 8
- DPBL 521a Dental Problem Based Learning — Human Structure III Units: 1

Craniofacial Biology

Herman Ostrow School of Dentistry of USC
DEN 218
(213) 740-1001
FAX: (213) 740-2376

Craniofacial biology is concerned with the evolution, growth, structure and function of oral tissues and the oral region; and with the etiology and pathogenesis of numerous diseases and malformations. These involve studies at various levels of biological organization, from the molecular and subcellular to the organismic. Craniofacial biology comprises a large, rapidly increasing body of knowledge that has both clinical and academic importance. The objective of the program is primarily, but not exclusively, to prepare health science graduates for entry into careers in academic environments as clinical scholars or as members of multidisciplinary teams of health professionals in academic centers of clinical and basic health science research.

Admission Requirements

The graduate program in Craniofacial Biology (CBY) offers academic graduate training to individuals with a Doctor of Dental Surgery (DDS), Medical Doctor (MD) or equivalent degree. Applicants with Bachelor of Science degrees in areas such as biology and chemistry are also encouraged to apply.

All applications are evaluated individually in search of the most promising students in terms of intellectual distinction and professional merit in the sciences and/or dentistry. Beyond this, the committee looks for academic trends, documented potential and evidence of good character. Priority consideration for admission is given to applications that are complete by December 1.

Applications

Formal application to the USC Office of Graduate Admission and the graduate program in Craniofacial Biology (CBY) is required for Master of Science (MS) and Doctor of Philosophy (PhD) objectives. The Craniofacial Biology graduate programs are administered by the USC Graduate School whose catalogue provides additional information about specific application requirements and courses that must be completed in order to graduate. The CBY MS program is offered only as a terminal degree option for individuals already enrolled in the CBY PhD program, and have elected to change majors from a PhD to a MS.

Requirements for PhD applications include:

- Statement of purpose.
- Three letters of recommendation describing academic abilities, personal attributes and research (if applicable).
- Original postsecondary transcripts from all schools attended.
- A grade point average (GPA) of 3.0 or higher on a 4.0 scale, and grades of A or B in science courses.
- Graduate Record Examinations (GRE) general test scores no older than five years.
- Test of English as a Foreign Language (TOEFL) is required for all applicants whose native language is not English to test their ability to use and understand English in an academic setting. Official scores must be received directly from the testing service and date no earlier than two years (24 months) prior to the start of the intended first term at USC.
- Personal interviews may be required.

The Doctor of Philosophy requires a minimum GRE verbal score of 60 percent rank and quantitative score of 60 percent rank. For non-native English speakers, a minimum combined TOEFL score of 100 is required with no less than 20 on each section (reading, listening, speaking and writing). Many accepted students score higher than the minimum requirement.

Progressive Degree Program

Applicants for a progressive degree program must have completed 64 units of course work applicable to their undergraduate degree since graduating from high school. (AP units, IB units and course work taken prior to high school graduation are excluded.) Applicants must submit their application before completing 96 units of course work. Normally, the application is submitted in the fall semester of the third year of enrollment at USC. Applicants do not have to submit GRE scores but are expected to have at least a 3.0 GPA at the time of application. The application for admission to a progressive master's program must be approved by the deans of the bachelor's and the master's degree-granting schools at USC and submitted to the Degree Progress Department. An approved course plan proposal and letters of recommendation from two USC faculty members must be submitted with the application, with at least one of the recommendations coming from a faculty member in the student's bachelor's degree major department.

Master's Degree

Craniofacial Biology (MS)

This degree is under the jurisdiction of the Graduate School. Students should also refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School. The Master of Science degree in craniofacial biology offers the clinician (DDS, MD or equivalent) the opportunity to obtain clinical research knowledge and skills in the area of craniofacial biology. Such training will include research into the causes of craniofacial diseases and anomalies, as well as normal development and function. The course of study is particularly directed toward those clinicians committed to pursuing a career in research and teaching.

Degree Requirements

A total of 24 units is required that includes four courses in craniofacial biology, and four units of CBY 594a Master's Thesis and CBY 594b Master's Thesis and necessary units of CBY 590 Directed Research. All students must achieve a 3.0 grade point average in the craniofacial biology courses. Four core courses in craniofacial biology are required for all students: CBY 585, INTD 531, INTD 561 and PM 510L. All students are required to complete a thesis based on the student's research following a thesis protocol approved by a committee of craniofacial biology faculty. An advisory committee, comprising the research adviser and two additional faculty members, will establish thesis requirements to be completed by the student.

Graduate Certificate

Craniofacial Biology Certificate

The Certificate in Craniofacial Biology is intended to provide dentists in post-graduate dental education with experience in graduate education and insight into the requirements to complete a graduate degree. This will provide the students with additional information relative to selecting academic careers. All certificate students must have a dental degree and have been admitted to a post-graduate dental education program sponsored by the Herman Ostrow School of Dentistry of USC.

Degree Requirements

A total of six CBY courses and 18 units of course work is required for the certificate. The six courses may be selected from the following list: CBY 573, CBY 574, CBY 575, CBY 576, CBY 579L, CBY 583, CBY 585, CBY 587, CBY 672, CBY 673, CBY 674. The credit received for these classes may be applied toward either the MS or PhD in Craniofacial Biology should the student decide later to pursue an advanced degree.

Admissions Criteria

Only residents enrolled in the following advanced dental education and specialty programs are eligible for the Certificate in Craniofacial Biology: General Practice Residency, Endodontics, Orofacial Pain/Oral Medicine, Oral and Maxillofacial Surgery, Orthodontics, Pediatric Dentistry, Periodontology, Prosthodontics.

Residents must complete all admission requirements for dental advanced education programs and have been accepted to these programs in accordance with criteria established by the advanced dental education program faculty.

Doctoral Degree

Craniofacial Biology (PhD)

The Doctor of Philosophy degree in craniofacial biology is awarded under the jurisdiction of the Graduate School. Students should also refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School. This program is designed to provide health science-oriented training for the professional with interests in academic, as well as clinical, aspects of craniofacial biology. Appointment to the PhD program are designated each year for all semester admission.

New Student Orientation Committee

All new students seeking Master of Science and/or Doctor of Philosophy degree objectives will be assigned to an orientation committee. This committee will function to advise and guide new students through their first semester. Thereafter, each student will identify a mentor and assemble a qualifying exam committee.

Qualifying Exam Committee

During the second semester of study each graduate student should select a qualifying exam committee. The qualifying exam committee must include five faculty members who will be of assistance in the student's education. The student's mentor will serve as chair of the qualifying exam committee. One committee member must be a USC faculty member from outside the program. The graduate program director will be an *ex officio* member of all qualifying exam committees. The qualifying exam committee will monitor the student's progress, recommend readings or additional training, and determine when the student is ready for the qualifying examination. It is the student's responsibility to meet with the qualifying exam committee at least once during every semester of each academic year. The results of these formal meetings should be summarized by the student in a written statement and submitted to the program director each semester.

Screening Procedure

As soon as the student has satisfactorily completed the core courses and selected the committee, a screening meeting with the qualifying exam committee should be called. The screening procedure may consist of an oral examination; the student will outline his research progress and be examined on academic development. The committee may recommend that the student take specific additional course work and that readings in certain areas be initiated to remedy deficiencies. A brief report will be given to the student and included in his or her file. The student will meet with the committee each semester; they shall agree when the student is prepared to take the qualifying examination in the next semester or if the student should resign or be dropped from the program.

Course Requirements

A total of 60 units are required for the PhD Eight didactic courses at the graduate level are required. The core required CBY courses are PM 510L, CBY 585, INTD 531 and INTD 561. The remaining graduate-level courses may be selected from courses offered by any department, following consultation with the graduate mentor and graduate program director. It is highly recommended that PhD students take the PIBBS core curriculum on the Health Sciences Campus. Students must achieve a 3.0 GPA or better in their course work. Students with a Doctor of Dental Surgery or other professional degree may be granted waivers for having completed equivalent course work. It is the student's responsibility to obtain from the Graduate School the Request for Permission to take the PhD Qualifying Examination form which must be signed by all committee members. This form must be completed 60 days before the qualifying examination.

Qualifying Examination

The PhD qualifying examination is offered during the fall or spring semesters. A written examination will cover specific subject areas of the core curriculum, as well as topics selected by the qualifying exam committee. After successfully completing all parts of the written examination, the student will prepare and submit an original research proposal to the qualifying exam committee which presents, in National Institutes of Health (NIH) format, the student's proposed dissertation research. If the submitted proposal is acceptable, an oral examination will be conducted. This examination will include a defense of the proposal and could also include material from the written examination and related topics. A student failing any part of the examination may be allowed one additional opportunity to pass that portion, at the discretion of the qualifying exam committee, within the regulations of the Graduate School governing the repetition of qualifying examinations.

Dissertation

The doctoral dissertation is to focus upon an original research problem which reflects the creative scholarly abilities of the candidate and contributes to the general advancement of biological understanding, as well as to an understanding of the theoretical basis of disease and its treatment.

Defense of the Dissertation

An oral examination on a rough or final copy of the dissertation is conducted within one month following submission of the manuscript to the committee.

Advanced Programs in Dental Education

The Herman Ostrow School of Dentistry offers advanced dental education programs in general dentistry, endodontics, general practice residency, operative and adhesive dentistry, orofacial pain, oral and maxillofacial surgery, pediatric dentistry, periodontology and prosthodontics, all leading to a certificate. The Herman Ostrow School of Dentistry in conjunction with the Graduate School also offers a program in craniofacial biology. In conjunction with the Keck School of Medicine, the Herman Ostrow School of Dentistry offers a combined program leading to an MD degree and certificates in oral and maxillofacial surgery and orofacial pain. The Herman Ostrow School of Dentistry also offers an online master's degree in orofacial pain and oral medicine, geriatric dentistry and community oral health, as well as online certificate programs in geriatric dentistry, community oral health, orofacial pain, and oral pathology and radiology. In addition to clinical seminars and clinical experience, students take basic science courses with advanced students from other departments.

The certificate curriculum consists of a core of basic science subjects plus clinical seminars and clinical experience. Elective subjects may also be selected by the student with the approval of the program director.

The estimated lengths of programs are as follows:

- Biomaterials and Digital Dentistry, 24 months
- Biomedical Implants and Tissue Engineering, 24 months
- Community Oral Health (online certificate), 12 months
- MS in Community Oral Health (online), 37 months
- Endodontics, 24 months
- General Practice Residency, 12 months
- Geriatric Dentistry (online certificate), 12 months
- MS in Geriatric Dentistry (online), 37 months
- Operative and Adhesive Dentistry, 26 months
- Oral and Maxillofacial Surgery, 48 months
- Oral and Maxillofacial Surgery/MD, 72 months
- Oral Pathology and Radiology Certificate (online), 12 months

- Orofacial Pain, (on-site certificate), 24 months
- Orofacial Pain (online certificate), 12 months
- MS in Orofacial Pain and Oral Medicine (online), 37 months
- Orthodontics, 34 months
- Pediatric Dentistry, 24 months
- Periodontology, 36 months
- Prosthodontics, 36 months

Most programs will begin in June (date to be determined).

Admission Requirements

Applicants must hold the Doctor of Dental Surgery or Doctor of Medical Dentistry degree (or equivalent degree if educated oversees) and must present the appropriate degrees, approved transcripts and affidavits as prescribed by the Office of Dental Admissions and Student Affairs.

Admission Procedures

Prospective students for online masters and online certificate programs must apply through the USC Graduate Admission Office Centralized Application Services (CAS) at usc.liaisoncas.com/applicant-ux/#/login.

Prospective students for traditional (not online) programs must apply through the Postdoctoral Application Support Service (PASS) at adea.org/PASSapp/applicants/. The ADEA PASS application requires the submission of an essay, one or more Professional Evaluations, an Institution Evaluation from the dental school dean, and official dental school transcripts. The application cannot be processed until all required documents are submitted.

Information about this examination can be found at ets.org/gre. The last acceptable test date is in September of the year preceding desired admission.

The following material is also required to complete the application: (1) payment of an $85 processing fee (graduates of foreign dental schools or students requiring a visa must submit a $145 processing fee) directly to the Herman Ostrow School of Dentistry Office of Admissions and Student Affairs; (2) applicants for General Dentistry, General Practice Residency, Orthodontic, Pediatric Dentistry and Oral Surgery programs must submit applicant agreement forms to the Postdoctoral Dental Matching Program. Information and forms can be obtained online at natmatch.com/dentres; (3) board scores Part I and Part II are required for all programs with the exception of the Operative and Adhesive Dentistry certificate; MCATs are required for the Integrated MD degree/oral maxillofacial surgery certificate. International students are required to take GREs for the two-year certificate program. These requirements may be waived at the discretion of the program director; (4) a biographical statement; (5) applicants may be asked to be available for an interview. If one is necessary, applicants will be contacted by the director of the individual advanced program; (6) applicants will be required to pay a non-refundable $1,500 tuition deposit upon notification of acceptance. (7) As a precondition to enrollment, accepted students must undergo a background screening conducted by Certiphi Screening, Inc. to help ensure patient safety and compliance with state laws and regulations and all students must provide evidence of sound health and meet the school's health requirements.

Timetable for Applications

Applications for admission must be received as follows:

- Biomaterials and Digital Dentistry, July 15
- Biomedical Implants and Tissue Engineering, July 15
- Community Oral Health (online certificate)
- Community Oral Health (online Master of Science)
- Endodontics, Aug. 15
- General Practice Residency, Nov. 1
- Geriatric Dentistry (online certificate)
- Geriatric Dentistry (online Master of Science)
- Operative and Adhesive Dentistry, Dec. 1
- Oral and Maxillofacial Surgery, Oct. 1
- Oral Pathology and Radiology (online certificate)
- Orofacial Pain (on-site certificate), Nov. 1
- Orofacial Pain (online certificate)
- Orofacial Pain and Oral Medicine (online Master of Science)
- Orthodontics, Oct. 1
- Pediatric Dentistry, Oct. 1
- Periodontology, Sept. 1
- Prosthodontics, Nov. 1

Completed applications and related information are reviewed first by the faculty of the department of interest. In selecting applicants for admission the faculty considers academic records and personal qualifications. Final approval for admission rests with the advanced education coordinating committee. Responsibility for advising the student after admission rests with the department chair.

Orientation

A departmental orientation session is usually held the first week of classes, beginning in late June. Incoming students are acquainted with the Herman Ostrow School of Dentistry, its policies, procedures, faculty and facilities.

Student Issue — Advanced Programs

Dental units in the school's clinics are equipped with Midwest Company type tubing and couplers for low and high speed air hand pieces. Advanced students must provide their own adapters to fit the school's couplers unless the students' present hand pieces are already so modified.

Students accepted into an advanced program should consult their program directors about needed equipment.

University Certificate

General Practice Residency

The General Practice Residency program consists of a 12-month first-year, full-time residency program, which is designed in conformance with the guidelines of the Council on Dental Education and the Commission on Dental Accreditation of the American Dental Association. The program is structured to increase diagnostic acumen, general knowledge and clinical ability in dentistry.

The program is conducted primarily at the Los Angeles County + USC Medical Center, one of the nation's largest teaching hospitals, and at the Veterans Administration Los Angeles Ambulatory Care facility in downtown Los Angeles. Some of the training is also conducted at Rancho Los Amigos Medical Center, West Los Angeles Veterans Administration Hospital, the Herman Ostrow School of Dentistry of USC and other community facilities.

The program emphasizes the treatment of a wide range of oral health disorders, medical considerations related to dental care, the ability to treat medically compromised and disabled patients and teaches how to provide dental care in a hospital environment interacting with health care providers of various disciplines. Inherent in the year of training, a philosophy of practice addresses the medical psychosocial and oral health care needs of the patient.

The program in general practice is accredited by the American Dental Association's Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education.

Required Courses

- ADNT 702 Physical Diagnosis Units: 2

Graduate Certificate

Advanced Endodontics Certificate

The advanced endodontics certificate program is a 24-month course of study. The program provides advanced students with the academic background information and clinical experience necessary for the specialty practice of endodontics. The program also requires activities in research and teaching to expose the advanced students interested to these areas of endodontics.

Advanced students are encouraged to pursue Board Certification by the American Board of Endodontics and are prepared for the certification examinations.

Emphasis is also placed on the interaction of endodontics with other specialties and general dentistry.

The program in endodontics is accredited by the Commission on Dental Accreditation (CODA), which serves as the only nationally recognized accrediting body for dentistry and the related dental field. The Commission receives its accreditation authority from the acceptance of all stakeholders within the dentistry community and recognition by the United States Department of Education. Since its inception in 1937, the Commission and its predecessors have operated within the parameters of the ADA Bylaws. The Commission serves the profession and the public by establishing and applying high-quality standards for the accreditation of educational programs in dentistry, postgraduate general and specialty dentistry, and the allied dental professions.

Advanced Endodontics Curriculum

Required Courses

- ADNT 701 Research Methodologies in Dentistry Units: 2
- ADNT 702 Physical Diagnosis Units: 2
- ADNT 704a Oral Biology Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 each
- ADNT 704b Oral Biology Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 each
- ADNT 710 Internship: Dental Education Units: 1, 2, 3, 4, 5
- AMED 750a Physical Evaluation and Anesthesia Units: 2
- AMED 750b Physical Evaluation and Anesthesia Units: 2
- AMED 750c Physical Evaluation and Anesthesia Units: 1

Advanced Operative and Adhesive Dentistry Certificate

The Herman Ostrow School of Dentistry offers a 26-month program leading to a Certificate in Advanced Operative and Adhesive Dentistry.

The program provides students with in-depth scientific knowledge and clinical experience in operative and adhesive dentistry, including cutting-edge technologies in minimally invasive adhesive dentistry, esthetic functional rehabilitation, digital workflow, CAD/CAM technologies, cariology, dental biomaterials, implant dentistry and advanced esthetic treatment planning. In addition, the programs offer students teaching experience through assisting the learning activities of the Doctor of Dental Surgery Program.

Biomaterials research is an integral part of the curriculum. Students enrolled in the Certificate in Operative and Adhesive Dentistry have an opportunity to apply for the Master of Science in Biomaterials and Digital Dentistry (BMDD).

The program in Advanced Operative and Adhesive Dentistry Certificate requires DDS, DMD or equivalent degree (for international dentist applicants), grade point average (GPA) of 3.0 or higher, three letters of recommendation, curriculum vitæ, and statement of purpose. For non-native English speakers, an Internet-based TOEFL (iBT) test score of 90 or above is required, with 20 or above on each section (reading, listening, speaking and writing). The exam score should be current (less than two years old). Non-US obtained dental school transcripts must be translated and certified by Educational Credential Evaluators Report (ECE).

The clinical, research and teaching experiences will prepare graduates for future academic careers in dental research and education, as well as career options in dental related public organizations and private organizations.

Advanced Operative and Adhesive Dentistry Certificate

Required Courses

- ADNT 702 Physical Diagnosis Units: 2
- ADNT 704a Oral Biology Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 each
- ADNT 704b Oral Biology Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 each

Total units: 162

Advanced Oral and Maxillofacial Surgery

The advanced education program in oral and maxillofacial surgery is a continuous 48-month course of study that prepares the graduate for the practice of oral and maxillofacial surgery. The program in oral surgery is accredited by the Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education. The program also meets the requirements of the American Association of Oral and Maxillofacial Surgeons.

The program is conducted at the Herman Ostrow School of Dentistry and at the LAC+USC Medical Center. The course provides graduates with the necessary background for certification by the American Board of Oral and Maxillofacial Surgery. Certificates are awarded upon successful completion of the 48-month course.

Advanced Oral and Maxillofacial Surgery Curriculum

Required Courses

- ADNT 702 Physical Diagnosis Units: 2
- ADNT 704c Oral Biology Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 each
- ADNT 710 Internship: Dental Education Units: 1, 2, 3, 4, 5
- PTHL 601 Advanced Oral Pathology Seminar Units: 2
- PTHL 701 Clinicopathologic Conference Units: 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13
- SURG 701a Seminar: Advanced Oral Surgery Units: 2
- SURG 701b Seminar: Advanced Oral Surgery Units: 2
- SURG 702a Seminar: Review of the Oral Surgery Literature Units: 2
- SURG 702b Seminar: Review of the Oral Surgery Literature Units: 2
- SURG 708a Orthognathic Surgery Units: 2
- SURG 708b Orthognathic Surgery Units: 2
- SURG 761a Clinic: Advanced Oral Surgery Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- SURG 761b Clinic: Advanced Oral Surgery Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- SURG 761c Clinic: Advanced Oral Surgery Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- SURG 761d Clinic: Advanced Oral Surgery Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- SURG 763a Clinic: Advanced Hospital Oral Surgery and Anesthesia Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- SURG 763b Clinic: Advanced Hospital Oral Surgery and Anesthesia Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- SURG 763c Clinic: Advanced Hospital Oral Surgery and Anesthesia Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- SURG 763d Clinic: Advanced Hospital Oral Surgery and Anesthesia Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each

Advanced Orofacial Pain Certificate

The Herman Ostrow School of Dentistry's 24-month, certificate residency program in advanced orofacial pain trains one to two residents per year to be expert clinicians in orofacial pain with an emphasis on oral medicine.

The program has received accreditation from the Commission on Dental Accreditation (CODA) of the American Dental Association (ADA). The certificate curriculum is designed with a series of didactic courses in which students will gain knowledge about the diagnosis, pathobiology and treatment of different oral diseases in the field of orofacial pain. The field of orofacial pain encompasses masticatory musculoskeletal pain, neurogenic orofacial pain, sleep disorders related to orofacial pain, temporomandibular disorders, headaches, orofacial motor disorders including orofacial dystonias and bruxism, intraoral, intracranial, extracranial and systemic disorders that cause orofacial pain. The courses and clinical experiences covered in the intensive two-year program are listed below.

Required Courses

- ADNT 701 Research Methodologies in Dentistry Units: 2
- OFPM 701 CPR, Blood and Airborne Infections and Common Emergencies for Dental Residents Units: 1
- OFPM 702a Soft Tissue Disease for Dental Residents Units: 1
- OFPM 702b Soft Tissue Disease for Dental Residents Units: 2
- OFPM 704 Bony Pathology, Radiology and Advanced Imaging for Dental Residents Units: 1
- OFPM 705 Neurogenic Based Oral and Facial Pains for Dental Residents Units: 2
- OFPM 706 TMD, Orthopedics, Rheumatology and Physical Therapy for Dental Residents Units: 2
- OFPM 707 Pharmacology Series for Dental Residents Units: 2
- OFPM 709 Headaches for Dental Residents Units: 1
- OFPM 721 Neurosciences for Dental Residents Units: 2
- OFPM 722 Internal Medicine and Systemic Disease for Dental Residents Units: 2
- OFPM 723 Systems Physiology, Motor Disorders and Sleep Apnea for Dental Residents Units: 2
- OFPM 724 Psychological and Psychometric Assessment for Dental Residents Units: 2
- OFPM 725 Epidemiology, Nutrition and Aging for Dental Residents Units: 2
- OFPM 726 Immunology and Immunosuppression for Dental Residents Units: 2
- OFPM 727 Infectious Disease, Oral Microbiology and Virology for Dental Residents Units: 2
- OFPM 728 Case Presentations by OFP-OM Residents Units: 2

Advanced Pediatric Dentistry Certificate

The advanced pediatric dentistry certificate program is a 24-month course of study designed to provide students with the background information and clinical experience necessary for the practice of pediatric dentistry. The program in pediatric dentistry is accredited by the Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education. The program also meets the educational requirements of the American Board of Pediatric Dentistry.

First-year studies emphasize advanced pediatric dentistry theory and clinical treatment of the "healthy" child. Students develop a sound basis in genetics, growth and development, nonpharmacologic and pharmacologic behavior guidance, physical evaluation, research methodology and statistics, interceptive orthodontics, prevention and a review of the pediatric dentistry literature. Second year studies concentrate on oral health care of children with physical, medical, intellectual and emotional disabilities. The second year student serves as a hospital-based resident at Children's Hospital Los Angeles, Long Beach Memorial Medical Center/Miller Children's Hospital or Children's Hospital of Orange County (with the Healthy Smiles for Kids community clinic). Residents also rotate to Rancho Los Amigos National Rehabilitation Center and the Pediatric Dental Clinic (PDC) at LAC+USC. Students gain experience in performing operating room procedures, oral conscious sedation, participating on interdisciplinary/multidisciplinary teams, providing emergency treatment and treating children with medical issues, developmental disabilities and pathologies in the hospital environment.

In addition to the two-year program, opportunities are available to combine the basic certificate program with a master's or doctoral degree through the Keck School of Medicine in either Academic Medicine (MACM) or Public Health (MPH).

The purpose of the combined Certificate in Pediatric Dentistry/ Master's Degree program is to prepare highly qualified specialists in pediatric dentistry who can assume leadership positions in dental education, service to the community, dental research and

oral health care of children with developmental disabilities and medically compromising conditions.

An individual who elects to apply to the combined program should apply first to the certificate program. Upon acceptance into the certificate program, the applicant would then apply for the master's programs. The first year of the combined program would be spent in pediatric dentistry. Master's level courses would be introduced within the second and third years of the combined programs.

Required Courses

- ADNT 701 Research Methodologies in Dentistry Units: 2
- ADNT 706 Seminar: Diseases of Childhood Units: 2
- ADNT 707 Behavior of the Child Patient Units: 2
- ADNT 710 Internship: Dental Education Units: 1, 2, 3, 4, 5
- AMED 750a Physical Evaluation and Anesthesia Units: 2
- AMED 750b Physical Evaluation and Anesthesia Units: 2
- AMED 750c Physical Evaluation and Anesthesia Units: 1
- DPHR 701 Advanced Pharmacology Units: 1
- PEDO 701a Seminar: Advanced Pediatric Dentistry Units: 8, 9, 10, 11, 12, 13, 14, 15 each
- PEDO 701b Seminar: Advanced Pediatric Dentistry Units: 8, 9, 10, 11, 12, 13, 14, 15 each
- PEDO 702a Comprehensive Review of Pediatric Dentistry Units: 5, 6, 7 each
- PEDO 702b Comprehensive Review of Pediatric Dentistry Units: 5, 6, 7 each
- PEDO 703a Interceptive Orthodontics Units: 2, 3, 4, 5 each
- PEDO 703b Interceptive Orthodontics Units: 2, 3, 4, 5 each
- PEDO 703c Interceptive Orthodontics Units: 2, 3, 4, 5 each
- PEDO 703d Interceptive Orthodontics Units: 2, 3, 4, 5 each
- PEDO 703e Interceptive Orthodontics Units: 2, 3, 4, 5 each
- PEDO 704a Prevention in Pediatric Dentistry Units: 2
- PEDO 704b Prevention in Pediatric Dentistry Units: 2
- PEDO 705 Pediatric Diseases Units: 2
- PEDO 706 Dental Care for Pediatric Patients with Disabilities Units: 2
- PEDO 707 Seminar: Cleft Palate Rehabilitation Units: 1, 2, 3, 4, 5, 6, 7, 8, 9
- PEDO 708 Practice Management Units: 1
- PEDO 709 Conscious Sedation in Pediatric Dentistry Units: 1
- PEDO 721 Pediatric Physical Evaluation Units: 2
- PEDO 761a Clinic: Advanced Pediatric Dentistry Units: 2, 3, 4, 5, 6, 7, 8, 9, 10 each *
- PEDO 761b Clinic: Advanced Pediatric Dentistry Units: 2, 3, 4, 5, 6, 7, 8, 9, 10 each *
- PEDO 761c Clinic: Advanced Pediatric Dentistry Units: 2, 3, 4, 5, 6, 7, 8, 9, 10 each *
- PEDO 761d Clinic: Advanced Pediatric Dentistry Units: 2, 3, 4, 5, 6, 7, 8, 9, 10 each *
- PEDO 761e Clinic: Advanced Pediatric Dentistry Units: 2, 3, 4, 5, 6, 7, 8, 9, 10 each *
- PEDO 771a Clinic: Hospital Pediatric Dentistry Units: 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15 each *
- PEDO 771b Clinic: Hospital Pediatric Dentistry Units: 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15 each *
- PEDO 771c Clinic: Hospital Pediatric Dentistry Units: 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15 each *
- PEDO 771d Clinic: Hospital Pediatric Dentistry Units: 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15 each *
- PEDO 771e Clinic: Hospital Pediatric Dentistry Units: 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15 each *
- PEDO 771f Clinic: Hospital Pediatric Dentistry Units: 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15 each *
- PEDO 772a Clinic: Interceptive Orthodontics Units: 1, 2, 3 each
- PEDO 772b Clinic: Interceptive Orthodontics Units: 1, 2, 3 each
- PEDO 772c Clinic: Interceptive Orthodontics Units: 1, 2, 3 each
- PEDO 772d Clinic: Interceptive Orthodontics Units: 1, 2, 3 each
- PEDO 772e Clinic: Interceptive Orthodontics Units: 1, 2, 3 each
- PEDO 773 Hospital Pediatric Clinics Units: 2, 3, 4
- PEDO 774 Clinical Genetics in Pediatric Dentistry Units: 9
- PEDO 790a Directed Research: Pediatric Dentistry Units: 1, 2, 3, 4, 5, 6 each
- PEDO 790b Directed Research: Pediatric Dentistry Units: 1, 2, 3, 4, 5, 6 each

Note:

**In addition to the required courses, a combined minimum of 36 units of PEDO 761a through PEDO 761e and PEDO 771a through PEDO 771f must be satisfactorily completed, as directed by the program director.*

Advanced Periodontology Certificate

The advanced periodontology program offers a 36-month course of study leading to a certificate of clinical training in periodontology. Interested applicants have the option to enroll in a 24-month Master of Science in Biomedical Implants and Tissue Engineering (BITE) in conjunction with the Periodontology certificate. The program in periodontology is accredited by the Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation, and the United States Department of Education. The program also meets the educational requirements of the American Board of Periodontology. Preparation for board certification process is an integral part of the curriculum, and all graduates are highly encouraged to achieve diplomate status of the American Board of Periodontology and Dental Implant Surgery.

The curriculum provides a sound foundation in basic sciences and clinical sciences with direct application to clinical periodontology and dental implantology. Emphasis is placed on evidence-based clinical practice in order to select appropriate therapies rooted in scientific evidence.

The USC Advanced Periodontology Program is designed to train clinicians with the competency and advanced skills to practice clinical periodontology at the highest level. Residents will acquire expertise in diagnosis and treatment of patients with periodontal and peri-implant diseases and conditions. Residents master various therapeutic procedures such as controlling inflammation through non-surgical and surgical therapy including respective and regenerative procedures, reconstructive/periodontal plastic surgery, replacement of missing and hopeless teeth with dental implants as well as hard and soft tissue surgery for dental implant site development. Clinical training is provided to achieve competency in pharmacosedation, including inhalation sedation as well as adult minimal enteral and moderate parenteral sedation as defined by the *ADA Guidelines for Teaching Pain Control and Sedation to Dentists and Dental Students*. During the course of the study, periodontology residents work very closely with other disciplines such as prosthodontics, orthodontics, endodontics, and oral medicine in delivering complex interdisciplinary patient care.

Required Courses

Advanced Prosthodontics Certificate

The program in advanced prosthodontics is a 36-month course of study designed to teach didactic and clinical skills leading to competency in the specialized practice of prosthodontics. The program provides a basic science foundation, incorporating studies in physical diagnosis, anatomy, oral pathology, pharmacology and oral biology. Proficiency in fixed, removable and implant prosthodontics will be developed during the course of study from a practical and didactic aspect. There is a strong emphasis on applying principles of esthetics toward oral reconstructions and implant prosthodontics. Periodontally compromised patients are frequently encountered, so the program is closely allied with the advanced program in periodontology. Treatment planning and integrated care with allied specialties is a strength of the program. Additionally a there is a strong emphasis on usage of digital dentistry from a diagnostic and treatment planning perspective. Then carrying this forward to design and fabrication of restorations using Computer Aided Design and Computer Aided Manufacturing (CAD/CAM) for patients. This includes usage of intra oral and extraoral scanners and fabricating restorations on site and remote sites.

In addition to developing clinical skills, the program requires a research methodology course and a research project.

Clinical experience in implant placement is encouraged and didactic study in maxillofacial prosthetics is offered. A concurrent Masters in Biomaterials and Digital Dentistry is available. Application to this program is available when starting the Advanced Prosthodontics Program. For information, see *dentistry.usc.edu/master-of-science-in-biomaterials-and-digital-dentistry/*.

The program in advanced prosthodontics is accredited by the Commission on Dental Accreditation, a special accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education. The program also meets the requirements of the American Board of Prosthodontics. A certificate is awarded upon successful completion of the program.

Required Courses

- ADNT 702 Physical Diagnosis Units: 2
- ADNT 703a Seminar: Combined Treatment Planning Units: 2 each
- ADNT 703b Seminar: Combined Treatment Planning Units: 2 each
- ADNT 703c Seminar: Combined Treatment Planning Units: 2 each
- ADNT 703d Seminar: Combined Treatment Planning Units: 2 each
- ADNT 703e Seminar: Combined Treatment Planning Units: 2 each
- ADNT 703f Seminar: Combined Treatment Planning Units: 2 each

- ADNT 703h Seminar: Combined Treatment Planning Units: 2 each
- ADNT 703i Seminar: Combined Treatment Planning Units: 2 each
- ADNT 704a Oral Biology Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 each
- ADNT 704b Oral Biology Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 each
- AMED 750a Physical Evaluation and Anesthesia Units: 2
- AMED 750b Physical Evaluation and Anesthesia Units: 2
- AMED 750c Physical Evaluation and Anesthesia Units: 1
- ANAT 701 Advanced Head and Neck Anatomy Units: 1
- CBY 575 Biologic Basis of Oral-facial Disease Units: 3
- DMAT 701 Advanced Biomaterials Units: 2

- REST 761h Clinic: Advanced Prosthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- REST 761i Clinic: Advanced Prosthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- REST 761j Clinic: Advanced Prosthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- REST 782a Clinic: Implant Prosthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- REST 782b Clinic: Implant Prosthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- REST 782c Clinic: Implant Prosthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- REST 790 Directed Research: Prosthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12

Integrated MD Degree/Oral and Maxillofacial Surgery Certificate Program

The Herman Ostrow School of Dentistry of USC and the Keck School of Medicine of USC offer a continuous 72-month integrated course of study leading to a medical degree in addition to a certificate in oral and maxillofacial surgery that prepares the graduate for the practice of oral and maxillofacial surgery. The program is fully integrated and will include advanced placement into the established medical school curriculum.

During the first three years, the student will function in the capacity of a medical student as well as a resident in the oral and maxillofacial surgery program. After the completion of the medical school curriculum, the MD degree will be awarded. This is required before the student can continue in the general surgery internship portion of the program. At the completion of the surgical internship, the student is qualified for medical licensure. During the fourth through sixth year, all required rotations and surgical training will be completed to fulfill the educational requirements of the Commission of Dental Accreditation of the American Dental Association and the American Association of Oral and Maxillofacial Surgeons.

The program is conducted at the Schools of Dentistry and Medicine and at the LAC+USC Medical Center. The course of study provides the graduates with the necessary background for certification by the American Board of Oral and Maxillofacial Surgery. The oral and maxillofacial surgery certificates are awarded upon successful completion of the entire 72-month course.

USC School of Dramatic Arts

One of the premier dramatic arts schools in the United States, the USC School of Dramatic Arts uniquely blends artistic training in a conservatory environment with outstanding faculty and the full academic experience found only within a major research university. This close-knit, supportive environment offers students the freedom to explore their artistic passions. Through programs of the highest caliber, as well as initiatives that provide access to professional experience, students are prepared for leadership in every facet of dramatic arts.

The school also attracts a wide range of guest speakers and lecturers, including some of the most distinguished talents from stage, screen and television. The location of the campus, literally in the center of the entertainment industry, makes the USC School of Dramatic Arts distinctive among colleges and universities in the United States.

Graduates of the school work professionally in all aspects of the entertainment industry. The school's faculty are dynamic teachers who are also artists working at the highest level of their profession.

The breadth of learning opportunities offered at the school prepares students for the spectrum of careers in the dramatic arts. The School of Dramatic Arts strives to instill confidence, integrity, excellence and artistic sensitivity into each of its students — traits that are essential to success in any field.

Emeritus Professors: Don Llewellyn, MFA; Eve Roberts, MFA; Andy Robinson; Robert R. Scales, PhD; Eric Trules; James Wilson, MFA

General Information

Degree Programs

The School of Dramatic Arts offers professional and academic degrees at the Bachelor and Master of Fine Arts levels. USC offers two degree programs to undergraduate students interested in the study of theatre arts. The professional degree programs — the Bachelor of Fine Arts (BFA) in Acting Stage, Screen and New Media; Design; Musical Theatre; Sound Design; Stage Management; and Technical Direction — offer a conservatory approach to training for students committed to pursuing careers in the professional theatre, film and television industries. The Bachelor of Arts degree program (BA) incorporates a broad, general education in addition to a thorough study of drama. The Bachelor of Arts in Visual and Performing Arts Studies provides students with a broad understanding of the various disciplines. The School of Dramatic Arts also offers minor programs in theatre, musical theatre , performing arts studies, performing leadership, performing social change, comedy (performance) and playwriting.

Bachelor of Arts

The Bachelor of Arts (BA) degree is ideal for students who want a broad education in addition to production and performance experience. The degree is offered in cooperation with the USC Dornsife College of Letters, Arts and Sciences.

Bachelor of Fine Arts

Acting for Stage, Screen and New Media: The BFA acting degree is a four-year professional training program that connects the foundation of classical theatre with innovative training for the contemporary performing artist, including on-camera techniques, voice over, motion capture, the digital landscape for actors and much more. An emphasis on professional development and networking culminates this groundbreaking new degree offering in the heart of Hollywood, which promises to be the standard-bearer for the next generation of acting programs. An audition is required for admission. The BFA acting program is highly competitive.

Design: The BFA program in design incorporates study in scenic, lighting and costume design. An interview is required for admission.

Musical Theatre: The BFA program in musical theatre is a four-year, professional training program focusing on providing students with the foundational skills needed to be healthy and expressive artists.

Sound Design: The BFA program in sound design offers the student a combination of technical, management and design training in sound design. The student is also introduced to sound recording and mixing through a series of courses offered by the USC Thornton School of Music. Students begin using this training as early as the second semester of the second year of enrollment. The skills acquired in the classroom are further explored through sound design assignments on School of Dramatic Arts public productions in each subsequent semester of the student's program. Students in the sound design program build and design the sound component for the majority of the School of Dramatic Arts' productions under the supervision of a professional staff of designers and theatre technicians. An interview is required for admission.

Stage Management: The BFA program in stage management offers the student a combination of technical, management and design training. Students begin using this training as early as the first year of enrollment. The skills acquired in the classroom are further explored through stage management assignments in each year of the student's program. An interview is required for admission.

Technical Direction: The BFA program in technical direction incorporates the study of theatrical design with training in the professional skills needed to execute stage designs. An interview is required for admission.

Students in the design, stage management, and technical direction programs design, stage manage, and build the majority of the School of Dramatic Arts' productions under the supervision of a professional staff of designers and theatre technicians.

Bachelor of Arts in Visual and Performing Arts Studies

The Bachelor of Arts in Visual and Performing Arts Studies is an interdisciplinary degree offered jointly by the School of Dramatic Arts, the School of Architecture, the School of Cinematic Arts, the Roski School of Art and Design, the Thornton School of Music, and the Dornsife College of Letters, Arts and Sciences.

Minor Programs

Theatre: This general minor in theatre invites students to explore the many facets of this exciting field. Students have the opportunity to take a variety of classes in acting, applied theatre arts, applied theatre arts/education, playwriting, literature, stage management, directing, costume design and production. The curriculum is very flexible and encourages students to develop a primary interest for upper-division course work. All minor students are eligible to participate in performance and production projects.

Comedy: The minor in comedy (performance) is a 20-unit minor that focuses on the theory and practice of comedy-making from the performer's perspective. Beginning with a foundation in the history of comic performance, and supplemented by courses in the fundamentals of acting and performance, the progression of the minor offers students a comprehensive theoretical and experiential education in the many differing disciplines of comedy.

Musical Theatre: The minor in musical theatre, interdisciplinary in nature, is a 27-unit program incorporating the study of acting, dance or movement, vocal arts and related musical subjects presented in association with the USC Thornton School of Music.

Performing Arts Studies: The minor in performing arts provides an interdisciplinary inquiry into the nature and aesthetics of the performing arts. It combines the disciplines of cinematic arts, dance, music and theatre. The minor is a unique course of study that looks at how the performing arts contribute to a culturally literate society.

Performing Leadership: The minor in performing leadership is the study and practice of embodied communication, collaboration and storytelling, creating pathways to authentic, dimensional, empathic leadership.

Performing Social Change: This minor creates opportunities for exploration of social change through performance and theatrical practice.

Playwriting: The minor in playwriting presents undergraduate students who are not theatre majors with a concentration in the discipline of playwriting as a means for broadening and deepening expression using the literary and performing arts. This minor offers a foundation for extended expression in dramatic writing and creative writing genres in general.

Master of Fine Arts

The Master of Fine Arts (MFA) with a major in theatre requires 48–64 units of course work at the 400 or 500 level. The areas of emphasis include acting, theatrical design, dramatic writing and directing. These programs provide a high level of practical experience. To ensure this, the number of students accepted in each area of emphasis is strictly limited. An interview is required for admission.

Master of Arts, Applied Theatre Arts

The Master of Arts in Applied Theatre Arts explores the intersection of theatre arts and cultural fieldwork, encompassing the fields of theatre and therapy, theatre in education and theatre for social change/community-based theatre. Practitioners of applied theatre arts supplement their work as classroom teachers, therapists, social workers, case managers, community organizers and social activists.

Auditions and Entrance to the Degree Programs

Admission to the various degree programs offered through the USC School of Dramatic Arts is granted through the university's regular admission procedures in conjunction with the school's supplementary application process. See the Admission section of this catalogue, Undergraduate and Graduate.

Admission to the BA in Theatre program is determined by academic record, expressed interest in theatre, and information required on the USC application for admission and the USC School of Dramatic Arts supplementary application. The supplementary application is accessible through the school's website.

In addition to submitting a USC application for admission and a dramatic arts supplementary application, an audition is required from applicants to the BFA in Acting for Stage, Screen and New Media, the BFA in Musical Theatre and the MFA in Acting. Applicants to our MFA in Dramatic Writing will be expected to provide a writing supplement. For the latest details on the audition process and requirements, please visit the school's website. Please note that the BA Emphasis programs and the BA in Visual and Performing Arts Studies major are only available to current USC students. If you're interested in any of these major options, please connect with your academic adviser once you're at USC.

Students wishing to transfer from a community college or another four-year college or university into any of our Bachelor of Fine Arts programs must follow the same application and audition process as first-year applicants. If admitted to a Bachelor of Fine Arts program, it is possible that transfer applicants will begin the curriculum as first-year students.

Applicants to any of the Bachelor of Fine Arts production programs (Design, Sound Design, Stage Management, Technical Direction) must also participate in a portfolio review with our production faculty. For the latest details on the portfolio review process and requirements, please visit the school's website.

More information on the admissions process and requirements may be obtained through the school's website or by contacting the Office of Admissions and Student Services, School of Dramatic Arts, University of Southern California, Los Angeles, CA 90089-0791 or via email at sdainfo@usc.edu.

International Study

In conjunction with Sarah Lawrence College and the British American Drama Academy, USC students have the opportunity to study theatre in London. For additional information, see International Study Options.

Bachelor's Degree

Acting for the Stage, Screen and New Media (BFA)

The BFA degree is a four-year, 132-unit, professional training program offering a vital and contemporary approach to the study of acting. The program comprises an integrated sequence of training in acting, voice, movement, camera, motion capture, the Web, voice-over, games and new media, and includes multiple opportunities for performance on stage, screen and new media platforms. The curriculum is based on the belief that an actor's emotional, imaginative, vocal and physical resources must be developed and prepared with maximum experience and flexibility for a fast-changing and challenging modern workplace. This training is combined with course work in critical and historical studies and technical theatre. An audition is required for

admission. The BFA in Acting for Stage, Screen and New Media program is unique and highly competitive.

All BFA Theatre majors are required to earn a grade point average of 2.75 (A = 4.0) in their theatre courses each semester. BFA students who fail to earn a GPA of 2.75 in their theatre courses will be placed on probation the following semester. Students who remain on probation for a consecutive second semester will be disqualified from the BFA program.

A student disqualified from continued study in the BFA program for failing to meet the GPA standards outlined above will be given the option of transferring into the BA program.

General Education Requirements

The university's General Education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. In addition, all entering freshmen are expected to complete a General Education Seminar during their first year at USC. These seminars satisfy one of the Core Literacy requirements above.

Note that courses within the major will also satisfy certain Core Literacy requirements. Please work with your major adviser to determine those courses.

Required Acting Courses for Emphasis (80 Units)

- THTR 105 Introduction to Screen Acting Units: 2
- THTR 115a Movement I Units: 2
- THTR 115b Movement I Units: 2
- THTR 120aL Acting I Units: 2
- THTR 120b Acting I Units: 2
- THTR 130 Introduction to Theatrical Production Units: 2
- THTR 140a Voice I Units: 2
- THTR 140b Voice I Units: 2
- THTR 215a Movement II Units: 2
- THTR 215b Movement II Units: 2
- THTR 220a Intermediate Acting I Units: 2
- THTR 220b Intermediate Acting I Units: 2
- THTR 240a Voice II Units: 2
- THTR 240b Voice II Units: 2
- THTR 250 Camera and Improvisation Units: 2
- THTR 305a Directing Units: 4
- THTR 315a Physical Theatre I Units: 2
- THTR 315b Physical Theatre I Units: 2
- THTR 320a Intermediate Acting II Units: 2
- THTR 320b Intermediate Acting II Units: 2
- THTR 340a Intermediate Voice Units: 2
- THTR 340b Intermediate Voice Units: 2
- THTR 397 Theatre Practicum Units: 1, 2, 3, 4 **(6 units required)**
- THTR 412 Performing Content Units: 4
- THTR 416 Creating Content for the Actor Units: 2.0
- THTR 420 Senior Project Units: 2
- THTR 427 Audition Technique for Film, Television and New Media Units: 2
- THTR 440 Advanced Voice: Voice-Over Acting Units: 2
- THTR 457 Film Acting Practicum Units: 4.0
- THTR 464 An Actor's Reel Units: 2
- THTR 467 Going Viral: Performance for New Media Units: 2
- THTR 471 Industry Landscape Units: 4
- THTR 480a Performance for Camera Units: 2
- THTR 497 Advanced Theatre Practicum Units: 2 **(2 units required)**

Critical Studies Core (16 units)

Complete the two required courses below. In addition, take one course from List A and one course from either List A or B.

- THTR 125 Text Studies for Production Units: 4
- THTR 225g Theatre Across History and Cultures Units: 4

List A Courses

- THTR 310 Comedy and Diversity Units: 4
- THTR 312 LGBTQ Theatre Units: 4
- THTR 395m Drama as Human Relations Units: 4
- THTR 405m Performing Identities Units: 4
- THTR 406 Theatre on the Edge Units: 4
- THTR 456 Latinx Theatre Units: 4
- THTR 460 Asian and Asian American Theatre: Identity and Aesthetics Units: 4
- THTR 476mw African American Theatre, Dance, and Performance Units: 4

List B Courses

- THTR 301 Greek and Roman Theatre Units: 4
- THTR 302 Shakespeare in His World Units: 4
- THTR 313 Comedy of Manners Units: 4
- THTR 314 Advanced Topics in Modern Drama Units: 4
- THTR 400 Eco-Theatre: Art and Science in Contemporary Plays Units: 4
- THTR 401 Contemporary Theatre in a Changing World Units: 4
- THTR 403 The Performing Arts Units: 4
- THTR 404 Acting Theory Units: 4

General Education Units: 36

Total Units: 132

Musical Theatre (BFA)

The BFA degree in Musical Theatre is a four-year, professional training program focusing on providing students with the foundational skills needed to be healthy and expressive artists. Through an immersion into each school's training, culture and critical studies (USC School of Dramatic Arts, USC Glorya Kaufman School of Dance and USC Thornton School of Music), the student will be exposed to both traditional and innovative practices. This will be implemented via a growing emphasis on contemporary and classic material. This will be explored in all appropriate classes and projects with an emphasis on the continuing integration of skills and the expansion of range including but not limited to: heighten language, period style, comedy, pop rock/contemporary styles, new works, on camera training and entrepreneur skills. The collaboration between the schools will be manifested in team teaching within the classroom.

All BFA theatre majors are required to earn a minimum grade point average of 2.75 (A= 4.0) in their theatre courses each semester. BFA students that fail to earn a minimum GPA of 2.75 in their theatre classes will be placed on probation the following semester. Students who remain on probation for a second consecutive semester will be disqualified from the BFA program.

A student disqualified from continued study in the BFA program for failing to meet the GPA standards outlined above will be given the option of transferring to the BA program.

Required Courses for the Musical Theatre Program: 100 units

Dance

- DANC 170 Choreography and Performance Units: 2
- DANC 200L Dance Technique for Musical Theatre Units: 2, 3 **(16 units required)**
- DANC 342gp International and Historical Perspectives on Dance Units: 4

Music

- MPVA 140 Vocal Production for Musical Theatre Units: 2
- MPVA 150 Musical Theatre Song Interpretation: Tin Pan Alley Era Units: 2

- MPVA 301 Individual Instruction Units: 1, 2
  (12 units required)
- MPVA 422 Musical Theatre Vocal Book Preparation Units: 2

Required General Education Units: 32

Total Units: 132

Theatre (BA)*

The Bachelor of Arts with a major in theatre is a comprehensive theatre degree offered in cooperation with the USC Dornsife College of Letters, Arts and Sciences. Candidates for the degree must complete the university general education requirements in addition to the courses in the major prescribed by the School of Dramatic Arts. A total of 128 units is required for completion of the degree.

General Education Requirements

The university's General Education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. In addition, all entering freshmen are expected to complete a General Education Seminar during their first year at USC. These seminars satisfy one of the Core Literacy requirements above.

Note that courses within the major will also satisfy certain Core Literacy requirements. Please work with your major adviser to determine those courses.

Required Courses (13 units)

- THTR 101 Introduction to Acting Units: 4
- THTR 130 Introduction to Theatrical Production Units: 2

One course (4 units) from:

- THTR 305a Directing Units: 4
- THTR 309 Dramaturgy Units: 4

One course (3 units) from:

- THTR 230 Communicating Theatrical Design Concepts Units: 3
- THTR 231 Costume Construction Units: 3
- THTR 232 Stage Lighting Units: 3
- THTR 233 Historic Costumes for the Theatre Units: 3
- THTR 335 Scenic Construction Units: 3

Critical Studies Core (16 units)

Complete the two required courses below. In addition, take one course from List A and one course from either List A or B.

- THTR 125 Text Studies for Production Units: 4
- THTR 225g Theatre Across History and Cultures Units: 4

List A

- THTR 310 Comedy and Diversity Units: 4
- THTR 312 LGBTQ Theatre Units: 4
- THTR 395m Drama as Human Relations Units: 4
- THTR 405m Performing Identities Units: 4
- THTR 406 Theatre on the Edge Units: 4
- THTR 456 Latinx Theatre Units: 4
- THTR 460 Asian and Asian American Theatre: Identity and Aesthetics Units: 4
- THTR 476mw African American Theatre, Dance, and Performance Units: 4

List B

- THTR 301 Greek and Roman Theatre Units: 4
- THTR 302 Shakespeare in His World Units: 4
- THTR 313 Comedy of Manners Units: 4
- THTR 314 Advanced Topics in Modern Drama Units: 4
- THTR 400 Eco-Theatre: Art and Science in Contemporary Plays Units: 4
- THTR 401 Contemporary Theatre in a Changing World Units: 4
- THTR 403 The Performing Arts Units: 4
- THTR 404 Acting Theory Units: 4

Required Upper-Division Theatre Electives: 25

General Education Units: 36

Elective Units: 38

Total Units: 128

Theatre, Acting Emphasis (BA)*

The BA Theatre, Emphasis in Acting is designed specifically to increase the versatility of its students so they are better educated, prepared and equipped to enter the professional arena of stage, film, television and new media.

General Education Requirements

The university's General Education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. In addition, all entering freshmen are expected to complete a General Education Seminar during their first year at USC. These seminars satisfy one of the Core Literacy requirements above.

Note that courses within the major will also satisfy certain Core Literacy requirements. Please work with your major adviser to determine those courses.

Required Acting/Production Courses for Emphasis (51 units)

- THTR 101 Introduction to Acting Units: 4
- THTR 105 Introduction to Screen Acting Units: 2
- THTR 130 Introduction to Theatrical Production Units: 2

- THTR 152 Introduction to Scene Study: Contemporary Plays Units: 2
- THTR 250 Camera and Improvisation Units: 2
- THTR 252a Intermediate Acting I: Drama/Comedy Units: 2
- THTR 252b Intermediate Acting I: Drama/Comedy Units: 2
- THTR 342a Basic Voice Units: 2
- THTR 352a Intermediate Acting II Units: 2
- THTR 354 Acting Shakespeare Units: 2

One Course (4 units):

- THTR 305a Directing Units: 4
- THTR 309 Dramaturgy Units: 4

One course in Design and Production (3 units) from:

- THTR 230 Communicating Theatrical Design Concepts Units: 3
- THTR 231 Costume Construction Units: 3
- THTR 232 Stage Lighting Units: 3
- THTR 233 Historic Costumes for the Theatre Units: 3
- THTR 333 Stage Management I Units: 3
- THTR 335 Scenic Construction Units: 3
- THTR 437 Scene Painting Units: 3
- THTR 439 Stage Properties Units: 3

Select 12 units in Practice from the following:

- THTR 316 Advanced Movement for Actors Units: 2
- THTR 342b Basic Voice Units: 2
- THTR 352b Intermediate Acting II Units: 2
- THTR 397 Theatre Practicum Units: 1, 2, 3, 4
- THTR 408a Dialects Units: 2
- THTR 408b Dialects Units: 2
- THTR 417 Stage Combat Units: 2
- THTR 419 Alexander Technique for Performers Units: 2
- THTR 442 Voice-over Acting Units: 2
- THTR 454 Acting Shakespeare II Units: 2
- THTR 475 Acting on Camera: The Collaborative Process Units: 4
- THTR 480a Performance for Camera Units: 2
- THTR 480b Performance for Camera Units: 2
- THTR 484 Acting in Television Commercials Units: 2
- THTR 497 Advanced Theatre Practicum Units: 2

Select 8 units in Career Preparation from the following:

- THTR 410 The Digital Actor Units: 2
- THTR 411 The Business of Acting Units: 2
- THTR 424 The Stage Artist as Entrepreneur Units: 2
- THTR 427 Audition Technique for Film, Television and New Media Units: 2
- THTR 464 An Actor's Reel Units: 2
- THTR 472 Professional Preparation for Actors Units: 2
- THTR 489 Theatre Internship Units: 2, 3, 4, 5, 6

One course in Movement (2 units) from:

- THTR 216 Movement for Actors Units: 2
- THTR 290 Introduction to Medical Clowning Units: 2
- THTR 317 Theatre Clown Units: 2

Critical Studies Core (16 units)

Complete the two required courses below. In addition, take one course from List A and one course from either List A or B.

- THTR 125 Text Studies for Production Units: 4
- THTR 225g Theatre Across History and Cultures Units: 4

List A

- THTR 310 Comedy and Diversity Units: 4
- THTR 312 LGBTQ Theatre Units: 4
- THTR 395m Drama as Human Relations Units: 4
- THTR 405m Performing Identities Units: 4
- THTR 406 Theatre on the Edge Units: 4
- THTR 456 Latinx Theatre Units: 4
- THTR 460 Asian and Asian American Theatre: Identity and Aesthetics Units: 4
- THTR 476mw African American Theatre, Dance, and Performance Units: 4

List B

- THTR 301 Greek and Roman Theatre Units: 4
- THTR 302 Shakespeare in His World Units: 4
- THTR 313 Comedy of Manners Units: 4
- THTR 314 Advanced Topics in Modern Drama Units: 4
- THTR 400 Eco-Theatre: Art and Science in Contemporary Plays Units: 4
- THTR 401 Contemporary Theatre in a Changing World Units: 4
- THTR 403 The Performing Arts Units: 4
- THTR 404 Acting Theory Units: 4

Required General Education Units: 36

Elective Units: 25

Total Units: 128

Theatre, Comedy Emphasis (BA)*

This emphasis encourages students to engage with the structure and practice of comedy through theoretical lenses and through practical exploration. All students are required to take a range of courses that will help them develop fundamental skills and experience in a range of different comic styles and forms. Some of the required courses are common to other SDA emphases and these courses (Introduction to Acting, Improvisation and Theatre Games, Introduction to Technical Theatre and Basic Voice) give students a grounding in understanding basic theatre techniques and processes. Students following the emphasis must then take a range of specialist comedy courses. Comedy and Performance and How Comedy Works introduce students to the history and development of comedy and equips them with a vocabulary for discussing comedy. They then take a range of courses to develop skills across a range of comedy styles including improvisation, clowning and stand-up comedy. A further required course, Comedy in LA, helps the students to understand the comedy scene in Los Angeles. Students also take 16 elective units, which might include performance in SDA shows, Acting for Sitcoms, Camera and Improvisation and other courses designed to help them develop their skills in writing, performing and understanding the comedy industry.

Required Comedy/Production Courses for Emphasis (64 units)

- THTR 101 Introduction to Acting Units: 4
- THTR 122 Improvisation and Theatre Games Units: 2
- THTR 130 Introduction to Theatrical Production Units: 2
- THTR 197g Comedy and Performance Units: 4
- THTR 202 The Fundamentals of Comedy Units: 2
- THTR 307 Comedy in LA Units: 2
- THTR 322 Improv 2: Advanced Improv Units: 2
- THTR 413 Writing Your Own Material Units: 2
- THTR 422 Improv 3: Long Form Improvisation Units: 2
- THTR 470 Sketch Comedy for Theatre Units: 2
- THTR 474 Introduction to Stand Up Comedy Units: 2
- THTR 482 Stand Up 2: Becoming A Pro Units: 2

Select 2 units from the following:

- THTR 290 Introduction to Medical Clowning Units: 2
- THTR 317 Theatre Clown Units: 2

Select 16 units from the following:

- THTR 250 Camera and Improvisation Units: 2
- THTR 342a Basic Voice Units: 2
- THTR 355 Acting for Sitcoms Units: 2
- THTR 397 Theatre Practicum Units: 1, 2, 3, 4 (4 units required)
- THTR 410 The Digital Actor Units: 2
- THTR 423 Magic Units: 2
- THTR 424 The Stage Artist as Entrepreneur Units: 2
- THTR 467 Going Viral: Performance for New Media Units: 2
- THTR 469 Satire and Parody in Performance Units: 2
- THTR 473 Sketch Comedy in Performance Units: 2
- THTR 479 Solo Performance Units: 4

- THTR 483 Characters of Comedy Units: 2
- THTR 497 Advanced Theatre Practicum Units: 2

Required Critical Studies Core (16 units)

Complete the two required courses below. In addition, take one course from List A and one course from either list A or B.

- THTR 125 Text Studies for Production Units: 4
- THTR 225g Theatre Across History and Cultures Units: 4

List A

- THTR 310 Comedy and Diversity Units: 4
- THTR 312 LGBTQ Theatre Units: 4
- THTR 395m Drama as Human Relations Units: 4
- THTR 405m Performing Identities Units: 4
- THTR 406 Theatre on the Edge Units: 4
- THTR 456 Latinx Theatre Units: 4
- THTR 460 Asian and Asian American Theatre: Identity and Aesthetics Units: 4
- THTR 476mw African American Theatre, Dance, and Performance Units: 4

List B

- THTR 301 Greek and Roman Theatre Units: 4
- THTR 302 Shakespeare in His World Units: 4

Theatre, Design Emphasis (BFA)

Bachelor of Fine Arts

The Bachelor of Fine Arts in Theatre provides four years of intensive training at the undergraduate level including design, sound design, stage management and technical direction. A total of 128 units of course work is required for the degree, including a 16-unit Critical Studies core in addition to a minimum of 60-74 Theatre units depending on the requirements for each emphasis.

All BFA Theatre majors are required to earn a grade point average of 2.75 (A = 4.0) in their theatre courses each semester. BFA students who fail to earn a GPA of 2.75 in their theatre courses will be placed on probation the following semester. Students who remain on probation for a consecutive second semester will be disqualified from the BFA program.

A student disqualified from continued study in the BFA program for failing to meet the GPA standards outlined above will be given the option of transferring into the BA program.

Required Courses for the Design Emphasis (74 units)

- THTR 101 Introduction to Acting Units: 4
- THTR 131a Advanced Theatrical Production Units: 2
- THTR 131b Advanced Theatrical Production Units: 2
- THTR 132a Art of Theatrical Design Units: 2
- THTR 132b Art of Theatrical Design Units: 2
- THTR 241 Methods and Materials Units: 2
- THTR 330 Scene Design I Units: 4
- THTR 331 Costume Design I Units: 4
- THTR 332 Lighting Design I Units: 4
- THTR 397 Theatre Practicum Units: 1, 2, 3, 4 (6 units required)
- THTR 407a Drawing and Rendering for the Theatre Units: 2
- THTR 407b Drawing and Rendering for the Theatre Units: 2
- THTR 431 Seminar in Theatre Design Units: 2
- THTR 435 Advanced Theatrical Drafting Units: 3
- THTR 493a Periods and Styles Units: 2
- THTR 493b Periods and Styles Units: 2
- THTR 497 Advanced Theatre Practicum Units: 2 (4 units required)

One Course (4 units) from:

- THTR 305a Directing Units: 4
- THTR 309 Dramaturgy Units: 4

One course (3 units) from:

- THTR 231 Costume Construction Units: 3
- THTR 409 Advanced Drafting: Vectorworks Units: 3

Three courses (9 units) from:

- THTR 213 Corset Construction Units: 3
- THTR 233 Historic Costumes for the Theatre Units: 3
- THTR 303 Projection Design I Units: 3
- THTR 308 Programming for Lighting Units: 3
- THTR 437 Scene Painting Units: 3
- THTR 439 Stage Properties Units: 3

Two courses (6 units) from:

- THTR 432a Scene Design II Units: 3
- THTR 433a Costume Design II Units: 3
- THTR 434a Lighting Design II Units: 3
- THTR 402 Projection Design II Units: 3

One course (3 units) from:

- THTR 432b Scene Design II Units: 3
- THTR 433b Costume Design II Units: 3
- THTR 434b Lighting Design II Units: 3

Critical Studies Core (16 units)

Complete the two required courses below. In addition, take one course from List A and one course from either List A or B.

- THTR 125 Text Studies for Production Units: 4
- THTR 225g Theatre Across History and Cultures Units: 4

List A

- THTR 310 Comedy and Diversity Units: 4
- THTR 312 LGBTQ Theatre Units: 4
- THTR 395m Drama as Human Relations Units: 4

BFA students who fail to earn a GPA of 2.75 in their theatre courses will be placed on probation the following semester. Students who remain on probation for a consecutive second semester will be disqualified from the BFA program.

A student disqualified from continued study in the BFA program for failing to meet the GPA standards outlined above will be given the option of transferring into the BA program.

General Education Requirements

The university's General Education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. In addition, all entering freshmen are expected to complete a General Education Seminar during their first year at USC. These seminars satisfy one of the Core Literacy requirements above.

Note that courses within the major will also satisfy certain Core Literacy requirements. Please work with your major adviser to determine those courses.

Required Courses for the Stage Management Emphasis (60 units)

- MPKS 150a Beginning Piano Units: 2
- THTR 101 Introduction to Acting Units: 4
- THTR 131a Advanced Theatrical Production Units: 2
- THTR 131b Advanced Theatrical Production Units: 2
- THTR 132a Art of Theatrical Design Units: 2
- THTR 132b Art of Theatrical Design Units: 2
- THTR 232 Stage Lighting Units: 3
- THTR 333 Stage Management I Units: 3
- THTR 336 Introduction to Sound Design Units: 3
- THTR 397 Theatre Practicum Units: 1, 2, 3, 4 (6 Units Required)
- THTR 430 Stage Management II Units: 3
- THTR 443 Production Management Units: 4
- THTR 453 Taking it on the Road and Beyond Units: 4
- THTR 491 Theatre Organization and Administration Units: 4
- THTR 493a Periods and Styles Units: 2
- THTR 493b Periods and Styles Units: 2
- THTR 497 Advanced Theatre Practicum Units: 2

One course (4 units) from:

- THTR 305a Directing Units: 4
- THTR 309 Dramaturgy Units: 4

One course (4 units) from:

- THTR 330 Scene Design I Units: 4
- THTR 331 Costume Design I Units: 4

Critical Studies Core (16 units)

Complete the two required courses below. In addition, take one course from List A and one course from either List A or B.

- THTR 125 Text Studies for Production Units: 4
- THTR 225g Theatre Across History and Cultures Units: 4

List A

- THTR 310 Comedy and Diversity Units: 4
- THTR 312 LGBTQ Theatre Units: 4
- THTR 395m Drama as Human Relations Units: 4
- THTR 405m Performing Identities Units: 4
- THTR 406 Theatre on the Edge Units: 4
- THTR 456 Latinx Theatre Units: 4
- THTR 460 Asian and Asian American Theatre: Identity and Aesthetics Units: 4
- THTR 476mw African American Theatre, Dance, and Performance Units: 4

List B

- THTR 301 Greek and Roman Theatre Units: 4
- THTR 302 Shakespeare in His World Units: 4

- THTR 313 Comedy of Manners Units: 4
- THTR 314 Advanced Topics in Modern Drama Units: 4
- THTR 400 Eco-Theatre: Art and Science in Contemporary Plays Units: 4
- THTR 401 Contemporary Theatre in a Changing World Units: 4
- THTR 403 The Performing Arts Units: 4
- THTR 404 Acting Theory Units: 4

General Education Units: 36

Theatre, Technical Direction Emphasis (BFA)

Bachelor of Fine Arts

The Bachelor of Fine Arts in Theatre provides four years of intensive training at the undergraduate level including design, sound design, stage management and technical direction. A total of 128 units of course work is required for the degree, including a 16-unit Critical Studies core in addition to a minimum of 60-74 Theatre units depending on the requirements for each emphasis.

All BFA Theatre majors are required to earn a grade point average of 2.75 (A = 4.0) in their theatre courses each semester. BFA students who fail to earn a GPA of 2.75 in their theatre courses will be placed on probation the following semester. Students who remain on probation for a consecutive second semester will be disqualified from the BFA program.

A student disqualified from continued study in the BFA program for failing to meet the GPA standards outlined above will be given the option of transferring into the BA program.

Visual and Performing Arts Studies (BA)*

The Bachelor of Arts in Visual and Performing Arts Studies is an interdisciplinary degree offered jointly by the Kaufman School of Dance, the School of Dramatic Arts, the School of Architecture, the School of Cinematic Arts, the Roski School of Art and Design, the Thornton School of Music, and the Dornsife College of Letters, Arts and Sciences. Candidates for the degree must complete the university general education requirements in addition to the courses in the major. Students in this major complete a core of required courses that provides them with a broad understanding of the various disciplines. The work in the major is completed by choosing courses from a wide array of course offerings from all the participating schools. A total of 128 units is required for completion of the degree.

General Education Requirements

The university's General Education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. In addition, all entering freshmen are expected to complete a General Education Seminar during their first year at USC. These seminars satisfy one of the Core Literacy requirements above.

Note that courses within the major may also satisfy certain Core Literacy requirements. Please work with your major adviser to determine those courses.

Required Core Courses (Survey of the Arts)

- AHIS 120gp Foundations of Western Art: Prehistoric to Renaissance Units: 4
- ARCH 304x Intensive Survey: Prehistory to the Present Units: 4
- CRIT 150gp Histories of Art, Design and Visual Culture Units: 4
- CTCS 393 Postwar Hollywood, 1946-1962 Units: 4
- DANC 280g Introduction to Dance as an Art Form Units: 4
- MUSC 115gp Western Music as Sounding History Units: 4
- THTR 125 Text Studies for Production Units: 4

Total: 28

Case Studies in the Arts:

12 units of upper division course work from the following:

Architecture:

- ARCH 314 History of Architecture: Contemporary Issues Units: 3
- ARCH 440m Literature and the Urban Experience Units: 4
- ARCH 444 Great Houses of Los Angeles Units: 4
- ARCH 454 Contemporary Asian Architecture Units: 4
- ARCH 465 The Landscape Imaginary Units: 4
- ARCH 549 Fundamentals of Heritage Conservation Units: 3

Cinematic Arts:

- CTAN 451 History of Animation Units: 2
- CTCS 392 History of the American Film, 1925–1950 Units: 4
- CTCS 394 History of the American Film, 1977–present Units: 4
- CTCS 406 History of American Television Units: 4
- CTCS 407 African American Cinema Units: 4
- CTCS 409 Censorship in Cinema Units: 4

Overseas Study Opportunities:

- FREN 432 French Theatre Units: 4 (Paris Semester)
- SPAN 464 Introduction to Contemporary Spanish Theatre Units: 4 (Madrid Center)

Minor

Comedy (Performance) Minor

The minor in comedy (performance) is a 20-unit minor that focuses on the theory and practice of comedymaking from the performer's perspective. Beginning with a foundation in the history of comic performance, and supplemented by courses in the fundamentals of acting and performance, the progression of the minor offers students a comprehensive theoretical and experiential education in the many differing disciplines of comedy.

Required Courses (16 units)

- THTR 101 Introduction to Acting Units: 4
- THTR 122 Improvisation and Theatre Games Units: 2
- THTR 197g Comedy and Performance Units: 4
- THTR 202 The Fundamentals of Comedy Units: 2
- THTR 474 Introduction to Stand Up Comedy Units: 2

One Course (2 units) from:

- THTR 290 Introduction to Medical Clowning Units: 2
- THTR 317 Theatre Clown Units: 2

Required Elective Courses (4 units)

- THTR 307 Comedy in LA Units: 2
- THTR 310 Comedy and Diversity Units: 4
- THTR 313 Comedy of Manners Units: 4
- THTR 355 Acting for Sitcoms Units: 2
- THTR 413 Writing Your Own Material Units: 2
- THTR 422 Improv 3: Long Form Improvisation Units: 2
- THTR 423 Magic Units: 2

- THTR 467 Going Viral: Performance for New Media Units: 2
- THTR 469 Satire and Parody in Performance Units: 2
- THTR 470 Sketch Comedy for Theatre Units: 2
- THTR 473 Sketch Comedy in Performance Units: 2
- THTR 482 Stand Up 2: Becoming A Pro Units: 2
- THTR 483 Characters of Comedy Units: 2

Total Units: 20

Performing Arts Studies Minor

The minor in performing arts provides an interdisciplinary inquiry into the nature and aesthetics of the performing arts. It combines the disciplines of cinematic arts, dance, music and theatre. The minor is a unique course of study that looks at how the performing arts contribute to a culturally literate society. The minor in performing arts studies is a 20-unit program.

Required Courses

Choose one capstone course:

- THTR 395m Drama as Human Relations Units: 4
- THTR 403 The Performing Arts Units: 4
- THTR 405m Performing Identities Units: 4

Plus four to six courses (16 units) from the following list

The additional 16 units must be completed outside of the student's school. At least 4 units must be selected from each school.

- CTCS 190g Introduction to Cinema Units: 4
- CTCS 200g History of the International Cinema I Units: 4
- CTCS 201 History of the International Cinema II Units: 4
- CTCS 392 History of the American Film, 1925–1950 Units: 4
- CTCS 393 Postwar Hollywood, 1946-1962 Units: 4
- CTCS 404 Television Criticism and Theory Units: 4
- CTCS 464 Film and/or Television Genres Units: 4
- CTCS 469 Film and/or Television Style Analysis Units: 4
- DANC 170 Choreography and Performance Units: 2
- DANC 280g Introduction to Dance as an Art Form Units: 4
- DANC 302g Hip Hop Don't Stop: Black Social Dance Culture and Media Units: 4
- DANC 312gw African American Dance Units: 4
- DANC 342gp International and Historical Perspectives on Dance Units: 4
- DANC 352g Dancing with Words Units: 4
- DANC 363g Dancing on the Screen Units: 4
- DANC 432 Creativity, Culture, Commerce and Community Units: 2
- DANC 442 International and Historical Perspectives on Dance II Units: 4
- MUSC 102gw World Music Units: 4
- MUSC 115gp Western Music as Sounding History Units: 4
- MUSC 200gmw The Broadway Musical: Reflections of American Diversity Units: 4
- MUSC 210g Electronic Music and Dance Culture Units: 4
- MUSC 250gmw The Music of Black Americans Units: 4
- MUSC 320gmw Hip-hop Music and Culture Units: 4
- MUSC 371g Musical Genre Bending Units: 4
- MUSC 372g Music, Turmoil and Nationalism Units: 4
- MUSC 373g Writing About Popular Music Units: 4
- THTR 301 Greek and Roman Theatre Units: 4
- THTR 302 Shakespeare in His World Units: 4

- THTR 312 LGBTQ Theatre Units: 4
- THTR 313 Comedy of Manners Units: 4
- THTR 314 Advanced Topics in Modern Drama Units: 4
- THTR 400 Eco-Theatre: Art and Science in Contemporary Plays Units: 4
- THTR 401 Contemporary Theatre in a Changing World Units: 4
- THTR 403 The Performing Arts Units: 4
- THTR 405m Performing Identities Units: 4
- THTR 406 Theatre on the Edge Units: 4
- THTR 456 Latinx Theatre Units: 4
- THTR 460 Asian and Asian American Theatre: Identity and Aesthetics Units: 4
- THTR 476mw African American Theatre, Dance, and Performance Units: 4
- THTR 481 From The Border to Broadway Units: 4
- THTR 493a Periods and Styles Units: 2
- THTR 493b Periods and Styles Units: 2

Total units required: 20

Performing Leadership Minor

The study and practice of embodied communication, collaboration and storytelling, creating pathways to authentic, dimensional, empathic leadership.

Required Courses (10 units)

- THTR 122 Improvisation and Theatre Games Units: 2
- THTR 421 Public Speaking as Performance: A Course for Non-Actors Units: 2
- THTR 426 Being on Screen: A Class for Presenters, Hosts, and Others Units: 2
- THTR 479 Solo Performance Units: 4

Select 10 units from the following:

- THTR 105 Introduction to Screen Acting Units: 2
- THTR 318 Creating the Hit Podcast Units: 2
- THTR 322 Improv 2: Advanced Improv Units: 2
- THTR 405m Performing Identities Units: 4
- THTR 414 Secrets of Storytelling Units: 2
- THTR 419 Alexander Technique for Performers Units: 2
- THTR 445 Developing Your Speaking Voice Units: 2
- THTR 467 Going Viral: Performance for New Media Units: 2
- THTR 474 Introduction to Stand Up Comedy Units: 2
- THTR 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8

Total Units: 20

Performing Social Change Minor

Performing social change brings the language and practice of Dramatic Arts into communities and events that seek to redress power imbalances, create healing and dialogue and develop new systems of interaction, communication, well-being and governance. This minor creates opportunities for exploration of social change through performance and theatrical practice.

Required Courses (12 Units)

- THTR 122 Improvisation and Theatre Games Units: 2
- THTR 395m Drama as Human Relations Units: 4
- THTR 488mw Theatre in the Community Units: 4
- THTR 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8 **(2 units of Directed Research is required)**

Elective Units (8 units from the following):

- THTR 290 Introduction to Medical Clowning Units: 2
- THTR 310 Comedy and Diversity Units: 4
- THTR 312 LGBTQ Theatre Units: 4
- THTR 322 Improv 2: Advanced Improv Units: 2
- THTR 401 Contemporary Theatre in a Changing World Units: 4
- THTR 405m Performing Identities Units: 4
- THTR 406 Theatre on the Edge Units: 4
- THTR 421 Public Speaking as Performance: A Course for Non-Actors Units: 2
- THTR 456 Latinx Theatre Units: 4
- THTR 476mw African American Theatre, Dance, and Performance Units: 4
- THTR 479 Solo Performance Units: 4

Total Units: 20

Playwriting Minor

The minor in playwriting presents undergraduate students who are not theatre majors with a concentration in the discipline of playwriting as a means for broadening and deepening expression using the literary and performing arts. This minor

offers a foundation for extended expression in dramatic writing and creative writing genres in general; fostering skills in research, development, communication, collaboration and craftsmanship in the process of preparing a play for its realization on stage. The minor in playwriting is a 20-unit program.

Required Courses

- THTR 101 Introduction to Acting Units: 4 or
- THTR 125 Text Studies for Production Units: 4
- THTR 365 Playwriting I Units: 4
- THTR 366 Playwriting II Units: 4
- THTR 479 Solo Performance Units: 4

One course (4 units) from:

- THTR 305a Directing Units: 4
- THTR 309 Dramaturgy Units: 4

Theatre Minor

The general minor in theatre invites students to explore the many facets of this exciting field. Students have the opportunity to take a variety of classes in acting, playwriting, literature, stage management, directing, costume design and production. The curriculum is flexible and encourages students explore theatre through a broad combination of introductory and upper-division course work. All minor students are also eligible to participate in performance and production projects.

Required Courses

- THTR 101 Introduction to Acting Units: 4
- THTR 125 Text Studies for Production Units: 4
- THTR 130 Introduction to Theatrical Production Units: 2

One of the following:

- THTR 225g Theatre Across History and Cultures Units: 4
- THTR 230 Communicating Theatrical Design Concepts Units: 3
- THTR 231 Costume Construction Units: 3
- THTR 233 Historic Costumes for the Theatre Units: 3
- THTR 252a Intermediate Acting I: Drama/Comedy Units: 2
- THTR 305a Directing Units: 4
- THTR 333 Stage Management I Units: 3
- THTR 336 Introduction to Sound Design Units: 3
- THTR 365 Playwriting I Units: 4

Required upper-division THTR electives: 10-12 units

Required theatre units: 24

Master's Degree

Applied Theatre Arts (MA)

The Master of Arts in Applied Theatre Arts explores the intersection of theatre and cultural fieldwork, encompassing the fields of theatre and therapy, theatre in education and theatre for social change/community-based theatre. This combined area of study weaves all three disciplines together under the aegis of training practitioners in the *art* of popular theatre with primarily marginalized communities. Practitioners of applied theatre arts supplement their work as classroom teachers, therapists, social workers, case managers, community organizers and social activists to engage public groups to obtain their goals and desires by using the tools of theatre to expedite dialogue and foster an atmosphere of greater critical consciousness and increased agency. A written and oral examination is required upon completion of course work.

International Study

All students will participate in an international externship during the summer following their academic year. This externship takes place in an approved overseas site where the practice of applied theatre arts is well established, with whom the university has a contractual agreement for supervised observation. This externship intends to provide a supervisory, logistical and theoretical container for students to explore cultural fieldwork in the international arena.

Curricula for the Master of Arts Degree

Applied Theatre Arts

- THTR 505 Staging Community-based Theatre Units: 3
- THTR 521 Engaging Community Narratives Units: 3
- THTR 544 Embodied Poetics Units: 2
- THTR 568 Popular Theatre for Education and Development Units: 3
- THTR 577 Theatre and Therapy for Cultural Fieldwork Units: 3
- THTR 578 Theatre of the Oppressed: Theory, Games, and Techniques Units: 4
- THTR 579 Writing Culture Units: 3
- THTR 586a Applied Theatre Arts: Los Angeles Residency Units: 2
- THTR 586b Applied Theatre Arts: Los Angeles Residency Units: 2

- THTR 592a Participatory Action Research for Community-based Theatre Units: 2
- THTR 592b Participatory Action Research for Community-based Theatre Units: 2
- THTR 598 Applied Theatre Arts: International Externship Units: 2

Total Required Units: 38

Theatre (MFA)

The Master of Fine Arts in theatre allows the choice of an area of emphasis in theatre performance studies including acting, directing, dramatic writing or theatrical design.

Seventy-two units of study at the 400- or 500-level are required for the acting emphasis, 72 units for the dramatic writing emphasis and 48 units for the directing and theatrical design emphases. Regardless of the emphasis, at least two-thirds of the units must be at the 500 level or higher. In design, instead of a conventional thesis, the MFA student completes a final project in the area of design and defends it orally before the design faculty. A grade point average of 3.0 must be achieved in all graduate work taken in the School of Dramatic Arts. Graduate candidates whose undergraduate degrees are in disciplines other than theatre may be required to satisfy undergraduate prerequisites in theatre as determined by School of Dramatic Arts faculty.

Curricula for the Master of Fine Arts Degree

Acting Emphasis

- THTR 507 Casting Director Workshop Units: 2.0
- THTR 515a Advanced Movement Units: 2

- THTR 575 Creative Production Projects Units: 6
- THTR 580a Performance with Camera Units: 2
- THTR 580b Performance with Camera Units: 2
- THTR 597 Theatre Practicum Units: 1, 2, 3, 4 (8 Units Required)

Total units: 72

Directing Emphasis

- THTR 520a Advanced Acting Units: 4
- THTR 520b Advanced Acting Units: 4
- THTR 525 Seminar in Contemporary Theatre Units: 4
- THTR 528 Seminar in Dramatic Analysis Units: 4
- THTR 555 Directing Fundamentals Units: 2
- THTR 556a Directing Units: 2
- THTR 556b Directing Units: 2
- THTR 558a Design for Directors Units: 2
- THTR 558b Design for Directors Units: 2
- THTR 567a Studies in Playwriting Units: 4
- THTR 591 Seminar in Producing Theatre Units: 4
- THTR 593 MFA Project Units: 2
- Electives by advisement Units: 10

Total units: 48

Theatrical Design Emphasis

Two courses from:

- THTR 550a Seminar in Scene Design Units: 3
- THTR 552a Seminar in Costume Design Units: 3
- THTR 553a Seminar in Lighting Design Units: 3

Two continuing courses from:

- THTR 550b Seminar in Scene Design Units: 3
- THTR 552b Seminar in Costume Design Units: 3
- THTR 553b Seminar in Lighting Design Units: 3

One remaining course from:

- THTR 550a Seminar in Scene Design Units: 3
- THTR 552a Seminar in Costume Design Units: 3
- THTR 553a Seminar in Lighting Design Units: 3

All of the following:

- THTR 407a Drawing and Rendering for the Theatre Units: 2
- THTR 407b Drawing and Rendering for the Theatre Units: 2
- THTR 435 Advanced Theatrical Drafting Units: 3
- THTR 493a Periods and Styles Units: 2
- THTR 493b Periods and Styles Units: 2
- THTR 593 MFA Project Units: 2

Two seminars, one of which must be

- THTR 528 Seminar in Dramatic Analysis Units: 4 (8 Units Required)

400- or 500-level electives

- 400- or 500-level electives by advisement, 5 units of which must be at the 500 level Units: 10

Total units: 48

Dramatic Writing Emphasis

- CTWR 513 Writing the Short Script Units: 2
- CTWR 514a Basic Dramatic Screenwriting Units: 2
- CTWR 514b Basic Dramatic Screenwriting Units: 2
- CTWR 521 Advanced Hour-Long Television Drama Units: 2
- THTR 500 Dramaturgical Perspectives and Approaches Units: 2 (10 units required)
- THTR 501 Poetry and Prose into Drama Units: 4 **(12 units required)**
- THTR 506 Advanced Creating Characters Units: 2
- THTR 527 Writing the Pacific Rim: Global and Western Dramatic Writing Units: 4
- THTR 529a Textual Studies for Performance Units: 4
- THTR 566 Dramatic Writing Studio Units: 4 (24 units required)
- THTR 596 Thesis Development and Attainment Units: 2 (4 units required)
- THTR 574a Dramatic Writing Across Media for Playwrights Units: 2
- THTR 574b Dramatic Writing Across Media for Playwrights Units: 2

Total units: 72

A minimum of 72 units of graduate course work must be completed prior to the degree being granted. Thesis Requirement: The student is required to complete a thesis portfolio consisting of four theatre projects: (1) a full-length original play, (2) a full-length original play or an adaptation, (3) a full-length screenplay, (4) a project that is either a play of any length, or a short subject or feature length script, a set of television speculative scripts (either in three half-hour short form of drama from the same TV program or a set of characters; or one-hour long form) or an interdisciplinary/multimedia project (approved in advance by the dramatic writing faculty.) An oral defense and review by program faculty and the developing portfolio is required when the student has completed two-thirds of the program, generally in the fall term of the student's third year.

USC Rossier School of Education

The USC Rossier School of Education is one of the world's premier schools of education. It is committed to preparing teachers, researchers, counselors, administrators and curricular specialists for leadership positions, and to having a positive impact on the field of education locally, throughout our nation and throughout the world.

The mission of the USC Rossier School of Education is to prepare leaders to advance educational equity through practice, research and policy. We work to improve learning opportunities and outcomes in urban settings and other educational settings and to address disparities that undermine the educational opportunities of historically marginalized groups. We teach our students to value and respect the cultural and linguistic resources in which they work and to interrogate the systems of power that shape policies and practices. Through innovative thinking and research, we strive to solve the most intractable educational problems.

Our vision is a world in which every student, regardless of personal circumstance, is able to learn and succeed. We believe that USC Rossier, as a top-tier research institution, has the responsibility and the ability to prepare educational leaders, researchers and practitioners so that they will have the knowledge and skills needed to realize this vision.

The USC Rossier School of Education is committed to our four academic themes of leadership, diversity, learning and accountability that guide all academic, research and service efforts within our school.

The USC Rossier Commitment

At USC Rossier, we stand by our students and graduates and are prepared to support them long after they leave us. From our classrooms to your career, our commitment to your success is unwavering. We prepare our graduates to be change agents, and equip them with the critical thinking and problem-solving skills necessary to assess challenges and implement creative solutions. If at any point in your career you're faced with an issue in which you could benefit from the professional guidance of our expert faculty, we encourage you to take advantage of the USC Rossier Commitment. A dedicated team of faculty members will work with you to identify the issue and develop a strategic plan of action to facilitate your success.

Administration

Pedro A. Noguera, PhD, *Dean, Emery Stoops and Joyce King Stoops Dean's Chair in Education*
Lawrence O. Picus, PhD, *Associate Dean for Research and Faculty Affairs; Richard T. Cooper and Mary Catherine Cooper Chair in Public School Administration*
Darline Robles, PhD, *Associate Dean of Equity and Inclusion*
Kathy Stowe, EdD, *Associate Dean for Academic Programs*
Julie R. Posselt, PhD, *Faculty Council Chair and Associate Professor*
Teri Adams, *Associate Dean of Administration and Finance*
Alexander Pampalone, *Associate Dean for Advancement*
Tabitha Courtney, *Assistant Dean and Executive Director, Strategic Enrollment Services*
Wendy E. Shattuck, *Assistant Dean and Executive Director of Communications*

Faculty

Emery Stoops and Joyce King Stoops Dean's Chair in Education: Pedro A. Noguera, PhD
Richard T. Cooper and Mary Catherine Cooper Chair in Public School Administration: Lawrence O. Picus, PhD
Veronica and David Hagen Endowed Chair in Women's Leadership: Karen Symms Gallagher, PhD
Katzman/Ernst Chair in Educational Entrepreneurship, Technology and Innovation: Alan Arkatov
Irving R. and Virginia Archer Melbo Chair in Educational Administration: Rudy Castruita, EdD
Clifford H. and Betty C. Allen Professorship in Urban Education: Shaun R. Harper, PhD
Stephen H. Crocker Professor of Education: Gale M. Sinatra, PhD
Dean's Professor in Education and Engineering: John B. Slaughter, PhD
Leslie Wilbur and Norma Lash Wilbur-Evelyn Kieffer Professor of Higher Education: Adrianna Kezar, PhD
Professors: Patricia Burch, PhD; Karen Symms Gallagher, PhD; Shaun R. Harper, PhD; Mary Helen Immordino-Yang, EdD; Henry Jenkins, PhD *(Annenberg)*; Adrianna Kezar, PhD; Franklin Manis, PhD *(Dornsife)*; Julie Ann Marsh, PhD; Tatiana Melguizo, PhD; Pedro A. Noguera, PhD; Harold F. O'Neil Jr., PhD; Daphna Oyserman, PhD *(Dornsife)*; Gary Painter, PhD *(Price)*; Lawrence O. Picus, PhD; Gale Sinatra, PhD; John B. Slaughter, PhD; Brendesha Tynes, PhD
Associate Professors: Darnell Cole, PhD; Erika A. Patall, PhD; Morgan Polikoff, PhD; Julie Posselt, PhD; David Schwartz, PhD *(Dornsife)*
Assistant Professors: Stephen Aguilar, PhD; Yasemin Copur-Gencturk, PhD; Adrian Huerta, PhD; Adam Kho, PhD; David Quinn, EdD
Professors of Clinical Education: Shafiqa Ahmadi, JD; Mary Andres, PsyD; David Cash, EdD; Rudy Castruita, EdD; Ruth Chung, PhD; Ginger Clark, PhD; Jenifer Crawford, PhD; Michael Escalante, EdD; Robert Filback, PhD; Frederick W. Freking, PhD; Alan Green, PhD; Angela Hasan, PhD; Kimberly Hirabayashi, PhD; Sandra N. Kaplan, EdD; Anthony B. Maddox, PhD; Azad Madni, PhD *(Viterbi)*; Eugenia Mora-Flores, EdD; Maria Ott, EdD; John Pascarella, PhD; Margo Pensavalle, EdD; Mark Power Robison, PhD; Darline Robles, PhD; Helena Seli, PhD; Julie Slayton, JD, PhD; Kathy Stowe, EdD; Tracy Poon Tambascia, EdD; Patricia Tobey, PhD; Kenneth Yates, EdD
Associate Professors of Clinical Education: Paula Carbone, PhD; Artineh Samkian, EdD; Cathy Krop, PhD
Associate Professor of Practice: Brandi Jones, EdD *(Viterbi)*
Assistant Professors of Clinical Education: Sheila Banuelos, EdD; Nasser Cortez, EdD; Yajaira Curiel, PhD; Briana Hinga, PhD; Akilah Lyons-Moore, EdD
Teaching Professors of Clinical Education: Bryant Adibe, MD; Kimberly Ferrario, PhD; Courtney Malloy, PhD
Associate (Teaching) Professors of Clinical Education: Monique Datta, EdD; Corinne Hyde, EdD; Emmy Min, PhD; Ekaterina Moore, PhD; Marsha Riggio, PhD
Assistant (Teaching) Professors of Clinical Education: Stephanie Dewing, EdD; Adrian Donato, EdD; Derisa Grant, PhD; Jennifer Phillips, DLS; Rufus Tony Spann, PhD
Professor of Practice: Jerome Lucido, PhD
Research Professor: Zoë Corwin, PhD
Senior Lecturer: Kate O'Connor
Senior Fellow: Douglas Lynch, PhD
Executives in Residence: Donald Hossler, PhD; N Rao Machiraju, EdD
Emeritus Professors: Lloyd Armstrong, PhD; Estela Mara Bensimon, EdD; Earl Carnes, PhD; Richard Clark, EdD; Myron H. Dembo, PhD; Mike Diamond, PhD *(Marshall)*; Robert Ferris, EdD; Rodney K. Goodyear, PhD; Mabel E. Hayes, PhD; Edward J. Kazlauskas, PhD; Frederick Knirk, EdD; Steven Krashen, PhD; Johanna K. Lemlech, EdD; James Magary, PhD; Merle Marks, EdD; David Marsh, PhD; William G. Millington, EdD; William F. O'Neill, PhD; Robert Rueda, PhD; Audrey J. Schwartz, EdD; Robert A. Smith, PhD; William G. Tierney, PhD; Eddie Williams, EdD; Kathleen Wulf, PhD
Emeritus Professors of Clinical Education: Reynaldo Baca, PhD; Pedro Garcia, EdD; Michael Genzuk, PhD; Stuart E. Gothold,

EdD; Dennis Hocevar, PhD; Julietta Shakhbagova, PhD; Sylvia Rousseau, EdD; Melora Sundt, PhD
Emeritus Professor of Clinical Psychology: Rodney K. Goodyear, PhD
Emeritus Adjunct Professor: Raymond J. Pat Gallagher, PhD
Stoops Dean and Cooper Chair Emeritus: Guilbert C. Hentschke, PhD
Emeritus Associate Professor of Clinical Education: William Maxwell, PhD
Research Professor Emeritus of Education: Allen Munro, PhD

Degree and Minor Programs

The USC Rossier School of Education offers the following degree programs: Master of Arts, Teaching; Master of Arts, Teaching: Teaching English to Speakers of Other Languages; Master of Education, Educational Counseling; Master of Education, Learning Design and Technology; Master of Education, Postsecondary Administration and Student Affairs; Master of Education, School Counseling; Master of Education, Enrollment Management and Policy; Master of Science, Marriage and Family Therapy; Doctor of Philosophy, Urban Education Policy/Master of Public Policy (PhD/MPP); Educational Leadership (EdD); Global Executive (EdD); Organizational Change and Leadership (EdD); and Doctor of Philosophy (PhD) in Urban Education Policy.

The USC Rossier School of Education also offers minors in Education and Computing, Education and Society, The Dynamics of Early Childhood, Education Policy (with the Price School of Public Policy), Mathematics Education, and Multilingualism and Multiculturalism.

Graduate Degrees

Admission

Applicants for admission to graduate degree programs must have a bachelor's degree or its equivalent from an accredited institution. Admission to graduate programs in the USC Rossier School of Education is highly selective and competitive. A grade point average of 3.0 (A = 4.0) is usually expected as well as letters of recommendation and personal statements. The Graduate Record Examinations (GRE) is accepted but not required. Specific prior degree, testing and recommendation requirements vary by program. For specific information on admission and application procedures, contact the Office of Admission and Scholarships, (213) 740-0224 or info@rossier.usc.edu.

For more details on how to apply, please visit: rossier.usc.edu/admissions/.

Satisfactory Academic Progress

Students must maintain a grade point average of 3.0 (A = 4.0) or better to stay in good academic standing. Consistent with USC's overall policies for graduate students, factors other than satisfactory grades may also be taken into consideration in decisions regarding a student's continuation in a graduate degree program. These factors include satisfactory performance in fieldwork or credentialing requirements, or meeting program-defined professional standards, which are communicated to students at the beginning of the program.

Students who do not earn or maintain a 3.0 (A = 4.0) grade point average in an academic term may be given an academic warning in the following term. Students may also be given an academic warning if they have not fulfilled non-GPA related requirements, as defined by their degree program. The academic warning provides notification that the student is subject to dismissal. A student who is not in good academic standing is subject to dismissal, and may be dismissed from a program whenever, in the judgment of the associate dean for academic programs and the program director of the program in question, it is unlikely that the student will successfully complete his or her program.

Time Limit for Degree Completion

The time limit for completing a master's degree is five years. The time limit for completing a doctoral degree is eight years. For students who earned an applicable master's degree within five years prior to admission to the doctorate, the time limit for completion is six years.

The time limit begins with the first course at USC applied toward a specified degree and ends the semester during which all requirements are met.

A primary consideration of the setting of time limits is the currency of the course work and research with respect to the date the degree is to be conferred. Equally important is the concern that the faculty members serving as advisers or committee members be available to the student for the duration of graduate studies at USC.

Occasionally a student finds it impossible to comply with prescribed time limits for completion of a degree. If a significant delay is likely to occur, the student must make arrangements in advance by petitioning for an extension of time. Such petitions will be considered when there is clear justification based on sound academic or critical personal reasons. An academic department may grant an extension of up to one year at a time for a maximum of two years.

Doctoral Degrees

The USC Rossier School of Education offers the Doctor of Philosophy in Urban Education Policy (PhD) and the Doctor of Education (EdD). Both doctoral degrees place strong emphasis on the acquisition of inquiry skills and on the collaborative and interdisciplinary study of issues mutually engaging to both students and the USC Rossier School of Education faculty members. Both degrees emphasize the acquisition of appropriate research and inquiry skills, but the application of these skills is expected to differ. The EdD student is trained to use inquiry skills to solve contemporary problems, while the PhD student is trained to contribute to the general and theoretical knowledge about educational issues. The EdD is administered by the USC Rossier School of Education; the PhD is administered by the Graduate School.

PhD students must *also* consult The Graduate School section of this catalogue for regulations and requirements pertaining to the degree.

Credential Programs

A credential is a license issued by the California Commission on Teacher Credentialing (CCTC) to persons wishing to legally teach or perform certain other professional services in California's public schools. USC is one of several institutions authorized to recommend qualified persons to the CCTC for receipt of credentials.

There are two categories of credentials offered in the USC Rossier School of Education: teaching and service. Requirements for these credentials may be obtained by calling the appropriate phone number listed below. *Credential requirements may change due to state law*. Students are advised to consult periodically with the USC Rossier School of Education Credential office or the California Commission on Teacher Credentialing (CCTC) ctc.ca.gov/ for current credential requirements.

Teaching Credentials

California has a two-tier credential structure. A five-year Preliminary Credential is the first credential issued after an individual meets basic credential requirements. Upon successful completion of the MAT program candidates are recommended for a Preliminary Credential. Internships and Induction programs that lead to Clear Credentials can be satisfied under the purview of your district of employment. All Preliminary Credentials from the MAT include the English Language Learner Authorization (previously known as a CLAD certificate) and authorization of specialized use of technology in educational settings as mandated by the State of California.

Multiple Subject Teaching (MS) authorizes the holder to teach in a self-contained classroom such as the classrooms in most elementary schools. A teacher authorized for multiple subject instruction may be assigned to teach in any self-contained

classroom (preschool, grades K–12 or many subjects within a self-contained classroom). This classroom situation is generally found in preschool and elementary grades or in classes organized primarily for adults. In addition, the holder of a Multiple Subject Teaching Credential may serve in a core or team teaching setting.

Single Subject Teaching (SS) authorizes the holder to teach a specific subject(s) named on the credential in departmentalized classes such as those in most middle schools and high schools, in grades preschool, K-12, or in classes organized primarily for adults.

Education Specialist Credential (ES) authorizes the holder to conduct Educational Assessments related to student's access to the academic core curriculum and progress toward meeting instructional academic goals, provide instruction and Special Education Support to individuals in the area of specialization listed on the credential. Currently the ES curriculum in the MAT program prepares candidates to work with students who have Mild/Moderate Disabilities (M/M). This preliminary ES credential will also include the state mandated additional autism authorization, which authorizes candidates to provide instructional services to students with autism within the M/M specialty area setting.

All Preliminary Credential teacher candidates must meet the following requirements in order to be recommended/endorsed for a teaching credential: Basic Skills Competency, Content Subject Matter Competency, successful completion of all MAT course work, evidence of successful completion and passing of a TPA (Teaching Performance Assessment)--USC MAT program uses the EdTPA, U.S. Constitution requirement, and verification of training in cardiopulmonary resuscitation (CPR) that covers infant, child and adult CPR skills according to the American Heart Association (AHA) and/or the American Red Cross (ARC).

Teacher certification rules and requirements vary greatly by state. Completion of a CCTC-approved program does not guarantee certification or licensure in another state. Prospective teacher candidates are strongly advised to learn about their state's requirements. The USC Credential Office will provide support and program verification information as appropriate and necessary during the direct licensure application process to states outside of California. See online.usc.edu/state-disclosures/.

For inquiries, contact the MAT@USC office at (213) 743-2127.

Services Credentials

The *Administrative Services Credential* authorizes the holder to provide a variety of services in grades 12 and below, including preschool, and in classes organized primarily for adults. USC recommends candidates for the Preliminary Administrative Services Credential. This credential is offered through the School Leadership Academy. For more information please contact professional.development@rossier.usc.edu.

The *Clear Pupil Personnel Services Credential:*

Candidates for both the Master of Education in Educational Counseling, Master of Science in Marriage and Family Therapy and Master of Education in School Counseling have the option to earn a Clear Pupil Personnel Services Credential, which authorizes the holder to provide the following services:

- School Counseling authorizes the holder to perform the following duties in a K-12 environment: develop, plan, implement, and evaluate a school counseling and guidance program that includes academic, career, personal and social development; advocate for the high academic achievement and social development of all students; provide schoolwide prevention and intervention strategies and counseling services; provide consultation, training, and staff development to teachers and parents regarding students' needs; and, supervise a district-approved advisory program as described in California Education Code, Section 49600.

Candidates in the Master of Social Work program have the option to earn a Clear Pupil Personnel Services Credential, which authorizes the holder to provide both of the following services:

- School Child Welfare and Attendance in grades 12 and below, including preschool, and in programs organized primarily for adults: access appropriate services from both public and private providers, including law enforcement and social services; provide staff development to school personnel regarding state and federal laws pertaining to due process and child welfare and attendance laws; address school policies and procedures that inhibit academic success; implement strategies to improve student attendance; participate in school-wide reform efforts; and promote understanding and appreciation of those factors that affect the attendance of culturally diverse student populations.
- School Social Work in grades 12 and below, including preschool, and in programs organized primarily for adults: assess home, school, personal and community factors that may affect a student's learning; identify and provide intervention strategies for children and their families, including counseling, case management, and crisis intervention; consult with teachers, administrators and other school staff regarding social and emotional needs of students; and coordinate family, school and community resources on behalf of students.

For inquiries, contact the USC Suzanne Dworak-Peck School of Social Work at 1.877.700.4MSW (1.877.700.4679).

Special Programs

Professional Development

The Office for Professional Development offers a variety of credential, non-degree and certificate programs for aspiring and current professional educators and administrators in both fully customized and open enrollment programs.

Areas of expertise include English Language Development; Literacy; Differentiated Curriculum; Gifted Education; School Site Leadership Development; School District Leadership and School Business Management.

Certificate programs are offered in online, face-to-face, and blended formats and include:

- Reading and Literacy Added Authorization Program
- Differentiated Curriculum for Gifted Students Certificate Program
- School Business Management Certificate Program
- AASA-USC Urban Superintendents Academy
- School Leadership Academy: Preliminary Administrative Services Credential

Professional Development also offers the annual in-person:

- Summer Gifted Institute and Teacher Demonstration School

The office also offers national programs customized specifically for districts, including personalized coaching, classroom demonstration lessons incorporating educational technology, curriculum instruction and consultation responding to standards (Common Core, NGSS, ELD, VAPA) and International Teacher Training Institutes customized for student teachers, faculty, administrators and scholars seeking immersion in an American education environment. Many of our professional development programs offer Continuing Education Units (CEUs) upon successful completion.

For further information, contact the Office for Professional Development at (213) 740-8536. You can also visit rossier.usc.edu/programs/pd/.

Minor

Education and Computing Minor

The Education and Computing minor aims to apply skills and knowledge of computer programing and STEM pedagogy to issues in education and society. The Education and Computing minor will support students who plan to enter research, policy and teaching in STEM education. The minor requires 18 units.

Core Courses

- EDUC 435 Education and Society Units: 4
- EDUC 436 Applications of Mathematics Curriculum and Pedagogy Units: 4

- ITP 115 Programming in Python Units: 2 *
- ITP 330 Computational Thinking Through Programming Units: 4
- ITP 430 Computational Education Capstone Units: 4

*Note: Students with prior programming experience may request to take a placement test. Students who pass this placement test will have their ITP 115 requirement waived. Students who have completed ITP 165 or CSCI 102L may have their ITP 115 requirement substituted in consulation with an adviser.

Education and Society Minor

The education and society minor seeks to examine education and its role in society. The minor is intended to help students develop broad perspectives on the purposes and forms of education and schooling, including the purpose and history of schooling; the provision of equitable opportunities for all; the factors impacting teaching, learning and achievement; and the development of engaged citizenship for more just societies through education. Students enrolled in this minor will gain multiple perspectives on education locally, nationally and internationally, including technology's role in educational outcomes. The minor provides resources for students who may want to pursue careers in education after graduation — teaching, educational advocacy through nonprofits or non-governmental organizations, university research, policymaking or educational entrepreneurship.

Upper-Division Requirements

- EDUC 421 Global Issues: Impact on Educational Outcomes Units: 4
- EDUC 422 Education for Social Change Units: 4
- EDUC 423 Unrealized Promise and Hope for Education in 21st Century Units: 4
- EDUC 426 Educational Inquiry Units: 4

Mathematics Education Minor

The minor in mathematics education is intended for all students interested in the nature of mathematical thought and argumentation, and in how people learn mathematics. It gives students the opportunity to deepen their knowledge of mathematics while simultaneously exploring a career in K-12 education. It is designed so any undergraduate student can complete it by taking 16 units in addition to his or her major.

Required Courses

- EDUC 433 Elementary Mathematics for Teaching Units: 4 or
- EDUC 434 Secondary Mathematics for Teaching Units: 4
- EDUC 436 Applications of Mathematics Curriculum and Pedagogy Units: 4
- EDUC 437 Research in Teaching and Learning Mathematics Units: 4
- EDUC 438 Truth in Mathematics Units: 4

Multilingualism and Multiculturalism Minor

The multilingualism and multiculturalism minor seeks to examine the role of language and culture in education and society. The minor is intended to help students develop broad perspectives on the considerable personal, sociocultural, economic and political significance of developing and sustaining competence in two or more languages and cultures. Multilingualism and multiculturalism is key for children to thrive socially, cognitively academically, and professionally in the 21st century. In this minor, we will interrogate current linguistic inequities that are rooted in a legacy of cultural, racial and linguistic domination, which have resulted in the long-lasting negative impact on linguistically minoritized students and communities. Students enrolled in this minor will learn how language is intimately bound to identity, culture, and power and gain multiple perspectives on multilingual and multicultural education locally, nationally and internationally. With this minor, students will be prepared for further study toward a career as a teacher, project director, community organizer in non-profits, case manager, community liaison, educational entrepreneur, policy maker or researcher in multilingual and multicultural community and state contexts.

Required Courses

- EDUC 411 Sociopolitical and Raciolinguistic Contexts of Language Units: 4
- EDUC 412 Linguistically and Culturally Sustaining Teaching Units: 4
- EDUC 420 Technology, Media and Culturally Sustaining Education Units: 4
- EDUC 426 Educational Inquiry Units: 4

Teaching English to Speakers of Other Languages (TESOL) Minor

The Rossier School of Education offers an interdisciplinary minor in Teaching English to Speakers of Other Languages (TESOL). This minor is targeted to those undergraduates who wish to gain expertise in the field of English as a Second Language (ESL) or English as a Foreign Language (EFL) teaching. The minor in TESOL also prepares students for short- and long-term careers in ESL and EFL teaching in both U.S. and international contexts.

While students can combine the TESOL courses with any major, the curriculum will particularly benefit students in linguistics, English, foreign languages, communication, international studies and other related fields. However, with its emphasis on language and culture, as well as its focus on effective teaching and inquiry, the minor in TESOL will complement almost any field of study.

Units required to complete minor: 16

Upper-Division Requirements (12 Units)

- EDUC 411 Sociopolitical and Raciolinguistic Contexts of Language Units: 4
- EDUC 412 Linguistically and Culturally Sustaining Teaching Units: 4
- EDUC 426 Educational Inquiry Units: 4

Required Elective Course (4 Units)

At least one of the following upper-division courses needs to be completed:

- LING 375 Sociolinguistics Units: 4 *
- LING 405 Child Language Acquisition Units: 4
- LING 410 Second Language Acquisition Units: 4 *
- EDUC 421 Global Issues: Impact on Educational Outcomes Units: 4
- EDUC 422 Education for Social Change Units: 4
- EDUC 423 Unrealized Promise and Hope for Education in 21st Century Units: 4

Note:

*LING 210 is a prerequisite for LING 375 and LING 410. Please contact the program office with any questions at nelsonmm@rossier.usc.edu.

The Dynamics of Early Childhood Minor

The Dynamics of Early Childhood minor is intended to facilitate students' understanding of the historical implications that guide what we know and how we use the information we know related to the development of young children. The noted ideologies of theorists such as Dewey, Froebel, Pestalozzi and others will be examined from the perspectives of professions such as journalist, cinematographer, sociologist and psychologist. The effects of sources of entertainment such as children's books, films and television programs as well as consumer products such as toys will be studied in order to determine the "power" and effects they have on our developmental understandings and designs of educational needs for young children. Students will be encouraged to pursue a self-selected investigation of early childhood in order to be able to contribute as a professional, a family member, and an educator to address the roles and importance of young children in our society.

Four-Course Program:

- EDUC 427 Vectors that Influence Early Childhood Development Units: 4
- EDUC 428 The Effects of Curriculum and Institution on Early Childhood Units: 4
- EDUC 429 Early Childhood and Contemporary Society Units: 4
- EDUC 430 Early Childhood: Action Research Focus Units: 4

Master's Degree

Alternative Certification Master of Arts in Teaching, Multiple Subject

The Alternative Certification Master of Arts in Teaching is designed for individuals who wish to complete requirements for a California preliminary teaching credential while teaching full-time in an approved K-12 school district. Two programs are available: Multiple Subject and Single Subject. The Multiple Subject and Single Subject emphases are available online.

Core Courses

- EDUC 670 Introduction to Curriculum and Pedagogy in Urban Schools Units: 4
- EDUC 671 Contexts for Educational Equity, Access, and Agency Units: 3
- EDUC 672 Integrated Language Development Across the Curriculum Units: 3
- EDUC 673 Applications of Curriculum and Pedagogy, Part A Units: 4
- EDUC 674 Identifying and Teaching to Student Differences Units: 3
- EDUC 675 Literacy Development and Instruction in Elementary Education Units: 3
- EDUC 677 Applications of Curriculum and Pedagogy, Part B Units: 4
- EDUC 678 Applying Knowledge and Strategies for Teaching All Students Units: 2
- EDUC 679 Blended Learning Experiences for Students in Urban Schools Units: 2

Alternative Certification Master of Arts in Teaching, Single Subject

The Alternative Certification Master of Arts in Teaching is designed for individuals who wish to complete requirements for a California preliminary teaching credential while teaching full-time in an approved K-12 school district. Two programs are available: Multiple Subject and Single Subject. The Multiple Subject and Single Subject emphases are available online.

Core Courses

- EDUC 670 Introduction to Curriculum and Pedagogy in Urban Schools Units: 4
- EDUC 671 Contexts for Educational Equity, Access, and Agency Units: 3
- EDUC 672 Integrated Language Development Across the Curriculum Units: 3
- EDUC 673 Applications of Curriculum and Pedagogy, Part A Units: 4
- EDUC 674 Identifying and Teaching to Student Differences Units: 3
- EDUC 676 Literacy Development and Instruction in Secondary Education Units: 3
- EDUC 677 Applications of Curriculum and Pedagogy, Part B Units: 4
- EDUC 678 Applying Knowledge and Strategies for Teaching All Students Units: 2
- EDUC 679 Blended Learning Experiences for Students in Urban Schools Units: 2

Educational Counseling (MEd)

The Master of Education degree in Educational Counseling is designed for individuals seeking a career or advancement opportunities in postsecondary education as an academic or outreach counselor. The degree includes a theoretical and practical background in student affairs and counseling.

The program meets current requirements for postsecondary counseling positions in the California state system, particularly for those who wish to work in the public community college system. A minimum of 48 units is required.

For Admission Requirements, refer to USC Rossier Graduate Degree Requirements.

Required Courses

- EDCO 503 Ethical and Legal Issues in Counseling Units: 3
- EDCO 541 Theories in Counseling Units: 3
- EDHP 500 Foundations of Higher, Adult, and Professional Education Units: 3
- EDHP 552 The Politics of Difference Units: 3
- EDHP 580 The Community College Units: 3
- EDHP 587 Fieldwork in Higher, Adult, and Professional Education Units: 1, 2, 3, 4, 5, 6, 7, 8 (3 Units Required)

- EDHP 593a Master's Seminar Units: 2 and
- EDHP 593b Master's Seminar Units: 2

or

- EDHP 594a Master's Thesis Units: 2 and

Enrollment Management and Policy (MEd)

The Master of Education in Enrollment Management and Policy will focus on the preparation of graduates to assume positions within the field of enrollment management at two- and four-year postsecondary educational institutions, at professional graduate school programs, and at private preparatory schools. Our focus is on preparing candidates for both early to mid-career positions as well as for leadership positions within enrollment management organizations. The program consists of 30 units taught over 23 months and is delivered primarily on-line but with convergence seminars, thus this will be a hybrid program. The curriculum will cover a range of subjects including exploration of admissions models, legal issues in admissions and financial aid, institutional and public policy issues in student financial aid, theories and models of student retention, marketing, and enrollment management research. The final capstone experience will ask students to prepare a five-year strategic enrollment management plan. Students will develop a plan for the institution at which they are currently employed or a university or school selected with the assistance from faculty in the program.

Required Courses

- EDUC 687 Capstone Seminar Units: 3
- EDUC 690 Framing and Enrollment Management Units: 3
- EDUC 691 Admission Policy and Practice Units: 3
- EDUC 692 Role of Diversity in Admissions Units: 3
- EDUC 693 Institutional Positioning in Student Recruitment Units: 3
- EDUC 694 Legal Issues in Enrollment Management Units: 3
- EDUC 695 Organizations and Leadership in Education Units: 3
- EDUC 696 Financial Aid in Enrollment Management Units: 3

- EDUC 697 Research, Planning, and Accountability Units: 3
- EDUC 698 Enhancing Student Retention Units: 3

Learning Design and Technology (MEd)

The Master's in Learning Design and Technology program is designed for people who want to significantly improve learning and performance outcomes within their organization. Graduates will be prepared to design, implement, and evaluate learning environments and outcomes for various formal (e.g., K-12 and higher education), non-formal (e.g., corporate, military and government organizations) and informal settings (e.g., museums, science centers and public spaces). The program draws from learning and motivation research, as well as knowledge of how to leverage technology, to design face-to-face, technology-enabled, and blended learning experiences. Through the project-based capstone, students will gain practical experience by designing a learning experience or evaluating an existing learning design. The program consists of 30 units and is delivered online only.

Required Courses

- EDUC 508 Interrogating Systems of Inequity in Professional Practice Units: 2
- EDUC 503 Learning and Motivation Units: 3
- EDUC 589 Human Lifespan Development Units: 3
- EDUC 591 Diversity: Power, Equity and Inclusion Units: 3
- EDUC 570 Research Methods and Data Analysis Units: 3
- EDUC 582 Assessment and Evaluation Units: 2
- EDUC 595 Instructional Design Units: 3
- EDUC 579 Media Selection and Evaluation Units: 2
- EDUC 586 Design of Learning Environments Units: 3
- EDUC 587 Master's Studio A Units: 2
- EDUC 588 Master's Studio B Units: 4

Marriage and Family Therapy (MS)

The Master of Science in Marriage and Family Therapy is offered for those students seeking to prepare for the practice of marriage and family therapy. Students who complete this specialized professional degree program and who fulfill the additional state-mandated requirements are eligible for the State of California's Marriage and Family Therapy license. A minimum of 60 units is required.

Required Courses

- EDCO 541 Theories in Counseling Units: 3
- EDUC 500 The Counseling Process Units: 3
- EDUC 507 Professional Identity, Law and Ethics for Counselors Units: 3
- EDUC 508 Interrogating Systems of Inequity in Professional Practice Units: 2
- EDUC 515 Theories of Marriage and Family Therapy Units: 3
- EDUC 544 Psychological Assessment Units: 3
- EDUC 546 Psychopathology for Marriage and Family Therapy Units: 3
- EDUC 547 Career Development: Theory and Process Units: 3
- EDUC 553 Psychopharmacology and the Effects of Substance Abuse Units: 3
- EDUC 570 Research Methods and Data Analysis Units: 3
- EDUC 583 Counseling through the Lifespan Units: 3
- EDUC 633 Child and Elder Abuse and Domestic Violence Units: 2
- EDUC 634 Couples Counseling Units: 3
- EDUC 635 Psychotherapy with Children and Adolescents Units: 3
- EDUC 636 Perspectives on Human Sexuality Units: 3
- EDUC 637 Group Counseling: Theory and Process Units: 3
- EDUC 638 Multicultural Counseling: Research and Practice Units: 3
- EDUC 644 Practicum in Counseling Units: 3
- EDUC 645a Fieldwork in Counseling Units: 3
- EDUC 645b Fieldwork in Counseling Units: 3
- EDUC 646 Marriage and Family Therapy Capstone: Leadership Project Units: 2

Multiple Subject (MAT)

The Master of Arts in Teaching degree prepares Teacher Candidates to pursue careers as teachers. Subject Matter Concentrations of the program are offered at the Elementary (Multiple Subjects) and Secondary (English, Mathematics, Science, and Social Science) levels. The curriculum focuses on preparing teachers to work with diverse K-12 populations. Teacher Candidates enrolled in the MAT Program will engage in supervised field experiences throughout the curriculum. MAT course work provides Teacher Candidates with theoretical foundations, teaching strategies and practical field-based experiences necessary to make a difference in schools across the State of California, the United States and the world. The Gifted Education Certificate may be obtained for additional course work.

The Education Specialist Mild/Moderate credential recommendation may also be earned by completing the Special Education pathway in EDUC 677. Bilingual authorization in Spanish is available through the completion of the MAT program and passage of additional exams and fieldwork requirements.

Multiple Subject

The MAT Multiple Subject is designed for those interested in teaching at the elementary level. The MAT Multiple Subject program requires a minimum of 28 units.

The Multiple Subject emphasis is available online.

Core Courses

- EDUC 670 Introduction to Curriculum and Pedagogy in Urban Schools Units: 4
- EDUC 671 Contexts for Educational Equity, Access, and Agency Units: 3
- EDUC 672 Integrated Language Development Across the Curriculum Units: 3
- EDUC 674 Identifying and Teaching to Student Differences Units: 3
- EDUC 678 Applying Knowledge and Strategies for Teaching All Students Units: 2
- EDUC 679 Blended Learning Experiences for Students in Urban Schools Units: 2

Multiple Subject Concentration

- EDUC 673 Applications of Curriculum and Pedagogy, Part A Units: 4
- EDUC 675 Literacy Development and Instruction in Elementary Education Units: 3
- EDUC 677 Applications of Curriculum and Pedagogy, Part B Units: 4

Note:

Completion of the MAT program will prepare all candidates for the Education Specialist credential. All standards have been integrated into the MAT program of study. Students who are interested in being recommended for the Education Specialist Mild/Moderate credential will be placed in EDUC 677 with placement in an approved Education Specialist supported classroom for half of their guided practice requirements.

The Education Specialist Mild/Moderate credential provides current MAT credential candidates with the competencies to respond to the needs, interests and abilities of special needs students in either regular classrooms or specific school classrooms defined for students who need Mild/Moderate support with documented learning differences. It widens the range of the students' knowledge about teaching and learning allowing them to compete in the contemporary professional marketplace. A credential in special education may be mandatory in some states for consideration to teach special needs students in any type of learning environment.

In addition to the master's degree, a recommendation for a California Bilingual Authorization in Spanish, may be earned. Candidates must: 1) Complete all requirements for the Single Subject (MAT) degree and Preliminary Single Subject Teaching Credential; 2) Pass CSET: Spanish Subtest III (test code 147) and

Spanish Subtest V (test code 258); and 3) Successfully conduct Spanish lessons as part of EDUC 677: Applications of Curriculum and Pedagogy, Part B, that meet the BILA fieldwork competencies.

California Bilingual Authorization in Spanish will allow graduates to work with Spanish-speaking students and their families to support their primary language and develop academic English in a range of bilingual settings.

Postsecondary Administration and Student Affairs (MEd)

The Master of Education, Postsecondary Administration and Student Affairs provides current and prospective professionals working in various capacities within two-year, four-year and professional postsecondary institutions with the theoretical foundation and practical applications to excel in a variety of higher education administrative and students services positions (academic advising and support services). Students will have an opportunity to develop an area of proficiency such as student affairs or athletic administration. A minimum of 30 units of graduate-level course work is required.

Required Courses

- EDUE 560 Identity and Diversity Units: 3
- EDUE 563 History of Higher Education Units: 3
- EDUE 571 Research Methods and Applied Educational Ethnography Units: 3
- EDHP 657 Leadership and Management in Student Affairs Units: 3
- EDHP 679 Legal Issues in the Administration of Higher Education Units: 3
- EDHP 687 Student Development in Higher Education Units: 3
- EDUC 616 Higher Education Capstone Units: 3

Approved electives

- Units: 9

School Counseling (MEd)

The Master of Education, School Counseling is geared toward socially responsible individuals who are aware that many of the issues pupils confront have societal origins. Designed to prepare educators interested in becoming school counselors in grades pre-K through grade 12, successful candidates will obtain the Master of Education, School Counseling degree along with USC recommendation for the Pupil Personnel Services School Counseling Credential. Forty-nine units of course work, 100 clock hours in a practicum experience and 700 clock hours of supervised field experience are required.

Required Courses

- EDCO 503 Ethical and Legal Issues in Counseling Units: 3
- EDCO 541 Theories in Counseling Units: 3
- EDCO 574 School Counseling Practicum Units: 1, 2 (2 Units Required)
- EDCO 575 School Counseling Field Experience Units: 1, 2, 3, 4 (4 Units Required)
- EDPT 502 Learning and Individual Differences Units: 3
- EDUC 500 The Counseling Process Units: 3
- EDUC 508 Interrogating Systems of Inequity in Professional Practice Units: 2
- EDUC 511 Introduction to Counseling Units: 3
- EDUC 520 Career and College Readiness Counseling Units: 3
- EDUC 540 Assessment in Counseling Units: 3
- EDUC 542 Substance Abuse Counseling Units: 3
- EDUC 543 Family Counseling Units: 3
- EDUC 570 Research Methods and Data Analysis Units: 3
- EDUC 608 School Connectedness, Climate, and Classroom Management Units: 2
- EDUC 612 Application of Human Development Theory in School Counseling Units: 3
- EDUC 637 Group Counseling: Theory and Process Units: 3
- EDUC 638 Multicultural Counseling: Research and Practice Units: 3

School Leadership (MEd)

School leadership matters. The Master of Education in School Leadership will prepare educational leaders with the knowledge and skills to lead effectively in urban school settings and to accelerate student achievement. Graduates will demonstrate that they can create a high achievement school culture and solve complex performance problems in K–12 schools by being able to advocate for a shared community-driven vision; create a high performance school culture and educational goals; collect data to diagnose causes of achievement gaps; plan appropriate research-based solutions; gather and manage resources; effectively communicate the plan to school administration, faculty, staff and community; and provide support for implementing, monitoring and evaluating progress toward achieving school improvement. All courses are taught through field-based experiences where problems are solved in real work settings, applying research to practice. Students who graduate from the program will be ready to work within the constantly evolving educational landscape of California and other states. A national trip is integrated into the program's curriculum.

The program is open to teachers, counselors, psychologists and other school-based personnel who have worked for a minimum of two years in such positions. Two letters of recommendation are required.

The program is only available online.

Required Courses

- EDUC 508 Interrogating Systems of Inequity in Professional Practice Units: 2
- EDUC 533 School Leadership: Theory and Practice Units: 3
- EDUC 537 Leading with the Community and Culture in Context Units: 3
- EDUC 538 Entrepreneurial School Leadership Units: 2
- EDUC 548 Data-Driven Leadership for Schools Units: 3
- EDUC 549 Supervising Instruction for Optimal Learning Units: 3
- EDUC 570 Research Methods and Data Analysis Units: 3
- EDUC 604 National Perspective on School Leadership Units: 1
- EDUC 641 Human Capital and School Organization Units: 3
- EDUC 643 Advancing Community Support through Social Media Units: 2
- EDUC 647 School Leadership Seminar Units: 2
- EDUC 648a Apprenticeship in School Administration and Leadership Units: 2
- EDUC 648b Apprenticeship in School Administration and Leadership Units: 2

Single Subject (MAT)

The Master of Arts in Teaching degree prepares teacher candidates to pursue careers as teachers. Subject Matter Concentrations of the program are offered at the Elementary (Multiple Subjects) and Secondary (English, Mathematics, Science and Social Science) levels. The curriculum focuses on preparing teachers to work with diverse K-12 populations. Teacher candidates enrolled in the MAT program will engage in supervised field experiences throughout the curriculum. MAT course work provides teacher candidates with theoretical foundations, teaching strategies and practical field-based experiences necessary to make a difference in schools across the State of California, the United States and the world. The Gifted Education Certificate may be obtained for additional course work.

The Education Specialist Mild/Moderate credential recommendation may also be earned by completing the Special Education pathway in EDUC 677. Bilingual authorization in Spanish is available through the completion of the MAT program and passage of additional exams and fieldwork requirements.

Single Subject

The MAT Single Subject is designed for those interested in teaching at the secondary level. The emphasis offers specializations in English, Science (Biological Sciences, Chemistry, Geoscience or Physics), Mathematics and Social Science. The MAT Single Subject program requires a minimum of 28 units.

The Single Subject emphasis is available online.

Core Courses

- EDUC 670 Introduction to Curriculum and Pedagogy in Urban Schools Units: 4
- EDUC 671 Contexts for Educational Equity, Access, and Agency Units: 3
- EDUC 672 Integrated Language Development Across the Curriculum Units: 3
- EDUC 674 Identifying and Teaching to Student Differences Units: 3
- EDUC 678 Applying Knowledge and Strategies for Teaching All Students Units: 2
- EDUC 679 Blended Learning Experiences for Students in Urban Schools Units: 2

Single Subject Concentration

- EDUC 673 Applications of Curriculum and Pedagogy, Part A Units: 4
- EDUC 676 Literacy Development and Instruction in Secondary Education Units: 3
- EDUC 677 Applications of Curriculum and Pedagogy, Part B Units: 4

Note:

Completion of the MAT program will prepare all candidates for the Education Specialist credential. All standards have been integrated into the MAT program of study. Students who are interested in being recommended for the Education Specialist Mild/Moderate credential will be placed in EDUC 677 with placement in an approved Education Specialist supported classroom for half of their guided practice requirements.

The Education Specialist Mild/Moderate credential provides current MAT credential candidates with the competencies to respond to the needs, interests and abilities of special needs students in either regular classrooms or specific school classrooms defined for students who need Mild/Moderate support with documented learning differences. It widens the range of the students' knowledge about teaching and learning allowing them to compete in the contemporary professional marketplace. A credential in special education may be mandatory in some states for consideration to teach special needs students in any type of learning environment.

In addition to the master's degree, a recommendation for a California Bilingual Authorization in Spanish, may be earned. Candidates must: 1) Complete all requirements for the Single Subject (MAT) degree and Preliminary Single Subject Teaching Credential, 2) Pass CSET: Spanish Subtest III (test code 147) and Spanish Subtest V (test code 258), and 3) Successfully conduct Spanish lessons as part of EDUC 677: Applications of Curriculum and Pedagogy, Part B, that meet the BILA fieldwork competencies.

California Bilingual Authorization in Spanish will allow graduates to work with Spanish-speaking students and their families to support their primary language and develop academic English in a range of bilingual settings.

Teaching English to Speakers of Other Languages (World Masters in Language Teaching) (MAT)

The USC Rossier School of Education partners with three premier international universities to offer an innovative dual master's degree program in teaching English and another language (Chinese, Korean or Spanish) as part of its World Master in Language Teaching Program.

Chinese and English track: School of Humanities and Social Sciences at the Hong Kong University of Science and Technology (UST)

Korean and English track: Yonsei University's Department of Korean Language and Literature

Spanish and English track: Universidad Iberoamericana, Ciudad de Mexico-Tijuana in Tijuana, Mexico (IBERO)

Qualified students will complete course work both at USC and at one of the partner universities, spending part of their time at UST, Yonsei University or IBERO and part of their time at USC. Upon satisfying all program requirements at the two institutions, two master's degrees will be awarded, one degree conferred by USC in the areas of English teaching and one conferred by UST in teaching Chinese by Yonsei University in Korean language and literature or by IBERO in education and teaching in Spanish.

Admissions

Students wishing to pursue this dual master's program must satisfy all application requirements for both the USC Rossier School of Education and the selected partner university.

Program Completion

Once candidates apply and are accepted to the program, they must complete all requirements for both degrees. Upon completion of both degree requirements, the two degrees will be conferred. For this dual degree, the equivalent of 6 units of pre-approved course work taken at UST, Yonsei University or IBERO may be transferred and applied to the degree requirements at USC. Students who elect to receive only the USC degree must change their degree objective from this dual degree program to a different degree objective in the Rossier School of Education.

Residence

This is a two-year campus based program during which students spend part of their time at UST, Yonsei University or IBERO and part of their time at USC.

Language Requirements

USC: All courses at USC will be taught in English. Minimum TOEFL/ELTS scores are required for admission.

UST: All courses at UST will be taught in English, Minimum TOEFL/ELTS scores are required for admission. For the Teaching Chinese as a Second Language concentration at UST, minimum proficiency in Chinese must be demonstrated.

Yonsei University: While some courses will be taught in Korean, accommodations will be provided for non-Korean speakers who wish to complete the degree. Minimum TOEFL/ELTS scores are required for admission. Those students pursuing the additional option to obtain a Korean Language Teaching license at Yonsei must demonstrate academic proficiency in Korean.

IBERO: All courses at IBERO will be taught in Spanish. To be admitted, applicants must demonstrate academic proficiency in the Spanish language by passing CSET Spanish Subtest III.

Program of Study

The USC Master of Arts in Teaching English to Speakers of Other Languages is a 24-unit degree (28 units for the credential track). Students in the World Masters in Language Teaching program may transfer in the equivalent of 6 units of pre-approved course work from UST, Yonsei University or IBERO and therefore reduce the requirement at USC to 18 units (22 units for credential track).

Students must also complete the required number of units at the selected partner university: 18 units at UST, 15 units at Yonsei University (18 units for those pursuing the Korean language teaching license) or 58 units at IBERO. In the UST and Yonsei University tracks, students begin with a semester at UST or Yonsei University, then complete two semesters at USC (spring and fall), before returning to UST or Yonsei University for their final Spring semester. In the IBERO track, students will spend the first two semesters at the USC. During this time they will take one online course at IBERO. They will then complete two terms at the

Universidad Iberoamericana, Ciudad de Mexico-Tijuana in Tijuana, Mexico. Finally, they will end the program with a final semester at USC Rossier.

USC Required Courses

- EDUC 510 Theories of Language Learning and Teaching Units: 3
- EDUC 521 Assessment and Instruction for Diverse Language Learners Units: 3
- EDUC 596 English Language Learning Design, Teaching and Technology Units: 3
- EDUC 639 Approaches and Strategies for Language Teaching Units: 4
- EDUC 649 Teaching Practice to Support Language Learners Units: 4
- EDUC 655 Social Foundations of Language Education Units: 4
- EDUC 656 Applied Linguistics for English Language Educators Units: 3

USC Required Courses for Credential Track Only

- EDUC 660a Clinical Practice Seminar in Language Teaching Units: 2
- EDUC 660b Clinical Practice Seminar in Language Teaching Units: 2

Note:

Students in the World Masters in Language Teaching program may transfer in the equivalent of 6 units of pre-approved coursework from UST, Yonsei University or IBERO.

Teaching, Teaching English to Speakers of Other Languages (MAT)

The Master of Arts in Teaching English to Speakers of Other Languages (MA TESOL) is designed to equip aspiring and practicing English language teachers, domestic and international, to successfully provide English language instruction for children, youth or adults in the United States or abroad. The degree has a non-credential track (minimum of 24 units) and a credential option (minimum of 28 units). The program may be completed on campus or online.

Required Courses

- EDUC 510 Theories of Language Learning and Teaching Units: 3
- EDUC 521 Assessment and Instruction for Diverse Language Learners Units: 3
- EDUC 596 English Language Learning Design, Teaching and Technology Units: 3
- EDUC 639 Approaches and Strategies for Language Teaching Units: 4
- EDUC 649 Teaching Practice to Support Language Learners Units: 4
- EDUC 655 Social Foundations of Language Education Units: 4
- EDUC 656 Applied Linguistics for English Language Educators Units: 3

Credential Option

- EDUC 660a Clinical Practice Seminar in Language Teaching Units: 2
- EDUC 660b Clinical Practice Seminar in Language Teaching Units: 2

Graduate Certificate

Gifted Education Certificate

Aligned with USC Rossier's mission to serve high-need students in urban centers, the certificate in Gifted Education was designed to provide candidates concurrently enrolled in MAT programs with the competencies to respond to the needs, interests and abilities of gifted students in either homogeneous or heterogeneous regular classrooms or specific school environments defined for gifted and high-ability students.

The certificate in Gifted Education enables MAT candidates to recognize the manifestations of giftedness among cultural, linguistic and economically diverse students in urban schools, to facilitate the identification of underrepresented students as gifted and to provide differentially appropriate curriculum for them.

Required Courses

- EDUC 673 Applications of Curriculum and Pedagogy, Part A Units: 4
- EDUC 677 Applications of Curriculum and Pedagogy, Part B Units: 4
- EDUC 686 Responding to Gifted Students Units: 4

Learning Design and Technology Graduate Certificate

The Certificate in Learning Design and Technology equips individuals with skills to significantly improve learning and performance outcomes within their professional setting. The courses focus on building skills related to the design, development, implementation and evaluation of learning experiences in a diverse range of learning contexts. Individuals learn to align media and technologies to support learning and motivation, and design and develop assessment and evaluation practices.

Required Courses

- EDUC 503 Learning and Motivation Units: 3

Must take one of the following two courses:

- EDUC 579 Media Selection and Evaluation Units: 2
- EDUC 582 Assessment and Evaluation Units: 2

Must take two of the following three courses:

- EDUC 586 Design of Learning Environments Units: 3
- EDUC 589 Human Lifespan Development Units: 3
- EDUC 591 Diversity: Power, Equity and Inclusion Units: 3
- EDUC 595 Instructional Design Units: 3

Pupil Personnel Services Certificate

The Pupil Personnel Services Certificate program is designed for students enrolled in the Master of Science in Marriage and Family Therapy program or the Master of Education in Educational Counseling program who wish to complete additional requirements to earn USC recommendation for a Pupil Personnel Services: School Counseling Credential. Application information is available in the Master's program office.

The certificate requires a minimum of 20 units.

Required Courses

- EDCO 574 School Counseling Practicum Units: 1, 2
- EDCO 575 School Counseling Field Experience Units: 1, 2, 3, 4 (4 Units Required)
- EDUC 511 Introduction to Counseling Units: 3
- EDUC 520 Career and College Readiness Counseling Units: 3
- EDUC 542 Substance Abuse Counseling Units: 3
- EDUC 608 School Connectedness, Climate, and Classroom Management Units: 2

Marriage and Family Therapy Students

- EDPT 502 Learning and Individual Differences Units: 3

Educational Counseling Students

- EDUC 543 Family Counseling Units: 3

Doctoral Degree

Educational Leadership (EdD)

The purpose of the Doctorate of Education (EdD) in Educational Leadership program is to build critically conscious leaders who can take actions to eliminate inequities that affect educational and learning opportunities and outcomes for children and adults in urban contexts. This three-year degree program is geared toward

working professionals who aspire to be leaders in urban education. Admission requires an earned master's degree and a minimum of three years of work experience in a related field; other earned terminal degrees may be considered in lieu of a master's degree if they are eligible for advanced standing within the University.

Areas of Concentration

Students are admitted to the program under one of four areas of concentration: K-12 Leadership in Urban School Settings, Educational Psychology, Higher Education Administration, or Leading Instructional Change. Concentrations are not indicated on the diploma, which will read "Doctor of Education in Educational Leadership" for all concentrations.

Preliminary Review

The EdD in Educational Leadership preliminary review must be completed before the student has earned 21 units. Passing the preliminary review is a prerequisite to continuing in the program. The faculty governance committee will determine the preliminary review requirements and the process will be administered by the program office.

Dissertation in Practice Advisement Committee

Each student selects a three-member advisement committee in consultation with the adviser upon applying to take the qualifying examination.

The committee chair must have a full-time faculty appointment in the Rossier School of Education. A second member of the committee must also have a full-time faculty appointment in the Rossier School of Education. One member of the committee may be external to the Rossier School of Education, such as a faculty member elsewhere or a full-time professional educator who holds a doctorate and brings strength to the committee in the area of the dissertation topic or methodology. If an external member is to be on the committee, this person must be nominated by the committee chair and approved by the director of the EdD program.

Admission to Candidacy

Admission to candidacy is a formal action taken by the faculty of the Rossier School of Education. This action is based on passing the qualifying examination as part of the dissertation in practice.

Unit Requirement

The EdD requires completion of 60 units of course work. Students admitted with Advanced Standing complete a minimum of 43 units.

Core Program

EdD in Educational Leadership students are required to complete 18 units of core course work.

- EDUE 700 Foundations in Urban Education Units: 3
- EDUE 701 Foundations in Leadership in Education Units: 3
- EDUE 702 Foundations in Learning Units: 3
- EDUE 703 Power, Diversity and Equity Units: 3
- EDUE 704 Leadership Enactment Units: 3
- EDUE 705 Communicating as Leaders Units: 3

Research Methods

- EDUE 726 Research Methods 1 Units: 3
- EDUE 727 Research Methods 2 Units: 3

Electives

In consultation with advisers, students must complete 12 units of elective course work aligned with their areas of concentration.

Dissertation in Practice

The dissertation in practice is a doctoral capstone designed for practitioner-scholars to identify and address a problem of practice in the candidate's domain of focus. An acceptable dissertation in practice must show technical mastery of a special field and skills of a practitioner-scholar. The student must be enrolled in EDUE 784a (or EDUE 784b, EDUE 784c, EDUE 784d, EDUE 784z) each fall and spring semester after admission to candidacy until the dissertation in practice has been approved. **Seven units of dissertation in practice course work, including 2 units of EDUE 784a, is required.**

- EDUE 780a Dissertation in Practice Units: 3
- EDUE 780b Dissertation in Practice Units: 2
- EDUE 784a Dissertation in Practice, Data Analysis Units: 2
- EDUE 784b Dissertation in Practice, Data Analysis Units: 2
- EDUE 784c Dissertation in Practice, Data Analysis Units: 2
- EDUE 784d Dissertation in Practice, Data Analysis Units: 2
- EDUE 784z Dissertation in Practice, Data Analysis Units: 0

Global Executive (EdD)

The Global Executive EdD prepares tomorrow's transformational educational leaders, policy makers, administrators and change agents for their challenging task of improving individual and national educational outcomes. The curriculum is designed to enhance the professional experience of senior educational leaders and policy makers by:

- Increasing their understanding of global trends and the implications of those trends for their work;
- Challenging them to utilize evidence and theory-based approaches in problem solving;
- Developing their capacity to effectively use complex data in decision making; and
- Providing access to key leaders and leading education scholars.

The program will focus on achieving large-scale improvements across educational systems through strategic use of policy, innovative practice and assessment. The curriculum stresses the examination of educational solutions from around the world as participants work with their own, local challenges.

Classes are delivered in Los Angeles and international locations. The total units required for the degree is 60. A maximum of 4 project units (EDUC 764a, EDUC 764b, EDUC 764c, EDUC 764d) may be applied toward the degree. Students admitted with advanced standing complete a minimum of 50 units.

Preliminary Review:

The Global Executive EdD preliminary review must be passed before the student has completed more than 18 units. Passing the preliminary review is prerequisite to continuing in the program.

Required Courses

- EDUC 619 Framing Educational Leadership in a Global Context Units: 4
- EDUC 620 Fundamentals of Creativity, Innovation, and Entrepreneurship Units: 2
- EDUC 623 Understanding Research That Informs Leadership Units: 3
- EDUC 624 Educational Organizations: Governance and Finance I Units: 2
- EDUC 627 Education Performance Problems: Role of Learning Units: 3
- EDUC 628 Educational Organizations: Governance and Finance II Units: 2
- EDUC 629 Consulting Practicum Context Analysis Units: 3
- EDUC 631 Locating Educational Performance Problems Units: 3
- EDUC 723 Evaluating and Assessing Educational System Outcomes Units: 3
- EDUC 724 Creating Policy Alternatives for Educational Settings Units: 3
- EDUC 726 Making Choices: Deciding Among Policy Alternatives Units: 3
- EDUC 727 Implementing Policy in Educational Systems Units: 3
- EDUC 728 Global Trends: Emerging Ideas, Emerging Markets Units: 3
- EDUC 729 Assessing Policy Impact in Educational Settings Units: 3
- EDUC 733 Analyzing Data and Identifying Solutions Units: 3
- EDUC 764a Dissertation in Practice Units: 1
- EDUC 764b Dissertation in Practice Units: 1

- EDUC 764c Dissertation in Practice Units: 1
- EDUC 764d Dissertation in Practice Units: 1
- EDUC 790 Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 (3 Units Required)
- Additional course work to be approved by program faculty Units: 10

Organizational Change and Leadership (EdD)

The Education Doctorate in Organizational Change and Leadership is a three-year degree program that prepares current and future leaders to create conditions that foster continuous improvement in themselves and their organizations. It emphasizes how learning occurs informally and formally in workplaces and serves as a mechanism for change and innovation in organizations and systems. Arranged by four topical streams – problem solving, leadership, dispositions of leaders and reflection – the program seeks to attract a diverse student body of current and emerging leaders who are interested in fostering learning that leads to systemic improvement in their workplaces. The primary emphasis will be on those individuals who currently hold or are seeking leadership positions within colleges/universities, traditional and non-traditional K-12 environments, chief learning officers and their related human resources staff, non-profits and governmental organizations. The degree is not linked to the credentials typically needed to become an administrator in a K-12 environment, including becoming a principal or superintendent. The degree requires a minimum of 60 units. Students with a prior master's may enter with Advanced Standing, reducing their units to 43. It is delivered only online.

Required Courses

- EDUC 522 Challenges in Urban Education: Accountability Units: 3
- EDUC 523 Challenges in Urban Education: Diversity Units: 3
- EDUC 524 Challenges in Urban Education: Leadership Units: 3
- EDUC 532 Inquiry Methods I Units: 3
- EDUC 536 Inquiry Methods II Units: 3
- EDUC 603 Framing Organizational Change and Leadership Units: 4
- EDUC 620 Fundamentals of Creativity, Innovation, and Entrepreneurship Units: 2
- EDUC 627 Education Performance Problems: Role of Learning Units: 3
- EDUC 652 Inquiry Methods III Units: 3
- EDUC 725 Analyzing Organizational Change and Its Effectiveness Units: 3
- EDUC 730 Using Communication to Facilitate Organizational Change Units: 2, 3 (2 units)
- EDUC 731 Economics of Organizational Change and Learning Environments Units: 3
- EDUC 732 Building Capacity for Organizational Change Units: 3
- EDUC 764a Dissertation in Practice Units: 1
- EDUC 764b Dissertation in Practice Units: 1
- EDUC 764c Dissertation in Practice Units: 1
- EDUC 764d Dissertation in Practice Units: 1
- EDUC 790 Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 (1 unit)

Urban Education Policy (PhD)

Program Requirements

The PhD program requires a minimum of 63 units of course work, comprising the following elements: Core Block (16 units), Concentration Block (15 units), Research Block (15 units), Cognate Block (12 units) and Dissertation Proposal and Dissertation Block (5 units).

Core Block

The core represents the essential knowledge that serves as the groundwork for later course work and for other research and scholarly activities within the program and beyond with a particular focus on urban education. This work is completed in the first year.

Required Courses

- EDUC 630 Organizations and Policy: Current Issues Units: 4
- EDUC 642 Controversies in Learning and Instruction Units: 4
- EDUC 681 Research, Policy and Practice in Urban Education Units: 4
- EDUC 665 Foundations and Design of Educational Research Units: 4

Additional Requirements

Concentration Block

Courses in this block are linked to the concentrations available in the Rossier School of Education PhD program. Courses in this block permit students to consider applied problems in collaboration with students in other programs.

Research Block

Courses in this block provide the basic tools to pursue systematic, programmatic, empirical investigation. It includes qualitative and quantitative elements with the understanding that complex educational problems require a variety of investigative approaches. Areas include research design, analysis of variance/multiple regression, qualitative methods, measurement, advanced qualitative or quantitative analysis, or other related areas. Courses may be taken inside or outside the Rossier School of Education.

Cognate Block

This block is designed for students to pursue interdisciplinary approaches to educational issues, and may consist of courses inside or outside the Rossier School of Education. The specific courses are determined in conjunction with the adviser.

Dissertation Block

This block includes preparation for the qualifying examination and initial dissertation proposal. It is taken during the semester of the qualifying examination and EDUC 794a Doctoral Dissertation, EDUC 794b Doctoral Dissertation (minimum of 4 units taken after a student passes the qualifying examination and has advanced to candidacy). The dissertation block is designed to prepare students for their dissertation research and continues through the writing and defense of the dissertation. The process involves intensive collaboration with the adviser and the qualifying exam committee.

Transfer of Course Work

The maximum number of transfer credits that can be applied toward the degree is 20 units. The faculty of the student's degree program determines whether transfer credit is applicable toward a specific graduate degree.

Faculty Adviser

A designated faculty member provides the academic advisement for entering graduate students at the point of admission. A faculty member is appointed to serve as the adviser until an approved qualifying exam committee is established.

Screening Process

When students have completed the core course work, the doctoral screening committee assesses their performance and makes a decision about their readiness to continue in the program. Students are notified of the results by the PhD program chair and director.

Additionally, students will be assessed each year based on adviser input, coursework and research progress. If student progress is not satisfactory as determined by the student's faculty adviser, warnings will be issued in accordance with USC Graduate School policies.

Qualifying Exam Committee

The qualifying exam committee is composed of five members. The committee chair and at least two additional members must have an appointment in the student's program. One member

must be from outside of Rossier, whether internal to USC (outside member) or external to USC (external member). The fifth member can be from Rossier, USC or outside of USC.

Qualifying Examinations

As a prerequisite to candidacy for the PhD, students must pass written and oral qualifying examinations. The written qualifying examination is designed to assess a student's readiness to undertake dissertation research and to assess the student's ability to critically analyze and synthesize theoretical and methodological knowledge. The oral portion consists, in part, of a teaching and research portfolio. The teaching portfolio documents and reflects the student's development and productivity in thinking about course content and instructional delivery. The research portfolio documents and reflects the student's development and productivity in research and writing from the point of entry into the program. Please see the The Graduate School page for policies regarding committees and pass/fail results.

Admission to Candidacy

Admission to candidacy is a formal action taken by the faculty that is based upon passing the qualifying examination and completing all PhD course requirements (with the exception of EDUC 794a, EDUC 794b, EDUC 794d, EDUC 794z Doctoral Dissertation). Notification of admission or denial of admission to candidacy is by letter from the associate vice provost for graduate programs.

Dissertation Committee

The dissertaton committee is composed of at least three and no more than five members. The committee chair must have an appointment in the student's program. All committees must have a majority of members from the student's home program. One member must be from outside of Rossier, whether internal to USC (outside member) or external to USC (external member).

Doctoral Dissertation

After the qualifying examination is passed, students must enroll in EDUC 794a, EDUC 794b, EDUC 794d, EDUC 794z Doctoral Dissertation each semester, except summer session, after admission to candidacy until all degree requirements have been completed. A minimum of two semesters (4 units) is required. A maximum of 4 dissertation units may be applied to satisfy the degree requirement. While enrolled in EDUC 794a, students will develop a dissertation proposal in collaboration with the adviser. The dissertation committee grants final approval for the proposal. Credit for EDUC 794a and permission to enroll in EDUC 794b will only be given after the dissertation proposal is approved. IRB (Human Subjects Institutional Review Board) approval is required for all dissertation studies.

Teaching Skills Development

All doctoral students must teach for at least one semester before they graduate. This program requirement may be fulfilled by co-teaching, serving as a teaching assistant, or solo teaching. International students must meet the English proficiency standards set forth by the American Language Institute and participate, if necessary, in specialized training offered through the Center for Excellence in Teaching. Proposals for meeting this requirement must be reviewed and approved by the PhD Governance Committee.

Graduate School Policies and Requirements

The PhD is administered by the Graduate School so PhD students must also consult with The Graduate School sections of the catalogue for regulations and requirements pertaining to the PhD degree. Students should also refer to Graduate and Professional Education and The Graduate School, Academic and University Policies and other sections of this catalogue for general regulations and policies including but not limited to time limits, leave of absence, scholarship standing, academic warnin, and other issues not directly addressed in this section.

USC Viterbi School of Engineering

The USC Viterbi School of Engineering is innovative, elite and internationally recognized for creating new models of education, research and commercialization that are firmly rooted in real-world needs. The school's first priorities are the education of outstanding students and the pursuit and publication of new research.

As the school's faculty and students extend the frontiers of engineering knowledge through their research, they also apply engineering and technology to address societal challenges. The school stimulates and encourages qualities of scholarship, leadership, ambition and character that mark the true academic and professional engineer — to serve California, the nation and the world. At USC Viterbi, we call this the enabling power of Engineering+.

Courses in engineering were first offered at USC in the 1905-06 academic year in the basement of one of the oldest buildings on campus. Today, more than 300 full-time faculty, including 188 tenure-track faculty, serve about 2,700 undergraduate majors; over 600 students in minor programs; and about 5,900 graduate students, utilizing extensive and technically advanced laboratories, classrooms and live interactive high-speed Internet broadcast systems. Government and industry annually fund nearly $208 million worth of research.

Viterbi undergraduate support programs complement and strengthen the academic experience, enhancing both depth and scope. Viterbi graduate education is outstanding preparation for advanced research and professional careers. The PhD program is built around fellowships, teaching assistantships and research appointments, and produces a steadily growing core of doctoral graduates across the disciplines. The master's and professional programs are national and global leaders in advanced training for professional engineers.

Administration

Yannis C. Yortsos, PhD, *Dean*
Gaurav Sukhatme, PhD, *Executive Vice Dean*
Kimberly Bregenzer, MA, *Vice Dean*
Erik A. Johnson, PhD, *Vice Dean*
Craig Knoblock, PhD, *Vice Dean*
Ellis Meng, PhD, *Vice Dean*
Assad Oberai, PhD, *Vice Dean*
Timothy Pinkston, PhD, *Vice Dean*
Cauligi Raghavendra, PhD, *Vice Dean*
Kelly Goulis, MS, *Senior Associate Dean*
Mary Ann Schwartz, MA, *Senior Associate Dean*
Chris James, MS, *Chief Financial Officer*

Degrees and Accreditation

The Viterbi School of Engineering offers the following undergraduate curricula leading to the Bachelor of Science in: Aerospace Engineering; Astronautical Engineering; Biomedical Engineering; Biomedical Engineering (Electrical Engineering); Biomedical Engineering (Mechanical Engineering); Biomedical Engineering (Molecular and Cellular Engineering); Chemical Engineering; Chemical Engineering (Biochemical Engineering); Chemical Engineering (Environmental Engineering); Chemical Engineering (Nanotechnology); Chemical Engineering (Petroleum Engineering); Chemical Engineering (Polymer/Materials Science); Chemical Engineering (Sustainable Energy); Civil Engineering; Civil Engineering (Building Science); Civil Engineering (Construction Engineering and Management); Civil Engineering (Environmental Engineering); Civil Engineering (Structural Engineering); Civil Engineering (Water Resources Engineering); Computer Engineering and Computer Science; Computer Science; Computer Science/Business Administration (with the Marshall School of Business); Computer Science Games; Electrical and Computer Engineering; Environmental Engineering; Industrial and Systems Engineering; Mechanical Engineering; Mechanical Engineering (Petroleum Engineering); and Physics/Computer Science (with the Dornsife College of Letters, Arts and Sciences). The school also offers undergraduate curricula leading to the Bachelor of Arts in Data Science (with the Dornsife College of Letters, Arts and Sciences).

Minor programs are offered in: 3-D Computer Graphics and Modeling; Applied Analytics; Applied Computer Security; Astronautical Engineering; Blockchain; Cloud Computing with DevOps; Computer and Digital Forensics; Computer Programming; Computer Science; Connected Devices and Making; Construction Planning and Management (with the Price School of Public Policy); Craniofacial and Dental Technology (with the Herman Ostrow School of Dentistry and the Dornsife College of Letters, Arts and Sciences); Engineering Management; Enterprise Information Systems; Foundations of Data Science; Innovation: The Digital Entrepreneur (with the USC Marshall School of Business); Internet of Things (IoT) Engineering; Mobile App Development; Nanotechnology; Petroleum Engineering; Technical Game Art; Technology Commercialization (with the Marshall School of Business); Video Game Design and Management; Video Game Programming; and Web Technologies and Applications.

Graduate curricula leading to the Master of Science in: Aerospace Engineering; Aerospace and Mechanical Engineering (Computational Fluid and Solid Mechanics); Aerospace and Mechanical Engineering (Dynamics and Control); Analytics; Applied Data Science; Applied Physics; Astronautical Engineering; Biomedical Data Analytics; Biomedical Engineering; Biomedical Engineering (Medical Imaging and Imaging Informatics); Chemical Engineering; Civil Engineering; Civil Engineering (Advanced Design and Construction Technology); Civil Engineering (Construction Engineering); Civil Engineering (Structural Engineering); Civil Engineering (Transportation Engineering); Civil Engineering (Transportation Systems); Civil Engineering (Water and Waste Management); Communication Data Science; Computer Engineering; Computer Science; Computer Science (Computer Networks); Computer Science (Computer Security); Computer Science (Data Science); Computer Science (Game Development); Computer Science (High Performance Computing and Simulations); Computer Science (Intelligent Robotics); Computer Science (Multimedia and Creative Technologies); Computer Science (Scientists and Engineers); Computer Science (Software Engineering); Cyber Security Engineering; Electrical and Computer Engineering (Analog, Mixed-Signal and Radio-Frequency Integrated Circuits); Electrical and Computer Engineering (Machine Learning and Data Science); Electrical Engineering; Electrical Engineering (Computer Architecture); Electrical Engineering (Computer Networks); Electrical Engineering (Electric Power); Electrical Engineering (VLSI Design); Electrical Engineering (Wireless Health Technology); Electrical Engineering (Wireless Networks); Engineering Management; Environmental Engineering; Environmental Data Science; Financial Engineering; Global Supply Chain Management (with the Marshall School of Business); Green Technologies; Health Systems Management Engineering (with the Price School of Public Policy); Healthcare Data Science; Industrial and Systems Engineering; Manufacturing Engineering; Materials Engineering; Materials Science; Mechanical Engineering; Mechanical Engineering (Energy Conversion); Medical Device and Diagnostic Engineering; Operations Research Engineering; Petroleum Engineering; Petroleum Engineering (Geoscience Technologies); Petroleum Engineering (Digital Oilfield Technologies); Product Development Engineering; Public Policy Data Science (with the Price School of Public Policy); Spatial Data Science (with the Viterbi School Engineering); and Systems Architecting and Engineering.
Graduate curricula leading to the Master of Construction Management.

Graduate curricula leading to dual degrees in: Master of Science Aerospace Engineering / Master of Science Engineering Management; Master of Science Electrical Engineering / Master of Science Engineering Management; Master of Science Industrial and Systems Engineering / Master of Business Administration;

Master of Science Mechanical Engineering / Master of Science Engineering Management; Master of Science Systems Architecting and Engineering / Master of Business Administration; and Master of Science Petroleum Engineering / Master of Science Engineering Management.

Graduate curricula leading to the Engineer degree in: Aerospace Engineering; Astronautical Engineering; Chemical Engineering; Civil Engineering; Electrical Engineering; Environmental Engineering; Industrial and Systems Engineering; Materials Science (not currently accepting applications); Mechanical Engineering; and Petroleum Engineering.

Through the Graduate School, graduate curricula leading to the Doctor of Philosophy in: Aerospace Engineering; Astronautical Engineering; Biomedical Engineering; Chemical Engineering; Civil Engineering; Computer Engineering; Computer Science; Electrical Engineering; Engineering (Environmental Engineering); Industrial and Systems Engineering; Materials Science; Mechanical Engineering; and Petroleum Engineering.

Graduate certificates in: Astronautical Engineering; Data Science Foundations; Digital Oilfield Technologies; Health Systems Operations (with the USC Price School of Public Policy); Health, Technology and Engineering (with the Keck School of Medicine); Network Centric Systems; Optimization and Supply Chain Management (with the Marshall School of Business); Software Architecture; Systems Architecting and Engineering; and Transportation Systems (with the Price School of Public Policy).

Undergraduate Program Accreditation

The Bachelor of Science degrees in aerospace engineering, astronautical engineering, biomedical engineering, chemical engineering, civil engineering, computer engineering and computer science, electrical engineering, environmental engineering, industrial and systems engineering, and mechanical engineering are accredited by the Engineering Accreditation Commission of ABET, abet.org. The Bachelor of Science degrees in computer engineering and computer science and in computer science are accredited by the Computing Accreditation Commission of ABET, abet.org.

Undergraduate Program Student Outcomes

By the time of graduation from Bachelor of Science degree programs accredited by the Engineering Accreditation Commission of ABET, students will develop at least the following abilities:

1. an ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

By the time of graduation from Bachelor of Science degree programs accredited by the Computing Accreditation Commission of ABET, students will develop the ability to perform the following:

1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.

Viterbi Admission and Student Engagement (VASE)

The mission of Viterbi Admission and Student Engagement (VASE), located in Ronald Tutor Hall of Engineering (RTH) 110 and Olin Hall of Engineering (OHE) 106, is to support the lifecycle of all Viterbi students (bachelor's, master's, doctoral and executive education), providing exceptional service to students from the time they are first considering the Viterbi School, to the time of completion and beyond.

The office is responsible for working with both prospective and continuing students. It directs special services and programs, provides a variety of support services, sponsors student organizations, is involved with student government and acts as a liaison with other university offices.

The office works closely with faculty and staff across our Viterbi departments and programs to coordinate admission and a range of student services and engagement programs including Viterbi Career Connections and the Center for Engineering Diversity.

Undergraduate Degrees and Requirements

Change of Major to Engineering

USC undergraduate students interested in adding an engineering major must go through the pre-engineering process (viterbiundergrad.usc.edu/pre-engineering/). Approval is granted on the basis of academic performance at USC and in the required prerequisite courses in the Viterbi School.

Non-engineering students may complete a maximum of five engineering courses. No further engineering courses may be taken unless admission has been approved.

Common Requirements

Certain general requirements are common to all undergraduate curricula for Bachelor of Science degrees in Engineering.

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires eight courses in six Core Literacies, plus writing and two courses in Global Perspectives (which may double-count with courses in the Core Literacies). See the General Education Program for more information.

Students in the Viterbi School of Engineering must satisfy the general education requirements. Students satisfy Core Literacy requirements in life sciences, physical sciences, and quantitative reasoning with the basic science and mathematics elements of their undergraduate engineering programs.

Students in the engineering "3-2" program are not required to satisfy general education requirements or the lower-division writing requirement for USC; these students are understood to have satisfied USC's general education requirements when they have satisfied the general education requirements and lower-level writing requirement at their previous institution. All students must, however, complete the WRIT 340 requirement.

Mathematics

Sixteen units or more, including three semesters of calculus, are required. Computer Science/Business Administration and

Computer Science Games require two semesters of calculus.

Basic Sciences

Twelve units or more of biology, chemistry or physics are required.

The Computer Science major and Computer Engineering/ Computer Science major require 8 units of basic science. Computer Science/Business Administration and Computer Science Games require 4 units of basic science.

Residence Requirement

All students must complete a minimum of 64 units at USC in order to receive a USC degree. In addition, the Viterbi School of Engineering requires that students complete all upper-division units required for the major in residence.

For students in the Viterbi School of Engineering "3-2" Program, at least 48 units must be earned in courses taken at USC.

Scholarship Requirement in Major Subject

For graduation with a bachelor's degree, a grade point average of C (2.0) or higher is required in all upper-division courses applied toward the major including any approved substitutes for these courses taken at USC. Additional scholarship requirements for the various majors are listed under the departmental headings.

Grade Point Requirement

A grade point average of at least 2.0 is required on all course work attempted at USC.

Transfer students must meet these averages, both on residence work attempted and on combined transferred and residence courses attempted.

Probation/Disqualification

A student whose overall GPA falls below 2.0 is placed on academic probation. Continued enrollment requires clearance from an academic review counselor.

Each semester, students on academic probation are required to receive academic advisement. Proof of advisement must be filed with the Academic Review Department before any registration requests will be processed. The only acceptable proof of advisement is an official academic review advisement record signed by the student's academic adviser and a representative from the Viterbi Admission and Student Engagement Office. Academic review advisement forms may be obtained from Tutor Hall of Engineering (RTH) 110 or John Hubbard Hall 113.

Students on probation are encouraged to utilize the academic services (advisement and free tutoring) provided by the Viterbi Admission and Student Engagement Office.

Students on academic probation who do not raise their overall GPA to 2.0 after two semesters of enrollment (excluding summers) will be academically disqualified from the university. However, if a student earns a minimum semester GPA of 2.3 in the second or any subsequent probation semester but has not yet reached an overall 2.0 GPA, the student will not be disqualified and will be allowed to enroll an additional semester.

Petitions for readmission after academic disqualification are initiated by the student through the Academic Review Department. All grade issues (IN, MG, etc.) must be resolved prior to the submission of such a petition. Before petitioning for readmission, a student must complete a minimum of 12 semester units of transferable course work (applicable to USC degree requirements) with a minimum 3.0 GPA. University residency requirements will determine whether these units are accepted as transfer credit.

As readmission to the university is never guaranteed, any indication of strong academic performance beyond the 12 unit minimum would strengthen a readmission petition.

Students must petition for readmission by December 30 for the spring semester, by May 1 for the summer session and by August 15 for the fall semester. Late petitions will not be accepted. A non-refundable fee determined by the Academic Review Office must accompany all readmission petitions.

Special Educational Opportunities

W.V.T. Rusch Undergraduate Engineering Honors Program

The W.V.T. Rusch Undergraduate Engineering Honors Program (EHP) recognizes select undergraduate engineering students who have excelled in their studies and completed a substantive project in engineering research or innovation. This project will result in a senior thesis or a commercialization plan, and will be pursued under the supervision of a faculty mentor, either curricularly (e.g., via a department directed research, senior thesis course, ENGR 400 Engineering Honors Project, etc.) or extracurricularly (through volunteer or compensated research). To apply for the EHP, students must have earned at least a 3.5 USC GPA after at least one semester of USC course work and have at least three semesters remaining at USC. To graduate with Engineering Honors, and for it to be noted on their academic transcripts, students must meet certain requirements, including: earn at least a 3.5 cumulative USC GPA, complete two semesters of ENGR 100 Engineering Honors Colloquium, and complete an accepted senior thesis, or commercialization plan. Additional details are available from the Viterbi Admission and Student Engagement (VASE) office.

NAE Grand Challenges Scholars Program

The National Academy of Engineering (NAE) Grand Challenges Scholars Program (GCSP), co-founded by USC Viterbi in 2009, encourages students to develop mindsets and competencies that will enable them to pursue solutions to pressing problems, as articulated in the NAE's 14 Grand Challenges for Engineering. Such Grand Challenges span four wide areas, from sustainability (e.g., making solar energy economical) to security (e.g., securing cyberspace), health (e.g., reverse engineering the brain) and joy of living (e.g., engineering the tools of scientific discovery).

A Viterbi student may graduate with Designation as an NAE Grand Challenge Scholar (GCS), which would be noted on academic transcripts by submitting an application that documents the student's involvement related to one of the 14 NAE Grand Challenges, and the development of mindsets and competencies in the following five areas: talent/research, multidisciplinarity, viable business and entrepreneurship, multicultural awareness, and societal consciousness. Students typically begin their GCSP involvement during their first years at USC, developing the competencies over the course of study in Viterbi and submit, during their senior year, a formal application for the GCS Designation. For more information, please visit: viterbiundergrad.usc.edu/gcsp/.

Viterbi Fellows Program

Every year, a select group of promising incoming first-year students is invited to join the Viterbi Fellows Program. The program provides pathways and opportunities to maximize their potential and develop as community leaders starting in their first semester. Fellows engage in a combination of opportunities and experiences, both academic and co-curricular.

Each Viterbi Fellow receives a Merit Research Award to get involved in research with our faculty from their first semester. In addition to giving students excellent first-hand experience, these awards can help offset the cost of education since each participant earns wages for his or her work. In addition, Viterbi Fellows receive a small living stipend to support their educational expenses. Viterbi Fellows are also granted priority consideration for many of the Viterbi School programs, including iPodia, international maymester and fall-lead programs, and career-related programs. Fellows also receive special invitations to events such as the Fellows' Dinner with the Dean, and co-curricular events.

Honor Societies

The Viterbi School of Engineering has established a variety of honor societies to recognize academic excellence, creativity, and service. These are: Alpha Pi Mu (industrial and systems

engineering), Chi Epsilon (civil engineering) and Tau Beta Pi (engineering honor society).

3+2 Program

The Viterbi School of Engineering has developed agreements with more than 20 liberal arts colleges nationwide in which a student attends a liberal arts institution for their first three years of college, pursuing pre-engineering courses in addition to a solid program in the liberal arts or sciences. At the end of the three years, upon recommendation from the liberal arts college, the student applies to the Viterbi School of Engineering as a transfer student. If admitted, they can complete the remaining requirements for a BS degree typically within two years. After degree requirements for both schools are complete, the student will receive two degrees — a BA from the liberal arts college and a BS in engineering or computer science from USC.

International Exchange Programs

The Viterbi School of Engineering International Exchange Program gives undergraduate students the opportunity to broaden their exposure to the global context of engineering theory and practice by spending a semester abroad in a challenging academic environment at an international host institution. The International Exchange Program allows students to satisfy technical electives and/or approved degree requirements by attending approved partner institutions. This program is open to students entering their junior or senior year. Students apply at the Viterbi Student Engagement Office. Candidates must meet all admission requirements of both the Viterbi School of Engineering as well as those of the international host institution. Contact the Viterbi Admission and Student Engagement (VASE) Office for a complete list of international exchange partners.

Viterbi Maymester and Fall Lead Programs

The Viterbi School of Engineering Maymester and Fall Lead programs allow students to go abroad for 2-3 weeks before the fall semester begins or after the spring semester ends. Students will complete the majority of the course on-campus during the semester and use the two weeks abroad to inform the course content and assignments by looking at specific engineering topics from a global perspective.

Center for Undergraduate Research in Viterbi Engineering

The Center for Undergraduate Research in Viterbi Engineering (CURVE) provides a centralized resource for undergraduate students to explore research opportunities in Viterbi early on in their undergraduate career. The goals of CURVE are to engage Viterbi students in research and mentoring communities, prepare students with skills to access the field of engineering or computer science, and provide students funding while they gain experience on a faculty-led research project.

VASE Academic Services and Engagement

Center for Engineering Diversity

Established in 1975, the Center for Engineering Diversity (CED) strives to increase the representation of African-American, Latino and Native American engineers who are equipped to be ethical, global-minded, innovative leaders.

Our mission is to build a community of authentic engineers through programs and services that promote professional development, support academic excellence and develop leadership skills.

Visit the website for the Center for Engineering Diversity.

Women in Engineering Program (WIE)

The Women in Engineering Program (WIE) offers professional, academic and co-curricular support to the women of the Viterbi School. The goal of the Viterbi Women in Engineering Program is to recognize the unique challenges that women engineering students face, provide resources and overall support to address these challenges. WIE's mission is to recruit and retain women engineers and to empower our female students to find academic and personal success during their Viterbi career and beyond.

Contact the Women in Engineering Program at (213) 740-4530 for more information.

Klein Institute for Undergraduate Engineering Life

The Klein Institute for Undergraduate Engineering Life (KIUEL) was established to provide Viterbi undergraduates with a variety of personal and professional activities designed to enhance student life experiences outside the classroom. The KIUEL Programming Board implements programs around community, leadership, engagement, and service. Past KIUEL events include: KIUEL Viterbi Presidents Council Leadership Retreat, Engineers Week (E-Week), KIUEL Down to Finals and Professor Coffee Hours.

Viterbi Career Connections

The Viterbi School of Engineering provides extensive career services to all students. We recommend that students frequently engage in co-curricular activities combined with their academic programs to compete in the job market more successfully. Students are encouraged to update their profile information and career interests with Viterbi Career Connections at least once per year via the Viterbi Career Gateway portal. By doing so, they will be kept informed of all career-related events such as company information sessions, career and internship expos, job and internship postings, professional development workshops, industry luncheons, networking events, and more. Additionally, with an updated profile, students can participate in the Viterbi School's extensive on-campus recruitment activities.

Viterbi graduates go places! USC's Viterbi School of Engineering attracts employers from Southern California and across the country and the world. Find out more about where Viterbi students find employment by visiting viterbicareers.usc.edu/firstdestination/. A small sample of the many companies that have recently hired co-ops, interns, and full-time employees from the Viterbi School include: Abbott Laboratories; Accenture; Adobe Systems Inc.; Amazon Corp. LLC; Apple; Bloomberg L.P.; Blue Origin; The Boeing Company; Chevron; Citrix Systems, Inc.; Deloitte Financial Advisory Services; Edwards Lifesciences Corp.; Ernst & Young, Facebook, Inc., General Atomics-Aeronautical System Inc., General Electric, Goldman Sachs; Google, Intel Corp., IBM, Intuit, Inc., Jet Propulsion Laboratory, Juniper Networks, Inc., KPMG; LinkedIn, Lockheed Martin Corporation, Medtronics, Inc., Microsoft Corporation; NASA; Northrop Grumman Corporation; Oracle Corp.; Qualcomm; Raytheon Company; Salesforce.com, Inc.; Snapchat; SpaceX; Symantec Corp.; Tesla; The Aerospace Corp.; TikTok; Turner Construction; U.S. Air Force; Verizon Media, Visa Inc.; Walt Disney Imagineering.

Cooperative Education

Students can earn degree credit and industry work experience by participating in the Co-op/Internship Program before they graduate. Co-ops and internships improve students' understanding of the relationship between theory and practice, helps them fine-tune their career goals, and aids in acquiring essential engineering skills. Students' work assignments are closely related to their specific degree program and are appropriate to their current academic level.

Participation in co-op and internship programs is open to all bachelors, master's, and doctoral engineering students. Undergraduate students are eligible to apply for the co-op course in the second semester of their sophomore year. Master's and Doctoral students are typically eligible for an internship course after maintaining full-time student status for one regular academic year. While on assignment, students enroll in a 1–2 unit course (ENGR 395ax, ENGR 596, ENGR 597x or ENGR 598) that aids in integrating on-campus and off-campus learning. With departmental approval, students may earn credit toward a degree upon completion of this course.

Graduate Degrees and Requirements

General Requirements

The Viterbi School of Engineering recommends candidates for the Master of Science degree in: aerospace engineering, analytics, astronautical engineering, biomedical engineering, chemical engineering, civil engineering, computer engineering, computer science, cyber security engineering, data science, electrical engineering, engineering management, environmental engineering, financial engineering, green technologies, health systems management engineering, industrial and systems engineering, manufacturing engineering, materials engineering, materials science, mechanical engineering, medical device and diagnostic engineering, operations research engineering, petroleum engineering, product development engineering, and systems architecting and engineering; and the Master's degree in construction management. Several areas of emphasis and specialization are available within these disciplines.

All graduate work in the Viterbi School of Engineering is under the jurisdiction of the Viterbi School except the Doctor of Philosophy degree, which is under the jurisdiction of the USC Graduate School. All prospective graduate engineering students should apply to the USC Office of Graduate Admission.

Admission

Two classes of students are admitted to take courses for graduate credit: admitted and conditionally admitted students. These classifications are determined by the Office of Graduate Admission on the recommendations of the appropriate department in the Viterbi School of Engineering.

Admitted Students

This is the status of a graduate student pursuing work leading toward an advanced degree. The student has been accepted into the degree program without any conditions.

Conditionally Admitted

The chair of a major department in the Viterbi School of Engineering may recommend that a student be admitted under certain conditions. Conditional admission is granted when a student's admission records are incomplete or when deficiency courses must be taken but the student appears to be otherwise admissible. The conditions must be met before the completion of two semesters of enrollment or 12 units of course work, whichever comes first. If the conditions on admission are not met within the given time period, the student may not be allowed to register for course work in subsequent semesters. When the conditions have been met, the academic department will remove the restrictions that have been placed on the student's registration.

Criteria

To qualify for admission, applicants are expected to present strong academic records and show superior accomplishment in their engineering and related courses. Admission decisions will be based on Graduate Record Examinations test scores and transcripts of previous school work. Individual departments may set higher admission standards than the Graduate School. Some programs also require letters of recommendation and a statement of purpose. Doctor of Philosophy applicants who have published professional papers in their field may forward copies to the department, and they will be considered together with the other credentials submitted.

Procedure

Applicants to graduate programs must present credentials to the Office of Graduate Admission showing that they have completed an acceptable curriculum for the bachelor's degree. In some departments, students with outstanding records will be admitted for the doctoral program without first receiving the Master of Science degree. If the previous degree is not in the field in which the student wishes to pursue graduate study, it may be necessary to make up undergraduate deficiencies in the area of the desired specialty. Applicants must take the Graduate Record Examinations. Satisfactory scores on the general test are required for admission to full graduate standing in most programs. Consult the department office for further information.

Once the application for admission has been sent, arrangements should be made immediately to have official transcripts of all previous undergraduate and graduate school work forwarded directly to the Office of Graduate Admission from the schools attended. If the Graduate Record Examinations general and subject tests, as well as the TOEFL or IELTS exams, have been taken the scores should be sent to the Office of Graduate Admission by the educational testing service. If the tests have not been taken, the applicant should register to take them on the earliest available date. The departments will review the application files and select for admission those students offering the greatest promise for completing graduate studies.

Progressive Degree Programs

The progressive degree program allows qualified undergraduate students the opportunity to complete an integrated program of study joining a bachelor's degree program and a master's degree program in the same or different departments. Applicants for a progressive degree program must have completed 64 units of course work applicable to their undergraduate degree since graduating from high school. (Credit by exam and course work taken prior to high school graduation are excluded). Applicants can submit their application at any time after completion of 64 units but it is highly recommended that applications are submitted in the fall semester of the third year of enrollment at USC. The application for admission to a progressive master's program must be accompanied by a departmentally approved course plan proposal. Letters of recommendation may be required for some applicants depending upon their GPA at the time of application. Comprehensive information including how to apply can be found at viterbiundergrad.usc.edu/future/pdp/.

Progressive degree program students must fulfill all the requirements for both the bachelor's degree and the master's degree. The total number of units for the master's degree, however, may be reduced by a maximum of one-third. A minimum of two-thirds of the units required for the master's degree must be at or above the 500 level. Students will be subject to undergraduate academic progress standards and policies while in undergraduate status and master's academic progress standards and policies while in graduate status. The degrees may be awarded separately, but the master's degree will not be awarded before the undergraduate degree. The time limit for completing a progressive degree program is 12 semesters. For more information, refer to the Requirements for Graduation page.

General Requirements for the Master of Science

Residence Requirements

Viterbi students are allowed up to five years to earn a master's degree. Depending on the specific degree, the typical time required varies from between one and one-half to two years for students in MS programs on campus to three years for MS students completing their degrees online via DEN@Viterbi. Master's degrees other than the Master of Science typically require more course work and may take more time to complete.

Students entering the Viterbi School of Engineering with course or credit deficiencies require a correspondingly longer period. A candidate must complete the last four semester units of course work at USC. No more than 25 percent of the minimum units required for the program will be accepted from another engineering school upon verification by the Office of Degree Progress and the approval of the major department.

Prerequisites

Prerequisite is a bachelor's degree in engineering, allied fields or science. If the graduate field is different from the field of the bachelor's degree, there may be undergraduate deficiencies assigned by the major department, and these must be made up by taking and passing the assigned courses before proceeding with the graduate courses.

Deficiency Courses

New students may be required to demonstrate satisfactory preparation for the graduate program with previously completed course work. In cases where preparation is not demonstrated, up to 9 units of deficiency course work may be required in addition to the normal degree requirements.

Credit for required deficiency courses may not be applied toward a graduate degree. A deficiency course within the same discipline taken after the higher-level course has been passed will not be available for unit or grade point credit.

Placement Examinations

Enrollment in certain 500- and 600-level courses in the disciplines of computer engineering and electrical engineering will require a student to either take and pass the corresponding 400-level prerequisite at USC, or pass a placement exam in the corresponding course.

Not all 400-level prerequisite courses taken instead of a placement exam are available for degree credit. No unit or grade point credit is given for placement exams. Please consult with an academic adviser or refer to the department website for information on specific courses and placement exam details.

Grade Point Average Requirements

A grade point average (GPA) of 3.0 (A = 4.0) is required for the master's degree in all engineering programs. The minimum GPA must be earned on all course work applied toward the master's degree and on all 400-level and above course work attempted at USC beyond the bachelor's degree. A minimum grade of C (2.0) is required in a course to receive graduate credit. Work graded C- or below is not acceptable for subject or unit credit toward any graduate degree. Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average.

Course Selection

There are two program options for the master's degree, one with a thesis and the other without. Courses are selected to fit the special needs of individual students, must form an integrated program leading to a definite objective and must be approved in advance by the department. Only courses numbered 400 and above may be applied for degree credit.

Program without Thesis

The minimum requirement is 27 units; 18 of these units must be at the 500 level and at least 18 units must be in the major department and closely related departments. Prior department approval is required for all non-major courses. Specific requirements are listed under each department.

Program with Thesis

The minimum requirement is 27 units; 4 of these units are to be thesis. At least 16 units, not including thesis, must be at the 500 level or higher, and at least 18 units must be in the major department. Two units of 594a and 2 units of 594b are required. No more than 4 units of 590 Directed Research is permitted.

Master's Thesis

The thesis, when it is required, is regarded as an important part of the work of the candidate for a master's degree. It must be a serious, considerable and publishable piece of work demonstrating the writer's power of original thought, thorough grasp of the subject matter and ability to present material in a scholarly manner and style.

The thesis presents the results of an investigation of an approved subject in the major department. It is supervised throughout by a thesis committee, appointed by the chair of the student's major department. The committee is usually composed of two members of the major department and one other member of the faculty.

The student will register in courses 594a and b respectively during the final two semesters of the master's program as determined by discussion with an adviser. (Concurrent registration for 594a and b during the same semester is permitted when a student's progress makes completion of all requirements likely within one semester.) If the thesis has not been completed within these two semesters, the candidate must register for 594z each semester until the thesis has been accepted but no additional unit credit will be earned. Units of 594ab Master's Thesis may not be converted to units of 590 Directed Research.

A student readmitted to candidacy by petition to the Graduate School must reregister for 594a and 594b. Final acceptance of the thesis is based upon the recommendation of all members of the thesis committee. For requirements concerning format of master's thesis see The Graduate School section of this catalogue.

Candidates who find it necessary to be excused from registration in 594a or 594b for a semester must formally report before the beginning of the semester to the Viterbi Admission and Student Engagement Office that they will be inactive during that semester and request a leave of absence. During a leave of absence, a candidate will not be entitled to assistance from the thesis committee or to the use of university facilities. The granting of a leave of absence does not change the candidate's responsibility for meeting the time schedule for the completion of degree requirements. Leave will be granted only under exceptional circumstances.

Progress Toward the Degree

Graduate students are expected to make regular progress toward their degrees as defined by the faculty of their respective departments and within the time limits allowed. Graduate students' progress and performance are reviewed each semester. Students making unsatisfactory progress receive a formal written warning and are placed on a semester of academic warning with specific conditions to be met for continuation in the program. Please refer to catalogue sections Academic Warning and Dismissal of Graduate Students; Grade Point Average Requirements; and the website of the Viterbi Admission and Student Engagement (VASE) at viterbigrad.usc.edu/.

Department Approval for Non-major Courses

Prior departmental approval is required for non-major courses to be taken and applied toward a graduate degree. Students must consult with the faculty adviser for formal written permission to take courses outside the major department for degree credit.

A copy of the faculty adviser's written approval must be kept in the department file and retained by the student until graduation.

Time Limit

It is expected that work for a Master of Science in Engineering will be completed within a maximum of five calendar years. An academic department may grant an extension of up to one year at a time for a maximum of two years. Courses taken more than seven years prior to the date upon which the degree is to be awarded cannot be included for the degree.

Admission to Candidacy

Application for admission to candidacy for the Master of Science is a separate step from admission to graduate standing. The requirements for admission to candidacy are: (1) the applicant must be admitted to regular graduate standing and must have removed all undergraduate deficiencies, and (2) the applicant must submit a complete program approved by the major department showing the course work, research and thesis (if required).

Application for graduation should be made at the beginning of the semester in which the requirements for the master's degree are to be completed. Students are strongly advised to file for graduation as soon as the registration process has been completed so that their names may appear in the printed Commencement program and so that any discrepancies in their records may be resolved. Late filing may delay conferral of the degree.

Application forms for graduation with the master's degree may be obtained from the student's academic department. This application should be returned to the student's academic department. Changes in the program after admission to candidacy are made by petition to the student's academic department.

Second Master's Degree

A graduate student who already holds a master's degree from

USC may apply a limited number of previously earned units toward the second master's degree.

The maximum number of units that may be applied toward the second master's degree for course work taken from a first master's degree at USC is no more than 25 percent of the minimum units required for the program. In all cases, the permission of the chair of the major department is required. All credit, including the units from the first master's degree, must be earned within seven calendar years.

For students who earned their first master's degree at another institution, no course work may be repeated from the first program of study and no unit credit from the first program of study may be counted toward the second master's degree.

General Requirements for the Master of Engineering Degree

The Viterbi School does not currently offer degree programs with the Master of Engineering designation.

General Requirements for the Engineer Degree

The Engineer degree is awarded under the jurisdiction of the Viterbi School of Engineering. This degree is granted upon completion of a comprehensive curriculum beyond the general course requirements for the Master of Science and after successfully passing an engineer's qualifying examination. The required curriculum is intended to give students broad preparation in two areas of engineering, together with a minimum number of units in these areas to prepare them for the interdisciplinary nature of the many complex problems they will encounter in practice today. The degree is also intended to fulfill a growing need in industry for students with comprehensive advanced engineering training, but not necessarily with the research orientation developed by the PhD student.

The Engineer degree is a terminal degree. Students who complete the Engineer degree will not be considered for admission to the PhD program.

The Engineer degree is offered in aerospace engineering, astronautical engineering, chemical engineering, civil engineering, electrical engineering, environmental engineering, industrial and systems engineering, materials science, mechanical engineering and petroleum engineering.

Prerequisites

There are three basic prerequisites for the Engineer Degree Program: a Master of Science degree or completion of 27 units of acceptable course work, application for admission to the Viterbi School of Engineering and acceptance to the program by the appropriate department.

Course Requirements

The Engineer degree requires a minimum of 30 units of graduate course work beyond the Master of Science degree; up to 6 units at the 400 level may be counted at the discretion of the student's qualifying exam committee if the committee finds them necessary for the student's program. The course work must form a balanced program of study leading to a definite concentration in two fields of engineering, a minimum of 12 units in one field, nine in another; nine units are elective and may be taken outside the Viterbi School of Engineering, but must be acceptable for graduate credit. The distribution of course work will be governed by the student's qualifying exam committee and should be considered in conjunction with the course work done for the Master of Science degree. A candidate for the Engineer degree may substitute a project under the supervision of a faculty member for 6 units of course work. To have the project credited toward the degree, the student must register in 690 Directed Research during the course of the project; total 690 Directed Research registration should not exceed 6 units. A student wishing to work on a project must make arrangements with a member of the faculty to supervise and evaluate work, and obtain the approval of the committee chair prior to completing more than 15 units of course work. In many cases, the project may be related to the candidate's work outside the university but must still be supervised by a faculty member. Distribution of the course work should take into account the nature of the project.

Grade Point Average Requirement

A minimum grade point average of 3.0 must be earned on all course work applied toward the Engineer degree. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor's degree. A minimum grade of C (2.0) is required in a course to receive graduate credit. Work graded C- or below is not acceptable for subject or unit credit toward any graduate degree. Transfer units count as credit (CR) toward the Engineer degree and are not computed in the grade point average.

Residence Requirements

A candidate must complete the last 4 units of course work at USC. At least 26 units must be taken in residency at USC. A maximum of 4 transfer units not counted toward a previous degree may be allowed with adviser approval.

Guidance Committee

After being granted graduate standing, the student must form a guidance committee. The committee is made up of three full-time faculty members who are specialists in the student's areas of concentration, with at least two from the major department. Forms to appoint the committee are available from the student's academic department. The student is responsible for finding a faculty member from one area of concentration who will act as the chair of the guidance committee. The chair will assist in selection of the other members. Advisement of the student after formation of the committee will be by the committee chair.

Qualifying Examination

The student must satisfactorily complete an engineer's qualifying examination administered by his or her guidance committee. This examination will cover both areas of concentration and will consist of at least one written and one oral examination. This examination is normally taken during the last semester of course work toward the degree. Students who choose to take the examination in the semester following the completion of course requirements may do so up until the end of the third week of classes without registering. After that date, they must register for GRSC 810 to maintain continuous enrollment in the program. Results of the examination are reported to the Viterbi Office of Graduate and Professional Programs and forwarded to the Office of Academic Records and Registrar.

Transfer Credits

Up to 4 units of graduate course work may be transferred from an accredited institution to be applied toward the Engineer degree. Transfer work must have been done after receipt of the Master of Science degree and must be approved by the qualifying exam committee.

Reserving Course Credit

A student who receives the Master of Science degree at USC may reserve a limited number of units taken prior to the receipt of the Master of Science degree for credit toward the Engineer degree. To reserve credit, the course must have been taken during the last semester as a Master of Science candidate, not used toward the Master of Science degree, be acceptable to the student's committee, and approved by the Office of Degree Progress.

Time Limit

The student must complete all requirements within five calendar years.

Admission to Candidacy

After satisfactorily completing the qualifying examination, and no later than the beginning of the last semester of course work, the student must file for candidacy. This is a separate and distinct step which sets forth the entire academic program fulfilling the degree requirements and is used as a working basis for awarding the degree.

General Requirements for the Doctor of Philosophy

This degree is granted under the jurisdiction of The Graduate School. Students should also refer to the Requirements for Graduation section and The Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School.

Thirteen Doctor of Philosophy (PhD) programs are offered: aerospace engineering, astronautical engineering, biomedical engineering, chemical engineering, civil engineering, computer engineering, computer science, electrical engineering, engineering (environmental engineering), industrial and systems engineering, materials science, mechanical engineering and petroleum engineering.

Deficiency Courses

New students may be required to demonstrate satisfactory preparation for the graduate program with previously completed course work. In cases where preparation is not demonstrated, up to 9 units of deficiency course work may be required in addition to the normal degree requirements.

Credit for required deficiency courses may not be applied toward a graduate degree. A deficiency course within the same discipline taken after the higher-level course has been passed will not be available for unit or grade point credit.

Placement Examinations

Enrollment in certain 500- and 600-level courses in the disciplines of computer engineering and electrical engineering will require a student to either take and pass the corresponding 400-level prerequisite at USC, or pass a placement exam in the corresponding course.

Not all 400-level prerequisite courses taken instead of a placement exam are available for degree credit. No unit or grade point credit is given for placement exams. Please consult with an academic adviser or refer to the department Website for information on specific courses and placement exam details.

Foreign Language Requirements

There is no foreign language requirement for engineering majors.

Course Requirements

Satisfactory completion of at least 60 units of approved graduate-level course work with a cumulative grade point average of at least 3.0 is required of all PhD students in engineering. A minimum grade of C (2.0) is required in a course to receive graduate credit. Work graded C- or below is not acceptable for subject or unit credit toward any graduate degree. Undergraduate prerequisites and graduate course work will be required in accordance with the regulations of the major department or program and the recommendations of the student's qualifying exam committee. Transfer units are subject to approval by the Office of Degree Progress (for course work taken at institutions in the United States) or by the Office of Graduate Admission (for course work taken at institutions outside the United States) and by the qualifying exam committee.

Screening Procedure

The original admission decision admitting a student to the PhD program is based on the student's previous academic records, Graduate Record Examinations scores and other evidence of scholastic abilities indicating promise for completing graduate studies. It is also a prerequisite that all PhD students successfully complete the screening procedures designated by the department. These usually consist of a written and an oral examination administered by the faculty. Students who fail the screening procedure will be advised that they are not recommended to continue in the PhD program and that any additional work may not be counted toward the degree.

Qualifying Exam Committee

The PhD student's program of study is supervised by the qualifying exam committee, which is formed immediately after passing the screening examination. The committee consists of five members, composed of the following: at least three USC faculty members (the committee chair plus at least two others) with appointments in the student's major department, of which at least one must be tenured; and at least one USC faculty member—denoted the "outside member"—with primary appointment outside the major department. These four committee members must have, and the fifth committee member usually has, a USC appointment (tenured/tenure-track faculty or approved research faculty) that makes them eligible to chair a PhD committee. Upon written request of the committee chair, and with a curricula vita that demonstrates a professional profile suitable for supervising PhD research, the fifth member may be a USC researcher or an "external member" from outside USC. The forms to appoint the committee are obtainable from the VASE website.

Qualifying Examinations

The qualifying examinations are taken during the last semester of the second year of graduate study or, at the latest, in the fifth semester or equivalent. The request to take the Qualifying Examinations must be filed in the semester prior to taking the examinations and at least 30 days before beginning the examinations. The examinations are intended to determine the extent of the student's knowledge in basic science and engineering areas as well as the ability to do original and scholarly research. The qualifying exam committee decides the nature of the qualifying examinations (both oral and written portions) according to the policies applicable in each department.

If not otherwise enrolled, a student must enroll in GRSC 800 during the semester in which the qualifying examination is to be taken. Students are strongly encouraged to take the qualifying examination during the first semester in which they are enrolled in Studies for the Qualifying Examination, and may not enroll in more than two semesters of Studies for the Qualifying Examination before taking the qualifying examination.

The examinations may be scheduled at any time during the semester provided that all members of the committee are available to administer them. All portions of the examinations must be completed within 60 days. After passing the qualifying examinations the PhD student is admitted to candidacy by the Graduate School and the dissertation committee is established. After this step, students will normally engage in at least one year of full-time graduate study and research on campus.

Doctoral Dissertation

An acceptable dissertation based on original investigation and supervised directly by the dissertation committee is required. The dissertation must show mastery of a special field, capacity for independent research and a scholarly result. Candidates are expected to keep all members of the dissertation committee informed of their progress at all stages of the dissertation.

Dissertation Committee

The dissertation committee must include: at least two USC faculty members (the committee chair plus one other) with appointments in the student's major department, of which at least one must be tenured; and at least one USC faculty member—called the "outside member"—with primary appointment outside the major department. These three committee members must have a USC appointment (tenured/tenure-track faculty or approved research faculty) that makes them eligible to chair a PhD committee. Additional committee members who do not meet that criterion (other USC faculty or researcher, or an external member from outside USC) may be included, upon written request of the committee chair and with a curricula vita that demonstrates a professional profile suitable for supervising PhD research. The dissertation committee may include the same five members as the PhD qualifying exam committee.

Defense of the Dissertation

After satisfactorily meeting all other requirements and after the research and writing of the dissertation are substantially complete, the PhD candidate must pass a general final oral examination devoted to the major field and to the topic of the dissertation. The examination will be conducted in such a manner as to determine to the satisfaction of the dissertation committee that the candidate

has attained the stage of scholarly advancement and power of investigation demanded by the university for final recommendation to the doctorate. The faculty are invited to attend and to participate in the final oral examination. However, only the dissertation committee may vote. Unanimous approval of the committee is required for the student to upload the dissertation to the Graduate School.

Departmental Requirements

The requirements and regulations set forth in this portion of the catalogue are to be construed as the minimal requirements only as established by the Graduate School. In addition, students must meet all the requirements established by their department.

Progress Toward the Degree

Graduate students are expected to make regular progress toward their degrees as defined by the faculty of their respective departments and within the time limits allowed. Graduate students' progress and performance are reviewed each semester. Students making unsatisfactory progress receive a formal written warning and are placed on a semester of academic warning with specific conditions to be met for continuation in the program. Please refer to catalogue sections Academic Warning and Dismissal of Graduate Students; Grade Point Average Requirements; and the website of the Office of Viterbi Admission and Student Engagement (VASE) at viterbigrad.usc.edu.

Special Educational Opportunities

DEN@Viterbi

Established in 1972, DEN@Viterbi, the USC Viterbi School of Engineering's online delivery system is a pioneer in the distance learning arena, using cutting-edge technology to enable professional engineers to take USC engineering courses for graduate degree credit without coming to the campus. DEN@Viterbi students enrolled around the world are pursuing over 40 graduate degree programs online — more choices than at any other research university. DEN@Viterbi breaks down geographical and scheduling barriers, allowing students to take classes anytime and anywhere, with the option for live interactivity. DEN@Viterbi students receive support from administrative and technical staff, and enjoy access to all services the Viterbi School has to offer.

The Viterbi School has made it possible for on-campus students enrolled in DEN@Viterbi (online) courses to receive free access to the archived online course lectures. This valuable study aid enables students to review lectures throughout the semester.

For more information about graduate programs available online via DEN@Viterbi, please visit viterbi.usc.edu/den.

Degrees and Requirements

Educational Mission — The degree programs of the Department of Aerospace and Mechanical Engineering provide the educational foundation for success in all walks of life whether or not one's career path includes employment as a professional engineer, work in a field outside of engineering, or pursuit of further education.

Undergraduate Program Educational Objectives — Graduates of the undergraduate programs in Aerospace and Mechanical Engineering are expected to attain the following objectives within a few years after graduation:

- Work as professionals within engineering or a related area in both small- and large-scale businesses;
- Pursue further education through graduate school or professional development courses; and
- Become leaders within their chosen profession whether it be industry, academia or service.

Aerospace Engineering Degrees

Bachelor of Science in Aerospace Engineering: The program leading to a Bachelor of Science in Aerospace Engineering prepares graduates to have a knowledge of aerodynamics, aerospace materials, structures, propulsion, flight mechanics, and stability and control. The program also prepares graduates to have design competence that includes integration of aeronautical topics.

Master of Science in Aerospace Engineering: The program(s) leading to a Master of Science in Aerospace Engineering prepare the student to practice engineering at an advanced level in a specialization within aerospace engineering and to recognize the benefit of solving problems using expertise from other engineering disciplines. Students improve their skills in setting up and solving problems by using contemporary tools and leveraging interaction with peers.

PhD in Aerospace Engineering: See Aerospace Engineering (PhD)

Mechanical Engineering Degrees

Bachelor of Science in Mechanical Engineering: The department offers a Bachelor of Science degree in Mechanical Engineering that includes several tracks allowing for a certain amount of specialization. In addition to several tracks, petroleum engineering exists as an area of emphasis within the overall mechanical engineering program (note: an area of emphasis appears in parenthesis after the primary major name on the transcript; tracks do not appear on the transcript; neither tracks nor emphases appear on the diploma). The program leading to a Bachelor of Science in Mechanical Engineering requires students to apply principles of engineering, basic science and mathematics (including multivariate calculus and differential equations); to model, analyze, design and realize physical systems, components or processes; and prepares students to work professionally in both thermal and mechanical systems areas.

Minor in Music Recording: A minor in music recording is offered through the USC Thornton School of Music to provide undergraduate students with the background necessary to enter the field of recording engineering and to familiarize them with the design needs of modern recording equipment. The minor is recommended to mechanical engineering majors with extensive musical training who would like to combine their technical and musical abilities while learning the engineering applications of physical and mathematical principles to the art of music recording. See the listing under the USC Thornton School of Music.

Master of Science in Mechanical Engineering: The field of mechanical engineering is incredibly broad. To accommodate both the breadth of the field and students' interests, the department offers several options for students pursuing the MS in Mechanical Engineering. These options include several tracks through the general MS program as well as several named emphases. Tracks, both topical and traditional, through the general MS in Mechanical Engineering program are intended to guide students through a particular area of specialization.

Advanced manufacturing is one example of a topical specialization. The use of Advanced Manufacturing is key to increasing the competitiveness of manufacturing in the US. The Advanced Manufacturing Track within Mechanical Engineering educates and trains multidisciplinary professionals to pursue careers in manufacturing companies as designers, manufacturing engineers, and engineering managers. This program covers modeling of physical manufacturing processes, development and utilization of computational tools, and modeling and optimization of manufacturing systems. It includes recent developments in manufacturing such as collaborative robotics, additive manufacturing, smart manufacturing, and Industry 4.0. This degree provides the graduate student with a broad, well-rounded, advanced education that can be applied to many different industries in which advanced manufacturing plays a role. For more information about the Advanced Manufacturing track within the MS in Mechanical Engineering program, please contact the faculty adviser for this track, Prof. S.K. Gupta (guptask@usc.edu).

Master of Science in Mechanical Engineering (Energy Conversion): See Sustainable Infrastructure Systems Program.

Master of Science in Product Development Engineering (Technology Track): See the listing under Product Development Engineering.

PhD in Mechanical Engineering See Mechanical Engineering (PhD)

Bachelor's Degree

Aerospace Engineering (BS)

The requirement for this degree is 128-130 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the major, regardless of the department in which the courses are taken. See the common requirements for undergraduate degrees section.

- ITP 168 Introduction to MATLAB Units: 2

Tracks (Choose one)

Standard Track (9 units)

- AME 404 Computational Solutions to Engineering Problems Units: 3
  Technical Electives*

Note:

*Technical electives consist of most upper-division courses in engineering, chemistry, physics, or mathematics.

Aeronautics Track (8 units)*

- AME 443 Control Systems Laboratory Units: 3
  or
- AME 459 Flight Mechanics Units: 3
- AME 460 Aerodynamic Theory Units: 3
  Free elective 2 units

Aerospace Structures Track (9 units)

- AME 403 Stress Analysis Units: 3
  or
- AME 420 Engineering Vibrations I Units: 3
- AME 408 Computer-Aided Design of Mechanical Systems Units: 3
  or
- CE 458 Computational Structural Analysis Units: 4
- AME 485 Aerospace Structures I Units: 3
  or
- CE 358L Elementary Theory of Structures Units: 4

Aerospace Controls Track (9 units)

- AME 420 Engineering Vibrations I Units: 3
  or
- AME 453 Engineering Dynamics Units: 3
- AME 443 Control Systems Laboratory Units: 3
- AME 459 Flight Mechanics Units: 3
  or
- ASTE 480 Spacecraft Dynamics Units: 3

Aerospace Design Track (9 units)

- AME 459 Flight Mechanics Units: 3
  or
- ASTE 480 Spacecraft Dynamics Units: 3
  Choose two from the following:
- AME 408 Computer-Aided Design of Mechanical Systems Units: 3
- AME 430 Thermal Systems Design Units: 3
- ASTE 421x Space Mission Design Units: 3

Thermal Systems Track (9-10 units)*

- AME 414 Engineering Thermodynamics II Units: 3
  or
- PHYS 316 Thermodynamics and Statistical Mechanics Units: 4
- AME 331 Heat Transfer Units: 3
- AME 430 Thermal Systems Design Units: 3

Note:

*Program will be 130 units if PHYS 316 is selected; program will be 128 units if Aeronautics track is selected.

Total units: 128-130

Mechanical Engineering (BS)

The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the major, regardless of the department in which the courses are taken. See the common requirements for undergraduate degrees section.

Composition/Writing Requirement

- WRIT 150 Writing and Critical Reasoning–Thematic Approaches Units: 4
- WRIT 340 Advanced Writing Units: 3, 4

General Education

- General education Units: 24

Total units: 128

Master's Degree

Aerospace and Mechanical Engineering (Computational Fluid and Solid Mechanics) (MS)

The program prepares students for professional careers in engineering companies that develop products using computational tools of fluid and solid mechanics. The program also provides the necessary background for pursuing higher degrees, Engineer and PhD, in aerospace and mechanical engineering with specializations in computational fluid mechanics, computational solid mechanics and computational heat transfer. The degree course work provides a necessary background in basic aerospace and mechanical engineering disciplines (solid mechanics, fluid mechanics, heat transfer), engineering mathematics and numerical methods. The advanced computational technical electives provide practical examples using existing numerical programs to simulate structures, heat transfer and fluid flows as well as commercial packages.

Admission requirements follow the general admission rules for aerospace and mechanical engineering graduate programs. For admission requirements, refer to Viterbi Graduate Degrees and Requirements at USC Viterbi School of Engineering. The program requires completion of a minimum of 27 units, with at least 18 units at the 500 level, and a cumulative GPA of at least 3.0 for graduation. Students will be given advisement in the first semester of their study. A minimum of 15 units must be 500 level courses in major department. Four of the required units must be in engineering analysis AME 525. In addition to AME 525 students are required to take five core courses covering numerical methods, fluid dynamics, solid mechanics, computational fluid dynamics, and finite element analysis. Elective courses can be chosen in areas of specific interest to the student. Information on the current approved courses that comprise these core and elective requirements is available from the department Website *ame.usc.edu.*

Note:

Elective courses can be chosen in areas of specific interest to the student. Information on the current approved courses that comprise these core and elective requirements is available from the department Website *ame.usc.edu.*

Aerospace and Mechanical Engineering (Dynamics and Control) (MS)

The Master of Science in Aerospace and Mechanical Engineering with emphasis in Dynamics and Control educates and trains multidisciplinary professionals in the modeling, analysis, simulation and control of complex time-evolutionary systems. The program provides the graduate student with a broad, well-rounded, advanced education that can be applied to many specific, technologically advanced fields in which dynamics and control play a pivotal role. It is a program of study that encompasses advanced analytical dynamics, nonlinear dynamical systems, linear and nonlinear dynamics and vibrations, and linear and nonlinear control. The program equips students to apply their knowledge to a variety of complex systems encountered in nature and society, especially those in civil, mechanical and aerospace engineering and applied mechanics.

Admission requirements follow the general admission rules for aerospace and mechanical engineering graduate programs. For admission requirements, refer to Viterbi Graduate Degrees and Requirements at USC Viterbi School of Engineering. The program requires completion of a minimum of 27 units, with at least 18 units at the 500 level, and a cumulative GPA of at least 3.0 for graduation. Students will be given advisement in the first semester of their study. In addition to engineering analysis (AME 525 or AME 526) students are required to take five core courses covering engineering vibrations, nonlinear dynamical systems and chaos, advanced engineering dynamics, linear control systems, and nonlinear control systems. Elective courses can be chosen in areas of specific interest to the student such as orbital dynamics, spacecraft control, aircraft dynamics and control, chaos and chaotic dynamics, random vibrations, computer control of mechanical systems and robotics. Information on the current approved courses that comprise these core and elective requirements is available from the department Website *ame.usc.edu.*

Aerospace Engineering (MS)

Admission requirements follow the general admission rules for aerospace and mechanical engineering graduate programs. For admission requirements, refer to Viterbi Graduate Degrees and Requirements at USC Viterbi School of Engineering. The program of study depends upon the student's interests and background. The program requires completion of a minimum of 27 units, with at least 18 units at the 500 level, and a cumulative GPA of at least 3.0 for graduation. A minimum of 15 units must be 500 level courses in major department. Four of the required units must be in engineering analysis AME 525.

In addition to the general requirements listed in this catalogue, the department has identified requirements in the following areas of specialization: aerodynamics/fluid dynamics; aerospace controls; aerospace design; aerospace structures; computational fluid dynamics; hypersonics; and propulsion. Core requirements and elective requirements are defined for each area of specialization. Information on the current approved courses that comprise these core and elective requirements is available from the department Website *ame.usc.edu*.

Aerospace Engineering/Engineering Management (MS)

The department of Aerospace and Mechanical Engineering in conjunction with the Daniel J. Epstein Department of Industrial and Systems Engineering offers programs leading to the degree of Master of Science in Aerospace Engineering/Master of Science in Engineering Management. This program is designed for graduate aerospace engineers whose career objectives lead to increasing technical management responsibilities.

In addition to the general requirements of the Viterbi School of Engineering, the dual degree of Master of Science in Aerospace Engineering/Master of Science in Engineering Management is also subject to the following requirements:

1. All applicants must meet the admission requirements of both the Department of Aerospace and Mechanical Engineering and the Department of Industrial and Systems Engineering;
2. A minimum of 48 units is required;
3. A minimum of 18 units must be graduate-level course work in AME, approved by an AME graduate student adviser;
4. A minimum of 18 units must be graduate level course work in ISE, approved by the ISE Engineering Management graduate student adviser and chosen from the course list under Master of Science in Engineering Management;
5. A minimum additional 12 units of acceptable course work must be chosen with the consent of the ISE Engineering Management graduate student adviser to form a coherent program.

Mechanical Engineering (MS)

Admission requirements follow the general admission rules for aerospace and mechanical engineering graduate programs. For admission requirements, refer to Viterbi Graduate Degrees and Requirements at USC Viterbi School of Engineering. The program of study depends upon the student's interests and background. The program requires completion of a minimum of 27 units, with at least 18 units at the 500 level, and a cumulative GPA of at least 3.0 for graduation. A minimum of 15 units must be 500-level courses in major department. Four of the required units must be in engineering analysis AME 525.

In addition to the general requirements listed in this catalogue, the department has identified requirements in the following areas of specialization: engineering design; thermal and fluid sciences; heat transfer; combustion; mechanics and materials; dynamics and control; solid and structural mechanics; and manufacturing. Core requirements and elective requirements are defined for each area of specialization. Information on the current approved courses that comprise these core and elective requirements is available from the department Website *ame.usc.edu*.

Mechanical Engineering (Nuclear Power) (MS)

Note: Applications for this degree are not currently being accepted.

The program prepares students for professional careers in nuclear power industry. The program also provides the necessary background for pursuing higher degrees, Engineer and PhD. Admission requirements follow the general admission rules for aerospace and mechanical engineering graduate programs. For admission requirements, refer to Viterbi Graduate Degrees and Requirements at USC Viterbi School of Engineering. The program requires completion of a minimum of 27 units, with at least 18 units at the 500 level, and a cumulative GPA of at least 3.0 for graduation. Students will be given advisement in the first semester of their study. A minimum of 15 units must be 500-level courses in major department. Four of the required units must be in engineering analysis AME 525.

In addition to AME 525, students are required to take five core courses covering advanced engineering mathematics, nuclear thermal-hydraulics, nuclear reactor physics, nuclear physics relevant to human health, and nuclear safety and security. Elective courses can be chosen in areas of specific interest to the student. Information on the current approved courses that comprise these core and elective requirements is available from the department Website *ame.usc.edu*.

Mechanical Engineering/Engineering Management (MS)

The department of Aerospace and Mechanical Engineering in conjunction with the Daniel J. Epstein Department of Industrial and Systems Engineering offers programs leading to the degree of Master of Science in Mechanical Engineering/Master of Science in Engineering Management. This program is designed for graduate mechanical engineers whose career objectives lead to increasing technical management responsibilities.

In addition to the general requirements of the Viterbi School of Engineering, the dual degree of Master of Science in Mechanical Engineering/Master of Science in Engineering Management is also subject to the following requirements:

1. All applicants must meet the admission requirements of both the Department of Aerospace and Mechanical Engineering and the Department of Industrial and Systems Engineering;
2. A minimum of 48 units is required;
3. A minimum of 18 units must be graduate level course work in AME, approved by an AME graduate student adviser;
4. A minimum of 18 units must be graduate level course work in ISE, approved by the ISE Engineering Management graduate student adviser and chosen from the course list under Master of Science in Engineering Management;
5. A minimum additional 12 units of acceptable course work must be chosen with the consent of the ISE Engineering Management graduate student adviser to form a coherent program.

Doctoral Degree

Aerospace Engineering (PhD)

The PhD in Aerospace Engineering is awarded in strict conformity with the general requirements of the USC Graduate School. See general requirements for graduate degrees. The degree requires a concentrated program of study, research, and a dissertation. Each student wishing to undertake a doctoral program must first be admitted to the program and then take the screening examination. This examination will emphasize comprehension of fundamental material in the graduate course work. Further guidance concerning admission, the screening exam, and the full completion of courses, including those given outside the Department of Aerospace and Mechanical Engineering, can be obtained from the AME student adviser and program coordinators.

Mechanical Engineering (PhD)

The PhD in Mechanical Engineering is awarded in strict conformity with the general requirements of the USC Graduate

School. See general requirements for graduate degrees. The degree requires a concentrated program of study, research, and a dissertation. Each student wishing to undertake a doctoral program must first be admitted to the program and then take the screening examination. This examination will emphasize comprehension of fundamental material in the graduate course work. Further guidance concerning admission, the screening exam, and the full completion of courses, including those given outside the Department of Aerospace and Mechanical Engineering, can be obtained from the AME student adviser and program coordinators.

Aerospace Engineering Honor Society: Sigma Gamma Tau

Degree Requirements

Undergraduate Program Educational Objectives

The Bachelor of Science degree program in Astronautical Engineering has the following objectives:

Within a few years of graduation, graduates will:

- Establish themselves as practicing professionals, or undertake advanced study, in astronautical engineering or a related field;
- Demonstrate their ability to perform successfully as members of a team and function effectively as responsible professionals.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Astronautical Engineering prepares graduates to have knowledge of orbital mechanics, space environment, attitude determination and control, telecommunications, space structures and rocket propulsion. The program also prepares graduates to have design competence that includes integration of astronautical topics.

Engineer in Astronautical Engineering

Requirements for the Engineer degree in Astronautical Engineering are the same as set forth in the general requirements. See the general requirements for Viterbi graduate degrees.

Credit for classes may be applied toward the MS, Engineer or PhD in Astronautical Engineering, should the student decide later to pursue an advanced degree. In order to be admitted to the MS program, the student should maintain a B average or higher in courses for the certificate and must satisfy all normal admission requirements. All courses for the certificate must be taken at USC. It is anticipated that other classes on emerging space technologies will be added to the list of the offered classes in the future.

Bachelor's Degree

Astronautical Engineering (BS)

The Bachelor of Science in Astronautical Engineering prepares students for engineering careers in the space industry, for research and development in industry and government centers and laboratories, and for graduate study. The program combines a core in the fundamentals of engineering, specialized work in astronautics and space technology, and technical electives to broaden and/or deepen the course work.

The requirement for this degree is 129 units. A cumulative grade point average of C (2.0) is required in all upper-division courses applied toward the major, regardless of the department in which the courses are taken. See also the common requirements for undergraduate degrees section.

**Satisfies GE Category III requirement (for students following the previous GE Program).*
***Technical electives consist of (1) any upper division course in engineering except* CE 404*,* CE 412 *and* ISE 440*, or (2) an upper division course in chemistry, physics or mathematics and* MATH

225. *No more than 3 units of 490 course work can be used to satisfy the technical elective requirement.*
+The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI (for students following the previous GE Program).

Minor

Astronautical Engineering Minor

This program is for USC students who wish to work in the space industry and government space research and development centers and who are pursuing bachelor's degrees in science, mathematics or engineering with specializations other than in astronautical engineering.

The space industry employs a wide variety of engineers (electrical, mechanical, chemical, civil, etc.); scientists (physicists, astronomers, chemists); and mathematicians. These engineers participate in development of advanced space systems but they usually lack the understanding of basic fundamentals of astronautics and space systems. The minor in astronautical engineering will help overcome this deficiency and provide unique opportunities for USC engineering, science and mathematics students, by combining their basic education in their major field with the industry specific minor in astronautical engineering.

Required course work consists of a minimum of 18 units. Including prerequisites, the minor requires 46 units. Three courses, or 9 units, at the 400 level will be counted toward the minor. The course work is a balanced program of study providing the basic scientific fundamentals and engineering disciplines critically important for contributing to development of complex space systems.

Prerequisite Courses

- MATH 125g Calculus I Units: 4
- MATH 126g Calculus II Units: 4
- MATH 226g Calculus III Units: 4
- MATH 245 Mathematics of Physics and Engineering I Units: 4
- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4
- PHYS 153L Fundamentals of Physics III: Optics and Modern Physics Units: 4

Required Courses

- AME 310 Engineering Thermodynamics I Units: 3
- ASTE 280 Foundations of Astronautical Engineering Units: 3
- ASTE 331a Spacecraft Systems Engineering Units: 3
- ASTE 331b Spacecraft Systems Engineering Units: 3
- ASTE 421x Space Mission Design Units: 3
- ASTE 470 Spacecraft Propulsion Units: 3 or
- ASTE 480 Spacecraft Dynamics Units: 3

Total Minimum Units: 18

Master's Degree

Astronautical Engineering (MS)

This degree is in the highly dynamic and technologically advanced area of astronautics and space technology. The program is designed for those with BS degrees in science and engineering who wish to work in the space sector of the defense/aerospace industry, government research and development centers, and laboratories and academia. The program is available through the USC Distance Education Network (DEN).

The general portion of the Graduate Record Examinations (GRE) and two letters of recommendation are required. For standard Admission Requirements, refer to USC Viterbi School of Engineering.

Required courses: 27 units

Core Requirement (12 Units)

- ASTE 470 Spacecraft Propulsion Units: 3 or
- ASTE 575 Rocket and Spacecraft Propulsion Units: 3
- ASTE 520 Spacecraft System Design Units: 3
- ASTE 535 Space Environments and Spacecraft Interactions Units: 3
- ASTE 580 Orbital Mechanics I Units: 3

Core Elective Requirement (9 Units — Choose Three Courses)

- ASTE 501a Physical Gas Dynamics Units: 3
- ASTE 501b Physical Gas Dynamics Units: 3
- ASTE 505a Plasma Dynamics Units: 3
- ASTE 505b Plasma Dynamics Units: 3
- ASTE 523 Design of Low Cost Space Missions Units: 3
- ASTE 524 Human Spaceflight Units: 3
- ASTE 527 Space Studio Architecting Units: 3
- ASTE 528 Reliability of Space Systems Units: 3
- ASTE 529 Safety of Space Systems and Space Missions Units: 3
- ASTE 552 Spacecraft Thermal Control Units: 3
- ASTE 553 Systems for Remote Sensing from Space Units: 3
- ASTE 554 Spacecraft Sensors Units: 3
- ASTE 555 Space Cryogenic Systems and Applications Units: 3
- ASTE 556 Spacecraft Structural Dynamics Units: 3
- ASTE 557 Spacecraft Structural Strength and Materials Units: 3
- ASTE 561 Human Factors of Spacecraft Operations Units: 3
- ASTE 562 Spacecraft Life Support Systems Units: 3
- ASTE 566 Ground Communications for Satellite Operations Units: 3
- ASTE 570 Liquid Rocket Propulsion Units: 3
- ASTE 571 Solid Rocket Propulsion Units: 3
- ASTE 572 Advanced Spacecraft Propulsion Units: 3 *
- ASTE 574 Space Launch Vehicle Design Units: 3
- ASTE 577 Entry and Landing Systems for Planetary Surface Exploration Units: 3
- ASTE 581 Orbital Mechanics II Units: 3
- ASTE 583 Space Navigation: Principles and Practice Units: 3
- ASTE 584 Spacecraft Power Systems Units: 3
- ASTE 585 Spacecraft Attitude Control Units: 3 *
- ASTE 586 Spacecraft Attitude Dynamics Units: 3
- ASTE 589 Solar System Navigation Units: 3

**Prerequisite required*

Technical Elective Requirement (6 Units)

Two 3-unit courses. Students are advised to select these two elective courses from the list of core electives or from other courses in astronautical engineering or from other science and engineering graduate courses, as approved by the faculty adviser. No more than 3 units of directed research (ASTE 590) can be applied to the 27-unit requirement. New courses on emerging space technologies are often offered; consult the current semester's course offerings, particularly for ASTE 599 Special Topics.

Note:

At least 21 units must be at the 500 or 600 level.

Possible Areas of Concentration:

Students may choose to concentrate their studies in a specific area by selecting corresponding core elective courses. Presently, ASTE faculty suggest the following areas of concentration:

Spacecraft Propulsion

Choose two core electives from:

- ASTE 501a Physical Gas Dynamics Units: 3
- ASTE 501b Physical Gas Dynamics Units: 3
- ASTE 505a Plasma Dynamics Units: 3
- ASTE 570 Liquid Rocket Propulsion Units: 3
- ASTE 571 Solid Rocket Propulsion Units: 3
- ASTE 572 Advanced Spacecraft Propulsion Units: 3
- ASTE 574 Space Launch Vehicle Design Units: 3
- ASTE 584 Spacecraft Power Systems Units: 3

Spacecraft Dynamics

Choose two core electives from:

- ASTE 556 Spacecraft Structural Dynamics Units: 3
- ASTE 557 Spacecraft Structural Strength and Materials Units: 3
- ASTE 581 Orbital Mechanics II Units: 3
- ASTE 583 Space Navigation: Principles and Practice Units: 3
- ASTE 585 Spacecraft Attitude Control Units: 3
- ASTE 586 Spacecraft Attitude Dynamics Units: 3
- ASTE 589 Solar System Navigation Units: 3

Space Systems Design

Choose two core electives from:

- ASTE 523 Design of Low Cost Space Missions Units: 3
- ASTE 524 Human Spaceflight Units: 3
- ASTE 527 Space Studio Architecting Units: 3
- ASTE 528 Reliability of Space Systems Units: 3
- ASTE 529 Safety of Space Systems and Space Missions Units: 3
- ASTE 557 Spacecraft Structural Strength and Materials Units: 3
- ASTE 562 Spacecraft Life Support Systems Units: 3
- ASTE 574 Space Launch Vehicle Design Units: 3
- ASTE 577 Entry and Landing Systems for Planetary Surface Exploration Units: 3

Spacecraft Systems and Operations

Choose two core electives from:

- ASTE 524 Human Spaceflight Units: 3
- ASTE 529 Safety of Space Systems and Space Missions Units: 3
- ASTE 552 Spacecraft Thermal Control Units: 3
- ASTE 553 Systems for Remote Sensing from Space Units: 3
- ASTE 554 Spacecraft Sensors Units: 3
- ASTE 555 Space Cryogenic Systems and Applications Units: 3
- ASTE 561 Human Factors of Spacecraft Operations Units: 3
- ASTE 562 Spacecraft Life Support Systems Units: 3
- ASTE 566 Ground Communications for Satellite Operations Units: 3
- ASTE 584 Spacecraft Power Systems Units: 3

Space Applications

Choose two core electives from:

- ASTE 524 Human Spaceflight Units: 3
- ASTE 527 Space Studio Architecting Units: 3
- ASTE 553 Systems for Remote Sensing from Space Units: 3
- ASTE 554 Spacecraft Sensors Units: 3
- ASTE 555 Space Cryogenic Systems and Applications Units: 3

Safety of Space Systems

Choose two core electives from:

- ASTE 528 Reliability of Space Systems Units: 3
- ASTE 529 Safety of Space Systems and Space Missions Units: 3
- ASTE 561 Human Factors of Spacecraft Operations Units: 3

Human Space Flight

Choose two core electives from:

- ASTE 524 Human Spaceflight Units: 3
- ASTE 529 Safety of Space Systems and Space Missions Units: 3
- ASTE 561 Human Factors of Spacecraft Operations Units: 3
- ASTE 562 Spacecraft Life Support Systems Units: 3

Graduate Certificate

Astronautical Engineering Certificate

The Certificate in Astronautical Engineering is designed for practicing engineers and scientists who enter space-related fields and/or want to obtain training in specific space-related areas.

Students enroll at USC as limited status students; they must apply and be admitted to the certificate program after completion of no more than 9 units of required course work. The required course work consists of 12 units; students will choose four 3-unit courses from the following:

Required Courses (Choose Four)

- ASTE 501a Physical Gas Dynamics Units: 3
- ASTE 501b Physical Gas Dynamics Units: 3
- ASTE 505a Plasma Dynamics Units: 3
- ASTE 505b Plasma Dynamics Units: 3
- ASTE 520 Spacecraft System Design Units: 3
- ASTE 523 Design of Low Cost Space Missions Units: 3
- ASTE 524 Human Spaceflight Units: 3
- ASTE 527 Space Studio Architecting Units: 3
- ASTE 528 Reliability of Space Systems Units: 3
- ASTE 529 Safety of Space Systems and Space Missions Units: 3
- ASTE 535 Space Environments and Spacecraft Interactions Units: 3
- ASTE 552 Spacecraft Thermal Control Units: 3
- ASTE 553 Systems for Remote Sensing from Space Units: 3
- ASTE 554 Spacecraft Sensors Units: 3
- ASTE 555 Space Cryogenic Systems and Applications Units: 3
- ASTE 556 Spacecraft Structural Dynamics Units: 3
- ASTE 557 Spacecraft Structural Strength and Materials Units: 3
- ASTE 561 Human Factors of Spacecraft Operations Units: 3
- ASTE 562 Spacecraft Life Support Systems Units: 3
- ASTE 566 Ground Communications for Satellite Operations Units: 3
- ASTE 570 Liquid Rocket Propulsion Units: 3
- ASTE 571 Solid Rocket Propulsion Units: 3
- ASTE 572 Advanced Spacecraft Propulsion Units: 3 *
- ASTE 574 Space Launch Vehicle Design Units: 3
- ASTE 575 Rocket and Spacecraft Propulsion Units: 3
- ASTE 577 Entry and Landing Systems for Planetary Surface Exploration Units: 3
- ASTE 580 Orbital Mechanics I Units: 3
- ASTE 581 Orbital Mechanics II Units: 3
- ASTE 583 Space Navigation: Principles and Practice Units: 3
- ASTE 584 Spacecraft Power Systems Units: 3
- ASTE 585 Spacecraft Attitude Control Units: 3
- ASTE 586 Spacecraft Attitude Dynamics Units: 3
- ASTE 589 Solar System Navigation Units: 3 *
- ASTE 599 Special Topics Units: 2, 3, 4

Note:

Most classes are available through the USC Distance Education Network (DEN).

**Prerequisite required*

Doctoral Degree

Astronautical Engineering (PhD)

The PhD in Astronautical Engineering is awarded in strict conformity with the general requirements of the USC Graduate School. See general requirements for graduate degrees. The degree requires a concentrated program of study, research and a dissertation. Each student wishing to undertake a doctoral program must first be admitted to the program and then take the screening examination. This examination will emphasize comprehension of fundamental material in the graduate course work. Further guidance concerning admission, the screening exam and the full completion of courses, including those given outside the Department of Astronautical Engineering, can be obtained from the ASTE student adviser and program coordinators.

Interim Co-Chairs: Vasilis Z. Marmarelis, PhD; David Z. D'Argenio, PhD; Michael C.K. Khoo, PhD

Faculty

Chonette Chair in Biomedical Technology: David Z. D'Argenio, PhD
Chonette Early Career Chair: Megan McCain, PhD
Gordon S. Marshall Early Career Chair: Stacey D. Finley, PhD
Shelly and Ofer Nemirovsky Chair in Convergent Biosciences: Ellis Meng, PhD
David Packard Chair in Engineering: Theodore W. Berger, PhD
Cornelius J. Pings Chair in Biomedical Sciences: Mark Humayun, PhD *(Opthalmology)*
Fred H. Cole Professorship in Engineering: Gianluca Lazzi *(Ophthalmology, Electrical and Computer Engineering, Clinical Entrepreneurship)*
Provost Professor of Biological Sciences, Biomedical Engineering, Physiology and Biophysics, Stem Cell Biology and Regenerative Medicine, Pediatrics, Radiology and Ophthalmology: Scott Fraser, PhD *(Biological Sciences)*
Dean's Professor in Biomedical Engineering: Vasilis Marmarelis, PhD
The Dr. Karl Jacob Jr. and Karl Jacob III Early-Career Chair and Assistant Professor of Biomedical Engineering, Chemical Engineering and Materials Science, and Medicine: Eun Ji Chung, PhD
Professors: David Agus, MD *(Medicine)*; Brian Applegate, PhD *(Otolaryngology – Head and Neck Surgery)*; Andrea Armani, PhD *(Chemical Engineering and Materials Science)*; Donald Arnold, PhD *(Biological Sciences)*; Theodore W. Berger, PhD *(Neurobiology)*; Peter S. Conti, MD, PhD *(Radiology)*; David Z. D'Argenio, PhD*; Vinay Duddalwar, PhD *(Clinical Radiology)*; Scott Fraser, PhD *(Biological Sciences)*; Mark S. Humayun, PhD *(Ophthalmology)*; Michael C.K. Khoo, PhD *(Pediatrics)*; Kwang Jin Kim, PhD *(Medicine and Physiology)*; Peter Kuhn, PhD *(Biological Sciences, Medicine, and Aerospace & Mechanical Engineering)*; Richard Leahy, PhD *(Electrical and Computer Engineering and Radiology)*; Jay Lieberman, PhD *(Orthopaedic Surgery)*; Charles Liu, MD, PhD *(Neurological Surgery)*; Gerald E. Loeb, MD; Anupam Madhukar, PhD *(Chemical Engineering and Materials Science, Physics)*; Noah Malmstadt, PhD *(Chemical Engineering and Materials Science)*; Vasilis Z. Marmarelis, PhD *(Electrical and Computer Engineering)*; Mara Mather, PhD *(Gerontology, Psychology)*; Jill McNitt-Gray, PhD *(Biological Science)*; Ellis Meng, PhD *(Electrical and Computer Engineering)*; Janet Moradian-Oldak *(Biomedical Sciences – Dental)*; Krishna Nayak, PhD *(Electrical and Computer Engineering)*; Chrysostomos Nikias, PhD *(Electrical and Computer Engineering)*; John Oghalai, PhD *(Otolaryngology – Head and Neck Surgery)*; Richard Roberts *(Chemical Engineering and Materials Science, Chemistry)*; Fei Sha, PhD *(Computer Science)*; Mahnaz Shahidi, PhD *(Ophthalmology)*; Armand R. Tanguay Jr., PhD *(Electrical and Computer Engineering, Materials Science)*; Paul Thompson *(KSOM/Ophthalmology)*; Arthur W. Toga *(KSOM/Ophthalmology)*; Francisco Valero-Cuevas, PhD *(Biokinesiology)*; Priya Vashishta, PhD *(Chemical Engineering and Materials Science)*; Danny Wang, PhD *(Neurology, Radiology)*; Pin Wang, PhD, *(Chemical Engineering and Materials Science)*; John C. Wood, MD, PhD *(Medicine/Radiology)*; Stanley M. Yamashiro, PhD *(Electrical and Computer Engineering);* Qifa Zhou, PhD *(Opthalmology)*; Charles Zukowski, PhD *(Chemical Engineering and Materials Science)*
Associate Professors: Justin Haldar, PhD *(Electrical and Computer Engineering);* Christianne N. Heck *(Clinical Neurology)*; Daniel P. Holschneider, MD *(Psychiatry)*; Hossein Jadvar, MD, PhD *(Radiology)*; Amir Kashani, PhD *(Clinical Ophthalmology Neurology)*; Jason Kutch, PhD *(Biokinesiology)*; Sook-Lei Liew, PhD *(Occupational Science and Occupational Therapy, Biokinesiology and Physical Therapy, Neurology)*; J. Andrew MacKay, PhD *(Pharmacology and Pharmaceutical Sciences)*; Megan McCain, PhD; Bartlett W. Mel, PhD; Judy Pa, PhD *(Neurology and Neuroscience)*; Nicolas Schweighofer, PhD *(Biokinesiology)*; Yonggang Shi, PhD *(Neurology)*; Jesse T. Yen, PhD
Assistant Professors: Eun Ji Chung, PhD; Dominique Duncan, PhD *(Neurology)*; James Finley, PhD *(Biokinesiology and Physical Therapy)*; Stacey D. Finley, PhD; Andrei Irimia, PhD *(Gerontology, Neuroscience)*; Radha Kalluri, PhD *(Otolaryngology)*; Brian Lee *(Clinical Neurological Surgery)*; Darrin Lee *(Clinical Neurological Surgery)*; Leonardo Morsut, PhD *(Stem Cell Biology and Regenerative Medicine)*; Shannon Mumenthaler, PhD *(Medicine)*; Keyue Shen, PhD; Lirong Yan, PhD *(Neurology)*
Professor of Engineering Practice: Jean-Michel I. Maarek, Doc.Ing.
Associate Professor of Engineering Practice: Brent Liu, PhD
Lecturer: Brittany Kay, PhD
Research Professors: Tracy C. Grikscheit, MD *(Surgery)*; Jonathan G. Lasch, PhD *(AMI-USC)*
Research Associate Professor: Dong Song, PhD
Research Assistant Professors: Jean-Marie Bouteiller, PhD; Francesco Cutrale, PhD
Associate Professor of Research: Bo Han, PhD *(Surgery)*
Assistant Professors of Research: Darryl H. Hwang, PhD *(Radiology)*; Natasha Leporé, PhD *(Radiology and Children's Hospital)*; Rong Lu *(Stem Cell Biology and Regenerative Medicine)*
Visiting Associate Professor: Zhaoyang Fan, PhD *(Radiology)*
Adjunct Professors: Athanassios Fokas, PhD *(Civil and Environmental Engineering Practice)*; Konstantina S. Nikita *(BME/KSOM)*
Adjunct Assistant Professors: Arkadiusz Gertych, PhD *(Cedars-Sinai Medical Center)*; Leonid Litvak, PhD *(Advanced Bionics Corp.)*; Philip Requejo, PhD *(Rancho Los Amigos Medical Center and Kinesiology)*
Emeritus Professors: George A. Bekey, PhD *(Electrical Engineering, Computer Science and Speech Science)*; H. K. Huang, DSc *(Radiology)*; K. Kirk Shung, PhD
**Recipient of university-wide or school teaching award.*

Degree Requirements

Undergraduate Program Educational Objectives

Graduates of the undergraduate program in Biomedical Engineering are expected to attain the following objectives within a few years after graduation:

- be engaged in a professional career in the biomedical or other related industries, or enrolled in advanced graduate studies including medical school;
- work in a technically competent manner to address challenges in engineering or their chosen profession, taking into consideration ethical and societal concerns;
- collaborate within their profession across technical disciplines;
- develop their technical knowledge and professional skills further by being active in professional societies, continuing their formal education, or attending professional workshops, meetings and seminars.

Undergraduate Program Criteria

The program leading to a Biomedical Engineering (BS) provides both breadth and depth across the range of engineering topics implied by the title. The program prepares graduates to have an understanding of biology and physiology; and the capability to apply advanced mathematics (including differential equations and statistics), science and engineering to solve the problems at the interface of engineering and biology. The curriculum prepares

graduates with the ability to interpret data from living systems, addressing the problems associated with the interaction between living and non-living materials and systems.

Minor in Craniofacial and Dental Technology

For a complete listing, see the Herman Ostrow School of Dentistry of USC.

Bachelor's Degree

Biomedical Engineering (BS)

The Department of Biomedical Engineering offers a Bachelor of Science degree in Biomedical Engineering. Additionally, there are three possible areas of emphasis within this biomedical engineering program major. These are biochemical engineering, electrical engineering, and mechanical engineering. An area of emphasis appears in a special field on the transcript. The minimum requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the major, regardless of the department in which the courses are taken.

See common requirements for undergraduate degrees.

Technical electives are to be selected from an approved list available in the department office.

Composition/Writing Requirement

- WRIT 150 Writing and Critical Reasoning–Thematic Approaches Units: 4
- WRIT 340 Advanced Writing Units: 3, 4 (3 Units Required)

General Education

- General education Units: 20

Pre-Major Requirements

Math Requirement

- MATH 125g Calculus I Units: 4
- MATH 126g Calculus II Units: 4 or
- MATH 129 Calculus II for Engineers and Scientists Units: 4
- MATH 226g Calculus III Units: 4 or
- MATH 229 Calculus III for Engineers and Scientists Units: 4
- MATH 245 Mathematics of Physics and Engineering I Units: 4

Physics Requirement

- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4

Chemistry Requirement

- CHEM 105aLg General Chemistry Units: 4 or
- CHEM 115aLg Advanced General Chemistry Units: 4
- CHEM 105bL General Chemistry Units: 4 or
- CHEM 115bL Advanced General Chemistry Units: 4

Major Requirements

Biology

- BISC 220Lg General Biology: Cell Biology and Physiology Units: 4
- BISC 320Lg Molecular Biology Units: 4

Organic Chemistry

- CHEM 322aL Organic Chemistry Units: 4
- CHEM 322bL Organic Chemistry Units: 4
  Note: CHEM 322bL may be replaced by 4 units of additional upper-divison BME course work.

Biomedical Engineering

- BME 101 Introduction to Biomedical Engineering Units: 4
- BME 202 Control and Communication in the Nervous System Units: 4
- BME 210 Biomedical Computer Simulation Methods Units: 4
- BME 302L Medical Electronics Units: 4
- BME 403L Physiological Systems Units: 4
- BME 405L Senior Projects: Measurements and Instrumentation Units: 4
- BME 410L Introduction to Biomaterials and Tissue Engineering Units: 4
- BME 413 Bioengineering Signals and Systems Units: 4
- BME 415 Regulation of Medical Products Units: 2
  or
- BME 416L Development and Regulation of Medical Products Units: 4
- BME 423 Statistical Methods in Biomedical Engineering Units: 4

One course from the following:

- BME 404 Orthopaedic Biomechanics Units: 4
- BME 430 Principles and Applications of Systems Biology Units: 4
- BME 451L Fundamentals of Biomedical Microdevices Units: 4

Electrical Engineering

- EE 202L Linear Circuits Units: 4

Electives

- Technical electives: Complete 5-7 units as needed to complete 128 approved program units. Technical electives are to be selected from an approved list available in the department office.

Total units: 128

Biomedical Engineering, Electrical Engineering Emphasis, (BS)

The minimum requirement for the degree with an emphasis in electrical engineering is 133 units. A cumulative grade point average of C (2.0) is required in all upper-division courses applied toward the major, regardless of the department in which the courses are taken. See common requirements for undergraduate degrees.

Technical electives are to be selected from an approved list available in the department office.

Composition/Writing Requirement

- WRIT 150 Writing and Critical Reasoning–Thematic Approaches Units: 4
- WRIT 340 Advanced Writing Units: 3, 4 (3 Units Required)

General Education

- General education Units: 20

Pre-Major Requirements

Math Requirement

- MATH 125g Calculus I Units: 4
- MATH 126g Calculus II Units: 4 or
- MATH 129 Calculus II for Engineers and Scientists Units: 4
- MATH 226g Calculus III Units: 4 or
- MATH 229 Calculus III for Engineers and Scientists Units: 4
- MATH 245 Mathematics of Physics and Engineering I Units: 4

Physics Requirement

- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4

Chemistry Requirement

- CHEM 105aLg General Chemistry Units: 4 or
- CHEM 115aLg Advanced General Chemistry Units: 4
- CHEM 105bL General Chemistry Units: 4 or
- CHEM 115bL Advanced General Chemistry Units: 4

Major Requirements

Biology

- BISC 220Lg General Biology: Cell Biology and Physiology Units: 4
- BISC 320Lg Molecular Biology Units: 4

Chemistry

- CHEM 322aL Organic Chemistry Units: 4
  Note: CHEM 322aL may be replaced by 4 units of additional upper-division BME course work with adviser approval.

Biomedical Engineering

- BME 101 Introduction to Biomedical Engineering Units: 4
- BME 202 Control and Communication in the Nervous System Units: 4
- BME 210 Biomedical Computer Simulation Methods Units: 4
- BME 403L Physiological Systems Units: 4
- BME 405L Senior Projects: Measurements and Instrumentation Units: 4
- BME 413 Bioengineering Signals and Systems Units: 4
- BME 415 Regulation of Medical Products Units: 2
  or
- BME 416L Development and Regulation of Medical Products Units: 4
- BME 423 Statistical Methods in Biomedical Engineering Units: 4

Electrical and Computer Engineering

- ITP 165 Introduction to C++ Programming Units: 2
- EE 109L Introduction to Embedded Systems Units: 4
- EE 202L Linear Circuits Units: 4
- EE 250L Distributed Systems for the Internet of Things Units: 4

Complete one track from the following lists:

Analog Track

- EE 338 Physical Electronics Units: 4
- EE 348L Electronic Circuits Units: 4

Digital Track

- EE 354L Introduction to Digital Circuits Units: 4
- EE 454L Introduction to System-on-Chip Units: 4

Electives

Technical Electives: Complete 8-10 units as needed to complete 133 approved program units. Technical electives are to be selected from an approved list available in the department office

Total Units: 133

Biomedical Engineering, Mechanical Engineering Emphasis, (BS)

The minimum requirement for the degree with an emphasis in mechanical engineering is 132 units. A cumulative grade point average of C (2.0) is required in all upper-division courses applied toward the major, regardless of the department in which the courses are taken. See common requirements for undergraduate degrees.

Technical electives are to be selected from an approved list available in the department office.

  or
- BME 416L Development and Regulation of Medical Products Units: 4
- BME 423 Statistical Methods in Biomedical Engineering Units: 4

Biomedical Molecular Cellular Engineering Panel

Choose three courses from the following list:

- BME 406 Introduction to Bioengineering in Medicine Units: 4
- BME 410L Introduction to Biomaterials and Tissue Engineering Units: 4
- BME 430 Principles and Applications of Systems Biology Units: 4
- BME 459L Introduction to Nanomedicine and Drug Delivery Units: 4

Chemical Engineering

- CHE 489 Biochemical Engineering Units: 4

Electrical Engineering

- EE 202L Linear Circuits Units: 4

Electives

Technical Electives: Complete 1-3 units as needed to complete 132 approved program units. Technical electives are to be selected from an approved list available in the department office.

Total units: 132

Master's Degree

Biomedical Data Analytics (MS)

The program requires completion of 28 units, 20 of which are core courses, with the remaining 8 units taken from an approved list or selected in consultation with an adviser and approved by the academic program officer. Admission requirements are consistent with the currently established requirements for our Viterbi graduate degree programs.

Core courses

- BME 511 Physiological Control Systems Units: 4
- BME 513 Signal and Systems Analysis Units: 4
- BME 514 Physiological Signals and Data Analytics Units: 4
- BME 515 Data Analytics in Biomedical Engineering Units: 4
- BME 528 Medical Diagnostics, Therapeutics and Informatics Applications Units: 4

Technical Electives

Select at least 8 units from the following courses:

- BME 423 Statistical Methods in Biomedical Engineering Units: 4
- BME 501 Advanced Topics in Biomedical Systems Units: 4
- BME 502 Advanced Studies of the Nervous System Units: 4
- BME 530 Introduction to Systems Biology Units: 4
- DSCI 552 Machine Learning for Data Science Units: 4
- DSCI 553 Foundations and Applications of Data Mining Units: 4

Biomedical Engineering (Medical Imaging and Imaging Informatics) (MS)

Completion of the Master of Science in Biomedical Engineering (Medical Imaging and Imaging Informatics) requires that at least 28 approved units must be satisfactorily completed of which at least 19 units must be at the 500 level or above.

Required Courses

- BME 501 Advanced Topics in Biomedical Systems Units: 4
- BME 513 Signal and Systems Analysis Units: 4
- BME 525 Advanced Biomedical Imaging Units: 4
- BME 527 Integration of Medical Imaging Systems Units: 4
- BME 528 Medical Diagnostics, Therapeutics and Informatics Applications Units: 4
- BME 535 Ultrasonic Imaging Units: 3
- EE 569 Introduction to Digital Image Processing Units: 4

Total units: 28

Biomedical Engineering (MS)

The Master of Science in Biomedical Engineering is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. At least 28 approved units must be satisfactorily completed, of which at least 19 units must be at the 500 level or above. Four of these units may be thesis BME 594a, BME 594b, BME 594z.

The master's degree program provides students with a broad background, linking physiology with engineering science, necessary for entering interdisciplinary careers in medical technology or pursuing further graduate studies in a related field.

Required Courses

- BME 501 Advanced Topics in Biomedical Systems Units: 4
- BME 511 Physiological Control Systems Units: 4
- BME 533 Seminar in Bioengineering Units: 1

One course from:

- BME 502 Advanced Studies of the Nervous System Units: 4
- BME 506 Bioengineering of Disease and Cell Therapeutics Units: 4
- BME 510 Cellular Systems Engineering Units: 4
- BME 559 Nanomedicine and Drug Delivery Units: 4

One course from:

- BME 513 Signal and Systems Analysis Units: 4 *
- BME 530 Introduction to Systems Biology Units: 4

Technical Electives

At least 11 units of approved technical elective course work. At the student's discretion and with department approval, these Technical Elective units may include a Master's Thesis option.

- BME 594a Master's Thesis Units: 2
- BME 594b Master's Thesis Units: 2
- BME 594z Master's Thesis Units: 0

Total units: 28

**Students who have taken an advanced undergraduate or master's level course in system and signal analysis may substitute* BME 523 *for* BME 513 *with departmental approval.*

Medical Device and Diagnostic Engineering (MS)

This program is designed to provide the knowledge and skills needed for the development of medical devices and diagnostic techniques, including aspects of medical product regulation and product development. The course of study requires successful completion of 26-28 units of course work and has been designed to be completed in three semesters of full-time study. Students in the program will complete a 17-unit core as well as selecting a 6-8 unit specialization (or "track") and one elective from a list provided by the department.

Required Courses (17 units)

- BME 501 Advanced Topics in Biomedical Systems Units: 4
  or
- BME 502 Advanced Studies of the Nervous System Units: 4
  or
- BME 513 Signal and Systems Analysis Units: 4
- BME 650 Biomedical Measurement and Instrumentation Units: 4
- MPTX 511 Introduction to Medical Product Regulation Units: 3
- MPTX 515 Quality Systems and Standards Units: 3
  or
- ISE 527 Quality Management for Engineers Units: 3
- ISE 545 Technology Development and Implementation Units: 3

Regulation Track (6 units)

- MPTX 513 Regulation of Medical Devices and Diagnostics Units: 3
- RSCI 527 Medical Product Safety Units: 3

Product Development Track (6 units)

- ISE 515 Engineering Project Management Units: 3
  ISE 555 Invention and Technology Development Units: 3

Medical Technology and Device Science Track (6-7 units)

Select two courses.

- BME 535 Ultrasonic Imaging Units: 3
- BME 551 Introduction to Bio-MEMS and Nanotechnology Units: 4
- BME 552 Neural Implant Engineering Units: 3
- BME 620L Applied Electrophysiology Units: 4

Technical Elective (one course)

Applicable courses include: AME 503, BME 511, BME 535, BME 551, ISE 507, ISE 508, ISE 544, MPTX 517 and courses listed in alternate tracks to that chosen. Other courses may be applicable; please see an adviser for approval.

Minimum Units Required: 26

Graduate Certificate

Health, Technology and Engineering Graduate Certificate

Academic Director: Terry Sanger, MD, PhD, *Provost Associate Professor of Biomedical Engineering, Neurology, Biokinesiology, and Physical Therapy*
Administrative Director: George Tolomiczenko, PhD, *Assistant Professor, Neurology*

This program offers current second-year USC PhD engineering students and first-year MD students an opportunity to learn about and gain experience in medical device and process innovation. Through project-based and interdisciplinary collaboration, students will augment their current programs with a set of courses and lab experiences linking medical and engineering research groups. By applying design-informed approaches toward problem identification and solution prototyping, students will be involved in all the steps of medical device or process innovation from conception to commercialization. The program aims to create interdisciplinary, boundary-spanning, inventive entrepreneurs seeking early practical experience with device and method innovation in health care. Program participants will form bonds with a group of like-minded medical students and engineers who will be their mentors, colleagues and contacts as they advance in their careers.

The courses unique to the program include a seminar sequence (Topics in Health, Technology and Engineering), which must be taken during the first two years of involvement with the HTE@USC program, a case studies sequence taken during the second year and a research course to earn project-related credits:

Courses

- BME 566a Topics in Health, Technology and Engineering Units: 2
- BME 566b Topics in Health, Technology and Engineering Units: 2
- BME 566c Topics in Health, Technology and Engineering Units: 2
- BME 566d Topics in Health, Technology and Engineering Units: 2
- BME 567a Case Studies in Health, Technology and Engineering Units: 1
- BME 567b Case Studies in Health, Technology and Engineering Units: 1
- 790 Research (in the student's major department) Units: 2-8

Other required courses that are part of the MD curriculum

(PhD students enroll in INTD course versions of the same courses open only to HTE students on CR/NC basis):

- INTD 621a Introduction to Clinical Medicine (ICM) for THE Units: 3
- INTD 621b Introduction to Clinical Medicine (ICM) for THE Units: 3
- INTD 622L Pre-clinical System Block for Health, Technology and Engineering Units: 3, 4, 5, 6, 7, 8, 9 (3-5 Units Required)

Note:

Candidates interested in applying should contact HTE@USC via email at hte@usc.edu.

Doctoral Degree

Biomedical Engineering (PhD)

The objective of the Doctor of Philosophy is to produce independent investigators who can make original scholarly contributions and apply advanced engineering concepts and techniques to the understanding and solution of biomedical problems. This program is intended to prepare the student for a career in academic research and teaching, or as an independent investigator in industrial or government laboratories.

The requirements listed are special to this department and must be read in conjunction with the general requirements of the Graduate School.

This program is designed to be normally completed in four years of full-time work beyond the Bachelor of Science degree (including summers). The first two years are devoted primarily to formal course work and the last two to research. In view of the flexible program, each student is assigned an adviser who will guide him or her in the selection of courses. By the end of the third semester of graduate study the student must have completed the PhD screening examination. Subsequently, he or she is required to make a tentative major field selection (e.g., biomedical imaging,

signal processing, neural engineering) and pass a qualifying examination. In accordance with the requirements of the Graduate School, at least 60 units of credit beyond the Bachelor of Science degree are required, with a minimum grade point average of 3.0. Students are required to take BME 533, the graduate biomedical engineering seminar course, for three semesters during their studies.

Requirements for Admission

Bachelor of Science degree in engineering or a natural science, and satisfactory scores on the Graduate Record Examinations. Undergraduate work should include a basic course in biology, physics, organic chemistry, biochemistry, differential equations and digital computation. Students lacking any of these will be required to make up the deficiency during the first two years of graduate work.

Students who have completed all requirements for the Master of Science degree offered in this department may apply for admission to the PhD program. In this case, all courses taken in the MS program may be applied toward the requirements of the doctoral degree.

Screening Examination Process

By the end of the third semester of graduate study, all students must have completed the screening examination process to determine whether or not they will be allowed to continue in the Doctor of Philosophy program. Those who fail will be dropped from the program, although they may be permitted to complete the additional requirements necessary to obtain the Master of Science degree.

Qualifying Exam Committee

During the third semester, the student must make a tentative major field selection as described above and form a qualifying exam committee. The latter administers the qualifying examination.

Qualifying Examination

The qualifying examination will normally be taken during the fourth semester of full-time academic study. The examination requires the preparation of a comprehensive written research proposal that presents a research question, critically reviews the pertinent literature and outlines the proposed experimental, analytical and computational procedures required to answer the question. The proposal must be defended in an oral examination.

Degree Requirements

Undergraduate Program Educational Objectives

Chemical engineering is the only engineering discipline that makes extensive use of chemical transformations (reactions) in addition to physical transformations (refining, molding or machining) to achieve added value. Chemical engineers are employed in virtually all manufacturing industries, from the basic chemical, biochemical, materials, energy, food, pharmaceutical and microelectronics industries to the myriad consumer product industries. Our various curricula are designed to produce graduates who are broadly educated as well as highly adaptable.

Graduates of the undergraduate program in Chemical Engineering are expected to attain the following objectives within a few years after graduation:

- Apply their technical skills to model, analyze and design complex processes where physical, chemical or biochemical transformations are utilized to produce products and services that benefit society in an economically, environmentally and globally conscious manner.
- Be able to quickly respond to increasingly-rapid technological changes through continuous personal and professional development, and to pursue graduate or professional education in a variety of fields.
- Thrive in multidisciplinary and multicultural setting, and to assume leadership roles in their employment, organization or community.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Chemical Engineering provides a thorough grounding in the basic sciences including chemistry, physics and/or biology, with some content at an advanced level, as appropriate to the objectives of the program. The curriculum includes the engineering application of these basic sciences to the design, analysis and control of chemical, physical and/or biological processes, including the hazards associated with these processes.

Engineer in Chemical Engineering

Requirements for the Engineer in chemical engineering are the same as set forth in the general requirements. See general requirements for graduate degrees. Only available to graduate students currently enrolled.

Chemical Engineering Three-Two Plan

A special curriculum is available for obtaining a Bachelor of Science degree in chemical engineering and a Bachelor of Science or Bachelor of Arts degree in a letters, arts and sciences major in five years. For further information see departmental advisers.

Similar programs are available in cooperation with certain liberal arts colleges. Such programs are particularly suited for obtaining a Bachelor of Science in Chemistry at the liberal arts college and a Bachelor of Science in Chemical Engineering at USC.

Bachelor's Degree

Chemical Engineering (BS)

Bachelor of Science in Chemical Engineering Degree

The Mork Family Department of Chemical Engineering offers a Bachelor of Science degree in Chemical Engineering. Additionally, there are six possible areas of emphasis within this chemical engineering program major. These are: biochemical engineering (133 units); environmental engineering (133 units); nanotechnology (133 units); petroleum engineering (133 units); polymer/materials science (133 units); and sustainable energy (133 units). An area of emphasis appears in parentheses after the primary major name on the transcript.

Sample student schedules are located on the department Web page *(chems.usc.edu).*

Common Requirements for the BS Degree and All Areas of Emphasis (117 units)

See also common requirements for undergraduate degrees.

Composition/Writing Courses

- WRIT 150 Writing and Critical Reasoning–Thematic Approaches Units: 4
- WRIT 340 Advanced Writing Units: 3, 4 (3 Units Required)

General Education

- General Education Units: 24

Chemistry Courses

- CHEM 105aLg General Chemistry Units: 4 or
- CHEM 115aLg Advanced General Chemistry Units: 4

- CHEM 105bL General Chemistry Units: 4 or
- CHEM 115bL Advanced General Chemistry Units: 4

- CHEM 322aL Organic Chemistry Units: 4
- CHEM 430 Physical Chemistry: Thermodynamics and Kinetics Units: 4

Math Courses

- MATH 125g Calculus I Units: 4

- MATH 126g Calculus II Units: 4 or
- MATH 129 Calculus II for Engineers and Scientists Units: 4

- MATH 226g Calculus III Units: 4 or
- MATH 229 Calculus III for Engineers and Scientists Units: 4

- MATH 245 Mathematics of Physics and Engineering I Units: 4

Physics Courses

- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4

Chemical Engineering Courses

- CHE 120 Introduction to Chemical Engineering Units: 4
- CHE 305 Numerical and Statistical Analysis for Chemical Engineers Units: 4
- CHE 330 Chemical Engineering Thermodynamics Units: 4
- CHE 350 Introduction to Separation Processes Units: 4
- CHE 442 Chemical Reactor Design Units: 4
- CHE 443 Viscous Flow Units: 4
- CHE 444aL Chemical Engineering Laboratory Units: 2
- CHE 444bL Chemical Engineering Laboratory Units: 2
- CHE 444cL Chemical Engineering Laboratory Units: 2
- CHE 447 Heat and Mass Transfer in Chemical Engineering Processes Units: 4
- CHE 460L Chemical Process Dynamics and Control Units: 4
- CHE 480 Chemical Process and Plant Design Units: 4
- CHE 485 Computer-Aided Chemical Process Design Units: 4

Elective Requirements

The Bachelor of Science in Chemical Engineering requires 133 units. A cumulative grade point average of C (2.0) is required in all upper-division courses applied toward the major, regardless of the department in which the courses are taken. In addition to the previously listed common requirements, students must also take the following courses:

- Any upper-division Chemical Engineering course - Units: 4
- Adviser-approved upper-division Engineering course work - Units: 4
- Any upper-division course in Math, Science or Engineering - Units: 4

Chemistry Option

Choose one:

- CHEM 300L Analytical Chemistry Units: 4
- CHEM 322bL Organic Chemistry Units: 4
- CHEM 431 Physical Chemistry: Quantum Mechanics Units: 4

Chemical Engineering, Biochemical Engineering Emphasis (BS)

- CHE 485 Computer-Aided Chemical Process Design Units: 4

Emphasis in Biochemical Engineering

The requirement for the Bachelor of Science in Chemical Engineering with an emphasis in Biochemical Engineering is 133 units.* A scholarship average of C (2.0) or higher is required for all upper-division courses taken in chemical engineering, biomedical engineering and biological sciences. In addition to the previously listed common requirements, students must also take the following courses and at least 133 units:

- BISC 300L Introduction to Microbiology Units: 4
- BISC 320Lg Molecular Biology Units: 4 *
- BISC 330L Biochemistry Units: 4
- BME 410L Introduction to Biomaterials and Tissue Engineering Units: 4
- CHE 489 Biochemical Engineering Units: 4

Note:

*BISC 320Lg is a required course that also fulfills the GE D category included in the 24-unit GE requirement.

Chemical Engineering, Polymer/Materials Science Emphasis (BS)

Bachelor of Science in Chemical Engineering Degree

The Mork Family Department of Chemical Engineering offers a Bachelor of Science degree in Chemical Engineering. Additionally, there are six possible areas of emphasis within this chemical engineering program major. These are: biochemical engineering (133 units); environmental engineering (133 units); nanotechnology (133 units); petroleum engineering (133 units); polymer/materials science (133 units); and sustainable energy (133 units). An area of emphasis appears in parentheses after the primary major name on the transcript.

Sample student schedules are located on the department Web page *(chems.usc.edu)*.

Common Requirements for the BS Degree and All Areas of Emphasis (117 units)

See also common requirements for undergraduate degrees.

Composition/Writing Courses

- WRIT 150 Writing and Critical Reasoning–Thematic Approaches Units: 4
- WRIT 340 Advanced Writing Units: 3, 4 (3 Units Required)

General Education

- General Education Units: 24

Chemistry Courses

- CHEM 105aLg General Chemistry Units: 4 or
- CHEM 115aLg Advanced General Chemistry Units: 4

- CHEM 105bL General Chemistry Units: 4 or
- CHEM 115bL Advanced General Chemistry Units: 4

- CHEM 322aL Organic Chemistry Units: 4
- CHEM 430 Physical Chemistry: Thermodynamics and Kinetics Units: 4

Math Courses

- MATH 125g Calculus I Units: 4

- MATH 126g Calculus II Units: 4 or
- MATH 129 Calculus II for Engineers and Scientists Units: 4

- MATH 226g Calculus III Units: 4 or
- MATH 229 Calculus III for Engineers and Scientists Units: 4

- MATH 245 Mathematics of Physics and Engineering I Units: 4

Physics Courses

- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4

Chemical Engineering Courses

- CHE 120 Introduction to Chemical Engineering Units: 4
- CHE 305 Numerical and Statistical Analysis for Chemical Engineers Units: 4
- CHE 330 Chemical Engineering Thermodynamics Units: 4
- CHE 350 Introduction to Separation Processes Units: 4
- CHE 442 Chemical Reactor Design Units: 4
- CHE 443 Viscous Flow Units: 4
- CHE 444aL Chemical Engineering Laboratory Units: 2
- CHE 444bL Chemical Engineering Laboratory Units: 2
- CHE 444cL Chemical Engineering Laboratory Units: 2
- CHE 447 Heat and Mass Transfer in Chemical Engineering Processes Units: 4
- CHE 460L Chemical Process Dynamics and Control Units: 4
- CHE 480 Chemical Process and Plant Design Units: 4
- CHE 485 Computer-Aided Chemical Process Design Units: 4

Emphasis in Polymer/Materials Science

The requirement for the Bachelor of Science with an emphasis in Polymer/Materials Science is 133 units. A cumulative grade point average of C (2.0) is required for all upper-division courses applied toward the major, regardless of the department in which the courses are taken. In addition to the previously listed common requirements, students must also take the following courses and complete at least 133 units:

- CHE 472 Polymer Science and Engineering Units: 4
- CHEM 300L Analytical Chemistry Units: 4 or
- CHEM 322bL Organic Chemistry Units: 4 or
- CHEM 431 Physical Chemistry: Quantum Mechanics Units: 4
- CHE 476 Chemical Engineering Materials Units: 4 or
- MASC 310 Materials Behavior and Processing Units: 4

Polymer Option

Choose one:

- BME 410L Introduction to Biomaterials and Tissue Engineering Units: 4
- CHE 474L Polymer Science and Engineering Laboratory Units: 3
- CHE 475 Physical Properties of Polymers Units: 4
- CHE 477 Computer Assisted Polymer Engineering and Manufacturing I Units: 3
- CHE 487 Nanotechnology and Nanoscale Engineering through Chemical Processes Units: 4
- MASC 440 Materials and the Environment Units: 3

Chemical Engineering, Sustainable Energy Emphasis (BS)

Bachelor of Science in Chemical Engineering Degree

The Mork Family Department of Chemical Engineering offers a Bachelor of Science degree in Chemical Engineering. Additionally, there are six possible areas of emphasis within this chemical engineering program major. These are: biochemical engineering (133 units); environmental engineering (133 units);

nanotechnology (133 units); petroleum engineering (133 units); polymer/materials science (133 units); and sustainable energy (133 units). An area of emphasis appears in parentheses after the primary major name on the transcript.

Sample student schedules are located on the department Web page *(chems.usc.edu)*.

- CHE 485 Computer-Aided Chemical Process Design Units: 4

Emphasis in Sustainable Energy

The requirement for the Bachelor of Science in Chemical Engineering with an Emphasis in Sustainable Energy is 133 units. A cumulative grade point average of C (2.0) is required for all upper-division courses applied toward the major, regardless of the department in which the courses are taken. In addition to the previously listed common requirements, students must also take the following courses and complete at lease 133 units:

- CHE 450 Sustainable Energy Units: 4
- CHE 476 Chemical Engineering Materials Units: 4 or
- MASC 350L Nanostructured Materials: Design, Synthesis and Processing Units: 4

Chemistry Option

Choose one:

- CHEM 300L Analytical Chemistry Units: 4
- CHEM 322bL Organic Chemistry Units: 4
- CHEM 431 Physical Chemistry: Quantum Mechanics Units: 4
- CHEM 453 Advanced Inorganic Chemistry Units: 4

Engineering Option

Choose one:

- CHE 301g Introduction to Engineering Biology Units: 4
- CHE 486 Design of Environmentally Benign Process Plants Units: 3
- CHE 487 Nanotechnology and Nanoscale Engineering through Chemical Processes Units: 4
- CHE 488 Molecular and Cellular Bioengineering Units: 3
- CHE 489 Biochemical Engineering Units: 4
- EE 513 Solid State Energy Devices Units: 3
- PTE 463L Introduction to Transport Processes in Porous Media Units: 4
- PTE 519 Integrated Physical and Cyber Security for Oil and Gas Operations Units: 3

Minor

Nanotechnology Minor

A minor in nanotechnology consisting of 17 required units is available to undergraduate majors in various fields. Nanotechnology involves the study of matter at length scales that are intermediate between the molecular and the bulk. In this minor, students will (1) learn in detail the properties of material structures on the nanometer scale, (2) examine a range of nanoscale materials, including metallic, ceramic, and polymeric particles as well as proteins, and (3) be exposed to a variety of specialized probes capable of visualizing matter on these length scales.

Prerequisite Courses

- MATH 125g Calculus I Units: 4
- MATH 126g Calculus II Units: 4
  or
- MATH 127 Enhanced Calculus II Units: 4
  or
- MATH 129 Calculus II for Engineers and Scientists Units: 4
- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4
- CHEM 105aLg General Chemistry Units: 4
  or
- CHEM 115aLg Advanced General Chemistry Units: 4
- CHEM 105bL General Chemistry Units: 4
  or
- CHEM 115bL Advanced General Chemistry Units: 4

Required Courses

Students can select either CHEM 322a or CHEM 325a. Both courses are not required.

- CHE 487 Nanotechnology and Nanoscale Engineering through Chemical Processes Units: 4
- CHEM 322aL Organic Chemistry Units: 4
  or
- CHEM 325aL Organic Chemistry Units: 4
- CHEM 455 Chemical Nanotechnology Units: 4
- EE 337L Engineering Nano-Systems Units: 3
- MASC 350L Nanostructured Materials: Design, Synthesis and Processing Units: 4

Minimum Units: 17

Master's Degree

Chemical Engineering (MS)

The Master of Science in Chemical Engineering is awarded in strict conformity with the general requirements of the USC Viterbi School of Engineering and requires 28 units. Minimum registration in CHE 501, CHE 530, CHE 538, CHE 542 is required.

For Admission Requirements, refer to USC Viterbi School of Engineering.

Core Requirements (16 units)

- CHE 501 Modeling and Analysis of Chemical Engineering Systems Units: 4
- CHE 530 Thermodynamics for Chemical Engineers Units: 4
- CHE 538 Transport Processes I Units: 4
- CHE 542 Chemical Engineering Kinetics Units: 4

Elective Requirements (12 units)

All remaining courses must be adviser approved.

Total Units: 28

Doctoral Degree

Chemical Engineering (PhD)

The Doctor of Philosophy (PhD) degree in chemical engineering is awarded in conformity with the general requirements of the Graduate School. See general requirements for graduate degrees.

Satisfactory completion of at least 60 units of approved graduate level course work beyond the baccalaureate, with a cumulative grade point average of at least 3.0 is required of all PhD students in engineering. The 60 units minimum include research courses (590, 690, 790) and 4 units of 794a and 794b Doctoral Dissertation. PhD students must also complete the core requirement for their major as listed below. The core courses make a part of the 60 units requirement. The number of units taken at USC can be reduced by transferring graduate credits from another institution. Transfer/Waiver units are subject to approval by the Degree Progress Department (for course work taken at institutions in the United States) or by International Admission (for course work taken at institutions outside the United States), by the faculty adviser, and by each degree's respective department directors. Faculty advisers may also request students to take additional courses outside of the core requirements including specific elective courses.

Departmental Policies and Requirements

In addition to the general requirements for the PhD described in this catalogue, candidates in chemical engineering are required to demonstrate proficiency in the following fields: thermodynamics, transport and chemical engineering kinetics. In addition, students must register in the department seminar course CHE 550 each semester for four semesters or until they pass their qualifying exam, whichever is earlier.

Core Requirements

- CHE 501 Modeling and Analysis of Chemical Engineering Systems Units: 4 or
- CHE 520 Mathematical Methods for Deep Learning Units: 4
- CHE 530 Thermodynamics for Chemical Engineers Units: 4
- CHE 538 Transport Processes I Units: 4
- CHE 542 Chemical Engineering Kinetics Units: 4
- CHE 550 Seminars in Chemical Engineering Units: 0, 1

Electives Requirements

Students select 8 units of approved CHE graduate-level course work in consultation with an adviser.

Engineer in Materials Science

Requirements for the Engineer in Materials Science degree are the same as set forth in the general requirements for graduate degrees.

Master of Science in Materials Engineering

Students with an interest in the characterization, selection and processing of engineering materials, and in materials problems related to engineering design may work toward a Master of Science in materials engineering. This degree is awarded in conformity with the general requirements of the Viterbi School of Engineering. Students may elect to work for this degree in either the Materials Science or Aerospace and Mechanical Engineering departments. The specific courses that constitute an acceptable program must be approved in advance by the administering department.

Master's Degree

Materials Engineering (Machine Learning) (MS)

The Master of Science in Materials Engineering with an emphasis in Machine Learning is for students who have an interest in materials engineering that includes machine learning toward materials discovery, design and processing. U.S. industry and cybermanufacturing are rapidly moving toward data-driven materials discovery and development. Materials engineering combined with machine learning is a novel emerging field that combines materials modeling, simulations and machine learning together into a new paradigm for materials discovery and cybermanufacturing.

Students with a Bachelor of Science in Materials Science, Chemical Engineering, Mechanical Engineering, Civil or Environmental Engineering, Industrial Engineering, Physics and Chemistry, as well as in industry employees who plan to apply machine learning to their research and development, are ideal candidates for the program.

This degree is awarded in conformity with the general requirements of the Viterbi School of Engineering. Students may elect to work for this degree in either the Materials Science or Aerospace and Mechanical Engineering departments. The specific courses that constitute an acceptable program must be approved in advance by the administering department.

A minimum of 20 of the required 28 units should be Materials Science (MASC), Materials Science electives or cross-listed courses. Any course not on the electives list will require department approval to be applied toward the degree.

Graduation requires 28 units total with 3.0 GPA overall.

For admission requirements, refer to Viterbi Graduate Degrees and Requirements.

Core Requirements (12 units)

- MASC 515 Basics of Machine Learning for Materials Units: 4
- MASC 520 Mathematical Methods for Deep Learning Units: 4
- MASC 575 Basics of Atomistic Simulation of Materials Units: 4

Materials Science Elective Courses (8-16 units)

Students must complete 8-16 units from the following list of electives.

- MASC 501 Solid State Units: 4
- MASC 502 Advanced Solid State Units: 3
- MASC 503 Thermodynamics of Materials Units: 4
- MASC 504 Diffusion and Phase Equilibria Units: 4
- MASC 505 Crystals and Anisotropy Units: 4
- MASC 506 Semiconductor Physics Units: 4
- MASC 512 Thin Film Science and Technology Units: 4
- MASC 534 Materials Characterization Units: 4
- MASC 535L Transmission Electron Microscopy Units: 4
- MASC 551 Mechanical Behavior of Engineering Materials Units: 4
- MASC 559 Creep Units: 3
- MASC 560 Fatigue and Fracture Units: 3
- MASC 561 Dislocation Theory and Applications Units: 4
- MASC 562 Failure Analysis Units: 3
- MASC 564 Composites Processing Units: 4
- MASC 570 Introduction to Photovoltaic Solar Energy Conversion Units: 3
- MASC 576 Molecular Dynamics Simulations of Materials and Processes Units: 4
- MASC 583 Materials Selection Units: 4
- MASC 599 Special Topics Units: 2, 3, 4 (with adviser approval)
- MASC 601 Advanced Semiconductor Device Physics Units: 4
- MASC 610 Molecular Beam Epitaxy Units: 3
- PTE 586 Artificial Intelligence and Machine Learning in Oilfield Operations Units: 3

Engineering Elective Courses (0-8 units)

Students may complete up to 8 units from the following list of non-materials science electives. Up to 8 units total for the degree may be from 400-level courses on approval by department.

- AME 503 Advanced Mechanical Design Units: 3
- AME 509 Applied Elasticity Units: 4
- AME 525 Engineering Analysis Units: 4
- AME 526 Introduction to Mathematical Methods in Engineering II Units: 4
- AME 546 Design for Manufacturing Assembly Units: 4
- AME 577 Survey of Energy and Power for a Sustainable Future Units: 3
- AME 578 Modern Alternative Energy Conversion Devices Units: 3
- ASTE 557 Spacecraft Structural Strength and Materials Units: 3
- BME 510 Cellular Systems Engineering Units: 4
- CE 507 Mechanics of Solids I Units: 4
- CE 546 Structural Mechanics of Composite Materials Units: 2
- CHE 501 Modeling and Analysis of Chemical Engineering Systems Units: 4
- CHEM 630 Fundamentals of Electrochemical Energy Systems Units: 2
- CHEM 632 Introduction to Surface Chemistry and Electrocatalysis Units: 2
- EE 471 Applied Quantum Mechanics for Engineers Units: 4
- EE 504L Solid-State Processing and Integrated Circuits Laboratory Units: 4
- EE 507 Micro- and Nano-Fabrication Technology Units: 4
- EE 512 Stochastic Processes Units: 3
- EE 529 Optics Units: 4
- EE 531 Nonlinear Optics Units: 4
- EE 537 Modern Solid-State Devices Units: 4
- EE 601 Advanced Semiconductor Device Physics Units: 4
- EE 607 Microelectromechanical Systems Units: 4
- EE 612 Science and Practice of Nanotechnology Units: 3
- ENE 505 Energy and the Environment Units: 4
- ISE 510 Advanced Computational Design and Manufacturing Units: 3
- ISE 515 Engineering Project Management Units: 3

Materials Engineering (MS)

Students with an interest in the characterization, selection and processing of engineering materials, and in materials problems related to engineering design may work toward a Master of Science in materials engineering. This degree is awarded in conformity with the general requirements of the Viterbi School of Engineering. Students may elect to work for this degree in either the Materials Science or Aerospace and Mechanical Engineering departments. The specific courses that constitute an acceptable program must be approved in advance by the administering department.

A minimum of 20 of the required 28 units should be Materials Science (MASC) or Materials Science cross-listed courses. MASC 476 Chemical Engineering Materials cannot be applied toward the degree. Approved non-Materials Science courses are listed on the department Website. Any course not on the list will require department approval to be applied toward the degree.

For admission requirements, refer to Viterbi Graduate Degrees and Requirements at USC Viterbi School of Engineering.

Materials Science (MS)

Students with an interest in the characterization, selection and processing of engineering materials, and in materials problems related to engineering design may work toward a Master of Science in Materials Science. This degree is awarded in conformity with the general requirements of the Viterbi School of Engineering. Students may elect to work for this degree in either the Materials Science or Aerospace and Mechanical Engineering departments. The specific courses that constitute an acceptable program must be approved in advance by the administering department.

Graduation requires 28 units total with 3.0 GPA overall.

For Admission Requirements, refer to USC Viterbi School of Engineering.

Core Requirements (12 units)

Students must take a minimum of 12 units from the following list of core requirements:

- MASC 471 Applied Quantum Mechanics for Engineers Units: 4
- MASC 501 Solid State Units: 4
- MASC 503 Thermodynamics of Materials Units: 4
- MASC 504 Diffusion and Phase Equilibria Units: 4
- MASC 505 Crystals and Anisotropy Units: 4
- MASC 520 Mathematical Methods for Deep Learning Units: 4
- MASC 551 Mechanical Behavior of Engineering Materials Units: 4

Materials Science Elective Courses (8-16 units)

Students must complete 8-16 units from the following list of electives or from the remaining courses in the core requirements list. Up to 8 units total for the degree may be from 400-level courses on approval by department.

- MASC 502 Advanced Solid State Units: 3
- MASC 506 Semiconductor Physics Units: 4
- MASC 512 Thin Film Science and Technology Units: 4
- MASC 515 Basics of Machine Learning for Materials Units: 4

Degree Requirements

Bachelor of Science in Chemical Engineering

Emphasis in Petroleum Engineering

See the listing under Chemical Engineering.

Bachelor of Science in Mechanical Engineering

Emphasis in Petroleum Engineering

See the listing under Aerospace and Mechanical Engineering.

Engineer in Petroleum Engineering

Requirements for the Engineer degree in petroleum engineering are the same as set forth in the general requirements. See general requirements for graduate degrees.

Minor

Petroleum Engineering Minor

A minor in petroleum engineering consisting of 16 required units is available to undergraduate majors in various fields of engineering and applied science. Besides preparing for graduate study in petroleum engineering, the program will prepare students for careers in areas of national need such as the exploration, recovery and production of subterranean resources, and the underground disposal of hazardous wastes.

Prerequisite courses:

- MATH 125g Calculus I Units: 4
- MATH 126g Calculus II Units: 4
- MATH 226g Calculus III Units: 4
- MATH 245 Mathematics of Physics and Engineering I Units: 4
- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
- CHEM 105aLg General Chemistry Units: 4

Required Courses

- PTE 461 Formation Data Sensing with Well Logs Units: 4
- PTE 462 Economic, Risk and Formation Productivity Analysis Units: 4
- PTE 463L Introduction to Transport Processes in Porous Media Units: 4

Total units: 16

Master's Degree

Petroleum Engineering (Digital Oilfield Technologies) (MS)

The Master of Science in Petroleum Engineering (Digital Oilfield Technologies) is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. A student may be permitted to elect the program without thesis upon approval from the department. Course requirements are similar to the existing MS degree in Petroleum Engineering in terms of core requirements.

Students without a BS in Petroleum Engineering will normally be required to complete prerequisite courses before beginning the MS program. Specific prerequisite courses are decided upon consultation with the department adviser. Units from these courses cannot be applied toward the degree.

Petroleum Engineering (Geoscience Technologies) (MS)

The Master of Science in Petroleum Engineering (Geoscience Technologies) is a unique degree that emphasizes recent developments in the field of unconventional oil and gas resources and modern techniques for mapping and monitoring of subterranean resources. The program may be completed via the USC Viterbi School's Distance Education Network (DEN). All courses for the degree must be taken at USC.

Students without a BS in Petroleum Engineering will normally be required to complete prerequisite courses before beginning the MS program. Specific prerequisite courses are decided upon consultation with the department adviser. Units from these courses cannot be applied toward the degree.

For Admission Requirements, refer to USC Viterbi School of Engineering.

A minimum of 35 units is required to earn the MS in Petroleum Engineering (Geoscience Technologies).

Core Required Courses (19 Units)

- PTE 507 Engineering and Economic Evaluation of Subsurface Reservoirs Units: 3
- PTE 508 Numerical Simulation of Subsurface Flow and Transport Processes Units: 3
- PTE 517 Testing of Wells and Aquifers Units: 3
- PTE 531 Enhanced Oil and Gas Recovery Units: 4
- PTE 555 Well Completion, Stimulation, and Damage Control Units: 3
- PTE 582 Fluid Flow and Transport Processes in Porous Media Units: 3, 2 years

Take Four of the Five Courses Below (12-13 Units)

- PTE 502 Advanced Reservoir Characterization Units: 3
- PTE 503 Technology of Unconventional Oil and Gas Resources Development Units: 3
- PTE 504 Geophysics for Petroleum Engineers Units: 3
- PTE 505 Inverse Modeling for Dynamic Data Integration Units: 3
- PTE 572L Applied Geostatistical Modeling for Subsurface Characterization Units: 4

Additional Requirements

- Elective from a group of approved PTE courses Units: 4

Minimum Units Required: 35

Petroleum Engineering (MS)

The Master of Science in petroleum engineering is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. Electives vary according to the area of interest. A student may be permitted to elect the program without thesis upon approval from the department.

Dual Degree

Master of Science, Petroleum Engineering/ Master of Science, Engineering Management (MS/MS)

The Daniel J. Epstein Department of Industrial and Systems Engineering in conjunction with the Department of Petroleum Engineering offers programs leading to the degree of MS Petroleum Engineering/MS Engineering Management. The program is designed for graduate petroleum engineers whose career objectives lead to increasing technical management responsibilities.

Students complete at least 44 units, of which at least 21 units are required Petroleum Engineering graduate course work, and at least 23 units are Engineering Management graduate coursework, including required core courses, an analytics course, a technology course and elective courses listed in the MS Engineering Management program.

For Admission Requirements, refer to USC Catalogue Graduate Degrees and Requirements in The Graduate School section of this catalogue.

Petroleum Engineering Core Requirements (21 units)

- PTE 507 Engineering and Economic Evaluation of Subsurface Reservoirs Units: 3
- PTE 508 Numerical Simulation of Subsurface Flow and Transport Processes Units: 3
- PTE 517 Testing of Wells and Aquifers Units: 3
- PTE 531 Enhanced Oil and Gas Recovery Units: 4
- PTE 555 Well Completion, Stimulation, and Damage Control Units: 3
- PTE 582 Fluid Flow and Transport Processes in Porous Media Units: 3, 2 years

Engineering Management Core Requirements (18-19 units)

- ISE 500 Statistics for Engineering Managers Units: 3
- ISE 515 Engineering Project Management Units: 3
- ISE 544 Leading and Managing Engineering Teams Units: 3
- ISE 561 Economic Analysis of Engineering Projects Units: 3

Analytics Course

Select one.

- DSCI 552 Machine Learning for Data Science Units: 4
- ISE 529 Predictive Analytics Units: 3
- ISE 530 Optimization Methods for Analytics Units: 3
- ISE 562 Decision Analysis Units: 3

Technology Course

Select one.

- ISE 545 Technology Development and Implementation Units: 3
- ISE 555 Invention and Technology Development
- ISE 585 Strategic Management of Technology Units: 3

Additional Electives (4-5 units)

Choose at least 4 units from among other courses listed in the MS Engineering Management degree.

Total Units Required: 44

Graduate Certificate

Digital Oilfield Technologies Certificate

The certificate in digital oilfield techniques is designed for practicing engineers and scientists who enter petroleum engineering related fields and/or who wish to obtain training in the specific smart oilfields area. The applicants may enroll at USC as limited status students. They must apply and be admitted to the program before they complete 9 units of the required course work. The certificate program is open to applicants with an undergraduate degree in engineering or sciences who meet the admission criteria as limited students. Students without a BS in Petroleum Engineering will normally be required to complete prerequisite courses before beginning the certificate program. Specific prerequisite courses are decided upon consultation with the department adviser. Units from these courses cannot be applied toward the certificate.

The required courses consist of the following 12 units:

Required Courses

- PTE 586 Artificial Intelligence and Machine Learning in Oilfield Operations Units: 3
- PTE 587 Smart Completions, Oilfield Sensors and Sensor Technology Units: 3
- PTE 588 Smart Oilfield Data Mining Units: 3
- PTE 589 Advanced Oilfield Operations with Remote Immersive Visualization and Control Units: 3

Note:

These classes will be available through the USC Distance Education Network (DEN@Viterbi). The credit for classes may be applied toward the MS or PhD in petroleum engineering should the student decide later to pursue an advanced degree. In order to be admitted to the MS program, the student should maintain a B average or higher in courses for the certificate program and must satisfy all normal admission requirements. All courses for the certificate must be taken at USC.

Unconventional Resources in Petroleum Engineering

Characterization of unconventional resources, exploration, development, laboratory methods, geomechanics, geochemical methods, well completion, hydraulic fracturing, reserves forecasting, environmental issues, seismic and geostatistical estimation methods.

Note: Students without a BS in Petroleum Engineering or the equivalent will be required to complete the following courses in addition to the four courses for the certificate: PTE 411, PTE 412x, PTE 461, PTE 466 and PTE 500.

Requirements

- PTE 502 Advanced Reservoir Characterization Units: 3
- PTE 592 Geomechanics for Energy and Environment Units: 4

Complete two from the following:

- PTE 503 Technology of Unconventional Oil and Gas Resources Development Units: 3
- PTE 504 Geophysics for Petroleum Engineers Units: 3
- PTE 572L Applied Geostatistical Modeling for Subsurface Characterization Units: 4

Doctoral Degree

Petroleum Engineering (PhD)

The Doctor of Philosophy with a major in petroleum engineering is also offered. Registration in MASC 520, PTE 507, PTE 508, PTE 517, PTE 531, PTE 555, PTE 582 and 4 semesters of CHE 550a is required of all students. See general requirements for graduate degrees.

Satisfactory completion of at least 60 units of approved graduate-level course work beyond the baccalaureate, with a cumulative grade point average of at least 3.0 is required of all PhD students in engineering. The 60 units minimum include research courses (590, 690, 790) and 4 units of 794a and 794b Doctoral Dissertation. PhD students must also complete the core requirement for their major as listed below. The core courses make a part of the 60 units requirement. The number of units taken at USC can be reduced by transferring graduate credits from another institution. Transfer/Waiver units are subject to approval by the Degree Progress Department (for course work taken at institutions in the United States) or by International Admission (for course work taken at institutions outside the United States), by the faculty adviser and by each degree's respective department directors. Faculty advisers may also request students to take additional courses outside of the core requirements including specific elective courses.

Core Requirements

- MASC 520 Mathematical Methods for Deep Learning Units: 4
- PTE 507 Engineering and Economic Evaluation of Subsurface Reservoirs Units: 3
- PTE 508 Numerical Simulation of Subsurface Flow and Transport Processes Units: 3
- PTE 517 Testing of Wells and Aquifers Units: 3
- PTE 531 Enhanced Oil and Gas Recovery Units: 4
- PTE 555 Well Completion, Stimulation, and Damage Control Units: 3
- PTE 582 Fluid Flow and Transport Processes in Porous Media Units: 3, 2 years

Faculty

John and Dorothy Shea Early Career Chair in Civil Engineering: Ketan Savla, PhD
David M. Wilson Early Career Chair: George Ban-Weiss, PhD
Dr. Teh Fu Yen Early Career Chair: Kelly T. Sanders, PhD
Fred Champion Estate Chair in Engineering: Lucio Soibelman, PhD
Gordon S. Marshall Professor of Engineering Technology: Roger Ghanem, PhD *(Aerospace and Mechanical Engineering)*
Dean's Professor of Civil and Environmental Engineering: Burcin Becerik-Gerber, DDes
Gabilan Distinguished Professorship in Science and Engineering: Amy Childress, PhD
Louise L. Dunn Endowed Professorship in Engineering: Behrokh Khoshnevis, PhD (*Industrial and Systems Engineering)*
Fred Champion Professor: Constantinos Sioutas, ScD
Stephen Schrank Early Career Chair in Civil and Environmental Engineering: Qiming Wang, PhD
Distinguished Professor: Behrokh Khoshnevis, PhD *(Industrial and Systems Engineering)*
Professors: Burcin Becerik-Gerber, DDes; Amy Childress, PhD; Roger Ghanem, PhD *(Aerospace and Mechanical Engineering)*; Erik A. Johnson, PhD; Jiin-Jen Lee, PhD, PE*; Vincent W. Lee, PhD; Patrick Lynett, PhD; Sami F. Masri, PhD *(Aerospace and Mechanical Engineering)*; Najmedin Meshkati, PhD, CPE *(Industrial and Systems Engineering)*; Massoud Pirbazari, PhD; Constantinos Sioutas, ScD; Lucio Soibelman, PhD; Costas Synolakis, PhD; Mihailo Trifunac, PhD; L. Carter Wellford, PhD
Associate Professors: George Ban-Weiss, PhD; Felipe deBarros, PhD; Bora Gencturk, PhD; Kelly T. Sanders, PhD; Ketan Savla, PhD; Adam Smith, PhD
Assistant Professors: Daniel McCurry, PhD; Chukwuebuka Nweke, PhD; Audrey Olivier, PhD; Qiming Wang, PhD
Professors of Engineering Practice: Gregg E. Brandow Jr., PhD, PE; Geraldine Knatz, PhD *(Public Policy)*; Henry M. Koffman, PE
Associate Professors of Engineering Practice: David J. Gerber, DDes (*Architecture*); Amy Rechenmacher, PhD
Adjunct Professors of Engineering Practice: Anthanassios S. Fokas, PhD, MD; Frank Edward Reynolds
Joint Appointments: Carol Folt, PhD (*Preventive Medicine*); Genevieve Giuliano, PhD *(Public Policy)*; Behnam Jafarpour, PhD (*Chemical and Electrical and Computer Engineering*); Gale Lucas, PhD (*Computer Science*); Mitul Luhar, PhD (*Aerospace and Mechanical Engineering)*; Azad Madni, PhD *(Astronautical Engineering)*; James Moffett, PhD *(Earth Sciences, Biological Sciences)*; James Moore, PhD *(Industrial and Systems Engineering, Public Policy)*; Firdaus E. Udwadia, PhD *(Aerospace and Mechanical Engineering)*; John P. Wilson, PhD *(Sociology)*
Research Associate Professor: Michael Orosz *(Information Sciences Institute)*
Adjunct Associate Professors of Practice: Hanh Dam Le-Griffin, PhD; Navid Nastar, PhD, PE, SE, F.ASCE; Abdel S Niazy, PhD, PE; Shahed Rowshan, PhD, PE; Eric Shen, PE
Adjunct Research Professors: Maria I. Todorovska, PhD; Yan Xiao, PhD, PE
Adjunct Research Assistant Professors: Jose C. Borrero, PhD; John Caffrey, PhD; Mazen Wahbeh, PhD
Emeritus Professors: George V. Chilingar, PhD; Joseph S. Devinny, PhD; Ronald C. Henry, PhD

Chi Epsilon Civil Engineering Honor Society

Chi Epsilon is dedicated to the purpose of maintaining and promoting the status of civil engineering as a profession. Chi Epsilon was organized to recognize the characteristics of the individual civil engineer deemed to be fundamental to the successful pursuit of an engineering career and to aid in the development of those characteristics in the civil engineering student. To contribute to the improvement of the profession, Chi Epsilon fosters the development and exercise of sound traits of character and technical ability among civil engineers.

Chi Epsilon is based on broad principles of scholarship, character, practicality and sociability. Civil engineering students who rank in the upper one-third of the junior or senior class are eligible for membership. These qualifications will make one eligible but not necessarily acceptable. Each member must be well skilled in all four of the basic principles.

Degree Requirements

Undergraduate Program Educational Objectives

Fulfilling the vision of the Sonny Astani Department of Civil and Environmental Engineering, the Viterbi School of Engineering and the University of Southern California, our graduates will:

1. Be successful in their professional careers, become leaders in industry, academia, government or service, while adapting

their technical, collaborative and managerial skills for the benefit of society's built and natural environments.
2. Support the advancement of the practice of science and engineering, while maintaining professional standards and moral and legal obligations to society, while being active in professional organizations and obtaining professional licensure when appropriate.
3. Be prepared to pursue graduate studies in engineering or other disciplines, while continuously broadening their abilities and enhancing their technical skills to maintain their relevance with technological change.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Civil Engineering prepares graduates to apply knowledge of mathematics through differential equations, calculus-based physics, chemistry and at least one additional area of basic science, consistent with the program educational objectives; apply knowledge of four technical areas appropriate to civil engineering; conduct civil engineering experiments and analyze and interpret the resulting data; and design a system, component, or process in more than one civil engineering context. The program also explains basic concepts in management, business, public policy, and leadership; and explains the importance of professional licensure.

The program leading to a Bachelor of Science in Environmental Engineering prepares graduates to be proficient in mathematics through differential equations, probability and statistics, calculus-based physics, general chemistry; an earth science, e.g., geology, meteorology, soil science, relevant to the program of study; a biological science, e.g., microbiology, aquatic biology, toxicology, relevant to the program of study; fluid mechanics relevant to the program of study; and an introductory level knowledge of environmental issues associated with air, land, and water systems and associated environmental health impacts. The program prepares graduates to be proficient at conducting laboratory experiments and critically analyzing and interpreting data in more than one major environmental engineering focus area, e.g., air, water, land, environmental health; performing engineering design by means of design experiences integrated throughout the professional component of the curriculum; and to be proficient in advanced principles and practice relevant to the program objectives; including understanding of concepts of professional practice and the roles and responsibilities of public institutions and private organizations pertaining to environmental engineering.

Graduate Programs

Master of Science in Civil Engineering (Transportation Systems)

See Sustainable Infrastructure Systems Program.

Master of Science in Civil Engineering (Water and Waste Management)

See Sustainable Infrastructure Systems Program.

Engineer in Civil Engineering

Requirements for the Engineer in Civil Engineering are the same as set forth in the general requirements.

Transportation Systems Graduate Certificate

See Transportation Systems Graduate Certificate in the Price School of Public Policy.

Bachelor's Degree

Applied Mechanics (BS)

The requirement for this degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper-division courses applied toward the major, regardless of the department in which the courses are taken. See the common requirements for undergraduate degrees section.

Composition/Writing Requirements

- ENE 215 Energy Systems and Environmental Tradeoffs Units: 4
- ENE 428 Air Pollution Fundamentals Units: 4

Courses from Other Engineering Departments

Students who complete MATH 125g before MATH 126g will be excused from completing ISE 460.

- ISE 460 Engineering Economy Units: 3
- CHE 330 Chemical Engineering Thermodynamics Units: 4

Total units: 135

**Satisfies GE requirement.*

All curricula leading to a degree must be approved by the Astani Department of Civil and Environmental Engineering; please note this includes transfer credit and units for courses waived for subject credit only, which have been approved through the Degree Progress department.

Civil Engineering, Structural Engineering Emphasis (BS)

The requirement for the degree with an emphasis in structural engineering is 131 - 132 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied toward the major, regardless of the department in which the courses are taken. In addition, a minimum grade of C must be earned in each of the following courses: CE 215, CE 225, and CE 309. See also common requirements for undergraduate degrees.

Composition/Writing Requirements

- WRIT 150 Writing and Critical Reasoning–Thematic Approaches Units: 4
- WRIT 340 Advanced Writing Units: 3, 4 (3 Units Required)

General Education

- General Education Units: 24

Pre-Major Requirements

Chemistry Requirement

- CHEM 105aLg General Chemistry Units: 4 ** or
- CHEM 115aLg Advanced General Chemistry Units: 4

Math Requirement

Students who must take MATH 125g Calculus I will be waived from the course requirement of AME 310, EE 202L or EE 326Lx.

- MATH 126g Calculus II Units: 4 ** or
- MATH 129 Calculus II for Engineers and Scientists Units: 4
- MATH 226g Calculus III Units: 4 or
- MATH 229 Calculus III for Engineers and Scientists Units: 4
- MATH 245 Mathematics of Physics and Engineering I Units: 4

Physics Requirement

- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4 **
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4

Water Resources Engineering

- CE 465 Water Supply and Sewerage System Design Units: 4
- CE 476 Design of Hydraulic Systems Units: 4

Electives

The civil engineering electives (4 units) may be chosen freely.

Total units: 133-134

***Satisfies General Education requirement.*

All curricula leading to a degree must be approved by the Astani Department of Civil and Environmental Engineering; please note this includes transfer credit and units for courses waived for subject credit only, which have been approved through the Degree Progress department.

Minor

Construction Planning and Management Minor

This program covers the most current theories and practice of construction planning and management. The program provides a valuable adjunct credential to professional school students pursuing careers in business administration, public administration, architecture, environmental studies, and other areas; and a unique opportunity for professional focus to students in the USC Dornsife College of Letters, Arts and Sciences.

Construction activities are complex. In contemporary society, effective planning and management of these activities requires specialized knowledge of the technical, economic and policy environment. This program couples the knowledge of how construction activities are organized with a broader understanding of the urban system in which construction projects are embedded. With the exception of statistics, all of the required courses are within the Astani Department of Civil and Environmental Engineering and the USC Price School of Public Policy.

Any USC undergraduate who has completed the equivalent of two full-time semesters in good standing is eligible to pursue the minor program. This minor program is rigorous enough to serve as an introductory credential for students subsequently electing to pursue advanced studies in development, urban planning, construction management, architecture or allied fields.

Six courses consisting of at least 22 units are required for the minor.

Core Courses

- CE 460 Construction Engineering Units: 4
- CE 470 Building Information Modeling: Project Visualization and Simulation for Management Units: 4

Theme Requirement

Two courses, both from Theme One or Theme Two:

Theme One

- PPD 357 Government and Business Units: 4
- PPD 358 Urban and Regional Economics Units: 4

Theme Two

- FBE 400x Introduction to Real Estate Finance and Development Units: 4
- FBE 466 Management of Real Estate Development: Feasibility Studies Units: 4

Electives

Select at least 6 units from the following:

- CE 412 Construction Contracts and Law Units: 2
- CE 461 Construction Estimating Units: 4
- CE 462 Construction Methods and Equipment Units: 2
- CE 469 Sustainable Design and Construction Units: 2
- RED 437 Advanced Finance and Investment for Real Estate Development Units: 4

Total Units: 22

Notes:

Advisement is provided by the Astani Department of Civil and Environmental Engineering. Students electing FBE, PPD, or RED courses from the themes or electives must satisfy the prerequisites. Please see the Price School and Marshall School section or schedule of classes for the prerequisites.

Master's Degree

Civil Engineering (Advanced Design and Construction Technology) (MS)

Designers, architects, engineers and construction managers of the 21st century must be able to manage and harness the rapid pace of technological change. A highly interconnected world and complex projects require creative and technologically enabled solutions. In this program, technology is argued to be a catalyst for change, poised to reduce the industry's fragmentation, improve its efficiency and effectiveness, and increase productivity, resilience and sustainability. The program emphasis is on understanding the capabilities of available and developing technologies so that the appropriate tools, systems, equipment, and methods can be implemented for a particular architectural, engineering and construction (AEC) function, project or challenge.

The Master of Science in Civil Engineering with an emphasis in Advanced Design and Construction Technology is awarded in strict conformity with the general requirements of the USC Viterbi School of Engineering. Students can choose the option of completing a thesis and must include in their program 4 units of CE 594a and CE 594b.

CE 578 is a integrated capstone project course; students will benefit most from this course if it is taken near the end of the program.

For Admission Requirements, please refer to the Viterbi Graduate Degrees and Requirements section of this catalogue.

Core Requirements (16 units)

- CE 470 Building Information Modeling: Project Visualization and Simulation for Management Units: 4
- CE 505 Data Management for Civil and Environmental Engineering Units: 2
- CE 568 Fundamental Concepts of Computing and Programming in Civil and Environmental Engineering Units: 2
- CE 573 Advanced Technologies in AEC Practices Units: 4
- CE 578 Technology-Enabled Architecture, Engineering and Construction (AEC) Projects Units: 4

Electives (12 units)

Students select three electives in consultation with an adviser, totaling at least 12 units, that may be taken from the USC Astani Department of Civil and Environmental Engineering, other engineering departments, the USC Price School of Public Policy, the USC School of Architecture, or the USC Marshall School of Business subject to adviser approval. Admission to some classes requires advanced prerequisites and is subject to availability and approval of the instructor.

Minimum Units Required: 28

Civil Engineering (MS)

The Master of Science in Civil Engineering is awarded in strict conformity with the general requirements of the USC Viterbi School of Engineering. A student may receive the Master of Science in Civil Engineering with a special option by specializing in one of the following courses of study: construction engineering; structural engineering; and transportation engineering. Students can choose the option of completing a thesis must include in their program 4 units of CE 594a and CE 594b. Total units for the degree is 28.

A general Master of Science in Civil Engineering without special designation is also given. Students pursuing this program will choose between the following special options: general, earthquake engineering, structural mechanics, water resources or ocean and coastal engineering.

A student who wishes to pursue the Master of Science in Civil Engineering without special designation and who has an interest in public works may take a selected sequence of 12 units in the USC Price School of Public Policy. For further information, see the Public Administration Professional Sequence section in the USC Price School of Public Policy.

For admission requirements, refer to Viterbi Graduate Degrees and Requirements at USC Viterbi School of Engineering.

Civil Engineering (Transportation Systems) (MS)

Sustainable Infrastructure Systems

The Sustainable Infrastructure Systems program prepares students for immediate and effective participation in the modern infrastructure workforce through a common core that includes smart-system design for sustainable infrastructures, the societal and regulatory context of infrastructure engineering decisions, and construction management. Four plans of study for the Master of Science degree allow for specialization based on background and interest.

Required Courses

Master of Science in Civil Engineering (Transportation Systems)

Electives Courses (Three Courses, Other Electives Upon Approval*)

- CE 583 Design of Transportation Facilities Units: 4
- CE 585 Traffic Engineering and Control Units: 3
- CE 588 Railroad Engineering Units: 3
- CE 589 Port Engineering: Planning and Operational Analysis Units: 4
- PPD 634 Institutional and Policy Issues in Transportation Units: 4
- PPD 692 Transportation and the Environment Units: 4

Note:

**Students electing the Master of Science in Civil Engineering (Transportation Systems) degree option are expected to have a background in statistics and uncertainty equivalent to ISE 225 or CE 408, and engineering economy equivalent to ISE 460. Admitted students who do not meet these prerequisites can satisfy the requirements by taking appropriate, adviser-approved electives.*

Minimum units required for the degree is 28

For admission requirements, refer to Viterbi Graduate Degrees and Requirements at USC Viterbi School of Engineering.

Additional Requirements

Students with MS degrees in engineering or science disciplines can be accepted in these programs. Students must satisfy all other departmental degree requirements.

Construction Management (MCM)

Students possessing a bachelor's degree and with sufficient training in capital management and statistics may pursue the Master of Construction Management. The purpose of the Master of Construction Management program is to educate and train multidisciplinary professionals to understand and execute the broad array of technical and non-technical activities associated with construction management. The program provides special attention to the function of the constructor in real estate development.

Applicants to the program are expected to have completed undergraduate course work in engineering economy or business finance.

For admission requirements, refer to Viterbi Graduate Degrees and Requirements at USC Viterbi School of Engineering.

Core Curriculum

- CE 501 Construction Practices Units: 4

- CE 502 Construction Accounting, Finance and Strategy Units: 4
- CE 564 Construction Planning and Preconstruction Units: 4
- CE 569 Project Controls Units: 4

Total minimum units: 32

Additional Requirements

The minimum requirement for the Master of Construction Management degree is 32 units. At least four elective courses totaling at least 16 units are required for this degree. These may be taken from the USC Astani Department of Civil and Environmental Engineering, other engineering departments, the USC Price School of Public Policy, the USC School of Architecture, the USC Gould School of Law or the USC Marshall School of Business, subject to adviser approval. Admission to some classes requires advanced prerequisites and is subject to availability and approval of the instructor.

General Requirements

Residence and Course Load

The normal time required for earning the Master of Construction Management is four semesters. Students are expected to participate in extracurricular activities associated with the Master of Construction Management program, including the speaker series and field trips. A candidate must complete the last four semester units of course work at USC.

Students who wish to take a leave of absence for a semester or longer must request it from the chairman of the Astani Department in writing. Such leaves may be granted for up to one year.

Transportation Systems Management (MS)

Transportation is a dynamic field with many aspects. The Master of Science in Transportation Management prepares students from any sufficiently analytical undergraduate background for advanced positions in the private, public or non-profit sector as well as for advanced graduate study. Students complete the program core, subject to options indicated there, plus a specialization for a total of 32-36 units.

The program core provides students with a broad, interdisciplinary basis for understanding transportation systems and needs. A required specialization of the student's choosing provides depth in a focused aspect of transportation systems relating to a particular set of methods or problem domain. Students learn:

- the design, provision, operation, and effectiveness of transportation services in the larger context of economic and social systems;
- how organizations can best adapt to changes affecting the transportation environment in which services are demanded and provided, including the relationships between transportation, technology, information services, and regulatory requirements; and
- to characterize, analyze and address complex transportation problems at the system level by relying on both theory and applied analytical methods.

For Admission Requirements, refer to USC Viterbi School of Engineering.

Program Core (21-24 Units)

The core consists of six courses for a total of 21-23 units. Students should complete all core courses, subject to the options indicated below.

- SAE 515 Sustainable Infrastructure Systems Units: 4
  or
- SAE 541 Systems Engineering Theory and Practice Units: 3
  or
- SAE 549 Systems Architecting Units: 3
- CE 501 Construction Practices Units: 4
  or
- ISE 500 Statistics for Engineering Managers Units: 3
- SSCI 581 Concepts for Spatial Thinking Units: 4

Any three of the following four courses:

- CE 582 Transportation System Security and Emergency Management Units: 4
- CE 584 Intelligent Transportation Systems Units: 4
- CE 585 Traffic Engineering and Control Units: 3
- CE 589 Port Engineering: Planning and Operational Analysis Units: 4

Specialization in Transportation Infrastructure Systems (11-12 Units)

This specialization consists of three courses for a total of 11-12 units, and is for students with an undergraduate background in science or engineering.

- CE 471 Principles of Transportation Engineering Units: 4
- CE 583 Design of Transportation Facilities Units: 4
- CE 586 Modeling Transportation Network Supply and Demand Units: 4
  or
- CE 588 Railroad Engineering Units: 3

Specialization in Geographic Information Systems (12 Units)

This specialization consists of three courses for a total of 12 units. SSCI 582 and SSCI 583 and SSCI 591 may be taken in any order after SSCI 581, but SSCI 574 should be taken after SSCI 583.

- SSCI 582 Spatial Databases Units: 4
- SSCI 583 Spatial Analysis and Modeling Units: 4
- SSCI 574 Spatial Econometrics Units: 4
  or
- SSCI 575 Spatial Data Science Units: 4
  or
- SSCI 591 Web and Mobile GIS Units: 4

Specialization in Data Science (12 Units)

This specialization consists of three courses for a total of 12 units. DSCI 510 and DSCI 549 may be completed in any order, but both should be completed before DSCI 550.

- DSCI 510 Principles of Programming for Data Science Units: 4
- DSCI 549 Introduction to Computational Thinking and Data Science Units: 4
- DSCI 550 Data Science at Scale Units: 4

Specialization in Systems Architecting (12 Units)

This specialization consists of four courses for a total of 12 units, and is for students with an undergraduate background in science or engineering. A single course may not be used to satisfy both a core requirement and a specialization requirement.

- SAE 560 Economic Considerations for Systems Engineering Units: 3

Any three of the following five courses:

- SAE 515 Sustainable Infrastructure Systems Units: 4
- SAE 541 Systems Engineering Theory and Practice Units: 3
- SAE 547 Model-Based Systems Architecting and Engineering Units: 3
- SAE 548 Systems/System-of-Systems Integration and Communication Units: 3
- SAE 549 Systems Architecting Units: 3

Graduate Certificate

Transportation Systems Graduate Certificate

The graduate certificate in Transportation Systems is an interdisciplinary program administered by the USC Astani Department of Civil and Environmental Engineering. The certificate program allows students to specialize in transportation applications, while simultaneously receiving a degree in their home department. The certificate in transportation systems combines elements of transportation engineering with transportation policy, planning and project management. The program is especially

appropriate for students intending to pursue careers as developers of transportation technologies, or as implementors of technologies within government agencies.

Students electing the certificate program apply to the USC Astani Department of Civil and Environmental Engineering. Course prerequisites for the program are:

- one course in statistics or uncertainty, equivalent to ISE 225 or CE 408;
- one course in engineering economy, equivalent to ISE 460;
- one course in microeconomics, equivalent to ECON 203; and
- one course in a contemporary high level programming language.

These prerequisites may be satisfied after enrollment in the certificate program by taking the indicated courses or their equivalent. Graduate students cannot receive credit for courses numbered below 400. Detailed admissions requirements are published by the USC Astani Department of Civil and Environmental Engineering.

The courses taken for the certificate may be applied later to the Master of Science in Civil Engineering, transportation option.

Qualified students holding a bachelor's degree also have the option of enrolling in the certificate program without receiving a separate graduate degree.

The curriculum consists of five graduate courses for a total of at least 18 units.

Certificate Requirements

- CE 471 Principles of Transportation Engineering Units: 4 or
- CE 501 Construction Practices Units: 4
- CE 583 Design of Transportation Facilities Units: 4 or
- CE 585 Traffic Engineering and Control Units: 3
- ISE 515 Engineering Project Management Units: 3
- PPD 633 Methods and Modeling Tools for Transportation Planning Units: 4
- PPD 634 Institutional and Policy Issues in Transportation Units: 4

Doctoral Degree

Civil Engineering (PhD)

Doctor of Philosophy in Civil Engineering and Doctor of Philosophy in Engineering (Environmental Engineering)

The Doctor of Philosophy with a major in civil engineering and the Doctor of Philosophy with a major in engineering (environmental engineering) are also offered. See general requirements for graduate degrees.

Areas of specialization for Doctor of Philosophy level students are: structural engineering, structural mechanics, earthquake engineering, coastal engineering, water resources engineering, construction engineering and management, soil mechanics and foundation engineering, hydrology, hydrodynamics and transportation.

Degree Requirements

Undergraduate Program Educational Objectives

Fulfilling the vision of the Sonny Astani Department of Civil and Environmental Engineering, the Viterbi School of Engineering and the University of Southern California, our graduates from the

Bachelor of Science in Civil Engineering program or the Bachelor of Science in Environmental Engineering program will:

1. Be successful in their professional careers, become leaders in industry, academia, government or service, while adapting their technical, collaborative and managerial skills for the benefit of society's built and natural environments.
2. Support the advancement of the practice of science and engineering, while maintaining professional standards and moral and legal obligations to society, while being active in professional organizations and obtaining professional licensure when appropriate.
3. Be prepared to pursue graduate studies in engineering or other disciplines, while continuously broadening their abilities and enhancing their technical skills to maintain their relevance with technological change.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Civil Engineering prepares graduates to apply knowledge of mathematics through differential equations, calculus-based physics, chemistry and at least one additional area of basic science, consistent with the program educational objectives; apply knowledge of four technical areas appropriate to civil engineering; conduct civil engineering experiments and analyze and interpret the resulting data; and design a system, component, or process in more than one civil engineering context. The program also explains basic concepts in management, business, public policy, and leadership; and explains the importance of professional licensure.

The program leading to a Bachelor of Science in Environmental Engineering prepares graduates to apply knowledge of mathematics through differential equations, probability and statistics, calculus-based physics, chemistry (including stoichiometry, equilibrium and kinetics), an earth science, a biological science and fluid mechanics. The curriculum prepares graduates to formulate material and energy balances, and analyze the fate and transport of substances in and between air, water, and soil phases; conduct laboratory experiments, and analyze and interpret the resulting data in more than one major environmental engineering focus area, e.g., air, water, land, environmental health; design environmental engineering systems that include considerations of risk, uncertainty, sustainability, life-cycle principles and environmental impacts; and apply advanced principles and practice relevant to the program objectives. The curriculum prepares graduates to understand concepts of professional practice, project management, and the roles and responsibilities of public institutions and private organizations pertaining to environmental policy and regulations.

Bachelor of Science in Civil Engineering Emphasis in Environmental Engineering

See Civil Engineering.

Engineer in Environmental Engineering

Requirements for the Engineer in Environmental Engineering are the same as set forth in the general requirements. See General Requirements for the Engineer Degree.

Sustainable Policy and Planning Graduate Certificate

See the listing in the USC Price School of Public Policy section.

Bachelor's Degree

Environmental Engineering (BS)

The program requires a minimum of 135 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper-division courses applied toward the major, regardless of the department in which the courses are taken. In addition, a minimum grade of C must be earned in the following course: ENE 410. See also common requirements for undergraduate degrees.

Composition/Writing Requirements

- WRIT 150 Writing and Critical Reasoning–Thematic Approaches Units: 4
- WRIT 340 Advanced Writing Units: 3, 4 (4 units required)

General Education

- General education Units: 20

Pre-Major Requirements

Chemistry Requirement

- CHEM 105aLg General Chemistry Units: 4 * or
- CHEM 115aLg Advanced General Chemistry Units: 4
- CHEM 105bL General Chemistry Units: 4 * or
- CHEM 115bL Advanced General Chemistry Units: 4

Math Requirement

Students who must take MATH 125g Calculus I will be waived from the required course ISE 460 Engineering Economy.

- MATH 126g Calculus II Units: 4 * or
- MATH 129 Calculus II for Engineers and Scientists Units: 4
- MATH 226g Calculus III Units: 4 * or
- MATH 229 Calculus III for Engineers and Scientists Units: 4
- MATH 245 Mathematics of Physics and Engineering I Units: 4

Physics Requirement

- CE 485 Water Treatment Design Units: 4
- ENE 200 Environmental Engineering Principles Units: 4
- ENE 215 Energy Systems and Environmental Tradeoffs Units: 4
- ENE 300 Contaminant Transport in the Environment Units: 4
- ENE 415 Environmental Organic Chemistry Units: 4
- ENE 426 Particulate Air Pollutants: Properties/Behavior/Measurement Units: 4
- ENE 428 Air Pollution Fundamentals Units: 4
- ENE 410 Environmental Fluid Mechanics Units: 4

Choose one design course (4 units) from the following list:

- CE 476 Design of Hydraulic Systems Units: 4

Or

- ENE 400 Quantitative Sustainability Units: 4

Courses from Other Departments

Students who complete MATH 125g before MATH 126g will be excused from completing ISE 460.

- BISC 220Lg General Biology: Cell Biology and Physiology Units: 4 *
- CHE 330 Chemical Engineering Thermodynamics Units: 4
- ISE 460 Engineering Economy Units: 3

Capstone Course

- CE 480 Civil and Environmental Engineering Capstone Design Units: 4

Total units: 135

**Satisfies GE requirement.*

All curricula leading to a degree must be approved by the Astani Department of Civil and Environmental Engineering; please note this includes transfer credit and units for courses waived for subject credit only, which have been approved through the Degree Progress department.

Master's Degree

Environmental Engineering (MS)

Students with a bachelor's degree in engineering or science may work toward the Master of Science in Environmental Engineering. Students with degrees in fields other than engineering or science may be admitted on the recommendation of a program adviser and program director. Selection of courses will be determined through consultation with a program adviser to provide a maximum of training in the student's area of interest in environmental problems.

The Master of Science in Environmental Engineering requires a minimum of 28 units.

For admission requirements, refer to Viterbi Graduate Degrees and Requirements at USC Viterbi School of Engineering.

Doctoral Degree

Engineering (Environmental Engineering) (PhD)

Doctor of Philosophy in Civil Engineering and Doctor of Philosophy in Engineering (Environmental Engineering)

The Doctor of Philosophy with a major in civil engineering and the Doctor of Philosophy with a major in engineering (environmental engineering) are also offered. See general requirements for graduate degrees.

Areas of specialization for Doctor of Philosophy level students are: structural engineering, structural mechanics, earthquake engineering, coastal engineering, water resources engineering, construction engineering and management, soil mechanics and foundation engineering, hydrology, hydrodynamics and transportation.

Computer Engineering Program

Undergraduate Degree

Undergraduate Program Educational Objectives

Graduates of the Computer Engineering and Computer Science program are expected to attain the following educational objectives within a few years of graduation:

- Graduates will apply analytical and critical thinking principles of both computer engineering and computer science to their chosen professions.
- Graduates will successfully engage in life-long learning to continue to be contributing members of their communities in fields within and outside the traditional scope of computer engineering.
- Graduates will exhibit high professional and ethical standards to become productive leaders in society.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Computer Engineering and Computer Science provides both breadth and depth across the range of engineering topics implied by the title. The curriculum includes probability and statistics, including appropriate applications; mathematics, including discrete mathematics through differential and integral calculus; sciences (defined as biological, chemical or physical science) to develop an understanding of the scientific method and provide students with an opportunity to experience this mode of inquiry in courses for science or engineering majors that provide some exposure to lab work; and engineering topics (including computing science) necessary to analyze and design complex electrical and electronic devices, software and systems containing hardware and software components.

The computer science portion of the curriculum covers the fundamentals of algorithms, data structures, software design, concepts of programming languages and computer organization and software; provides an exposure to a variety of programming languages and systems, including at least one higher-level language; and includes advanced course work that builds on the fundamental course work to provide depth.

Graduate Degrees

The graduate program in computer engineering, offered through the Department of Electrical and Computer Engineering, is designed to provide students with an intensive background in the analysis, structure, design and function of digital computers and information processing systems. In addition to giving each student a fundamental background in digital logic, computer architecture and operating systems, a wide variety of elective courses allows for study in the following specialized areas: artificial intelligence; computer architecture; computer networks; computer system performance; design automation; fault-tolerant computers; microprocessors; parallel processing; real-time systems; robotics and VLSI design.

Master's Degree

Computer Engineering (MS)

A minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in electrical engineering. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor's degree and through an accumulation of no more than 12 units beyond the minimum needed for the specific degree program. Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average.

In addition to the general requirements of the Viterbi School of Engineering, the Master of Science in Computer Engineering is also subject to the following requirements: (1) a total of at least 28 units is required; (2) every non-EE course for graduate credit requires prior written adviser approval recorded each semester on a special request form in the student's department file; (3) no more than three courses (maximum 12 units) may be counted at the 400 level — at least 19 adviser-approved units must be taken at the 500 or 600 level; (4) at least 20 units must be taken in Computer Engineering; (5) a maximum of two EE 599 Special Topics courses (8 units) may be counted toward the MSCENG; (6) at most, 4 units of EE 590 (Directed Research) and 1 unit of seminar, EE 598 (or other seminar with adviser approval), may be counted toward the MSCENG; (7) units to be transferred (maximum 4 with adviser approval) must have been taken prior to taking classes at USC — interruption of residency is not allowed.

In addition to the above, the Master of Science in Computer Engineering is earned by completing an integrated program of at least 28 units of approved course work emphasizing three key areas - Architecture, VLSI and Networks. Students must take one course from at least two areas, outlined below.

For Admission Requirements, refer to Viterbi Graduate Degrees and Requirements.

Computer Engineering course work requirements

Take a minimum of 20 units of Computer Engineering courses from the three lists below, including at least one course from two of the three areas in Architecture, Networks and VLSI/CAD areas. Electives from the Foundations area will also count toward the 20 unit Computer Engineering requirement.

Computer Architecture

Take at least one course from two areas.

- EE 451 Parallel and Distributed Computation Units: 4
- EE 454L Introduction to System-on-Chip Units: 4
- EE 457 Computer Systems Organization Units: 4
- EE 532 Wireless Internet and Pervasive Computing Units: 3
- EE 533 Network Processor Design and Programming Units: 3
- EE 542 Internet and Cloud Computing Units: 3
- EE 557 Computer Systems Architecture Units: 4
- EE 560L Digital System Design Units: 4
- EE 638 Applications of Machine Learning for Medical Data Units: 4
- EE 653 Advanced Topics in Microarchitecture Units: 3
- EE 657 Parallel and Distributed Computing Units: 3
- EE 659 Interconnection Networks Units: 3
- EE 677 VLSI Architectures and Algorithms Units: 3

Networks

Take at least one course from two areas.

- EE 450 Introduction to Computer Networks Units: 4
- EE 467 Introduction to Communication Systems Units: 3
- EE 533 Network Processor Design and Programming Units: 3
- EE 550 Data Networks: Design and Analysis Units: 4
- EE 555 Broadband Network Architectures Units: 3
- EE 597 Wireless Networks Units: 4
- EE 650 Advanced Topics in Computer Networks Units: 3
- EE 652 Low-Power Wireless Networks Units: 3

VLSI/CAD

Take at least one course from two areas.

- EE 477L MOS VLSI Circuit Design Units: 4
- EE 536a Analog Integrated Circuits Units: 4
- EE 536b Analog Integrated Circuits Units: 4
- EE 537 Modern Solid-State Devices Units: 4
- EE 552 Asynchronous VLSI Design Units: 4
- EE 577a VLSI System Design Units: 4
- EE 577b VLSI System Design Units: 2
- EE 580 System Verification Units: 4
- EE 581 Mathematical Foundations for System Design: Modeling, Analysis, and Synthesis Units: 4
- EE 582 CMOS:Nano Neuromorphic Circuits Units: 4
- EE 658 Diagnosis and Design of Reliable Digital Systems Units: 3
- EE 677 VLSI Architectures and Algorithms Units: 3
- EE 680 Computer-Aided Design of Digital Systems I Units: 3
- EE 681 Computer-Aided Design of Digital Systems II Units: 3

Foundations

Additional approved Computer Engineering electives that will count toward the 20 units required in the computer engineering area.

- CSCI 402 Operating Systems Units: 4
- EE 503 Probability for Electrical and Computer Engineers Units: 4
- EE 511 Simulation Methods for Stochastic Systems Units: 1
- EE 510 Linear Algebra for Engineering Units: 4
- EE 588 Optimization for the Information and Data Sciences Units: 4
- EE 660 Machine Learning II: Mathematical Foundations and Methods Units: 4

Doctoral Degree

Computer Engineering (PhD)

The requirements for the Doctor of Philosophy (PhD) in Computer Engineering are in strict conformity with the requirements of the Graduate School. Program requirements for the PhD in Computer Engineering are the same as those for the PhD in Electrical Engineering except that the major field is computer engineering. See general requirements for graduate degrees.

Screening and qualifying examinations are administered by the computer engineering faculty. Students should contact the Electrical Engineering Systems Department Office for further information.

Course Requirements

A minimum of 60 units is required. Of these 60 units, a minimum of two courses must come from the Theory Area course list; at least one course must come from each of the Hardware, Software, and Systems Area course lists; one additional course must come from the Hardware, Software, and Systems Area course lists.

Theory Area Courses

- CSCI 561 Foundations of Artificial Intelligence Units: 4
- CSCI 567 Machine Learning Units: 4
- CSCI 570 Analysis of Algorithms Units: 4
- CSCI 670x Advanced Analysis of Algorithms Units: 4
- CSCI 675 Convex and Combinatorial Optimization Units: 4
- EE 503 Probability for Electrical and Computer Engineers Units: 4
- EE 512 Stochastic Processes Units: 3
- EE 553 Computational Solution of Optimization Problems Units: 3
- EE 565 Information Theory and Its Application to (Big) Data Sciences Units: 4
- EE 581 Mathematical Foundations for System Design: Modeling, Analysis, and Synthesis Units: 4
- EE 588 Optimization for the Information and Data Sciences Units: 4
- ISE 530 Optimization Methods for Analytics Units: 3
- MATH 410 Fundamental Concepts of Modern Algebra Units: 4

  or
- MATH 425a Fundamental Concepts of Analysis Units: 4
- MATH 533 Algebraic Combinatorics Units: 3

Hardware Area Courses

- EE 532 Wireless Internet and Pervasive Computing Units: 3
- EE 533 Network Processor Design and Programming Units: 3
- EE 536a Analog Integrated Circuits Units: 4
- EE 552 Asynchronous VLSI Design Units: 4
- EE 557 Computer Systems Architecture Units: 4
- EE 560L Digital System Design Units: 4
- EE 577a VLSI System Design Units: 4
- EE 577b VLSI System Design Units: 2
- EE 658 Diagnosis and Design of Reliable Digital Systems Units: 3
- EE 659 Interconnection Networks Units: 3
- EE 677 VLSI Architectures and Algorithms Units: 3
- EE 680 Computer-Aided Design of Digital Systems I Units: 3

Software Area Courses

- CSCI 548 Information Integration on the Web Units: 4
- CSCI 551 Computer Networking Units: 4
- CSCI 565 Compiler Design Units: 4
- CSCI 577a Software Engineering Units: 4
- CSCI 580 3-D Graphics and Rendering Units: 4
- CSCI 585 Database Systems Units: 4
- EE 542 Internet and Cloud Computing Units: 3

Systems Area Courses

- CSCI 555L Advanced Operating Systems Units: 4
- EE 542 Internet and Cloud Computing Units: 3

- EE 543aL Digital Control Systems Units: 3
- EE 550 Data Networks: Design and Analysis Units: 4
  or
- EE 555 Broadband Network Architectures Units: 3
- EE 554 Cyber-Physical Systems: A Computing Perspective Units: 4
- EE 569 Introduction to Digital Image Processing Units: 4
- EE 585 Linear System Theory Units: 4
- EE 597 Wireless Networks Units: 4
- EE 652 Low-Power Wireless Networks Units: 3
- EE 657 Parallel and Distributed Computing Units: 3
- EE 681 Computer-Aided Design of Digital Systems II Units: 3

Arbib, PhD (*Biological Sciences, Biomedical Engineering, Electrical Engineering, Neuroscience and Psychology*); George Bekey, PhD *(Electrical Engineering, Biomedical Engineering)*; Jerry Hobbs, PhD; Gerard Medioni, PhD *(Electrical and Computer Engineering)*; Aristides A.G. Requicha, PhD (*Electrical Engineering*)

Bachelor of Science

Undergraduate Program Educational Objectives

Graduates of the undergraduate program in Computer Science are expected to attain the following objectives within a few years of graduation:

1. Graduates apply the computational and analytical approaches of computer science to their chosen professions.
2. Graduates successfully engage in life-long learning to continue to be contributing members of their communities in fields within and outside the traditional scope of computer science.
3. Graduates exhibit high professional and ethical standards to become productive leaders in society.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Computer Science includes at least one and one-third years of computer science that covers the fundamentals of algorithms, data structures, software design, concepts of programming languages and computer organization and software; provides an exposure to a variety of programming languages and systems, including at least one higher-level language; and includes advanced course work that builds on the fundamental course work to provide depth.

The program includes at least one year of science and mathematics, including at least one-half year of mathematics, including discrete mathematics. Additional mathematics might consist of calculus, linear algebra, numerical methods, probability, statistics, number theory, geometry, or symbolic logic. The science component develops an understanding of the scientific method and provides an opportunity to experience this mode of inquiry in courses for science or engineering majors that provide some exposure to laboratory work.

Physics/Computer Science Major Requirements for the Bachelor of Science

This program is intended for students with dual interests in physics and computer science who wish to complete the essential courses for both majors within their normal four-year career. See the Physics and Astronomy Department section for course requirements.

Bachelor of Science in Computer Engineering and Computer Science

See the listing under Computer Engineering Program.

Graduate Degrees

The requirements listed below are special to this department and must be read in conjunction with the general requirements of the USC Viterbi School of Engineering for master's degrees and the general requirements of the USC Graduate School for PhD degrees. The graduate program in computer science provides intensive preparation in the basic concepts and techniques related to the design, programming and application of digital computers. Both the Master of Science and Doctor of Philosophy degrees are offered.

A Master of Science degree with specialization in software engineering is also offered. The program seeks to prepare students for an industrial leadership career in software engineering. It also serves as an introduction to this area for students who wish to pursue advanced studies and research leading to a PhD.

A Master of Science degree with specialization in intelligent robotics is also offered. This program seeks to prepare students for an industrial career in the development of computer systems for CAD/CAM (Computer-Aided Design and Manufacturing) and robotics. It also serves as an introduction to this area for students who wish to pursue advanced studies and research leading to a PhD. The emphasis is on the domain of mechanical, electromechanical and mechatronic products. (CAD for digital systems is covered by a separate program offered by the Electrical and Computer Engineering department.)

A Master of Science degree with a specialization in computer networks is offered. This specialization prepares students in the areas of computer communications, networks and distributed processing.

A Master of Science in Computer Science (Artificial Intelligence) is also offered.

A Master of Science in Computer Science (Multimedia and Creative Technologies) is also offered.

A Master of Science in Computer Science (High Performance Computing and Simulations) is also offered.

A Master of Science in Computer Science (Data Science) is also offered.

A Master of Science in Computer Science (Game Development) is also offered.

A Master of Science in Computer Science (Computer Security) is also offered.

A Master of Science in Computer Science Dual Degree with Tsinghua University School of Information Science and Technology – China is also offered.

A Master of Science in Computer Science (Scientists and Engineers) is also offered for students with limited background in computer science.

Admission and Prerequisites

Admission is determined by the Office of Admission and the Viterbi School of Engineering, in consultation with the Computer Science Department. The applicant is required to have a bachelor's degree or its equivalent from an accredited college or university; satisfactory scores on the verbal and quantitative portions of the aptitude test of the Graduate Record Examinations (one advanced test from computer science, mathematics or engineering is recommended); and a substantial background in computing constitutes a minimum requirement. Foreign students must earn a satisfactory score on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS).

Bachelor's Degree

Computer Engineering and Computer Science (BS)

The Bachelor of Science in Computer Engineering and Computer Science provides students with the scientific and engineering skills and knowledge that enable them to design and implement computer systems that effectively and efficiently integrate developing hardware and software technologies. This degree is administered jointly by the Department of Computer Science and the Department of Electrical and Computer Engineering.

A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper-division courses applied toward the major, regardless of the department in which the courses are taken.

The requirement for the degree is 128 units.

A grade of C (2.0) or better is required for each of the core courses CSCI 102L, CSCI 103, CSCI 170, CSCI 104 and CSCI 201.

Courses with a grade of C- or below must be repeated; courses may only be retaken once.

Departmental approval is required in order to retake a course.

Students who do not satisfy the degree requirement after repeating a class will be disqualified from the program.

Composition/Writing Requirements (7 Units)

- WRIT 150 Writing and Critical Reasoning–Thematic Approaches Units: 4
- WRIT 340 Advanced Writing Units: 3, 4 *

General Education (24 Units)

- General Education Units: 24

Pre-Major Requirements (30 Units)

Engineering (2 units)

- ENGR 102 Engineering Freshman Academy Units: 2

Mathematics (16 units)

- MATH 125g Calculus I Units: 4
- MATH 126g Calculus II Units: 4 or
- MATH 129 Calculus II for Engineers and Scientists Units: 4
- MATH 225 Linear Algebra and Linear Differential Equations Units: 4
- MATH 226g Calculus III Units: 4 or
- MATH 229 Calculus III for Engineers and Scientists Units: 4

Statistics and Probability (4 units)

- EE 364 Introduction to Probability and Statistics for Electrical Engineering and Computer Science Units: 4 or
- MATH 407 Probability Theory Units: 4

Physics (8 units)

- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4 ** and
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4

  or
- PHYS 161Lg Advanced Principles of Physics I Units: 4 and
- PHYS 162L Advanced Principles of Physics II Units: 4

  or
- PHYS 171Lg Applied Physics I: Mechanics Units: 4 and
- PHYS 172L Applied Physics II: Electricity, Magnetism and Optics Units: 4

Core (34 units)

- CSCI 102L Fundamentals of Computation Units: 2
- CSCI 103L Introduction to Programming Units: 4
- CSCI 104L Data Structures and Object Oriented Design Units: 4
- CSCI 170 Discrete Methods in Computer Science Units: 4
- CSCI 270 Introduction to Algorithms and Theory of Computing Units: 4
- EE 109L Introduction to Embedded Systems Units: 4
- EE 250L Distributed Systems for the Internet of Things Units: 4
- EE 354L Introduction to Digital Circuits Units: 4
- EE 457 Computer Systems Organization Units: 4

Computing Systems Track (33 units)

- CSCI 201L Principles of Software Development Units: 4
- CSCI 350 Introduction to Operating Systems Units: 4
- CSCI 353 Introduction to Internetworking Units: 4

Computer Engineering Options

Select two courses.

- EE 451 Parallel and Distributed Computation Units: 4
- EE 454L Introduction to System-on-Chip Units: 4
- EE 477L MOS VLSI Circuit Design Units: 4

Senior Design Project

Select one course.

- CSCI 401 Capstone: Design and Construction of Large Software Systems Units: 4
- CSCI 404 Capstone: Creating Your High-Tech Startup Units: 4
- EE 459Lx Embedded Systems Design Laboratory Units: 4

Electives

- Technical electives: 8 units
- Free electives: 1 unit

Embedded Systems Track (33 units)

- CSCI 430 Introduction to Computer and Network Security Units: 4
- EE 202L Linear Circuits Units: 4
- EE 301L Linear Systems Units: 4
- EE 453 Computing Platforms and Paradigms Units: 4

Senior Design Project

- EE 459Lx Embedded Systems Design Laboratory Units: 4

Electives

- Technical electives: 8 units
- Free electives: 5 units

Technical Electives

Suggested courses include:

- CSCI 310 Software Engineering Units: 4
- CSCI 360 Introduction to Artificial Intelligence Units: 4
- CSCI 420 Computer Graphics Units: 4
- CSCI 445L Introduction to Robotics Units: 4
- CSCI 459 Computer Systems and Applications Modeling Fundamentals Units: 3
- CSCI 467 Introduction to Machine Learning Units: 4
- CSCI 476 Cryptography: Secure Communication and Computation Units: 4
- CSCI 485 File and Database Management Units: 4
- CSCI 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8
- CSCI 491aL Final Game Project Units: 4
- CSCI 491bL Final Game Project Units: 2
- CSCI 499 Special Topics Units: 2, 3, 4
- EE 450 Introduction to Computer Networks Units: 4
- EE 451 Parallel and Distributed Computation Units: 4
- EE 454L Introduction to System-on-Chip Units: 4
- EE 457 Computer Systems Organization Units: 4
- EE 459Lx Embedded Systems Design Laboratory Units: 4
- EE 477L MOS VLSI Circuit Design Units: 4
- EE 482 Linear Control Systems Units: 4
- EE 483 Introduction to Digital Signal Processing Units: 4
- EE 484x Communication System Design Units: 3
- EE 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8
- EE 499 Special Topics Units: 2, 3, 4
- ITP 466 Building the High Tech Startup Units: 4
- MATH 458 Numerical Methods Units: 4

Note:

Students may choose one adviser-approved course from the 300- and 400-level ITP offerings. Other courses may be applicable; please see an adviser for approval.

Total units: 128

*WRIT 340 Advanced Writing (Communication for Engineers) is strongly recommended for CECS majors.

**Satisfies GE requirement.

Computer Science (BS)

The undergraduate program in computer science is an interdisciplinary program leading to the Bachelor of Science in Computer Science. The program is designed to provide both an academic and professional orientation.

General admission requirements for the undergraduate program are the same as those of the university and the USC Viterbi School of Engineering and include 3 to 5 units of mathematics and one unit of science (biology, chemistry or physics) together with satisfactory scores on the Scholastic Aptitude Test and Achievement Tests. The minimum requirement for the degree is 128 units.

A grade of C (2.0) or better is required for each of the core courses CSCI 102L, CSCI 103, CSCI 170, CSCI 104 and CSCI 201.

Courses with a grade of C- or below must be repeated; courses may only be retaken once.

Departmental approval is required in order to retake a course.

Students who do not satisfy the degree requirement after repeating a class will be disqualified from the program.

A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied toward the major, regardless of the department in which the courses are taken. Candidates must complete general education requirements; see the General Education Program.

- ITP 485 Programming Game Engines Units: 4
- MATH 458 Numerical Methods Units: 4

Note:

Students may also choose one adviser-approved course from the 300- and 400-level ITP offerings. Other courses may be applicable; please see an adviser for approval.

Free Electives (5 Units)

Total Units: 128

** WRIT 340 Advanced Writing (Communication for Engineers) is strongly recommended for CSCI majors*

***Courses selected to meet the general education life science and physical science requirements must be approved by the CSCI*

department to ensure that students achieve the required level of basic science content in their programs.
*****Satisfies General Education requirement.*

Computer Science Games (BS)

The goal of the Bachelor of Science in Computer Science Games program is to graduate students with a solid grounding in computer science and a cross-disciplinary background in game development. Topics covered in the cross-disciplinary game development portion of the degree program include game production, visual design for games and interactives, computer animation, video game programming, game hardware architectures, game engine programming, serious game development, introductory and intermediate game design and two semester-long final game projects. Students graduating from this program will be capable of engineering next-generation games and simulations and their technologies in the entertainment and serious game fields. Additionally, graduates from this program will be able to further their education in graduate programs in game development and computer science.

The requirement for the degree is 128 units.

A grade of C (2.0) or better is required for each of the core courses CSCI 102L, CSCI 103, CSCI 170, CSCI 104 and CSCI 201.

Courses with a grade of C- or below must be repeated; courses may only be retaken once.

Departmental approval is required in order to retake a course.

Students who do not satisfy the degree requirement after repeating a class will be disqualified from the program.

A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper-division courses applied toward the major, regardless of the department in which the courses are taken.

Composition/Writing Requirements (7 Units)

- WRIT 150 Writing and Critical Reasoning–Thematic Approaches Units: 4
- WRIT 340 Advanced Writing Units: 3, 4 *

- CTIN 484L Intermediate Game Development Units: 2
- CTIN 488 Game Design Workshop Units: 4
- CTIN 489 Intermediate Game Design Workshop Units: 2

Games Electives (6 units)

Choose at least 6 units:

- CSCI 281 Pipelines for Games and Interactives Units: 4
- CSCI 426 Game Prototyping Units: 4
- CTAN 443L Character Development for 3-D Animation and Games Units: 2
- CTAN 452 Introduction to 3-D Computer Animation Units: 2
- CTIN 404L User Research for Games Units: 2
- CTIN 483 Introduction to Game Development Units: 4
- CTIN 485 Advanced Game Development Units: 2
- CTIN 492L Experimental Game Topics Units: 4
- ITP 485 Programming Game Engines Units: 4

Game Capstone (6 units)

- CSCI 491aL Final Game Project Units: 4
- CSCI 491bL Final Game Project Units: 2

Free Electives (21 units)

Total units: 128

*WRIT 340 Advanced Writing (Communication for Engineers) is strongly recommended for CSGM majors.
**Satisfies GE requirement.

Computer Science/Business Administration (BS)

The combined Bachelor of Science degree program in computer science/business administration offers qualified students the opportunity to gain an educational foundation in both areas. The degree cannot also be combined as an additional major in either computer science or business administration. The degree is administered by the Computer Science Department.

The minimum requirement for the degree is 128 units.

A grade of C (2.0) or better is required for each of the core courses CSCI 102L, CSCI 103, CSCI 170, CSCI 104 and CSCI 201.

Courses with a grade of C- or below must be repeated; courses may only be retaken once.

Departmental approval is required in order to retake a course.

Students who do not satisfy the degree requirement after repeating a class will be disqualified from the program.

A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper-division courses applied toward the major, regardless of the department in which the courses are taken.

Composition/Writing Requirements (7 Units)

- PHYS 161Lg Advanced Principles of Physics I Units: 4

Major Requirements (83-86 Units)

Statistics and Probability (4 units)

- BUAD 310g Applied Business Statistics Units: 4 or
- BUAD 312g Statistics and Data Science for Business Units: 4
  or
- EE 364 Introduction to Probability and Statistics for Electrical Engineering and Computer Science Units: 4 or
- MATH 407 Probability Theory Units: 4

Linear Algebra (4 units)

- EE 141L Applied Linear Algebra for Engineering Units: 4 or
- MATH 225 Linear Algebra and Linear Differential Equations Units: 4

Computer Science Requirements (30 units)

- CSCI 102L Fundamentals of Computation Units: 2
- CSCI 103L Introduction to Programming Units: 4
- CSCI 104L Data Structures and Object Oriented Design Units: 4
- CSCI 170 Discrete Methods in Computer Science Units: 4
- CSCI 201L Principles of Software Development Units: 4
- CSCI 270 Introduction to Algorithms and Theory of Computing Units: 4
- CSCI 310 Software Engineering Units: 4
- CSCI 401 Capstone: Design and Construction of Large Software Systems Units: 4
  or
- CSCI 404 Capstone: Creating Your High-Tech Startup Units: 4

Business Requirements (36 units)

- ACCT 410x Foundations of Accounting Units: 4
- BUAD 302 Communication Strategy in Business Units: 4
- BUAD 304 Organizational Behavior and Leadership Units: 4
- BUAD 306 Business Finance Units: 4
- BUAD 307 Marketing Fundamentals Units: 4
- BUAD 311 Operations Management Units: 4
- BUAD 497 Strategic Management Units: 4
- ECON 351x Microeconomics for Business Units: 4
- ECON 352x Macroeconomics for Business Units: 4

Technical Electives (9-12 units)

Students must take one course from the Computer Science selection and one from the Business selection and a third course from either one.

Computer Science Electives

Take at least one from the following courses:

- CSCI 360 Introduction to Artificial Intelligence Units: 4
- CSCI 430 Introduction to Computer and Network Security Units: 4
- CSCI 485 File and Database Management Units: 4

Business Electives

Take at least one from the following courses:

- BAEP 452 Feasibility Analysis Units: 4
- BAEP 453 Venture Management Units: 4
- BAEP 455 Founder's Dilemmas Units: 4
- BUAD 301 Technology Entrepreneurship Units: 3
- DSO 424 Business Forecasting Units: 4
- DSO 428 Essentials and Digital Frontiers of Big Data Units: 4
- DSO 431 Digital Innovation as Competitive Advantage Units: 4
- DSO 433 Designing Digital Processes and User Experiences Units: 4
- DSO 435 Enterprise Data Architecture Units: 4
- DSO 443 Current Trends in Digital Business Models Units: 4
- DSO 455 Project Management Units: 4
- DSO 462 Managing a Small Business on the Internet Units: 2
- FBE 423 Introduction to Venture Capital and Private Equity Units: 4
- FBE 437 Entrepreneurial Finance: Financial Management for Developing Firms Units: 4
- FBE 458 Law of Forming, Financing and Managing Businesses Units: 4
- MKT 425 Marketing in a Digital World Units: 4
- MKT 445 New Product Development and Branding Units: 4
- MOR 462 Management Consulting Units: 4

Total units: 128-131

*WRIT 340 Advanced Writing (Communication for Engineers) is strongly recommended for CSBA majors.
**Satisfies GE requirement.

Minor

Computer Science Minor

The computer science minor introduces the concepts, tools and techniques that are involved in the programming of computers. The minor prepares students to achieve mastery in several current programming languages. In addition, the student will learn about creating effective user interfaces and how to build applications that are available on the Internet.

Admission to the minor requires a B grade or higher in CSCI 102L, CSCI 103L and CSCI 170. Students who meet these criteria may contact the Computer Science department to request admission to the minor.

Required Courses (18 units)

CSCI 102 is a preparatory requirement. Students with programming experience may request to take a placement exam to waive this requirement.

- CSCI 102L Fundamentals of Computation Units: 2
- CSCI 103L Introduction to Programming Units: 4
- CSCI 104L Data Structures and Object Oriented Design Units: 4
- CSCI 170 Discrete Methods in Computer Science Units: 4
- CSCI 201L Principles of Software Development Units: 4 or
- CSCI 270 Introduction to Algorithms and Theory of Computing Units: 4

Technical Electives (12 units)

12 units of upper-division courses selected from the following list:

- CSCI 310 Software Engineering Units: 4
- CSCI 350 Introduction to Operating Systems Units: 4
- CSCI 353 Introduction to Internetworking Units: 4
- CSCI 356 Introduction to Computer Systems Units: 4
- CSCI 360 Introduction to Artificial Intelligence Units: 4
- CSCI 401 Capstone: Design and Construction of Large Software Systems Units: 4
- CSCI 404 Capstone: Creating Your High-Tech Startup Units: 4
- CSCI 420 Computer Graphics Units: 4
- CSCI 430 Introduction to Computer and Network Security Units: 4
- CSCI 445L Introduction to Robotics Units: 4
- CSCI 467 Introduction to Machine Learning Units: 4
- CSCI 476 Cryptography: Secure Communication and Computation Units: 4
- CSCI 485 File and Database Management Units: 4
- CSCI 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8
- CSCI 499 Special Topics Units: 2, 3, 4

Total units: 30

Note:

- Students interested in a progressive or traditional master's degree in Computer Science must take CSCI 201L, CSCI 270, CSCI 356 and CSCI 350 as preparation.
- Students with interests in business applications should consider CSCI 310, CSCI 401 or CSCI 485.
- Students with interest in AI/Robotics should consider CSCI 360, CSCI 420 or CSCI 445L.
- Students with interest in networking and security should consider CSCI 353, CSCI 430 or CSCI 476.
- Additional elective options may be available with adviser approval.

Joint Degree

Computer Science Dual Degree with Tsinghua University School of Information Science and Technology (MS)

The Master of Science in Computer Science Dual Degree with Tsinghua University School of Information Science and Technology – China (THU) leads to two Master of Science degrees in Computer Science, one from each institution. The dual degrees are subject to the following stipulations:

1. All required courses for each degree are required for the dual degree.
2. The program description for the Tsinghua University Master of Science in Computer Science and Technology is online at http://www.tsinghua.edu.cn/publish/csen/4906/index.html.
3. The general requirements for the MS in Computer Science at USC in this dual degree program are the same as those for the USC general MS in Computer Science without a thesis, except that at least 19 units (of the minimum total of 28) must be completed at USC, and 9 units of pre-approved course work transferred from THU may be counted toward the degree requirements at USC. This is due to:
   - a special partnership in this area established by a Memorandum of Understanding at the University level to amplify cooperation between USC and THU and between the United States and China in an intellectual and economic arena of great importance to both, where many shared interests exist;
   - the similarity of the USC and THU curricula, which allows expanded course substitution due to interchangeable content;
   - the desirability of providing students with a wider array of relevant courses than they can get at either institution;
   - the opportunity to provide students a unique transcultural experience that will position them to be global leaders in their field.
4. The two MS degrees must be earned at the same time, generally at the end of two and one-half to three years of study. The THU degree requirements must be completed for students to receive the USC MS in Computer Science as part of the dual degree program.
5. Students who elect to receive only the USC degree must change their degree objective from the USCTsinghua University dual degree to a different MS degree objective in Computer Science. In this case they will be allowed to transfer only the standard 4 adviser-approved units from Tsinghua University toward the USC degree.
6. The following required courses must generally be taken at USC: CSCI 570 and one course from each of the following two categories: I. CSCI 551, CSCI 555, CSCI 571, CSCI 577a, CSCI 585, EE 557; II. CSCI 545, CSCI 561, CSCI 564, CSCI 574, CSCI 580, CSCI 582. There must be justification for the omission of a required course in either degree, for example a certain course in one degree may provide comparable content to the omitted course in the other degree.
7. The USC Computer Science Department has identified a list of transferrable THU courses that can be considered USC equivalents but is also willing to entertain transfer, on a case by case basis, of unique THU CSCI courses for which no obvious mapping to a USC CSCI course exists.
8. Courses taken at Tsinghua University by students sent from USC will be taught in English.
9. Other requirements for the Master of Science in Computer Science are the same as set forth in the general requirements for Viterbi School of Engineering Master of Science degrees.

Master's Degree

Computer Science (Artificial Intelligence) (MS)

This program will provide students with rigorous training with theories and applications of deep learning and artificial intelligence, such as machine learning, statistics, computer vision, natural language processing, and robotics.

Grade point average requirements are the same as for the Master of Science Computer Science degree.

In addition to the general requirements of the Viterbi School of Engineering, the Master of Science in Artificial Intelligence is also subject to the following requirements.

A minimum of 32 units, selected from the courses below, is required. Units to be transferred (maximum 4 with adviser approval) must have been taken prior to taking classes at USC – interruption of residency is not allowed. Curricular Practical Training units do not count toward the 32 required units.

For Admission Requirements, refer to Viterbi Graduate Degrees and Requirements.

Required Courses

- CSCI 561 Foundations of Artificial Intelligence Units: 4
- CSCI 566 Deep Learning and Its Applications Units: 4
- CSCI 567 Machine Learning Units: 4
- CSCI 570 Analysis of Algorithms Units: 4
- CSCI 571 Web Technologies Units: 4

Group Electives

Take three courses with a minimum of one course from each group:

Group 1 - Machine Learning and Deep Learning

- EE 546 Mathematics of High-Dimensional Data Units: 4
- EE 588 Optimization for the Information and Data Sciences Units: 4
- ISE 633 Large Scale Optimization and Machine Learning Units: 3

Group 2 - Natural Language Processing and Speech Recognition

- CSCI 544 Applied Natural Language Processing Units: 4
- CSCI 662 Advanced Natural Language Processing Units: 4
- EE 519 Speech Recognition and Processing for Multimedia Units: 3

Group 3 - Computer Vision and Robotics

- CSCI 445L Introduction to Robotics Units: 4
- CSCI 545 Robotics Units: 4
- CSCI 677 Advanced Computer Vision Units: 4
- EE 569 Introduction to Digital Image Processing Units: 4

Note:

Students may use units of CSCI 599 or CSCI 699 toward the elective group requirements with department approval.

Computer Science (Computer Networks) (MS)

The Department of Computer Science offers a Master of Science in Computer Science as well as multiple emphases within the discipline.

Students must satisfy all requirements for the Master of Science degree in Computer Science. Applicants to this program must meet the admissions standards of the Viterbi School of Engineering.

Core Requirement (4 units):

- CSCI 570 Analysis of Algorithms Units: 4

Emphasis Requirements (12 units):

- CSCI 551 Computer Networking Units: 4 *
- CSCI 555L Advanced Operating Systems Units: 4 *
- EE 450 Introduction to Computer Networks Units: 4

Emphasis Electives (16 units):

- CSCI 530 Security Systems Units: 4
- CSCI 531 Applied Cryptography Units: 4
- CSCI 556 Introduction to Cryptography Units: 4
- CSCI 558L Internetworking and Distributed Systems Laboratory Units: 3 *
- CSCI 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 **
- CSCI 591 Computer Science Research Colloquium Units: 1 **
- CSCI 599 Special Topics Units: 2, 3, 4
- EE 532 Wireless Internet and Pervasive Computing Units: 3
- EE 550 Data Networks: Design and Analysis Units: 4
- EE 555 Broadband Network Architectures Units: 3
- EE 558 Optical Fiber Communication Systems Units: 3
- Non-Computer Science Course from the approved list
- 600-level CSCI Course (adviser approval required)
- Additional 500-level CSCI course

Total Units: 32

Note:

*CSCI 402 is a prerequisite for CSCI 551, CSCI 555 and CSCI 558. CSCI 402 is automatically waived for graduate computer science students.

**A maximum of 2 units of CSCI 590 and a maximum of 2 units of CSCI 591 may be applied.

Computer Science (Computer Security) (MS)

The Department of Computer Science offers a Master of Science in Computer Science as well as multiple emphases within the discipline.

Students must satisfy all requirements for the Master of Science degree in Computer Science. Applicants to this program must meet the admissions standards of the Viterbi School of Engineering.

Core Requirement (4 units)

- CSCI 570 Analysis of Algorithms Units: 4

Emphasis Requirements (20 units)

- CSCI 530 Security Systems Units: 4
- CSCI 531 Applied Cryptography Units: 4
- CSCI 551 Computer Networking Units: 4
- CSCI 555L Advanced Operating Systems Units: 4

Emphasis Elective

Complete 4 units from the following courses:

- CSCI 556 Introduction to Cryptography Units: 4
- CSCI 577a Software Engineering Units: 4
- CSCI 578 Software Architectures Units: 4

Complete 8 units from the following:

- CSCI 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- CSCI 591 Computer Science Research Colloquium Units: 1
- Non-Computer Science course from the approved list
- 600-level CSCI course (adviser approval required)
- Additional 500-level CSCI course

Note:

A maximum of 2 units of CSCI 590 and a maximum of 2 units of CSCI 591 may be applied.

Thesis courses (CSCI 594a, CSCI 594b, CSCI 594z) and internship courses (ENGR 596, ENGR 597x, ENGR 598) are not eligible for elective credit.

Total units: 32

Computer Science (Data Science) (MS)

The Master of Science in Computer Science (Data Science) provides students with a core background in computer science and specialized algorithmic, statistical and systems expertise in acquiring, storing, accessing, analyzing and visualizing large, heterogeneous and real-time data associated with diverse real-world domains including energy, the environment, health, media, medicine and transportation.

Core and Emphasis Requirements

- CSCI 561 Foundations of Artificial Intelligence Units: 4
- CSCI 570 Analysis of Algorithms Units: 4
- CSCI 585 Database Systems Units: 4

Emphasis Electives

Three courses with a minimum of one course from each group.

Group 1 (Data Systems):

- CSCI 548 Information Integration on the Web Units: 4
- CSCI 572 Information Retrieval and Web Search Engines Units: 4
- CSCI 586 Database Systems Interoperability Units: 4
- CSCI 587 Geospatial Information Management Units: 4
- CSCI 653 High Performance Computing and Simulations Units: 4
- CSCI 685 Advanced Topics in Database Systems Units: 4
- DSCI 551 Foundations of Data Management Units: 4

Group 2 (Data Analysis):

- CSCI 567 Machine Learning Units: 4
- CSCI 573 Probabilistic Reasoning Units: 3
- CSCI 686 Advanced Big Data Analytics Units: 4
- DSCI 553 Foundations and Applications of Data Mining Units: 4
- ISE 520 Optimization Theory and Algorithms: Numerical Optimization Units: 3
- MATH 467 Theory and Computational Methods for Optimization Units: 4
- MATH 574 Applied Matrix Analysis Units: 3

Additional Electives

Any 500- or 600-level course in CSCI (including additional group electives or special topics)*

- CSCI 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- CSCI 591 Computer Science Research Colloquium Units: 1
- DSCI 554 Data Visualization Units: 4
- DSCI 558 Building Knowledge Graphs Units: 4
- MATH 458 Numerical Methods Units: 4
- MATH 501 Numerical Analysis and Computation Units: 3
- MATH 502a Numerical Analysis Units: 3
- MATH 502b Numerical Analysis Units: 3
- MATH 505a Applied Probability Units: 3
- MATH 601 Optimization Theory and Techniques Units: 3
- MATH 650 Seminar in Statistical Consulting Units: 3

Total units required for the degree is 32

*Note: No more than 4 units may be taken at the 400-level, and maximum of 2 units of CSCI 590 and a maximum of 2 units of CSCI 591 may be applied. A maximum of 3 DSCI courses can be taken toward the degree.

Computer Science (Game Development) (MS)

Students graduating from this program will be capable of engineering next generation games and simulations and their required technologies immediately upon graduation in the entertainment and serious game fields. Additionally, graduates from this program will be able to further their education in graduate programs in game development and computer science. The long-term goal with this MS degree is to establish research and development directions that create a science of games and an accompanying archival literature that improves game development for both serious and entertainment purposes.

Students must satisfy all requirements for the Master of Science degree in Computer Science. Applicants to this program must meet the admissions standards of the Viterbi School of Engineering.

Core Requirement (4 units):

- CSCI 570 Analysis of Algorithms Units: 4

Emphasis Requirements (22 units):

- CSCI 561 Foundations of Artificial Intelligence Units: 4
- CSCI 580 3-D Graphics and Rendering Units: 4

Cinema Courses

- CTIN 488 Game Design Workshop Units: 4
- CTIN 532L Interactive Design and Production I Units: 4

Project Courses

- CSCI 529a Advanced Game Projects Units: 4
- CSCI 529b Advanced Game Projects Units: 2

Emphasis Electives (6 units):

Complete 6 units from the following:

- CSCI 520 Computer Animation and Simulation Units: 4
- CSCI 522 Game Engine Development Units: 4
- CSCI 526 Advanced Mobile Devices and Game Consoles Units: 4
- CSCI 538 Augmented, Virtual and Mixed Reality Units: 4
- CSCI 567 Machine Learning Units: 4
- CSCI 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 *
- CSCI 591 Computer Science Research Colloquium Units: 1 *
- CSCI 599 Special Topics Units: 2, 3, 4 **
- CTIN 503 Interactive Entertainment, Science, and Healthcare Units: 2
- CTIN 510 Research Methods for Innovation, Engagement and Assessment Units: 2
- CTIN 534L Experiments in Interactivity I Units: 4
- CTIN 544 Experiments in Interactivity II Units: 2
- CTIN 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- CTIN 593 Integrative Project: Media-based Interventions in Healthcare Units: 2, 4
- CTIN 599 Special Topics Units: 2, 3, 4

Note:

*A maximum of 2 units of CSCI 590 and a maximum of 2 units of CSCI 591 may be applied.
**Adviser approval required.

Total units: 32

Computer Science (High Performance Computing and Simulations) (MS)

The Department of Computer Science offers a Master of Science in Computer Science as well as multiple emphases within the discipline.

Students must satisfy all requirements for the Master of Science degree in Computer Science. Applicants to this program must meet the admissions standards of the Viterbi School of Engineering.

Core and Emphasis Requirements

- CSCI 570 Analysis of Algorithms Units: 4
- CSCI 596 Scientific Computing and Visualization Units: 4

Emphasis Electives

Three courses with a minimum of one course from each group.

Group 1 (Computer Science)

- CSCI 520 Computer Animation and Simulation Units: 4
- CSCI 551 Computer Networking Units: 4
- CSCI 558L Internetworking and Distributed Systems Laboratory Units: 3
- CSCI 580 3-D Graphics and Rendering Units: 4
- CSCI 599 Special Topics Units: 2, 3, 4 *
- CSCI 653 High Performance Computing and Simulations Units: 4

Group 2 (Computational Science/Engineering Application)

- AME 535a Introduction to Computational Fluid Mechanics Units: 3 or
- AME 535b Introduction to Computational Fluid Mechanics Units: 3
- CHE 502 Numerical Methods for Diffusive and Convective Transport Units: 3
- EE 553 Computational Solution of Optimization Problems Units: 3
- EE 653 Advanced Topics in Microarchitecture Units: 3
- EE 657 Parallel and Distributed Computing Units: 3
- EE 659 Interconnection Networks Units: 3
- MASC 575 Basics of Atomistic Simulation of Materials Units: 4
- MATH 501 Numerical Analysis and Computation Units: 3
- MATH 578a Computational Molecular Biology Units: 3
- PHYS 516 Methods of Computational Physics Units: 3
- PTE 582 Fluid Flow and Transport Processes in Porous Media Units: 3, 2 years

Additional Electives

Complete the remaining units from either group list above or the following:

- CSCI 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 **
- CSCI 591 Computer Science Research Colloquium Units: 1 **
- 600-level CSCI course (faculty and departmental approval required)
- 500-level CSCI course

Note:

*Special Topics must be pre-approved by an adviser.
**A maximum of 2 units of CSCI 590 and a maximum of 2 units of CSCI 591 may be applied.
Thesis courses (CSCI 594a, CSCI 594b, CSCI 594z) and Internship courses (ENGR 596, ENGR 597x, ENGR 598) are not eligible for elective credit.

Total units: Minimum 32

Computer Science (Intelligent Robotics) (MS)

The Department of Computer Science offers a Master of Science in Computer Science as well as multiple emphases within the discipline.

Students must satisfy all requirements for the Master of Science degree in Computer Science. Applicants to this program must meet the admissions standards of the Viterbi School of Engineering.

Core Requirement (4 units):

- CSCI 570 Analysis of Algorithms Units: 4

Emphasis Requirements (8 units):

- CSCI 545 Robotics Units: 4
- CSCI 561 Foundations of Artificial Intelligence Units: 4

Emphasis Electives (20 units)

Complete 20 units from the following:

- CSCI 445L Introduction to Robotics Units: 4 *
- CSCI 534 Affective Computing Units: 4
- CSCI 540 Self-Organization Units: 4
- CSCI 567 Machine Learning Units: 4
- CSCI 573 Probabilistic Reasoning Units: 3
- CSCI 599 Special Topics Units: 2, 3, 4
- CSCI 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 **
- CSCI 591 Computer Science Research Colloquium Units: 1 **
- CSCI 646 Coordinated Mobile Robotics Units: 4

- Non-Computer Science course from the approved list Units: 3-4
- 600-level CSCI course (adviser approval required) Units: 4
- Additional 500-level CSCI course Units: 4

Note:
*If CSCI 445 is selected as an elective, it must be taken before CSCI 545. Alternate Robotics/AI related courses may be substituted in the elective area.
**A maximum of 2 units of CSCI 590 and a maximum of 2 units of CSCI 591 may be applied. Internship courses (ENGR 595a, ENGR 595b, and ENGR 595z) are not eligible for elective credit.

Computer Science (MS)

The Department of Computer Science offers a Master of Science in Computer Science as well as multiple emphases within the discipline. The degree can be completed with or without a thesis.

Requirements for Graduation without a Thesis

A minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in computer science. This average must also be earned on all graduate courses completed at USC (400-level and above). Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average. Total units required for the degree is 28. No examination is required for the degree. Other requirements for the Master of Science in Computer Science are the same as set forth in the general requirements for Viterbi School of Engineering master's degrees.

Core Requirement (4 units):

- CSCI 570 Analysis of Algorithms Units: 4

Additional Course Work:

The remaining elective units necessary to earn the degree are completed by selecting additional 500-level CSCI courses.

- Note: A maximum of 2 units of CSCI 590 and a maximum of 2 units of CSCI 591 may be applied. Furthermore, up to four units may be 400-level, and up to eight units may be 600-level. Approval for enrollment in 600-level courses must come from the faculty instructor and department adviser. With adviser approval, one non-Computer Science course may be selected from the approved list. Thesis courses (CSCI 594a, CSCI 594b, CSCI 594z) and Internship courses (ENGR 595a, ENGR 595b, ENGR 595z) are not eligible for elective credit

Thesis Option:

The MS thesis option is available to highly qualified students but requires the student to find an adviser willing to supervise their research. In practice, availability of advisers is extremely limited and this option is exercised rarely.

With the approval of a supervising professor, qualified students may be allowed to pursue a thesis option. Students pursuing the thesis option must satisfy all of the policies and course requirements for the master's degree and, in addition, must enroll in a minimum of two semesters of CSCI 594a, CSCI 594b, CSCI 594z for a maximum of 4 units. Total units required for the degree with thesis is 32. The thesis must comply with all requirements set by the Graduate School. Students interested in a thesis while enrolled in a Computer Science specialization should consult with their department adviser.

Computer Science (Multimedia and Creative Technologies) (MS)

The Department of Computer Science offers a Master of Science in Computer Science as well as multiple emphases within the discipline.

For Admission Requirements, refer to USC Viterbi Graduate Degrees and Requirements.

Core Requirement (4 units):

- CSCI 570 Analysis of Algorithms Units: 4

Emphasis Requirements (16 units):

- CSCI 420 Computer Graphics Units: 4 *
- CSCI 520 Computer Animation and Simulation Units: 4 *
- CSCI 576 Multimedia Systems Design Units: 4
- CSCI 580 3-D Graphics and Rendering Units: 4 *

Emphasis Electives (12 units):

- CSCI 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 **
- CSCI 591 Computer Science Research Colloquium Units: 1 **
- Non Computer Science Course from the approved list
- 600-level CSCI Course (adviser approval required) Units: 4
- Additional 500-level CSCI course

Note:
*CSCI 420 and CSCI 580 must be taken before CSCI 520.
**A maximum of 2 units of CSCI 590 and a maximum of 2 units of CSCI 591 may be applied.

Total units: Minimum 32

Computer Science (Scientists and Engineers) (MS)

Designed for students with engineering or science bachelor's degree but limited background in computer science, this comprehensive, two-year, 37-unit program combines an introductory sequence of undergraduate preparatory and foundational course work with all the graduate breadth requirements necessary to satisfy the traditional master's degree.

Note: The preparatory programming requirement and foundational requirements must be completed at USC and cannot be transferred in or waived. Applicants to this program must meet the admissions standards of the Viterbi School of Engineering.

Preparatory Programming Requirement

- CSCI 455x Introduction to Programming Systems Design Units: 4 *

Foundational Requirements

- CSCI 402 Operating Systems Units: 4
- EE 457 Computer Systems Organization Units: 4 or
- EE 450 Introduction to Computer Networks Units: 4

Core Requirement

- CSCI 570 Analysis of Algorithms Units: 4

Emphasis Electives

Select the remaining units of approved 500- to 600-level course work from Computer Science. Recommended options include:

- CSCI 576 Multimedia Systems Design Units: 4
- CSCI 577a Software Engineering Units: 4
- CSCI 577b Software Engineering Units: 4
- CSCI 580 3-D Graphics and Rendering Units: 4
- CSCI 561 Foundations of Artificial Intelligence Units: 4
- CSCI 571 Web Technologies Units: 4
- CSCI 585 Database Systems Units: 4
- CSCI 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 **
- CSCI 591 Computer Science Research Colloquium Units: 1 **

Total program units: 37

Total degree units: 33

**CSCI 455 is a preparatory requirement for this program, but the units for this course do not count toward the 33 units required for the degree.*
***A maximum of 2 units of CSCI 590 and a maximum of 2 units of CSCI 591 may be applied. Internship courses (ENGR 595a, ENGR 595b, ENGR 595z) are not eligible for elective credit.*

Computer Science (Software Engineering) (MS)

This program seeks to prepare students for an industrial leadership career in software engineering. It also serves as an introduction to this area for students who wish to pursue advanced studies and research leading to a PhD. Students may also include research for an optional master's thesis in their programs.

Students must satisfy all requirements for the Master of Science degree in Computer Science. Applicants to this program must meet the admissions standards of the Viterbi School of Engineering.

Core Requirement (4 units):

- CSCI 570 Analysis of Algorithms Units: 4

Emphasis Requirements (16 units):

- CSCI 510 Software Management and Economics Units: 4
- CSCI 577a Software Engineering Units: 4
- CSCI 577b Software Engineering Units: 4
- CSCI 578 Software Architectures Units: 4

Emphasis Electives (12 units):

- CSCI 512 Testing and Analysis of Software Systems Units: 4
- CSCI 568 Requirements Engineering Units: 4
- CSCI 591 Computer Science Research Colloquium Units: 1
- CSCI 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- CSCI 599 Special Topics Units: 2, 3, 4
- Non-Computer Science Course from the approved list Units: 3-4
- 600-level CSCI Course with adviser approval Units: 4
- Additional 500-level CSCI course Units: 4

Note:

- A maximum of 2 units of CSCI 590 and a maximum of 2 units of CSCI 591 may be applied.
- Thesis courses (CSCI 594a, CSCI 594b, CSCI 594z) and Internship courses (ENGR 596, ENGR 597x, ENGR 598) are not eligible for elective credit.

Total units: Minimum 32

Graduate Certificate

Software Architecture Graduate Certificate

This certificate program will provide engineers with the skills required to face the increasingly complex future in architecting systems, systems of systems and software-intensive systems. Students will be exposed to the concepts, principles and state-of-the-art methods in software architectures. This program introduces principles and approaches for modeling systems using SysML; applies software engineering process models and management approaches to the design and architecture of large software systems; and guides the architect through every phase of the conception, implementation, deployment and finally retirement of software systems. It is expected that participants in the certificate program will have completed an undergraduate degree in computer science or a related field and will have several years of practical experience in software engineering and/or systems engineering. If students are later admitted to the Master of Science in Computer Science, the courses taken for the certificate may be applied to that program.

Required Courses

- CSCI 568 Requirements Engineering Units: 4
- CSCI 578 Software Architectures Units: 4
- SAE 547 Model-Based Systems Architecting and Engineering Units: 3
- SAE 549 Systems Architecting Units: 3

Electives (Choose One)

- CSCI 510 Software Management and Economics Units: 4
- CSCI 530 Security Systems Units: 4 *
- CSCI 555L Advanced Operating Systems Units: 4 *
- CSCI 577a Software Engineering Units: 4
- CSCI 577b Software Engineering Units: 4
- CSCI 589 Software Engineering for Embedded Systems Units: 4
- EE 557 Computer Systems Architecture Units: 4 **
- SAE 541 Systems Engineering Theory and Practice Units: 3

Total units: 17-18

**Prerequisite: CSCI 402*
***Prerequisite: EE 457*

Doctoral Degree

Computer Science (PhD)

The Doctor of Philosophy with a major in computer science is awarded in strict conformity with the general requirements of the USC Graduate School. See Requirements for Graduation. Departmental requirements for this degree consist of a concentrated program of study and research and a dissertation. Consult a separately published guide, available from the department office and Website, for more information concerning course requirements, the screening procedure, the teaching requirement, the qualifying examination, the thesis proposal and other requirements.

Course Requirements

Each student is required to complete two semesters of CSCI 697 (1 unit each, 2 maximum) and CSCI 670 (4 units). In addition, students are required to pass two semesters of CSCI 698 (1-2 units each, no maximum) as part of a teaching requirement.

Elective courses: In addition to the mandatory courses, each student must complete five CSCI courses at the 500 level and above, 4 units each. No more than two of these courses (8 units total) may be at the 500 level; the remaining must be CSCI courses at the 600 level. Directed Research units or thesis credits do not satisfy this requirement. Students are strongly advised to take at least one of their elective courses in an area of computer science that is different from their proposed area of research. The PhD adviser is expected to provide guidance on this matter to the student.

The CSCI 670 course requirement may be waived by examination only. Each course in the department has a faculty member who is designated as the course "owner." The owner of CSCI 670 is in charge of creating and grading the waiver examination. CSCI 697 and CSCI 698 may not be waived.

Degree Requirements

Undergraduate Program Educational Objectives

The electrical and computer engineering program objectives are designed to promote technical competence, professional development and citizenship in the global community. Graduates of the undergraduate program in electrical and computer engineering are expected to attain the following objectives within a few years of graduation:

Technical Competence

Graduates will apply their technical skills in mathematics, science and engineering to the solution of complex problems encountered in modern electrical and computer engineering practice.

Graduates will model, analyze, design and experimentally evaluate components or systems that achieve desired technical specifications subject to the reality of economic constraints.

Professional Development

Graduates will compete effectively in a world of rapid technological change and assume leadership roles within industrial, entrepreneurial, academic or governmental environments in the broad context of electrical and computer engineering.

Some graduates who choose to redirect their careers will be employed in diverse fields such as healthcare, business, law, computer science, multimedia and music through graduate-level studies and the process of lifelong learning.

Citizenship in the Global Community

Graduates will have established the foundations for critical thinking that are needed to broaden or redirect their careers in diverse disciplines such as business, health care and the arts through graduate-level studies and/or the process of life-long leaning.

Graduates will adhere to highly ethical practices, and they will make exemplary engineering decisions that balance economic, environmental and societal factors for the betterment of the global community.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Electrical and Computer Engineering provides both breadth and depth across the range of engineering topics implied by the title. The curriculum includes probability and statistics, including appropriate applications; mathematics through differential and integral calculus, and advanced mathematics, such as differential equations, linear algebra, complex variables and discrete mathematics; sciences (defined as biological, chemical or physical science); and engineering topics (including computing science) necessary to analyze and design complex electrical and electronic devices, software and systems containing hardware and software components.

Bachelor of Science in Computer Engineering and Computer Science

See the listing under Computer Science.

Master of Science in Computer Engineering

See the listing under Computer Engineering Program.

Doctor of Philosophy in Computer Engineering

See the listing under Computer Engineering Program.

Minor in Music Recording

A minor in music recording is offered through the USC Thornton School of Music to provide undergraduate students with the background necessary to enter the field of recording engineering and to familiarize them with the design needs of modern recording equipment. The minor is recommended to electrical and computer engineering majors with extensive musical training who would like to combine their technical and musical abilities while learning the engineering applications of physical and mathematical principles to the art of music recording. See the listing under the USC Thornton School of Music.

Master of Science in Electrical and Engineering (Electric Power)

See listing in the Sustainable Infrastructure Systems Program section.

Master of Science in Systems Architecting and Engineering

See the listing under Systems Architecting and Engineering Program.

Financial Engineering

Electrical and Computer Engineering Building 100

FAX: (213) 740-4449
Email: studentinfo@ee.usc.edu
Faculty Contact: Professor Petros Ioannou, ioannou@usc.edu

Second Master's Degree

A graduate student who already holds a master's degree from USC may apply up to 4 units toward a second master's degree with the permission of the chair of the major department. All credit, including the transferred units, must be earned within seven calendar years.

For students who earned their first master's degree at another institution, no course work may be repeated from the first program of study and no unit credit from the first program of study may be counted toward the second master's degree.

Engineer in Electrical Engineering

Requirements for the Engineer in Electrical Engineering are the same as those listed under Engineer degree, except that both areas of concentration must be in electrical and computer engineering.

Bachelor's Degree

Electrical and Computer Engineering (BS)

The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper-division courses applied toward the major, regardless of the department in which the courses are taken. See also the common requirements for undergraduate degrees section.

University Requirements (31 units)

Composition/Writing Requirements (7 units)

- WRIT 150 Writing and Critical Reasoning–Thematic Approaches Units: 4
- WRIT 340 Advanced Writing Units: 3, 4

General Education (24 units)

- General education Units: 24

Pre-Major Requirements (26 units)

Math Requirement (12 units)

- MATH 129 Calculus II for Engineers and Scientists Units: 4
  or
- MATH 127 Enhanced Calculus II Units: 4
  or
- MATH 126g Calculus II Units: 4 *
- MATH 229 Calculus III for Engineers and Scientists Units: 4
  or
- MATH 227 Enhanced Calculus III Units: 4
  or
- MATH 226g Calculus III Units: 4 *
- MATH 245 Mathematics of Physics and Engineering I Units: 4

Physics Requirement (12 units)

- PHYS 161Lg Advanced Principles of Physics I Units: 4 **
  or
- PHYS 171Lg Applied Physics I: Mechanics Units: 4
- PHYS 162L Advanced Principles of Physics II Units: 4
  or

Engineering (2 units)

- ENGR 102 Engineering Freshman Academy Units: 2

Major Requirements (56 units)

Electrical and Computer Engineering (40 units)

- EE 105 Introduction to Electrical Engineering Units: 4
- EE 109L Introduction to Embedded Systems Units: 4
- EE 141L Applied Linear Algebra for Engineering Units: 4
- EE 155L Introduction to Computer Programming for Electrical Engineers Units: 4
- EE 202L Linear Circuits Units: 4
- EE 250L Distributed Systems for the Internet of Things Units: 4
- EE 301L Linear Systems Units: 4
- EE 355x Software Design for Electrical Engineers Units: 4
- EE 364 Introduction to Probability and Statistics for Electrical Engineering and Computer Science Units: 4***
- EE 370 Electromagnetics for Engineering Systems Units: 4

Electrical and Computer Engineering Electives (16 units)

Students must fulfill a minimum requirement of 16 units of adviser-approved upper division elective courses in electrical engineering. Of these 16 units, 3-4 units must be selected from the following list of capstone design courses:

- EE 422x Electromagnetic Systems Design Units: 3
- EE 434Lx Digital Signal Processing Design Laboratory Units: 4
- EE 447Lx Mixed Signal Electronic Circuits Units: 4
- EE 459Lx Embedded Systems Design Laboratory Units: 4
- EE 484x Communication System Design Units: 3
- EE 492a Undergraduate Project Units: 2
- EE 492b Undergraduate Project Units: 2
- EE 494a Undergraduate Thesis Units: 2
- EE 494b Undergraduate Thesis Units: 2
- EE 496 Capstone Design Units: 4
  †Students may use EE 492a and EE 492b Undergraduate Project 2+2 units or EE 494a and EE 494b Undergraduate Thesis 2+2 units to satisfy the capstone design requirement.

Free Electives (15 units)

Free elective courses are used to complete the university minimum 128-unit requirement. Students are encouraged to investigate minor options when satisfying this requirement.

Total units: 128

*MATH 129 and MATH 229 is the preferred calculus sequence for electrical engineering students. Students advised to begin with MATH 125 as a prerequisite to MATH 129 have 4 fewer units of free electives in their programs.
**PHYS 171Lg, PHYS 172L, and PHYS 173L is the preferred sequence for electrical engineering students.
***Students enrolled in the progressive degree program may take EE 503 (4) to satisfy this requirement.

Minor

Internet of Things Engineering Minor

The Internet of Things Engineering minor introduces the concepts, tools and techniques that are involved in designing and programming electronic devices that involve sensing, computation, and communication. The minor prepares students to understand the design tradeoffs present in aggregating and processing information generated by these networked devices either locally or in the cloud. Students completing this minor will be ready to effectively compete in industries related to embedded and networked systems and IoT technologies.

Required Courses (20 units)

- CSCI 430 Introduction to Computer and Network Security Units: 4
- EE 109L Introduction to Embedded Systems Units: 4 *
- EE 250L Distributed Systems for the Internet of Things Units: 4
- EE 453 Computing Platforms and Paradigms Units: 4
- EE 355x Software Design for Electrical Engineers Units: 4 *
  or
- CSCI 201L Principles of Software Development Units: 4

Take at least one course from below (3-4 units)

- EE 450 Introduction to Computer Networks Units: 4
- EE 451 Parallel and Distributed Computation Units: 4

Note:

** The Department of Electrical Engineering will accept introductory programming courses from other departments as the prerequisite or corequisites to EE 109 and EE 355.*

Master's Degree

Applied Physics (MS)

The MS degree in Applied Physics is directed toward students with interests in engineering physical systems for which acquisition and interpretation of information requires an understanding of underlying physical models, measurement techniques and disruptive factors such as noise, turbulence, and unwanted signals. Examples include RF electromagnetic or acoustic detection of objects or resources, photonic sources and detection and applications that involve the mechanics of solid and fluid media.

Required Analytical Courses

- AME 508 Machine Learning and Computational Physics Units: 4
- EE 604 Computational Methods in Applied Physics Units: 4

Topical Areas

Take at least **two core courses** (8 units) from the topical areas below, and take **three elective courses** (12 units) that follow the core courses chosen. Other courses may be substituted for listed electives subject to the approval of the program adviser.

A thesis (AME 594a, AME 594b or EE 594a, EE 594b) can substitute for 4 elective units.

Students may also take up to two units of directed research (AME 590 or EE 590) to fulfill the 28-unit degree requirement.

Electromagnetic Wave Propagation and Scattering

- EE 570a Advanced Electromagnetic Theory Units: 4

Elective courses:

- EE 551 Principles of Radar Units: 3
- EE 570b Advanced Electromagnetic Theory Units: 4
- EE 571 Wave Interactions with Random and Inhomogeneous Media Units: 4
- EE 573a Antenna Systems Engineering Units: 3
- EE 573b Antenna Systems Engineering Units: 4
- EE 578 Computational Electromagnetics for Engineers Units: 4

Optics and Photonics

- EE 530 Optical Materials, Instruments and Devices Units: 4

Elective courses:

- EE 529 Optics Units: 4
- EE 531 Nonlinear Optics Units: 4
- EE 539 Engineering Quantum Mechanics Units: 4
- EE 540 Introduction to Quantum Electronics Units: 4
- EE 566 Optical Information Processing Units: 3

Mechanics of Fluid and Solid Media

- AME 506 Continuum Mechanics Units: 4 or
- AME 509 Applied Elasticity Units: 4

Electives courses:

- AME 511 Compressible Gas Dynamics Units: 4
- AME 513a Fundamentals and Applications of Combustion Units: 4
- AME 513b Fundamentals and Applications of Combustion Units: 4
- AME 515 Advanced Heat and Mass Diffusion Units: 4
- AME 521 Engineering Vibrations II Units: 4
- AME 530a Dynamics of Incompressible Fluids Units: 4
- AME 530b Dynamics of Incompressible Fluids Units: 4
- AME 630 Transition to Chaos in Dynamical Systems Units: 3

Electrical and Computer Engineering (Analog, Mixed-Signal and Radio-frequency Integrated Circuits) (MS)

The Master of Science in Electrical and Computer Engineering (AMSRFIC) features a comprehensive set of courses related to in analog, mixed-signal, and radiofrequency integrated circuits with a wide range of applications in wireless and wired communications, autonomous systems, machine learning and artificial intelligence, medical electronics, biomedical implants, controls, sensing, and imaging.

Course Requirement: At least seven courses (a minimum of 28 units) must be taken from the following list (combination of core courses and elective courses). At least four courses must be taken from the list of core courses, with the remainder from the list of elective courses or (with program adviser approval) from the list of core courses or directed research (EE 590).

Core Requirements

- EE 505 Analog, Mixed-Signal, and RF Integrated-Circuit Tape-Out Units: 4
- EE 536a Analog Integrated Circuits Units: 4
- EE 536b Analog Integrated Circuits Units: 4
- EE 631 Mixed-Signal Integrated Circuits Units: 4
- EE 632a Integrated Communication Systems Units: 4
- EE 632b Integrated Communication Systems Units: 4

Elective Courses

- EE 537 Modern Solid-State Devices Units: 4
- EE 576 Integrated Memory Devices and Technologies Units: 4
- EE 577a VLSI System Design Units: 4
- EE 577b VLSI System Design Units: 2

Electrical and Computer Engineering (Machine Learning and Data Science) (MS)

In addition to the general requirements of the Viterbi School of Engineering, the Master of Science in Electrical and Computer Engineering with an emphasis in Machine Learning and Data Science is also subject to the following requirements.

A minimum of 32 units, selected from the courses below, is required. At least 22 units must be taken in electrical engineering. Units to be transferred (maximum 4 with adviser approval) must have been taken prior to taking classes at USC – interruption of residency is not allowed. Curricular Practical Training units do not count toward the 32 required units.

For Admission Requirements, refer to USC Viterbi School of Engineering.

Required Foundational Proficiency

0-6 units required. Each of these must either be taken and used as a technical elective, or the respective proficiency test (digital signal processing, software) must be passed:

- EE 483 Introduction to Digital Signal Processing Units: 4
- EE 538 Computing Principles for Electrical Engineers Units: 2

Foundations

All courses are required (16 units)

- EE 503 Probability for Electrical and Computer Engineers Units: 4
- EE 510 Linear Algebra for Engineering Units: 4
- EE 541 A Computational Introduction to Deep Learning Units: 2
- EE 547 Applied and Cloud Computing for Electrical Engineers Units: 2
- EE 559 Machine Learning I: Supervised Methods Units: 4

Learning and Data Analytics

Two courses are required from this list (6-8 units).

- EE 546 Mathematics of High-Dimensional Data Units: 4
- EE 556 Stochastic Systems and Reinforcement Learning Units: 4
- EE 588 Optimization for the Information and Data Sciences Units: 4
- EE 641 Deep Learning Systems Units: 2
- EE 660 Machine Learning II: Mathematical Foundations and Methods Units: 4

Technical Electives

Take the remaining units from the following lists or from the Learning and Data Analytics list. Courses may not apply to more than one degree requirement.

Theory and Methods

- CSCI 570 Analysis of Algorithms Units: 4
- CSCI 585 Database Systems Units: 4
- EE 517 Statistics and Data Analysis for Engineers Units: 4
- EE 542 Internet and Cloud Computing Units: 3
- EE 561 Foundations of Artificial Intelligence Units: 3
- EE 562 Random Processes in Engineering Units: 4
- EE 563 Estimation Theory Units: 3
- EE 564 Digital Communication and Coding Systems Units: 4
- EE 565 Information Theory and Its Application to (Big) Data Sciences Units: 4
- EE 575 Computational Differential Geometry for Engineers Units: 3
- EE 586L Advanced DSP Design Laboratory Units: 4
- EE 592 Computational Methods for Inverse Problems Units: 4
- EE 689 Computational Intelligence and Neural Learning Units: 4
- ISE 538 Performance Analysis Using Markov Models Units: 3
- MATH 541a Introduction to Mathematical Statistics Units: 3

Applications

- CSCI 544 Applied Natural Language Processing Units: 4
- CSCI 677 Advanced Computer Vision Units: 4

- EE 519 Speech Recognition and Processing for Multimedia Units: 3
- EE 569 Introduction to Digital Image Processing Units: 4
- EE 619 Advanced Topics in Automatic Speech Recognition Units: 3
- EE 669 Multimedia Data Compression Units: 3

Research

A maximum of 4 units of Directed Research or Thesis may be counted toward the Technical Electives area.

- EE 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- EE 594a Master's Thesis Units: 2
- EE 594b Master's Thesis Units: 2
- EE 594z Master's Thesis Units: 0

Minimum Units: 32

Electrical Engineering (Computer Architecture) (MS)

The Master of Science in Electrical Engineering (Computer Architecture) is earned by successfully completing the normal requirements for the Master of Science in Electrical Engineering, with the following additional requirements: a minimum of 18 units from the Computer Architecture area are required. A breadth requirement of at least one course from Networks and at least one course from VLSI/CAD areas is required. Additionally, with adviser approval, EE 590 Directed Research under the guidance of a Computer Architecture faculty (maximum 4 units) and/or Special Topics EE 599 (maximum 4 units) may also count toward the 18 units required in the Computer Architecture area.

No more than three courses (maximum 12 units) may be counted at the 400 level.

The remaining course work to complete the degree may come from any of the three computer engineering areas.

Computer Architecture

Take at least 18 units from Computer Architecture

- EE 451 Parallel and Distributed Computation Units: 4
- EE 454L Introduction to System-on-Chip Units: 4
- EE 457 Computer Systems Organization Units: 4
- EE 532 Wireless Internet and Pervasive Computing Units: 3
- EE 533 Network Processor Design and Programming Units: 3
- EE 542 Internet and Cloud Computing Units: 3
- EE 557 Computer Systems Architecture Units: 4
- EE 554 Cyber-Physical Systems: A Computing Perspective Units: 4
- EE 560L Digital System Design Units: 4
- EE 653 Advanced Topics in Microarchitecture Units: 3
- EE 657 Parallel and Distributed Computing Units: 3
- EE 659 Interconnection Networks Units: 3
- EE 677 VLSI Architectures and Algorithms Units: 3

Networks

Take at least one course from Networks

- EE 450 Introduction to Computer Networks Units: 4
- EE 467 Introduction to Communication Systems Units: 3
- EE 533 Network Processor Design and Programming Units: 3
- EE 550 Data Networks: Design and Analysis Units: 4
- EE 555 Broadband Network Architectures Units: 3
- EE 560L Digital System Design Units: 4
- EE 597 Wireless Networks Units: 4
- EE 650 Advanced Topics in Computer Networks Units: 3
- EE 652 Low-Power Wireless Networks Units: 3

VLSI/CAD

Take at least one course from VLSI/CAD

- EE 477L MOS VLSI Circuit Design Units: 4
- EE 536a Analog Integrated Circuits Units: 4
- EE 536b Analog Integrated Circuits Units: 4
- EE 537 Modern Solid-State Devices Units: 4
- EE 552 Asynchronous VLSI Design Units: 4
- EE 560L Digital System Design Units: 4
- EE 577a VLSI System Design Units: 4
- EE 577b VLSI System Design Units: 2
- EE 581 Mathematical Foundations for System Design: Modeling, Analysis, and Synthesis Units: 4
- EE 677 VLSI Architectures and Algorithms Units: 3
- EE 680 Computer-Aided Design of Digital Systems I Units: 3
- EE 681 Computer-Aided Design of Digital Systems II Units: 3
- EE 580 System Verification Units: 4
- EE 582 CMOS: Nano Neuromorphic Circuits Units: 4

Electrical Engineering (Computer Networks) (MS)

Under the computer networks option students must satisfy the MS, Electrical Engineering requirements with the exception that only 15 units of EE are required.

Fundamental Courses

It is expected that each student in this program will take or have taken the equivalent of three of the four following fundamental courses:

- CSCI 402 Operating Systems Units: 4
- EE 450 Introduction to Computer Networks Units: 4
- EE 457 Computer Systems Organization Units: 4
- EE 503 Probability for Electrical and Computer Engineers Units: 4

Note:

With the exception of EE 503, the fundamental courses may also be satisfied by having passed EE placement exams.

Three of the following courses are required:

- CSCI 551 Computer Networking Units: 4
- EE 550 Data Networks: Design and Analysis Units: 4
- EE 555 Broadband Network Architectures Units: 3
- EE 597 Wireless Networks Units: 4

Note:

If a fourth required course is taken it can be counted toward elective credit.

Suggested elective courses include:

- CSCI 530 Security Systems Units: 4
- CSCI 555L Advanced Operating Systems Units: 4
- CSCI 558L Internetworking and Distributed Systems Laboratory Units: 3
- CSCI 570 Analysis of Algorithms Units: 4
- EE 512 Stochastic Processes Units: 3
- EE 532 Wireless Internet and Pervasive Computing Units: 3
- EE 535 Wireless Communications Units: 4
- EE 554 Cyber-Physical Systems: A Computing Perspective Units: 4
- EE 557 Computer Systems Architecture Units: 4
- EE 558 Optical Fiber Communication Systems Units: 3
- EE 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- EE 649 Stochastic Network Optimization Units: 3
- EE 650 Advanced Topics in Computer Networks Units: 3
- EE 652 Low-Power Wireless Networks Units: 3
- EE 659 Interconnection Networks Units: 3

Note:

Any other course must be approved by a faculty adviser.

Total units required for the degree: 27

Electrical Engineering (MS)

A minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in electrical engineering. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor's degree and through an accumulation of no more than 12 units beyond the minimum needed for the specific degree program. Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average.

In addition to the general requirements of the Viterbi School of Engineering, the Master of Science in Electrical Engineering is also subject to the following requirements: (1) a total of at least 28 units is required; (2) every non-EE course for graduate credit requires prior written adviser approval recorded each semester on a special request form in the student's department file; (3) no more than three courses (maximum 12 units) may be counted at the 400-level - at least 19 adviser-approved units must be taken at the 500- or 600-level; (4) at least 20 units must be taken in electrical engineering, those not in EE require written adviser approval and must be technical in nature; (5) a maximum of eight units of EE 599 Special Topics courses may be counted toward the MSEE; (6) at most, 4 units of EE 590 (Directed Research) and 1 unit of seminar, EE 598 (or other seminar with adviser approval), may be counted toward the MSEE; (7) units to be transferred (maximum 4 with adviser approval) must have been taken prior to taking classes at USC - interruption of residency is not allowed. Curricular Practical Training units do not count toward the 28 required units in the MSEE program.

Students following the MS Thesis Option must have at least 16 units at the 500 level and take EE 594a and EE 594b. A maximum of 2 units for EE 590 may be counted in conjunction with EE 594a and EE 594b registrations.

Aerospace Controls Option

The aerospace controls option is available as an area of emphasis for MSEE students interested in learning to apply innovative control techniques to aerospace control problems. In addition to 20 approved units of electrical engineering courses, students in this option will take at least two of the following aerospace and mechanical engineering courses:

- AME 453 Engineering Dynamics Units: 3
- AME 532a Flight Vehicle Stability and Control Units: 3
- AME 532b Flight Vehicle Stability and Control Units: 3
- AME 525 Engineering Analysis Units: 4
- AME 526 Introduction to Mathematical Methods in Engineering II Units: 4
- ASTE 580 Orbital Mechanics I Units: 3

Electrical Engineering (VLSI Design) (MS)

The Master of Science in Electrical Engineering (VLSI design) is earned by successfully completing the normal requirements for the Master of Science in electrical engineering, with the following additional required courses: EE 479 or EE 536a; EE 577a; EE 577b or EE 536b; and EE 552. If a student chooses to take the first of the OR courses, the other course may be counted in the VLSI/CAD, Circuits and Devices and Computer Systems areas as indicated, below.

For Admission Requirements, refer to Viterbi Graduate Degrees and Requirements.

No more than three courses (maximum 12 units) may be counted at the 400 level — at least 18 adviser-approved units must be taken at the 500 or 600 level.

The students must also take two courses from one of the following areas and one course from a second area:

VLSI/CAD Area

- CSCI 455x Introduction to Programming Systems Design Units: 4
- EE 560L Digital System Design Units: 4
- EE 580 System Verification Units: 4
- EE 581 Mathematical Foundations for System Design: Modeling, Analysis, and Synthesis Units: 4
- EE 658 Diagnosis and Design of Reliable Digital Systems Units: 3
- EE 680 Computer-Aided Design of Digital Systems I Units: 3
- EE 681 Computer-Aided Design of Digital Systems II Units: 3

Circuits and Devices Area

- EE 448L Communication Electronics Units: 4
- EE 504L Solid-State Processing and Integrated Circuits Laboratory Units: 4
- EE 505 Analog, Mixed-Signal, and RF Integrated-Circuit Tape-Out Units: 4
- EE 536a Analog Integrated Circuits Units: 4
- EE 536b Analog Integrated Circuits Units: 4
- EE 582 CMOS:Nano Neuromorphic Circuits Units: 4
- EE 537 Modern Solid-State Devices Units: 4
- EE 632 Integrated Communication Systems Units: 4

Computer Systems Area

- CSCI 455x Introduction to Programming Systems Design Units: 4
- CSCI 570 Analysis of Algorithms Units: 4
- EE 557 Computer Systems Architecture Units: 4
- EE 560L Digital System Design Units: 4
- EE 577b VLSI System Design Units: 2
- EE 580 System Verification Units: 4
- EE 659 Interconnection Networks Units: 3
- EE 677 VLSI Architectures and Algorithms Units: 3

Note:

With explicit approval of a faculty adviser, EE 599 Special Topics and/or 3 units of EE 590 Directed Research may be used to meet requirements for any of the approved areas.

The remaining courses must be technical electives approved by the adviser, and can including the following:

- EE 457 Computer Systems Organization Units: 4
- EE 477L MOS VLSI Circuit Design Units: 4
- EE 479 Analog Integrated Circuit Design Units: 4
- EE 501 Solid State Units: 4
- EE 502 Advanced Solid State Units: 3
- EE 504L Solid-State Processing and Integrated Circuits Laboratory Units: 4
- EE 506 Semiconductor Physics Units: 4
- EE 540 Introduction to Quantum Electronics Units: 4
- EE 554 Cyber-Physical Systems: A Computing Perspective Units: 4
- EE 560L Digital System Design Units: 4
- EE 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- EE 601 Advanced Semiconductor Device Physics Units: 4
- EE 677 VLSI Architectures and Algorithms Units: 3

Electrical Engineering (Wireless Health Technology) (MS)

The Master of Science in Electrical Engineering (Wireless Health Technology) reflects a partnership between the Viterbi School of Engineering, the Keck School of Medicine, and other institutions engaged in health care research. The program of study features targeted engineering courses, a rigorous exposure to general medicine, and relevant internship practice (a total of 29-32 units). Units to be transferred (maximum 4 with adviser approval) must have been taken prior to taking classes at USC - interruption of residency is not allowed.

Required Courses (20 Units)

- EE 450 Introduction to Computer Networks Units: 4
- EE 579 Wireless and Mobile Networks Design and Laboratory Units: 3
- MEDS 530a Foundation of Medicine: Anatomy, Physiology, and Pathology Units: 4
- MEDS 530b Foundation of Medicine: Anatomy, Physiology, and Pathology Units: 4
- MEDS 530c Foundation of Medicine: Anatomy, Physiology, and Pathology Units: 4
- MEDS 597a Health Technology Internship Units: 1
- MEDS 597b Health Technology Internship Units: 1

Take three electives from the following list (9-12 units)

- CSCI 545 Robotics Units: 4
- CSCI 561 Foundations of Artificial Intelligence Units: 4

- EE 503 Probability for Electrical and Computer Engineers Units: 4
- EE 519 Speech Recognition and Processing for Multimedia Units: 3
- EE 535 Wireless Communications Units: 4
- EE 550 Data Networks: Design and Analysis Units: 4
- EE 559 Machine Learning I: Supervised Methods Units: 4
- EE 564 Digital Communication and Coding Systems Units: 4
- EE 567 Communication Systems Units: 3
- MEDS 500 Basic Concepts in Global Health Units: 4
- MEDS 501 Critical Issues in Global Health Units: 4

Total units: 29-32

Students are expected to have a background in linear algebra equivalent to EE 441 and experience with a programming language such as C or C++. Admitted students who do not meet prerequisites by placement examination will be assigned courses to complete the deficiencies.

Electrical Engineering (Wireless Networks) (MS)

The Master of Science in Electrical Engineering (Wireless Networks) is a unique interdisciplinary degree program that prepares graduates for the design and improvement of future wireless networks such as the "Internet of Things." The program combines courses related to radio hardware, transmission techniques, the medium-access control layer, networking, applications and standards.

No more than three courses (maximum 12 units) may be counted at the 400 level — at least 18 adviser-approved units must be taken at the 500 or 600 level. Units to be transferred (maximum 4 with adviser approval) must have been taken prior to taking classes at USC — interruption of residency is not allowed.

For Admission Requirements, refer to USC Viterbi School of Engineering.

The Master of Science in Electrical Engineering (Wireless Networks) requires at least 28 units.

Required Courses (16 Units)

- CSCI 402 Operating Systems Units: 4
- EE 503 Probability for Electrical and Computer Engineers Units: 4
- EE 535 Wireless Communications Units: 4
- EE 597 Wireless Networks Units: 4

Elective Courses (12-14 Units, at Least One Course from Two Areas)

Transmission Techniques and Signal Processing

- EE 483 Introduction to Digital Signal Processing Units: 4
- EE 558 Optical Fiber Communication Systems Units: 3
- EE 564 Digital Communication and Coding Systems Units: 4
- EE 583 Statistical Signal Processing Units: 3
- EE 586L Advanced DSP Design Laboratory Units: 4

Architectures, Protocols, and Applications

- EE 519 Speech Recognition and Processing for Multimedia Units: 3
- EE 532 Wireless Internet and Pervasive Computing Units: 3
- EE 550 Data Networks: Design and Analysis Units: 4
- EE 555 Broadband Network Architectures Units: 3
- EE 652 Low-Power Wireless Networks Units: 3

Communication Hardware and Design

- EE 448L Communication Electronics Units: 4
- EE 541 A Computational Introduction to Deep Learning Units: 2
- EE 544 Radio Frequency Systems and Hardware Units: 3

Note:

This program assumes prerequisite preparation in the area of computer networks. Students who do not meet this requirement or who do not pass a related placement exam will be required to take EE 450 Introduction to Computer Networks.

Electrical Engineering/Engineering Management (MS)

The Ming Hsieh Department of Electrical Engineering in conjunction with the Daniel J. Epstein Department of Industrial and Systems Engineering offers a program leading to the degree of Master of Science in Electrical Engineering/Master of Science in Engineering Management. This program is designed for graduate electrical engineers whose career objectives lead to increasing technical management responsibilities.

In addition to the general requirements of the USC Viterbi School of Engineering, the dual degree of Master of Science in Electrical Engineering and Master of Science in Engineering Management is also subject to the following requirements:

(1) All applicants must meet the admissions requirements of both the Department of Electrical Engineering and the Department of Industrial and Systems Engineering; (2) a total of at least 48 units is required; (3) 24 of these must satisfy the requirements of the master's degree in electrical engineering; (4) 21 units must satisfy the required courses towards the master's degree in engineering management; (5) 3 units of electives approved by the program director or adviser; (6) all courses counted towards the dual degree must be at the 500 level, except those 400-level courses required by the master's degree in electrical engineering.

Financial Engineering (MS)

The objective of this program is the training of graduate students with engineering, applied mathematics or physics backgrounds in the application of mathematical and engineering tools to finance. Financial engineering is a multidisciplinary education program that involves the Viterbi School of Engineering, the USC Marshall School of Business and the USC Dornsife College of Letters, Arts and Sciences (Department of Economics). Financial engineering uses tools from finance and economics, engineering, applied mathematics and statistics to address problems such as derivative securities valuation, strategic planning and dynamic investment strategies, and risk management, which are of interest to investment and commercial banks, trading companies, hedge funds, insurance companies, corporate risk managers and regulatory agencies.

A minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in financial engineering. Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average. In addition to the general requirements of the Viterbi School of Engineering, the Master of Science in Financial Engineering is also subject to the following requirements: (1) a total of at least 30 units is required; (2) every plan of study requires prior written approval by the contact faculty of the program; (3) units to be transferred (maximum of four with adviser approval) must have been taken prior to taking classes at USC; interruption of residency is not allowed.

For Admission Requirements, refer to USC Viterbi School of Engineering.

Curriculum

The degree requirements include six required courses and two courses from each of two lists of electives for a minimum total of 30 units.

Required

- GSBA 548 Corporate Finance Units: 2, 3
  (Note: GSBA 548 for 3 units satisfies this requirement. Do not register for the 2 unit version.)
- FBE 559 Management of Financial Risk Units: 3 or
- ISE 563 Financial Engineering Units: 3
- EE 503 Probability for Electrical and Computer Engineers Units: 4
- EE 512 Stochastic Processes Units: 3
- EE 518 Mathematics and Tools for Financial Engineering Units: 4

- EE 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
  (1 unit required)

Electives (Adviser-Approved)

Finance, Business, Economics Area:

Two courses (6-8 units) from the following:

- ECON 500 Microeconomic Analysis and Policy Units: 4
- ECON 501 Macroeconomic Analysis and Policy Units: 4
- ECON 613 Economic and Financial Time Series I Units: 4
- FBE 529 Financial Analysis and Valuation Units: 3
- FBE 535 Applied Finance in Fixed Income Securities Units: 1.5, 3
  (3 units required)
- FBE 540 Hedge Funds Units: 3
- FBE 543 Forecasting and Risk Analysis Units: 3
- FBE 554 Trading and Exchanges Units: 3
- FBE 555 Investment Analysis and Portfolio Management Units: 3
- FBE 589 Mortgages and Mortgage-Backed Securities and Markets Units: 3
- ISE 566 Financial Accounting Analysis for Engineering Units: 3

Optimization, Simulations, Stochastic Systems:

Two courses (6-8 units) from the following:

- CSCI 455x Introduction to Programming Systems Design Units: 4
  or
- CSCI 570 Analysis of Algorithms Units: 4
- CSCI 567 Machine Learning Units: 4
- EE 588 Optimization for the Information and Data Sciences Units: 4
- ISE 525 Design of Experiments Units: 3
  or
- ISE 529 Predictive Analytics Units: 3
- ISE 530 Optimization Methods for Analytics Units: 3
- ISE 536 Linear Programming and Extensions Units: 3
- ISE 539 Stochastic Elements of Simulation Units: 3

Units Required: 30

Quantum Information Science (MS)

The Master of Science in Quantum Information Science program requires a minimum of 28 graduate units with at least 20 units at the 500 level. A minimum grade point average of 3.0 must be earned on all course work applied toward the degree. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor's degree. A maximum of 4 units of Directed Research (590 or 790) may be counted toward the degree. A maximum of 4 transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average.

Foundations (12 units)

Three courses are required.

- EE 514 Quantum Error Correction Units: 4
- EE 520 Introduction to Quantum Information Processing Units: 4
- PHYS 513 Applications of Quantum Computing Units: 4

Core (7-8 units)

Take at least two courses from this list (7-8 units):

- EE 589 Quantum Information Theory Units: 4
- PHYS 550 Theory of Open Quantum Systems Units: 4
- PHYS 559 Quantum Devices Units: 4
- PHYS 660 Quantum Information Science and Many-Body Physics Units: 3

Approved Electives (8-9 units)

- CHEM 544 Introduction to Quantum Chemistry Units: 4
- CHEM 545 Theory and Practice of Molecular Electronic Structure Units: 4
- CHEM 555 Computational Quantum Chemistry: Methods and Applications Units: 2, 3, 4
- CSCI 513 Autonomous Cyber-Physical Systems Units: 4
- CSCI 556 Introduction to Cryptography Units: 4
- CSCI 570 Analysis of Algorithms Units: 4
- CSCI 596 Scientific Computing and Visualization Units: 4
- CSCI 653 High Performance Computing and Simulations Units: 4
- DSCI 510 Principles of Programming for Data Science Units: 4
- EE 503 Probability for Electrical and Computer Engineers Units: 4
- EE 506 Semiconductor Physics Units: 4
- EE 507 Micro- and Nano-Fabrication Technology Units: 4
- EE 510 Linear Algebra for Engineering Units: 4
- EE 539 Engineering Quantum Mechanics Units: 4
- EE 540 Introduction to Quantum Electronics Units: 4
- EE 553 Computational Solution of Optimization Problems Units: 3
- EE 565 Information Theory and Its Application to (Big) Data Sciences Units: 4
- EE 577a VLSI System Design Units: 4
- EE 577b VLSI System Design Units: 2
- EE 589 Quantum Information Theory Units: 4
- EE 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- EE 598 Electrical Engineering Research Seminar Units: 1
- PHYS 438a Introduction to Quantum Mechanics and its Applications Units: 4
- PHYS 438b Introduction to Quantum Mechanics and its Applications Units: 4
- PHYS 500 Graduate Colloquium Units: 1
- PHYS 516 Methods of Computational Physics Units: 3
- PHYS 558a Quantum Mechanics Units: 3
- PHYS 558b Quantum Mechanics Units: 3
- PHYS 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- PHYS 660 Quantum Information Science and Many-Body Physics Units: 3
- PHYS 668 Advanced Quantum Mechanics Units: 3
- PHYS 678 Relativistic Quantum Field Theory Units: 3
- PHYS 680 Advanced Quantum Field Theory Units: 3

Note:

Courses taken to satisfy the core requirement may not be double counted as electives.

Minimum Units Required: 28

Doctoral Degree

Electrical Engineering (PhD)

The Doctor of Philosophy with a major in electrical engineering is awarded in strict conformity with the general requirements of the USC Graduate School. See general requirements for graduate degrees. Departmental requirements for this degree consist of a concentrated program of study and research and a dissertation. Each student wishing to undertake a doctoral program must first be admitted to the program and then take the screening examination. This examination will emphasize comprehension of fundamental material in one of the 13 specialized areas of electrical engineering listed below. Listed under each area are courses offered by the Department of Electrical Engineering, which will provide basic background for the examination and partial preparation for the dissertation. Not all courses listed are required for preparation for the screening examination in any specific area. Consult a separately published guide, available from the department office, for more information concerning examination content and scheduling. Further guidance concerning the full completion of courses, including those given outside the department, which are recommended for preparation for the dissertation, can be obtained from the faculty in each technical area.

Master's Degree

Green Technologies (MS)

Green Technologies is a highly interdisciplinary degree program that emphasizes green systems and the environment, energy technology and efficiency, and sustainability and society. The discipline seeks opportunities for alternative sourcing, conservation, efficiency and repurposing through an understanding of product life cycles from origins to recycling or inevitable disposal. Green technologists will design products, processes and complex infrastructure systems to promote sustainable attributes of importance to the environment and the global community.

The Green Technologies program requires a minimum of 27 units (typically nine courses). At least 18 units must be at the 500-level or above, and at least 18 units must be completed in the Viterbi School of Engineering. These 18 units may reflect courses offered by other schools if cross-listed in a department in the Viterbi School. Students with BS degrees in engineering and science disciplines can be accepted into the program.

Required Courses

Students are required to take two courses in each of three topical areas:

Green Systems and the Environment (two courses)

- ISE 576 Industrial Ecology: Technology-Environment Interaction Units: 3
- SAE 515 Sustainable Infrastructure Systems Units: 4

Energy Technology and Efficiency (two courses)

- CHE 510 Energy and Process Efficiency Units: 3 or
- AME 577 Survey of Energy and Power for a Sustainable Future Units: 3

Also take only one of the following:

- EE 513 Solid State Energy Devices Units: 3
- EE 526 Renewable Energy in Power Systems Units: 4
- ENE 505 Energy and the Environment Units: 4

Sustainability and Society (two courses)

- CE 469 Sustainable Design and Construction Units: 2

Also take one of the following:*

- ARCH 519 Sustainability in the Environment: Infrastructures, Urban Landscapes, and Buildings Units: 3
- CE 567 Smart Infrastructures Units: 3
- ENE 502 Environmental and Regulatory Compliance Units: 4
- MOR 566 Environmental Sustainability and Competitive Advantage Units: 1.5, 3
- PPD 692 Transportation and the Environment Units: 4
- PPDE 632 Sustainable Cities Units: 4

Electives (three courses): 9 Units

Electives shall be chosen in consultation with an adviser to develop technical specialization in an area of interest to the student. This may include up to 3 units of directed research.

Note:

**Additional courses from this list may be used to fulfill the elective requirement.*

Emeritus Professors: Gerald A. Fleischer, PhD, PE; Homer H. Grant, MS; Ralph Keeney, PhD *(Data Sciences and Operations)*; Mansour Rahimi, PhD; Peter Will, PhD *(Astronautical Engineering, Chemical Engineering)*
**Recipient of university-wide or school teaching award.*

Honor Societies

Alpha Pi Mu

Alpha Pi Mu is the industrial engineering honor society. Qualifications for election are: juniors in the upper one-fifth of their class; seniors in the upper one-third of their class; master's degree students who have completed at least one-third of the courses required for their degree and rank among the top 10 students in all ISE master's degree programs; and doctoral students recommended by the department chair. The adviser is Kurt Palmer, associate professor of the practice of industrial and systems engineering, (213) 740-5960.

Omega Rho

Omega Rho is the operations research honor society to recognize academic excellence in operations research and encourage study of operations research, management science and closely associated disciplines. Election is by nomination only during the spring semester.

Undergraduate Degree Requirements

Undergraduate Education Program Mission

The mission of the Daniel J. Epstein Department of Industrial and Systems Engineering undergraduate program is to:

- Provide students: the skills and knowledge to obtain employment and achieve leadership with the industrial and systems engineering profession or to proceed with graduate education; the intellectual resources to continue life-long learning; and the knowledge of professional ethics and critical reasoning skills necessary for contributing to society.
- Provide employers of industrial and systems engineering professionals with candidates who are technically competent, business aware, collaborative, able to communicate effectively, and ethically grounded.
- Maintain and enhance the reputation of the Epstein department within the engineering, business and academic communities.

Undergraduate Program Educational Objectives

Graduates of the Bachelor of Science in Industrial and Systems Engineering program are prepared to achieve any of the following accomplishments:

- Obtain employment in an organization that values people who demonstrate both technical competence and business awareness.
- Pursue graduate or professional education.
- Assume a leadership role in their employment organization or community.
- Utilize critical reasoning, collaboration and creativity to contribute to society.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Industrial and Systems Engineering prepares graduates to design, develop, implement, and improve integrated systems that include people, materials, information, equipment and energy. The curriculum includes in-depth instruction to accomplish the integration of systems using appropriate analytical, computational, and experimental practices.

For additional information, visit usc.edu/dept/ise.

Graduate Degree Requirements

Master of Science in Product Development Engineering

This interdisciplinary program is offered jointly with the Department of Aerospace and Mechanical Engineering. The program is available via distance education. See the listing under Product Development Engineering.

Master of Science in Systems Architecting and Engineering

See the listing under Systems Architecting and Engineering Program. The program is available via distance education.

Dual Degree Program (MS, Electrical Engineering / MS, Engineering Management)

See listing in the Electrical and Computer Engineering section.

Engineer in Industrial and Systems Engineering

Requirements for the Engineer in Industrial and Systems Engineering are the same as set forth in the general requirements.

Graduate Certificates

Graduate Certificate in Network Centric Systems

See listing under Systems Architecting and Engineering Program. The program is available via distance education.

Graduate Certificate in Optimization and Supply Chain Management

This abbreviated interdisciplinary program is offered jointly with the Department of Data Sciences and Operations in the USC Marshall School of Business. See here for program requirements.

Graduate Certificate in Systems Architecting and Engineering

See listing under Systems Architecting and Engineering Program. The program is available via distance education.

Graduate Certificate in Transportation Systems

This abbreviated interdisciplinary program is offered jointly with the Astani Department of Civil and Environmental Engineering and the USC Price School of Public Policy. See listing under Civil Engineering.

Bachelor's Degree

Industrial and Systems Engineering (BS)

The Epstein Department of Industrial and Systems Engineering offers a Bachelor of Science degree in Industrial and Systems Engineering.

The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required for all upper division courses applied toward the major, regardless of the department in which the courses are taken. See the common requirements for undergraduate degrees.

Composition/Writing Requirement

- WRIT 150 Writing and Critical Reasoning–Thematic Approaches Units: 4

- WRIT 340 Advanced Writing Units: 3, 4 (3)

General Education

- General Education* Units: 20

Pre-Major Requirements

Math Requirement

- MATH 125g Calculus I Units: 4
- MATH 126g Calculus II Units: 4 or
- MATH 129 Calculus II for Engineers and Scientists Units: 4
- MATH 225 Linear Algebra and Linear Differential Equations Units: 4
- MATH 226g Calculus III Units: 4 or
- MATH 229 Calculus III for Engineers and Scientists Units: 4

Physics Requirement

- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4

Biology Elective

- BISC 103Lgx General Biology for the Environment and Life Units: 4 or
- BISC 104Lgx How the Body Works Units: 4 or
- BISC 230Lgx The Biology of the Brain Units: 4 or
- HBIO 205Lgx The Science of Sport Units: 4

Chemistry Elective

- CHEM 105aLg General Chemistry Units: 4 or
- CHEM 115aLg Advanced General Chemistry Units: 4 or
- MASC 110L Materials Science Units: 4

Major Requirements

Engineering Requirement

- ENGR 102 Engineering Freshman Academy Units: 2

Industrial and Systems Engineering Requirement

- ISE 105 Introduction to Industrial and Systems Engineering Units: 2
- ISE 150 Solving Engineering Problems via Computer Programming Units: 3
- ISE 220 Probability Concepts in Engineering Units: 3
- ISE 225 Engineering Statistics I Units: 3
- ISE 315L Engineering Project Management Units: 3
- ISE 330 Introduction to Operations Research: Deterministic Models Units: 3
- ISE 331 Introduction to Operations Research: Stochastic Models Units: 3
- ISE 410 Planning and Scheduling Units: 3
- ISE 435 Discrete Systems Simulation Units: 3
- ISE 440 Work, Technology, and Organization Units: 3
- ISE 460 Engineering Economy Units: 3
- ISE 495ax Senior Design Project Units: 2
- ISE 495bx Senior Design Project Units: 2

Database Design Elective

- ISE 382 Database Systems: Concepts, Design and Implementation Units: 4 or
- DSO 435 Enterprise Data Architecture Units: 4

Human Factors Elective

- ISE 370L Human Factors in Work Design Units: 4 or
- ISE 470 Human/Computer Interface Design Units: 3

Major Electives

Major Electives: 23-24 Units
At least 12 units must be from one of the approved Focus Groups
At least 9 units must be from the Approved Engineering Electives

Total units: 128

**GE Category D is fulfilled by Biology Elective*
GE Category E is fulfilled by PHYS 151 or CHEM 105a.
GE Category F is fulfilled by MATH 125.

Focus Groups

Students must select at least 12 units from one group; however, all courses in a group are recommended.

Operations Group

- ISE 335L Supply Chain Design Units: 3
- ISE 375L Facilities Design Units: 3
- ISE 426 Statistical Quality Control Units: 3

Plus at least one course from among the following:

- ACCT 410x Foundations of Accounting Units: 4
- ISE 232L Manufacturing Processes Units: 3
- ISE 327 Six Sigma and Lean Operations Units: 3
- ISE 350 Principles of Systems Engineering Units: 3

Information Systems Group

- ITP 320 Enterprise Information Systems Units: 4

Plus at least 8 units from among the following

- DSO 431 Digital Innovation as Competitive Advantage Units: 4
- DSO 433 Designing Digital Processes and User Experiences Units: 4
- ISE 350 Principles of Systems Engineering Units: 3
- ITP 482 Engineering Database Applications Units: 3
- ITP 487 Enterprise Data Analytics Units: 4

Approved Engineering Electives

Students must select at least 9 units. Courses not listed may be petitioned for approval through the department.
AME 341a, AME 341b, CE 408, CE 460, CE 471, DSO 427, EE 326, ENGR 345, ENGR 401x, ISE 232, ISE 310, ISE 327, ISE 335L, ISE 344, ISE 350, ISE 375L, ISE 426, ITP 215, ITP 320, ITP 325, ITP 421, ITP 422, ITP 454, ITP 457, ITP 466, ITP 482, ITP 486, ITP 487, ITP 488, NSC 335, NSC 337

Minor

Engineering Management Minor

This minor is designed to provide students who have a sound foundation in mathematics and the sciences with tools and skills for managerial analysis and problem solving.

Science and technology are driving significant portions of American and global economies. Individuals, companies and governments are demanding products, services and systems, which grow more complicated every day. Suppliers are forced by competition to provide goods and services efficiently and economically.

Scientists and engineers are trained in scientific and technical subjects which form an excellent base for building complex, technical products, services and systems. But more and more, scientists and engineers are managing the financial, material and human resources required to turn abstract ideas into physical and virtual reality, often without any formal management training. This minor provides that training, a complement to any science or technology degree.

Application Procedures

Applicants must be upper division students in good standing and complete the Change/Addition of Major, Minor or Degree Objective form. The minor is not open to industrial and systems engineering majors.

Prerequisites

- ISE 220 Probability Concepts in Engineering Units: 3 (or equivalent)
- ISE 225 Engineering Statistics I Units: 3 (or equivalent)
- MATH 125g Calculus I Units: 4
- MATH 126g Calculus II Units: 4
- MATH 225 Linear Algebra and Linear Differential Equations Units: 4 (or equivalent)
- MATH 226g Calculus III Units: 4

Required Courses

- BUAD 301 Technology Entrepreneurship Units: 3
- ISE 330 Introduction to Operations Research: Deterministic Models Units: 3
- ISE 370L Human Factors in Work Design Units: 4
- ISE 440 Work, Technology, and Organization Units: 3
- ISE 460 Engineering Economy Units: 3

Master's Degree

Analytics (MS)

Ethel Percy Andrus
Gerontology Center 240
(213) 740-4893

The Master of Science in Analytics is designed to satisfy the growing demand for professionals equipped with significant technical and quantitative training in the fundamentals of analytics for solving engineering and management problems in today's data-extensive digital world.

Analytics is a multidisciplinary field that relates the application of engineering approaches and methods to the analysis and management of engineering and enterprise processes based on data. Learning objectives of this program involve data collection, cleansing, fusing and curating, for the purpose of analyzing trends, discovering patterns and building decision models for well-reasoned decision support. Rigorous mathematical modeling and computational methods tools are at the heart of the program.

Graduates of this program will be prepared to convert data into meaningful information, embedded in decision support systems that can help organizations make important operational decisions and help set strategic direction and policy.

Master of Science in Analytics

The core of the MS in Analytics program consists of seven foundational courses, and three elective courses, totaling 30 units. The foundational courses cover the fundamentals of optimization, Data Management, Data Mining and Predictive Analytics modeling and the computational tools needed to implement them. The elective courses expose the students to different business domains such as data analytics consulting, analytics of web data, predictive modeling with big data, among others.

Core Courses (12 units)

- DSCI 559 Introduction to Data Management Units: 3
- ISE 529 Predictive Analytics Units: 3
- ISE 530 Optimization Methods for Analytics Units: 3
- ISE 535 Data Mining Units: 3

Methodology Courses (6 units)

Select two courses.

- ISE 533 Integrative Analytics Units: 3 *
- ISE 537 Financial Analytics Units: 3
- ISE 538 Performance Analysis Using Markov Models Units: 3
- ISE 540 Text Analytics Units: 3
- ISE 543 Enterprise Business Intelligence and Systems Analytics Units: 3
- ISE 562 Decision Analysis Units: 3
- ISE 580 Performance Analysis with Simulation Units: 3 *

May count toward Methodology or Project but not both.

Project Course (3 units)

Select one course.

- ISE 533 Integrative Analytics Units: 3 *
- ISE 534 Data Analytics Consulting Units: 3
- ISE 580 Performance Analysis with Simulation Units: 3 *

Electives (9 units), subject to approval by adviser

- ISE Elective (3 units)
- Additional electives (6 units)

Total units required for the degree: 30

Engineering Management (MS)

Master of Science in Engineering Management
Gerontology Center 240
(213) 740-4893

Program Director: Geza Bottlik, Engineer, PE

This program is designed primarily, but not exclusively, for graduate engineers whose career objectives lead to increasing technical management responsibilities. Students interested in the engineering management objectives may also want to consider the MS, Industrial and Systems Engineering/MBA dual degree program.

Master of Science in Engineering Management

A total of 30 units is required for the degree. A minimum of 18 units must be taken in the Epstein Department of Industrial and Systems Engineering. A total of 21 units must be at the 500 level or above. The program is available via distance education.

Applicants to the program are expected to have a degree in engineering or the equivalent.

Required Courses (18-19 Units)

- ISE 500 Statistics for Engineering Managers Units: 3
- ISE 515 Engineering Project Management Units: 3
- ISE 544 Leading and Managing Engineering Teams Units: 3
- ISE 561 Economic Analysis of Engineering Projects Units: 3

Analytics Course

Select one.

- DSCI 552 Machine Learning for Data Science Units: 4
- ISE 529 Predictive Analytics Units: 3
- ISE 530 Optimization Methods for Analytics Units: 3
- ISE 543 Enterprise Business Intelligence and Systems Analytics Units: 3
- ISE 562 Decision Analysis Units: 3

Technology Course

Select one.

- CE 576 Invention and Technology Development Units: 3
- ISE 545 Technology Development and Implementation Units: 3
- ISE 585 Strategic Management of Technology Units: 3

Select One of the Following Tracks (9-10 units)

The technology course and the analytics course selected above may not be applied to a track below.

Management Track

Select three courses.

- CE 502 Construction Accounting, Finance and Strategy Units: 4
- ISE 506 Lean Operations Units: 3
- ISE 527 Quality Management for Engineers Units: 3
- ISE 585 Strategic Management of Technology Units: 3
- MOR 557 Strategy and Organization Consulting Units: 3

Analytics Track

Select three courses.

- DSCI 552 Machine Learning for Data Science Units: 4
- ISE 529 Predictive Analytics Units: 3
- ISE 530 Optimization Methods for Analytics Units: 3
- ISE 533 Integrative Analytics Units: 3
- ISE 534 Data Analytics Consulting Units: 3
- ISE 543 Enterprise Business Intelligence and Systems Analytics Units: 3
- ISE 562 Decision Analysis Units: 3

Innovation and Technology Commercialization Track

Select three courses.

- BAEP 556 Technology Feasibility Units: 3
- BAEP 557 Technology Commercialization Units: 3
- CE 576 Invention and Technology Development Units: 3
- ISE 545 Technology Development and Implementation Units: 3
- ISE 585 Strategic Management of Technology Units: 3

Supply Chain and Operations Track

Select three courses.

- DSO 581 Supply Chain Management Units: 3
- DSO 583 Operations Consulting Units: 3
- ISE 513 Inventory Systems Units: 3
- ISE 514 Advanced Production Planning and Scheduling Units: 3
- ISE 583 Enterprise Wide Information Systems Units: 3

Custom Track

Select three courses from Industrial and Systems Engineering or Business in consultation with an adviser.

Elective (3 units):

Select one course from Industrial and Systems Engineering or Business with adviser approval.

Total units required for the degree: 30-32

Health Systems Management Engineering (MS)

Gerontology Center 240
(213) 740-4893
Program Director: David Belson, PhD

This program is jointly sponsored by the Epstein Industrial and Systems Engineering Department, the USC Price School of Public Policy and the USC Keck School of Medicine and is administered by the Epstein Industrial and Systems Engineering Department. This degree is designed for students with sufficiently quantitative bachelor's degrees in engineering, the sciences or applied social science who are interested in operations management and health care applications, and whose career objectives lead to increasing technical management responsibilities in large healthcare organizations, such as hospitals. Graduates will be particularly prepared for employment in work to improve healthcare systems in terms of performance and quality. Course work will include various aspects of health care such as information systems, project management and models of care. The USC Master of Science in Health Systems Management Engineering uniquely blends management, clinical and engineering disciplines into a single degree.

Master of Science in Health Systems Management Engineering

At least 31 units are required for the degree. Some combinations of courses may require students to complete more than 31 units. Admitted students may count courses taken for completion of the Graduate Certificate in Health Systems Operations toward this degree. This program is available via distance education.

Applicants to the program are expected to have mathematical competence such as provided by an undergraduate degree in engineering; understanding of basic statistics; and competence in microeconomics. Admitted students who do not meet the course work requirements will be assigned courses to complete the deficiencies.

Required Courses (22 Units)

- ISE 508 Health Care Operations Improvement Units: 3
- ISE 509 Practicum in Health Care Systems Units: 3
- ISE 515 Engineering Project Management Units: 3
- PM 508 Health Service Delivery in the U.S. Units: 4
- PPD 511 Health Information Systems Units: 2

Health Care - Select One Option (4 units)

- PM 504 Quality in Health Care Units: 4
  or
- PPD 518 Quality of Care Concepts Units: 2 and
- PPDE 610 Population Health Management Units: 2

Data Analytics - Select One Course (3 Units)

- ISE 500 Statistics for Engineering Managers Units: 3
- ISE 529 Predictive Analytics Units: 3

Adviser Approved Electives (9 Units)

Total Units: 31

Industrial and Systems Engineering (MS)

The Master of Science in Industrial and Systems Engineering is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. This program enhances the technical capabilities of the industrial engineer. The program is available via distance education.

The MS program is for students who want to become technical leaders in the field of industrial and systems engineering. Applicants to the program are expected to have a bachelor's degree in an engineering discipline with undergraduate course work in computing, probability and statistics, and engineering economy. Admitted students who do not meet prerequisites will be assigned courses to complete the deficiencies.

A total of 30 units is required for the degree, of which at least 18 units must be completed in the Epstein Department of Industrial and Systems Engineering. Of the 30 units, 20 must be at the 500 level or above.

Required Courses (12 units)

- ISE 513 Inventory Systems Units: 3
- ISE 514 Advanced Production Planning and Scheduling Units: 3
- ISE 515 Engineering Project Management Units: 3
- ISE 583 Enterprise Wide Information Systems Units: 3

Group A (3 units required)

Select one course

- ISE 530 Optimization Methods for Analytics Units: 3
- ISE 536 Linear Programming and Extensions Units: 3

Group B (3 units required)

Select one course

- ISE 525 Design of Experiments Units: 3
- ISE 527 Quality Management for Engineers Units: 3

Group C (3 units required)

Select one course

Operations Research Engineering (MS)

Ethel Percy Andrus
Gerontology Center 240
(213) 740-4891
Program Director: Maged Dessouky, Ph.D.

Master of Science in Operations Research Engineering

The Master of Science in Operations Research Engineering is conferred upon candidates who hold bachelor's degrees in engineering, mathematics, science or related fields who successfully complete an integrated program (with departmental approval in advance) of not less than 30 units. The program must include not less than 21 units of industrial and systems engineering courses related to operations research and 9 units of approved electives. Students will be required to make up deficiencies in mathematics and statistics. Additional courses or examinations may be required at the discretion of the department before full admission to the program. The General Test of the Graduate Record Examinations (GRE) is required. Additional information is available from the department. This program is available via distance education.

Required Courses

- ISE 532 Network Flows Units: 3
- ISE 536 Linear Programming and Extensions Units: 3

- ISE 538 Performance Analysis Using Markov Models Units: 3
- ISE 580 Performance Analysis with Simulation Units: 3
- ISE 582 Web Technology for Industrial Engineering Units: 3

or

- ISE 583 Enterprise Wide Information Systems Units: 3

Select at least two of the following 10 courses: 6 units

- CE 645 Uncertainty Modeling and Stochastic Optimization Units: 3
- ISE 513 Inventory Systems Units: 3
- ISE 514 Advanced Production Planning and Scheduling Units: 3
- ISE 520 Optimization Theory and Algorithms: Numerical Optimization Units: 3
- ISE 525 Design of Experiments Units: 3
- ISE 539 Stochastic Elements of Simulation Units: 3
- ISE 562 Decision Analysis Units: 3
- ISE 563 Financial Engineering Units: 3
- ISE 576 Industrial Ecology: Technology-Environment Interaction Units: 3
- SAE 541 Systems Engineering Theory and Practice Units: 3
- 400- or 500-level computer science course, approved by faculty adviser Units: 3
- Two electives, approved by faculty adviser Units: 6

Total units: 30

Dual Degree

Master of Science, Industrial and Systems Engineering/Master of Business Administration (MS/MBA)

The USC Marshall School of Business in conjunction with the Epstein Department of Industrial and Systems Engineering offers a program leading to the degree of Master of Business Administration/Master of Science in Industrial and Systems Engineering.

This alternative requires 66 units for graduates of industrial and systems engineering undergraduate curricula and leads to both a Master of Science in Industrial and Systems Engineering and the Master of Business Administration. The dual degree provides an education of great depth.

The total number of units required for the MBA program is 48 including all required courses in an MBA program and graduate business electives sufficient to bring the total units completed in the Marshall School of Business to at least 48. Dual degree students may not count courses taken outside the Marshall School of Business toward the 48 units.

Required Courses (Minimum 18 Units)

- ISE 514 Advanced Production Planning and Scheduling Units: 3
- ISE 515 Engineering Project Management Units: 3

ISE Electives (Choose One from Each Group)

Systems Design (3 units)

- ISE 525 Design of Experiments Units: 3
- ISE 527 Quality Management for Engineers Units: 3
- SAE 541 Systems Engineering Theory and Practice Units: 3

Information Systems (3 units)

- ISE 580 Performance Analysis with Simulation Units: 3
- ISE 582 Web Technology for Industrial Engineering Units: 3
- ISE 583 Enterprise Wide Information Systems Units: 3

Quantitative Methods (3 units)

- ISE 532 Network Flows Units: 3
- ISE 536 Linear Programming and Extensions Units: 3
- ISE 538 Performance Analysis Using Markov Models Units: 3
- Elective Chosen with adviser approval Units: 3

Total units: 18

Graduate Certificate

Health Systems Operations Graduate Certificate

This graduate certificate is designed for students with bachelor's degrees in applied social science, engineering or the sciences, who are interested in operations management and health care topics. This program is available via distance education.

Required Courses

- ISE 508 Health Care Operations Improvement Units: 3
- ISE 509 Practicum in Health Care Systems Units: 3
- PM 504 Quality in Health Care Units: 4
- PM 508 Health Service Delivery in the U.S. Units: 4

Data Analytics - Select One Course (3 Units)

- ISE 500 Statistics for Engineering Managers Units: 3
- ISE 529 Predictive Analytics Units: 3

Total Units: 17

Doctoral Degree

Industrial and Systems Engineering (PhD)

The degree Doctor of Philosophy in Industrial and Systems Engineering is also offered. See general requirements for graduate degrees.

Data Science Program

Senior Lecturer: Tatyana Ryutov, PhD (*Computer Science*)
Lecturer: Mohammad Reza Rajati, PhD *(Computer Science)*
In addition to the programs listed below, the Data Science department also offers a Master of Science in Spatial Data Science in conjunction with the Spatial Sciences department in Dornsife College and a Master of Science in Public Policy Data Science with the Price School of Public Policy.

Bachelor's Degree

Data Science (BA)*

datascience.usc.edu

Program Director: Emilio Ferrara, PhD

Computer-based information systems facilitate, enable and often define the relationships between corporations and consumers, buyers and suppliers, businesses of all sizes, social networks and citizens and their governments. Understanding these relationships and effectively addressing the collection, flow and distribution of information is vital to the effectiveness of any modern organization, enterprise or government agency.

The Bachelor of Arts in Data Science is a cooperative degree program involving the USC Dornsife College of Letters, Arts and Sciences and the USC Viterbi School of Engineering. Students complete 128 units, including at least 70 units of courses in Dornsife College and at least 38 units of courses in Viterbi School of Engineering. Units completed in Viterbi include the basic programming and data science requirements while units completed in Dornsife College include the general education and writing requirements, the Dornsife College foreign language requirement and an adviser-approved disciplinary specialization of at least 24 units, (including at least 16 units of upper-division course work).

The specialization must form a coherent focus on a discipline that provides students with insight into a domain in which data science can be usefully applied; this is normally another departmental or interdepartmental major for the BA degree, permitting students to satisfy most or all of the requirements for a double major (see Undergraduate Degree Programs for rules governing the overlap of courses allowed for a double major).

The program teaches students to understand, design and implement effective solutions to meet organizational, societal and management needs for information and decision support.

All students undertaking this degree program must have knowledge of the following areas (the core):

- Information systems and technology fundamentals
- Programming basics
- Statistics
- Data management
- Machine learning
- Data visualization

Admission

Admissions are made by the USC Dornsife College of Letters, Arts and Sciences. Students normally apply to the program in the spring of the freshman year.

**The program falls under the jurisdiction of the Dornsife College of Letters, Arts and Sciences.*

Major Core Requirements (30-32 units, 8-9 Courses)

A grade of C (2.0) or better is required for each of the courses taken for the core major requirements: programming requirement, data science requirement, statistics/probability requirement, and basic math requirement.

Programming Requirement (6-8 units)

- ITP 115 Programming in Python Units: 2

  And choose one option:

Option One:

- ITP 265 Object-Oriented Programming Units: 4

Option Two:

- CSCI 102L Fundamentals of Computation Units: 2
- CSCI 103L Introduction to Programming Units: 4

Data Science Requirement (16 units)

- DSCI 250 Introduction to Data Science Units: 4
- DSCI 351 Foundations of Data Management Units: 4
- DSCI 352 Applied Machine Learning and Data Mining Units: 4
- DSCI 454 Data Visualization and User Interface Design Units: 4

Statistics/Probability Requirement – Choose One Course (4 units)

- BUAD 310g Applied Business Statistics Units: 4
- EE 364 Introduction to Probability and Statistics for Electrical Engineering and Computer Science Units: 4
- MATH 208x Elementary Probability and Statistics Units: 4
- MATH 407 Probability Theory Units: 4
- MATH 408 Mathematical Statistics Units: 4

Basic Math Requirement – Choose One Course (4 units)

- MATH 118gx Fundamental Principles of Calculus Units: 4
- MATH 125g Calculus I Units: 4

Data Science Electives – Choose Four Courses (16 units)

- DSCI 429 Security and Privacy Units: 4
- ITP 301 Front-End Web Development Units: 4
- ITP 310 Design for User Experience Units: 4
- ITP 487 Enterprise Data Analytics Units: 4
- ITP 489 In-Memory Data Modeling and Analytics Units: 4

Disciplinary Specialization (24 units)

Complete at least 24 units of courses in an adviser-approved area of disciplinary specialization relying on coursework in the USC Dornsife College of Letters, Arts, and Sciences. At least 16 units must be at the upper-division level. The disciplinary specialization must form a coherent focus on a discipline that provides students with insight into a domain in which data science can be usefully applied.

Minor

Foundations of Data Science Minor

The Foundations of Data Science minor teaches students the skills to apply techniques in data science to problems in their own discipline. Students will learn the basics of programming, how to apply statistics to evaluate data and techniques in data management, machine learning and visualization. Choosing from a variety of electives, students will be able to tailor this minor to learn the techniques most relevant to their needs.

Required Introductory Courses (6 units)

- DSCI 250 Introduction to Data Science Units: 4
- ITP 115 Programming in Python Units: 2

Statistics/Probability Requirement (4 units)

Choose one course:

- BUAD 310g Applied Business Statistics Units: 4
- EE 364 Introduction to Probability and Statistics for Electrical Engineering and Computer Science Units: 4 *
- MATH 208x Elementary Probability and Statistics Units: 4 *
- MATH 407 Probability Theory Units: 4 *
- MATH 408 Mathematical Statistics Units: 4 *

Note:
*Requires prerequisite.

Data Science Electives (12 units)

Choose three courses:

- DSCI 351 Foundations of Data Management Units: 4
- DSCI 352 Applied Machine Learning and Data Mining Units: 4
- DSCI 429 Security and Privacy Units: 4

- DSCI 454 Data Visualization and User Interface Design Units: 4
- ITP 249 Introduction to Data Analytics Units: 4
- ITP 265 Object-Oriented Programming Units: 4
- ITP 487 Enterprise Data Analytics Units: 4
- ITP 489 In-Memory Data Modeling and Analytics Units: 4

Total Units: 22

Joint Degree

Communication Data Science Dual Degree with Tsinghua University School of Journalism and Communication (MS)

The Master of Science in Communication Data Science Dual Degree with Tsinghua University School of Journalism and Communication leads to two Master degrees, one from each institution: a Master of Science in Communication Data Science (a cross-disciplinary joint degree offered by the USC Viterbi School of Engineering and the USC Annenberg School for Communication and Journalism) and a Master of Journalism and Communication from the Tsinghua University (THU) School of Journalism and Communication. The two institutions, USC and THU, have a formal partnership to amplify cooperation between USC and THU and between the United States and China to capitalize on the synergies of the respective curricula and to provide students with the opportunity for a unique transcultural and cross-discipline experience that will position them to be global leaders in their field.

Graduates of the Master of Science in Communication Data Science Dual Degree will be experts in the emerging fields of data science for journalism and communication. In the course of their studies, students will learn about theories and principles underlying human communication and their integration into emerging communication technologies. They will also understand the technical underpinnings of a diverse range of emerging communication platforms, including digital newsrooms, social media, enterprise collaboration systems, and virtual and augmented reality. They will have the capability to build these technologies and effectively manage teams to create effective communication frameworks for a variety of goals. Finally, they will master powerful techniques for analyzing large volumes of data generated by digital communication platforms using machine learning and artificial intelligence.

The dual degrees are subject to the following stipulations:

1. The requirements for both degrees must be satisfied to complete the dual degree.
2. The program description for the Tsinghua University Master of Journalism and Communication is online at *www.tsjc.tsinghua.edu.cn/publish/jcen/363/index.html*.
3. The general requirements for the MS in Communication Data Science (MS CMDS) in this dual degree program are the same as those for the USC general MS Communication Data Science except that at least 24 units (of the 32 required units) must be completed at USC, and up to 8 units of preapproved course work transferred from Tsinghua University may be counted toward the degree requirements at USC. This is due to a special partnership established by a Memorandum of Understanding between the two Universities.
4. Other requirements for the MS CMDS are the same as set forth in the general requirements for Viterbi School of Engineering Master of Science degrees.
5. Students who elect to receive only the USC degree must change their degree objective from the USC-Tsinghua University dual degree to the general USC MS CMDS.
6. Generally, students must take at USC the "Foundation" courses of the USC MS CMDS. There must be justification for the omission of a required course in either degree; for example, a certain course in one degree may provide comparable content to the omitted course in the other degree.
7. The USC Data Science Program and the Annenberg School of Communication have identified a list of transferable THU courses that can be considered USC equivalents but are also willing to entertain transfer, on a case by case basis, of unique relevant THU courses for which no obvious mapping to a USC course exists.

Foundation (20 units):

- CMGT 515 Innovation and the Information Economy Units: 4
- COMM 502 Theoretical Approaches to Multidisciplinary Design Projects Units: 4
- DSCI 549 Introduction to Computational Thinking and Data Science Units: 4
- DSCI 510 Principles of Programming for Data Science Units: 4
- DSCI 550 Data Science at Scale Units: 4

Data Science Core (4 units):

- DSCI 529 Security and Privacy Units: 4
- DSCI 552 Machine Learning for Data Science Units: 4
- DSCI 553 Foundations and Applications of Data Mining Units: 4
- DSCI 554 Data Visualization Units: 4
- DSCI 560 Data Science Professional Practicum Units: 4

Communication Core (8 units):

- CMGT 510 Communication, Values, Attitudes and Behavior Units: 4
- CMGT 520 Social Roles of Communication Media Units: 4
- CMGT 530 Social Dynamics of Communication Technologies Units: 4
- CMGT 537 The Industry, Science and Culture of Video Games Units: 4
- CMGT 541 Integrated Communication Strategies Units: 4
- CMGT 555 Online Marketing Communication Development and Analysis Units: 4
- CMGT 587 Audience Analysis Units: 4

Master's Degree

Applied Data Science (MS)

datascience.usc.edu

Program Director: Emilio Ferrara, PhD

The USC Viterbi Master of Science in Applied Data Science will train students as data scientists. This degree provides students with the knowledge and skill to solve real-world world challenges that require a combination of data management and data analytics skills. Students will learn how to use the latest big-data infrastructures, such as Hadoop and Spark. They will learn how to use the various analytical tools, including machine learning, data mining and data visualization. And students will learn how to apply these tools to real-world problems.

This degree is designed for students with a range of backgrounds, but students are expected to have at least a strong math and science background to pursue this degree. Students that do not have much training in computer science will first learn the basics of data science, including data formats, tools and techniques. They learn how to build data processing programs in Python, and they will learn how to apply the latest analytical tools through hands-on homework and projects. Students with a computer science background will be able to jump directly into the more advanced data science courses including data management, machine learning, data mining and statistics for data science. Once students have completed the introductory and core courses, they are given a choice of electives to allow them to pursue their own interests within data science.

For Admission Requirements, refer to Viterbi Graduate Degrees and Requirements.

A total of 32 units is required for the degree.

Core Courses

- DSCI 551 Foundations of Data Management Units: 4
- DSCI 552 Machine Learning for Data Science Units: 4
- DSCI 553 Foundations and Applications of Data Mining Units: 4

Electives*

Take five courses.

- CSCI 544 Applied Natural Language Processing Units: 4
- CSCI 550 Advanced Data Stores Units: 4
- CSCI 570 Analysis of Algorithms Units: 4
- CSCI 572 Information Retrieval and Web Search Engines Units: 4
- CSCI 587 Geospatial Information Management Units: 4
- DSCI 510 Principles of Programming for Data Science Units: 4
- DSCI 529 Security and Privacy Units: 4
- DSCI 549 Introduction to Computational Thinking and Data Science Units: 4
- DSCI 550 Data Science at Scale Units: 4
- DSCI 554 Data Visualization Units: 4
- DSCI 555 Interaction Design and Usability Testing Units: 4
- DSCI 556 User Experience Design and Strategy Units: 4
- DSCI 558 Building Knowledge Graphs Units: 4
- DSCI 560 Data Science Professional Practicum Units: 4
- DSCI 564 Probability and Statistics for Data Science Units: 4
- DSCI 599 Special Topics Units: 1, 2, 3, 4, 5, 6, 7, 8 (4 units of DSCI 599 required if chosen)

*Notes:

A maximum of two CSCI electives can be applied toward the degree.

Students with limited or no training in computer science should take DSCI 549, DSCI 510 and DSCI 550 before taking any other classes.

DSCI 550 should be taken prior to or in parallel with DSCI 551 and prior to taking DSCI 552 and DSCI 553.

Directed Research (CSCI 590), thesis courses (CSCI 594a, CSCI 594b, CSCI 594z), and internship courses (ENGR 595a, ENGR 595b, ENGR 595z, ENGR 596) are not eligible for elective credit.

Communication Data Science (MS)

Master of Science in Communication Data Science

Program Director: Yolanda Gil, PhD

Program Co-Director: Jessica Neff, PhD

The Master of Science in Communication Data Science is a cross-disciplinary joint degree program offered by the Viterbi School of Engineering and the Annenberg School for Communication and Journalism. Students must be admitted by both schools.

Students will be experts in the emerging field of data science for communication. Graduates will learn about theories and principles underlying human communication and the ways in which people utilize and engage with communication technologies. They will also understand the technical underpinnings of emerging communication platforms, ranging from social media to enterprise collaboration platforms to virtual and augmented reality. They will have the capability to build these technologies and effectively manage teams that do so. They will also master the theoretical and technical tools to investigate and analyze large volumes of data generated by digital communication platforms using machine learning and artificial intelligence.

There are many career opportunities for students completing the Master of Science in Communication Data Science degree. Traditional media outlets ranging from newspapers to network/cable news are hungry for individuals who understand the new technology-enabled social communication paradigms and can help translate this knowledge into new sources of information. An example is the coverage of natural disasters, where it is difficult for media to get on the ground, but where social media allows victims to relay experiences and provide accounts of these situations. How to collect, manage, distribute and capitalize from these news sources is a major challenge in current media.

There are also careers in exploiting emerging communication platforms for marketing and communication. Many technology companies realize the value in employing experts who understand the reception of their products by the public. Communication is now so vital to the function of many products that success and failure are often determined by how well communication is performed, and how seamlessly it integrates into existing platforms. In the corporate world, the need to understand and capitalize on social media is pervasive, and the unique expertise this degree provides leaves graduates well positioned to design creative approaches to reach new audiences. In addition, as technology becomes ubiquitous in society, the role of the informed communicator has become very important in formal and informal formats. There is need for individuals who understand the basics of communication and have enough technology knowledge to provide analysis at a meaningful level. Finally, there are careers using data science to analyze online activities from a variety of contexts, including entertainment sites, online games, and mobile apps. Recommender systems, opinion mining, and social information diffusion are emerging technologies for the entertainment industry. Online games generate rich data about social interaction and individual behaviors. Many startups seek a combination of communication and data science skills to improve their products and reach new markets.

For admission requirements, refer to Viterbi Graduate Degrees and Requirements at USC Viterbi School of Engineering.

Requirements for completion (32 units minimum):

Foundations (20 units, 5 Courses)

- COMM 502 Theoretical Approaches to Multidisciplinary Design Projects Units: 4
- COMM 557 Data Science for Communication and Social Networks Units: 4
- DSCI 510 Principles of Programming for Data Science Units: 4
- DSCI 549 Introduction to Computational Thinking and Data Science Units: 4
- DSCI 550 Data Science at Scale Units: 4

Data Science Core (4 units, 1 course)

- DSCI 529 Security and Privacy Units: 4
- DSCI 552 Machine Learning for Data Science Units: 4
- DSCI 553 Foundations and Applications of Data Mining Units: 4
- DSCI 554 Data Visualization Units: 4
- DSCI 560 Data Science Professional Practicum Units: 4
- DSCI 564 Probability and Statistics for Data Science Units: 4
- DSCI 599 Special Topics Units: 1, 2, 3, 4, 5, 6, 7, 8 (with adviser approval)

Communication Core (8 Units, 2 Courses)

- CMGT 507 Information Management Units: 4
- CMGT 510 Communication, Values, Attitudes and Behavior Units: 4
- CMGT 515 Innovation and the Information Economy Units: 4
- CMGT 528 Web Strategies for Organizations Units: 4
- CMGT 530 Social Dynamics of Communication Technologies Units: 4
- CMGT 537 The Industry, Science and Culture of Video Games Units: 4
- CMGT 541 Integrated Communication Strategies Units: 4
- CMGT 555 Online Marketing Communication Development and Analysis Units: 4
- CMGT 568 Influencer Strategies Units: 4
- CMGT 587 Audience Analysis Units: 4

Cyber Security Engineering (MS)

Associate Director of Informatics: Clifford Neumann, PhD

The Master of Science in Cyber Security Engineering is intended for: a) graduate students who desire to obtain jobs in which computer security knowledge and skills are required; b) graduate students who wish to continue on a path toward enrollment for a doctoral degree focusing on information security; c) individuals in degree programs or job fields that have

responsibility for information security. The typical admitted student will have the following qualifications:

- an undergraduate degree in computer science, electrical engineering or information security;
- programming capability;
- understanding of computer networking and computer operating systems.
- desire to learn information security techniques and tools that are directly applicable to current information security challenges; and
- above average mathematical foundation.

During completion of the program, students will learn the fundamentals of developing, engineering and operating secure information systems. They will become versed in the challenges and problems of secure operating systems, secure applications, secure networking, database security and privacy, use of cryptography and key management. They will learn to develop a security policy and how policy drives technology decisions. Students will gain the knowledge and skills necessary to administer environments that require high levels of information security, both from the standpoint of the principles of information protection and the role application technology has in meeting information protection needs. Students will understand the value of assets, the business model of threats, the threat matrix, mitigation strategies and how this integrates with the core organizational mission. They will understand why information security plans succeed or fail.

Students will have hands-on experience simulating real-world scenarios with extensive laboratory work that is designed by current and former information security practitioners.

For Admission Requirements, refer to Viterbi Graduate Degrees and Requirements.

Requirements for completion (28 units minimum).

Required Courses

(16 units)

- CSCI 530 Security Systems Units: 4
- DSCI 519 Foundations and Policy for Information Security Units: 4
- DSCI 523 Computer Systems Assurance Units: 4
- DSCI 529 Security and Privacy Units: 4

At least two of the following:

(8 units minimum)

- CSCI 531 Applied Cryptography Units: 4
- DSCI 525 Trusted System Design, Analysis and Development Units: 4
- DSCI 526 Secure Systems Administration Units: 4
- DSCI 528 Computer Forensics Units: 4

Plus an additional 4 units that may be composed of items from the above list or

- DSCI 590 Directed Research Units: 1, 1.5, 2, 2.5, 3, 3.5, 4, 4.5, 5, 6, 7, 8, 9, 10, 11, 12 **
- PTE 519 Integrated Physical and Cyber Security for Oil and Gas Operations Units: 3

Note:

**A maximum of 2 units of DSCI 590 may be applied.
Other courses may be approved in consultation with the department adviser, including classes in the student's proposed problem domain.

Environmental Data Science (MS)

datascience.usc.edu

Dornsife College of Letters, Arts and Sciences, Environmental Studies
Viterbi School of Engineering, Computer Science/Data Science
Program Director (Data Science): Yolanda Gil, PhD
Program Co-Director (Environmental Studies): John Heidelberg, PhD

A minimum of 32 units with an overall cumulative GPA of at least 3.0 is required. Students can complete the degree in either three or four semesters, depending on whether they take courses in the summer.

The proposed curriculum relies on existing courses currently taught at USC. The degree will consist of a set of required core and elective courses in both data science and course related to environmental studies. On the data science side, students will learn about artificial intelligence (particularly machine learning and semantic data models), data management, privacy, and data visualization. Courses in environmental studies will provide a foundation in natural resource dynamics and management, as well as today's most pressing environmental challenges. Courses in environmental studies will provide a foundation in natural resource dynamics and management, as well as today's most pressing environmental challenges. Capstone courses based on real-world projects will enable students to acquire practical experience applying data science to address particular environmental problems of interest.

For Admission Requirements, refer to Viterbi Graduate Degrees and Requirements.

Required Core (6 courses, 24 units)

Data Science

- DSCI 510 Principles of Programming for Data Science Units: 4
- DSCI 549 Introduction to Computational Thinking and Data Science Units: 4
- DSCI 550 Data Science at Scale Units: 4

Environmental/Sustainability Studies

- ENST 500 Interdisciplinary Approaches to Environmental Studies Units: 4
- ENST 530 Environmental Risk Analysis Units: 4
- SSCI 581 Concepts for Spatial Thinking Units: 4

Electives (2 courses, 8 units)

Data Science

Choose one 4-unit course:

- DSCI 551 Foundations of Data Management Units: 4
- DSCI 552 Machine Learning for Data Science Units: 4
- DSCI 553 Foundations and Applications of Data Mining Units: 4
- DSCI 554 Data Visualization Units: 4
- DSCI 555 Interaction Design and Usability Testing Units: 4
- DSCI 556 User Experience Design and Strategy Units: 4
- DSCI 564 Probability and Statistics for Data Science Units: 4
- DSCI 599 Special Topics Units: 1, 2, 3, 4, 5, 6, 7, 8

Environmental Studies and Related

Choose one 4-unit course:

- ENST 492 Directed Environmental Policy and Science Internship Units: 2, 4
- ENST 500 Interdisciplinary Approaches to Environmental Studies Units: 4
- ENST 520 Environmental Law and Policy Units: 4
- ENST 540 California Coastal Zone Science and Policy Units: 4
- ENST 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 (4 units required)
- GEOL 412 Oceans, Climate, and the Environment Units: 4
- GEOL 425L Data Analysis in the Earth and Environmental Sciences Units: 4
- GEOL 470L Environmental Hydrogeology Units: 4

Healthcare Data Science (MS)

datascience.usc.edu

Program Director (Data Science): Yolanda Gil, PhD
Program Co-Director (Biomedical Engineering): Brent J. Liu, PhD
The USC Master of Science in Healthcare Data Science provides students with the knowledge and skills to:

- Understand the requirements and techniques to manage health and healthcare process data collected by health

care providers and organizations, use it to improve patient care, and analyze it to improve the business processes in and between hospitals, insurance companies, public health agencies, and other components of the healthcare ecosystem
- Understand the use of data science in clinical research and translational medicine
- Understand the design and development of personal devices and mobile apps to collect health data and to monitor health-related variables
- Understand the use of emerging technologies in data science and their application to health and healthcare delivery processes
- Gain direct experiences in finding and articulating challenges in healthcare settings that can be met through integrative engineering solutions.

The degree consists of a set of required core courses in both data science and health and a set of electives that include courses in data science and health. On the data science side, students will learn about artificial intelligence (particularly machine learning and semantic data models), data management, privacy, and data visualization. On the health side, students will be integrated into teams working with medical students in healthcare settings. Capstone courses with real-world projects will enable students to acquire practical experience with a data science project based in a healthcare service setting.

Core Courses*

- BME 501 Advanced Topics in Biomedical Systems Units: 4
- BME 566a Topics in Health, Technology and Engineering Units: 2
- BME 566b Topics in Health, Technology and Engineering Units: 2
- DSCI 510 Principles of Programming for Data Science Units: 4
- DSCI 549 Introduction to Computational Thinking and Data Science Units: 4
- DSCI 550 Data Science at Scale Units: 4

Elective Courses

Students must take one course from the Data Science electives and one from the Health Science electives and the remaining units can be chosen from either group.

Data Science*

Choose at least one course from the following:

- CSCI 530 Security Systems Units: 4
- CSCI 548 Information Integration on the Web Units: 4
- CSCI 570 Analysis of Algorithms Units: 4
- CSCI 571 Web Technologies Units: 4
- DSCI 556 User Experience Design and Strategy Units: 4
- DSCI 558 Building Knowledge Graphs Units: 4
- DSCI 529 Security and Privacy Units: 4
- DSCI 551 Foundations of Data Management Units: 4
- DSCI 552 Machine Learning for Data Science Units: 4
- DSCI 553 Foundations and Applications of Data Mining Units: 4
- DSCI 554 Data Visualization Units: 4
- DSCI 555 Interaction Design and Usability Testing Units: 4

Health Science

Choose at least one course from the following:

- BME 525 Advanced Biomedical Imaging Units: 4
- BME 527 Integration of Medical Imaging Systems Units: 4
- BME 528 Medical Diagnostics, Therapeutics and Informatics Applications Units: 4
- BME 566c Topics in Health, Technology and Engineering Units: 2
- BME 566d Topics in Health, Technology and Engineering Units: 2
- PM 504 Quality in Health Care Units: 4
- PM 508 Health Service Delivery in the U.S. Units: 4
- PM 512 Principles of Epidemiology Units: 4
- PM 538 Introduction to Biomedical Informatics Units: 3

*Note:

Students with a computer science background will have the option of replacing DSCI 510, DSCI 549, and DSCI 550 with DSCI 551, DSCI 552, and DSCI 553. As a result, they will be able to take additional data science elective courses.

Total Units: 32

Graduate Certificate

Applied Data Science Graduate Certificate

Students who complete this certificate will be able to pursue professional careers in data science. They will be eligible to be considered for admission to the following MSc programs in data science: Applied Data Science, Communications Data Science, Spatial Data Science, Healthcare Data Science, Public Policy Data Science, and Environmental Data Science.

Students will first learn advanced techniques in data science, including building scalable data systems, core algorithms in machine learning, and practical approaches to mining diverse kinds of data. Through class projects and homeworks, students will create a portfolio of their work to demonstrate their skills to potential employers.

Students will need to complete the three required courses and an elective with no possibility of substitutions or waivers.

Required Core Courses (3 courses, 12 units)

- DSCI 551 Foundations of Data Management Units: 4
- DSCI 552 Machine Learning for Data Science Units: 4
- DSCI 553 Foundations and Applications of Data Mining Units: 4

Elective Courses (take 1 course, 4 units)

- CSCI 544 Applied Natural Language Processing Units: 4
- CSCI 550 Advanced Data Stores Units: 4
- CSCI 570 Analysis of Algorithms Units: 4
- CSCI 572 Information Retrieval and Web Search Engines Units: 4
- CSCI 587 Geospatial Information Management Units: 4
- DSCI 510 Principles of Programming for Data Science Units: 4
- DSCI 529 Security and Privacy Units: 4
- DSCI 549 Introduction to Computational Thinking and Data Science Units: 4
- DSCI 550 Data Science at Scale Units: 4
- DSCI 554 Data Visualization Units: 4
- DSCI 555 Interaction Design and Usability Testing Units: 4
- DSCI 556 User Experience Design and Strategy Units: 4
- DSCI 558 Building Knowledge Graphs Units: 4
- DSCI 560 Data Science Professional Practicum Units: 4
- DSCI 599 Special Topics Units: 1, 2, 3, 4, 5, 6, 7, 8 (with adviser approval)

Data Science Foundations Graduate Certificate

This graduate certificate program teaches students the foundations of data science from a computing perspective. This degree is designed for students with a wide range of backgrounds who have no formal computer science education but have strong math and science skills.

Students who complete this certificate will be able to pursue professional careers in data science. They will be eligible to be considered for admission to the following MSc programs in data science: Applied Data Science, Communications Data Science, Spatial Data Science, Healthcare Data Science, Public Policy Data Science, and Environmental Data Science.

Students will first learn the basics of data science, including data processing, algorithms, parallel computing, statistical methods, and machine learning. They will also learn how to write basic data processing programs in Python. These introductory

classes will prepare them to tackle the complexity of real-world problems to build scalable data systems. Through class projects and homework, students will create a portfolio of their work to demonstrate their skills to potential employers.

Students will need to complete the three required courses with no possibility of substitutions or waivers.

Must complete the following (3 courses, 12 units)

- DSCI 510 Principles of Programming for Data Science Units: 4
- DSCI 549 Introduction to Computational Thinking and Data Science Units: 4
- DSCI 550 Data Science at Scale Units: 4

Information Technology Program

Rapp Research 201 (RRB 201)
(213) 740-4542
Email: itp@usc.edu
itp.usc.edu
Director: Jeffrey Miller, PhD
Associate Director: Kendra Walther, MS
Professors of Engineering Practice: Jeffrey Miller, PhD; Nitin Kale, MS
Associate Professors of Engineering Practice: Joseph Greenfield, PhD; Trina Gregory, MS; Sanjay Madhav, MS; Rob Parke, MS
Senior Lecturers: Nathan Greenfield, MS; Gregg Ibbotson, MA; Nayeon Kim, BS; Raymond Kim, MS; Barrett Koster, PhD; Mike Lee, BS; Zune Nguyen, BS; Richard Vawter, MS, MBA; Kendra Walther, MS; Matthew Whiting, MS
Lecturers: Kristof Aldenderfer, BS; Yifei Ding, MS

The Information Technology Program (ITP) embodies the idea "Technology for All through X+Tech," allowing students to couple any major (X) with technology (Tech). Students explore how practical technology education can be used to enhance their knowledge in other fields. ITP offers 15 minors and specializations in Applied Analytics, Applied Computer Security, Blockchain, Cloud Computing with DevOps, Computer and Digital Forensics, Computer Programming, Connected Devices and Making, Education and Computing Minor (with Rossier School of Education), Enterprise Information Systems, Innovation: The Digital Entrepreneur, Mobile App Development, Technical Game Art, Video Game Design and Management, Video Game Programming, and Web Technologies and Applications.

ITP courses are open to all USC students.

Minors

ITP minors are open to undergraduate students in all majors.

To apply for a minor, students should meet the regular admissions standards and have a declared USC major. For specific information on admission and application procedures, see itp.usc.edu. Students should consult ITP's advisers about course sequencing, departmental clearance, and course substitutions.

Please see the catalogue page for each minor for program descriptions and requirements.

Specializations

ITP specializations are open to students in all majors. Specializations are an alternative for students interested in gaining experience who do not have space to complete a full minor program. Specializations do not appear on transcripts, but students are eligible to receive certificates from ITP upon completion of required course work to document their successful completion of the specialization.

For specific information on admission and application procedures, see itp.usc.edu. Students should consult ITP's advisers about course sequencing, departmental clearance, and course substitutions.

Please see itp.usc.edu/academics for program requirements.

Interdisciplinary Programs

ITP collaborates with other USC academic units that offer the following major and minor programs:

- Data Science (BA)*
- Education and Computing Minor
- Foundations of Data Science Minor
- Intelligence and Cyber Operations (BA)

Minor

3D Computer Graphics and Modeling Minor

The 3D Computer Graphics and Modeling minor merges theoretical concepts with state-of-the-art techniques to prepare students to apply 3D computer graphics across a wide range of industry applications. Hands-on courses build from a core foundation throughout the spectrum of advanced cutting edge technologies as they are used in real-world application and culminate with the production of a portfolio of work commensurate with the needs of 3D industries.

The minor requires a minimum of 16 units, including a minimum of 12 upper-division units.

Required Course (2 units)

- ITP 215L Introduction to 3D Modeling, Animation, and Visual Effects Units: 2

Electives (14 units minimum)

At least 12 units from the following

- ITP 305 Intermediate 3D Modeling and Procedural Asset Pipelines Units: 4 *
- ITP 308 Computer-Aided Design for Bio-Mechanical Systems Units: 3
- ITP 315x 3D Character Rigging and Animation Units: 4 *
- ITP 360 Advanced Visual Effects and Compositing Units: 4 *
- ITP 415 3-D Design and Prototyping Units: 2 *

The remaining two units may be selected from the list above or from the following

- ARCH 207 Computer Applications in Architecture Units: 2
- CSCI 420 Computer Graphics Units: 4 *
- DES 213 Digital Tools in 3D Design Units: 2 *
- DES 230 3D Design: Materials and Tools Units: 4 *
- ITP 190 Introduction to Adobe Photoshop Units: 2
- ITP 211 Techniques of Visual Persuasion - Still Images Units: 4
- ITP 470 Information Technology Practicum Units: 1, 2, 3, 4 * (1-4 units)
- ITP 480 Information Technology Internship Units: 1, 2, 3, 4 * (1-4 units)
- THTR 407a Drawing and Rendering for the Theatre Units: 2
- THTR 409 Advanced Drafting: Vectorworks Units: 3 *

Note:

*Prerequisite required

Applied Analytics Minor

The minor in Applied Analytics prepares undergraduate students in the field of data analytics as applied to real-world problems. Applications vary from business to health care, social media to sports. The goal is to educate students to become *data analysts*. Students in the minor will learn all aspects of analytics: technology infrastructure to stage data, techniques to analyze data, tools to visualize results, and systems to publish and share the findings.

Requirements for minor completion: Minimum units 18

Required Courses (14 units)

- ITP 115 Programming in Python Units: 2
- ITP 249 Introduction to Data Analytics Units: 4
- ITP 449 Applications of Machine Learning Units: 4
- ITP 487 Enterprise Data Analytics Units: 4

Electives (Choose a minimum of 4 units)

- DSO 424 Business Forecasting Units: 4
  ** Students must take BUAD 310g prior to taking DSO 424.*
- DSO 428 Essentials and Digital Frontiers of Big Data Units: 4
- ITP 489 In-Memory Data Modeling and Analytics Units: 4
  ** Students must take ITP 249 or ITP 320 prior to taking ITP 489.*

Applied Computer Security Minor

The minor in applied computer security combines both theoretical concepts and technical skills to prepare students for a career in information security while incorporating their major field of work. Students will study various areas of computer security, including hacking, ethics, forensics, networking and security management. Electives are available depending on the students' academic and professional goals.

Requirements for completion (five core courses plus one elective)

Minimum units: 18

Required Courses (14 Units)

- ITP 125L From Hackers to CEOs: Introduction to Information Security Units: 2
- ITP 325 Ethical Hacking and Systems Defense Units: 3
- ITP 357 Enterprise Network Design Units: 3
- ITP 370 Information Security Management Units: 3
- ITP 375 Digital Forensics Units: 3

Elective (4 Units)

- ITP 425 Web Application Security Units: 4
- ITP 457 Network Security Units: 4
- ITP 475 Advanced Digital Forensics Units: 4

Blockchain Minor

Blockchain is a way of recording peer-to-peer transactions in a distributed public ledger. The Blockchain Minor explores the fundamentals of the public (and private), transparent, secure, tamper-resistant, and distributed databases known as blockchains. Students will learn how to develop smart contracts as self-executing programs that run on the blockchain and be introduced to cutting-edge research results and developments as blockchain technology evolves. Finally, students will apply their knowledge in a project-oriented capstone course during which they will design and develop a practical application of blockchain technology.

Required Courses (16 units)

- ITP 256 Blockchain Units: 4
- ITP 356 Blockchain: Decentralized Applications Units: 4 (Prerequisite: ITP 256)
- ITP 366 Blockchain: Advances and Use Cases Units: 4 (Prerequisite: ITP 256)
- ITP 456 Blockchain: Capstone Units: 4 (Prerequisite: ITP 356 and ITP 366)

Cloud Computing with DevOps Minor

The minor in Cloud Computing with DevOps teaches undergraduate students how to design and implement services on a variety of Cloud providers to satisfy an organization's needs. Organizations are not buying their own servers. They are relying on resources provided by Cloud computing services. This minor will explore a variety of Cloud providers and how to architect the services they offer to build globally available services like social media platforms, video streaming services, and more.

Students who complete the minor will be able to explain, "What is the Cloud, and what can it do?" They will be equipped to analyze, build and evaluate things built on the Cloud. Students will learn about DevOps — which is the use of software development skills to manage digital infrastructure operations. With the skills and knowledge from this minor, students will be able to step into the roles of technology management or systems administration.

Students should meet the regular USC admissions standards and have a declared USC major. Students will complete an application for the minor with the Viterbi School of Engineering. For specific information on admission and application procedures, contact the Information Technology Program at (213) 740-4542.

Required Courses (16 units)

- ITP 111 What is the Cloud?: An Introduction to DevOps Units: 2
- ITP 115 Programming in Python Units: 2
- ITP 222 Linux and Containers Units: 4
- ITP 333 Digital Infrastructure Units: 4
- ITP 444 Digital Architecture Units: 4

Computer and Digital Forensics Minor

The computer and digital forensics minor combines both theoretical concepts and practical skills to prepare students for a career as a digital forensics investigator. Students will study various areas of cyber-forensics, including forensic methodologies and processes, digital evidence-gathering and preservation, investigations and examinations, and court presentation. Electives are available depending on the students' academic and professional goals.

Requirements for completion (core courses plus electives)

Minimum units: 18

Required Courses (4 Courses, 12 Units)

- ITP 125L From Hackers to CEOs: Introduction to Information Security Units: 2
- ITP 375 Digital Forensics Units: 3 *
- ITP 475 Advanced Digital Forensics Units: 4 *
- ITP 479 Cyber Law and Privacy Units: 3

Forensic Electives (Choose Two, 6 Units)

- ITP 325 Ethical Hacking and Systems Defense Units: 3 *
- ITP 445 Macintosh, OSX, and iOS Forensics Units: 3 *
- ITP 446 Cyber Breach Investigations Units: 3 *
- ITP 447 Mobile Device Security and Forensics Units: 3 *
- ITP 468 Connected Devices Project Units: 4 *

Note:

**Prerequisite required*

Computer Programming Minor

The minor in computer programming focuses on the practical programming skills necessary to solve problems in a variety of domains including on desktops, laptops, mobile devices, the Web, the cloud and for video games. Upon completion of the minor, students will have strong experience with the application of programming languages in several different contexts.

Students with a declared major in computer science, computer science and computer engineering, computer science (games), or computer science and business administration are not eligible for this minor. Students with a declared minor in computer science are likewise not eligible.

Choose one introductory programming course (2 units)

- ITP 109 Introduction to Java Programming Units: 2
- ITP 115 Programming in Python Units: 2
  ** ITP 115 is recommended.*
- ITP 165 Introduction to C++ Programming Units: 2

Complete the following (8 units)

- ITP 265 Object-Oriented Programming Units: 4
- ITP 365 Managing Data in C++ Units: 4

Choose two electives from the following (8 units)

- ITP 303 Full-Stack Web Development Units: 4
- ITP 341 Android App Development Units: 4
- ITP 342 iOS App Development Units: 4
- ITP 344 Advanced iOS App Development Units: 4
- ITP 345 Advanced Android App Development Units: 4

- ITP 368 Programming Graphical User Interfaces Units: 4
- ITP 380 Video Game Programming Units: 4
- ITP 435 Professional C++ Units: 4
- ITP 439 Compiler Development Units: 4

Connected Devices and Making Minor

The minor in Connected Devices and Making teaches undergraduate students how to design, develop and control electronic devices. With more and more connected devices gathering data both for industrial applications as well as to help inform consumer decisions, the opportunity for skills in this area has increased rapidly. The goal is to produce students that can interface with hardware, design and manufacture physical systems, as well as program the software for control and communication.

Devices are now becoming data collection tools that can act, inform, and interface with many different aspects of our world. Being at the forefront of this technology offers vast career opportunities from startups in wearables and home automation to corporations working on cutting-edge medical devices. Students will learn to work with electronics, sensors, microcontrollers, and communication technologies. Students will also produce custom printed circuit boards and implement design and manufacturing concepts to produce a physical prototype for testing and demonstration. Lastly, students will learn to integrate their design into existing infrastructures for connectivity and data acquisition.

Students should meet the regular USC admissions standards and have a declared USC major. Students will complete an application for the minor with the Viterbi School of Engineering. For specific information on admission and application procedures, contact the Information Technology Program at (213) 740-4542.

Students with a declared major in Electrical Engineering are not eligible for this minor.

The minor requires a minimum of 16 units.

Required Courses (8 units)

Complete one of the following (2 units)

- ITP 109 Introduction to Java Programming Units: 2
- ITP 115 Programming in Python Units: 2
- ITP 165 Introduction to C++ Programming Units: 2

Complete both of the following (6 units)

- ITP 228 Computer-Aided Modeling for 3D Product Design Units: 2
- ITP 348 Making Smart Devices: Introduction to Electronics/ Wearables Units: 4
  Prerequisite: ITP 109, ITP 115 or ITP 165 must be completed before ITP 348.

Electives (choose a minimum of 8 units)

- ITP 249 Introduction to Data Analytics Units: 4
- ITP 341 Android App Development Units: 4
  Prerequisite: ITP 265 or CSCI 103L must be completed before ITP 341.
- ITP 342 iOS App Development Units: 4
  Prerequisite: ITP 265 or CSCI 103L must be completed before ITP 342.
- ITP 388 Developing Connected Devices Units: 4
  Prerequisite: ITP 348 must be completed before ITP 388.
- ITP 466 Building the High Tech Startup Units: 4
- ITP 468 Connected Devices Project Units: 4
  Prerequisite: ITP 228 and ITP 348 must be completed before ITP 468.
- ITP 476 Technologies for Interactive Marketing Units: 4

Enterprise Information Systems Minor

The first two decades of the 21st century have seen tremendous growth of global business which has required robust and integrated information systems to support streamlined business processes. These Enterprise Information Systems, also known as Enterprise Resource Planning (ERP) systems, have continued to mature and dominate the information systems of corporations. Most Fortune 500 companies have adopted ERP systems. This minor combines business process management and information technology to prepare students for a career in technical as well as business consulting in the ERP domain. Students will study various areas of ERP implementation, configuration, business intelligence, security and supply chain management. Electives are available depending on the students' academic and professional goals.

The minor requires a minimum of 16 units.

Required Courses (12 Units)

- ITP 320 Enterprise Information Systems Units: 4
- ITP 422 Configuring Enterprise Resource Planning Systems Units: 4
- ITP 487 Enterprise Data Analytics Units: 4

Electives (Choose Minimum 4 Units)

- ITP 454x Enterprise Resource Planning, Design, and Implementation Units: 3
- ITP 470 Information Technology Practicum Units: 1, 2, 3, 4
- ITP 486 Securing and Auditing Enterprise Resource Planning Systems Units: 3
- ITP 488 Managing Supply Chains with Advanced Planning & Optimization Units: 3
- ITP 489 In-Memory Data Modeling and Analytics Units: 4

Innovation: The Digital Entrepreneur Minor

The Minor in Innovation: The Digital Entrepreneur is jointly sponsored by the Information Technology Program in the Viterbi School of Engineering and the Lloyd Greif Center for Entrepreneurial Studies in the USC Marshall School of Business. The minor is designed for students from a wide range of backgrounds who are interested in starting their own digital ventures, working for start-up companies, or pursuing traditional jobs with large corporations and consulting firms that may involve launching new digital business units. Students will learn all major elements of launching a digital venture including digital disruption, ideation, high-tech product management, online customer acquisition, technology implementation, online business models, digital marketing and monetization. Students will work on launching a digital venture in a team-based environment in the capstone class.

A minimum of 21 units are required to complete the minor, with at least 16 unique units outside of the student's major.

The Information Technology Program in the Viterbi School of Engineering handles advising and admissions relating to the minor, consulting as needed with the Greif Center for Entrepreneurial Studies in the Marshall School of Business. See Information Technology Program for course requirements.

Required Courses (19 Units)

- BAEP 452 Feasibility Analysis Units: 4 *
- BUAD 301 Technology Entrepreneurship Units: 3
- ITP 466 Building the High Tech Startup Units: 4
- ITP 476 Technologies for Interactive Marketing Units: 4
- ITP 496 The Startup Launchpad Lab Units: 2 *+ (capstone course; *Corequisite:* BAEP 496)
- BAEP 496 The Digital Startup Launchpad Units: 2 *+(capstone course; Corequisite: ITP 496)

Elective Courses (Minimum of 2 units)

- BAEP 460 Seminar in Entrepreneurship Units: 2
- BAEP 465 Digital Playbook for Entrepreneurs: Creating a Tech Startup Units: 2
- BAEP 470 The Entrepreneurial Mindset — Taking the Leap Units: 2
- BUAD 304 Organizational Behavior and Leadership Units: 4
- BUAD 307 Marketing Fundamentals Units: 4
- DSO 431 Digital Innovation as Competitive Advantage Units: 4
- ITP 310 Design for User Experience Units: 4
- ITP 320 Enterprise Information Systems Units: 4
- ITP 411 Techniques of Visual Persuasion - Moving Images Units: 4

- ITP 470 Information Technology Practicum Units: 1, 2, 3, 4
- ITP 479 Cyber Law and Privacy Units: 3

Note:

**Prerequisite required*
+ITP 496 *and* BAEP 496 *must be taken in the same semester.*

Mobile App Development Minor

Students will study and gain experience with the technologies, tools, frameworks, and languages that are most commonly used in developing apps for mobile devices such as smartphones and tablets. They will learn the fundamentals of the programming languages, how to design mobile interfaces, how to use the libraries to build apps that have the proper look and feel, how to design and handle user input, and other aspects. Students will go through the process of building a mobile app from idea to product. Students will learn the essential principles of mobile apps in order to be prepared for the new technologies and frameworks that are constantly being developed.

Students should meet the regular admissions standards and have a declared USC major. Students will complete an application for the minor with the Viterbi School of Engineering. For specific information on admission and application procedures, contact the Information Technology Program at (213) 740-4542.

The minor requires a minimum of 18 units.

Required courses (10 units)

Complete the following (6 units)

- ITP 115 Programming in Python Units: 2
- ITP 265 Object-Oriented Programming Units: 4

Complete one of the following (4 units)

- ITP 341 Android App Development Units: 4
- ITP 342 iOS App Development Units: 4

Choose two elective courses (8 units minimum)

- ITP 303 Full-Stack Web Development Units: 4
- ITP 310 Design for User Experience Units: 4
- ITP 341 Android App Development Units: 4
- ITP 342 iOS App Development Units: 4
- ITP 344 Advanced iOS App Development Units: 4
- ITP 345 Advanced Android App Development Units: 4
- ITP 382 Mobile Game Development Units: 4
- ITP 442 Mobile App Project Units: 4

Technical Game Art Minor

The Technical Game Art minor is a unique 16-unit program, offered by the Information Technology Program that combines an engineering background with the production practice of character modeling, rigging and animation to prepare students for a professional career in the field of 3d games and cinematics. Focuses on creative orchestrations per project, user-friendly toolsets and production planning.

Required Courses (14 units)

Complete all of the following:

- ITP 215L Introduction to 3D Modeling, Animation, and Visual Effects Units: 2
- ITP 351 3D Character Modeling for Games Units: 4
- ITP 361 Character Rigging for Games Units: 4
- ITP 371 Technical Character Animation for Games Units: 4

Electives (2 units)

Complete one of the following:

- ITP 115 Programming in Python Units: 2
- ITP 116 Accelerated Programming in Python Units: 2
- CTAN 452 Introduction to 3-D Computer Animation Units: 2
- CTAN 462 Visual Effects Units: 2

Video Game Design and Management Minor

The video game design and management minor integrates theoretical concepts and practical skills to prepare students for a career in interactive entertainment, specifically the video game industry. Students will be exposed to a variety of design concepts related to creating video games including: level design, game-play control, user interface, multiplayer, game mechanics, and storytelling. As opposed to the video game programming minor in which students will be writing code and programming game engines, students in the video game design and management minor will apply design concepts to different game genres and use game design software tools to create a working demo of a video game during the course of the minor program.

Required Courses (14 Units Minimum)

- ITP 230x Video Game Quality Assurance Units: 4 or
- ITP 280 Video Game Production Units: 4

- ITP 392 Designing and Producing Video Games Units: 4 *
- CTIN 404L User Research for Games Units: 2
- CTIN 488 Game Design Workshop Units: 4

Elective Courses (4 Units Minimum)

- ITP 230x Video Game Quality Assurance Units: 4
- ITP 280 Video Game Production Units: 4
- ITP 491 Level Design and Development for Video Games Units: 4 *
- CTIN 458 Business and Management of Games Units: 2
- CTIN 478 Level Design Workshop Units: 2
- CTIN 497 Interactive Media Startup Units: 1

Note:

** Students must take ITP 230x or ITP 280 prior to taking ITP 392 or ITP 491.*

Video Game Programming Minor

The video game programming minor integrates the theoretical concepts and practical skills to prepare students for a career in interactive entertainment. Students will gain exposure to a variety of programming concepts related to creating video games including: 3-D graphics, artificial intelligence, particle systems, rendering, collision detection, game algorithms, physics concepts and math formulas. In contrast to the video game design minor where the focus is applying design concepts and using software design tools, students in the video game programming minor will evaluate, write and debug code.

This minor features an optional capstone that is a team-based, year-long game development project. Students are only eligible for the capstone after having completed all the core courses. The capstone must be taken in both the fall and spring semesters of a single academic year.

Requirements for completion (four core courses plus 4 units of electives)

The minor requires a minimum of 18 units.

Core Courses (14 Units)

- ITP 165 Introduction to C++ Programming Units: 2 *
- ITP 265 Object-Oriented Programming Units: 4 **
- ITP 365 Managing Data in C++ Units: 4 **
- ITP 380 Video Game Programming Units: 4

Elective Courses (4 Units)

- ITP 382 Mobile Game Development Units: 4
- ITP 435 Professional C++ Units: 4
- ITP 439 Compiler Development Units: 4
- ITP 485 Programming Game Engines Units: 4
- CSCI 491aL Final Game Project Units: 4 ***
- CSCI 491bL Final Game Project Units: 2 ***

Note:

** Students with prior programming experience may request to take a placement test. Students who pass this placement test with have their ITP 165 requirement waived.*
*** Students who have completed CSCI 103L and CSCI 104L may replace the ITP 265 and ITP 365 requirements with 8 units from the list of elective courses. Additionally, these students may have their ITP 165 requirement waived.*
**** Optional capstone. See details above for requirements.*

Web Technologies and Applications Minor

The Web Technologies and Applications minor is designed to introduce students to the web development field. Upon completion of the minor, students will be able to design and develop websites and web applications from the ground up using major web technologies, standards, and frameworks. Students can use the theoretical concepts and practical applications of web technologies not only in the web industry, but also within a different major field of study. The broad areas of study include web publishing, programming, databases, security, and multimedia. Electives will be chosen based on the students' academic and professional goals.

The minor requires a minimum of 18 units.

Required courses (14 units)

- ITP 104L Web Publishing Units: 2
- ITP 301 Front-End Web Development Units: 4
- ITP 304 Back-End Web Development Units: 4
- ITP 460 Web Application Project Units: 4

Choose one elective course (4 units)

- ITP 302 Advanced Web Publishing Units: 4
- ITP 310 Design for User Experience Units: 4
- ITP 404 Advanced Front-End Web Development Units: 4
- ITP 405 Advanced Back-End Web Development Units: 4
- ITP 425 Web Application Security Units: 4

Master's Degree

Manufacturing Engineering (MS)

Manufacturing engineering at USC is a multidisciplinary program that confers the degree of Master of Science and is designed to produce graduates capable of responding to the needs of modern, up-to-date manufacturing. These graduates should be able to design, install and operate complex manufacturing systems made up of people, materials, automated machines and information systems. The Departments of Computer Science, Electrical Engineering, Industrial and Systems Engineering, Materials Science, Mechanical Engineering, and Entrepreneurship participate in the Manufacturing Engineering Program.

Course work in the program will train students in traditional manufacturing engineering topics, such as materials selection and process design. Additional courses will include modern technologies such as 3D printing and system-level concepts of integrated product and process design, applications of modern information technology to design and manufacturing, hands-on laboratories using advanced manufacturing equipment and commercial software, and innovation and entrepreneurship.

Curriculum

A total of 30 units is required beyond the BS degree. A minimum of 21 units must be at the 500 level or above. A maximum of 6 units of electives may be taken from non-engineering departments. At least three courses must be taken in the student's selected area of specialization.

Required Courses

- CSCI 585 Database Systems Units: 4 or
- ISE 510 Advanced Computational Design and Manufacturing Units: 3
- ISE 511L Mechatronic Systems Engineering Units: 3
- ISE 517 Modern Enterprise Systems Units: 3 or
- ISE 576 Industrial Ecology: Technology-Environment Interaction Units: 3
- ISE 525 Design of Experiments Units: 3 or
- AME 525 Engineering Analysis Units: 4
- Approved electives Units: 18 *

Total units: 30

**A list of approved electives in specialization areas is available from the department. Departmental approval is required for courses not listed.*

Program Director: Stephen C-Y Lu, PhD

Master's Degree

Product Development Engineering (MS)

The Master of Science in product development engineering (MS PDE) is an interdisciplinary graduate degree program at USC jointly offered by the Aerospace and Mechanical Engineering and the Daniel J. Epstein Industrial and Systems Engineering (ISE) departments. The Daniel J. Epstein Industrial and Systems department manages this joint degree program. Students can enter this program in either the fall or spring semesters, and it is available to full-time and part-time students.

Admission

The program has the following admission requirements:

- A bachelor's degree in an area of engineering or science;
- An undergraduate cumulative GPA of 3.0 or above; and
- Satisfactory general GRE scores of at least 146 verbal and 151 quantitative.

The MS PDE program requires a minimum of 27 units to complete. Although it is mainly a course work-based program, students can choose to complete the program with or without a thesis requirement. For the thesis option, 4 of the 27 units are to be thesis. At least 16 units, not including thesis, must be at the 500 level or higher, and at least 18 units must be from the AME and ISE departments. For the non-thesis option, 18 of the 27 units must be at the 500 level or higher from the AME and ISE departments, and/or closely related departments. Students may choose to take up to 6 units of directed research (e.g., AME 590 or ISE 590). Students must maintain a minimal cumulative GPA of 3.0 in USC course work to graduate.

The program's prerequisite is a minimum of one 400 level course in either engineering design or engineering economy. Admitted students who do not meet this prerequisite will be assigned appropriate USC course(s) to complete the deficiencies. Deficiency courses, if taken at the 400 level, may be counted toward 27 units as general electives with adviser approval.

Depending on the academic background and career interests of students, the program offers two areas of specialization, product development technology and product development systems. The product development technology specialization will prepare students for a career as future product development engineers, while the product development systems specialization will prepare students as future product development managers. Students entering this program must declare their choice of an area of specialization and follow the requirements of each area of specialization to graduate.

Core Courses (6 units)

- ISE 501 Innovative Conceptual Design for New Product Development Units: 3
- ISE 545 Technology Development and Implementation Units: 3

Product Development Systems Specialization (12-13 units)

- ISE 515 Engineering Project Management Units: 3
- ISE 544 Leading and Managing Engineering Teams Units: 3

Product Development Systems Electives

Select two courses.

- BAEP 557 Technology Commercialization Units: 3
- CE 576 Invention and Technology Development Units: 3
- DSCI 552 Machine Learning for Data Science Units: 4
- ISE 510 Advanced Computational Design and Manufacturing Units: 3
- ISE 511L Mechatronic Systems Engineering Units: 3
- ISE 514 Advanced Production Planning and Scheduling Units: 3
- ISE 525 Design of Experiments Units: 3
- ISE 527 Quality Management for Engineers Units: 3
- ISE 561 Economic Analysis of Engineering Projects Units: 3
- ISE 562 Decision Analysis Units: 3
- ISE 567 Collaborative Engineering Principles and Practice Units: 3
- ISE 580 Performance Analysis with Simulation Units: 3
- ISE 583 Enterprise Wide Information Systems Units: 3
- ISE 585 Strategic Management of Technology Units: 3
- ISE 610 Advance Design of Experiments and Quality Engineering Units: 3
- SAE 541 Systems Engineering Theory and Practice Units: 3
- SAE 549 Systems Architecting Units: 3

Product Development Technology Specialization (13-14 units)

- AME 503 Advanced Mechanical Design Units: 3
- AME 525 Engineering Analysis Units: 4

Product Development Technology Electives

Select two courses.

- AME 408 Computer-Aided Design of Mechanical Systems Units: 3
- AME 410 Engineering Design Theory and Methodology Units: 3
- AME 502 Modern Topics in Aerospace Design Units: 3
- AME 505 Engineering Information Modeling Units: 3
- AME 527 Elements of Vehicle and Energy Systems Design Units: 3
- AME 544 Computer Control of Mechanical Systems Units: 3
- AME 546 Design for Manufacturing Assembly Units: 4
- AME 547 Foundations for Manufacturing Automation Units: 4
- AME 578 Modern Alternative Energy Conversion Devices Units: 3
- ASTE 523 Design of Low Cost Space Missions Units: 3
- CE 576 Invention and Technology Development Units: 3
- ISE 510 Advanced Computational Design and Manufacturing Units: 3
- ISE 567 Collaborative Engineering Principles and Practice Units: 3
- ISE 576 Industrial Ecology: Technology-Environment Interaction Units: 3
- MASC 551 Mechanical Behavior of Engineering Materials Units: 4
- MASC 583 Materials Selection Units: 4
- SAE 549 Systems Architecting Units: 3

General Electives (9 Units)

Adviser approved electives must be upper-division 400- or 500-level courses. Up to 4 units can be transferred from other institutions.

Minimum units required for degree: 27

Sustainable Infrastructure Systems

The Sustainable Infrastructure Systems program prepares students for immediate and effective participation in the modern infrastructure workforce through a common core that includes smart-system design for sustainable infrastructures, the societal and regulatory context of infrastructure engineering decisions, and construction management. Five plans of study for the master of science degree allow for specialization based on background and interest.

Master's Degree

Civil Engineering (Water and Waste Management) (MS)

Sustainable Infrastructure Systems

The Sustainable Infrastructure Systems program prepares students for immediate and effective participation in the modern infrastructure workforce through a common core that includes smart-system design for sustainable infrastructures, the societal and regulatory context of infrastructure engineering decisions, and construction management. Four plans of study for the Master of Science degree allow for specialization based on background and interest.

Total units for the degree is 28.

For admission requirements, refer to Viterbi Graduate Degrees and Requirements at USC Viterbi School of Engineering.

Electrical Engineering (Electric Power) (MS)

Sustainable Infrastructure Systems

The Sustainable Infrastructure Systems program prepares students for immediate and effective participation in the modern infrastructure workforce through a common core that includes smart-system design for sustainable infrastructures, the societal and regulatory context of infrastructure engineering decisions, and construction management. Four plans of study for the Master of Science degree allow for specialization based on background and interest.

Master of Science in Electrical Engineering (Electric Power)

Required Courses

- EE 443 Introduction to Power Systems Units: 4
- EE 444 Power Systems Technology Units: 4
- EE 521 Power Systems Analysis and Design Units: 4
- SAE 515 Sustainable Infrastructure Systems Units: 4

Elective Courses (At least four courses, take at least one from each area)

Transmission, Distribution and Planning

- CE 501 Construction Practices Units: 4
- EE 516 High-Voltage DC Transmission Systems Units: 4
- EE 524 Transients in Power Systems Units: 3

- EE 525 Power System Protection Units: 4
- EE 526 Renewable Energy in Power Systems Units: 4

High-Voltage Equipment and Design

- EE 515 High-Voltage Technology Units: 3
- EE 528 Power Electronics Units: 4

Power-System Control and the Smart Grid

- EE 482 Linear Control Systems Units: 4
- EE 527 Net-Centric Power-System Control Units: 3
- EE 543aL Digital Control Systems Units: 3
- EE 585 Linear System Theory Units: 4
- EE 593 Robust Multivariable Control Units: 4

Additional Requirements

Students with MS degrees in engineering or science disciplines can be accepted in these programs. Students must satisfy all other departmental degree requirements.

Total Minimum Units: 28

Mechanical Engineering (Energy Conversion) (MS)

Sustainable Infrastructure Systems

The Sustainable Infrastructure Systems program prepares students for immediate and effective participation in the modern infrastructure workforce through a common core that includes smart-system design for sustainable infrastructures, the societal and regulatory context of infrastructure engineering decisions, and construction management. Four plans of study for the Master of Science degree allow for specialization based on background and interest.

Master of Science in Mechanical Engineering (Energy Conversion)

Students with MS degrees in engineering or science disciplines can be accepted in these programs. Students must satisfy all other departmental degree requirements. Admission requirements follow the general admission rules for aerospace and mechanical engineering graduate programs. For admission requirements, refer to Viterbi Graduate Degrees and Requirements at USC Viterbi School of Engineering. The program requires completion of a minimum of 27 units, with at least 18 units at the 500 level, and a cumulative GPA of at least 3.0 for graduation. Students will be given advisement in the first semester of their study. A minimum of 15 units must be 500-level courses in major department. Four of the required units must be in engineering analysis AME 525.

In addition to AME 525, students are required to take five core courses covering energy and propulsion, sustainable energy, alternative energy conversion devices, construction management, and sustainable infrastructure systems. Elective courses can be chosen in areas of specific interest to the student. Specifically, students are encouraged to consider electives from other Sustainable Infrastructure Systems programs.

Information on the current approved courses that comprise these core and elective requirements is available from the department website *ame.usc.edu*.

Systems Architecting and Engineering (MS)

This program is recommended for graduate engineers and engineering managers responsible for the conception and implementation of complex systems. Emphasis is on the creative processes and methods by which complex systems are conceived, planned, designed, built, tested and certified. The architecture experience can be applied to defense, space, aircraft, communications, navigation, sensors, computer software, computer hardware, and other aerospace and commercial systems and activities.

A minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in systems architecting and engineering. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor's degree. Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average.

In addition to the general requirements of the Viterbi School of Engineering, the Master of Science in Systems Architecting and Engineering is also subject to the following requirements:

- a total of at least 27 units is required, consisting of 15 units of required courses, 3 units of SAE core electives, 3 units in the technical management area, and 6 units in the technical specialization area;

- every plan of study requires prior written approval by the director of the systems architecting and engineering program recorded on the study plan in the student's file;
- no more than 6 units at the 400 level may be counted toward the degree — the remaining units must be taken at the 500 or 600 level;
- at least 21 of the 27 units must be taken in the Viterbi School of Engineering;
- units to be transferred (maximum of seven with adviser approval) must have been taken prior to taking classes at USC; interruption of residency is not allowed;
- no more than 6 units of Special Topics courses (499 or 599) may be counted for this degree;
- thesis and directed research registrations may be allowed to individual students only by special permission of the supervising faculty member and the program director;
- a bachelor's degree in an engineering field and a minimum of three years systems experience are recommended prior to taking Systems Architecting and Design Experience courses. This program is not recommended for recent bachelor's degree graduates.

Required Courses

- ISE 460 Engineering Economy Units: 3 or
- SAE 560 Economic Considerations for Systems Engineering Units: 3
- SAE 541 Systems Engineering Theory and Practice Units: 3
- SAE 542 Advanced Topics in Systems Engineering Units: 3
- SAE 547 Model-Based Systems Architecting and Engineering Units: 3 or
- SAE 548 Systems/System-of-Systems Integration and Communication Units: 3
- SAE 549 Systems Architecting Units: 3

SAE Elective

An additional adviser-approved SAE course (minimum 3 units)

Technical Management Area: Take one course (minimum 3 units) from the following:

- CE 569 Project Controls Units: 4
- DSO 580 Project Management Units: 3
- ISE 515 Engineering Project Management Units: 3
- ISE 517 Modern Enterprise Systems Units: 3
- ISE 544 Leading and Managing Engineering Teams Units: 3
- ISE 562 Decision Analysis Units: 3
- ISE 585 Strategic Management of Technology Units: 3
- MOR 561 Strategies in High-Tech Businesses Units: 3
- SAE 550 Systems Architecting and the Political Process Units: 3

Technical Specialization Area:

Two courses (minimum 6 units total) are required, usually in the student's present or intended technical specialty. The courses must be from the same Viterbi School major and are selected in consultation with an adviser.

Dual Degree

Master of Science, Systems Architecting and Engineering/Master of Business Administration (MS/MBA)

The Viterbi School of Engineering Program in Systems Architecting and Engineering, in conjunction with the Marshall School of business, offers a program leading to two degrees - the Master of Science in Systems Architecting and Engineering and the Master of Business Administration.

Prospective students apply for admission to both programs simultaneously and must be admitted to both programs to qualify for consideration for conversion to the dual degree program. Applicants must provide proof of a four-year bachelor's degree and GRE scores. International applicants must also provide TOEFL or IELTS scores.

This alternative requires at least 72 units (75 for the online MBA). The MS SAE portion of the program requires 24 units. Students in the dual degree program do not complete a course in Engineering Economy nor a Technical Management Area elective as part of the MS SAE portion of the program. These concepts are presented in the MBA portion of the program.

The total number of units required for the MBA degree is at least 48 including all required courses in an MBA program (51 units for online MBA, excluding electives) and graduate business electives sufficient to bring the total units completed in the Marshall School of Business to at least 48. Dual degree students may not count courses taken outside the Marshall School of Business toward the 48 units.

Required Courses*

- SAE 541 Systems Engineering Theory and Practice Units: 3
- SAE 542 Advanced Topics in Systems Engineering Units: 3
- SAE 547 Model-Based Systems Architecting and Engineering Units: 3
  or
- SAE 548 Systems/System-of-Systems Integration and Communication Units: 3
- SAE 549 Systems Architecting Units: 3

Note:

*Students in the dual degree program do not complete a course in Engineering Economy as part of the MS SAE portion of the program.

Electives**

- Adviser-approved electives in general technical area Units: 3
- Adviser-approved electives in technical specialization area Units: 9

Note:

**Students in the dual degree program do not complete a Technical Management Area elective as part of the MS SAE portion of the program.

Graduate Certificate

Network Centric Systems Graduate Certificate

This 15-19 unit graduate certificate is jointly sponsored by the Epstein Industrial and Systems Engineering, Hsieh Electrical Engineering and Computer Science departments, and administered by the Epstein ISE Department. The computer science emphasis requires at least 16 units to complete, and may require more depending on the combination of courses students select.

This certificate is designed for practicing engineers engaged in the creation and design of complex innovative network centric systems in aerospace and commercial fields. Entering students are expected to have a bachelor's degree in engineering or a related field from an accredited institution. Three years of industry experience are recommended. Students are required to earn a cumulative B average or higher in courses taken for the certificate. The courses taken for the certificate may be applied later to the Master of Science in Computer Science, Electrical Engineering or Systems Architecting Engineering with departmental approval.

Required Courses

- SAE 574 Net-Centric Systems Architecting and Engineering Units: 3

Choose four courses from one area of emphasis (12-16 units):

Computer Science Emphasis

Required CSCI course

- CSCI 551 Computer Networking Units: 4

CSCI Electives (choose three courses, at least 9 units)

- CSCI 530 Security Systems Units: 4
- CSCI 531 Applied Cryptography Units: 4
- CSCI 555L Advanced Operating Systems Units: 4
- CSCI 556 Introduction to Cryptography Units: 4

- CSCI 558L Internetworking and Distributed Systems Laboratory Units: 3
- CSCI 561 Foundations of Artificial Intelligence Units: 4
- CSCI 573 Probabilistic Reasoning Units: 3
- CSCI 576 Multimedia Systems Design Units: 4
- CSCI 585 Database Systems Units: 4

Electrical Engineering Emphasis

Required EE course

- EE 535 Wireless Communications Units: 4

EE Electives (choose three courses, 9 units)

- EE 541 A Computational Introduction to Deep Learning Units: 2
- EE 544 Radio Frequency Systems and Hardware Units: 3
- EE 550 Data Networks: Design and Analysis Units: 4
- EE 555 Broadband Network Architectures Units: 3
- EE 562 Random Processes in Engineering Units: 4
- EE 564 Digital Communication and Coding Systems Units: 4
- EE 567 Communication Systems Units: 3

Total units: 15-19

Systems Architecting and Engineering Graduate Certificate

The graduate certificate in systems architecting and engineering is designed for practicing engineers engaged in the creation and design of complex innovative systems, in aerospace and commercial fields. Entering students are expected to have a bachelor's degree in engineering or a related field from an accredited institution. Three years of industry experience are recommended. Students are required to earn a cumulative B average or higher in courses taken for the certificate. The courses taken for the certificate may be applied later to the Master of Science in Systems Architecting and Engineering.

Required Courses - Choose Five

- ISE 460 Engineering Economy Units: 3 or
- SAE 560 Economic Considerations for Systems Engineering Units: 3

- ISE 515 Engineering Project Management Units: 3
- ISE 544 Leading and Managing Engineering Teams Units: 3
- SAE 541 Systems Engineering Theory and Practice Units: 3
- SAE 542 Advanced Topics in Systems Engineering Units: 3
- SAE 547 Model-Based Systems Architecting and Engineering Units: 3
- SAE 548 Systems/System-of-Systems Integration and Communication Units: 3
- SAE 549 Systems Architecting Units: 3
- SAE 574 Net-Centric Systems Architecting and Engineering Units: 3

Note:

All programs of study will be approved by the technical director of the Systems Architecting and Engineering program.

USC Leonard Davis School of Gerontology

The USC Leonard Davis School of Gerontology explores all aspects of human development and aging. Course work and research opportunities in biology, psychology, sociology, policy and aging services make up its multidisciplinary curriculum.

Founded in 1975, the USC Leonard Davis School is the nation's premier school of gerontology. Named in honor of Leonard Davis, a philanthropist and businessman who pioneered insurance plans for the elderly through his involvement in AARP and his own company Colonial Penn Life Insurance, the school provides ground-breaking solutions to issues facing an aging population.

The USC Leonard Davis School is committed to providing students with a broad theoretical understanding of lifespan development as well as dynamic post-graduate career placement. Students on all levels often enroll in semester-long internship programs. Working with our internship director, students can apply their gerontological knowledge to an array of industries such as health, medicine, business, finance, policy, direct services, program development, counseling and many other fields.

The Davis School's Bachelor of Science degrees can be pursued with a health science, a social science or a global emphasis. The school also offers ten master's degrees, six dual master's programs, a graduate certificate, PhD programs in gerontology and the biology of aging, and a doctorate program in longevity arts and sciences.

The school is located in the Ethel Percy Andrus Gerontology Center and is home to the Center for Digital Aging, the Center for Global Aging, the Fall Prevention Center of Excellence, the Long Beach Longitudinal Study, the Longevity Institute, the USC/UCLA Center on Biodemography and Population Health and the Los Angeles Caregiver Resource Center.

Programs

The USC Leonard Davis School of Gerontology offers a Bachelor of Science in Human Development and Aging; a Bachelor of Science in Lifespan Health; undergraduate classes through the health and humanity major in the USC Dornsife College of Letters, Arts and Sciences; two minors in gerontology; and four progressive degrees for Master of Science

in Gerontology, Master of Arts in Aging Services Management, Master of Arts in Senior Living Hospitality, and Master of Arts in Medical Gerontology, open to all undergraduate students.

The school offers several graduate degrees including a Master of Science in Gerontology; a Master of Arts in Gerontology; a Master of Arts in Aging Services Management; a Master of Arts in Long Term Care Administration (with the Marshall School of Business and the Price School of Public Policy); a Master of Arts in Medical Gerontology; a Master of Arts in Senior Living Hospitality; a Master of Arts in Foodservice Management and Dietetics; a Master of Science in Lifespan, Nutrition and Dietetics; a Master of Science in Nutritional Science; and a Master of Science in Nutrition, Healthspan and Longevity. All master's degrees are offered online and onsite. The Leonard Davis School of Gerontology offers the premier PhD in Gerontology program in the nation and also offers a PhD in the Biology of Aging as well as a Doctor of Longevity Arts and Sciences. The PhD programs are not offered online. Non-degree graduate students may complete 16 units of gerontology and be awarded a graduate level certificate in gerontology (also available online).

Master's degree students may pursue one of several dual degrees, which are jointly offered with other professional schools. These are the Master of Science in Gerontology and the Master of Business Administration (MS/MBA) with the Marshall School of Business; the Master of Science in Gerontology and the Juris Doctor (MS/JD) with the Gould School of Law; the Master of Science in Gerontology and the Master of Public Administration (MS/MPA), and the Master of Science in Gerontology and the Master of Health Administration (MS/MHA) with the Price School of Public Policy; the Master of Science in Gerontology and the Master of Social Work (MS/MSW) with the Suzanne Dworak-Peck School of Social Work; and the Master of Science in Gerontology and the Doctor of Pharmacy (MS/PharmD) with the School of Pharmacy.

In addition to the degree and minor programs, overview courses in aging are offered for undergraduates enrolled in other units of the university. Many gerontology courses can be credited as elective units.

Honor Society

The student honor society is Sigma Phi Omega, the national honor society formed in 1980 to recognize the excellence of those who study gerontology. The organization seeks to promote scholarship and professionalism, and to recognize exemplary attainment in the field of aging. Undergraduates must have a GPA of at least 3.3 and graduate students a GPA of at least 3.5. Sigma Phi Omega is administered by the Association for Gerontology in Higher Education, an educational unit of the Gerontological Society of America.

Ethel Percy Andrus Gerontology Center

The Andrus Gerontology Center initiates, designs and executes basic and applied research on the many phases of development and aging and provides for graduate and post-graduate training in the biological, social, behavioral and policy sciences. Specific areas of study include neurobiology, cognitive science, biology, social organization behavior, human service delivery, biodemography and social policy.

The Andrus Center offers a multidisciplinary research training program in gerontology. It is directed toward graduate students pursuing the PhD as well as a limited number of post-doctoral fellows who develop research and academic careers in specialized areas of gerontology. Research training is carried out within individual disciplines.

Undergraduate Programs

Minors in Gerontology

The undergraduate minor program gives students the option of combining their major with an emphasis in gerontology. The minors provide students with the opportunity to supplement their education with a life course perspective of aging processes.

The minor programs, which are multidisciplinary in nature, allow the student to survey the sociological, political, psychological and biological aspects of aging; to gain an understanding of the current services available to older persons; and to examine the contemporary policy issues facing the field.

The two minors include the social science-focused Individuals, Societies and Aging and the health science-focused Science, Health and Aging.

Bachelor of Science in Human Development and Aging

The Bachelor of Science in Human Development and Aging is an undergraduate degree offered at the USC Leonard Davis School of Gerontology that allows students to specialize within a social science or health science track. Students specializing in the social science track often pursue careers related to older adults in business, law, the nonprofit sector or government agencies, psychology and sociology. The health science track combines the core gerontology curriculum with the prerequisites for admission to medical school and other health-related fields including: dentistry, pharmacy, nursing and others. In addition, students will participate in a supervised practicum experience in which they will become directly involved with aging clients in a health care setting.

Bachelor of Science in Lifespan Health

The Bachelor of Science in Lifespan Health prepares students for admission to a graduate or professional school with an emphasis on the biomedical aspects of health including disease prevention, detection and treatment. This program is designed for students wishing to pursue graduate studies in an allied health field such as dental hygiene, occupational/physical therapy, physician assistant, nutrition and other related fields.

Bachelor of Arts in Health and Humanity

The USC Leonard Davis School of Gerontology offers undergraduate classes through the Health and Humanity major in the USC Dornsife College of Letters, Arts and Sciences (see the Health and Humanity page).

Progressive Degree in Gerontology/Master of Science in Gerontology, Master of Arts in Aging Services Management, Master of Arts in Senior Living Hospitality, or Master of Arts in Medical Gerontology

The progressive degree program allows high performing students to integrate their current undergraduate major with a Master of Science in Gerontology, Master of Arts in Aging Services Management, Master of Arts in Senior Living Hospitality, or Master of Arts in Medical Gerontology.

Students will meet with the gerontology student adviser to develop a course plan that must be approved by the USC Leonard Davis School of Gerontology and the student's home department. Students admitted into the progressive degree program begin taking master's level courses in their senior year and will complete the master's degree in year five. For more information on the admission process, see the gerontology student adviser. The total number of units for the master's degree, however, may be reduced by a maximum of one third. Students must obtain permission from both the bachelor's degree granting program and the USC Leonard Davis School of Gerontology. This program may be particularly attractive to students majoring in biology, psychology, policy and sociology. For more information on progressive degrees, see the entry under Undergraduate Programs or Graduate and Professional Education.

Graduate Degrees

Master of Science in Gerontology

The Master of Science in Gerontology prepares graduates to assume major leadership roles in the field of aging, primarily in the planning, administration and evaluation of programs in the private and public sectors, as well as executive positions in the delivery of direct services to older people and their families and in

the instruction of older adults and service providers. The Master of Science in Gerontology requires 44 units of course work. This includes 32 units of required courses and 12 units of electives. As part of this curriculum, a field practicum assures that these skills can be applied in agencies and institutional settings. This program is offered in both residential and online formats.

Master of Arts in Gerontology

The Master of Arts in Gerontology provides an opportunity to acquire skills and formal training in gerontology. This program is offered in both residential and online formats. Admission standards and prerequisites are the same as listed for the Master of Science in Gerontology with the exception that students in the online MA program are expected to have a significant amount of experience working in human services, health care, business or similar settings. The program consists of 28 units of course work.

Master of Arts in Aging Services Management

The Master of Arts in Aging Services Management provides an opportunity for those seeking careers in the aging services industries to acquire skills and knowledge related to management of services, products and programs for older persons. The program requires a minimum of 12 units of core courses (three courses) and 20 units of electives (five courses). This program is offered in both residential and online formats. Continuous registration in the program is required.

Master of Arts in Long Term Care Administration

The Master of Arts in Long Term Care Administration provides an opportunity for professionals who are currently working in a long term care profession to acquire skills and formal training in long term care administration. The online program requires 28 units of course work. This program is offered in both residential and online formats.

Master of Science in Nutrition, Healthspan and Longevity

This degree is for those who want to pursue a career in nutrition and dietetics. It can lead to working in health care facilities, long-term care and supported living environments, tertiary and community hospitals, university and school food service programs, a business involving personal wellness, private practice, scientific research on nutrition's role in health and longevity, or in policy and advocacy. The program promotes health and longevity based on scientific evidence, integrating academic study with professional practice experience. The program requires 44 units of course work and 1,200 hours of supervised practice in hospital, community, and food service settings. Prerequisite courses are required as well as 40 hours of paid or volunteer work experience with a Registered Dietitian. The program is a candidate for accreditation by the Accreditation Council for Education in Nutrition and Dietetics. Graduates are eligible to take the Commission of Dietetics Registration's national registration examination and receive the Registered Dietitian Nutritionist (RDN) credential upon passing the examination.

Master of Arts in Senior Living Hospitality

The Master of Arts in Senior Living Hospitality (MASLH) provides an opportunity for those seeking careers in the senior living industry to acquire skills and knowledge related to management of senior living organizations. The program requires a minimum of 31 units of core courses and 12 units of electives.

Master of Arts in Medical Gerontology

The Master of Arts in Medical Gerontology prepares graduates to become leaders in providing care to older persons throughout the world. The program requires 33 units of course work. This includes 25 units of required courses and 8 units of electives.

Master of Arts in Foodservice Management and Dietetics

The Master of Arts in Foodservice Management and Dietetics focuses on the principles and practices of lifespan nutrition and wellness, food safety, the design and organization of food service systems, purchasing and personnel management using classroom learning as well as research application to address industry problems and find solutions. The program requires 32 units of course work.

Master of Science in Lifespan, Nutrition and Dietetics

The Master of Science in Lifespan, Nutrition and Dietetics prepares graduates with advanced training in nutrition through both course work, research and internship experience. The MSLND requires 38 units of course work.

Master of Science in Nutritional Science

The Master of Science in Nutritional Science provides students with advanced understanding of lifespan human nutrition through course work and research. The program requires 32 units of course work. The program offers both on-campus and online asynchronous courses and can be completed in 1-3 years.

Graduate Level Certificate in Gerontology

The graduate certificate in gerontology program provides an opportunity for those who have completed a bachelor's degree in another profession or discipline and are employed in the field of aging to acquire a greater understanding of gerontology theory and research. The program consists of 16 units of gerontology content designed to familiarize the student with several areas of the field that relate to professional practice. This program is offered in both residential and online formats.

Doctor of Philosophy in Gerontology

PhD in Gerontology students learn about the physiology of human development and aging, examining social policies related to aging as well as the psychological, behavioral and sociological impact on lifespan development. Working closely with a faculty mentor, they concentrate on a specific area of interest and begin the process of discovering and shaping their own academic specialization. They work closely with faculty on research and publications, participate in colloquia, attend and present at national organization meetings, acquire teaching experience and develop a rich academic, personal, and professional network. The program requires 60 units of course work and at least four additional dissertation units and is only available as a residential program.

Doctor of Philosophy in the Biology of Aging

The PhD in the Biology of Aging program is designed for students who want to become leaders in biogerontology. The focus is on molecular, cellular, and regenerative medicine as well as the integrative biology of aging. This unique doctoral program, the first of its kind in the field, brings together two world-renowned institutions: the USC Leonard Davis School and the Buck Institute for research on Aging in Northern California. Students can choose a mentor and PhD faculty committee from either the Buck Institute or USC. Students' academic and research activities take place on both the Southern and Northern California locations. Candidates take core courses on the molecular and cellular biology of aging and age-related diseases, and then select a track among neuroscience, molecular, and cellular biology, stem cell and regenerative sciences, and biomedical sciences. The program requires 60 units of work, including courses, seminars and research credit. At least 24 of the 60 units must be formal graduate course work (lectures or seminars). It is only available as a residential program.

Doctorate of Longevity Arts and Sciences

Students enrolled in the Doctorate of Longevity Arts and Sciences (DLAS) will learn about the human potential for healthspan, lifespan and meaning. This program seeks to provide a framework to advance the concept of meaning-making through the biological, sociological and psychological sciences. The program requires 60 units of work.

Dual Degree Programs

The USC Leonard Davis School of Gerontology cooperates with five other professional schools at USC in offering programs in which the student receives two master's degrees. These degrees provide the student with the knowledge and skills of gerontology as well as those of the other professional field. The dual degrees require more course work than the MS alone but offer the graduate greater breadth of education and employment options.

Dual degrees currently available are the Master of Science in Gerontology and the Master of Business Administration (MS/MBA) with the Marshall School of Business; the Master of Science in Gerontology and the Juris Doctor (MS/JD) with the Gould School of Law; the Master of Science in Gerontology and the Master of Public Administration (MS/MPA), and the Master of Science in Gerontology and the Master of Health Administration (MS/MHA) with the Price School of Public Policy; the Master of Science in Gerontology and the Master of Social Work (MS/MSW) with the Suzanne Dworak-Peck School of Social Work; and the Master of Science in Gerontology and the Doctor of Pharmacy (MS/PharmD) with the School of Pharmacy. Students must apply to both schools and if accepted to both, participate in specially designed programs combining the courses of each school.

Applicants to any of the dual degree programs must submit two separate applications to the Office of Admissions; one for the gerontology program and one indicating the other degree program. Each of the schools must accept the student for admission. Acceptance into one school's degree program does not imply acceptance into the dual degree program.

Gerontology and Business Administration

See Marshall Research Centers and Institutes for requirements.

Gerontology and Public Administration

The MS/MPA dual degree offers the student interested in management of agencies and institutions the opportunity to gain in-depth knowledge of the administrative and organizational processes and management skills necessary for the effective delivery of services to older persons. See the USC Price School of Public Policy for course requirements.

Gerontology and Health Administration

Students can specialize in health care administration (profit and non-profit) through the dual degree with the Price School of Public Policy's Health Administration Program. See the USC Price School of Public Policy for course requirements.

Gerontology and Social Work

See Master of Science, Gerontology/Master of Social Work (MS/MSW) for requirements.

Gerontology and Pharmacy

See Doctor of Pharmacy/Master of Science, Gerontology (PharmD/MS) for requirements.

Gerontology and Law

The MS/JD dual degree combines the knowledge of the older population with understanding of the legal system. The program prepares graduates for a number of roles in both public and private sector organizations. Students are required to complete 110 units of course work, 74 from the Gould School of Law and 36 from the Leonard Davis School of Gerontology. The first year is devoted to required law courses, and the second, third and fourth years combine gerontology and law courses. To earn the JD, all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to the rule for students enrolled in the law school honors program. See the USC Gould School of Law for course requirements.

Bachelor's Degree

Human Development and Aging (BS)

The Bachelor of Science in Human Development and Aging is an undergraduate degree offered at the USC Leonard Davis School of Gerontology in the social sciences. Students in this program often pursue careers related to older adults in business, law, the nonprofit sector or government agencies.

Students may also specialize in a health science track. The health science track combines the core gerontology curriculum with the prerequisites for admission to medical school and other health-related fields including: dentistry, pharmacy, occupational/physical therapy, physician assistant programs and others. In addition, students will participate in a supervised practicum experience in which they will become directly involved with aging clients in a health care setting.

Students planning to pursue a BS are urged to notify the school of this intent as early as possible during their undergraduate study. This will help ensure that the student receives proper advisement and that the student is alerted to any special requirements or program modifications.

During the freshman and sophomore years, students enroll primarily in general education required courses as specified by the university and the Human Development and Aging course (GERO 200).

During their junior and senior years, students enroll in required and elective courses in the School of Gerontology as well as other courses throughout the university. These courses are selected in consultation with an adviser and reflect the personal and professional interests of the students.

The honors program is available to juniors who maintain a GPA of 3.5 in gerontology and a GPA of 3.3 in other USC course work. The honors program includes mentored training in research and course work relevant to research methodology and statistics.

A grade point average of at least C (2.0) on all units attempted at USC is required for undergraduate degrees. The School of Gerontology requires a minimum 2.0 grade point average in upper division courses applied toward the major.

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies). See *dornsife.usc.edu/2015ge* for more information.

Foreign Language or Programming Skills (12 Units)

Students must satisfy the skill level requirement in one language or complete ITP 101 and additional ITP 100-level programming courses to total 12 units. Students in the health science track are required to complete only ITP 101 and ITP 102 .

Degree Requirements

Required Courses

- GERO 200 Gerontology: The Science of Adult Development Units: 4
- GERO 320g Psychology of Adult Development Units: 4
- GERO 330 Society and Adult Development Units: 4
- GERO 340 Policy, Values, and Power in an Aging Society Units: 4
- GERO 416 Health Issues in Adulthood Units: 4
- GERO 491 Practicum Units: 2-8 (4 units)
- GERO 492 Senior Seminar Units: 4
- General Education Units: 24
- Writing Requirement Units: 8
- Foreign Language or Programming Units: 12
- Gerontology electives Units: 20
- One approved statistics course Units: 4
- General electives in gerontology or related disciplines (8 units upper division) Units: 32

Total Units: 128

Recommended General Electives

- ANTH 305 Childhood, Birth and Reproduction Units: 4
- GERO 481 Case Management for Older Adults Units: 4
- HP 402 Maternal and Child Health Units: 4

- LING 405 Child Language Acquisition Units: 4
- PSYC 100Lg Introduction to Psychology Units: 4
- PSYC 336L Developmental Psychology Units: 4 *
- PSYC 437 Adolescent Development Units: 4 *
- SOCI 305m Sociology of Childhood Units: 4
- SOCI 369 The Family in a Changing Society Units: 4

Note:

**Prerequisite required.*

Human Development and Aging, Health Science Track (BS)

The Bachelor of Science in Human Development and Aging is an undergraduate degree offered at the USC Leonard Davis School of Gerontology in the social sciences. Students in this program often pursue careers related to older adults in business, law, the nonprofit sector or government agencies.

The health science track combines the core gerontology curriculum with the prerequisites for admission to medical school and other health-related fields including: dentistry, pharmacy, occupational/physical therapy, physician assistant programs and others. In addition, students will participate in a supervised practicum experience in which they will become directly involved with aging clients in a health care setting.

Requirements for Admission

The listed requirements for admission to the health science track in human development and aging will not differ from existing requirements for admission to the Bachelor of Science in Human Development and Aging. However, because health professional schools are very competitive, USC students interested in this program will be expected to have achieved at least a 3.0 grade point average (A = 4.0). Students entering the program from high schools or transferring from community colleges will also be expected to meet the minimum admission standards.

Degree Requirements

Science and Mathematics

- BISC 120Lg General Biology: Organismal Biology and Evolution Units: 4
- BISC 220Lg General Biology: Cell Biology and Physiology Units: 4

Note:

**Prerequisite required.*

Human Development and Aging, Honors Programs (BS)

USC Davis offers an honors program to outstanding students already pursuing studies for the BS in Human Development and Aging degree. This program offers students an opportunity to participate in mentored undergraduate research, taking course work in research methods and statistics in aging, and experience in writing an honors thesis that summarizes the research project. Honors students are required to complete GERO 497a, GERO 497b, GERO 497c for a total of 6–8 units, beginning in the fall or spring of the junior year. In the senior year, they must complete GERO 593 Research Methods with a minimum grade of B. GERO 593 is offered only in the fall semester. Completion of the program requires a minimum GPA of 3.5 in gerontology and 3.3 in other courses. The program leads to the designation on the transcript of Bachelor of Science in Human Development and Aging with Honors.

The student takes 2 units of GERO 497a in the fall or spring of the junior year as a mentored research course to begin the process of developing an honors thesis. This would be in lieu of elective units. In the fall of the junior or senior year the student would complete GERO 593 for 4 units and 2 units of GERO 497b, both in lieu of elective units. Also during the fall semester, the research design and methods for the honors thesis are finalized and the research project begun. In the spring, the student would register for 2–4 units of GERO 497c in lieu of elective units. The goal for that semester is to complete the research and write the honors thesis.

Degree Requirements

Required Courses

- GERO 200 Gerontology: The Science of Adult Development Units: 4
- GERO 320g Psychology of Adult Development Units: 4
- GERO 330 Society and Adult Development Units: 4

Total units: 10-12

Total units: 128

**Prerequisite required.*

Lifespan Health (BS)

The Bachelor of Science in Lifespan Health prepares students for admission to a graduate or professional school with an emphasis on the biomedical aspects of health including disease prevention, detection and treatment. This program is designed for students wishing to pursue graduate studies in a health field such as medicine, pharmacy, occupational/physical therapy, psychology and other related fields.

Admission to this program is granted through USC's admission process, described in the admission section of this catalogue. The same foreign language or programming skills requirement for the Bachelor of Science in Human Development and Aging default Social Science track (12 units total) is required as well as the USC General Education program. Students must enroll in the following courses:

Gerontology Required Courses (28 units)

- GERO 200 Gerontology: The Science of Adult Development Units: 4
- GERO 310 Physiology of Aging Units: 4
- GERO 320g Psychology of Adult Development Units: 4
- GERO 416 Health Issues in Adulthood Units: 4
- GERO 483 Global Health and Aging Units: 4
- GERO 492 Senior Seminar Units: 4
- GERO 495 Practicum in Geriatric Care Units: 4

Choose Three from the Following Five Courses (12 units)

- GERO 414 Neurobiology of Aging Units: 4 *
- GERO 437 Social and Psychological Aspects of Death and Dying Units: 2 or 4 **
- GERO 440 Biodemography of Aging Units: 4 *
- GERO 475 Ethical Issues in Geriatric Health Care Units: 4
- GERO 481 Case Management for Older Adults Units: 4

Gerontology Electives (12 units)

Electives (32 units)

Notes:

**Prerequisite required.*

***GERO 437 must be taken for 4 units of credit*

Minor

Individuals, Societies and Aging Minor

This minor is a fit for students in business, engineering, communication, cinematic arts, or arts and sciences interested in developing a broad knowledge of issues in aging. Based largely on disciplines in the behavioral and social sciences, students learn how aging will impact their lives, families and careers. Upon completion of 20 units and graduation, the minor is noted on the student's transcript.

Required Courses

- GERO 320g Psychology of Adult Development Units: 4
- GERO 330 Society and Adult Development Units: 4
- GERO 340 Policy, Values, and Power in an Aging Society Units: 4

Select two from the following:

- GERO 380m Diversity in Aging Units: 4
- GERO 416 Health Issues in Adulthood Units: 4
- GERO 435m Women and Aging: Psychological, Social and Political Implications Units: 4
- GERO 437 Social and Psychological Aspects of Death and Dying Units: 2 or 4
- GERO 481 Case Management for Older Adults Units: 4
- GERO 491 Practicum Units: 2-8

Total units: 20

Science, Health and Aging Minor

The science, health and aging minor is appropriate for students working toward careers in medicine, dentistry, pharmacy, biological sciences, public health or other health related fields. Admission to the minor is only available to students who have completed 4 units of prerequisites (BISC 220 or BISC 221) as part of their major requirements. Upon completion of 20 units and graduation, the minor is noted on the student's transcript.

Required Courses

- GERO 310 Physiology of Aging Units: 4
- GERO 414 Neurobiology of Aging Units: 4
- GERO 416 Health Issues in Adulthood Units: 4 or
- GERO 496 Introduction to Clinical Geriatrics Units: 4

Select two from the following:

- GERO 315g A Journey into the Mind Units: 4
- GERO 415 Neuroaffective Disorders of Aging Units: 4
- GERO 437 Social and Psychological Aspects of Death and Dying Units: 2 or 4
- GERO 440 Biodemography of Aging Units: 4
- GERO 475 Ethical Issues in Geriatric Health Care Units: 4
- GERO 495 Practicum in Geriatric Care Units: 4

Total units: 20

Master's Degree

Advanced Placement Gerontology (MS)

The Advanced Placement MS program allows the outstanding student who has completed a Bachelor of Science in Gerontology to waive several courses in order to complete the master's degree in 36 units rather than the 44 units for the regular program.

Required Courses

- GERO 510 Physiology of Development and Aging Units: 4 or
- GERO 520 Life Span Developmental Psychology Units: 2 or 4 or
- GERO 530 Life Span Developmental Sociology Units: 4 or
- GERO 540 Social Policy and Aging Units: 4

- GERO 555 Integrating Gerontology: A Multidisciplinary Approach Units: 4
- GERO 591 Field Practicum Units: 1-12
- GERO 593 Research Methods Units: 4
- Gerontology skill requirements Units: 12
- Gerontology electives Units: 4

Total units: 36

Program Adaptation

Three of the following courses, GERO 510, GERO 520, GERO 530 and GERO 540, will be waived for students in the advanced placement track. Advanced placement students admitted to dual degree programs must meet curriculum requirements for the respective programs.

Aging Services Management (MA)

The Master of Aging Services Management provides an opportunity for those seeking careers in the aging services industries to acquire skills and knowledge related to management of services, products and programs for older persons. The program requires a minimum of 12 units of core courses (three courses) and 20 units of electives (five courses). All graduate level courses are offered on campus and via the Internet. Continuous registration in the program is required. Leaves of absence are available for limited times and are excluded from the total time.

In order to participate in online courses, students will be required to have access to a computer with multimedia capability including a laptop or desktop computer with broadband (high speed) internet capability including a web browser, word processing software and presentation software, as well as a printer. Specific details regarding the computer requirements will be provided by the department. This program is available as a progressive degree (see Progressive Degree in Gerontology).

Students applying to the Master of Aging Services Management must have a bachelor's degree from an accredited college or university with a GPA of 3.0. If the applicant's GPA falls below 3.0 the GRE will be required.

Students must choose a minimum of 12 units of core courses from the following:

Core Courses (12 units)

- GERO 500 Perspectives on a Changing Society: An Introduction to Aging Units: 4
- GERO 501 Applied Legal and Regulatory Issues in Aging Units: 4
- GERO 502 Marketing and Shifts in Consumer Decision Making Units: 4
- GERO 504 Current Issues in Aging Services Management Units: 4
- GERO 589 Case Studies in Leadership and Change Management Units: 4

Elective Courses (20 units)

Students must select five electives (for a total of 20 units) of Gerontology courses from the list below. Core courses may not double count as electives, but core courses taken in excess of the 12 units required may be used toward the elective units. Students may take any elective courses below with a few limitations:

1. GERO 499 and GERO 599 may be taken in consultation with the academic adviser
2. A maximum of two GERO 400-level courses from the list below
3. A maximum of 4 units of GERO 590
4. A maximum of 8 units of GERO 591

- GERO 493p Longevity and Death among Ancient and Modern European Populations (Italy) Units: 2
- GERO 494 Emotion-Cognition Interactions and Aging Units: 4
- GERO 498 Nutrition, Genes, Longevity and Diseases Units: 4
- GERO 499 Special Topics Units: 2-4
- GERO 505 Housing and Community Policies and Programs Units: 4
- GERO 506 Technological Innovations in Aging (Gerontechnology) Units: 4
- GERO 507 End of Life Care Units: 4
- GERO 508 The Mind and Body Connection through the Lifespan Units: 4
- GERO 509 Mindful Aging: Spirituality, Gratitude, and Resilience Units: 4
- GERO 510 Physiology of Development and Aging Units: 4
- GERO 514 The Art of Geriatric Symptom Management Units: 4
- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 522 Counseling Older Adults and Their Families Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
- GERO 541 Health Care Delivery Models: Comparative Approaches Units: 4
- GERO 550 Administration and System Management in Programs for Older Adults Units: 4
- GERO 551 Applied Policy Skills in Aging Units: 4
- GERO 552 Human Resources and Aging Units: 4
- GERO 554 Evaluation: Incorporating Evidence-Based Practices Units: 4
- GERO 561 Introduction to Aging and Normal Changes with Aging Units: 4
- GERO 562 Diseases of Aging with Emphasis on Cardiovascular Disease and Diabetes Units: 4
- GERO 563 Geronpsychology Units: 4
- GERO 564 Multiple Chronic Conditions and Older Adults Units: 4
- GERO 565 Novel Technologies in Aging and Assisted Living Units: 4
- GERO 566 Cognitive Decline: Alzheimer's Disease and Dementia and Advances in Imaging Units: 4
- GERO 567 Prevention of Chronic Diseases through Nutrition, Physical Activity and Lifestyle Changes Units: 4
- GERO 568 Adaptive Age-Friendly Environments and Injury Prevention Units: 4
- GERO 585 The Aging Family Units: 2 or 4
- GERO 590 Directed Research Units: 1-12
- GERO 591 Field Practicum Units: 1-12
- GERO 593 Research Methods Units: 4
- GERO 599 Special Topics Units: 2-4

Total Units: 32

Applied Technology and Aging (MS)

This program is for those interested in applying technology to the challenges faced by an increasingly aging population. Ideally, for those with engineering, design or healthcare backgrounds or for those whose career objectives lead to application of technology in senior living or service organizations.

Applicants to the program are expected to have an undergraduate degree from an accredited college or university preferably from a relevant field of study.

Required Courses

Students must take 20 units of the following five courses plus 4 units of GERO 591 Field Practicum. (24 units total of required courses).

- GERO 500 Perspectives on a Changing Society: An Introduction to Aging Units: 4

- GERO 502 Marketing and Shifts in Consumer Decision Making Units: 4
- GERO 506 Technological Innovations in Aging (Gerontechnology) Units: 4
- GERO 565 Novel Technologies in Aging and Assisted Living Units: 4
- GERO 568 Adaptive Age-Friendly Environments and Injury Prevention Units: 4
- GERO 591 Field Practicum Units: 1-12

Electives

Students must choose two courses from the following electives (8 units). Students may take up to 8 units of Directed Research.

- GERO 501 Applied Legal and Regulatory Issues in Aging Units: 4
- GERO 510 Physiology of Development and Aging Units: 4
- GERO 554 Evaluation: Incorporating Evidence-Based Practices Units: 4
- GERO 563 Geronpsychology Units: 4
- GERO 564 Multiple Chronic Conditions and Older Adults Units: 4
- GERO 566 Cognitive Decline: Alzheimer's Disease and Dementia and Advances in Imaging Units: 4
- GERO 589 Case Studies in Leadership and Change Management Units: 4
- GERO 590 Directed Research Units: 1-12
- GERO 592 Multidisciplinary Research Seminar in Aging Units: 2
- GERO 593 Research Methods Units: 4

Foodservice Management and Dietetics (MA)

The degree focuses on the principles and practices of lifespan nutrition and wellness, food safety, the design and organization of food service systems, purchasing and personnel management using classroom learning as well as research application to address industry problems and find solutions. Graduates may seek roles in long-term care, hospitals, government and other public and private foodservice operations. The degree prepares graduates to sit for the Certifying Board for Dietary Managers (CBDM®) Credentialing Exam. Graduates will work with multidisciplinary teams to provide quality food production, service and nutritional care and are an integral member of the health care team.

Continuous registration in the program is required. Leaves of absence are available for limited times and may require the student to wait until the next year to re-enroll as some courses are offered annually, and must be taken sequentially. A maximum of two leaves of absence is allowed.

In order to participate online, students will be required to have access to a computer with multimedia capability including high-speed Internet access, audio and a digital video camera. Specific details regarding computer requirements will be provided by the program.

Prerequisites for Admission

Students applying for admission to the Master of Science in LIfespan, Nutrition and Dietetics program must have a bachelor's degree from an accredited college or university. In addition, the following prerequisites must be complete before starting the program: human physiology, microbiology, biochemistry and introductory nutrition.

In selecting applicants for admission, the USC Leonard Davis School of Gerontology considers both academic potential (as reflected in undergraduate study with a GPA greater than 3.0) and professional potential (as reflected in experience, references and career goals). The school requests information from applicants to supplement that supplied by the USC Application for Graduate Admission. Supplemental information includes a résumé, statement of interest in nutrition and longevity and two letters of reference. Interviews may be required for highest ranking applicants.

Probation and Disqualification

Probation and Warning: Any graduate student with a cumulative or semester grade point average in the university falling below B (3.0) will be placed on academic probation. A graduate student whose semester average falls below B (3.0) but whose cumulative grade point average in the university is 3.0 (A = 4.0) or higher will be placed on academic warning. Students will not be allowed to begin supervised field practice in the second semester if any first semester grades fall below a B (3.0).

Disqualification: A graduate student on academic probation will be disqualified if his or her cumulative record accumulates more than 12 units of C work. A graduate student, whether on probation or not, will be subject to disqualification if the Student Affairs Committee of the USC Leonard Davis School of Gerontology at any time determines deficiency in academic achievement.

Required Courses

Students must take all 10 courses listed below which total 32 units.

- GERO 488 Food, Culture, Disease and Longevity in Italy and in the Mediterranean Units: 4
- GERO 500 Perspectives on a Changing Society: An Introduction to Aging Units: 4
- GERO 512 Communicating Nutrition and Health Units: 2
- GERO 515L Food Production and Food Service Management Units: 4
- GERO 567 Prevention of Chronic Diseases through Nutrition, Physical Activity and Lifestyle Changes Units: 4
- GERO 577 Food Service and Senior Living Units: 2
- GERO 578 Revenue Management for Senior Living Units: 2
- GERO 591 Field Practicum Units: 1-12 (2 units required)
- GERO 592 Multidisciplinary Research Seminar in Aging Units: 2 (4 units required)
- GERO 593 Research Methods Units: 4

Gerontology (MA)

The MA in Gerontology provides an opportunity to acquire skills and formal training in gerontology. Most courses are offered online and on campus.

Continuous registration in the program is required. Leaves of absence are available for limited times and are excluded from the total time limit.

In order to participate in the online courses, students will be required to have access to a laptop or desktop computer with broadband (high speed) internet capability including a web browser, word processing software and presentation software, as well as a printer. Specific details regarding the computer requirements will be provided by the department.

Admission standards and prerequisites are the same as listed for the Master of Science in Gerontology with the exception that students in the online MA program are expected to have a significant amount of experience working in human services, health care, business or similar settings. Students are not required to have taken an approved additional course.

Required Courses (20 units)

- GERO 500 Perspectives on a Changing Society: An Introduction to Aging Units: 4
- GERO 508 The Mind and Body Connection through the Lifespan Units: 4
- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4

Elective Courses (8 units)

Students must select two electives (for a total of 8 units) of Gerontology courses from the list below. Students may take a maximum of one GERO 400 level course from the list below. Students may also take GERO 499 and GERO 599 in consultation with the academic adviser.

- GERO 493p Longevity and Death among Ancient and Modern European Populations (Italy) Units: 2
- GERO 494 Emotion-Cognition Interactions and Aging Units: 4
- GERO 498 Nutrition, Genes, Longevity and Diseases Units: 4
- GERO 499 Special Topics Units: 2-4

- GERO 501 Applied Legal and Regulatory Issues in Aging Units: 4
- GERO 502 Marketing and Shifts in Consumer Decision Making Units: 4
- GERO 504 Current Issues in Aging Services Management Units: 4
- GERO 505 Housing and Community Policies and Programs Units: 4
- GERO 506 Technological Innovations in Aging (Gerontechnology) Units: 4
- GERO 507 End of Life Care Units: 4
- GERO 509 Mindful Aging: Spirituality, Gratitude, and Resilience Units: 4
- GERO 510 Physiology of Development and Aging Units: 4
- GERO 514 The Art of Geriatric Symptom Management Units: 4
- GERO 522 Counseling Older Adults and Their Families Units: 2 or 4
- GERO 541 Health Care Delivery Models: Comparative Approaches Units: 4
- GERO 550 Administration and System Management in Programs for Older Adults Units: 4
- GERO 551 Applied Policy Skills in Aging Units: 4
- GERO 552 Human Resources and Aging Units: 4
- GERO 554 Evaluation: Incorporating Evidence-Based Practices Units: 4
- GERO 561 Introduction to Aging and Normal Changes with Aging Units: 4
- GERO 562 Diseases of Aging with Emphasis on Cardiovascular Disease and Diabetes Units: 4
- GERO 563 Geronpsychology Units: 4
- GERO 564 Multiple Chronic Conditions and Older Adults Units: 4
- GERO 565 Novel Technologies in Aging and Assisted Living Units: 4
- GERO 566 Cognitive Decline: Alzheimer's Disease and Dementia and Advances in Imaging Units: 4
- GERO 567 Prevention of Chronic Diseases through Nutrition, Physical Activity and Lifestyle Changes Units: 4
- GERO 568 Adaptive Age-Friendly Environments and Injury Prevention Units: 4
- GERO 585 The Aging Family Units: 2 or 4
- GERO 589 Case Studies in Leadership and Change Management Units: 4
- GERO 593 Research Methods Units: 4
- GERO 599 Special Topics Units: 2-4

Total units: 28

Gerontology (MS)

The Master of Science in Gerontology prepares graduates to assume major leadership roles in the field of aging, primarily in the planning, administration and evaluation of programs in the private and public sectors, as well as executive positions in the delivery of direct services to older people and their families and in the instruction of older adults and service providers. The Master of Science in Gerontology requires 44 units of course work. This includes 32 units of required courses and 12 units of electives. As part of this curriculum, a field practicum assures that these skills can be applied in agencies and institutional settings.

All students take core courses in physiological, psychological, sociological, social policy and professional issues relating to aging, as well as research methods and the capstone course.

The course work includes instruction on the processes of aging and professional courses designed to develop the skills needed for practice. The field practicum includes one or two semesters of practical experience working in an organizational setting.

Continuous registration in the program is required. There is a five year completion time limit for the degree. Leaves of absence are available for limited times and are excluded from the total time limit. A maximum of two absences (one year each) is allowed. Most courses are offered on campus and online.

Prerequisites for Admission

Students applying for admission to the Master of Science in Gerontology program must have a bachelor's degree from an accredited college or university. In selecting applicants for admission, the School of Gerontology considers both academic potential (as reflected in undergraduate study or scores on the Graduate Record Examinations) and professional potential (as reflected in experience, references and career goals). The school requests information from applicants to supplement that supplied by the USC Application for Graduate Admission. Such supplemental information usually includes a resume, statement of interest in gerontology and letters of reference. Interviews may be required.

Probation and Disqualification

Probation and Warning: Any graduate student whose cumulative or semester grade point average in the university falls below B (3.0) will be placed on academic probation. A graduate student whose semester average falls below B (3.0) but whose cumulative grade point average in the university is 3.0 (A = 4.0) or higher will be placed on academic warning.

Disqualification: A graduate student on academic probation will be disqualified if his or her cumulative record accumulates more than 12 units of C work. A graduate student, whether on probation or not, will be subject to disqualification if the Student Affairs Committee of the USC Leonard Davis School at any time determines deficiency in academic achievement.

Common Requirements

All candidates for the Master of Science degree must complete the following common requirements:

Required Courses

- GERO 510 Physiology of Development and Aging Units: 4
- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
- GERO 589 Case Studies in Leadership and Change Management Units: 4
- GERO 591 Field Practicum Units: 1-12
- GERO 593 Research Methods Units: 4

Total units: 28

Capstone Course

- GERO 555 Integrating Gerontology: A Multidisciplinary Approach Units: 4

Suggested Electives (12 Units)

- GERO 522 Counseling Older Adults and Their Families Units: 2 or 4
- GERO 550 Administration and System Management in Programs for Older Adults Units: 4
- GERO 551 Applied Policy Skills in Aging Units: 4
- GERO 554 Evaluation: Incorporating Evidence-Based Practices Units: 4
- GERO 591 Field Practicum Units: 1-12

Total units: 44

Additional Requirements

Common requirements for all programs include the 28 required units and GERO 555, totaling 32 units. In addition, each candidate must complete the 12 units of electives chosen from the complete list of electives approved by the student's adviser.

Field Practicum

The field practicum provides the opportunity for the student to gain valuable experience and develop needed skills by working in a community agency or institution. It involves a minimum of 240 hours of involvement. Students may elect to take an additional 4 units of GERO 591 Field Practicum as an elective.

Field placement assignments are made by the internship coordinator of the school in consultation with the student and in

accordance with the resources available in the community. Every effort is made to secure placement, which will reflect the student's capacity to assume the responsibilities of a professional in gerontology. Evaluations of the student's performance are sent to the school by the community agency; the student receives a grade of credit/no credit in GERO 591 Field Practicum.

Lifespan, Nutrition and Dietetics (MS)

The Master of Science in Lifespan, Nutrition and Dietetics (MSLND) prepares graduates with advanced training in nutrition through both course work, research and internship experience. The degree prepares graduates to assume positions internationally in nutrition and dietetics and equips graduates to plan, deliver and administer programs in the private and public sectors. The degree prepares graduates to assume leadership roles in the field of nutrition and dietetics with a focus on wellness and longevity. The MSLND requires 38 units of course work. As part of this curriculum, a field practicum assures that these skills can be applied in agencies and organizational settings. This program is offered in both residential and online formats. This program is *not* accredited by the Accreditation Council in Nutrition and Dietetics (ACEND). Graduates would be eligible to sit for the Certified Dietary Manager (CDM) Exam.

Continuous registration in the program is required. Leaves of absence are available for limited times and may require the student to wait until the next year to re-enroll as some courses are offered annually and must be taken sequentially. A maximum of two leaves of absence is allowed.

In order to participate online, students will be required to have access to a computer with multimedia capability including high-speed Internet access, audio and a digital video camera. Specific details regarding computer requirements will be provided by the program.

Prerequisites for Admission

Students applying for admission to the Master of Science in Lifespan, Nutrition and Dietetics program must have a bachelor's degree from an accredited college or university. In addition, the following prerequisites must be complete before starting the program: human physiology, microbiology, biochemistry and introductory nutrition.

In selecting applicants for admission, the USC Leonard Davis School of Gerontology considers both academic potential (as reflected in undergraduate study with a GPA greater than 3.0) and professional potential (as reflected in experience, references and career goals). The school requests information from applicants to supplement that supplied by the USC Application for Graduate Admission. Supplemental information includes a résumé, statement of interest in nutrition and longevity and two letters of reference. Interviews may be required for highest-ranking applicants.

Probation and Disqualification

Probation and Warning: Any graduate student with a cumulative or semester grade point average in the university falling below B (3.0) will be placed on academic probation. A graduate student whose semester average falls below B (3.0) but whose cumulative grade point average in the university is 3.0 (A = 4.0) or higher will be placed on academic warning. Students will not be allowed to begin supervised field practice in the second semester if any first semester grades fall below a B (3.0).

Disqualification: A graduate student on academic probation will be disqualified if his or her cumulative record accumulates more than 12 units of C work. A graduate student, whether on probation or not, will be subject to disqualification if the Student Affairs Committee of the USC Leonard Davis School of Gerontology at any time determines deficiency in academic achievement.

Course Requirements

All candidates for the Master of Science in Lifespan, Nutrition and Dietetics degree must complete the following required courses:

Required Courses

A minimum of 38 units is required.

- GERO 488 Food, Culture, Disease and Longevity in Italy and in the Mediterranean Units: 4
  or
- GERO 498 Nutrition, Genes, Longevity and Diseases Units: 4
- GERO 511 Fundamentals of Clinical Nutrition Screening and Assessment Units: 4
- GERO 512 Communicating Nutrition and Health Units: 2
- GERO 513 Fundamentals of Nutrition: Macronutrients Units: 2
- GERO 515L Food Production and Food Service Management Units: 4
- GERO 517L Advanced Therapeutic Nutrition Units: 4
- GERO 560 Fundamentals of Nutrition: Micronutrients Units: 4
- GERO 590 Directed Research Units: 1-12 (2 units required)
- GERO 591 Field Practicum Units: 1-12 (4 units required)
- GERO 593 Research Methods Units: 4
- GERO 599 Special Topics Units: 2-4 (4 units required)

Long Term Care Administration (MA)

The Long Term Care Administration (MA) provides an opportunity for professionals who are currently working in a long term care profession to acquire skills and formal training in long term care administration. The online program requires 28.5 units of course work.

The required courses are in sequential order and are restricted by availability. Continuous registration in the program is required. Leaves of absence are available for limited times and are excluded from the total time limit.

In order to participate in online courses, students will be required to have access to a computer with multimedia capability including a laptop or desktop computer with broadband (high speed) Internet capability including a web browser and word processing software. Specific details regarding the computer requirements will be provided by the department.

Admission standards are the same as for the Master of Science in Gerontology.

Transfer Credits

An admission credit evaluation is prepared for graduate students with previous graduate level course work. This review indicates which courses the university will approve but it is the relevant school (Gerontology, Business, or Public Policy) that determines if any of these courses are appropriate for this degree. A maximum of 4 units may be used toward the master's degree.

Graduate transfer credit will not be granted for life experience, credit by examination, non-credit extension courses, correspondence courses or thesis supervision. Graduate transfer credit will not be granted for any course work taken elsewhere after the student has been admitted and enrolled at USC unless the student receives prior written approval from the department.

Required Courses (24.5 units)

- GERO 500 Perspectives on a Changing Society: An Introduction to Aging Units: 4
- GERO 501 Applied Legal and Regulatory Issues in Aging Units: 4
- GERO 508 The Mind and Body Connection through the Lifespan Units: 4 or
- GERO 522 Counseling Older Adults and Their Families Units: 2 or 4
  (4 units required)
- GERO 550 Administration and System Management in Programs for Older Adults Units: 4
- GSBA 504a Operations Management Units: 1.5
- GSBA 509 Marketing Management Units: 1.5
- GSBA 510 Accounting Concepts and Financial Reporting Units: 1.5, 2, 3
  (1.5 units required)
- PPD 601 Management of Long-Term Care Organizations Units: 4

Elective Courses (4 units)

Students must select one elective course from the following courses:

- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
- GERO 589 Case Studies in Leadership and Change Management Units: 4

Medical Gerontology (MA)

The Master of Arts in Medical Gerontology prepares graduates to become leaders in providing care to older persons throughout the world. It may be completed in class or online. The goal of this program is to provide medical doctors and other health care professionals with gerontological training and expertise absent from their primary training. After completing this program health care professionals will have a greater understanding of older persons and will have the tools to take a whole person approach to aging and caring for older people. The program requires 33 units of course work. This includes 25 units of required courses and 8 units of electives.

Continuous registration in the program is required. There is a five year completion time limit for the degree. Leaves of absence are available for limited times and are excluded from the total time limit. A maximum of two absences (one year each) is allowed.

Prerequisites for Admission

Students applying for admission to the Master of Arts in Medical Gerontology program must have a bachelor's degree from an accredited college or university and it is preferable to have a primary professional degree in one of the health fields (e.g., occupational therapy, physical therapy, medicine, nursing, dentistry). In selecting applicants for admission, the School of Gerontology considers both academic potential, including an undergraduate GPA of 3.0 or higher, and advanced professional training and experience, as well as references and future goals. The school requests information from applicants to supplement that supplied by the USC Application for Graduate Admission. Such supplemental information usually includes a resume, statement of interest in gerontology and letters of reference. Interviews may be required. For more information on the application and admission please contact the USC Leonard Davis School Admissions Office at (213) 740-5156.

Probation and Disqualification

Probation and Warning: Any graduate student whose cumulative or semester grade point average in the university falls below B (3.0) will be placed on academic probation. A graduate student whose semester average falls below B (3.0) but whose cumulative grade point average in the university is 3.0 (A = 4.0) or higher will be placed on academic warning.

Disqualification: A graduate student on academic probation will be disqualified if his or her cumulative record accumulates more than 12 units of C work. A graduate student, whether on probation or not, will be subject to disqualification if the Student Affairs Committee of the USC Leonard Davis School at any time determines deficiency in academic achievement.

Required Courses (25 units)

All candidates for the Master of Arts in Medical Gerontology degree must complete the following common requirements:

- GERO 561 Introduction to Aging and Normal Changes with Aging Units: 4
- GERO 562 Diseases of Aging with Emphasis on Cardiovascular Disease and Diabetes Units: 4
- GERO 563 Geronpsychology Units: 4
- GERO 564 Multiple Chronic Conditions and Older Adults Units: 4
- GERO 566 Cognitive Decline: Alzheimer's Disease and Dementia and Advances in Imaging Units: 4
- GERO 567 Prevention of Chronic Diseases through Nutrition, Physical Activity and Lifestyle Changes Units: 4
- GERO 569 Healthcare Leadership and Administration Units: 1

Electives (8 units)

Courses are selected in consultation with an adviser. Suggested courses include:

- GERO 565 Novel Technologies in Aging and Assisted Living Units: 4
- GERO 568 Adaptive Age-Friendly Environments and Injury Prevention Units: 4

Nutrition, Healthspan and Longevity (MS)

The Master of Science in Nutrition, Healthspan and Longevity, a Coordinated Program (CP) in Nutrition and Dietetics, prepares graduates for roles in the field of nutrition and dietetics promoting personalized nutrition through work in hospitals and health care facilities, long-term care or school food service programs, business, teaching, research or private practice. The program has been fully accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) and integrates academic study with professional practice experience. Twenty-four students are admitted each year in the fall. Students can complete the full-time degree program in two years, on-campus or online (for those living more than 100 miles from USC). Online students will be required to find and utilize facilities in their community to complete the required course laboratory activities and supervised practice (verification of facilities will be required after acceptance, and before enrollment, for first-year rotations). Successful completion of 44 units of course work is required for graduation and includes 28 units of required courses, 10 units of supervised practice and 6 units of research. The program summative experience will be an electronic portfolio, including research completed throughout the program. Students will be required to present their work at a local, state or national dietetics conference as a requirement of graduation.

Continuous registration in the program is required. Leaves of absence are available for limited times and may require the student to wait until the next year to re-enroll as some courses are offered annually, and must be taken sequentially. A maximum of two leaves of absence is allowed. Upon completion of the Master of Science degree, students are eligible to write for the Credentialing Examination for Registered Dietitian Nutritionists.

In order to participate online, students will be required to have access to a computer with multimedia capability including high-speed Internet access, audio and a digital video camera. Specific details regarding computer requirements will be provided by the program.

Field Practicum

The field practicum provides the opportunity for students to gain valuable experience and develop needed skills by working in an institutional or community environment where nutrition services are provided by registered dietitians or food services professionals. Field placement assignments begin in the second semester of the program and continue every semester until graduation. Students attending the program on campus are placed by the program coordinator in consultation with the student as resources are available in the community. Evaluations of students are sent to the school by the community agency; the student receives a grade of credit/no credit in GERO 591 Field Practicum.

Prerequisites for Admission

Students applying for admission to the Master of Science in Nutrition, Healthspan and Longevity program must have a bachelor's degree from an accredited college or university. In addition, the following prerequisites must be complete before starting the program: cellular biology with lab, microbiology with lab, general chemistry with lab, organic chemistry with lab, biochemistry with lab, human physiology with lab, general psychology or sociology, algebra or pre-calculus or calculus or

statistics, speech or communications, introductory food science and human nutrition. All prerequisite courses cannot be more than 10 years old at the time of application. The exceptions are the general psychology course and the math course; there is no time limit on these two courses.

In selecting applicants for admission, the USC Leonard Davis School of Gerontology considers both academic potential (as reflected in undergraduate study with a GPA greater than 3.0) and professional potential (as reflected in experience, references and career goals). The school requests information from applicants to supplement that supplied by the USC Application for Graduate Admission. Supplemental information includes a résumé, statement of interest in nutrition and longevity and two letters of reference. Applicants are required to document at least 40 hours of paid or volunteer work experience with a registered dietitian. Interviews may be required for highest ranking applicants.

Probation and Disqualification

Probation and Warning: Any graduate student with a cumulative or semester grade point average in the university falling below B (3.0) will be placed on academic probation. A graduate student whose semester average falls below B (3.0) but whose cumulative grade point average in the university is 3.0 (A = 4.0) or higher will be placed on academic warning. Students will not be allowed to begin supervised field practice in the second semester if any first semester grades fall below a B (3.0).

Disqualification: A graduate student on academic probation will be disqualified if his or her cumulative record accumulates more than 12 units of C work. A graduate student, whether on probation or not, will be subject to disqualification if the Student Affairs Committee of the USC Leonard Davis School of Gerontology at any time determines deficiency in academic achievement.

Course Requirements

All candidates for the Master of Science in Nutrition, Healthspan and Longevity degree must complete the following required courses.

Required Courses

- GERO 498 Nutrition, Genes, Longevity and Diseases Units: 4
- GERO 511 Fundamentals of Clinical Nutrition Screening and Assessment Units: 4
- GERO 512 Communicating Nutrition and Health Units: 2
- GERO 513 Fundamentals of Nutrition: Macronutrients Units: 2
- GERO 515L Food Production and Food Service Management Units: 4
- GERO 517L Advanced Therapeutic Nutrition Units: 4
- GERO 518 Current Topics in Clinical Nutrition Units: 4
- GERO 560 Fundamentals of Nutrition: Micronutrients Units: 4
- GERO 590 Directed Research Units: 1-12
- GERO 591 Field Practicum Units: 1-12
- GERO 593 Research Methods Units: 4

Nutritional Science (MS)

The Master of Science in Nutritional Science provides students with advanced understanding of lifespan human nutrition through course work and research. Designed for the Registered Dietitian Nutritionist (RDN) or those with a Didactic Program in Dietetics (DPD) verification, the degree prepares graduates with the advanced knowledge, skills and intellectual maturity to become innovative and multidisciplinary practitioners and leaders in healthspan and longevity. The program offers both on-campus and online asynchronous courses and can be completed in 1-3 years.

Continuous registration in the program is required. Leaves of absence are available for limited times and may require the student to wait until the next year to re-enroll as some courses are offered annually and must be taken sequentially. A maximum of two leaves of absence is allowed.

In order to participate online, students will be required to have access to a computer with multimedia capability including high-speed Internet access, audio and a digital video camera. Specific details regarding computer requirements will be provided by the program.

Prerequisites for Admission

Students applying for admission to the Master of Science in Nutritional Science program must have a bachelor's degree from an accredited college or university in nutrition or dietetics.

In selecting applicants for admission, the USC Leonard Davis School of Gerontology considers both academic potential (as reflected in undergraduate study with a GPA greater than 3.0) and professional potential (as reflected in experience, references and career goals). The school requests information from applicants to supplement that supplied by the USC Application for Graduate Admission. Supplemental information includes a résumé, statement of interest in nutrition and longevity and two letters of reference. Interviews may be required for highest-ranking applicants.

Probation and Disqualification

Probation and Warning: Any graduate student with a cumulative or semester grade point average in the university falling below B (3.0) will be placed on academic probation. A graduate student whose semester average falls below B (3.0) but whose cumulative grade point average in the university is 3.0 (A = 4.0) or higher will be placed on academic warning. Students will not be allowed to begin supervised field practice in the second semester if any first semester grades fall below a B (3.0).

Disqualification: A graduate student on academic probation will be disqualified if his or her cumulative record accumulates more than 12 units of C work. A graduate student, whether on probation or not, will be subject to disqualification if the Student Affairs Committee of the USC Leonard Davis School of Gerontology at any time determines deficiency in academic achievement.

Required Courses

Students must take seven required courses (28 units) including four units of GERO 590 Directed Research.

- GERO 498 Nutrition, Genes, Longevity and Diseases Units: 4
- GERO 500 Perspectives on a Changing Society: An Introduction to Aging Units: 4
- GERO 518 Current Topics in Clinical Nutrition Units: 4
- GERO 560 Fundamentals of Nutrition: Micronutrients Units: 4
- GERO 564 Multiple Chronic Conditions and Older Adults Units: 4
- GERO 590 Directed Research Units: 1-12 (4 units required)
- GERO 593 Research Methods Units: 4

Electives

Choose one 4-unit course from this list of electives.

- GERO 508 The Mind and Body Connection through the Lifespan Units: 4
- GERO 510 Physiology of Development and Aging Units: 4
- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 522 Counseling Older Adults and Their Families Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
- GERO 541 Health Care Delivery Models: Comparative Approaches Units: 4
- GERO 550 Administration and System Management in Programs for Older Adults Units: 4
- GERO 554 Evaluation: Incorporating Evidence-Based Practices Units: 4
- GERO 561 Introduction to Aging and Normal Changes with Aging Units: 4
- GERO 562 Diseases of Aging with Emphasis on Cardiovascular Disease and Diabetes Units: 4
- GERO 563 Geronpsychology Units: 4
- GERO 567 Prevention of Chronic Diseases through Nutrition, Physical Activity and Lifestyle Changes Units: 4
- GERO 577 Food Service and Senior Living Units: 2
- GERO 585 The Aging Family Units: 2 or 4

Senior Living Hospitality (MA)

The Master of Arts in Senior Living Hospitality (MASLH) provides an opportunity for those seeking careers in the senior living industry to acquire skills and knowledge related to management of senior living organizations. The program requires a minimum of 31 units of core courses and 12 units of electives. All graduate-level courses are offered on campus and via the Internet. Continuous registration in the program is required. Leaves of absence are available for limited times and are excluded from the total time.

In order to participate in online courses, students will be required to have access to a computer with multimedia capability including a laptop or desktop computer with broadband (high speed) Internet capability including a web browser, word processing software and presentation software, as well as a printer. Specific details regarding the computer requirements will be provided by the school.

Students applying to the Master of Arts in Senior Living Hospitality must have a bachelor's degree from an accredited college or university with a GPA of 3.0. If the applicant's GPA falls below 3.0, the GRE will be required.

Required Courses

Students must register for the following 10 core courses (31 units):

- GERO 500 Perspectives on a Changing Society: An Introduction to Aging Units: 4
- GERO 501 Applied Legal and Regulatory Issues in Aging Units: 4
- GERO 552 Human Resources and Aging Units: 4
- GERO 574 Leadership and Management in Senior Living Units: 3
- GERO 575 Marketing Senior Living Units: 3
- GERO 576 Finance and Senior Living Units: 3
- GERO 577 Food Service and Senior Living Units: 2
- GERO 578 Revenue Management for Senior Living Units: 2
- GERO 579 Branding Senior Living Units: 2
- GERO 589 Case Studies in Leadership and Change Management Units: 4

Electives

Students must select three electives (for a total of 12 units). Core courses may not double count as electives. Students may take any elective courses from the list below with a few limitations:

- GERO 599 may be taken in consultation with the academic adviser
- A maximum of two GERO 400-level courses from the list below
- A maximum of 4 units of GERO 590
- A maximum of 8 units of GERO 591
- GERO 494 Emotion-Cognition Interactions and Aging Units: 4
- GERO 498 Nutrition, Genes, Longevity and Diseases Units: 4
- GERO 502 Marketing and Shifts in Consumer Decision Making Units: 4
- GERO 504 Current Issues in Aging Services Management Units: 4
- GERO 505 Housing and Community Policies and Programs Units: 4
- GERO 506 Technological Innovations in Aging (Gerontechnology) Units: 4
- GERO 507 End of Life Care Units: 4
- GERO 508 The Mind and Body Connection through the Lifespan Units: 4
- GERO 510 Physiology of Development and Aging Units: 4
- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 522 Counseling Older Adults and Their Families Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
- GERO 541 Health Care Delivery Models: Comparative Approaches Units: 4
- GERO 550 Administration and System Management in Programs for Older Adults Units: 4
- GERO 551 Applied Policy Skills in Aging Units: 4
- GERO 585 The Aging Family Units: 2 or 4
- GERO 590 Directed Research Units: 1-12
- GERO 591 Field Practicum Units: 1-12
- GERO 593 Research Methods Units: 4
- GERO 599 Special Topics Units: 2-4

Advanced Standing Option

The USC Leonard Davis School of Gerontology offers an advanced standing option for students who have graduated with a bachelor's degree in Business Administration or a Master of Business Administration from an accredited college or university. To be eligible for the advanced standing option, students must have successfully completed their bachelor's degree with a minimum GPA of 3.00 for the last 60/90 units of undergraduate work or a 3.3 GPA for their MBA. A cumulative 3.5 GPA for all business courses with a grade of B or better is required for admission.

Students admitted with advanced standing will bypass 11 units of the MASLH program and will be required to complete 32 units, including 24 units of required courses and 8 units of electives.

Advanced Standing Required Courses

- GERO 500 Perspectives on a Changing Society: An Introduction to Aging Units: 4
- GERO 501 Applied Legal and Regulatory Issues in Aging Units: 4
- GERO 502 Marketing and Shifts in Consumer Decision Making Units: 4
- GERO 504 Current Issues in Aging Services Management Units: 4
- GERO 552 Human Resources and Aging Units: 4
- GERO 589 Case Studies in Leadership and Change Management Units: 4

Advanced Standing Electives

Students select at least 8 units from the following courses:

- GERO 494 Emotion-Cognition Interactions and Aging Units: 4
- GERO 498 Nutrition, Genes, Longevity and Diseases Units: 4
- GERO 505 Housing and Community Policies and Programs Units: 4
- GERO 506 Technological Innovations in Aging (Gerontechnology) Units: 4
- GERO 507 End of Life Care Units: 4
- GERO 508 The Mind and Body Connection through the Lifespan Units: 4
- GERO 510 Physiology of Development and Aging Units: 4
- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 522 Counseling Older Adults and Their Families Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
- GERO 541 Health Care Delivery Models: Comparative Approaches Units: 4
- GERO 550 Administration and System Management in Programs for Older Adults Units: 4
- GERO 551 Applied Policy Skills in Aging Units: 4
- GERO 574 Leadership and Management in Senior Living Units: 3
- GERO 575 Marketing Senior Living Units: 3
- GERO 576 Finance and Senior Living Units: 3
- GERO 577 Food Service and Senior Living Units: 2
- GERO 578 Revenue Management for Senior Living Units: 2
- GERO 579 Branding Senior Living Units: 2
- GERO 585 The Aging Family Units: 2 or 4
- GERO 590 Directed Research Units: 1-12
- GERO 591 Field Practicum Units: 1-12
- GERO 593 Research Methods Units: 4
- GERO 599 Special Topics Units: 2-4

Dual Degree

Master of Science, Gerontology/Doctor of Pharmacy (MS/PharmD)

The emerging impact of the elderly on the health care system has created a need for health care providers who understand the unique needs of the elderly. As drug therapy remains the primary therapeutic option for chronic disease, the demand for prescription drugs will continue to rise. There is a demand for pharmacists who are equipped to meet the pharmaceutical care needs of this population. Geriatric pharmacy is recognized as a specialty, with board certification through the Commission for Certification in Geriatric Pharmacy. The PharmD/MS, Gerontology program will provide extensive education and training in the unique health care needs of older adults. It will allow student pharmacists with a career interest in geriatrics or gerontology to work with health care planning or delivery organizations to develop and implement progressive pharmaceutical care programs for the elderly.

Application and Admissions Requirements

Students who intend to pursue the dual PharmD/MSG degree must be accepted by both programs. This includes having completed a baccalaureate degree from an accredited college or university with a minimum G.P.A. of 3.0 and a minimum equivalent GRE score of 1000. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students may apply to the dual PharmD/MS degree program in two ways. First, they may apply at the time they submit their PharmD application by concurrently submitting applications to both programs. Students, who elect this approach, must identify themselves on both applications as potential dual degree students. Students who are admitted to both programs will be offered admission to the PharmD and will be offered admission to the dual degree program. Second, students can apply to the dual degree by submitting an application to the MS in Gerontology program during their first year of enrollment in the PharmD prior to the MS, Gerontology published application deadline. Students, who elect this approach, must apply through the School of Pharmacy. Students admitted to the MS program using this approach will be offered admission to the dual degree contingent on passing all courses in their first year of the PharmD with a minimum 3.0 G.P.A. Students accepted to the dual degree program must maintain a minimum 3.0 G.P.A. in their gerontology and PharmD courses.

Graduation Requirements

Students must complete all requirements for the PharmD and MS degrees as listed in the catalogue with a minimum cumulative 3.0 G.P.A. Students must complete 32 Gerontology units as indicated. The PharmD degree course requirements are listed in the School of Pharmacy section.

Gerontology Requirements

- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
- GERO 555 Integrating Gerontology: A Multidisciplinary Approach Units: 4
- Gerontology electives Units: 16 *

*Choose four of the following (16 units):

- GERO 475 Ethical Issues in Geriatric Health Care Units: 4
- GERO 496 Introduction to Clinical Geriatrics Units: 4
- GERO 508 The Mind and Body Connection through the Lifespan Units: 4
- GERO 519 Recent Advances in Neurobiology and Endocrinology of Aging Units: 2 or 4
- GERO 522 Counseling Older Adults and Their Families Units: 2 or 4
- GERO 550 Administration and System Management in Programs for Older Adults Units: 4
- GERO 554 Evaluation: Incorporating Evidence-Based Practices Units: 4
- GERO 591 Field Practicum Units: 1-12

Total units: 32

Master of Science, Gerontology/Juris Doctor (MS/JD)

The JD/MS dual degree combines the knowledge of the older population with understanding of the legal system. The program prepares graduates for a number of roles in both public and private sector organizations. Students are required to complete 112 units of course work, 76 from the law school and 36 from the USC Leonard Davis School of Gerontology. The first year is devoted to required law courses, and the second, third and fourth years combine gerontology and law courses.

Gerontology Requirements

The Master of Science in Gerontology will require 36 units of course and field work that cover the core content of the MS program.

Gerontology Requirements

- GERO 510 Physiology of Development and Aging Units: 4
- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
- GERO 555 Integrating Gerontology: A Multidisciplinary Approach Units: 4
- GERO 591 Field Practicum Units: 1-12
- GERO 593 Research Methods Units: 4

Gerontology elective Units: 4

Notes:

The Davis School of Gerontology will waive 16 units of electives, which are required in the regular MS program, as well as GERO 589 Case Studies in Leadership and Change Management because students enrolled in this program have a primary professional focus in law.

Law School Requirements

The law school requires 76 units of credit.

First Year Requirements

- LAW 502 Procedure I Units: 2, 3, 4
- LAW 503 Contracts Units: 2, 3, 4
- LAW 504 Criminal Law Units: 3
- LAW 505 Legal Profession Units: 2, 3, 4
- LAW 507 Property Units: 2, 3, 4
- LAW 508 Constitutional Law: Structure Units: 2, 3, 4, 5
- LAW 509 Torts I Units: 2, 3, 4
- LAW 512 Law, Language and Values Units: 2, 3, 4
- LAW 515 Legal Research, Writing and Advocacy I Units: 2, 3
- LAW 516 Legal Research, Writing and Advocacy II Units: 2

Elective Course Work

The second and third year of law study are primarily elective with one requirement. Students must satisfy the upper division writing requirement, either by completing a major, faculty-supervised writing project such as a dissertation, or by taking a course with a substantial writing component.

The law school will waive 14 units of electives, which are required in the regular JD program.

Master of Science, Gerontology/Master of Business Administration (MS/MBA)

The MS/MBA dual degree combines knowledge of the older population with the skills of business management. The program prepares graduates for a number of roles in both public and private sector organizations including the marketing of products or services to seniors, human resource development with older workers and retirement benefits.

Gerontology Requirements

The Master of Science in Gerontology requires 30 units of course and fieldwork, which covers the core content of the MS program.

Required Courses

- GERO 510 Physiology of Development and Aging Units: 4
- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
- GERO 555 Integrating Gerontology: A Multidisciplinary Approach Units: 4
- GERO 591 Field Practicum Units: 1-12
- Gerontology electives Units: 6

Total units: 30

Additional Requirements

Business Administration Requirements

The Master of Business Administration will require 48 units of credit. Required courses include: all required courses in an MBA program; MOR 548 Competitive Advantage Through People 3; one marketing elective chosen from among MKT 512 Customer Insights and Analysis 3, MKT 525 Consumer Behavior 3 and MKT 560 Marketing Strategy 3; and additional graduate business electives sufficient to bring the total units completed in the Marshall School of Business to at least 48. Dual degree students may not count courses taken outside the School of Business toward the 48 units.

Program Adaptation

The USC Leonard Davis School of Gerontology will waive 18 units of electives, plus GERO 593 Research Methods (4 units) and GERO 589 Case Studies in Leadership and Change Management (4 units), which are required in the regular MS program. Students will be exposed to research and professional issues in business administration course work.

Master of Science, Gerontology/Master of Health Administration (MS/MHA)

Gerontology and health administration students can specialize in health care administration (profit and nonprofit) through the dual degree with the USC Leonard Davis School of Gerontology and the USC Price School of Public Policy's Health Administration Program. Students in the dual degree program must be admitted by both academic units and complete 78 units of post-graduate academic work.

Gerontology Requirements

- GERO 510 Physiology of Development and Aging Units: 4
- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
- GERO 550 Administration and System Management in Programs for Older Adults Units: 4
- GERO 555 Integrating Gerontology: A Multidisciplinary Approach Units: 4
- GERO 591 Field Practicum Units: 1-12
- GERO 593 Research Methods Units: 4

Total units: 36

Health Administration Requirements

- PPD 506 Introduction to Microeconomics: Applications in Health Units: 2
- PPD 509 Problems and Issues in the Health Field Units: 4
- PPD 510a Financial Management of Health Services Units: 4
- PPD 512 Health Administration Residency Seminar Units: 2
- PPD 513 Legal Issues in Health Care Delivery Units: 2
- PPD 514 Economic Concepts Applied to Health Units: 4
- PPD 515 Strategic Management of Health Organizations Units: 4
- PPD 516 Financial Accounting for Health Care Organizations Units: 4
- PPD 517 Concepts and Practices in Managing Health Care Organizations Units: 2
- PPD 518 Quality of Care Concepts Units: 2
- PPD 545 Public and Nonprofit Organizational Behavior Units: 4
- PPD 558 Multivariate Statistical Analysis Units: 4
- PPD 601 Management of Long-Term Care Organizations Units: 4

Total units: 42

Additional Requirements

Statistics: The statistics requirement for dual degree students is the same as those that apply to the Health Administration (MHA).

Program Adaptation: The USC Davis School of Gerontology will waive GERO 589 Case Studies in Leadership and Change Management because students enrolled in this program will have a primary professional focus in health administration.

Students enrolled in the dual degree are not required to take PPD 511 (as opposed to the stand alone MHA degree students) because they develop the necessary proficiencies related to their career goals in long-term care administration through other courses such as GERO 550, GERO 591 and GERO 593. In addition, PPD 601 is required for the dual degree (and not the stand alone MHA program) because most of these students will work in long-term care facilities and this course is critical for success in that market.

Students in the MHA stand alone program are required to complete a 1,000 hour residency at a health care organization, generally during the second year of study. Students in the dual degree program may be waived from this requirement with enrollment in GERO 591 which is a supervised experiential learning experience. Student in this situation may then waive PPD 512 and will take 2 units of Price electives for this dual degree.

Any course substitutions are done by petition on an individual basis and should be part of a carefully developed course of study. The USC Price School of Public Policy should be consulted concerning this program of study.

Master of Science, Gerontology/Master of Public Administration (MS/MPA)

The Master of Public Administration/Master of Science, Gerontology (MPA/MS) dual degree offers students interested in management of agencies and institutions the opportunity to gain in-depth knowledge of the administrative and organizational processes and management skills necessary for the effective delivery of services to older persons.

In the MPA/MS dual degree, students spend their first year taking the required courses in the USC Leonard Davis School of Gerontology. The research course, GERO 593 Research Methods and the capstone course GERO 555 Integrating Gerontology: A Multidisciplinary Approach, are taken in the USC Leonard Davis School of Gerontology. The student begins courses in the Price School of Public Policy during the second semester of the first year.

Two versions of this dual degree are available, one with a general orientation and one with an emphasis on health services administration. Students must apply to both schools and, if accepted to both, participate in a specially designed program combining course work from both schools.

Curriculum requirements for the general focus dual degree are detailed in the USC Leonard Davis School of Gerontology section of this catalogue. Students are encouraged to seek advisement as they plan their actual programs, since curriculum changes may occur.

Gerontology Requirements

- GERO 510 Physiology of Development and Aging Units: 4
- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
- GERO 550 Administration and System Management in Programs for Older Adults Units: 4
- GERO 555 Integrating Gerontology: A Multidisciplinary Approach Units: 4
- GERO 591 Field Practicum Units: 1-12
- GERO 593 Research Methods Units: 4

Gerontology elective Units: 4

Total units: 40

Public Administration Requirements

- PPD 503 Economics for Public Policy Units: 4
- PPD 504 Essential Statistics for Public Management Units: 2
- PPD 540 Fundamentals of Public Administration Units: 4
- PPD 545 Public and Nonprofit Organizational Behavior Units: 4
- PPD 546 Capstone in Public Administration Units: 4
- PPDE 505 Professional Workshop in Public Administration Units: 2

- PPD 541 Public Financial Management and Budgeting Units: 4 or
- PPDE 645 Financial Management of Nonprofit Organizations Units: 4

Electives

Students select one analytic elective course (4 units).
NOTE: *Electives in Public Administration need to be selected from approved analytic electives (see MPA requirements). Any substitutions must be approved by the graduate adviser in the Price School of Public Policy.*

Total units: 28

Additional Requirements

Program Adaptation

For the MS in Gerontology, 12 units of electives are waived as well as GERO 589 Case Studies in Leadership and Change Management because students enrolled in this program have a primary professional focus in public administration. For the Master of Public Administration, 12 units of gerontology courses are used as the substantive specialization.

Master of Science, Gerontology/Master of Social Work (MS/MSW)

Dual Degree Programs

The Suzanne Dworak-Peck School of Social Work currently offers dual degree programs with a number of other USC professional schools. In addition, the school maintains a dual degree program at Hebrew Union College located adjacent to the USC campus.

The goal of these programs is to encourage graduate students to gain a recognized competence in another discipline which has direct relevance to the roles filled by social workers in society. Dual degree programs are based on the premise that some topics covered in the school are also addressed in the curricula of other departments, so that some credit toward an MSW degree may be given for specific courses in the cooperating department. Similarly, these departments have recognized that some credit toward their corresponding degree may be awarded for work completed in the Suzanne Dworak-Peck School of Social Work. For this reason, students enrolled in dual degree programs can obtain both degrees with a reduced number of total units. Students wishing to enroll in dual degree programs must apply for and be admitted to both schools.

Master's Requirements

The MS/MSW dual degree offers the student interested in direct service or community organization the credentials most valued in clinical and therapeutic practice. Students enrolled in this dual degree receive an MSW as well as an MS in Gerontology. This dual degree requires completion of 73 units: 32 units of work in the USC Leonard Davis School of Gerontology and 41 units in the Suzanne Dworak-Peck School of Social Work. The course work is usually completed over a 24-month period for full-time students.

Students must complete MSW course work in foundation, foundation field instruction and core courses specific to the AMHW or SCI departments.

See the Master of Master of Social Work/Master of Science, Gerontology (MSW/MS) in the Suzanne Dworak-Peck School of Social Work for course requirements.

Graduate Certificate

Doctor of Pharmacy/Graduate Certificate in Gerontology

This integrated program in pharmacy and gerontology prepares students with an interest in geriatric pharmacy to assume leadership roles at academic, administrative or policy levels within the profession.

The program involves the completion of 16 units of core courses in physiology, psychology, sociology and social policy aspects of aging offered by the School of Gerontology. In addition, students are required to complete 8 units of approved elective courses in gerontology or geriatric pharmacy to be credited toward the requirements for the PharmD and the Graduate Certificate in Gerontology.

Required Courses in Gerontology

- GERO 508 The Mind and Body Connection through the Lifespan Units: 4
- GERO 510 Physiology of Development and Aging Units: 4

- GERO 520 Life Span Developmental Psychology Units: 2 or 4 or
- GERO 522 Counseling Older Adults and Their Families Units: 2 or 4

- GERO 530 Life Span Developmental Sociology Units: 4 or
- GERO 585 The Aging Family Units: 2 or 4
- GERO 540 Social Policy and Aging Units: 4

Electives in Gerontology and Geriatric Pharmacy (8 Units)

- GERO 554 Evaluation: Incorporating Evidence-Based Practices Units: 4
- GERO 555 Integrating Gerontology: A Multidisciplinary Approach Units: 4
- PHRD 655 Geriatric Pharmacy I Units: 3
- PHRD 656 Geriatric Pharmacy II Units: 3
- PHRD 731 Advanced Geriatrics APPE Units: 6

Completion

It is expected that the program can be successfully completed by candidates taking electives in geriatric pharmacy or gerontology during the regular semester and completing one core course in gerontology during each summer in the four year PharmD program.

Admission Requirements

Students who have a baccalaureate degree from an accredited college or university must submit separate applications to the USC School of Pharmacy and the USC Davis School of Gerontology. All requirements for admission to the regular PharmD program must be fulfilled by the candidate. GRE scores are not required for admission to the certificate program.

Gerontology Graduate Level Certificate

The residential graduate certificate in gerontology program provides an opportunity for those who have completed a bachelor's degree in another profession or discipline and are employed in the field of aging to acquire a greater understanding of gerontology theory and research. The program consists of 16 units of gerontology content designed to familiarize the student with several areas of the field which relate to professional practice.

In addition to three of the four required core course areas for the certificate program (GERO 510, GERO 520 or GERO 522, GERO 530 or GERO 585, GERO 540), each student will have the option to choose one elective course that meets his or her particular area of interest.

Certificate students do not take a field practicum. Students admitted to the non-degree certificate program are expected to enroll each semester until the program is completed.

Gerontology Online Graduate Level Certificate

The online graduate certificate in gerontology program provides an opportunity for those with a bachelor's degree in another profession or discipline who are employed in the field of aging to acquire a greater understanding of gerontology theory and research. The program consists of 16 units of gerontology courses designed to familiarize the student with several areas of the field that relate to professional practice.

Students complete the introductory course, GERO 500, two of the four required core course areas (GERO 508 or GERO 510 or, GERO 520 or GERO 522, GERO 530 or GERO 585, and GERO 540), and one elective course in a particular area of interest.

The required courses are delivered via the Internet. The courses are offered in sequential order and are restricted by availability. Continuous registration in the non-degree program is required. Leaves of absence are available for limited times and are excluded from the total time limit. Entering students are encouraged to begin their course of study by taking GERO 500.

In order to participate in the online courses, students will be required to have access to a multimedia computer with modem, printer and CD-ROM drive; an Internet provider with email and an Internet browser; and word processing software. The department will provide specific details regarding the computer requirements.

Doctoral Degree

Biology of Aging (PhD)

Application deadline: December 1

The purpose of the PhD in the Biology of Aging is to provide interdisciplinary research training in an age-centric environment. Students will focus on basic mechanisms of aging as well as translational research related to medical applications. Students will approach aging as a major risk factor for disease.

Admissions Requirements

Applicants must have a bachelor's degree from an accredited four-year college or university preferably in one of the biological sciences. Applicants are evaluated by their transcripts and GPA; scores on the GRE General Test, three letters of recommendation and a statement of interest.

Degree Requirements

Course Requirements

The PhD in the Biology of Aging will provide each student with detailed knowledge and expertise in the biology of aging. The PhD in the Biology of Aging requires the following courses (GERO 600, GERO 601, GERO 602a, GERO 602b, GERO 603, plus 8-10 units from the list of suggested electives or other department approved courses). A minimum of 60 units is required, consisting of formal courses, seminars and research credit. At least 24 of the minimum 60 total units required are to be formal graduate course work (lecture or seminar courses).

Screening Examination

After completion of the core Biology of Aging course work (GERO 600, GERO 601, GERO 602a GERO 602b and GERO 603) during the first year, the student's degree progress is discussed and evaluated by a screening committee composed of members of the gerontology faculty and the Buck Institute as well as the student's faculty adviser. The purpose of this written and oral evaluation is to determine competence to continue graduate study and identify areas to be strengthened prior to the qualifying examination.

Qualifying Examination

By the end of the third semester, students should choose a guidance committee consistent with the requirements of the graduate school composed of gerontology faculty, Buck Institute faculty and one outside member. This committee will conduct the qualifying exam and provide guidance during dissertation research. The chair of the committee will serve as the principal adviser. Students should consult extensively with each committee member regarding subjects to be covered in the exam.

The qualifying exam consists of written and oral parts. Both parts must be finished before the end of the fifth semester. For the written exam, the adviser will consult with each of the members of the qualifying exam committee. The written part will incorporate evaluation and synthesis of existing knowledge related to the topic areas, creation of a set of experiments to test a relevant hypothesis, and interpretation of anticipated results. The oral exam consists of an oral defense of the written part and will be conducted with a month of the written part of the qualifying exam.

Doctoral Dissertation

The dissertation is based on original, publishable and significant research conducted independently by the student under the guidance of the dissertation committee. Upon admission to candidacy, a dissertation committee is established which consists of three members of the faculty, some of whom may be from the guidance committee, one of whom must hold his or her primary appointment outside of the USC Leonard Davis School of Gerontology.

The dissertation committee is responsible for providing guidance and consultation during the research process, approving the dissertation, conducting the final oral examination, and recommending the candidate for the PhD degree.

A Master’s Degree in the Biology of Aging is a terminal degree for students admitted into the Biology of Aging PhD program who cannot complete the PhD program for personal or medical reasons. Enrollment of graduate students as master's degree candidates is not encouraged and is reserved for special circumstances that must be approved by the Gerontology Curriculum Committee. The master's curriculum includes all course work required of PhD students for a minimum of 40 units.

Foreign Language Requirements

There are no foreign language requirements for the PhD in the Biology of Aging program.

Transfer Credits

Students with a master's degree of prior graduate course work in biology can petition to apply the credit toward required courses. Petition for credit will be based on the Graduate School's policies and requirements for transfer of credit and on approval by the doctoral advisory committee. Transfer credits toward the PhD requirements will be limited to 20 units and must be taken within 10 years of entering the program.

Gerontology (PhD)

The purpose of the PhD in Gerontology is to provide research training in the multidisciplinary field of aging. The program is designed to enhance the potential of able students to make scholarly and professional contributions to the field of gerontology through research and teaching. To obtain this goal, the PhD in Gerontology provides (1) high level rigorous research training, (2)

the acquisition and application of scientific knowledge in the field of aging and (3) the development of leadership skills.

Admission Requirements

Applicants for admission to the doctoral program must meet the following requirements:

1. Recipient of a bachelor's degree from an accredited college or university by anticipated enrollment date.
2. Academic promise, as evidenced by above average achievement in previous undergraduate and graduate education. A minimum GPA of 3.0 in an appropriate undergraduate major and a baccalaureate degree are required.
3. Personal qualities compatible with high level performance in gerontology and indicating a potential for leadership in the field. This includes a strong commitment to developing a scientific research program. Applicants to the PhD program must submit a resume of professional and academic experience, three letters of reference (academic and professional), a statement of objectives and examples of written work.
4. Satisfactory performance on the Graduate Record Examinations — existing test scores may be submitted if the GRE has been completed no more than five years prior to the date of application. A satisfactory score on the Verbal and Quantitative GRE is required. Students should also provide scores from the Analytic exam.
5. Submission of application materials as required. Instructions for application to the Doctor of Philosophy in Gerontology may be obtained by contacting the USC Leonard Davis School of Gerontology.

Degree Requirements

Course Requirements

Students must complete a minimum of 60 units of course work (with at least 24 of these units being completed in residency at USC), as well as additional dissertation units (at least 4 units) as required. All students will take courses in three areas: a set of required core courses, research courses and elective courses.

Students will be advised about course selection during the first year by the PhD committee. As soon as a student has selected a specialization (e.g., psychology, sociology/demography, policy), an advisory committee of appropriate faculty will be appointed. The purpose of the advisory committee is to help the student in the selection of courses and a research agenda; to monitor the student's progress; and to insure preparation for the qualifying examination.

Basic Scientific Core

The core for the PhD in Gerontology program stresses the physiological, psychological, sociological and policy dimensions of individual and population aging. Special emphases include mechanisms associated with chronic disease such as cancer, heart disease, Alzheimer's and Parkinson's disease, and the interplay between genetic and environmental influences.

- GERO 610 The Aging Society Units: 4
- GERO 613 Health and Aging Units: 4
- GERO 620 Psychology of Aging Units: 4
- GERO 645 Politics and Policy Processes in an Aging Society Units: 4

Research Core

A second core area focuses on development of research skills which includes research design, methods and statistics. Students in the PhD in Gerontology program are required to take GERO 593 and GERO 640 and at least one additional statistics course — generally from another department — on the student's research focus.

Elective Core

A third core involves electives that allow students to create a concentration in a particular area of focus or analytic field of inquiry. Students should select courses in consultation with their adviser. Courses should be selected to provide in depth knowledge in the specialized area or general knowledge in the field of gerontology. A number of gerontology courses can be taken as electives.

Students should note that Gerontology courses at the 600 level are usually offered only every second year. Students are encouraged to review the course schedule to determine how to best complete these courses in a timely manner. Successful completion of the required course work does not complete the educational experience of the student. Students are expected to enhance their exposure to research by attending the colloquium lecture series, working on research with a faculty member and presenting original research at the annual meeting of the Gerontological Society of America and other professional meetings.

Additional Requirements

Foreign Language Requirements

There are no foreign language requirements for the PhD program.

Transfer Credits

Students with master's degrees or prior graduate course work in gerontology can petition to apply the credit toward required courses. Petition for credit will be based on the Graduate School's policies and requirements for "transfer of credit" and on approval by the doctoral advisory committee. Transfer credits toward the PhD requirements will be limited to 20 units and must be credits taken within 10 years of entering the program.

Time Limit

The normal time for completing the PhD is four to five years (without a prior master's degree). The first two years will consist of required and elective courses. The third year will consist of electives, the PhD qualifying exams and completion of the dissertation proposal. The final year(s) will involve the completion of the dissertation. The maximum time to complete all requirements for the PhD degree is eight years from the first course at USC applied toward the degree.

Students who have completed an applicable master's degree at USC or elsewhere within five years of the proposed enrollment in the PhD program must complete the PhD in six years.

Screening Procedures

When students have completed a minimum of 16 but not more than 24 units of doctoral course work, the doctoral advisory committee assesses their performance through a screening process and makes a decision regarding their ability to continue in the program. If the student is granted permission to continue, a guidance committee is established.

Qualifying Exam Committee

The qualifying exam committee is composed of five faculty members, at least three from the School of Gerontology. The function of the qualifying exam committee is to oversee the development of the student's academic progress through the qualifying examination, including the preliminary dissertation proposal.

Qualifying Examination

As a prerequisite for candidacy for the PhD, students must pass a qualifying examination, which is multidisciplinary and comprehensive in nature and that necessitates independent study beyond course requirements. Students must have completed at least 28 units of course work in the doctoral program with a GPA of at least 3.25 before attempting the qualifying exam. The exam is designed to test mastery of knowledge and scholarly skills and to test readiness to undertake independent research. If the student fails this exam, it may be repeated one time. When the exam is successfully completed, the student then must develop and have

a dissertation proposal approved before the student is officially admitted to candidacy for the PhD degree.

Doctoral Dissertation

Upon admission to candidacy, a dissertation committee is established which consists of three members of the faculty, some of whom may be from the qualifying committee.

The dissertation committee has responsibility for providing guidance and consultation during the research process, approving the dissertation, conducting the final oral examination, and recommending the candidate for the PhD degree. The doctoral dissertation should make an original contribution to the development of knowledge and theory in gerontology.

Final Oral Examination

Upon approval of the final draft of the dissertation by all members of the dissertation committee, the candidate must pass a final oral examination. Upon successful completion of this final examination, the committee recommends the candidate to the Graduate School for award of the PhD degree.

Longevity Arts and Sciences (DLAS)

Students enrolled in the Doctorate of Longevity Arts and Sciences (DLAS) will learn about the human potential for healthspan, lifespan and meaning. This program seeks to provide a framework to advance the concept of meaning-making through the biological, sociological and psychological sciences. This program will allow high-achieving individuals to obtain a rigorous academic experience to enhance their capabilities for greater social contributions based on their accumulated knowledge and wisdom within an aging framework. The DLAS seeks to enrich individuals' understanding of their own aging experience as well as that of society at large. The program is designed to help individuals develop a wide range of skills including program and policy development that may serve the betterment of our communities, state and nation. In addition, the program prepares individuals to understand their own potential and abilities to lead change and make contributions both intellectually and creatively as they age. Doctoral candidates may choose their own pathway to complete a final summative project.

Professional Advisory Committee

By the end of the first year in the program, students will be expected to choose an advisory committee comprised of three Davis School of Gerontology faculty members. With permission of the advisory committee a fourth member may be added from outside of the Davis School.

Application deadline: January 1

Course Requirements

The minimum number of units required for the Doctorate of Longevity Arts and Sciences is 60, as follows:

Core Requirements

Students must take the following courses for 48 units.

- GERO 500 Perspectives on a Changing Society: An Introduction to Aging Units: 4
- GERO 506 Technological Innovations in Aging (Gerontechnology) Units: 4
- GERO 510 Physiology of Development and Aging Units: 4
- GERO 520 Life Span Developmental Psychology Units: 2 or 4 (4 units required)
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
- GERO 550 Administration and System Management in Programs for Older Adults Units: 4
- GERO 551 Applied Policy Skills in Aging Units: 4
- GERO 564 Multiple Chronic Conditions and Older Adults Units: 4
- GERO 567 Prevention of Chronic Diseases through Nutrition, Physical Activity and Lifestyle Changes Units: 4
- GERO 590 Directed Research Units: 1-12 (8 units required)

Suggested Electives

Students must take 12 units of elective courses from the following list of suggested electives or from courses offered anywhere at USC with an adviser's permission.

- GERO 488 Food, Culture, Disease and Longevity in Italy and in the Mediterranean Units: 4
- GERO 489 Finding the Key to a Long, Happy Life in Nicoya, Costa Rica Units: 4
- GERO 493p Longevity and Death among Ancient and Modern European Populations (Italy) Units: 2
- GERO 494 Emotion-Cognition Interactions and Aging Units: 4
- GERO 498 Nutrition, Genes, Longevity and Diseases Units: 4
- GERO 501 Applied Legal and Regulatory Issues in Aging Units: 4
- GERO 505 Housing and Community Policies and Programs Units: 4
- GERO 507 End of Life Care Units: 4
- GERO 519 Recent Advances in Neurobiology and Endocrinology of Aging Units: 2 or 4
- GERO 550 Administration and System Management in Programs for Older Adults Units: 4
- GERO 568 Adaptive Age-Friendly Environments and Injury Prevention Units: 4
- GERO 585 The Aging Family Units: 2 or 4
- GERO 589 Case Studies in Leadership and Change Management Units: 4
- GERO 591 Field Practicum Units: 1-12
- GERO 592 Multidisciplinary Research Seminar in Aging Units: 2

USC Independent Health Professions at the Herman Ostrow School of Dentistry

The USC Division of Biokinesiology and Physical Therapy and the USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy are administered by the Herman Ostrow School of Dentistry of USC. Both of these divisions offer outstanding education at the graduate level and the Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy offers an undergraduate program.

The USC Division of Biokinesiology and Physical Therapy was established in 1944. For those entering the physical therapy profession, the division offers the Doctor of Physical Therapy, the top-ranked DPT program in the country. For practicing physical therapists, the division offers a Master of Science degree as well as clinical residency programs in neurology, orthopedics, pediatrics and sports. In addition, the division offers the nation's longest-standing PhD degree program in Physical Therapy, now a PhD in Biokinesiology. Experienced clinicians with a master's degree in physical therapy may be eligible for the Doctor of Physical Therapy in an Advanced Standing program. The division is headquartered on the Health Sciences Campus.

The USC Chan Division of Occupational Science and Occupational Therapy opened in 1942 and is headquartered on the Health Sciences Campus. More than 50 percent of the recipients of the American Occupational Therapy Association's highest awards have been USC alumni. The division offers three graduate degrees: the Master of Arts; the world's first PhD in Occupational Science; and the Occupational Therapy Clinical Doctorate (OTD). The USC Chan Division of Occupational Science and Occupational Therapy master's-level professional degree program is fully accredited by the Accreditation Council for Occupational Therapy Education®, c/o Accreditation Department, American Occupational Therapy Association, Inc., 4720 Montgomery Lane, Suite 200, Bethesda, Maryland 20814-3449, (301) 652-6611 x2914, acoteonline.org. The division also offers a professional degree program allowing students to earn a BS degree and, in one additional year, an MA in occupational therapy. Graduates of the professional master's program are eligible to sit for the National Board for Certification in Occupational Therapy® examination. A minor in occupational science is also offered for undergraduate students pursuing a major outside occupational therapy.

Faculty

Associate Dean and Chair: James Gordon, EdD, PT, FAPTA
Associate Chair: Cheryl Resnik, PT, DPT, FNAP, FAPTA
Professors: James Gordon, EdD, PT, FAPTA; Christopher Powers, PhD, PT, FAPTA; Carolee J. Winstein, PhD, PT, FAPTA; Francisco Valero-Cuevas, PhD
Professors (Clinical Scholars): Linda Fetters, PhD, PT, FAPTA; Kornelia Kulig, PhD, PT, FAPTA
Professors of Clinical Physical Therapy: Beth Fisher, PT, PhD, FAPTA; Rob F. Landel, PT, DPT, OCS, CSCS, FAPTA; Lori Michener, PT, PhD, FAPTA
Associate Professors: Lucinda L. Baker, PhD, PT; Nina S. Bradley, PhD, PT; George J. Salem, PhD; Nicolas Schweighofer, PhD
Assistant Professors: Jason Kutch, PhD; James Finley, PhD; Sook-Lei Liew, PhD, OTR/L
Associate Professors of Clinical Physical Therapy: Beth Fisher, PhD, PT; Cheryl Resnik, PT, DPT, FNAP; E. Todd Schroeder, PhD; Susan Sigward, PhD, PT, ATC; Julie Tilson, PT, DPT, MS, NCS
Assistant Professors of Clinical Physical Therapy: Jesus Dominguez, PhD, PT; Jacquelyn Dylla, PT, DPT, OCS; Rose Hamm, DPT, CWS; Robbin Howard, PT, DPT, NCS; Yogi Matharu, PT, DPT, OCS; Marisa Perdomo, PT, DPT; Amy Pomrantz, PT, DPT, OCS, ATC; Barbara Sargent, PhD, PT, PCS; Michael S. Simpson, PT, DPT, CCS; Jonathan Sum, PT, DPT, OCS, SCS; Kimiko Yamada, PT, DPT, OCS, ATC, CSCS
Assistant Professors of Research: Christina Dieli-Conwright, PhD, CSCS, CET; Beth Smith, PT, DPT, PhD
Instructors of Clinical Physical Therapy: Elizabeth Acreman, PT, DPT; Geoffrey Cariker, PT, DPT, GCS; Jessica Curran, PT, DPT, OCS; Lauren Davis, PT, DPT; Aimee M. Diaz, PT, DPT, SCS, ATC; Ryan Frendewey, PT, DPT; Lori Ginoza, PT, DPT, NCS; Janelle Gilmer PT, DPT, GCS; Erin Hayden, PT, DPT, OCS; Lydia In, MPT; Nicole Irizarry, PT, DPT, CCS; Eileen V. Johnson, PT, DPT; Yasuyuki Kasayama, DPT, MHA, OCS; Kenneth Kim, PT, DPT, OCS, CSCS; Daniel Kirages, PT, DPT, OCS, FAAOMPT; Angela Kwan, MPT; Cherise Lathan, PT, DPT, NCS; Valerie Matthews, PT, DPT; Brian McNeill, PT, DPT; Jennifer Okuno, MPT; David Richards, PT, DPT, NCS; Terry Richardson, PT, DPT; Scott Russell, PT, DPT; Don Shimabukuro, MPT; Jennifer Tanaka, PT, DPT, NCS; Jeff Thompson, PT, DPT; Erica Sigman, DPT, OCS; Stephanie Woelfel-Dyess, PT, MPT, CWS, FACCWS; Noriko Yamaguchi, PT, DPT, CSCS, GCS; Maria Zibell, PT, DPT
Adjunct Associate Professors: Joseph Godges, DPT; Larry Ho, PT, DPT, OCS; Jing-Ching (Sally) Ho, PT, DPT, OCS; Ning Lan, PhD;
Adjunct Assistant Professors of Clinical Physical Therapy: Michael Andersen, PT, DPT, OCS; Kyle F. Baldwin, PT, DPT; Julia Burlette Itamura, PT, DPT, OCS; Jason Cozby, PT, DPT, OCS; Sean Flanagan, PhD, ATC, CSCS; Kathryn L. Havens, PhD; John Jankoski, MPT, NCS, OCS; Rebecca Lewthwaite, PhD; Ndidiamaka Matthews, PT, DPT, NCS; John Meyer, PT, DPT, OCS, FAFS; Elizabeth Poppert, PT, DPT, MS, OCS; Gary Souza, PT, DPT, OCS
Adjunct Instructors of Clinical Physical Therapy: Ginelle Amormino, PT, DPT; Andrea Austin, PT, DPT, OCS, ATC; Melissa Brose, PT, DPT; Erin Caudill, PT, DPT, NCS; Manjiri Dahdaul, DPT; Oscar Gallardo, MS, PT; Julie A. Guthrie, PT, DPT, OCS; Julie Hershberg, PT, DPT, NCS; Mils Hillman, PT, DPT, OCS; Becky Kern, PT, DPT, OCS; Covey Lazouras, PT, DPT, NCS; Andrew Myler, PT, DPT, NCS; Lisa Meyer, PT, DPT, OCS; Jill Ordorica, PT, DPT, PCS; Pamela Ressler, PT, DPT, NCS; Joseph Robinson, PT, DPT; Jo Armour Smith, PhD; Rachel Tabak Tran, PT; Jared Vagy, PT, DPT, OCS, CSCS; Jena Van Loo, MPT; Cynthia Wederich, PT, DPT; Jeremy Wong, PT, DPT, PCS; Jennifer Yue, PT, DPT, NCS

Programs

The Division of Biokinesiology and Physical Therapy offers multiple degrees, certificates and clinical residency programs allowing graduates the opportunity to choose educational programs that will expose them to cutting-edge research and scientific advancements, in turn creating innovators in the physical therapy profession. The largest degree program is the top-ranked three-year Doctor of Physical Therapy (DPT). Post-professional programs include the clinical residency programs in neurologic, orthopedic, pediatric and sports physical therapy. The division also offers a PhD in Biokinesiology, one of the nation's first PhD degrees in physical therapy education. The graduate curricula for

the master of science and doctor of philosophy degrees are open to all qualified students who are or are not physical therapists.

Master's Degree

Biokinesiology (MS)

Graduate study for the Master of Science in Biokinesiology is open to individuals who have a bachelor's degree and who have a strong interest in movement science.

Admission Requirements

Admission requirements include a superior grade point average in cumulative undergraduate and graduate course work (if applicable). Applicants should score at least 150 in each area of the Graduate Record Examinations. Applicants are to provide the department with three letters of recommendation. The faculty may request a personal interview before making a decision on admission. Admission will be considered for the fall semester only. The application deadline is November 1. All applicants should contact the Division of Biokinesiology and Physical Therapy for advisement.

Prerequisites

The prerequisite for applicants to the Master of Science program in biokinesiology is either: (a) a bachelor's degree or higher with a science major or equivalent; or (b) a bachelor's or master's degree in physical therapy with appropriate basic science content. Courses completed at the time of application must include work (with appropriate laboratory study) in chemistry, physics, calculus and biology. Highly recommended is course work in anatomy, physiology, histology, kinesiology, trigonometry, neuroscience, analytical geometry, exercise physiology, biochemistry and computer programming. Applicants with no background in cellular or molecular biology may be required to take PT 509 in the entry-level DPT program. Candidates should have some degree of computer literacy. International applicants will be considered on a special evaluation of credentials.

Students deficient in certain prerequisites may be admitted subject to completion of requirements within two years after admission. An additional year may be granted upon review of the student's program by a faculty committee. Work in any prerequisite subjects will not be part of the required units for the Master of Science.

Degree Requirements

Completion of the degree requires satisfactory completion of a minimum of 32 credits of course work at the 500 level or above, a research project (BKN 559 and BKN 590), and a summative experience.

Required Courses

Select 2 of the 3 required core discipline focus areas of Biokinesiology: BKN 550, BKN 551 and BKN 552.

- BKN 550 Neurobehavioral Basis of Movement Units: 4
- BKN 551 Musculoskeletal and Biomechanical Basis of Movement Units: 4
- BKN 552 Physiological Basis of Voluntary Movement Units: 4
- BKN 559 Readings in Biokinesiology Units: 1, 2, 3, 4 (max 8)
- BKN 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- PM 510L Principles of Biostatistics Units: 4

Additional Requirements

Students must complete the biokinesiology core courses before sitting for their comprehensive examination. Substituting a course for one of the core courses may be allowed after receiving approval from the Biokinesiology Program Committee prior to the beginning of the course.

In order to fulfill the research project requirement, the following plan is suggested; however, each plan can be individualized based on the needs of the student and/or adviser:

1. Select a research professor (from the department) whose work interests them. This should be done by the end of the first year of study.
2. After receiving the professor's approval, sign up for BKN 559 (4 units) and complete a semester reading the literature pertinent to the professor's work.
3. The following semester, sign up for BKN 590 (4 units) and participate in an ongoing research project that is being conducted by the professor. The research paper must be completed within the semester for which BKN 590 units are being given.

See the Doctor of Philosophy in Biokinesiology section for a list of courses available to MS students.

Biokinesiology (Sports Science) (MS)

Graduate study for the Master of Science in Biokinesiology is open to individuals who have a bachelor's degree and who have a strong interest in movement science.

Admission Requirements

Admission requirements include a superior grade point average in cumulative undergraduate and graduate course work (if applicable). Applicants should score at least 150 in each area of the Graduate Record Examinations. Applicants are to provide the department with three letters of recommendation. The faculty may request a personal interview before making a decision on admission. Admission will be considered for the fall semester only. The application deadline is November 1. All applicants should contact the Division of Biokinesiology and Physical Therapy for advisement.

Prerequisites

The prerequisite for applicants to the Master of Science program in biokinesiology is either: (a) a bachelor's degree or higher with a science major or equivalent; or (b) a bachelor's or master's degree in physical therapy with appropriate basic science content. Courses completed at the time of application must include work (with appropriate laboratory study) in chemistry, physics, calculus and biology. Highly recommended is course work in anatomy, physiology, histology, kinesiology, trigonometry, neuroscience, analytical geometry, exercise physiology, biochemistry and computer programming. Applicants with no background in cellular or molecular biology may be required to take PT 509 in the entry-level DPT program. Candidates should have some degree of computer literacy. International applicants will be considered on a special evaluation of credentials.

Students deficient in certain prerequisites may be admitted subject to completion of requirements within two years after admission. An additional year may be granted upon review of the student's program by a faculty committee. Work in any prerequisite subjects will not be part of the required units for the Master of Science.

Degree Requirements

Completion of the degree requires satisfactory completion of a minimum of 32 credits of course work at the 500 level or above, an internship (BKN 600) and a sports science related summative experience.

Required Courses

Select 2 of the 3 required core discipline focus areas of Biokinesiology: BKN 550, BKN 551 and BKN 552.

- BKN 550 Neurobehavioral Basis of Movement Units: 4
- BKN 551 Musculoskeletal and Biomechanical Basis of Movement Units: 4
- BKN 552 Physiological Basis of Voluntary Movement Units: 4
- BKN 553 Experimental Methods for the Analysis of Human Movement Units: 4
- BKN 600 Sports Science Internship Units: 2, 3, 4 (2 units required)
- PM 510L Principles of Biostatistics Units: 4

Additional Requirements

Substituting a course for one of the core courses may be allowed after receiving approval from the Biokinesiology Program

Committee prior to the beginning of the course.

In order to fulfill the summative project requirement, the following plan is suggested; however, each plan can be individualized based on the needs of the student and/or adviser:

1. Select electives that align with the student's area of interest.
2. Identify a summative project adviser (course instructor or research professor) whose work relates to the area of interest. This should be done by the end of the first year of study.
3. Establish project specific aims and objectives. Create a curricular plan that aligns with completion of the project (additional electives which may include BKN 559 and/or BKN 590)

Note: Summative project may be completed in conjunction with BKN 600: Sports Science Internship, but must be approved and coordinated with a faculty adviser.

See the Doctor of Philosophy in Biokinesiology section for a list of courses available to MS students.

Electives

- BKN 559 Readings in Biokinesiology Units: 1, 2, 3, 4
- BKN 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- BKN 610L Technology in Sport: Field Assessment of Athlete Performance Units: 2
- BKN 611L Technology in Sport: Physiological Assessments Units: 2
- BKN 630 Resistance Training Techniques for High Performance Athletes Units: 2

Dual Degree

Doctor of Physical Therapy/Master of Public Health (DPT/MPH)

The Post Professional Doctor of Physical Therapy (DPT) and the Master of Public (MPH) dual degree program offers the opportunity for physical therapy clinicians to pursue a doctoral-level education in combination with an integrated approach to health care. The program spans four years. Students begin the first one to two years completing MPH core and elective course work in the Department of Preventive Medicine. The remaining years are devoted to program requirements in physical therapy.

Doctoral Degree

Biokinesiology (PhD)

The graduate program leading to the Doctor of Philosophy in Biokinesiology is designed to prepare candidates for research and teaching at the university level. Actual programs of study will be designed with a degree of flexibility directed toward individual students who seek to become independent scholars.

Admission Requirements

Applicants must meet all general admission requirements of the university. Admission requirements include a superior grade point average in cumulative undergraduate and graduate course work (if applicable). In addition, applicants should score at least 150 in each area of the Graduate Record Examinations (GRE) and have some research experience. Students admitted for the Master of Science degree are not automatically admitted to the Doctor of Philosophy program. The Master of Science is not required as a prerequisite to the PhD but may be advised.

Applicants must have a personal interview with the program faculty. A student can be considered for admission only when a member of the full-time PhD faculty has agreed to serve as the student's PhD adviser. Three letters of recommendation and duplicate transcripts must be sent to the division for preliminary evaluation, although final acceptance is based upon the official USC application procedure.

Prerequisites (PhD Program)

The prerequisite for applicants to the PhD program in biokinesiology is either: (a) a bachelor's degree or higher with a science major or equivalent; or (b) a bachelor's or master's degree in physical therapy with appropriate basic science content. Courses completed at the time of application must include work (with appropriate laboratory study) in chemistry, calculus, physics and biology. Highly recommended is course work in anatomy, physiology, histology, cell biology, exercise physiology, kinesiology, biochemistry, neuroscience, trigonometry, analytical geometry and computer programming.

Candidates should be computer literate. International applicants will be considered upon evaluation of credentials by the USC Office of Admission.

Students deficient in certain prerequisites may be admitted subject to completion of requirements within two years after admission. An additional year may be granted upon review of the student's program by a faculty committee. Work in any prerequisite subject will not be part of the required 60 units for the Doctor of Philosophy.

Screening Procedure

A screening procedure will be offered twice each year for qualified students. It must be taken prior to the completion of 24 units at the 500-level or higher. The purpose of the screening procedure is to assess the progress of the PhD student and to determine whether that progress is sufficient to continue in the PhD program. Passing the procedure is a prerequisite for continuation in the PhD program.

Course Requirements

A minimum of 60 units is required for the Doctor of Philosophy degree.

Required Course Work

Select 2 of the 3 required core discipline focus areas of Biokinesiology: BKN 550, BKN 551 and BKN 552.

- BKN 550 Neurobehavioral Basis of Movement Units: 4
- BKN 551 Musculoskeletal and Biomechanical Basis of Movement Units: 4
- BKN 552 Physiological Basis of Voluntary Movement Units: 4
- BKN 790 Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- BKN 794a Doctoral Dissertation Units: 2
- BKN 794b Doctoral Dissertation Units: 2
- BKN 794c Doctoral Dissertation Units: 2
- BKN 794d Doctoral Dissertation Units: 2
- BKN 794z Doctoral Dissertation Units: 0
- INTD 500 Ethics and Accountability in Biomedical Research Units: 1 *
- PM 510L Principles of Biostatistics Units: 4 **
- PM 511aL Data Analysis Units: 4 **

Note:

**Or equivalent graduate ethics course.*

***Or equivalent graduate level statistics.*

PhD students must complete two of the three core courses (BKN 550, BKN 551, BKN 552) before participating in the screening procedure. Substituting a course for one of the core courses may be allowed after receiving approval from the Biokinesiology Program Committee prior to the beginning of the course.

Other course requirements (to complete 60 units) will vary according to the specific needs of each student. Course work other than departmental offerings is encouraged and may be required by the student's qualifying exam committee.

Courses Available for MS/PhD Students

- BKN 559 Readings in Biokinesiology Units: 1, 2, 3, 4 , max 8
- BKN 563 Biomechanics Units: 2, 2 years
- BKN 566 Neurobiology of Locomotion Units: 2
- BKN 567 Advanced Topics in Biomechanics Units: 2
- BKN 573a Advanced Dissection Anatomy Units: 2
- BKN 573b Advanced Dissection Anatomy Units: 2
- BKN 575 Principles of Musculoskeletal Imaging Units: 2
- BKN 585 Systematic Research Writing Units: 3
- BKN 587a Physiological Correlates of Therapeutic Exercise Units: 4

- BKN 587b Physiological Correlates of Therapeutic Exercise Units: 4
- BKN 588 Physiology and Biomechanics of Resistance Exercise Units: 2
- BKN 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- BKN 593 Behavioral Basis of Motor Control and Learning Units: 3
- BKN 594a Master's Thesis Units: 2
- BKN 594b Master's Thesis Units: 2
- BKN 594z Master's Thesis Units: 0
- BKN 599 Special Topics Units: 2, 3, 4 , max 8
- BKN 615 Principles of Skeletal Adaptation Units: 4, 2 years
- BKN 617 Modeling the Motor System: An Introduction Units: 2, 2 years
- BKN 618L Modeling the Motor System: Laboratory Units: 1, 2 years
- BKN 621 Electromyography in Research and Practice Units: 3, 2 years
- BKN 623 Neuroplasticity and Neural Repair Units: 3, 2 years
- BKN 672 Advanced Independent Study in Biokinesiology Units: 1, 2, 3, 4 , max 8
- BKN 790 Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- BKN 794a Doctoral Dissertation Units: 2
- BKN 794b Doctoral Dissertation Units: 2
- BKN 794c Doctoral Dissertation Units: 2
- BKN 794d Doctoral Dissertation Units: 2
- BKN 794z Doctoral Dissertation Units: 0

Additional Requirements

Foreign Language Requirement

There is no foreign language requirement.

Qualifying Exam Committee

Upon successful completion of the screening examination the student and the research adviser will select a qualifying exam committee for continuing course work and independent study. The qualifying exam committee comprises five full-time faculty members.

The qualifying exam committee will recommend course work, independent study and readings in the major and cognate areas.

Qualifying Examination

The PhD qualifying examination is offered during the fall or spring semesters. The qualifying examination concentrates on the student's ability to demonstrate knowledge in the major academic area chosen and its relation to other areas of study offered in the department. The qualifying examination has both written and oral components. A student failing any part of the examination may be allowed one additional opportunity to pass that portion at the discretion of the qualifying exam committee, within the regulations of the Graduate School governing the repetition of qualifying examinations.

Dissertation Committee

After the qualifying examination has been passed and a dissertation topic approved, the qualifying exam committee shall be known as the dissertation committee and may be reduced to three members upon unanimous recommendation to the dean of graduate studies. One of the three members must be from outside the major division. The chair of the dissertation committee will be the principal research adviser.

Dissertation and Oral Defense

An acceptable dissertation based on original investigation is required. The dissertation must show technical mastery of a special field, capacity for independent research and scholarly ability.

The dissertation and the defense or final oral must have the unanimous approval of the dissertation committee. The dissertation should be complete within three years of the date the proposal is approved.

Professional Entry-Level Doctor of Physical Therapy Program (DPT)

This degree can be completed through an on-campus program or through a hybrid online/on-campus program. The curriculum comprises six semesters plus two summer sessions for on-campus students and three summer sessions for hybrid students, resulting in completion of the required 115 units. Clinical experience (clerkship) is part of the curriculum during all three years. The Division of Biokinesiology and Physical Therapy awards the DPT to enrolled students who have satisfactorily completed the three-year curriculum. For successful completion, students must pass all course work with a minimum cumulative GPA of 2.75, meet all professional standards and pass all clinical clerkships.

Admission Requirements (Entry-Level)

Applicants are required to complete the equivalent of a U.S. baccalaureate degree at an accredited college or university prior to matriculation. Prerequisite course work must include: a minimum of four semesters/six quarters of course work in the mammalian biological sciences (and must include one course in human anatomy with laboratory and one course in human physiology with laboratory), two semesters/three quarters of chemistry course work with laboratory (which may include general chemistry, organic chemistry or biochemistry), two semesters/three quarters of physics course work with laboratory, a minimum of two courses in psychology (which may include general psychology or abnormal psychology), and one college-level statistics course (generally from the biology, mathematics and psychology departments). A minimum of 150 hours of clinical experience in a variety of physical therapy settings is required. This can be in a volunteer or paid capacity. Applicants should be computer literate.

Students from foreign countries must have completed one year of study in the United States prior to application. Credits from foreign institutions must be approved by the USC Office of Graduate Admission.

Graduate Record Examinations (GRE)

The GRE is required of all applicants. In general, minimum scores of 150 are required on each of the general test measures of verbal and quantitative ability.

Applications

Applications for the on-campus program are submitted through the Physical Therapist Centralized Application Service (PTCAS) Website, and must be completed by December 1 of each year for the class beginning the following fall. Hybrid program applications will be available through our technology partner's Online Application and Recommendation System (OARS). For the initial hybrid class, entering in June 2018, applications will be completed by April 17. Only one class is admitted each year for each program.

The Admissions Committee reviews all information submitted. Applicants may request a personal interview. It is highly recommended that all applicants make an appointment to visit the division's office located on the Health Sciences Campus and talk with students and members of the faculty.

Notice of Acceptance

Notice of acceptance in the on-campus program will be sent to successful candidates no earlier than December of the year prior to the August program start date (with the exception of Early Decision applicants who are typically informed of a decision by late September) and continually thereafter until the class is filled. In no case will an acceptance be offered earlier than one year before anticipated enrollment. Applicants to the hybrid program will be reviewed on a rolling basis with notices of acceptance sent to successful candidates continually until the class is filled.

Candidates in the on-campus program should reply to an offer of acceptance within three weeks enclosing a $1,000 deposit (nonrefundable), which is credited to tuition at the time of registration. Candidates in the hybrid program should submit their initial $1,000 deposit within 10 days of an offer of acceptance. A second nonrefundable $500 deposit is required by mid-May

of the program start year (also to be applied in its entirety as a tuition credit). A letter of withdrawal is required if applicants wish to relinquish their place in the class; release is granted automatically upon receipt of the letter.

Degree Requirements (Entry-Level)

The DPT is awarded to enrolled students who have satisfactorily completed the three-year curriculum of 115 credits (depending on electives chosen). The minimum number of credits required for graduation is 115. The minimum GPA required for graduation is 2.75. Clinical experience (clerkship) is part of the curriculum during all three years.

The Division of Biokinesiology and Physical Therapy uses a system of student evaluation and grading that is designed to encourage self-reliance, to stimulate the student's independent quest for knowledge and to promote excellence in clinical and academic achievement.

Faculty of the program are responsible for establishing evaluation criteria appropriate to the objectives of each course and for specifying the manner in which evaluative information is to be gathered. For clinical evaluation, descriptive comments based on the student's performance are submitted by faculty and clinical instructors to the student's permanent file.

Required Courses

- PT 509 Cellular and Systems Physiology Units: 3
- PT 514L Musculoskeletal Anatomy Units: 4
- PT 516 Principles of Disease Units: 1
- PT 521L Basics of Patient Management Units: 4
- PT 529 Life Span Motor Control Units: 2
- PT 530a Therapeutic Exercise Units: 2
- PT 530b Therapeutic Exercise Units: 2
- PT 534L Neuroanatomy Units: 3
- PT 536 Pathology of Cardiopulmonary Disease and General Medical Conditions Units: 3
- PT 539 Clinical Pharmacology Units: 1
- PT 546 Neuropathology Units: 3
- PT 549L Clinical Exercise Physiology Units: 4
- PT 551L Therapeutic Application of Physical Agents Units: 3
- PT 554L Analytical Anatomy Units: 3
- PT 561a Evidence for Physical Therapist Practice Units: 2
- PT 561b Evidence for Physical Therapist Practice Units: 2
- PT 561c Evidence for Physical Therapist Practice Units: 2
- PT 561d Evidence for Physical Therapist Practice Units: 2
- PT 561e Evidence for Physical Therapist Practice Units: 2
- PT 566 Disorders of the Musculoskeletal System Units: 3
- PT 569 Fundamentals of Neuroscience Units: 4
- PT 571L Clinical Management of Cardiopulmonary Dysfunction Units: 4
- PT 574 Clinical Biomechanics Units: 3
- PT 581L Clinical Management of the Patient with Neurological Dysfunction Units: 5
- PT 582 Mechanics of Human Gait Units: 2
- PT 583L Clinical Electrophysiology Units: 1
- PT 600a Clinical Experience Units: 1
- PT 600b Clinical Experience Units: 3
- PT 600c Clinical Experience Units: 1
- PT 600d Clinical Clerkship Units: 4
- PT 600z Clinical Clerkship Units: 0
- PT 606 Clinical Imaging Units: 2
- PT 621L Clinical Management of the Patient with Musculoskeletal Dysfunction Units: 5
- PT 625 Emerging Topics in Physical Therapy Units: 3
- PT 650 Differential Diagnosis in Physical Therapy Units: 2

Third Year Requirements

Hybrid Track

- PT 640a Hybrid Integrated Patient Management Clinical Skills Units: 3
- PT 640b Hybrid Integrated Patient Management Clinical Skills Units: 3
- PT 642a Hybrid Integrated Patient Management Seminar Units: 2.5
- PT 642b Hybrid Integrated Patient Management Seminar Units: 2.5
- PT 670a Hybrid Advanced Clinical Experience with Academic Integration Units: 6.5
- PT 670b Hybrid Advanced Clinical Experience with Academic Integration Units: 6.5

Residential Track

- PT 630 Integrated Patient Management Clinical Skills Units: 6
- PT 632 Integrated Patient Management Seminar Units: 5
- PT 660 Advanced Clinical Experience with Academic Integration Units: 5
- PT 665 Advanced Clinical Experience Units: 8

Administration

Associate Dean and Chair: Grace Baranek, PhD, OTR/L, FAOTA

Faculty

Mrs. T.H. Chan Professorship in Occupational Science and Occupational Therapy, Associate Dean and Chair: Grace Baranek, PhD, OTR/L, FAOTA
Associate Chairs: Sarah Bream, OTD, OTR/L; Julie McLaughlin Gray, PhD, OTR/L, FAOTA; Katie Jordan, OTD, OTR/L, FAOTA; Mary Lawlor, ScD, OTR/L, FAOTA
Professors: Grace Baranek, PhD, OTR/L, FAOTA; Sharon Cermak, EdD, OTR/L, FAOTA; Gelya Frank, PhD; Mary Lawlor, ScD, OTR/L, FAOTA
Associate Professors: Lisa Aziz-Zadeh, PhD; Elizabeth Pyatak, PhD, OTR/L; Shawn C. Roll, PhD, OTR/L, RMSKS (Sonography), FAOTA
Assistant Professors: Amber Angell, PhD, OTR/L, Sook-Lei Liew, PhD, OTR/L; Bobbi Pineda, PhD, OTR/L, CNT
Professors of Clinical Occupational Therapy: Erna Blanche, PhD, OTR/L; Julie McLaughlin Gray, PhD, OTR/L, FAOTA; Katie Jordan, OTD, OTR/L, FAOTA
Associate Professors of Clinical Occupational Therapy: Rebecca Aldrich, PhD, OTR/L; Arameh Anvarizadeh, OTD, OTR/L; Sarah Bream, OTD, OTR/L; Allison Chu, OTD, OTR/L; Celso Delgado Jr., OTD, OTR/L; Camille Dieterle, OTD, OTR/L; Don Gordon, PhD, OTR/L; Ashley Halle, OTD, OTR/L; Jess Holguin, OTD, OTR/L; Karrie Kingsley, OTD, OTR/L; Kimberly Lenington, OTD, OTR/L; John Margetis, OTD, OTR/L; Stacey Morikawa, OTD, OTR/L; Michael McNulty, OTD, OTR/L; Phuong Nguyen, OTD, OTR/L; Emily Ochi, OTD, OTR/L; Daniel Park, OTD, OTR/L; Elyse Peterson, OTD, OTR/L; Deborah Pitts, PhD, MBA, OTR/L, BCMH (Mental Health), CPRP, FAOTA; Samia Rafeedie, OTD, OTR/L, BCPR (Physical Rehabilitation), CBIS (Brain Injury); Chantelle Rice, OTD, OTR/L; Shelby Surfas, OTD, OTR/L; Ashley Uyeshiro, OTD, OTR/L; Myka Winder, OTD, OTR/L

Assistant Professors of Clinical Occupational Therapy: Yasi Amanat, OTD, OTR/L; Amber Bennett, OTD, OTR/L; Brett Bufford, OTD, OTR/L; Laura Cox, OTD, OTR/L; Catherine Crowley, OTD, OTR/L; Rebecca Cunningham, OTD, OTR/L; Heather Gates, OTD, OTR/L; Caroline Hardin, OTD, OTR/L; Serena Hobson, OTD, OTR/L; Lucy Hosoda, OTD, OTR/L; Tracy Jalaba, OTD, OTR/L; Jennifer Jones, OTD, OTR/L; Kelcie Kadowaki, OTD, OTR/L; Joshua Kotler, OTD, OTR/L, CBIS; Carnie Lewis, OTD, OTR/L; Marissa Marchioni, OTD, OTR/L; Elena Meng OTD, OTR/L; Stephanie Mielke, OTD, OTR/L; Tessa Milman, OTD, OTR/L; Kimberly Morris-Eggleston, OTD, OTR/L; Jodie Murakami, OTD, OTR/L; Kristin Nxumalo, OTD, OTR/L; Kelsey Peterson, OTD, OTR/L; Allison Phillips, OTD, OTR/L; Lindsey Reeves, OTD, OTR/L; Janice Rocker, OTD, OTR/L; Erin Sako, OTD, OTR/L; Clarissa Saunders-Newton, PhD, OTR/L; Linsey Smith; OTD, OTR/L; Emily Sopkin, OTD, OTR/L; Stephanie Tsai, OTD, OTR/L; Christine Turnbull, OTD, OTR/L; Samantha Valasek, OTD, OTR/L; Jamie Wilcox, OTD, OTR/L
Instructors of Clinical Occupational Therapy: Aimee Aguillon, OTD, OTR/L; Jenna Kobara, OTD, OTR/L; Cindy Luff, MA, OTR/L; Deanna Mannarelli, MA, OTR/L; Whitney Pike, BS, OTR/L; Joan Vartanian, BS, OTR/L
Research Professors: Michael Carlson, PhD; John Sideris, PhD
Research Associate Professor: Jesus Diaz, OTD, OTR/L
Research Assistant Professors: Stefanie Bodison, OTD, OTR/L; Leah Duker, PhD, OTR/L; Christopher Laine, PhD; Stacey Schepens Niemiec, PhD, OTR/L
Research Adjunct Instructor: Ana Verran, MA, OTR/L
Clinical Associate Professor of Research: Cheryl Vigen, PhD
Clinical Associate Professors: Michelle Hsia OTD, OTR/L; Linda Liang, MOT, OTR/L
Clinical Assistant Professors: Janet Gunter, OTD, OTR/L; Diego Lopez, OTD, OTR/L; Kristy Payne, OTD, OTR/L
Adjunct Assistant Professors of Clinical Occupational Therapy: Susan Bowles, OTD, OTR/L; Merry Lee, OTD, OTR/L; Colin Lenington, OTD, OTR/L; Pamela Roberts, PhD, OTR/L, FAOTA; Joan Surfus, MA, OTR/L; Andre Woo, OTD, OTR/L, CHT
Adjunct Instructors of Clinical Occupational Therapy: Remy Chu, MHA, OTR/L; Lisa Deshaies, MA, OTR/L; Heidi Dombish, MS, OTR/L; Dawn Hironaka, BS, OTR/L; Rosemond Selgson, OTR/L, ATP
Emeritus Professors: Florence Clark, PhD; Linda Fazio, PhD; William Morgan, PhD; Elizabeth J. Yerxa, EdD, LHD (Hon.), ScD (Hon.), DMed (Hon.), FAOTA; Ruth Zemke, PhD, FAOTA

Degrees Offered

The USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy offers a minor in Occupational Science, a Bachelor of Science in Occupational Therapy, and a Master of Arts in Occupational Therapy. The Master of Arts in Occupational Therapy is offered for students continuing their education following an undergraduate degree in occupational therapy, for students whose first degree is in another field, and also for certified occupational therapists seeking a post-professional degree. The division also offers a post-professional Occupational Therapy Clinical Doctorate (OTD) and a PhD in Occupational Science.

The USC Chan Division of Occupational Science and Occupational Therapy master's-level professional degree program is fully accredited by the Accreditation Council for Occupational Therapy Education® (ACOTE), c/o Accreditation Department, American Occupational Therapy Association, Inc., 6116 Executive Boulevard, Suite 200, North Bethesda, Maryland 20852-4929, (301) 652-6611 x2914, acoteonline.org. Entry into occupational therapy practice is at the graduate degree level only. In order to practice, students in the bachelor's program must earn an MA degree in Occupational Therapy, successfully complete a minimum of 24 full-time weeks of clinical fieldwork, sit for the National Board for Certification in Occupational Therapy® (NBCOT) exam and apply for a license.

Pi Theta Epsilon

Pi Theta Epsilon is the national honor society for occupational therapy students and alumni. This society recognizes and encourages superior scholarship among students enrolled in entry-level graduate programs of occupational therapy across the United States.

The Alpha Eta Chapter of Pi Theta Epsilon (PTE) at the University of Southern California selects candidates early in the spring semester of each year based on National PTE guidelines related to academic standing and students' potential for leadership in the profession.

Bachelor's Degree

Occupational Therapy (BS)

The undergraduate curriculum leads to the Bachelor of Science with a major in Occupational Therapy. As of fall 2015, only incoming freshmen may apply to the bachelor's to master's program in occupational therapy. Students may not change their major to occupational therapy once admitted to USC. Students majoring in occupational therapy begin full-time graduate study during their senior year, substantially reducing their overall cost of education and preparing them sooner for the National Board for Certification in Occupational Therapy® (NBCOT) examination. Successful completion of a Master of Arts degree, including successful completion of a minimum of 24 full-time weeks of clinical fieldwork, are required for eligibility to sit for the NBCOT examination. Certification from the board and state licensure are required to practice as an occupational therapist. (See Occupational Therapy (MA) for a description of the MA degree program.)

Admission Criteria and Application Procedures for Incoming Freshmen

See the Undergraduate Admission section of this catalogue for admission criteria and application procedures for the university.

Program Requirements

A total of 128 units is required for the Bachelor of Science degree. An occupational therapy major cannot count any 300-level OT course toward the BS degree.

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. See General Education for more information.

Required Pre-Professional Courses

Students in the Occupational Therapy major are required to meet with their adviser within the division once each semester to ensure satisfactory completion of requirements outlined below. Students must successfully complete the pre-professional required courses prior to taking the advanced professional courses.

All pre-professional courses must be completed:

- Within the last seven years
- With a minimum GPA of 3.0 (pass/fail or grades below a C are not accepted)
- From an accredited junior college, four-year college or university
- Either in a classroom setting or online; however, anatomy must be completed in a classroom setting (refer to Course Work Taken Elsewhere)
- For a total of three semester units each (with the exception of medical terminology, which may be certificate, credit/no credit,1 or 2 units)

Required Pre-Professional Courses (USC course numbers are noted)

- Students who wish to transfer credit for courses taken at another institution must gain university approval:

Pre-Professional Courses

- OT 200 Medical Terminology for Health Professions Units: 1
- OT 250 Introduction to Occupational Science and Occupational Therapy Units: 4 or
- SOCI 200gm Introduction to Sociology Units: 4 or
- ANTH 201g Introduction to Sociocultural Anthropology Units: 4
- OT 251x Across the Lifespan: Occupations, Health and Disability Units: 4 or
- EDUC 589 Human Lifespan Development Units: 3 or
- PSYC 336L Developmental Psychology Units: 4 with
- PSYC 337L Adult Development and Aging Units: 4
- OT 260 Human Functional Anatomy for Allied Health Professions Units: 3 or
- HBIO 301L Human Anatomy Units: 4 (with laboratory)
- OT 261 Human Physiology for Allied Health Professions Units: 3 or
- BISC 307L General Physiology Units: 4 or
- HBIO 420L Applied Human Physiology Units: 4
- PSYC 274Lg Statistics Units: 4 or
- BUAD 310g Applied Business Statistics Units: 4 or
- BISC 305g Statistics for Biological Sciences Units: 4 or
- SOCI 314Lg Analyzing Social Statistics Units: 4 or
- HP 340Lg Health Behavior Statistical Methods Units: 4 with
- HP 350L Health Behavior Research Methods Units: 4 or
- MATH 208x Elementary Probability and Statistics Units: 4 with
- MATH 118gx Fundamental Principles of Calculus Units: 4 or with
- MATH 125g Calculus I Units: 4
- PSYC 360 Abnormal Psychology Units: 4

Notes:

All pre-professional courses must be completed by the start of the senior year.

Required Professional Courses

Enrollment in professional occupational therapy courses is limited to junior and senior occupational therapy majors only.

Required Professional Courses

- OT 405 Foundations: Occupation Units: 2
- OT 406L Foundations: Creativity, Craft and Activity Analysis Units: 2
- OT 440L Foundations: Kinesiology Units: 2
- OT 441L Foundations: Neuroscience Units: 2
- OT 511 Therapeutic Use of Self Units: 2
- OT 515 Neuroscience of Behavior Units: 4
- OT 518 Quantitative Research for Evidence-Based Practice Units: 4
- OT 521 Clinical Reasoning Units: 3
- OT 523 Communication Skills for Effective Practice Units: 3
- OT 525 Qualitative Research for Evidence-Based Practice Units: 4

Two of the following:

- OT 501L Practice Immersion: Adult Physical Rehabilitation Units: 8
- OT 502L Practice Immersion: Mental Health Units: 8
- OT 503L Practice Immersion: Pediatrics Units: 8

Additional Requirements

Scholastic Standards

Undergraduate occupational therapy students must maintain a GPA of at least 3.0 (A = 4.0) in all required OT courses and successfully complete the Graduate Record Examinations in order to continue into the graduate program. If an undergraduate student's OT grade point average (GPA) falls below 3.0, or if the cumulative undergraduate GPA falls below 3.0 at the end of the fall semester of the senior year, continuance is not assured.

Advising

Students enrolled in the occupational therapy major are required to meet with an academic adviser within the division each semester.

Minor

Occupational Science Minor

The division offers a minor in the discipline of occupational science. It is one of a select few programs in the world that offers undergraduates the opportunity to explore the fields of occupational science and occupational therapy.

Occupational scientists and Occupational therapists seek to understand and appreciate the motivation that makes us human. Unlike other creatures, humans are innately driven to fill their time with interesting, meaningful activities, which scholars call "occupations." We appreciate that humans need to be occupied. These occupations have a profound impact on physical and mental health, one's sense of well-being and the experience of a satisfying quality of life. Occupational Science seeks to understand the precise nature and function of occupations and the critical effect of daily activity on human beings. Scientists working in the field may examine questions such as the relationship between childhood occupations and adult competency and achievement, what constitutes a healthy balance of work, rest and leisure, and what factors contribute to a good fit between a particular individual and their occupations.

The minor in occupational science requires a total of 20 units: a required gateway course (OT 250) for 4 units plus 16 units selected from the elective courses. It is open to all majors at USC. An occupational therapy major cannot count any 300-level OT course toward the BS degree.

Required Course

- OT 250 Introduction to Occupational Science and Occupational Therapy Units: 4

Elective Courses (16 units)

- OT 101x Caring For Your Self: Engaging in Healthy Habits and Routines Units: 2
- OT 251x Across the Lifespan: Occupations, Health and Disability Units: 4
- OT 280 Essential Occupations of Emerging Adulthood Units: 2
- OT 300 Occupational Expressions of Diverse Identities and Lifestyles Units: 4
- OT 310 Creativity Workshop Units: 2
- OT 312 Creating a Sustainable Lifestyle Units: 2
- OT 320 The Nature of Human Occupation: Form, Function, and Meaning Units: 4
- OT 325 The Brain: Mind, Body, and Self Units: 4
- OT 330 Perspectives on the Daily Life of Families Units: 4
- OT 333 Sports Ethics Units: 4
- OT 340 Occupational Foundations of Human-Animal Interaction Units: 4
- OT 350 Disability, Occupations, and the Health Care System Units: 4
- OT 355 Doing Social Justice Units: 2
- OT 360 Creating the Self through Narrative: Acts of Life Story Production Units: 4
- OT 370 Understanding Autism: Participation Across the Lifespan Units: 4
- OT 375 The Narrative Structure of Social Action: Narrative, Healing and Occupation Units: 4

Master's Degree

Occupational Therapy (MA)

The Master of Arts (MA) program is open to students with or without an undergraduate degree in occupational therapy.

Students without a prior degree in occupational therapy take both the foundational core courses and the advanced core courses listed below. Students with a prior degree in occupational therapy from another university may apply for Advanced Standing, reducing the units required for the degree from 80 units to 32 units (or 76 units to 28 units with the thesis option). Students who have earned a bachelor of science (BS) in Occupational Therapy from USC may apply for Advanced Standing and follow the curriculum outlined under Advanced Core Courses for the Bachelor to Master Program, reducing the total units required for the degree from 80 units to 36 units, which includes 4 units of Clinical Internship with Seminar (or 76 units to 32 units for the thesis option). All students must complete either the Thesis or Comprehensive Exam Option.

Admission Requirements

Applicants must have a bachelor's degree from an accredited college or university; completed of the Graduate Record Examination (GRE) within five years of planned enrollment; three letters of recommendation; a personal statement and supplemental application questions. International students must have a satisfactory score on the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) within two years of enrollment.

Those with a baccalaureate degree in occupational therapy from an accredited college or university or a World Federation of Occupational Therapy (WFOT) approved program may apply for Advanced Standing.

Those with a baccalaureate degree in a field other than occupational therapy must have completed all of the following prerequisites:

- within seven years of enrollment
- prior to the start of the program with a minimum GPA of 3.0 (pass/fail or grades below a C are not accepted)
- from an accredited junior college, college or university
- either in a classroom setting or online
- (with exception of medical terminology which may be 1 or 2 units) as follows (course numbers refer to USC courses, but prerequisites can be taken at any accredited college or university):

Prerequisites

- OT 200 Medical Terminology for Health Professions Units: 1

- SOCI 200gm Introduction to Sociology Units: 4 or
- ANTH 201g Introduction to Sociocultural Anthropology Units: 4

- HBIO 301L Human Anatomy Units: 4 (with laboratory)

- OT 261 Human Physiology for Allied Health Professions Units: 3 * or
- BISC 307L General Physiology Units: 4

- OT 251x Across the Lifespan: Occupations, Health and Disability Units: 4
- OT 260 Human Functional Anatomy for Allied Health Professions Units: 3 (with laboratory)

- MATH 114gx Foundations of Statistics Units: 4 and
- PSYC 274Lg Statistics Units: 4 or
- HP 340Lg Health Behavior Statistical Methods Units: 4 and
- HP 350L Health Behavior Research Methods Units: 4 or
- BUAD 310g Applied Business Statistics Units: 4

- PSYC 360 Abnormal Psychology Units: 4
- A course in Gerontology or adult development (recommended but not required)

Notes:

**If anatomy and physiology are combined, students must take two sequential semesters with a laboratory each semester (6–8 units).*

Application Procedures

For those with a baccalaureate degree in occupational therapy: applications are accepted at any time, preferably by February 15 for fall admission.

For those with a baccalaureate degree in a field other than occupational therapy: applications are due by November 1 for summer admission.

Applications received after the November 1 deadline are considered on a space-available basis.

Application materials include:

1. USC Online Graduate Application with division supplemental application materials (required only for those with a baccalaureate degree in occupational therapy)
2. OTCAS online application required only for applicants with a baccalaureate degree in a field other than occupational therapy)
3. three letters of recommendation
4. transcripts from all colleges/universities attended
5. personal statement
6. supplemental application questions
7. official results of the Graduate Record Examinations (GRE)
8. TOEFL or IELTS scores if required

A personal interview may be requested. Please see the division Website for the most up-to-date application procedures: *chan.usc.edu/*.

International Students

Students educated outside the United States must have their credentials evaluated by the Office of Graduate Admission before their application to the division can be reviewed. International students must demonstrate competency in English, as measured by the TOEFL or the IELTS. See the Admission section of this catalogue.

Degree Requirements

The MA degree is under the jurisdiction of the USC Graduate School. Students should also refer to the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School.

Requirements include: GPA of 3.0 in all course work attempted and all course work applied to the degree; at least two-thirds of units applied to the degree must be at the 500 level or higher.

Students without a prior degree in occupational therapy take both the foundational core courses and the advanced core courses listed below. OT 405 , OT 406L, OT 440L and OT 441L are foundational courses that students are required to pass before they may register for any other courses in the master's program. Students must complete all subsequent courses in the program on a full-time basis and in sequence, except for students requiring disability accommodations.

Students with a degree in occupational therapy from outside of USC may apply for Advanced Standing, reducing the units required for the degree from 80 units to 32 units (or from 76 units to 28 units for the thesis option). Students who have earned a BS in Occupational Therapy from USC may apply for Advanced Standing and follow the curriculum outlined under Advanced Core Courses for the Bachelor to Master's Degree Program, reducing total units required for the degree from 80 units to 36 units, which includes 4 units of Clinical Internship with Seminar (or 76 units to 32 units for the thesis option). All students must complete either the Thesis or Comprehensive Exam option.

Comprehensive Examination Option

In addition to the required courses, 4 units of electives and 8 units of occupational therapy electives are required. All electives must be 500 level or above. Successful performance on a written comprehensive examination administered on campus each fall and spring semester completes the degree.

Thesis Option

In addition to the required courses, 4 units of electives at 500 level or above, and 4 units of Master's Thesis OT 594a and OT 594b are required. Acceptance of the thesis by the master's committee and the university completes the degree.

Required Courses

Foundational Core Courses (34 units)

- OT 405 Foundations: Occupation Units: 2
- OT 406L Foundations: Creativity, Craft and Activity Analysis Units: 2
- OT 440L Foundations: Kinesiology Units: 2
- OT 441L Foundations: Neuroscience Units: 2
- OT 501L Practice Immersion: Adult Physical Rehabilitation Units: 8
- OT 502L Practice Immersion: Mental Health Units: 8
- OT 503L Practice Immersion: Pediatrics Units: 8
- OT 511 Therapeutic Use of Self Units: 2

Advanced Core Courses (34 units)

- OT 515 Neuroscience of Behavior Units: 4
- OT 518 Quantitative Research for Evidence-Based Practice Units: 4
- OT 521 Clinical Reasoning Units: 3
- OT 523 Communication Skills for Effective Practice Units: 3
- OT 525 Qualitative Research for Evidence-Based Practice Units: 4
- OT 534 Health Promotion and Wellness Units: 2
- OT 537 Occupation-Centered Programs for the Community Units: 4
- OT 538 Current Issues in Practice: Adulthood and Aging Units: 2
- OT 540 Leadership Capstone Units: 2
- OT 545 Advanced Seminar in Occupational Science Units: 2
- OT 586 Fieldwork with Seminar Units: 1, 2 (4 units required)* *Students are expected to take two 2-unit sections of this course.

Comprehensive Examination Option (12 units)

In addition to the required courses, 12 units of elective are required, 4 units of electives may be taken from outside the Chan division. All electives must be 500 level or above. Successful performance on a written comprehensive examination, administered on campus each fall and spring semester, completes the degree.

Thesis Option (8 units)

In addition to the required courses, 4 units of electives at 500 level or above, and 4 units of Master's Thesis, OT 594a and OT 594b are required. Acceptance of the thesis by the master's committee and the university completes the degree.

Required Courses for Advanced Standing

Advanced Core Courses for Advanced Standing students with a baccalaureate in Occupational Therapy from outside USC (20 units)

- OT 515 Neuroscience of Behavior Units: 4
- OT 518 Quantitative Research for Evidence-Based Practice Units: 4 or
- OT 581 Quantitative Research for the Practicing Clinician Units: 4
- OT 525 Qualitative Research for Evidence-Based Practice Units: 4
- OT 534 Health Promotion and Wellness Units: 2
- OT 538 Current Issues in Practice: Adulthood and Aging Units: 2
- OT 540 Leadership Capstone Units: 2
- OT 545 Advanced Seminar in Occupational Science Units: 2

Comprehensive Examination Option (12 units)

In addition to the required courses, 12 units of elective are required, 4 units of electives may be taken from outside the Chan division. All electives must be 500 level or above. Successful performance on a written comprehensive examination, administered on campus each fall and spring semester, completes the degree.

Thesis Option (8 units)

In addition to the required courses, 4 units of electives at 500 level or above, and 4 units of Master's Thesis, OT 594a and OT 594b are required. Acceptance of the thesis by the master's committee and the university completes the degree.

Advanced Core Courses for students in the USC Bachelor's to Master's Degree Program (22 units)

Complete Practice Immersion Series (8 units):

- OT 501L Practice Immersion: Adult Physical Rehabilitation Units: 8 or
- OT 502L Practice Immersion: Mental Health Units: 8 or
- OT 503L Practice Immersion: Pediatrics Units: 8
- OT 534 Health Promotion and Wellness Units: 2
- OT 537 Occupation-Centered Programs for the Community Units: 4
- OT 538 Current Issues in Practice: Adulthood and Aging Units: 2
- OT 540 Leadership Capstone Units: 2
- OT 545 Advanced Seminar in Occupational Science Units: 2
- OT 586 Fieldwork with Seminar Units: 1, 2 (2 units required)* *Students are expected to take one 2-unit section of this course.

Comprehensive Examination Option (12 units)

In addition to the required courses, 12 units of elective are required, 4 units of electives may be taken from outside the Chan division. All electives must be 500 level or above. Successful performance on a written comprehensive examination, administered on campus each fall and spring semester, completes the degree.

Thesis Option (8 units)

In addition to the required courses, 4 units of electives at 500 level or above, and 4 units of Master's Thesis, OT 594a and OT 594b are required. Acceptance of the thesis by the master's committee and the university completes the degree.

Online MA in Occupational Science and Occupational Therapy

The Online Master of Arts program is open to occupational therapists with a bachelor's degree in occupational therapy from outside USC. All students must complete either the Thesis or Comprehensive Exam Option. This online program requires a total of 32 units for the Comprehensive Exam Option, or a total of 28 units plus OT 594a and OT 594b for the Thesis Option.

Online MA in Occupational Therapy

The Online Master of Arts program is open to occupational therapists with a bachelor's degree in occupational therapy from outside USC. All students must complete either the Thesis or Comprehensive Exam Option. This online program requires a total of 32 units for the Comprehensive Exam Option, or a total of 28 units plus OT 594a and OT 594b for the Thesis Option.

Admission Requirements

Applicants must have a bachelor's degree in occupational therapy from an accredited college or university outside USC; a minimum grade point average of 3.0 (A = 4.0); a minimum score of 153 on the verbal section, 144 on the quantitative section and a 3.5 on the analytical writing section of the Graduate Record Examinations taken within five years of application; three letters of recommendation and an autobiographical statement of purpose. A satisfactory score on the TOEFL or IELTS within two years of enrollment is a requirement for most international students.

Required Core Courses

- OT 515 Neuroscience of Behavior Units: 4
- OT 518 Quantitative Research for Evidence-Based Practice Units: 4
- OT 525 Qualitative Research for Evidence-Based Practice Units: 4
- OT 534 Health Promotion and Wellness Units: 2
- OT 538 Current Issues in Practice: Adulthood and Aging Units: 2
- OT 540 Leadership Capstone Units: 2
- OT 545 Advanced Seminar in Occupational Science Units: 2

Required Elective Courses

- OT 578 Therapeutic Communication: Facilitating Change in Clients Units: 4
- OT 582 Occupational Science Foundations of Lifestyle Redesign Units: 4
- OT 583 Current Applications of Lifestyle Redesign Units: 4

Comprehensive Exam Option (12 units)

In addition to the required core courses, all required elective courses (12 units) must be successfully completed prior to taking the comprehensive exam. Successful performance on a written comprehensive examination administered each fall and spring semester completes the degree.

Thesis Option (8 units)

In addition to the required core courses, students are required to take 4 units of OT 594a and OT 594b Master's Thesis for a total of 28 units.

Graduate Certificate

Lifestyle Redesign® Graduate Certificate (online)

The Graduate Certificate in Lifestyle Redesign® is designed for occupational therapists who wish to obtain an advanced certificate in the area of Lifestyle Redesign®. Certificate courses prepare the occupational therapist to be able to design and implement Lifestyle Redesign® interventions with diverse client populations.

Admission Requirements

Applicants must be working professional occupational therapists with a baccalaureate or higher degree from an accredited college or university; a minimum grade point average of 3.0 (A = 4.0); a minimum score of 153 on the verbal section, 144 on the quantitative section and a 3.5 on the analytical writing section of the Graduate Record Examinations taken within five years of application; three letters of recommendation and an autobiographical statement of purpose. A satisfactory score on the TOEFL or IELTS within two years of enrollment is a requirement for most international students.

Required Courses

- OT 578 Therapeutic Communication: Facilitating Change in Clients Units: 4
- OT 582 Occupational Science Foundations of Lifestyle Redesign Units: 4
- OT 583 Current Applications of Lifestyle Redesign Units: 4

Doctoral Degree

Occupational Science (PhD)

The PhD in Occupational Science educates individuals to engage in the scientific study of human occupation, the purposeful activities that constitute our life experiences.This evolving science is chiefly concerned with the unique capacity of humans to develop and orchestrate occupations and enact adaptive behaviors to enhance engagement and participation in daily life. Occupational scientists examine the function, structure and the interrelationships among a complex array of occupations, as well as their impact on individuals and communities.

The focus on occupation distinguishes this program from closely related disciplines such as psychology, sociology and anthropology. The program emphasizes the development of research skills and encourages students to organize and synthesize knowledge to contribute to occupational science theory and interdisciplinary understandings of occupation, health and social participation.

Admission Requirements

Applicants for admission to the PhD program are expected to have a baccalaureate degree in an appropriate field, such as one of the biological or social sciences or occupational therapy, with a minimum GPA of 3.0 (A = 4.0). Applicants must submit at least three letters of reference (two should be academic, one can be a professional reference), a personal statement, and an updated curriculum vitae (CV). All transcripts, letters of reference, personal statement, and CV are submitted through the USC CAS application portal. The application deadline is December 1st. Other considerations include evidence of academic potential, interest and skills in research and becoming a career scientist, and the ability of the Chan Division and occupational science program to support the applicant's scholarship interests and career goals. International students must demonstrate competency in English, as measured by the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination. A personal interview and a professional writing sample may be requested as part of the post-application admissions review process. Please see the Chan Division Website for information and resources for the application process: *chan.usc.edu*.

Degree Requirements

This degree is awarded under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the USC Graduate School.

Course Requirements

Satisfactory completion of 60 units beyond the baccalaureate degree is required, including the following courses:

Required Courses

Satisfactory completion of 60 units beyond the baccalaureate degree is required. Students with an earned masters and/or doctoral degree at the time of admission may apply for Advanced Standing, reducing the units required for the degree from 60 units to 40 units. All students must complete the required core courses and successfully complete an independent dissertation. Program requirements include the following courses:

- OT 640 Conceptual Foundations of Occupational Science Units: 4
- OT 641 The Nature of Occupation Units: 4
- OT 648 Researching Occupation: Engagement, Meaning, and Society Units: 4
- OT 649 Researching Occupation: Function, Participation, and Health Units: 4
- OT 660 Research Practicum Units: 2 (2 units — Four Semesters)
- OT 661 Grant Writing for Occupational Science Units: 2

Required Core Electives

Completion of a minimum of 26 units in a topic area such as one of the following is required: quantitative research approaches, qualitative research approaches, occupational science and/or therapy, neuroscience, social development, life span development or gerontology.

Additional Requirements

Those students who also wish to participate in clinical practice in occupational therapy may opt to complete a master's degree in occupational therapy. Such students are required to complete the requirements for that degree, as well as the occupational therapy undergraduate major courses if they are not registered occupational therapists or eligible for registration prior to study.

Cognate Courses

Completion of a minimum of 26 units in a topic area approved by the student's faculty mentor is required. Examples of cognate areas include: research methodologies related to dissertation research, neuroscience, health disparities, gerontology and health promotion.

Research Practicum

Each student will enroll in 2 units of OT 660 Research Practicum per semester for four consecutive semesters, for a total of 8 units. Students are required to begin enrolling in OT 660 in their first semester of doctoral study. In this practicum the student will develop research skills by working as part of a research team under the direction of a faculty member.

Screening Procedures

Passing the screening is prerequisite to continuation in the doctoral program. Directions for obtaining and filing the Report on PhD Screening Procedures are found in the The Graduate School section of this catalogue.

Dissertation Enrollment

Doctoral students must submit a dissertation according to the policies and procedures described in The Graduate School section of this catalogue. Registration in OT 794a Doctoral Dissertation, OT 794b Doctoral Dissertation, OT 794c Doctoral Dissertation, OT 794d Doctoral Dissertation, OT 794z Doctoral Dissertation for a minimum of 4 units (2 units in each of two consecutive semesters) is required.

Summary of All Course Requirements

Required core courses are OT 640, OT 641, OT 648, OT 649, OT 660, OT 661 for a total of 26 units.

Required cognate courses for a minimum total of 26 units.

Dissertation requires 2 units per semester for at least two semesters for a minimum total of 4 units.

Additional 4 units can include 4 further units of dissertation, OT 660 or cognate courses.

Total: 60 units

Foreign Language or Research Skills

The PhD in Occupational Science does not require the demonstration of competence in a foreign language. However, each student is expected to achieve expertise, as defined by the student's qualifying exam committee, in research methods through participation in course work and the research practicum.

Qualifying Exam Committee

The qualifying exam committee is composed of five faculty members. Three members of the committee must be regular faculty from the USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy. One member must be from outside the division. Complete regulations for establishing a qualifying exam committee are found in The Graduate School section of this catalogue.

Qualifying Examination

The qualifying examination is comprehensive in nature and requires the student to demonstrate a grasp of content from the core courses and the cognate area. The examination is both written and oral and is set and administered by the student's qualifying exam committee. Refer to The Graduate School section of the catalogue for additional information about the qualifying exam.

Dissertation Committee

The dissertation committee is composed of at least three faculty members. The chair of the committee and at least one additional member of the committee must be regular faculty from the USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy. One member must be from outside the division. Complete regulations for establishing a dissertation committee are found in The Graduate School section of this catalogue.

Dissertation

Doctoral students must submit a dissertation based on students' original research according to the policies and procedures of The Graduate School section of this catalogue. Upon approval of the preliminary copy of the dissertation by all members of the dissertation committee, the candidate must pass an oral defense of the dissertation. Upon successful completion of the oral defense and revisions, the manuscript is approved and the committee recommends the candidate to the Graduate School for the PhD.

Teaching

To prepare students for anticipated roles as faculty members, a teaching component is incorporated into the program. Students work with their faculty adviser for their research immersion (OT 660) experience to identify an appropriate course or courses, arrange mentoring experience, and ensure that the timing of the teaching experience complements research lab participation and dissertation plans. If students are not assigned a full course, they are required to present a minimum of four lectures or seminars.

Additional Information

Further information about the baccalaureate, master's and doctoral programs can be obtained by writing or calling the USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy, 1540 Alcazar Street (CHP 133), Los Angeles, CA 90089-9003; (323) 442-2850, toll free (866) 385-4250, or by sending email to info@chan.usc.edu. Information regarding the USC Chan Division of Occupational Science and Occupational Therapy is available at *chan.usc.edu*.

Required Courses (Students with Advanced Standing)

Students with an earned masters and/or doctoral degree at the time of admission may apply for Advanced Standing, reducing the units required for the degree from 60 units to 40 units. All students must complete the required core courses and successfully complete an independent dissertation. Program requirements include the following courses:

- OT 640 Conceptual Foundations of Occupational Science Units: 4
- OT 641 The Nature of Occupation Units: 4
- OT 648 Researching Occupation: Engagement, Meaning, and Society Units: 4
- OT 649 Researching Occupation: Function, Participation, and Health Units: 4
- OT 660 Research Practicum Units: 2 (2 Units - Four Semesters)
- OT 661 Grant Writing for Occupational Science Units: 2

Cognate Courses (Students with Advanced Standing)

Completion of a minimum of 10 units in a topic area such as one of the following is required: quantitative research approaches, qualitative research approaches, occupational science and/or therapy, neuroscience, social development, life span development or gerontology.

Research Practicum (Students with Advanced Standing)

Each student will enroll in 2 units of OT 660 per semester for four consecutive semesters, for a total of 8 units. Students are required to begin enrolling in OT 660 in their first semester of doctoral study. In this practicum the student will develop research skills by working as part of a research team under the direction of a faculty member.

Summary of all Course Requirements (Students with Advanced Standing)

Required core courses are OT 640, OT 641, OT 648, OT 649, OT 660, OT 661 for a total of 26 units.

Required cognate courses for a minimum total of 10 units.

Dissertation requires 2 units per semester for at least two semesters for a minimum total of 4 units.

Total: 40 units for students with advanced standing

Occupational Therapy (OTD)

The Doctor of Occupational Therapy (OTD) is a post-professional degree program that provides graduates with advanced knowledge and skills in one of four leadership concentrations: 1) advanced clinical practice; 2) policy and administrative leadership; 3) educational leadership; and (4) research expertise. OTD students graduate from the program with a strong foundation in occupational science as well as in-depth mentored residency experience. The OTD prepares graduates to secure positions as expert clinicians in specialty or emerging practice areas, as administrative leaders within health care organizations, as non-tenure track faculty in institutions of higher education, and as contributors to clinical research teams.

Admission Requirements

Applicants for admission to the OTD program are expected to have at least a baccalaureate degree from an accredited college or university and must be certified or licensed as an occupational therapist or be eligible to sit for the National Board for Certification in Occupational Therapy® (NBCOT) examination at time of matriculation. Domestic students not certified upon matriculation must pass the NBCOT examination by the end of the first semester of the program to maintain enrollment. At the discretion of the OTD Program Director, some international students may not be required to obtain NBCOT certification. A minimum GPA of 3.0 (A = 4.0) and completion of the Graduate Record Examination (GRE) within five years of application are required. Applicants must have earned a minimum cumulative 3.0 GPA in the 400- and 500-level required courses. At least three letters of reference, an autobiographical statement of purpose and a current resume are required. Applicants' leadership potential, previous academic record, clinical experiences and professional accomplishments will also be considered.

International Students

Students educated outside the United States must have graduated from a program approved by the World Federation of Occupational Therapists (WFOT). USC maintains additional admissions requirements for international students (see the Admission section of this catalogue), including English language competence as measured by the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination.

Application Procedures

Applications are accepted on a continuous basis. For consideration for fall semester admission, applications must be received by October 1 for maximum funding consideration. Applications received after October 1 will be considered on a space-available basis. Application requirements include: 1) USC Online Graduate Application; 2) USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy online supplemental application for graduate admission; 3) three letters of reference; 4) autobiographical statement of purpose; 5) transcripts from all colleges/universities attended; and 6) GRE General Test scores.

Degree Requirements

Satisfactory completion of 60 units beyond the baccalaureate degree is required. Students with a Master's degree in Occupational Therapy may apply for Advanced Standing, which requires 36 units beyond the first graduate degree. These students do not take the 24 units of foundational courses listed below. If admitted without advanced standing, a student may receive partial credit for course work taken for a previous graduate degree.

The degree is awarded under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue, for general regulations. All courses applied toward the degree must be accepted by the USC Graduate School.

Course Requirements (60 Units)

Required Occupational Therapy Foundational Courses (20 Units Required)

- OT 515 Neuroscience of Behavior Units: 4
- OT 518 Quantitative Research for Evidence-Based Practice Units: 4 or
- OT 581 Quantitative Research for the Practicing Clinician Units: 4
- OT 525 Qualitative Research for Evidence-Based Practice Units: 4
- OT 534 Health Promotion and Wellness Units: 2
- OT 538 Current Issues in Practice: Adulthood and Aging Units: 2
- OT 540 Leadership Capstone Units: 2
- OT 545 Advanced Seminar in Occupational Science Units: 2

Electives (8 Units Required)

500-level course within the division Units: 4
500-level course within or outside the division Units: 4

Required Occupational Science Advanced Courses (8 Units Required)

- OT 620 Current Issues in Occupational Science and Occupational Therapy Units: 4
- OT 621 Occupational Therapy Leadership: Contemporary Issues Units: 4

Residency (24 Units Required)

- OT 686 Residency Units: 6 or 12

Additional Requirements

Elective Courses (4 units required)

Students will complete a minimum of 4 course units at the 500-level or higher selected from courses within or outside the USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy.

Residency Requirement (24 units required)

Students will complete 24 units of OT 686 residency. The residency ensures that graduates of the OTD program demonstrate competence in one of the following leadership concentrations: 1) advanced clinical practice; 2) clinical research; 3) policy and administration; and 4) pedagogy.

At least 20 units applied toward the OTD must be successfully completed before enrolling in OT 686 unless advanced standing has been granted. Students may complete their residency over three consecutive semesters (6 units, 6 units and 12 units) or over four consecutive semesters. It is highly recommended that one semester of OT 686 be enrolled full-time (12 units without any other simultaneous course enrollment). Full-time residency ensures the opportunity for full immersion in residency. Faculty must approve each student's residency plan prior to enrollment. OTD residency provides students the opportunity for mentorship by experts in their OTD leadership concentration (e.g., a master clinician, a world-class occupational science researcher, a leader in professional policy or administration, or a faculty member with at least three years of academic experience).

Portfolio Requirement

In the final semester of enrollment, each student will submit a portfolio demonstrating knowledge of and expertise in their selected leadership concentration. The final portfolio will include an evidence-based deliverable and highlighted accomplishments from their residency experience as designated in their academic and residency plans.

Clinical Experience Criterion

If the student has less than three years of clinical experience as a registered and/or licensed occupational therapist at time of

admission, he or she may be required to complete at least 8 units of clinical occupational therapy courses, which may include:

- OT 500a Clinical Problems in Occupational Therapy Units: 2, 3, 4
- OT 500b Clinical Problems in Occupational Therapy Units: 2, 3, 4
- OT 500c Clinical Problems in Occupational Therapy Units: 2, 3, 4
- OT 560 Contemporary Issues in School-Based Practice Units: 4
- OT 564 Sensory Processing and Sensory Integration Units: 4
- OT 572 Ergonomics Units: 4
- OT 574 Enhancing Motor Control for Occupation Units: 4
- OT 583 Current Applications of Lifestyle Redesign Units: 4
- OT 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- OT 610 Sensory Integrative Dysfunction Units: 4

Course Requirements – Advanced Standing (36 units)

Required Occupational Science Advanced Courses (8 Units Required)

- OT 620 Current Issues in Occupational Science and Occupational Therapy Units: 4
- OT 621 Occupational Therapy Leadership: Contemporary Issues Units: 4

Electives (4 Units Required)

500-level course within or outside the division Units: 4

Residency (24 Units Required)

- OT 686 Residency Units: 6 or 12

USC Gould School of Law

The USC Gould School of Law provides a forward-looking, interdisciplinary legal education, guided by nationally renowned professors and practitioners and energized by an engaged and collegial student body. As one of the most diverse among the nation's top law schools, USC Gould is made up of students from across the country and around the world whose ideas and experiences enrich the learning process and provide new perspectives on the law. Through collaborative and rigorous training, hands-on experiential offerings, and exceptional career services support, Gould students acquire the skills and knowledge necessary to succeed locally, nationally and globally.

USC Gould alumni are partners in the world's largest law firms, chairs and top executives of industry-leading companies, and esteemed leaders in government and public service organizations. Since its founding in 1900, the school has produced scores of judges and elected officials at the city, state and federal levels.

Clinical Emeritus Professors: Lee W. Campbell, JD; Noel M. Ragsdale, JD*
Emeritus Professor of Lawyering Skills: Robert M. Saltzman, JD
Emeritus Law Librarians: Pauline M. Aranas, JD, MLIS (*John Stauffer Charitable Trust Chief Information Officer, Emeritus and Law Librarian Emerita*); Leonette Williams, MSLS (*Emerita Law Librarian*)
**Recipient of university-wide or school teaching award.*

USC Gould School of Law School is accredited by the American Bar Association. For information on ABA accreditation, please contact:
The American Bar Association
321 North Clark Street
Chicago, IL 60654
(312) 988-5000

Juris Doctor

The Juris Doctor (JD) is the standard law degree. To obtain the degree, full-time attendance for six semesters is required. During the first year, the student takes a curriculum of basic courses that examine fundamental legal institutions and address legal problems relevant to today's society and the modern practice of law. During the second and third years, the student must complete *Constitutional Law: Rights*, a writing requirement, and at least 6 units in experiential courses. The remainder of the courses taken in years two and three are elective.

JD students have an opportunity to learn about foreign legal systems and to experience different cultures through study abroad programs. Qualified second- and third-year JD candidates are exposed to international law as they take part in exchange programs with leading partner institutions worldwide. For more information, please check out the Gould School of Law website.

All applicants are required to take the Law School Admission Test (LSAT) administered by the Law School Admissions Council (LSAC) or the Graduate Records Examinations (GRE) administered by Educational Testing Service (ETS). Based on current test administration calendars, applicants who take the LSAT must take the test no later than January of the year in which they seek to start law school. Applicants who take the GRE must take the test no later than mid-January (the specific date is available in the application instructions) of the year in which they plan to start law school. All students begin their first-year classes in August.

USC Gould admits a small number of highly qualified transfer students with LLM degrees from USC Gould. These students will have taken a large number of law courses in their LLM course of study and received strong grades in those courses. The LSAT is not required.

Juris Doctor-Dual Degrees

USC Gould School of Law maintains several dual degree programs with the graduate schools on campus. These programs enable qualified students to earn a law degree (JD) and a graduate degree for a slightly reduced number of total units. If the graduate degree normally requires one year of study, a student in a dual degree program may earn both degrees in only three years. If the graduate degree normally requires two years of post-baccalaureate courses, a total of four years may be required. To earn the JD, all students (including dual degree students) must complete 37 numerically graded law units at USC beyond the first year curriculum and at least 76 law hours.

While students may be accepted for a dual degree program when they are accepted to the law school, most students do not apply until near the end of the first year. All programs require that students successfully complete the required first year of law school before beginning work toward the degree. Credit toward the law degree may not be given for graduate work completed prior to the completion of the first year of law school, although some credit toward the degree may be allowed by the faculty of the cooperating department of approved work completed prior to the first year of law school. Students are not eligible for either of their dual degrees until they complete the requirements for both degrees.

In all cases, prospective students must seek and gain acceptance to both the law school and the other graduate program, and have the dual degree program approved by both schools. Decisions regarding admission to the law school and the graduate program are made independently. For more information, contact the Law School Admissions Office at admissions@law.usc.edu.

Juris Doctor/Master of Business Administration

In addition to the LSAT, applicants to this dual degree program are required to take the Graduate Management Aptitude Test. Requirements are detailed at Juris Doctor/Master of Business Administration (JD/MBA) and in the USC Marshall School of Business section of this catalogue.

Juris Doctor/Master of Business Taxation

The Leventhal School of Accounting offers a specialized program in taxation leading to the Master in Business Taxation (MBT). Requirements are detailed at Juris Doctor/Master of Business Taxation (JD/MBT) and in the USC Leventhal School of Accounting section of this catalogue.

Juris Doctor/Master of Public Administration

Students are required to complete 97 units of course work. Candidates for the dual degree must fulfill the statistics requirement of the Public Administration (MPA) degree. See the Master of Public Administration section. Requirements are detailed at Juris Doctor/Master of Public Administration (JD/MPA) and in the USC Price School of Public Policy section of this catalogue.

Juris Doctor/Master of Public Policy

The USC Price School of Public Policy and the USC Gould School of Law offer a dual degree that enables qualified students to earn both a Juris Doctor and a Master of Public Policy in approximately four years of study.

Dual degree allows students to acquire a blend of the analytic skills of public policy and an understanding of legal institutions and processes. This combination of knowledge is well suited for law students who want to affect the policy-making process and craft legislation to aid in achievement of public policy goals. It is equally appropriate for prospective policy analysts who are interested in law and public policy.

Dual degree students spend the first year of the program completing the required first year of law school. The remaining units of law school courses and the required 36 units of core MPP courses are taken by students in the second through fourth years.

Students are required to complete 114 units of course work, including 78 units in the USC Gould School of Law and 36 units in the USC Price School of Public Policy. The MPP program has a statistics prerequisite. See Public Policy (MPP). Requirements are detailed at Juris Doctor/Master of Public Policy (JD/MPP) and in the USC Price School of Public Policy section.

Master's Degree Programs

Master of Laws in Alternative Dispute Resolution (LLM in ADR)

The on-campus Master of Laws in Alternative Dispute Resolution (LLM in ADR) program is a two- to four-semester, full-time and part-time master's degree program for law graduates and attorneys interested in building strength as advocates in ADR processes or gaining skills and a prestigious credential for pursuing career opportunities as mediators or arbitrators.

Students submitting an application must have earned a basic law degree, a Bachelor of Laws (LLB), a Juris Doctor (JD) or the foreign equivalent. Please visit the Gould School of Law website for more information.

Master of Laws in International Business and Economic Law (LLM in IBEL)

The on-campus Master of Laws in International Business and Economic Law degree is a two- to four-semester, full-time and part-time master's degree program for law graduates and attorneys interested in developing a global perspective and interdisciplinary skills that will enable them to understand and integrate relevant laws, policies and business best practices that shape international commerce and trade.

Students submitting an application must have earned a basic law degree, a Bachelor of Laws (LLB), a Juris Doctor (JD) or the foreign equivalent. Please visit the Gould School of Law website for more information.

Master of Laws in International Trade Law and Economics (MITLE)

The on-campus Master of International Trade Law and Economics (MITLE) degree is offered by USC Gould School of Law jointly with USC Dornsife College of Letters, Arts and Sciences Department of Economics. This degree provides students with an interdisciplinary, global perspective and the knowledge and skills relevant to the laws, policies, and business practices that shape international trade and economics.

The Master of International Trade Law and Economics is a one-year, 32-unit degree program offered on campus on a full-time basis, and enrollment is limited to the fall semester. This degree is open to anyone with a bachelor's degree in any field, however, students are recommended to have a strong foundation in economics and/or mathematics or another quantitative background. Please visit the Gould School of Law website for more information.

Master of Laws in Privacy Law and Cybersecurity (LLM in PLCS)

The on-campus Master of Laws in Privacy Law and Cybersecurity degree is a two- to four-semester, full-time and part-time master's degree program for law graduates and attorneys who wish to develop skills that will enable them to understand and integrate relevant laws, policies and best practices that shape privacy law and cybersecurity.

Students submitting an application must have earned a basic law degree, a Bachelor of Laws (LLB) degree or the foreign equivalent. Please visit the Gould School of Law website for more information.

Master of Laws (LLM) (On-campus and Online)

The on-campus Master of Laws (LLM) program is a master's degree program for foreign graduate students trained in law. This two- to four-semester, full-time and part-time program introduces foreign lawyers to American law and the U.S. legal system and prepares them for leadership roles in the global market. Students may enroll in an optional certificate track in Alternate Dispute Resolution, Business Law, Compliance, Media and Entertainment Law, Transnational Law and Business, or Technology and Entrepreneurship Law.

The online Master of Laws (LLM) program is a master's degree program for foreign graduate students trained in law. This program is offered on a part-time or full-time basis in a completely online modality and introduces foreign lawyers to American law and the U.S. legal system and prepares them for leadership roles in the global market. Students may enroll in an optional certificate track in Business Law, Compliance, Entertainment Law and Industry, Financial Compliance, Health Care Compliance, Human Resources Compliance, or Privacy Law and Cybersecurity.

Students submitting an application to either LLM program must have earned a basic law degree, a Bachelor of Laws (LLB) degree or the foreign equivalent. Please visit the Gould School of Law website for more information.

Two-Year Extended Master of Laws (LLM)

The on-campus Two-Year Extended Master of Laws (LLM) program combines a one-year certificate program with a one-year master's degree for foreign graduate students trained in law. During the first year, students complete mandatory law and English courses to prepare them for the master's program and further their English fluency. After successful completion of the first year, students earn a Certificate in U.S. Legal Studies. In the second year, students matriculate into our on-campus Master of Laws program.

Students submitting an application must have earned a basic law degree, a Bachelor of Laws (LLB) degree or the foreign equivalent. Please visit the Gould School of Law website for more information.

Master of Comparative Law (MCL)

The on-campus Master of Comparative Law (MCL) program is a master's degree program for foreign graduate students trained in law who have already earned an LLM degree. This two-semester, full-time program is focused on the study of comparative law.

Students submitting an application must have earned a basic law degree, a Bachelor of Laws (LLB) degree or the foreign equivalent and have previously earned an LLM degree. Please visit the Gould School of Law website for more information.

Master of Dispute Resolution (MDR)

The on-campus Master of Dispute Resolution (MDR) program is a two- to four-semester, full-time and part-time master's degree program for graduates from varying fields of study, who are interested in building strength as advocates in alternative dispute resolution processes.

Students submitting an application must have earned an undergraduate degree by the time they begin the MDR program. Please visit the Gould School of Law website for more information.

Master of Studies in Law (MSL) (On-campus and Online)

The on-campus Master of Studies in Law (MSL) is a two- to four-semester, full-time and part-time master's degree program designed for new graduates as well as seasoned professionals from varying fields of studies and careers, who seek an understanding of how the U.S. legal system functions. Students may enroll in an optional certificate track in Business Law or Compliance.

The online Master of Studies in Law (MSL) is designed for new graduates as well as seasoned professionals from varying fields of studies and careers. This program is offered on a part-time or full-time basis in a completely online modality for students who seek an understanding of how the U.S. legal system functions. Students may enroll in an optional certificate track in in Business Law, Compliance, Entertainment Law and Industry, Financial Compliance, Health Care Compliance, Human Resources Compliance, or Privacy Law and Cybersecurity.

Students submitting an application must have earned an undergraduate degree by the time they begin the MSL degree. Please visit the Gould School of Law website for more information.

A progressive degree is an option for current USC undergraduate students. For more information, please visit the Gould School of Law website. You may also contact USC Gould Undergraduate for more details.)

Certificates

USC Gould offers stand-alone certificates to allow students with a bachelor's degree to gain further knowledge of a particular area of law.

- Alternative Dispute Resolution Certificate (On-campus)
- Business Law Certificate (Online)
- Compliance Certificate (Online)
- Entertainment Law and Industry Certificate (Online)
- Financial Compliance Certificate (Online)
- Health Care Compliance Certificate (Online)
- Human Resources Law and Compliance Certificate (Online)
- Privacy Law and Cybersecurity Certificate (Online)

JD students may apply their course work to the following certificates: Alternate Dispute Resolution, Business Law, Media and Entertainment Law, and Public Interest Law. Certificate requirements differ for JD students and are detailed at the USC Gould School of Law website.

Registration

Registration for JD students is handled by the USC Gould School of Law Academic Services Office. First-year students will automatically be registered in their fall semester courses approximately two to three weeks prior to the beginning of the school year and for their spring semester courses during the week listed in the law school calendar for upper-division student registration.

Registration for master's students is handled by the Graduate and International Programs Office. Master's students will receive registration information in July with detailed instructions on how to register for fall and spring classes.

Grading and Attendance Policies

Grading

The grading system uses both numbers and letters in a range from 1.9 to 4.4 with letter-grade equivalents ranging from F to A+. The grade equivalents are: A+ (4.1–4.4); A (3.8–4.0); A- (3.5–3.7); B+ (3.3–3.4); B (3.0–3.2); B- (2.7–2.9); C+ (2.5–2.6); C (2.4); C- (2.1–2.3); D (2.0); and F (1.9). Students receiving a grade of 1.9 will not be given credit for the course toward graduation. A student who fails a first-year course must repeat the course, but both grades will be included in computing that student's general average. Other courses may not be repeated except on petition to the associate dean. A student with a weighted cumulative average of less than 3.0 at the end of the year will be placed on restricted enrollment. A Juris Doctor student with a weighted cumulative average of less than 2.9 at the end of any year will not be permitted to continue. An overall grade point average of at least 2.6 is required for graduation for students who are enrolled in the LLM, LLM in ADR, LLM in IBEL, LLM in PLCS, MCL, MDR, MITLE, MSL, or Alternative Dispute Resolution Certificate (on-campus), Business Law Certificate (online), Compliance Certificate (online), and Entertainment Law and Industry Certificate (online), Financial Compliance Certificate (online), Health Care Compliance Certificate (online), Human Resources Law and Compliance Certificate (online) and Privacy Law and Cybersecurity Certificate (online) programs.

Credit/D/F

After the first year, a Juris Doctor student may take up to 8 units on an elected CR/D/F basis, chosen from among courses otherwise graded in a normal manner. No more than 4 such units may be taken in a semester. Master's students may take up to 5 units of CR/D/F grading during the length of their program. The student must elect to take a course CR/D/F during the first two weeks of the semester. Courses or seminars may, at the instructor's option, be designated prior to registration as not available for CR/D/F grading. To earn the JD, all students (including dual degree students) must complete 37 numerically graded law units at USC beyond the first-year curriculum and complete at least 76 law hours.

Students may also take such courses regularly offered only on a CR/D/F basis, in addition to courses taken under this rule.

Withdrawals from Courses

A student may not withdraw from a course later than two weeks after the first day of classes of any semester without permission of both the associate dean and the instructor.

Attendance

Class attendance is an important part of law school education. It assists both the individual and fellow students in making the most of the educational opportunity offered. Students should, therefore, attend class regularly and participate in the discussion. Professors may require attendance and may take attendance into account in evaluating student performance.

For tuition and fee information, please visit the Gould School of Law website.

Standard Unit Rule

The Standard Unit Rule (also called "credit hour") is an amount of work that reasonably approximates:

(1) not less than one hour of classroom or direct faculty instruction and two hours of out-of-class student work per week for 15 weeks, or the equivalent amount of work over a different amount of time; or

(2) at least an equivalent amount of work as required in subparagraph (1) of this definition for other academic activities as established by the institution, including simulation, field placement, clinical, co-curricular, and other academic work leading to the award of credit hours. (ABA Standard 310)

Depending on the course type, the law school awards credit for varying periods of time. In all cases, however, the course work entails no less than the minimum total amount of in-class and out-of-class time required by the ABA (per Interpretation 310-1):

50 minutes of in-class time and two 60-minute periods of out-of-class time for 15 weeks for each unit of credit (a 15-week may period may include one week for a final examination).

In exceptional cases, at the discretion of the Vice Dean for Faculty and Academic Affairs (upon the request of the faculty member), a specific course may carry 1 unit of credit greater than the time the course meets each week. Those cases are limited to courses in which the instructor certifies to the Vice Dean that the course requires substantial written work. If the written work is optional, students may enroll in these types of courses for different unit values. Students performing the written work will receive additional credit.

Full policies and procedures for USC Gould School of Law students are published in the Student Handbook and are available on the Law Portal.

Undergraduate Courses and Programs

USC Gould School of Law, one of the nation's premier law schools, offers undergraduate courses and programs in its curriculum, which are taught by its internationally distinguished faculty and lecturers. The mission is to provide a broad-based academic foundation in law to undergraduate students who have an interest in law and legal-related fields. Law affects everyone in our society and students will deepen their education by exploring the role law plays in the world, its impact on society, and the way in which it intersects and impacts almost every facet of life.

USC Gould courses meet a variety of graduation requirements. Some courses satisfy USC General Education (GE) requirements, and others are either required or are electives in several USC majors and minors. For more information about the minor in Legal Studies, undergraduate course offerings, and those that satisfy USC General Education requirements, please vist the USC Gould School of Law website or email: undergraduate@law.usc.edu.

Undergraduate Courses

LAW 101w, LAW 200w, LAW 201, LAW 202, LAW 205, LAW 210p, LAW 212, LAW 220, LAW 225, LAW 250w, LAW 275p, LAW 300, LAW 310w, LAW 320p, LAW 324, LAW 352, LAW 402, LAW 403, LAW 404, LAW 406, LAW 444, LAW 493 and LAW 498.

Minor Programs

Legal Studies Minor

The Legal Studies Minor enables students to deepen their understanding of the U.S. legal system and provides them with the fundamentals of law. The Legal Studies Minor totals 22 units, consisting of 6 required units, and 16 elective units.

Law and Social Justice Minor

The Law and Social Justice Minor provides foundational knowledge of current legal systems of justice and encourages critical-analysis skills to recognize where and how change can be made. The Law and Social Justice Minor totals 18 units; 12 required units, and 6 elective units.

Law and Migration Studies Minor

The Law and Migration Studies Minor introduces students to the U.S. legal system as it relates to various aspects of immigration law, its impact on our communities, and consequences on our society nationally and globally. The Law and Migration Studies Minor totals 20 units; 12 required units, and 8 elective units.

For more details on the minors, please visit USC Gould School of Law website. Undergraduate students wishing to declare one of the Law minors, should email: undergraduate@law.usc.edu or submit an application form.

Undergraduate Majors, that include LAW courses:

Law, History, and Culture (BA)
Philosophy, Politics and Law (BA)
Public Policy (BS)

Undergraduate Minors, that include LAW courses:

Business Law Minor
Forensics and Criminality Minor
Justice, Voice, and Advocacy Minor
Health Policy Minor
Law and Public Policy Minor
Law and Society Minor
Philosophy of Law, Politics and Economics Minor
Psychology and Law Minor
Resistance to Genocide Interdisciplinary Minor

Progressive Degree Programs

USC's Progressive Degree program enables USC undergraduate students to begin work on a USC master's degree while completing the requirements for their USC bachelor's degree. Students complete their undergraduate degree and the Master of Studies in Law (MSL) or the Master of International Trade Law and Economics (MITLE) degree programs in no more than five years.

Undergraduate students may submit an application to the Master of Studies in Law (MSL) or the Master of International Trade Law and Economics (MITLE) degree programs as a junior for enrollment beginning in the fall or spring. Students must have completed at least 64 total units of undergraduate course work, excluding AP, IB or transfer units earned prior to graduation from high school. Students may apply in their junior (recommended) or senior year but no later than the semester prior to beginning graduate course work.

Students must have a minimum cumulative undergraduate GPA of 3.0 both at the time an application is submitted and at enrollment.

For more information, please vist the USC Gould School of Law website or email: undergraduate@law.usc.edu.

Progressive Degree Program - Master of Studies in Law (MSL)

Master of Studies in Law (MSL) teaches students fundamental U.S. law as well as various areas of legal specialization. This program is designed for individuals who want to gain an understanding of legal and compliance issues that will impact their future careers as entrepreneurs, business owners, administrators, scientists, engineers, educators, advocates, activists and more. USC Gould Progressive Degree Program Masters Studies in Law offers the option of earning a certificate in business law or compliance concurrent with the MSL.

Progressive Degree Program - Master of International Trade Law and Economics (MITLE)

The Master of International Trade Law and Economics degree provides an interdisciplinary, global perspective for students with an economic or other quantitative background who wish to develop knowledge and skills related to relevant laws, policies and business practices that shape international trade and economics.

Master of International Trade Law and Economics students are required to complete 32 units of study. Students are required to enroll in 12 core units from Dornsife College of Letters, Arts and Sciences and 12 core units from Gould School of Law, with an additional 8 units of electives chosen from a list of approved course offerings.

Accelerated BA/JD Program (3+3)

Undergraduate students at USC, who have completed their required bachelor's major course work by the end of their junior year (or have minimal units of upper-division elective courses remaining), may apply to our accelerated JD program. Students will complete their undergraduate and law school studies in a total of six years.

Students must have a minimum cumulative undergraduate GPA of 3.80 both at the time an application is submitted and at enrollment. Under current ABA guidelines, the LSAT is not required; however, this is subject to change. The program is open to all participating majors. Please visit the Gould School of Law website for more information.

Minor

Law and Migration Studies Minor

The Law and Migration Studies Minor introduces students to the U.S. legal system as it relates to various aspects of immigration law, its impact on our communities and consequences on our society nationally and globally.

The Law and Migration Studies Minor totals 20 units; 12 required units and 8 elective units, as detailed below.

Required Courses (12 units)

Students must enroll in this course:

- LAW 212 Immigration Law for a New America Units: 4

Students must also enroll in 8 units from the following courses:

- LAW 101w Law and the U.S. Constitution in Global History Units: 4
- LAW 200w Law and Society Units: 4
- LAW 300 Concepts in American Law Units: 4
- LAW 310w Global Justice for Mass Atrocities and Genocide Units: 4
- LAW 352 Introduction to Law and Economics Units: 4

Elective Courses (8 units)

Students must enroll in 8 units of elective courses and must choose from the following to satisfy the minor requirements:

- AMST 101gmw Race and Class in Los Angeles Units: 4
- AMST 140gw Borderlands in a Global Context Units: 4
- AMST 320 Social Construction of Race and Citizenship Units: 4
- COLT 303 Globalization: Culture, Change, Resistance Units: 4
- HIST 100gm The American Experience Units: 4
- POSC 260 Global Ethnic Politics Units: 4
- PPD 240g Citizenship and Public Ethics Units: 4
- PPD 485m U.S. Immigration Policy Units: 4
- SOCI 155gm Immigrant America Units: 4
- SOCI 355m Immigrants in the United States Units: 4 *
- SOCI 460 Key Issues in Contemporary International Migration Units: 4 *

  * Sociology courses taken as part of this minor will have prerequisites waived by the Sociology Department.

Law and Social Justice Minor

The Law and Social Justice Minor provides foundational knowledge of current legal systems of justice and encourages critical-analysis skills to recognize where and how changes can be made.

The Law and Social Justice Minor totals 18 units; 12 required units and 6 elective units, as detailed below.

Law and Social Justice Minor (18 units)

Required Core Courses (8 units)

Students must enroll in 8 units from the following courses:

- LAW 101w Law and the U.S. Constitution in Global History Units: 4
- LAW 210p Fundamentals of the U.S. Legal System Units: 4
- LAW 300 Concepts in American Law Units: 4

Law Electives (4 units)

Students must enroll in 4 units of law elective courses:

- LAW 200w Law and Society Units: 4
- LAW 202 Wrongful Convictions Units: 4
- LAW 250w Children and the Law Units: 4
- LAW 275p The Origin and Evolution of American Civil Rights Law Units: 4
- LAW 310w Global Justice for Mass Atrocities and Genocide Units: 4
- LAW 320p Law, Slavery, and Race Units: 4
- LAW 403 Mental Health Law Units: 4
- LAW 404 Law and Psychology: Examining the Criminal Justice Process Units: 4

- LAW 406 Individual Rights in U.S. Constitutional Law Units: 4
- LAW 498 Law Internship Units: 2, 4

Social Justice Electives (6 units)

Students must enroll in 6 units of social justice elective courses:

- COMM 366 Designing Media for Social Change Units: 4
- COMM 367 Community Engagement and Service Learning Units: 2
- COMM 412 Communication and Social Movements Units: 4
- MDA 300 The Dornsife Toolkit Units: 2
- PHIL 174gw Freedom, Equality, and Social Justice Units: 4
- POSC 248gw Human Rights Units: 4
- POSC 441m Cultural Diversity and the Law Units: 4
- POSC 444 Civil and Political Rights and Liberties Units: 4
- SOCI 150gm Social Problems Units: 4 *
- SOCI 250gmw Grassroots Participation in Global Perspective Units: 4 *
- SOCI 425 Social Movements: Power, Resistance and Political Dynamics Units: 4 *
- SOWK 324 Juvenile Justice in America Units: 4
- SOWK 424 Community Experience in Juvenile Justice Environments Units: 4
- SWMS 349 Women and the Law Units: 4

  * Sociology courses taken as part of this minor will have prerequisites waived by the Sociology Department.

Legal Studies Minor

The minor in Legal Studies enables students to deepen their understanding of the U.S. legal system and provides them with the fundamentals of law. It combines courses in law, economics, history, philosophy, political science and public policy taught at the Gould School of Law, Dornsife College of Letters, Arts and Sciences, and the Sol Price School of Public Policy.

The minor in Legal Studies totals 22 units, consisting of 6 required units, and 16 elective units, as detailed below.

Required Courses

- LAW 210p Fundamentals of the U.S. Legal System Units: 4
- LAW 220 The Legal Profession Units: 2 or
- LAW 225 Current Court Cases Units: 2

Elective Courses

Choose from the following courses to satisfy the remaining 16-unit requirements for the minor.

- ECON 434 Economic Analysis of Law Units: 4
- HIST 386 American Legal History Units: 4
- LAW 101w Law and the U.S. Constitution in Global History Units: 4
- LAW 200w Law and Society Units: 4
- LAW 201 Law and Politics Units: 4
- LAW 202 Wrongful Convictions Units: 4
- LAW 205 Introduction to Criminal Law Units: 4
- LAW 250w Children and the Law Units: 4
- LAW 275p The Origin and Evolution of American Civil Rights Law Units: 4
- LAW 300 Concepts in American Law Units: 4
- LAW 310w Global Justice for Mass Atrocities and Genocide Units: 4
- LAW 320p Law, Slavery, and Race Units: 4
- LAW 350 Law and Entrepreneurship Units: 4
- LAW 352 Introduction to Law and Economics Units: 4
- LAW 402 Psychology and Law Units: 4
- LAW 403 Mental Health Law Units: 4
- LAW 404 Law and Psychology: Examining the Criminal Justice Process Units: 4
- LAW 406 Individual Rights in U.S. Constitutional Law Units: 4
- PHIL 430 Philosophy of Law Units: 4
- PHIL 431 Law, Society, and Politics Units: 4
- POSC 345 International Law Units: 4
- PPD 314 Public Policy and Law Units: 4

Finance, Business and Economics Option

A maximum of 4 units from the following FBE courses may be applied toward the minor in Legal Studies.

- FBE 403 Introduction to the Legal Environment of Business Units: 4
- FBE 427 Real Estate Law Units: 4
- FBE 428 Introduction to Employment Law Units: 4
- FBE 429 International Business Law Units: 4
- FBE 458 Law of Forming, Financing and Managing Businesses Units: 4

Master's Degree

Alternative Dispute Resolution (LLM)

The Master of Laws (LLM) in Alternative Dispute Resolution (ADR) degree, is designed to prepare high caliber U.S. and foreign law graduates who are interested in the specialized and advanced knowledge in ADR. The program resides within the new Judge Judith O. Hollinger Alternative Dispute Resolution Program. The Hollinger ADR Program's mission is to design, develop, and implement a world class educational program in dispute resolution that will rival and ultimately surpass the quality of similar programs offered by other institutions of higher education. The goal is to have USC Gould emerge as a preeminent leader in dispute resolution and ADR education.

Core Curriculum Requirements

Students must complete the following courses to earn the LLM degree in ADR Law.

- LAW 715 ADR Law and Policy: Mediation and Arbitration Units: 2, 3, 4
- LAW 819 ADR Ethics Units: 1, 2

International Student Core Requirements

Students who have earned a law degree outside of the United States must also complete the following course to earn the LLM degree in ADR Law.

- LAW 520 Introduction to U.S. Legal System Units: 2

Elective Courses

Students may select among the following electives to complete the 24 units required for the LLM in ADR Law degree. Students may also enroll in other graduate level Law courses by advisement to satisfy the elective requirements.

- LAW 572 Practical Mediation Skills Clinic Units: 1, 2, 3, 4, 5
- LAW 626 International Investment Law and Arbitration Units: 1, 2
- LAW 670 Advanced Moot Court Oral Arguments Units: 1, 2, 3
- LAW 680 Mediation Theory and Practice Units: 2, 3
- LAW 712 Negotiation Theory and Application Units: 2, 3
- LAW 781 Externship I Units: 2, 4, 10, 12
- LAW 813 Arbitration in the United States Units: 3
- LAW 817 International Arbitration Units: 3
- LAW 822 Alternative Dispute Resolution Clause Drafting Units: 1
- LAW 824 Arbitration Advocacy Units: 1, 2
- LAW 826 Employment Dispute Mediation Units: 1, 2
- LAW 828 Mediation Advocacy Units: 3
- LAW 829 Cross-Cultural Dispute Resolution Units: 2
- LAW 832 Special Education Dispute Resolution Units: 2
- LAW 853 Divorce and Family Mediation Units: 2
- LAW 863 International Negotiations and Mediation Units: 2, 3, 4
- LAW 868 Organizational Ombuds Units: 2
- LAW 869 Family Law Mediation Clinic Units: 2, 4

Comparative Law (MCL)

The on-campus Master of Comparative Law (MCL) program is a master's degree program for foreign graduate students trained in law who have already earned an LLM degree. This two-semester, full-time program is focused on the study of comparative law.

Admission Requirements

Students submitting an application must have earned a basic law degree, a Bachelor of Laws (LLB) degree or the foreign equivalent and have previously earned an LLM degree. Please visit the Gould School of Law Website for more information.

Dispute Resolution (MDR)

The Master of Dispute Resolution (MDR) is designed to prepare high caliber students who plan to practice Alternative Dispute Resolution (ADR) in the context of the U.S. legal system. The program offers both part-time and full-time options for students, and those who wish to carry full academic loads may complete the program within one academic year.

To obtain a Master of Dispute Resolution (MDR), students must take a total of at least 24 units of the core curriculum and elective courses listed below.

Core Curriculum

Students must successfully complete the following courses to receive the MDR degree.

- LAW 715 ADR Law and Policy: Mediation and Arbitration Units: 2, 3, 4
- LAW 819 ADR Ethics Units: 1, 2
- LAW 829 Cross-Cultural Dispute Resolution Units: 2

Elective Courses

Students may select among the following electives to complete the 24 units required for the MDR degree. Students may also enroll in other graduate level Law courses by advisement to satisfy the elective requirements.

- LAW 513 Effective Writing for Professionals Units: 2
- LAW 520 Introduction to U.S. Legal System Units: 2
- LAW 559 Human Resource Compliance Units: 2, 3
- LAW 571 Organizational Conflict Units: 3
- LAW 572 Practical Mediation Skills Clinic Units: 1, 2, 3, 4, 5
- LAW 603 Business Organizations Units: 3, 4, 5
- LAW 626 International Investment Law and Arbitration Units: 1, 2
- LAW 676 Dealmaking Units: 2
- LAW 680 Mediation Theory and Practice Units: 2, 3
- LAW 712 Negotiation Theory and Application Units: 2, 3
- LAW 781 Externship I Units: 2, 4, 10, 12
- LAW 813 Arbitration in the United States Units: 3
- LAW 817 International Arbitration Units: 3
- LAW 822 Alternative Dispute Resolution Clause Drafting Units: 1
- LAW 824 Arbitration Advocacy Units: 1, 2
- LAW 826 Employment Dispute Mediation Units: 1, 2
- LAW 828 Mediation Advocacy Units: 3
- LAW 832 Special Education Dispute Resolution Units: 2
- LAW 833 Labor Arbitration Units: 2
- LAW 845 Negotiation Skills Units: 2, 3
- LAW 853 Divorce and Family Mediation Units: 2
- LAW 863 International Negotiations and Mediation Units: 2, 3, 4
- LAW 868 Organizational Ombuds Units: 2

International Business and Economic Law (LLM)

The Master of Laws in International Business and Economic Law (LLM in IBEL) degree provides an interdisciplinary, global perspective for law students who wish to develop skills that will enable them to understand and integrate relevant laws, policies and business best practices that shape international business and economic law. The program provides students with training in cross-border transactions, as well as the organizational, transactional and compliance aspects of servicing globally engaged clients.

LLM in IBEL students are required to complete 24 units of study. Students must enroll in three mandatory courses and from among the electives below and other graduate law courses. International students must also enroll in Introduction to the U.S. Legal System.

To qualify for admission, students must have earned a first law degree (JD, LLB or equivalent) before enrolling in our LLM in in International Business and Economic Law at USC Gould School of Law.

Required Courses

Students must successfully complete the following courses to receive the degree.

- LAW 603 Business Organizations Units: 3, 4, 5 (4 units)
- LAW 579 Global Regulatory Compliance Units: 2

  or
- LAW 637 International Trade Policy Units: 1, 2, 3, 4 (2 units)
- LAW 764 International Business Transactions Units: 3 or 4 (3 units)

Electives

Students may select among the following elective courses to complete the 24 units required for the degree. Students may also enroll in other graduate level law courses by advisement to satisfy the elective requirements.

- LAW 579 Global Regulatory Compliance Units: 2 *
- LAW 626 International Investment Law and Arbitration Units: 1, 2
- LAW 632 Business for Lawyers Units: 2, 3, 4
- LAW 637 International Trade Policy Units: 1, 2, 3, 4 *
- LAW 642 Secured Transactions Units: 2, 3, 4
- LAW 658 Mergers and Acquisitions Units: 1, 2, 3, 4
- LAW 709 Contract Drafting and Negotiation Units: 2, 3, 4
- LAW 714 U.S. Foreign Policy and International Law Units: 1, 2, 3, 4
- LAW 719 Corporate Finance Units: 2, 3, 4
- LAW 753 Antitrust Law I Units: 3 or 4
- LAW 754 Antitrust and Intellectual Property Law Units: 2, 3, 4
- LAW 770 Technology Transactions Units: 2, 3
- LAW 775 Immigration Law Units: 2, 3, 4, 5
- LAW 801 Venture Capital and Emerging Companies Units: 2, 3
- LAW 817 International Arbitration Units: 3
- LAW 829 Cross-Cultural Dispute Resolution Units: 2
- LAW 863 International Negotiations and Mediation Units: 2, 3, 4

Note:

*Students may not double count an elective with a required course, but students who enroll in LAW 637 International Trade Policy as a required course may still enroll in LAW 579 Global Regulatory Compliance as an elective, and vice versa.

International Trade Law and Economics (MITLE)

The Master of International Trade Law and Economics degree provides an interdisciplinary, global perspective for students with an economic or other quantitative background who wish to develop knowledge and skills related to relevant laws, policies and business practices that shape international trade and economics.

Master of International Trade Law and Economics students are required to complete 32 units of study. Students are required to enroll in 12 core units from Dornsife College of Letters, Arts and Sciences and 12 core units from Gould School of Law, with an additional 8 units of electives chosen from a list of approved course offerings.

To qualify for admission, students must have earned the bachelor's degree before enrolling in the program. Applicants may have earned their bachelor's degree in a field, other than law, that provides a strong economics and/or mathematical background. Students may have graduated from an institution within or outside of the United States.

Required Courses (32 units total)

Required Courses from Dornsife College of Letters, Arts and Sciences (12 units)

- ECON 500 Microeconomic Analysis and Policy Units: 4
- ECON 501 Macroeconomic Analysis and Policy Units: 4
- ECON 550 Applied Trade Policy Units: 4

Required Courses from Gould School of Law (12 units)

- LAW 520 Introduction to U.S. Legal System Units: 2
- LAW 637 International Trade Policy Units: 1, 2, 3, 4 (3 units)
- LAW 764 International Business Transactions Units: 3 or 4 (3 units)
- LAW 777 Administrative Law and Regulatory Policy Units: 1, 2, 3, 4 (4 units)

Elective Courses (8 units)

Choose 8 units of electives from the following list of courses offered by Gould School of Law and the Economics Department at the Dornsife College of Letters, Arts and Sciences.

Dornsife College of Letters, Arts and Sciences

- ECON 513 Practice of Econometrics Units: 4
- ECON 521 Open Economy Macroeconomics Units: 4
- ECON 572 Economics and International Health Units: 4
- ECON 580 Antitrust Economics and Competition Policy Units: 4
- ECON 584 Economic Consulting and Applied Econometrics Units: 4
- ECON 650 International Trade Theory Units: 4
- ECON 673 Program Evaluation Units: 4

Gould School of Law

- LAW 579 Global Regulatory Compliance Units: 2
- LAW 603 Business Organizations Units: 3, 4, 5 (3 units)
- LAW 626 International Investment Law and Arbitration Units: 1, 2 (1 unit)
- LAW 662 Public International Law Units: 2, 3, 4 (3 units)
- LAW 697 Foreign Relations and National Security Law Units: 2, 3, 4 (2 units)
- LAW 753 Antitrust Law I Units: 3 or 4 (3 units)
- LAW 770 Technology Transactions Units: 2, 3 (2 units)
- LAW 772 Intellectual Property Units: 2 or 3 (3 units)
- LAW 829 Cross-Cultural Dispute Resolution Units: 2

Master of Laws (LLM)

The on-campus Master of Laws (LLM) program is a master's degree program for foreign graduate students trained in law. This two- to three-semester, full-time program introduces foreign lawyers to American law and the U.S. legal system and prepares them for leadership roles in the global market. Students may enroll in an optional certificate track in Alternate Dispute Resolution, Business Law, Media and Entertainment Law, Transnational Law and Business, or Technology and Entrepreneurship Law.

The online Master of Laws (LLM) program is a master's degree program for foreign graduate students trained in law. This program is offered on a part-time or full-time basis in a completely online modality and introduces foreign lawyers to American law and the U.S. legal system and prepares them for leadership roles in the global market. Students may enroll in an optional certificate track in Business Law, Entertainment Law and Industry, Compliance, Health Care Compliance, Financial Compliance or Human Resources Compliance.

The on-campus Two-Year Extended Master of Laws (LLM) program combines a one-year certificate program with a one-year master's degree for foreign graduate students trained in law. During the first year, students complete mandatory law and English courses to prepare them for the master's program and further their English fluency. After successful completion of the first year, students earn a Certificate in U.S. Legal Studies. In the second year, students matriculate into our on-campus Master of Laws program.

Admission Requirements

Students submitting an application to either LLM program must have earned a basic law degree, a Bachelor of Laws (LLB) degree or the foreign equivalent. Please visit the Gould School of Law Website for more information.

Mandatory LLM Courses

All LLM students must successfully complete the following two courses as part of the LLM degree.

- LAW 510 Legal Research Units: 0 or 1 (1 unit required)
- LAW 520 Introduction to U.S. Legal System Units: 2

Elective LLM Courses

Students must complete 18 units of upper division elective courses offered at USC Gould School of Law in order to earn the LLM degree.

Master of Studies in Law (MSL)

The Master of Studies in Law (MSL) teaches students fundamental U.S. law as well as various areas of legal specialization. This program is designed for those seeking a graduate degree in law, mid-career professionals, including corporate executives, government officials, and others from the United States and from around the globe, whose prospective or current employment or whose area of research would benefit from the study of the U.S. legal system. It will appeal also to those who would like to deepen their knowledge of current trends in the law and specific areas of interest.

The MSL is offered both as an online and in-residence program. Elective courses may differ in the online or in-residence program.

Admission Requirements

Students must have earned an undergraduate degree in some field of study by the time they begin the MSL degree. Prior exposure to or experience in law is not required. The Admissions Committee will consider the student's grades, course work, work experience and reasons for pursuing the MSL degree when determining admission.

Required Courses

All MSL students must successfully complete the following two courses as part of the MSL degree.

- LAW 510 Legal Research Units: 0 or 1
- LAW 520 Introduction to U.S. Legal System Units: 2

Elective Courses (Online)

Students pursuing the MSL online must complete 18 units of the following elective courses or other courses selected with the guidance of an academic adviser to receive their master's degree.

- LAW 505 Legal Profession Units: 2, 3, 4
- LAW 508 Constitutional Law: Structure Units: 2, 3, 4, 5
- LAW 521 Topics in American Law Units: 1, 2, 3, 4
- LAW 522 Entertainment Law and Industry Units: 2
- LAW 527 Intellectual Property: Copyright Units: 2
- LAW 551 Intellectual Property Trademark Units: 2
- LAW 559 Human Resource Compliance Units: 2, 3
- LAW 567 Introduction to Litigation in U.S. Courts Units: 2
- LAW 574 Health Care Compliance Units: 2, 3
- LAW 579 Global Regulatory Compliance Units: 2
- LAW 598 Regulatory Compliance Units: 2, 3
- LAW 603 Business Organizations Units: 3, 4, 5
- LAW 609 Contemporary Issues in Human Resource Compliance Units: 2
- LAW 613 Corporate Governance Units: 2
- LAW 633 Business Principles in Law Units: 2
- LAW 635 Employment Discrimination Law Units: 2, 3
- LAW 640 Financial Institution Regulation Units: 2
- LAW 658 Mergers and Acquisitions Units: 1, 2, 3, 4
- LAW 663 Health Care Law, Business and Finance Units: 2
- LAW 664 Patient Privacy Law Units: 2
- LAW 691 Cybersecurity and Cyber Crimes Units: 2
- LAW 692 Information Management and Risk Units: 2
- LAW 710 Contract Drafting and Analysis Units: 2, 3
- LAW 749 Securities Regulation Units: 2, 3, 4
- LAW 804 Information Privacy Law Units: 2
- LAW 811 Health Law and Policy Units: 2, 3, 4
- LAW 826 Employment Dispute Mediation Units: 1, 2

Elective Courses (In-Residence)

Students pursuing the MSL in-residence must complete 18 units of the following elective courses or other courses selected with the guidance of an academic adviser to receive their master's degree.

- LAW 513 Effective Writing for Professionals Units: 2
- LAW 521 Topics in American Law Units: 1, 2, 3, 4
- LAW 525 Fundamentals of Intellectual Property Law Units: 3
- LAW 559 Human Resource Compliance Units: 2, 3
- LAW 567 Introduction to Litigation in U.S. Courts Units: 2
- LAW 574 Health Care Compliance Units: 2, 3
- LAW 598 Regulatory Compliance Units: 2, 3
- LAW 603 Business Organizations Units: 3, 4, 5
- LAW 613 Corporate Governance Units: 2
- LAW 676 Dealmaking Units: 2
- LAW 710 Contract Drafting and Analysis Units: 2, 3
- LAW 845 Negotiation Skills Units: 2, 3

Privacy Law and Cybersecurity (LLM)

The Master of Laws in Privacy Law and Cybersecurity degree provides an interdisciplinary perspective for law students who wish to develop skills that will enable them to understand and integrate relevant laws, policies and best practices that shape privacy law and cybersecurity. The degree explores the legal framework concerning information privacy in the United States and provides an overview of common legal issues and emerging law in the areas of privacy and cybersecurity. Knowledge of privacy laws and awareness of cybersecurity issues provide students with the opportunity to mitigate risk and to deal with threats in the workplace.

Admission Requirements

Applicants to the LLM in Privacy Law and Cybersecurity must have earned a first degree in law (LLB, JD, LLM or equivalent) from either inside or outside the United States. Applicants' degrees must have been earned at degree-granting institutions that are recognized by USC. They will have excellent undergraduate grades and credentials, and a strong desire to specialize their graduate studies in privacy law and cybersecurity. While USC Gould does not have a minimum GPA requirement, successful applicants to our LLM in Privacy Law and Cybersecurity degree will generally have earned at least a 3.0 undergraduate GPA.
In order to apply for the LLM in Privacy Law and Cybersecurity, students must submit the online application form, transcripts from all institutions attended, a current resume and personal statement detailing their desire to pursue the degree. International applicants must submit official and valid TOEFL/IELTS scores and must have demonstrated their proficiency in English as part of the application process.

Mandatory Courses

The Master of Laws in Privacy Law and Cybersecurity degree requires 24 units of course work. Students must successfully complete the following courses. The balance of the units will be taken from upper-division and LLM offerings in consultation with an adviser.

- LAW 652 Computer Crime Law Units: 2
- LAW 694 Cyberlaw: Legal Issues Impacting Providers and Users of Internet Services Units: 2
- LAW 772 Intellectual Property Units: 2 or 3 (3 units)
- LAW 804 Information Privacy Law Units: 2
- LAW 866 Counterterrorism, Privacy and Civil Liberties Units: 2, 3, 4 (2 or 3 units)

Dual Degree

Juris Doctor/Doctor of Pharmacy (JD/PharmD)

Admission Requirements

Admission to the dual PharmD/JD program is competitive, and involves meeting admission requirements and gaining acceptance to both the School of Pharmacy and the law school. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students that have a baccalaureate degree may apply to the dual PharmD/JD degree program in two ways. First, they may apply at the time they submit their PharmD application by concurrently submitting applications to both schools. Students who elect this approach must identify themselves on their PharmD applications as potential dual PharmD/JD degree students. Students who are admitted to both schools will be offered admission to the dual degree contingent on passing all courses in their first year of the PharmD with a minimum 3.0 GPA.

Students pursuing the dual PharmD/JD degree must notify the law school in a timely fashion that they will be enrolling in the dual PharmD/JD degree program and will not matriculate at the law school until the following year. Students who are accepted only by one school may choose to attend that school but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to the law school during their first year of enrollment in the PharmD program prior to the law school's published application deadline. Students who elect this approach must apply through the School of Pharmacy. Students admitted to the law school using this approach would be offered admission to the dual degree contingent on passing all courses in their first year of the PharmD with a minimum 3.0 GPA. See the admissions section of the School of Pharmacy and the law school for specific requirements.

Degree Requirements

The professions of pharmacy and law are distinctly different, yet pharmacists are often involved in legal issues and lawyers frequently deal with pharmacy, drug, health care, product development and toxin-related matters. This dual degree program provides qualified students with an efficient mechanism for obtaining the expertise and professional credentials that will enable them to develop professional practices that bring together expertise in both areas.

Overall Requirements

A student is required to complete all work for both degrees within six years of the date of matriculation at the School of Pharmacy (PharmD) and five years of matriculation at the law school (JD). The entire dual degree program will take six years to complete. Dual degree students will be allowed to use 12 units of approved JD course work (elective or required) to meet 12 units of PharmD electives and 12 units of approved PharmD course work (elective or required) to meet 12 units of JD electives. A faculty qualifying exam committee will determine the exact program for each student, including the appropriateness of courses in one program used to meet elective requirements for the other program. A total of 212 units is required for the dual degree.

PharmD Requirements

Dual degree students must successfully complete 148 units of PharmD and acceptable JD units to receive the PharmD degree. The 148 units must include 136 units of required and elective pharmacy course work plus 12 units of JD course work deemed acceptable to meet PharmD elective requirements. Dual degree students should graduate with their PharmD degrees at the completion of the first semester of the sixth academic year of the dual degree program. Students will be eligible to sit for the Pharmacy Board Exams after completion of the PharmD degree requirements. However, dual degree students will not actually be awarded their PharmD degrees until they complete requirements for both degrees.

Juris Doctor Requirements

Dual degree students must successfully complete 88 units of JD and acceptable PharmD course work during the second to sixth years of the dual degree program to receive the JD degree. The 88 units must be composed of 76 units of JD course work, including satisfaction of the upper-division writing requirement and any other substantive requirements, plus 12 units of PharmD course work deemed acceptable to meet JD elective requirements. No JD credit will be awarded for PharmD course work completed prior

to matriculation in the law school. Students cannot receive the JD degree under requirements for the dual degree program without prior or simultaneous completion of the PharmD degree.

Both professions require passing a state board or bar exam to practice the respective professions. Neither of these degrees requires a thesis or comprehensive final exam.

Recommended Program

PharmD/JD dual degree students will begin with the first year of the PharmD curriculum (36 units). During the second year, students will take the first year law core (30 units), plus 3–5 PharmD units. Due to the rigor of the law school core, pharmacy courses during the first year of law school are limited to non-science courses. The third through fifth years of the program focus on PharmD courses with sufficient law courses to maintain students' educational momentum in law. Students should complete their PharmD requirements during the fall of their sixth year of the program and their law course work also during the sixth year. Students must complete both degree requirements by the end of the sixth year of the program.

Juris Doctor/Doctor of Philosophy in Political Science and International Relations (JD/PhD)

Application deadline (for PhD): December 1

The Political Science and International Relations program and the USC Gould School of Law jointly offer a dual degree program leading to the JD/PhD degree. Applicants must apply to the Political Science and International Relations program and the law school and meet the requirements for admission to both.

In the first year students take 30 units of course work in the law school exclusively. The second and third years include a total of 40 units of courses in political science and international relations and 46 units of law. To earn the JD, all students (including dual degree students) must complete 37 numerically graded law units at USC after the first year. Students must complete a five-course core theory and methodology sequence. They must include a classics-oriented, two-semester political, social, comparative and international theory sequence (currently POIR 600), a multivariate statistics course (such as POIR 611) and a philosophies/methodologies in social inquiry course (POIR 610). Finally in their second, third or fourth year, they must take an approved advanced research methods course.

To obtain a PhD in Political Science and International Relations, students must pass the screening process. After the completion of required field course work with a grade of B or better, a substantive paper or USC MA thesis relevant to the program, students must take a PhD qualifying examination in two of their three fields of concentration. The third field will be completed by taking at least three courses and passing each with a grade of B or better. The final requirement, following successful completion of the qualifying examination, is a doctoral dissertation.

Juris Doctor/Master of Arts, Philosophy (JD/MA)

Students must complete 24 units in the USC Dornsife College of Letters, Arts, and Science Department of Philosophy and 76 units in the USC Gould School of Law.

First Year: Required law school curriculum.

Second and Third Years: The Department of Philosophy prefers that students take at least one philosophy course each semester. During the four semesters, students must take at least 16 units at the 500 level, including PHIL 450 The Limits of Logic or PHIL 510 Philosophical Logic and PHIL 500 Introduction to Contemporary Philosophical Literature and PHIL 503 Introduction to Contemporary Philosophical Literature on Value; one 400- or 500-level course in ethics or social/political philosophy or aesthetics or philosophy of law; one 400- or 500-level course in metaphysics or epistemology or philosophy of language or philosophy of science or philosophy of mind; one 400- or 500-level course in the history of ancient or early modern philosophy; passage of the second year review, which shall include a research paper based on a completed seminar paper and completion of a publishable research paper. Students must also complete 46 additional law units.

Juris Doctor/Master of Communication Management (JD/MCG)

Students must complete 20 units (five courses) of communication courses at the School of Communication: one core class from the student's preferred track; one method course; CMGT 597a, CMGT 597b; and the remaining two courses may be from either core or elective offerings.

First Year: Required law school courses.

Second and Third Years: 20 units of communications courses and 46 units of law courses, of which 8 units must be approved as appropriate for acceptance by the Annenberg School for Communication and Journalism toward its degree. All students take CMGT 597a, CMGT 597b in the third year.

Application to pursue the dual degree should be made before completion of 15 units of work on law or 8 units toward the MA Admission by the law school to its JD degree will be evaluated as a substitute for GRE scores.

Juris Doctor/Master of Public Administration (JD/MPA)

The dual degree program with the USC Gould School of Law and the USC Price School of Public Policy enables qualified students to earn a Juris Doctor/Master of Public Administration (JD/MPA) in approximately four years of study.

Some of the topics covered in the law school are also covered in the program of the Price School of Public Policy, so some credit toward the law degree may appropriately be given for specified graduate work taken in the Price School of Public Policy. Similarly, some credit toward the master's degree may appropriately be awarded for certain work completed in the law school. The goal of the program is to encourage law students to gain a recognized competence in administration, which has a direct relevance for the roles lawyers are asked to play in society.

Students must apply to, and be accepted by, both schools. They may be accepted to a dual degree program at the time of their acceptance to the law school or at the beginning of their second year of law school. The program requires the completion of the required first year of law school and the fulfillment of a statistics prerequisite, which can be met by passing an undergraduate inferential statistics class with a grade of B or better at an approved university within three years of matriculation or taking PPD 502x Statistical Foundations for Public Management and Policy and completing with a grade of "B" or better. To earn the JD, all students (including dual degree students) must complete 37 numerically graded law units at USC after the first year.

Credit toward the law degree may not be given for graduate work completed prior to the completion of the first year of law school. The Price School of Public Policy, on the other hand, may allow some credit toward the MPA for approved work completed prior to the first year of law school.

Students are required to complete 108 units of course work.

Curriculum Requirements

First Year

Required law school courses (30 units).

Second and Third Year

Students complete the remaining law school courses (46 units) and 32 units of public administration courses.

MPA Courses (24 units)

- PPD 503 Economics for Public Policy Units: 4
- PPD 504 Essential Statistics for Public Management Units: 2
- PPD 540 Fundamentals of Public Administration Units: 4
- PPD 541 Public Financial Management and Budgeting Units: 4 or
- PPDE 645 Financial Management of Nonprofit Organizations Units: 4
- PPD 545 Public and Nonprofit Organizational Behavior Units: 4

- PPD 546 Capstone in Public Administration Units: 4
- PPDE 505 Professional Workshop in Public Administration Units: 2

Electives (8 units)

Students complete one analytic elective (4 units) and one management elective (4 units), selected in consultation with an adviser.

Juris Doctor/Master of Public Policy (JD/MPP)

The USC Price School of Public Policy and the USC Gould School of Law offer a dual degree that enables qualified students to earn both a Juris Doctor and a Master of Public Policy in approximately four years of study.

The dual degree allows students to acquire a blend of the analytic skills of public policy and an understanding of legal institutions and processes. This combination of knowledge is well suited for law students who want to affect the policy-making process and craft legislation to aid in achievement of public policy goals. It is equally appropriate for prospective policy analysts who are interested in law and public policy.

Students must apply to, and be accepted by, both schools. They may be accepted to the dual degree at the time of their acceptance to the law school or at the beginning of their second year of law school. Dual degree students spend the first year of the program completing the required first year of law school. The remaining units of law school courses and the required 36 units of core MPP courses are taken by students in the second through fourth years.

Students are required to complete 114 units of course work, including 78 units in the Gould School of Law and 36 units in the USC Price School of Public Policy. The MPP program has a statistics prerequisite. See Public Policy (MPP). Requirements for this dual degree are listed in the USC Price School of Public Policy section.

Juris Doctor/Master of Real Estate Development (JD/MRED)

The Juris Doctor/Master of Real Estate Development dual degree program provides the opportunity for in-depth study of legal issues and real estate development. The increasingly regulatory environment developers work within demands that professionals in the real estate industry have a strong understanding of the legal system. Lawyers who plan to specialize in real estate law will benefit from a thorough understanding of the development process, including financial, planning, marketing and design issues.

Application must be made to both the Gould School of Law and the USC Price School of Public Policy. This program normally requires three years (including one summer) of full-time study in residence to complete.

Students must have use of an approved laptop computer as required by instructors and must demonstrate calculator and spreadsheet skills; a calculator and/or spreadsheet class is offered online via the Internet.

Requirements for completion of the dual degree program are 112 units, including 78 units in law and 34 units in planning. For a complete listing, see the requirements listed in the USC Price School of Public Policy.

Juris Doctor/Master of Science in Gerontology (JD/MS)

The JD/MS dual degree combines the knowledge of the older population with understanding of the legal system. The program prepares graduates for a number of roles in both public and private sector organizations. Students are required to complete 112 units of course work, 76 from the law school and 36 from the USC Leonard Davis School of Gerontology. The first year is devoted to required law courses, and the second, third and fourth years combine gerontology and law courses.

Gerontology Requirements

The Master of Science in Gerontology will require 36 units of course and field work that cover the core content of the MS program.

Gerontology Requirements

- GERO 510 Physiology of Development and Aging Units: 4
- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
- GERO 555 Integrating Gerontology: A Multidisciplinary Approach Units: 4
- GERO 591 Field Practicum Units: 1-12
- GERO 593 Research Methods Units: 4
- Gerontology elective Units: 4

Notes:

The USC Leonard Davis School of Gerontology will waive 16 units of electives, which are required in the regular MS program, as well as GERO 589 Case Studies in Leadership and Change Management because students enrolled in this program have a primary professional focus in law.

Law School Requirements

The law school requires 76 units, consisting of 30 units of first-year required coursework, and a minimum of 46 units of elective coursework thereafter. After the first-year required coursework, students must complete Constitutional Law: Rights, a writing requirement, and at least 6 units of experiential courses. At least 37 units must be numerically graded beyond the first-year curriculum.

Juris Doctor/Master of Social Work (JD/MSW)

The Juris Doctor and Master of Social Work (JD/MSW) dual degree program is a four-year program. Students are required to complete 121 units of course work, including 76 units in the Gould School of Law and 45 units in the USC Suzanne Dworak-Peck School of Social Work.

To earn the JD, all students (including dual degree students) must complete 37 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law school honors programs. Students must apply to both programs prior to matriculation. The program of study is as follows:

First and Second Years: Complete both the first year JD program of study and MSW course work in foundation, field and core courses specific to the AMHW, SCI or CYF departments.

Third Year: Complete the second year JD program.

Fourth Year: Complete the the remaining required core department and field courses and one semester of field instruction and the final semester of the JD program in the spring.

The law school gives credit for the third semester in the Suzanne Dworak-Peck School of Social Work, while the latter recognizes law courses as substitutions for a one-semester practice course, special topics courses, a third semester of social policy and one semester of field instruction (for which a clinical law semester is substituted).

Graduate Certificate

Alternative Dispute Resolution Certificate

JD students must complete at least 12 units of arbitration and mediation-related classes to receive this certificate. Interested JD students must submit their applications for this certificate program after completing the first year of law school. JD students complete the certificate requirements during their second and third years of law school, and courses may count both toward the JD degree and the certificate.

LLM students must complete at least 12 units of arbitration and mediation-related classes to receive this certificate. LLM students complete the certificate requirements during the year they are taking their LLM course work, and courses may count both toward the LLM degree and the certificate.

Certificate-only students must complete at least 12 units of arbitration and mediation-related classes to receive this certificate.

All students must complete the required courses and a selection of elective courses.

Required Courses

- LAW 715 ADR Law and Policy: Mediation and Arbitration Units: 2, 3, 4
- LAW 819 ADR Ethics Units: 1, 2 *
  *JD students are not required to take LAW 819 ADR Ethics. In addition, all students must select at least one of the following courses:
- LAW 817 International Arbitration Units: 3
- LAW 822 Alternative Dispute Resolution Clause Drafting Units: 1
- LAW 829 Cross-Cultural Dispute Resolution Units: 2

Elective Courses

Students may select from among the following elective courses to complete the 12 units required for this certificate.
Note: Electives are dependent on the program in which a student is enrolled. Please refer to the USC Gould School of Law website for further details and consult an adviser on available electives.

- LAW 571 Organizational Conflict Units: 3
- LAW 572 Practical Mediation Skills Clinic Units: 1, 2, 3, 4, 5
- LAW 626 International Investment Law and Arbitration Units: 1, 2
- LAW 680 Mediation Theory and Practice Units: 2, 3
- LAW 712 Negotiation Theory and Application Units: 2, 3
- LAW 781 Externship I Units: 2, 4, 10, 12
- LAW 813 Arbitration in the United States Units: 3
- LAW 817 International Arbitration Units: 3
- LAW 822 Alternative Dispute Resolution Clause Drafting Units: 1
- LAW 824 Arbitration Advocacy Units: 1, 2
- LAW 825 International Arbitration Competition Units: 1, 2, 3
- LAW 826 Employment Dispute Mediation Units: 1, 2
- LAW 828 Mediation Advocacy Units: 3
- LAW 829 Cross-Cultural Dispute Resolution Units: 2
- LAW 832 Special Education Dispute Resolution Units: 2
- LAW 833 Labor Arbitration Units: 2
- LAW 853 Divorce and Family Mediation Units: 2
- LAW 863 International Negotiations and Mediation Units: 2, 3, 4
- LAW 868 Organizational Ombuds Units: 2

Business Law Certificate (On-Campus)

JD students must complete at least 22 units of business-related classes to receive this certificate. Interested JD students must submit their applications for this certificate program after completing the first year of law school. JD students complete the certificate requirements during their second and third years of law school, and courses may count both toward the JD degree and the certificate.

LLM students must complete at least 12 units of business-related classes to receive this certificate. LLM students complete the certificate requirements during the year they are taking their LLM course work, and courses may count both toward the LLM degree and the certificate.

All students are required to take both mandatory business law courses (such as business organizations) and a selection of elective business law courses (such as mergers and acquisitions, advanced contracts and bankruptcy).

Business Law Certificate (Online)

USC Gould School of Law Online LLM and Business Law Certificate students will enroll in the Online Business Law Certificate program and will take each of their courses in the online modality.

USC Gould School of Law JD and LLM residential students will enroll in the residential Business Law Certificate program and will take each of their courses in residence.

The Online Business Law Certificate program requires Business Organizations (4 units) as a core, mandatory course. Students are required to complete an additional 10 business law units online to earn the certificate. Electives include Securities Regulation (3 units), Business for Lawyers (2 units), Contract Drafting and Strategy (2 units) and Mergers and Acquisitions (3 units and for which Business Organizations is a prerequisite). Students must complete a minimum of 12 units to receive this online certificate.

The program is structured especially for working professionals who wish to take one or two courses per term in an online format. Students are expected to enroll each semester until the program is completed.

Certificate in U.S. Legal Studies

USC Gould School of Law offers a two-year Master of Laws (LLM) program designed to introduce students to core doctrines of American law. During the first year, students explore the fundamental principles underlying the U.S. legal system by completing the Certificate in U.S. Legal Studies, and any required American Language Institute (ALI) courses to improve their English fluency. During the second year, students enroll in courses to complete the Master of Laws (LLM) degree.

To qualify for admission to USC Gould School of Law's Two-Year Extended LLM, students must have earned their first law degree (LLB or the equivalent) outside of the United States. However, students may be considered for admission if they provide evidence of recent legal work experience and hold a bachelor's degree or its equivalent in another field. For more information, please visit the USC Gould School of Law Website.

ALI Language Courses

Students will be required to take an English placement exam at the beginning of the program. Students must complete 2 units of English language course work each semester, for a total of 4 units, unless they receive a waiver. Students will be enrolled in American Language Institute (ALI) courses, from among those identified below, that best suit their skill level as determined by ALI.

- ALI 224 Academic and Professional Speaking Skills I Units: 2
- ALI 225 Academic and Professional Writing Skills I Units: 2
- ALI 234 Academic and Professional Speaking Skills II Units: 2
- ALI 235 Academic and Professional Writing Skills II Units: 2
- ALI 244 Academic and Professional Speaking Skills III Units: 2
- ALI 245 Academic and Professional Writing III Units: 2
- ALI 254 Academic and Professional Speaking Skills IV Units: 2
- ALI 255 Academic and Professional Writing Skills IV Units: 2

Introduction to U.S. Legal Studies

Students will enroll in the following 17 units of LAW courses during the first year of this program. These courses will explore the fundamental principles underlying the U.S. legal system.

- LAW 510 Legal Research Units: 0 or 1
- LAW 520 Introduction to U.S. Legal System Units: 2
- LAW 560 Academic and Professional Skills for U.S. Law Studies I Units: 2
- LAW 561a Fundamentals of Legal Writing Skills Units: 3
- LAW 561b Fundamentals of Legal Writing Skills Units: 2
- LAW 562 Introduction to U.S. Legal Culture and Practice Units: 2
- LAW 563 Presentation Skills for International Lawyers Units: 2
- LAW 564 Persuasive Advocacy Units: 2
- LAW 566 Academic and Professional Skills for U.S. Law Studies II Units: 1

Compliance Certificate

The Compliance Certificate program is structured especially for working professionals who wish to take one or two courses per term in an online or on-campus format. Students are expected to enroll each semester until the program is completed.

USC Gould School of Law Compliance Certificate students and students who select the Compliance Certificate as part of our online or on-campus LLM or MSL programs will take each of their courses in the corresponding modality.

Both the online and on-campus Compliance Certificate program require the following mandatory courses to earn the certificate.

Mandatory Courses

Students must successfully complete the courses below (12 units) to receive a Certificate in Compliance.

- LAW 559 Human Resource Compliance Units: 2, 3
- LAW 574 Health Care Compliance Units: 2, 3
- LAW 598 Regulatory Compliance Units: 2, 3
- LAW 603 Business Organizations Units: 3, 4, 5
- LAW 710 Contract Drafting and Analysis Units: 2, 3

Entertainment Law and Industry Certificate

USC Gould School of Law Online LLM, MSL and online Entertainment Law and Industry Certificate students will enroll in the online Entertainment Law and Industry Certificate program and will take each of their courses in the online modality.

The Entertainment Law and Industry Certificate program requires Business Organizations (4 units), Intellectual Property: Copyright (2 units), Entertainment Law and Industry (2 units), Intellectual Property: Trademark (2 units) and Contract Drafting and Strategy (2 units) to earn the certificate.

The program is structured especially for working professionals who wish to take one or two courses per term in an online format. Students are expected to enroll each semester until the program is completed.

Mandatory Courses

Students must successfully complete the courses below to receive the Certificate.

- LAW 522 Entertainment Law and Industry Units: 2
- LAW 527 Intellectual Property: Copyright Units: 2
- LAW 551 Intellectual Property Trademark Units: 2
- LAW 603 Business Organizations Units: 3, 4, 5
- LAW 710 Contract Drafting and Analysis Units: 2, 3

Financial Compliance Certificate

The online Financial Compliance Certificate program is offered to enrolled online LLM or online MSL students, as well as on a stand-alone basis. The program is structured especially for working professionals who wish to take one or two courses per term in an online format. Students are expected to enroll each semester until the program is completed.

The online Financial Compliance Certificate requires 12 units, including the required and elective courses listed below.

Admissions

Applicants to the certificate program must have earned an undergraduate degree, which can be in any field of study, prior to the time they begin the certificate program. Prior exposure to or experience in law is not required. The Admissions Committee will consider applicants' grades, course work, work experience, and reasons for pursuing the certificate program when determining admission.

Required Courses

The following courses are required, at the units specified:

- LAW 598 Regulatory Compliance Units: 2, 3 (2 units)
- LAW 603 Business Organizations Units: 3, 4, 5 (4 units)

Elective Courses

Remaining units can be fulfilled in the following electives, at the units specified:

- LAW 579 Global Regulatory Compliance Units: 2 (2 units)
- LAW 613 Corporate Governance Units: 2 (2 units)
- LAW 633 Business Principles in Law Units: 2 (2 units)
- LAW 640 Financial Institution Regulation Units: 2 (2 units)
- LAW 710 Contract Drafting and Analysis Units: 2, 3 (2 units)
- LAW 749 Securities Regulation Units: 2, 3, 4 (2 units)

Health Care Compliance Certificate

The online Health Care Compliance Certificate program is offered to enrolled online LLM or online MSL students, as well as on a stand-alone basis. The program is structured especially for working professionals who wish to take one or two courses per term in an online format. Students are expected to enroll each semester until the program is completed.

The online Health Care Compliance Certificate requires 12 units, including the following required and elective courses.

Admissions

Applicants to the certificate program must have earned an undergraduate degree, which can be in any field of study, prior to the time they begin the certificate program. Prior exposure to or experience in law is not required. The Admissions Committee will consider applicants' grades, course work, work experience, and reasons for pursuing the certificate program when determining admission.

Required Courses

The following courses are required, at the units specified:

- LAW 574 Health Care Compliance Units: 2, 3 (2 units)
- LAW 598 Regulatory Compliance Units: 2, 3 (2 units)

Elective Courses

Remaining units can be fulfilled in the following electives, at the units specified:

- LAW 603 Business Organizations Units: 3, 4, 5 (4 units)
- LAW 663 Health Care Law, Business and Finance Units: 2 (2 units)
- LAW 664 Patient Privacy Law Units: 2 (2 units)
- LAW 710 Contract Drafting and Analysis Units: 2, 3 (2 units)
- LAW 811 Health Law and Policy Units: 2, 3, 4 (2 units)

Human Resources Law and Compliance Certificate

The online Human Resources Law and Compliance Certificate program is offered to enrolled online LLM or online MSL students, as well as on a stand-alone basis. The program is structured especially for working professionals who wish to take one or two courses per term in an online format. Students are expected to enroll each semester until the program is completed.

The online Human Resources Law and Compliance Certificate requires 12 units, including the following required and elective courses.

Admissions

Applicants to the certificate program must have earned an undergraduate degree, which can be in any field of study, prior to the time they begin the certificate program. Prior exposure to or experience in law is not required. The Admissions Committee will consider applicants' grades, course work, work experience, and reasons for pursuing the certificate program when determining admission.

Required Courses

The following courses are required, at the units specified:

- LAW 559 Human Resource Compliance Units: 2, 3 (2 units)
- LAW 598 Regulatory Compliance Units: 2, 3 (2 units)

Elective Courses

Remaining units can be fulfilled in the following electives, at the units specified:

- LAW 603 Business Organizations Units: 3, 4, 5 (4 units)
- LAW 609 Contemporary Issues in Human Resource Compliance Units: 2 (2 units)
- LAW 635 Employment Discrimination Law Units: 2, 3 (2 units)
- LAW 710 Contract Drafting and Analysis Units: 2, 3 (2 units)
- LAW 826 Employment Dispute Mediation Units: 1, 2 (2 units)

Media and Entertainment Law Certificate

JD students must complete at least 21 units of media and entertainment related classes to receive this certificate. JD students must submit their applications for this certificate program after completing the first year of law school. JD students complete the certificate requirements during their second and third years of law school, and courses may count both toward the JD degree and the certificate.

LLM, MSL and MDR students must complete at least 12 units of media and entertainment related classes to receive this

certificate. LLM, MSL and MDR students complete the certificate requirements during the year they are taking their degree course work, and courses may count both toward the degree and the certificate.

All students are required to take both mandatory entertainment law courses (such as intellectual property) and a selection of elective entertainment law courses (such as copyright, legal issues in music and sports law).

Privacy Law and Cybersecurity Certificate

The online Certificate in Privacy Law and Cybersecurity provides an interdisciplinary perspective for law students who wish to develop skills that will enable them to understand and integrate relevant laws, policies and best practices that shape privacy law and cybersecurity. The certificate explores the legal framework concerning information privacy in the United States and provides an overview of common legal issues and emerging law in the areas of privacy and cybersecurity. Knowledge of privacy laws and awareness of cybersecurity issues provide students with the opportunity to mitigate risk and to deal with threats in the workplace.

Admission Requirements

Applicants to the online Certificate in Privacy Law and Cybersecurity must have earned an undergraduate degree (which can be in any field) from either inside or outside the United States. Applicants' degrees must have been earned at degree-granting institutions that are recognized by USC. They will have excellent undergraduate grades and credentials, and a strong desire to specialize their graduate studies in privacy law and cybersecurity. While USC Gould does not have a minimum GPA requirement, successful applicants to our online Certificate in Privacy Law and Cybersecurity will generally have earned at least a 3.0 undergraduate GPA. In order to apply for the online Certificate in Privacy Law and Cybersecurity, students must submit the online application form, transcripts from all institutions attended, a current resume and personal statement detailing their desire to pursue the degree. International applicants must submit official and valid TOEFL/IELTS scores and must have demonstrated their proficiency in English as part of the application process.

Mandatory Courses

The online Certificate in Privacy Law and Cybersecurity requires 12 units of course work, which must be taken from amongst the following courses.

- LAW 579 Global Regulatory Compliance Units: 2
- LAW 598 Regulatory Compliance Units: 2, 3 (2 units)
- LAW 691 Cybersecurity and Cyber Crimes Units: 2
- LAW 664 Patient Privacy Law Units: 2
- LAW 692 Information Management and Risk Units: 2
- LAW 804 Information Privacy Law Units: 2

Public Interest Certificate

The Public Interest Certificate is intended for students who plan to spend a significant part of their careers in the nonprofit or government (including criminal) sectors. It serves at least three functions. First, it signals to future employers that the student has made a significant commitment to acquiring the substantive knowledge, practical skills and familiarity with the landscape of nonprofit and government law, which will prepare him or her for a successful career in these sectors. Second, the certificate assists students in discerning and following a law school path that will provide the fundamentals they need for a career in nonprofit or government law, and exposes them to a range of substantive law areas, practitioners and experiences in the public interest sector. Third, the certificate allows the Law School to affirm and showcase its support for public interest law and its offerings for students and potential students interested in this career path.

Clinical and Practicum Units

Students must complete at least one semester of work in one of the following Gould clinics or practicums. In the event a student is unable to gain entry into one of the listed clinics or practicums, an externship for at least 3 units with a qualifying organization shall fulfill this requirement.

- LAW 630 Mediation Clinic I Units: 2, 3, 4
- LAW 631 Mediation Clinic II Units: 2, 3, 4
- LAW 711 Access to Justice Practicum Units: 2, 3, 4
- LAW 776 Immigration Clinic I Units: 2, 3, 4, 5
- LAW 781 Externship I Units: 2, 4, 10, 12
- LAW 782 Externship II Units: 2, 4, 10, 12
- LAW 796 Immigration Clinic II Units: 2, 3, 4, 5
- LAW 808 Medical-Legal Community Partnership Seminar and Practicum Units: 1, 2, 3, 4
- LAW 849 International Human Rights Clinic I Units: 4, 5
- LAW 850 International Human Rights Clinic II Units: 4 or 5
- LAW 865 Legislative Policy Practicum Units: 3
- LAW 891 Post-Conviction Justice Project I Units: 1, 2, 3, 4, 5
- LAW 892 Post-Conviction Justice Project II Units: 1, 2, 3, 4, 5
- LAW 893 Advanced Clinical Training Units: 1, 2, 3, 4, 5
  A student may only satisfy this requirement with LAW 781 or LAW 782 if he or she is unable to enroll in one of the other listed courses.

Required Courses

A student must complete both of the following courses:

- LAW 531 Ethical Issues for Nonprofit, Government and Criminal Lawyers Units: 3
- LAW 777 Administrative Law and Regulatory Policy Units: 1, 2, 3, 4

Core Courses

A student must complete at least one of the following courses for a numerical grade:

- LAW 602 Criminal Procedure Units: 2, 3, 4
- LAW 635 Employment Discrimination Law Units: 2, 3
- LAW 686 Civil Rights Law Units: 3
- LAW 704 Poverty Law Units: 2, 3, 4
- LAW 713 International Human Rights Units: 2, 3, 4
- LAW 775 Immigration Law Units: 2, 3, 4, 5

Substantive Courses

A student must complete at least 6 units from the following list of courses.

- LAW 602 Criminal Procedure Units: 2, 3, 4
- LAW 623 Family Law Units: 3 or 4
- LAW 635 Employment Discrimination Law Units: 2, 3
- LAW 636 Labor Law Units: 3 or 4
- LAW 655 Environmental Law Units: 2, 3, 4
- LAW 661 National Security Law Units: 2, 3, 4
- LAW 662 Public International Law Units: 2, 3, 4
- LAW 675 Mental Health Law Units: 2, 3, 4
- LAW 684 Suing the Government Units: 2, 3, 4
- LAW 686 Civil Rights Law Units: 3
- LAW 697 Foreign Relations and National Security Law Units: 2, 3, 4
- LAW 702 Children, Sexuality and the Law Units: 2, 3, 4
- LAW 703a Children's Legal Issues Units: 1, 2, 3, 4
- LAW 704 Poverty Law Units: 2, 3, 4
- LAW 706 Public Health Law and Policy Units: 2, 3, 4
- LAW 707 Global Health, Law and Human Rights Units: 1, 2, 3
- LAW 713 International Human Rights Units: 2, 3, 4
- LAW 714 U.S. Foreign Policy and International Law Units: 1, 2, 3, 4
- LAW 716 Race and Gender in the Law Units: 1, 2, 3, 4
- LAW 726 Stereotypes, Prejudice, and the Rule of Law Units: 2, 3, 4
- LAW 734 Local Government Law Units: 3 or 4
- LAW 743 Federal Criminal Law Units: 2, 3, 4
- LAW 746 Critical Race Theory Units: 2, 3, 4
- LAW 751 Sexual Orientation and the Law Units: 2, 3, 4
- LAW 757 Sex, Gender and the Law Units: 1, 2, 3, 4
- LAW 763 Federal Courts: The Federal System II Units: 3, 4, 5
- LAW 775 Immigration Law Units: 2, 3, 4, 5

- LAW 791 Law and Society Units: 2, 3, 4
- LAW 798 Law, Mental Health and Ethics Units: 2, 3, 4
- LAW 811 Health Law and Policy Units: 2, 3, 4
- LAW 829 Cross-Cultural Dispute Resolution Units: 2
- LAW 851 Topics in Criminal Law and Criminology Units: 1, 2, 3, 4
- LAW 860 International Criminal Law Units: 4
- LAW 866 Counterterrorism, Privacy and Civil Liberties Units: 2, 3, 4
- LAW 871 First Amendment Units: 2, 3, 4
- LAW 875 Constitutional Theory Seminar Units: 1, 2, 3, 4
- LAW 880 Equality and Difference Units: 2, 3
- LAW 881 Constitutional Innovation Units: 2, 3, 4

Technology and Entrepreneurship Law Certificate

The Technology and Entrepreneurship Certificate program provides a rigorous course sequence for students who have an interest in legal practice areas involving the intersection of technology and business law issues. The program features a combination of traditional doctrinal courses taught principally in a lecture format, skills-based courses taught principally in a workshop format, and experiential field-based opportunities outside the classroom. The program emphasizes the importance of acquiring strong legal skills and business awareness to prepare for legal practice.

Mandatory Courses (JD Students and LLM Students)

Students must complete both of the following courses:

- LAW 603 Business Organizations Units: 3, 4, 5
- LAW 810 Patent Law Units: 3, 4

Core Optional Courses (JD Students)

Select at least three credits from the following courses:

- LAW 627 Business Planning: Structuring and Financing a New Enterprise Units: 3, 4
- LAW 673 Deal Strategies in Business and Entertainment Law Units: 3, 4
- LAW 770 Technology Transactions Units: 2, 3
- LAW 801 Venture Capital and Emerging Companies Units: 2, 3
- LAW 827 Counseling the Startup Company Units: 2, 3, 4
- LAW 838 Patent Drafting and Prosecution Units: 3

Non-Core Optional Courses (JD Students)

Select sufficient units to reach the required number of total credits.

- LAW 648 Topics in Entertainment Law Units: 1, 2, 3, 4
- LAW 719 Corporate Finance Units: 2, 3, 4
- LAW 736 Small Business Clinic I Units: 2, 3, 4
- LAW 737 Small Business Clinic II Units: 2, 3, 4
- LAW 753 Antitrust Law I Units: 3 or 4
- LAW 765 Intellectual Property Litigation Units: 1, 2, 3, 4
- LAW 771 Intellectual Property and Technology Law Clinic I Units: 2, 3, 4, 5
- LAW 772 Intellectual Property Units: 2 or 3
- LAW 773 Internet Law Units: 2, 3, 4
- LAW 780 Intellectual Property and Technology Law Clinic II Units: 2, 3, 4, 5
- LAW 841 Copyright, Trademark and Related Rights Units: 3

Optional Courses (LLM Students)

Select sufficient courses to reach required total credits.

- LAW 648 Topics in Entertainment Law Units: 1, 2, 3, 4
- LAW 719 Corporate Finance Units: 2, 3, 4
- LAW 753 Antitrust Law I Units: 3 or 4
- LAW 765 Intellectual Property Litigation Units: 1, 2, 3, 4
- LAW 770 Technology Transactions Units: 2, 3
- LAW 772 Intellectual Property Units: 2 or 3
- LAW 773 Internet Law Units: 2, 3, 4
- LAW 801 Venture Capital and Emerging Companies Units: 2, 3
- LAW 827 Counseling the Startup Company Units: 2, 3, 4
- LAW 838 Patent Drafting and Prosecution Units: 3
- LAW 841 Copyright, Trademark and Related Rights Units: 3

Transnational Law and Business Certificate

All resident JD, LLM and MCL students will be eligible for this certificate.

To earn a Transnational Law and Business Certificate, students must complete at least 12 units of the mandatory and elective courses outlined in the curriculum.

Mandatory Courses

All students must complete the following mandatory courses to earn this certificate.

- LAW 579 Global Regulatory Compliance Units: 2
- LAW 603 Business Organizations Units: 3, 4, 5
- LAW 764 International Business Transactions Units: 3 or 4

Elective Courses

Students may select from among the following elective courses to complete the unit requirements for this certificate. Students should be advised that the following courses have a prerequisite requirement: FBE 523, FBE 527, FBE 529, FBE 532, and FBE 560.

- LAW 626 International Investment Law and Arbitration Units: 1, 2
- LAW 637 International Trade Policy Units: 1, 2, 3, 4
- LAW 658 Mergers and Acquisitions Units: 1, 2, 3, 4
- LAW 662 Public International Law Units: 2, 3, 4
- LAW 697 Foreign Relations and National Security Law Units: 2, 3, 4
- LAW 709 Contract Drafting and Negotiation Units: 2, 3, 4
- LAW 714 U.S. Foreign Policy and International Law Units: 1, 2, 3, 4
- LAW 775 Immigration Law Units: 2, 3, 4, 5
- LAW 817 International Arbitration Units: 3
- LAW 829 Cross-Cultural Dispute Resolution Units: 2
- LAW 863 International Negotiations and Mediation Units: 2, 3, 4
- FBE 523 Venture Capital and Private Equity Units: 3
- FBE 527 Entrepreneurial Finance: Financial Management for Developing Firms Units: 3
- FBE 529 Financial Analysis and Valuation Units: 3
- FBE 532 Corporate Financial Strategy Units: 3
- FBE 560 Mergers and Acquisitions Units: 3
- GSBA 548 Corporate Finance Units: 2, 3
- MOR 542 Strategic Issues for Global Business Units: 3
- PPD 526 Comparative International Development Units: 2
- PPD 688 Business and Public Policy Units: 4

Doctoral Degree

Law (JD)

The Juris Doctor is the basic law degree. To obtain the degree, a student must satisfactorily complete 88 units, be in full-time attendance for six semesters and complete all required courses. Several options are available through which students may, with appropriate permission, take courses outside the law school. Except with special permission, however, each student (including a dual degree student) must successfully complete at least 37 units beyond the first year curriculum, in law courses, taken at this law school, and graded in the normal manner. Each student must also complete a minimum of 64 of the required 88 units by attendance in regularly scheduled class sessions at the law school. A law student is expected to devote the major portion of his or her time to law studies; any outside employment must therefore be restricted. First-year students are not permitted to hold jobs, and second- and third-year students may not hold outside employment requiring more than 20 hours of work per week.

First-year students are required to carry the full load of courses prescribed for that year, and second- and third year students are required to carry between 13 and 17 units each semester, unless

special permission to carry a reduced or enlarged schedule is granted by the dean of academic services. All students must complete six full-time semesters.

Requirements for degrees, as well as the courses offered, may be changed by the faculty at any time. The dean of academic services may waive some requirements for individual students.

The First Year

During the first year, the student takes a required curriculum of basic courses that examines fundamental legal institutions and addresses legal problems relevant to contemporary society and the modern practice of law.

In the fall semester, students take Torts, which explores the individual's obligation to refrain from harming others and studies the bases for compensating persons who suffer injuries — either by holding responsible whomever is at fault for the harm, or by invoking other principles of liability including the efficiency of resource allocation and spreading of losses.

Procedure introduces students to the issues of what constitutes fair, adequate and efficient procedures in resolving legal disputes. Study focuses on the procedures outlined in Federal Rules of Civil Procedure.

Contracts studies the law regulating consensual arrangements entered into for commercial purposes. It concerns such questions as what promises do and should the state enforce and what remedies are available when enforceable promises are breached.

Business Fundamentals is an optional course that introduces students who lack a business background to the basic vocabulary, concepts and modes of analysis relevant to the organization, financing, and governance of corporations and other enterprises.

In the spring semester, students take Criminal Law, which studies issues relating to the decision, by legislature or court, to designate behavior as a "crime." Significant attention is given to the moral, psychological and philosophical issues involved in ascribing criminal responsibility.

Constitutional Law focuses on fundamental structure provisions and relationships under the U.S. Constitution with an emphasis on separation of powers and federalism.

Property analyzes the development of rules dealing with land, water and other natural resources, frequently from historical and economic perspectives.

Legal Profession or Ethical Issues for Public Interest, Government and Criminal Lawyers offer a traditional or specialized examination of the role of the lawyer in society; the history and organization of the legal profession; the adversary system and access to justice; and ethical rules on fulfilling professional duties in a variety of practice settings.

All students take a year-long course, Legal Research, Writing and Advocacy. The course provides students an opportunity to draft pleadings and to prepare legal memoranda and briefs. Toward the end of the second semester, each student participates in a moot court argument based on work previously prepared for the course.

Students study basic sources of the law — case reports, constitutions, statutes and interdisciplinary materials. There is no uniform method of teaching, but Socratic dialogue and class discussion are primarily employed to help the students analyze issues, reasons and arguments. Moreover, law school faculty have traditionally employed interdisciplinary approaches in analyzing legal problems. First-year classes meet in sections of 60 to 100 students, about half the class size of many law schools.

The Second and Third Years

Requirements

The upper two years of law study are primarily elective, with only three requirements. First, students must satisfy the upper division writing requirement, either by completing a major faculty-supervised writing project or by taking a course with a substantial writing component.

Second, students must enroll in course work that offers substantial instruction in professional skills generally regarded as necessary for the effective and responsible participation in the legal profession. Such course work includes simulation courses (including Trial Advocacy and Pretrial Advocacy), live-client clinical offerings and courses involving the drafting of legal documents (including Contract Drafting and Negotiation).

Finally, students must take the Constitutional Rights class.

Course Offerings

The basic courses that most students elect to take — for example: Business Organizations, Evidence, Taxation, and Gifts, Wills and Trusts — are offered every year and usually twice a year. Other courses listed are offered once a year, or in some cases, every other year. Each year the law school attempts to provide upper-division students with a wide variety of optional specialized courses. Often these reflect the research interests of the faculty. Because there are specialty courses in nearly every major area of the law, upper-division students are able to concentrate in a particular area, or, if they prefer, pursue a broad, basic legal education.

Clinical Offerings

The upper-division curriculum includes a variety of opportunities for clinical legal education. "Clinical" courses are of two kinds. First, clinical refers to courses in which the learning of legal principles occurs through actual work on cases in particular subject matter areas. For example, the law of prisoners' rights and post-conviction remedies is taught in the Post-Conviction Justice Project, a course in which students represent inmates in the California Institution for Women. This representation is under the direct supervision of full-time law school faculty members. About 20 students participate each semester, traveling to the prison to meet with their clients on a regular basis, attending seminars at the law school, preparing briefs and papers, drafting habeas petitions, and negotiating and dealing with prosecutors and prison and court personnel. In addition, students make court appearances on behalf of clients in state and federal courts, as well as courts of appeals.

The second type of clinical course concentrates on specific lawyering skills taught in a classroom setting through the use of hypothetical case materials, with actors playing the roles of clients. The best illustration of this form of clinical teaching is the three-course sequence of Pretrial, Trial and Appellate Advocacy, which covers the stages in the litigation process suggested by the course titles. In these courses, students actually perform, in a simulated courtroom or law office environment, the multiple tasks required of lawyers. Most work is done in small groups; students are videotaped and intensively reviewed by the instructors. A student can take part or all of this sequence. The three courses together require the student to do at least the following: client interviewing and counseling, legal research, fact-finding, drafting of legal documents, negotiation with opposing counsel, arguing pretrial motions to a judge, preparing witnesses to testify, selecting a jury, conducting direct and cross-examination, proposing and opposing exhibits and testimonial evidence, arguing to a jury, and drafting and arguing an appellate brief.

The Post-Conviction Justice Project and the advocacy courses are not the only clinical courses in the curriculum, but they are useful examples of the variety of clinical teaching. A course in a specific area of law, like the Post-Conviction Justice Project, necessarily requires students to acquire basic courtroom, negotiation and client interviewing skills. The skills-oriented advocacy courses require students to be familiar with substantive areas like evidence, procedure and the law in the area of the hypothetical client's problems. These two kinds of clinical courses supplement each other, just as substantive knowledge and expert skills do in the practice of law. Considered as a whole, USC's clinical courses provide the foundation of knowledge and skill necessary to begin the practice of law.

Judicial Externships and Clinical Internships

The clinical opportunities listed previously are focused primarily within the law school. In addition, there are two categories of clinical options for students to pursue outside the law school in the actual environments of courts and law offices.

The first of these, the judicial externship program, enables students to receive credit for full- or part-time work as an extern to a judge of the state or federal court. Students are selected by the judges themselves. USC students have served as externs in the California Supreme Court, U.S. Court of Appeals, U.S. District Court, U.S. Bankruptcy Court, California Court of Appeal and Superior Court. During the externship, each student is supervised by the assistant dean and the placement supervisor.

The second program, the clinical internship option, allows USC Gould students to work part-time in government agencies, legal services programs or other nonprofit organizations under the supervision of practicing attorneys and faculty members. Students earn academic credit while providing representation to actual clients, learning important government processes or participating in large-scale impact litigation. Since the program includes more than 50 pre-approved agencies, students may choose from a wide range of clinical internships.

Neither program is considered a regularly scheduled class session for purposes of graduation requirements.

Individual Research Projects

A wide variety of courses and institutes offers opportunities for upper-division students to engage in individual research under faculty supervision and often in conjunction with course offerings, as well as to participate in large research projects. Projects presently underway include the uses of ocean and sea resources, the development and regulation of geothermal energy, sentencing practices in felony cases, the effects of real estate taxation, the delivery of legal service to low- and middle-income persons, the civil commitment of elderly persons, the relationships between corporate law and actual corporate practices, and theoretical studies in law and economics. Such research projects are financed by grants from the Brookings Institution, the U.S. Commission on Civil Rights, the National Science Foundation, the Ford Foundation, the Lincoln Institute of Land Policy, the National Institute of Mental Health, and the Energy Research and Development Administration.

Independent research completed for academic credit is not considered a regularly scheduled class session for purposes of graduation requirements.

Courses Outside the Law School

With the concurrence of the dean of academic services, a student may receive up to 12 units of JD credit for courses taken outside the law school. These courses must be on the graduate level and may be taken only at USC. Taking graduate level courses outside the law school is an alternative to the dual degree program; a student may not pursue both approaches. For purposes of meeting the 37-graded-units rule, all non-law courses are counted as CR/D/F units.

A student may, with permission of the dean of academic services, enroll in and transfer the credit from a law course taken at another school that is a member of the Association of American Law Schools, if the course is equivalent to one included in the USC Gould curriculum that will not be offered here during the semester the student takes the course. Credit will be granted only for courses graded "C" or better. A maximum of 5 such units may be counted toward the JD.

Courses taken outside of the law school are not considered regularly scheduled class sessions for purposes of graduation requirements.

Course Selection in the Upper Division

With such a variety of courses available, how do second- and third-year students go about selecting the program that will be best suited to their individual interests and ambitions?

There are no precise rules or proven methods for selecting second- and third-year courses. To a large extent, these choices reflect each student's personal assessment at the end of the first year — strengths and weaknesses, developing intellectual interests and first tentative career plans. For this reason, the combination of courses most desirable for one person will not necessarily be best for anyone else. Students are urged to be wary of the notion that there is a specific, recommended curriculum to follow. But reluctance to impose a model course of study does not mean that no guidance is available, for there are at least four ways of thinking about these choices that, in combination, will help each student choose the best array of courses.

One recommended approach to course selection is to choose courses taught by professors the student admires, without regard to subject matter. For each student there are teachers who are particularly able to create intellectual excitement and whose approach to analysis and teaching strikes a responsive note. Students will benefit as much from exposure to a specific professor's analytic skills and approach to legal issues as from specific course content.

A second approach is to choose courses that look exciting, without worrying about whether such courses are directly related to the student's current career plans or to some idea of traditional curriculum. If it appears that a course will be intellectually interesting, will expose students to a new area of the law, or provide needed variety, there is already more than enough reason to enroll. Courses taken because of enthusiasm for either the instructor or the subject matter often lead to the richest academic experience of law school.

The third way to make decisions about taking courses is to classify them according to clusters that emphasize similar issues or themes and then select from each area. For example, a student interested in ideas about family relationships will find them discussed in different contexts in Gifts, Wills, and Trusts; Family Law; and the Children's Legal Issues Practicum. Trial Advocacy and Pretrial Advocacy are courses that teach practical litigation skills, relating various performance tasks to the underlying skills of legal writing, advocacy, legal counseling, negotiation, and factual analysis. A further example includes courses involving close work with statutes, such as Labor Law, Securities Regulation and Taxation, any of which will provide opportunities to develop important and transferable skills.

Finally, students might think about selection as a way of building a wide substantive expertise in an area of particular interest. For example, the following courses are crucial to one anticipating a substantial wills and estate planning practice: Family Law; Community Property; Taxation; Estate Planning; Real Estate Transactions; and Gifts, Wills and Trusts. This kind of course planning requires some thought and investigation, since a casual examination might omit such courses as Community Property (which may affect one's legal ability to transfer property by will), and Real Estate Transactions (since various forms of property ownership may dictate a specific will or create planning considerations).

These approaches to course selection describe only some of the ways in which students might make reasoned choices about their academic programs. Formal and informal academic counseling is available from the associate deans and other faculty.

Keck School of Medicine of USC

Departments

- PhD Programs in Biomedical and Biological Sciences (PIBBS)
- Department of Anesthesiology
- Department of Biochemistry and Molecular Medicine
- Caruso Department of Otolaryngology, Head and Neck Surgery
- Department of Integrative Anatomical Sciences
- Department of Family Medicine
- Department of Medical Education
- Department of Molecular Microbiology and Immunology
- USC Mark and Mary Stevens Neuroimaging and Informatics Institute
- Department of Pathology
- Department of Physiology and Biophysics
- Department of Population and Public Heath Sciences
- Department of Stem Cell Biology and Regenerative Medicine
- Department of Translational Genomics

Founded in 1885, the Keck School of Medicine of USC is part of Keck Medicine of USC, a major center of medical research, education and patient care with more than 2,100 full-time faculty members and a voluntary faculty of more than 1,500. Included on the faculty are national leaders in each of its 26 clinical and basic science departments. Located on the university's 30.8-acre Health Sciences Campus three miles northeast of downtown Los Angeles, the Keck School is adjacent to the Los Angeles County+USC Medical Center, one of the largest teaching hospitals in the United States.

The Keck School's faculty, students and residents serve more than one million patients each year through the Los Angeles County+USC Medical Center, the USC Norris Cancer Hospital, the Keck Hospital of USC, Children's Hospital Los Angeles, USC Verdugo Hills and a network of USC-affiliated hospitals throughout Southern California. More than 1,700 faculty physicians and other clinical providers deliver primary care and care for patients with complex medical needs.

The Eli and Edythe Broad CIRM Center for Regenerative Medicine and Stem Cell Research of USC, the USC Norris Comprehensive Cancer Center, the Zilkha Neurogenetic Institute, the USC Stevens Institute for Neuroimaging and Informatics, the Translational Genomics Institute, the CardioVascular Institute, the Alzheimer's Therapeutic Research Institute, and the Department of Population and Public Health Science provide state-of-the-art facilities for important scientific discovery. The Clinical and Translational Science Institute provides training and support for physicians and scientists performing clinical, translational and discovery-based health and biomedical research. With more than $280 million in total federal research support, the Keck School ranks among the top U.S. medical schools in federal funding.

The Keck School of Medicine of USC is at the forefront of medical education and was among the first medical schools to adopt Introduction to Clinical Medicine courses for first-year students, providing direct experience in patient care from the start.

Administration

Steven D. Shapiro, MD, *Interim Dean*
Thomas A. Buchanan, MD, *Vice Dean, Research*
Donna D. Elliott, MD, EdD, *Vice Dean, Medical Education, Chair Department of Medical Education*
Peggy J. Farnham, PhD, *Vice Dean for Health and Biomedical Sciences Education*
Kathryn Carrico*, Vice President for Health Sciences Advancement*
Glenn Ault, MD, *Senior Associate Dean for Clinical Administration*
Ted Budge, MS, *Senior Associate Dean and Chief Operating Officer*
Robert Milner, PhD, *Senior Associate Dean, Faculty Affairs*
Lawrence M. Opas, MD, *Senior Associate Dean, Graduate Medical Education*
Raquel D. Arias, MD, *Associate Dean, Admissions, Interim Associate Dean for Student Affairs*
Lourdes Baezconde-Garbanati, PhD, *Associate Dean, Community Initiatives*
Ron Ben-Ari, MD, *Associate Dean, Curriculum and Continuing Medical Education*
Inderbir Gill, MD, *Associate Dean, Clinical Innovation*
Stephanie Hall, MD, *Associate Dean for Clinical Affairs (Keck Medical Center)*
Sarah Hamm-Alvarez, PhD, *Associate Dean, Basic and Translational Research*
Martin Kast, PhD, *Associate Dean for Academic Integrity*
Caryn Lerman, PhD, *Associate Dean for Cancer Programs*
Kevin Lohenry, PhD, *Associate Dean for Graduate Student Affairs*
TJ Malseed, *Associate Dean for Information Services, Chief Information Officer*
Kathleen Nelson, MD, *Associate Dean for Leadership and Wellness*
Ite Offringa, PhD, *Associate Dean, Graduate Affairs (PhD Programs)*
Joyce Richey, PhD, *Associate Dean for Diversity and Inclusion Education*
Jehni Robinson, MD, *Associate Dean for Primary Care*
Axel Schönthal, PhD, *Associate Dean for Biomedical MS Programs*
Brad Spellberg, MD, *Associate Dean, Clinical Affairs (LAC+USC Medical Center)*
Maura Sullivan, EdD, *Associate Dean, Simulation Education for Health Sciences*
